QUOTAS FOR NEW POLITICAL ENTITIES

Section 9 would amend section 202(e) of the Immigration and Nationality Act in two significant respects:

(a) It would assure to new political entities an immigration quota equal to the total of quotas or subquotas presently established for each of the component parts which comprise the new entity, and

(b) It would eliminate the ceiling of 2,000 now imposed on the aggregate of all minimum quotas within the Asia-Pacific triangle.

The prompt enactment of the amendment described under (a) is of particular concern to the Department in view of the imminent independence of the West Indies Federation, now expected in the early part of 1962. Upon gaining independence, the federation will be entitled to an immigration quota which, if computed under existing law, would amount to 100 compared with a total of 1,000 quota numbers now available to the component areas of the Federation. This reduction would be highly undesirable from a foreign policy point of view. Consequently, the Department strongly endorses the proposed amendment which would authorize an annual quota of 1,000 for the Federation. In the absence of this amendment, the United States would be placed in the position of restricting the Federation to a quota of 100 upon its acquisition of an independent status.

While it is recognized that this amendment of section 202(e) of the Immigration and Nationality Act will meet the immediate problem created by the coming independence of the West Indies Federation, the Department wishes to emphasize the importance from a foreign policy point of view of placing all independent areas within the Western Hemisphere on an equal footing. A policy which favors certain political entities by classifying them as nonquota areas while other entities falling within the same general description and located in the same hemisphere are treated as quota areas is injurious to our foreign relations.

The Department also favors strongly the amendment described under (b) inasmuch as any reduction in quotas as required by existing law would adversely affect the foreign relations of the United States. This amendment is of particular importance in view of the forthcoming independence of Western Samoa now scheduled for January 1, 1962.

FRAUDULENT MARRIAGES

Section 10 of the bill proposes to give the Attorney General added authority to prevent the immigration of certain aliens who previously acquired a nonquota status or a preference quota status under the immigration laws by reason of a marriage entered into for the purpose of evading immigration laws. The Department wishes to endorse this amendment in principle.

DANGEROUS CONTAGIOUS DISEASE

Section 11 of the bill would amend section 212(a)(6) of the Immigration and Nationality Act by eliminating the specific references to tuberculosis and leprosy, using instead the generic term "dangerous contagious disease." This proposed amendment is of particular interest to the U.S. Public Health Service. It is anticipated that the regulations of that Service will interpret the term "dangerous contagious disease" to include tuberculosis and leprosy.

CODIFICATION OF REMEDIAL LEGISLATION

Sections 12, 13, 14, and 15 of the bill would amend section 212 of the Immigration and Nationality Act so as to include the remedial provisions of section 4 of the act of September 3, 1954, and sections 5, 6, and 7 of the act of September 11, 1957, as amended. The Department favors as sound legislative practice the incorporation in one statute of all permanent provisions bearing on immigration and nationality.

Consistent with the procedure laid down in section 212(d)(3)(A) of the Immigration and Nationality Act whereby the inadmissibility of nonimmigrant aliens may be waived in the discretion of the Attorney General, the Department believes that any waiver of inadmissibility under the proposed section 212 (f), (g), or (h) in the cases of immigrants should likewise be conditioned upon a recommendation by the Secretary of State or by the consular officer that the alien be admitted to the United States despite his inadmissibility. The consular officer who has the statutory responsibility of examining the alien in connection with his visa application and whose finding of ineligibility to receive a visa forms the basis for any discretionary relief under the proposed section 212 (f), (g), or (h), appears best equipped to develop the facts from his vantage point abroad and thus to enable the Attorney General to reach a proper decision.

WAIVER OF DEPORTABILITY

Section 16 of the bill amends section 241 of the Immigration and Nationality Act to incorporate certain remedial provisions of law now contained in section 7 of the act of September 11, 1957. This amendment pertains to deportation and is of exclusive concern to the Department of Justice.

NATIONALITY AMENDMENTS

Section 17 would amend section 310 of the Immigration and Nationality Act. It is designed to overcome certain judicial interpretations of the saving clause of the naturalization provisions of law by establishing a uniform rule of naturalization. This amendment is of particular interest to the Department of Justice.

EVIDENCE IN DENATURALIZATION PROCEEDINGS

Sections 18 and 19 of the bill relate to the revocation of naturalisation and to the establishment of loss of nationality. These proposed amendments are primarily of interest to the Department of Justice.

RETENTION OF CITIZENSHIP DESPITE RESIDENCE ABROAD

Section 20 of the bill would amend section 354(4) of the Immigration and Nationality Act by extending the provisions of that paragraph to the spouse or child residing abroad with the citizen spouse or parent whose case is within the provisions of paragraph (4). The Department favors the enactment of this amendment since it would promote family unity in citizenship status, and decrease the demand for private bills in cases heretofore not covered by paragraph (4).

TECHNICAL AMENDMENTS AND REPEAL PROVISIONS

Sections 21, 22, 23, and 24 involve changes of a technical nature and repeal certain statutes as well as several temporary enactments which, under the bill, are consolidated with the basic immigration law.

The Department strongly urges that section 24(b) be amended by inserting "(4)" after the word "Paragraphs" at the beginning of this subsection. This amendment would give this Department an opportunity to issue visas to some 350 refugee-escapees to whom visa numbers have been allocated under section 15 of the act of September 11, 1957, but to whom, according to latest reports from consular offices abroad, visas have not as yet been issued for reasons beyond the control of the aliens involved. In the absence of this amendment, the authority for the issuance of these visas would terminate with the enactment of the bill which would create considerable hardship in these cases.

QUOTA STATUS FOR CERTAIN PREFERENCE QUOTA IMMIGRANTS

Section 25(a) of the bill would accord nonquota status to immigrants who have been accorded second and third preference quota status under the provisions of section 203(a) (2) and (3) of the Immigration and Nationality Act if petitions in their behalf were approved by the Attorney General prior to June 30, 1961. According to the estimates of this Department, some 18,000 aliens will benefit from this provision.

This Department would prefer to see permanent legislation enacted to relieve the recurring pressure on existing quotas. It is the opinion of this Department that the establishment of a quota reserve as referred to in section 5 of S. 1809 with the modifications recommended by this Department in its report to the chairman of the Senate Judiciary Committee on July 12, 1961, would meet this objective. In addition to meeting on a permanent basis the recurring problem of pressures on certain quotas, this formula would also tend to stabilize the workload in the Department as well as in the field, thereby avoiding the need for the employment of temporary staffs with its resultant budgetary and personnel problems.

I trust that this information will answer your inquiry and will be helpful to you and the other conferees on S. 2237. Should any additional data be required, I will be pleased to supply them.

Sincerely yours,

BROOKS HAYS,
Assistant Secretary
(For the Secretary of State).

FEED GRAIN PROGRAM, 1961

Mr. HUMPHREY. Mr. President, it is indeed fortunate that Congress approved the 1961 feed grain program. Yesterday's—September 11, 1961—crop report showed dramatically the effect of favorable weather conditions on both corn and grain sorghum yields per acre. Corn for grain is being produced on 58.3 million acres with a phenomenal record national average yield of 60.4 bushels per acre. Grain sorghums, with 10.9 million acres estimated for harvest for grain, are estimated to yield 44 bushels per acre. Production is estimated at 3,520 million bushels for corn and 480 million for grain sorghums.

Had there been no 1961 feed grain program, corn would be about ready to harvest from 71.5 million acres—as in 1960—and grain sorghum acreage would have been approximately 15.5 million. These acreages with the tremendous yields produced by weather conditions this year would have produced 4.2 billion bushels of corn and 667 million bushels of grain sorghums. These calculations are based on the assumption that the yield on the 1961 crop without a feed grain program would have been 59 bushels per acre for corn and 43 bushels per acre for grain sorghums.

This would have placed almost an intolerable burden on the feed grain supply situation. Prices received by farmers both for corn and for livestock would have decreased to extreme lows and farm income would have dropped. CCC expenditures would have reached new highs under the open-end production and open-end eligibility for the price-support program which would have continued without the 1961 feed grain program.

Some will argue that the phenomenal yields this year are a result of the increased use of fertilizer on the best acres used on each farm for corn production. Actually, available data on supplies of fertilizer materials moving from primary producers to mixers, distributors and others indicate that the use of fertilizers on 1961 crops is down a little from use in the previous year. Moreover, and perhaps most important is the fact that of the difference between yield on the 1960 crop of corn and the 1961 crop—5.9 bushels per acre—2.9 bushels or approximately 50 percent occurred as a result of improvement in the crop in August, after it is too late to apply fertilizer. All of the other 50-percent increase in yield outlook occurred in July during much of which month it is not possible to make effective use of fertilizer. These facts clearly show that weather conditions, which have probably never been better for corn production, are the primary factor in the yield of corn expected in 1961.

The program, which has been the subject of some comment both in and out of Congress, has saved the taxpayer a substantial sum of money and has saved the Government of the United States millions of dollars. It has increased the income to our farm producers, on the average, about 10 percent. I believe that it is a record of which the administration can be justly proud.

CONGRESSIONAL DISTINGUISHED SERVICE AWARDS, 1961

Mr. HUMPHREY. Mr. President, last Friday four outstanding members of the 86th Congress received the 1961 Congressional Distinguished Service Awards presented biannually by the American Political Science Association. The awards were presented at the association's 57th annual meeting in St. Louis to the senior Senator from Illinois [Mr. DOUGLAS], the senior Senator from Vermont [Mr. AIKEN], and two Members of the House of Representatives, Representative RICHARD BOLLING, of Missouri, and Representative GERALD R. FORD, JR., of Michigan.

I rise to add my tributes and my congratulations to those already received by these outstanding public servants. They have set an example which stands as a constant challenge to every Member of Congress. All of us recognize the diligence and hard work which these Members expend every hour of the day, and more than half the hours of the night, in fulfilling their responsibilities as elected representatives of the United States. I am extremely pleased that the American Political Science Association chose to honor these four Members of Congress with the 1961 Congressional Distinguished Service Award.

These awards have an interesting and unusual history. In 1955 a highly respected Member of this body, Senator William Benton, of Connecticut, wrote an article for the New York Times magazine in which he asked this question: "Can we devise means of rewarding and drawing public attention to the work of the quiet—but invaluable—Senators and Congressmen?" Senator Benton answered this question with the specific proposal that citations for distinguished service in Congress be presented by the American Political Science Association to the five outstanding Members of each Congress as judged by criterion of dedicated service in the public interest, whether or not this service resulted in headlines and front-page publicity.

I quote further from Senator Benton's article:

> We gladly debate the merits of writers, dentists, junior and senior executives, ministers of the gospel, storekeepers, and even scientists. Do we lack the resourcefulness to assess key political policymakers, and to bring them out in the open so that we can better judge their deeds and know who they are? The Members of Congress are the most remarkable group that I have ever met anywhere; and in integrity, intelligence, and hard work they rank above any group with whom I have ever worked. This is as great a tribute as I know to pay to men and women who are so frequently kicked around, abused, misunderstood, and unappreciated.

I know I am joined by every colleague in an enthusiastic and resounding "Amen" to those words.

Unlike so many proposals of this nature, this one to establish a Congressional Distinguished Service Award became a reality within 5 years. The American Political Science Association moved to implement this suggestion. Senator Benton himself—acting through the Benton Foundation—provided the funds needed to make an appropriate award. The first Congressional Distinguished Service Awards were presented by the association in 1959 for service in the 85th Congress.

I believe that these awards are particularly important because they represent a forceful reaffirmation of the centrality of the legislative process to the American democratic system of government. Today we constantly hear the argument that all power and influence has gone from Congress to the executive branch. We are told that Congress lacks the means, the intelligence, and the will to deal effectively with 20th century challenges and problems. We are frequently looked upon as something which accidently survived the 19th century and which must be patiently tolerated, if not totally ignored.

But we who labor here know this argument is not true. We know that those people who make it do not understand America's true heritage. We know that if this argument ever were true, the American democratic system would be totally dissolved into executive tyranny.

Rather than diminishing the importance of Congress, I believe the challenges facing our country today increase significantly the necessity for outstanding legislative service. We are, after all, those governmental officials closest to the citizens of America. We reflect, more accurately than anyone else, their wishes, their opinions, their hopes, and I might hope, their basic wisdom. Like these citizens, we make mistakes; but, like them, let no one doubt our patriotism, our determination, and our courage.

In truth our Nation has never before been faced with such gigantic tasks. Our country has never before called for such patriotic and unselfish service from its elected representatives in Congress.

It is in terms of national survival that the importance of the Congressional Distinguished Service Awards is clearly appreciated. There are no harder working legislators in Congress than Senators DOUGLAS and AIKEN and Representatives BOLLING and FORD. They serve not only their immediate constituents in Illinois, Vermont, Missouri, and Michigan, but most certainly the entire Nation.

I ask unanimous consent that the citations which accompany the presentations of the service awards at the 57th annual meeting of the American Political Science Association in St. Louis be printed at this point in my remarks.

There being no objection, the citations were ordered to be printed in the RECORD, as follows:

CONGRESSMAN RICHARD BOLLING, DEMOCRAT, OF MISSOURI

A master strategist who serves as crucial link between the House leadership and the Democratic liberal bloc and enjoys the complete confidence of both, RICHARD BOLLING is a political realist who, while recognizing the necessity for compromise, refuses to desert basic principles. A careful student of politics who clearly enjoys his active role within it, he has been able to build a unique role for himself as a bridge between the northern and southern wings of the Democratic Party and has become a trusted aid of Speaker RAYBURN. He has dedicated his career to building that "vital area of consensus" on which rests the fate of so much legislation.

The American Political Science Association takes great pleasure in presenting this Congressional Distinguished Service Award to RICHARD BOLLING, Democrat, of Missouri—thorough technician, brilliant strategist, articulate congressional spokesman for liberal thought, and responsible custodian of power and influence.

CONGRESSMAN GERALD R. FORD, JR., REPUBLICAN, OF MICHIGAN

With the continuing growth of executive power, the always important legislative function of control over "the purse strings" has assumed an even greater role in our democratic system.

Occupying one of the most difficult, time-consuming and important positions in the House as a ranking member of the Defense Appropriations Subcommittee, GERALD FORD has, through diligent application to committee work and mastery of highly complex defense matters, indeed earned the appellation of a "Congressman's Congressman." A moderate conservative who is highly respected by his colleagues of both parties, he symbolizes the hard-working, competent legislator who eschews the more colorful, publicity seeking roles in favor of a solid record of achievement in the real work of the House: committee work. Nonpartisan where the defense posture of the country is concerned, he nonetheless occupies an important position in the national councils of his party and is a recognized leader of the Republicans in the House.

The American Political Science Association is privileged to present this Congressional Distinguished Service Award to GERALD R. FORD, JR., Republican, of Michigan—party leader, responsible critic, respected participant in debate, conscientious, dedicated, and judicious committee member.

SENATOR GEORGE D. AIKEN, REPUBLICAN, OF VERMONT

Pursuing a highly independent course, GEORGE D. AIKEN has performed his senatorial duties with a responsibility that has resisted the extremism of both the right and the left. Making full use of his New England prerogative of not speaking unless he has something to say, he specializes in stripping away partisan pretension from the vital issues before Congress, substituting the oft-maligned but ultimately indispensable notion of the public interest. Particularly in the areas of foreign policy and agriculture, his facility for searching criticism tempered by commonsense provides one of the essential ingredients in the successful functioning of a representative democracy.

The American Political Science Association takes great pleasure in presenting this Congressional Distinguished Service Award to GEORGE D. AIKEN, Republican, of Vermont—respected conciliator, effective legislator, rugged Yankee individualist, and symbol of bipartisan responsibility for this Nation's welfare.

SENATOR PAUL H. DOUGLAS, DEMOCRAT, OF ILLINOIS

Viewing his senatorial role in the progressive tradition of Norris and La Follette, Paul H. Douglas has kept on the Nation's current agenda many of those enduring problems which otherwise might be accidentally overlooked or deliberately ignored.

Having established himself as one of this Nation's most respected economists, he brought to the Senate a breath of understanding regarding the Federal Government's role in combating domestic, economic, and social problems combined with unsparing criticism of governmental waste and inefficiency.

Reflecting the courage tempered by his distinguished military service, he has viewed the right to advocate unpopular but crucial causes as a personal duty and he has prophetically raised the eternal problems of human freedom and dignity in terms of our contemporary democratic society.

The American Political Science Association is privileged to present this Congressional Distinguished Service Award to PAUL H. DOUGLAS, Democrat, of Illinois—rigorous intellect, responsible, independent, defender of human rights, and consistent advocate of social progress.

Mr. HUMPHREY. Mr. President, I believe these words indicated with unusual force and clarity the factors which determined the respective selections.

The recipients of the Congressional Distinguished Service Awards are determined by a special awards committee appointed by the American Political Science Association. In 1961 the committee was composed of John D. Millett, president of Miami University—Ohio—as chairman; Max M. Kampleman, Washington attorney and treasurer and counsel of the association; Harold D. Lasswell, professor of law and political science at Yale University; John W. Lederle, president of the University of Massachusetts; James W. Miller, president of Western Michigan University; and John A. Perkins, president of the University of Delaware. The committee's selections were made from initial nominations by members of the Washington Press Association and the American Political Science Association. Dr. Millett presented the awards at the ceremony last Friday.

The award itself is a bronze plaque in the shape of an open book. The pages of the book are inscribed with the closing words of Lincoln's Gettysburg Address: "that government of the people, by the people, for the people shall not perish from the earth."

The bronze book is mounted on a deep red marble base which also serves as a fountain pen holder. It is a most handsome and meaningful work of art.

Mr. President, our colleagues who received this signal honor last Friday deserve our congratulations. Moreover, the American Political Science Association and the William Benton Foundation should be congratulated for making these awards a reality. But of most importance, all the American people—and particularly those who serve in Congress—should view this biannual presentation as a national reaffirmation of faith in the legislative process. These awards should symbolize the great responsibility we bear for the continued survival of democracy and liberty in an age of tyranny and slavery.

Mr. WILLIAMS of Delaware. Mr. President, I join the Senator from Minnesota in congratulating our distinguished colleagues in the Senate and in the House on receiving the awards of the American Political Science Association. I join him in saying that the association could not have picked two more worthy Senators than those who were selected.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. KEATING. I join in saluting our colleagues here and in the other body, with all of whom we have worked. We know that the American Political Science Association could not have picked any more worthy persons in either body of Congress to receive this honor. I regret that my distinguished friend from Minnesota rather spoiled the beauty of

the occasion by joining onto his felicitations a boost for the feed grain program, upon which I have had some comments and upon which I shall hereafter have other comments, including perhaps comments on the fantastic figures presented by the distinguished Senator from Minnesota. But because I differ with him on the feed grain program does not mean that I cannot share with his good commonsense when he praises these colleagues with whom we have worked and whom we all know are so deserving of the high honor they have received. I think that his commendation of the American Political Science Association is also very much in order. To my way of thinking, the awards are very much to be cherished. They are a great stimulus to all in Congress to try to do a better job day in and day out. The association has performed a very distinct service by calling attention to and honoring these outstanding colleagues who surely merit such recognition.

LIMITATION INVOLVING NATIONAL SECURITY OF PROHIBITION ON PAYMENT OF ANNUITIES AND RETIRED PAY TO U.S. EMPLOYEES

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 844, H.R. 6141.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 6141) to amend the act of September 1, 1954, in order to limit to cases involving the national security the prohibition on payment of annuities and retired pay to officers and employees of the United States, to clarify the application and operation of such act, and for other purposes.

The PRESIDING OFFICER. The question is on the motion of the Senator from Montana.

The motion was agreed to, and the Senate proceeded to consider the bill.

Mr. CLARK. Mr. President, the bill appears on the Senate Calendar for the third time in 2 years, having for the third time been unanimously reported favorably by the Senate Committee on Post Office and Civil Service. I have been selected as the Senator in charge of handling the bill because, as on former occasions when the bill came before the Senate, I happen to be the chairman of the subcommittee which considered it.

The bill is identical with the bill passed by the House on April 14, 1959, and again by voice vote in the House on July 12, 1961. Its purpose is to amend the act of September 1, 1959, dealing with the general subject of retirement and annuities in order to limit the cases involving the national security, the prohibition on the payment of annuities and retired pay to officers and employees of the United States.

The measure continues the prohibition contained in the 1954 act, as amended, against the payment of civilian annuity or military retired pay to any person who has committed an offense against the national security of the United States or who refuses to testify before a duly constituted judicial or congressional proceeding in a matter relating to the national security.

The measure restores civilian annuity benefits and military retired pay, including survivorship benefits to a number of widows and children, which, under the act of September 1, 1954, have been denied because of the commission of a variety of offenses in no way related to the national security.

The act of 1954 prohibits the payment of a civilian annuity or military retired pay to civilian employees or military personnel who are convicted of any one of a long list of criminal offenses enumerated in the statute. However, neither an annuity or retired pay awarded on or after September 1, 1954, may be paid regardless of the date the offense or conviction occurred. In cases where civilian annuity is denied, a refund of the individual's contributions to the retirement fund, with interest, may be made. In the case of a denial of military retired pay there is no deposit to be refunded.

On page 2 of the committee report appears an exhibit showing a summary of claims which were initially denied; those which were subsequently allowed, the number of claims still denied, also those which would be allowed upon enactment of the measure now before the Senate, as well as claims which would continue to be denied because of offenses involving the national security.

There is a series of detailed case explanations in the back of the report. The explanations cover five pages. These pages show the facts with respect to each of these cases dealt with by the bill. There is another exhibit in the back of the report which lists 51 cases in which retired pay has been denied to military persons by reason of Public Law 769, 83d Congress.

The military list is somewhat shorter than the civilian list, because as was testified in the hearing, which was held by the committee on July 26, 1961—and this appears in the footnote on page 33 of the hearings—"to insure that all cases were included in the listing would have required a costly and time-consuming examination of all retired records. These records are located in various parts of the country and not in one place, as is the case with Civil Service Commission records."

However, I believe that the sampling of the 51 military cases which appears in the report is a fair sampling.

It was the unanimous view of our committee, as it was twice the view of the House of Representatives, that a serious miscarriage of justice has resulted by reason of denial of rightful retirement benefits to former employees and military personnel and survivors of such persons convicted of offenses having nothing to do with the national security in violation of the original intent of the Congress in passing the law.

The bill would remedy this situation by providing for the restoration of civilian annuities and retired military pay to former employees and military personnel, including survivors, who have been denied such benefits under the act of September 1, 1954, because of conviction of offenses not related to the national security.

Such denial is clearly in violation of our traditional sense of justice, and also in violation of a contract which was entered into between the Government and the employee who was permitted to make payments under the law and which entitled him to an annuity.

On pages 3 and 4 are references to three typical cases of the injustice of which I speak. I ask unanimous consent that the references to case No. 1, case No. 85, and case No. 92, listed on pages 3 and 4 of the committee report, be printed in the RECORD at this point. These cases are a part of exhibit A.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

CASE NO. 1—EXHIBIT A

A postal clerk, after 36 years and 1 month of service was charged with embezzling $165 collected for parcel post mailing matter. He was removed from the service and indicted. The court, on considering all the evidence, imposed neither fine nor sentence but placed the former clerk on 3 years' probation.

Public Law 769 has imposed the added penalty of denial of an annuity actuarial value of $35,000.

CASE NO. 85—EXHIBIT A

A truckdriver for the Department of the Air Force, after serving 16 years and 1 month reached the mandatory retirement age of 70 and was separated April 30, 1956. In processing his civilian annuity, his military service during World War I came under scrutiny and it was found that he had been convicted by court-martial in 1918 of theft and selling a Government pistol while in the Army.

The penalty imposed by court-martial was dismissal from the service. Thirty-eight years later, Public Law 769 imposed the added penalty of denying him his civilian annuity with an actuarial value of $8,000, which he had earned through 16 years of honorable civilian service.

CASE NO. 92—EXHIBIT A

A Navy plasterer applied for retirement March 31, 1956, after 35 years and 4 months of service. In adjudicating his retirement claim, it was found that in August of 1946 he had been removed from his position for theft of Government property. He was tried, convicted, and sentenced to 1 hour in the custody of the U.S. marshal.

Public Law 769 imposed the added penalty of denial of an annuity with an actuarial value of $34,000.

Subsequently he received a Presidential pardon which allowed him to receive his earned annuity.

Mr. CLARK. I wish to make a few matters clear, and then I shall be done.

First, I wish to state that in any case in which an employee's offense has resulted in indebtedness to the United United States, the Government has full legal authority to obtain and would obtain restitution by deducting any such indebtedness from retirement payments authorized by the bill. That is set forth in full in a letter received from the Civil Service Commission, which appears at page 4 of the report.

I also wish to make it clear that the bill was initially recommended by the Eisenhower administration. It is now recommended by the Kennedy administration. It is not partisan legislation. The bill has been the subject of public hearings in both the House and the Senate. It is supported by the Bureau of the Budget, the Civil Service Commission, the Post Office Department, the Department of Defense, the Justice Department, and the General Accounting Office.

There was not a word of adverse testimony received from any source, and no Senator suggested amendments to the bill although the Committee gave full notice of the public hearings on the bill and specifically invited colleagues known to be opposed to the bill to appear and testify.

Finally, I invite the attention of my colleagues in the Senate to page 6 of the report, where there are listed various offenses against the national security which are dealt with by the bill, and where it is made quite clear that if an offense is committed against the national security, such as disloyalty, subversion, treason, or the like—and the various offenses are listed on page 6 of the report—the provisions of the bill would not permit the violator of statutes involving national security to receive his annuity.

That is about as far as I care to go at this time.

Mr. MONRONEY. Mr. President, will the Senator yield?

Mr. CLARK. I am glad to yield to the Senator from Oklahoma, a member of the committee, who has been assiduous in his attention to this matter.

Mr. MONRONEY. Mr. President, I served in the House at the time this act was passed. It was passed to meet a specific national security violation which had occurred.

Mr. CLARK. The act of 1954 was passed in response to a specific security case as the Senator has stated.

Mr. MONRONEY. That is correct. It was done with a feeling that we should not in any way be bound by our pension or retirement benefit commitments where someone had violated the Nation's security or was charged with crimes that involved disloyalty to the Federal Government. I cannot remember that in any of the debate there were mentioned any of the circumstances that the Senator has described, or which are shown in the table of some 177 cases, which this bill would restore to full rights of retirement, which of course have been paid for by the 7 percent charged against the annuitants. This is not a matter of a gratuity to Federal employees. It is a retirement policy, such as can be bought from any insurance company.

Mr. CLARK. It is a contract with the employee.

Mr. MONRONEY. Yes. No one would quarrel with removing such a benefit, even if it had been paid for, in the case of someone who had conspired against the national security. However, there have been brought into being a large number of cases which were never intended by Congress to be brought into this category.

I have before me an article published in the Washington Evening Star of February 23, 1961, which tells about a retired Marine Corps veteran with 25 years of honorable service. At the age of 50 he had been honorably retired. He had had four cancer operations in the preceding 3 years, and has a wife and four children.

In 1954 he was retired after 25 years of honorable service, with a letter of commendation from the then Marine Corps Commandant, Gen. Lemuel C. Shepherd, which read in part:

> Your long and valuable service is appreciated and I wish you many years of happiness and prosperity.

This warrant officer had seen battle action during World War II in the Pacific, in Guadalcanal, the Solomon Islands, New Hebrides, and the Russell Islands. He also saw action in Nicaragua in 1931.

The article states:

> There was only one thing that marred his otherwise perfect record.
>
> In 1951 while the assistant officer in charge of a post exchange, he was convicted of the theft of $500. He was fined $750. However, the circumstances apparently weren't very damaging since he was promptly restored to duty and retired 3 years later with full honors.
>
> In 1954 he started receiving his $283 a month pension. However, late last year the Marine Corps belatedly realized that under the Hiss Act he was not entitled to the pension.

I am sure that Congress did not intend to legislate to deny this Marine Corps veteran this benefit.

The fact is that whatever criminal or civil penalties attach to a crime are carried out in full against a Government employee, and probably with more severe punishment than in the case of a private citizen, because of the violation of trust that is involved in connection with a Government employee.

However, to violate a contract for one or more of a long list of offenses, as shown in the report, seems to me to be carrying the intent of the law far beyond that which Congress had in mind when it passed the law to prevent persons like Hiss and others from being allowed to retire on Government pay.

For this reason I believe a reading of the long list of people involved would be most enlightening, to show the punishment they received simply because they were Federal employees. Many of these persons, if the crime were severe enough, would be serving long sentences and paying for them. However, what they were entitled to as workers should not be denied those whose only hope of staying off charity or public assistance rolls would be in the entitlement for which they themselves have paid through their years of Government service.

The Committee on Post Office and Civil Service was unanimous, if I remember correctly. This is not a new item; it has been passed several times by the House.

Mr. CLARK. This was the third time since I have come to the Senate that the Committee on Post Office and Civil Service has been unanimous in approving a House bill to which no objection was raised, so far as I know, in the House or in the Senate Committee.

Mr. MONRONEY. As I understand the act, even though an employee has an automobile accident and is convicted of a felony, he is subject to loss of his right to benefits which may have accrued over 40 years of service. Is not that correct?

Mr. CLARK. The Senator is correct.

Mr. MONRONEY. It seems to me this is really greater jeopardy—I am certain it is greater jeopardy—than we intended to provide when we were legislating for one man. We have denied, and the bill will continue to deny benefits in 12 cases which would come under the head of violation of national security, but would leave a chance for at least 165 persons to be entitled to that which they have accumulated through their own payments and their own service in the Federal Government.

I know of no other retirement plan provided by industrial or insurance companies, or any other such means of providing for retirement, which is automatically canceled in the event a person is convicted of a felony.

It would be the greatest injustice to a man who may have a 25- or 30-year annuity which he has built up in an insurance company to be told by the company, "We are going to give you back your money at age 65, but the rest of the fund which you were building up under contract with the insurance company will be canceled because you had the misfortune to be involved in an automobile accident or a minor embezzlement, or in some one of the many crimes which are committed and for which fines have been meted out by the courts to fit the punishment to the crime."

Mr. CLARK. I thank the Senator from Oklahoma for his assistance.

Mr. MONRONEY. Mr. President, I ask unanimous consent that the entire article related to the Marine Corps veteran be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MARINE'S PENSION REVOKED BY HISS ACT

(By Joseph Young)

How can a 25-year battle veteran with the Marine Corps, who has an honorable discharge and a letter of commendation from the Marine Commandant, wind up not only being denied a pension but owing the Government $20,368 in pension pay?

This actual situation is one of many among Federal civilian employees and military personnel resulting from the so-called Hiss Act which was passed by Congress several years ago.

The law was passed after some Members of Congress discovered that Alger Hiss, who was convicted of perjury as a result of the sensational spy charges made by Whittaker Chambers, would be eligible for a deferred civil service annuity at age 62.

OTHERS INVOLVED

Congress passed a law aimed at denying the annuity to Hiss, but in the process wound

up denying annuities and pensions to hundreds of other Federal employees and military personnel. The law denied annuities and pensions to anyone convicted of a felony against the Government, no matter how minor the offense or how extenuating the circumstances.

The case of the retired 50-year-old Marine Corps warrant officer is one in point. He has had four cancer operations in the past 3 years, and has a wife and four minor children to support.

In 1954 he retired on an honorable discharge after 25 years of service, with a letter of commendation from the then Marine Corps Commandant, Gen. Lemuel C. Shepherd. "Your long and valuable service is appreciated and I wish you many years of happiness and prosperity," General Shepherd wrote.

The warrant officer had seen battle action during World War II in the Pacific in Guadalcanal, the Solomon Islands, New Hebrides, and the Russell Islands. He also saw action in Nicaragua in 1931.

There was only one thing that marred his otherwise perfect record.

CONVICTED OF THEFT

In 1951 while the assistant officer in charge of a post exchange, he was convicted of the theft of $500. He was fined $750. However, the circumstances apparently weren't very damaging since he was promptly restored to duty and retired 3 years later with full honors.

In 1954 he started receiving his $283 a month pension. However, late last year the Marine Corps belatedly realized that under the Hiss Act he was not entitled to the pension.

His monthly pension was not only stopped but he was informed that he owed the Government $20,368 in pension money already paid him since 1954.

The retired officer is in an intolerable financial situation. He not only doesn't have the $20,368, he doesn't have enough money to meet his current bills and expenses. He is broke.

IN POOR HEALTH

The only income for the family of six is provided by his wife's salary of $81 a week. Because of his four operations for cancer, the former officer's health is much too poor for him to secure employment.

If anything happens to him, his family also would be denied the widow's pension to which the families of retired personnel are normally entitled.

The retired officer says, "I just can't help feeling bitter. I devoted 25 years of my life to the service of my country and, except for one mistake for which I paid, my record was an excellent one. Yet it seems as if the U.S. Government is doing everything it can to make life absolutely unbearable for myself and my family. This isn't the American justice in which I have always so strongly believed."

CAN'T LIVE ON $81

He added, "I just don't know how we all are going to live. You certainly can't get along on $81 a week."

As an afterthought, he remarked: "You know, it's ironic. I was in the Solomons the same time that President Kennedy was when he was injured while commanding a PT boat. We were both up to our necks in the war, and now look what's happened to me. I don't want to sound bitter or resentful, but when I look around and see what this is doing to my family, it's hard not to feel that way."

A Presidential pardon for his offense could restore his pension once again, but legislation would still be needed to wipe out the $20,368 he owes the Government.

Congress last year nearly passed a bill amending the Hiss Act which would give this former Marine officer and other Federal employees and military personnel who are now denied annuities, the right to receive their annuities and cancel out any indebtedness. The bill would deny Alger Hiss an annuity by prohibiting such payments in cases involving national security.

BLOCKED IN SENATE

The bill was strongly backed by the Eisenhower administration and cleared the House easily. It also was approved by the Senate Civil Service Committee. But attempts to pass it on the Senate Consent Calendar were blocked when Senator WILLIAMS, Republican, of Delaware, objected. There wasn't enough time left before adjournment for the Senate to take it up on the regular calendar.

Now, similar legislation has been sponsored in the new Congress. The Kennedy administration is expected to support the bill.

The bill's sponsors are hopeful that this time it will become law. So do the hundreds of former employes and military personnel and their families who are now suffering such hardships because of the Hiss Act.

Mr. SALTONSTALL. Mr. President, will the Senator from Pennsylvania yield?

Mr. CLARK. I am happy to yield.

Mr. SALTONSTALL. I shall not oppose the bill, but what disturbs me, as I read it, based upon my experience with respect to several difficult problems of this type, is that it makes no exceptions concerning the restoration of pensions and annuities as a result of domestic crime.

I thoroughly approve of the provision with respect to the security of the United States. On the other hand, suppose a person commits a felony of a serious nature—and what is a crime of a serious nature and what is not is difficult to define—but suppose he commits a serious felony, such as murder, to make it a 100-percent case, or the shooting of a police officer. Why should such a felon be allowed to continue his annuity or his retirement rights, as opposed to a citizen who has lived a clean life and has done his work? The bill covers national security. None of us can have any objection to that. What disturbs me is to think that a person who commits a serious felony may continue to receive his annuity.

Mr. CLARK. My answer to the Senator from Massachusetts is twofold: First, to call his attention to the long list of offenses against the national security on pages 6 and 7 of the report. Where convictions occur in such cases retirement benefits would not be restored under the bill.

Mr. SALTONSTALL. I agree to those.

Mr. CLARK. Heaven forbid that either the Senator from Massachusetts or I should commit murder, but if we did and paid for it with our lives—the bill would not make it impossible for our widows to collect Federal retirement benefits acquired over years of public service prior to the crime. Private insurance benefits and private business retirement benefits payable on death to survivors by contract would also be due under such circumstances. If that be true of private industry, why should there be a more rigorous rule in connection with Government service?

Mr. SALTONSTALL. Government service is an honor or a privilege. The Government desires to have the highest type of citizens. That perhaps may be a generalization. The Senator from Pennsylvania, as a former mayor of a great city, and I, having served in the capacity of chief executive of Massachusetts, know that there are certain kinds of crimes which make a Government employee, when he commits them, unsuitable to remain in the public service.

Mr. CLARK. The Senator is correct. Such a person would be immediately dismissed and penalized according to the criminal law. But should that have any effect on his civil contract rights?

Mr. SALTONSTALL. If his conviction results in his employment being taken away from him, certainly he should be refunded what he has put into the fund himself. What I had in mind, and what disturbed me when I read the bill, and after having had a discussion about it with the Senator from Delaware [Mr. WILLIAMS], is the question whether we should put the high-type citizen who has served his life out, let us say, in the Government Printing Office, or the Civil Service Commission, or the Department of Defense, or anywhere else, in the same category as a man who has committed a serious felony? What constitutes a serious felony, or where the line should be drawn, is something I am not prepared to define at the moment.

Mr. CLARK. All I can say to the Senator from Massachusetts is that this must be a question for each Senator to decide in accordance with his own individual conscience. In the voluminous list of cases which are set forth in the report—and they include all the cases which we have been able to dig up at the Civil Service Commission or the Department of Defense—there is not a single case in which the sentence was for as long as 5 years. The hypothetical case of murder, which the Senator has posed, has not yet arisen.

It is true that Government service is an honor, but I myself can see no reason—and this is a problem for each Senator to decide for himself—for violating a contract with a Government employee, any more than an insurance company would be permitted to violate a contract with a private individual who had taken out a policy, and paid premiums for it, if such person subsequently committed a crime and was convicted and penalized for it.

Mr. SALTONSTALL. The bill relates to a contract to which the Government is a party.

Mr. CLARK. Yes.

Mr. SALTONSTALL. I shall not object to the bill. I am not able to define what is bad. The report is unanimous. What disturbs me is that no domestic crimes are included in the category which would make it impossible for a man to continue his annuity.

Mr. CLARK. If the Senator from Massachusetts will bear with me, I shall like to quote from the testimony of Roger W. Jones, formerly Chairman of the Civil Service Commission, who is at present, as the Senator from Massachusetts knows, Assistant Secretary of State for Administration in the Kennedy

administration. Mr. Jones was Chairman of the Civil Service Commission by appointment of President Eisenhower. He wrote to the committee as follows, when he was Chairman of the Civil Service Commission:

> While the Commission has agreed, and still agrees, that violations of law and other offenses involving the national security justify removal of annuity rights, we are strongly of the opinion that the limitations should stop there. It has never been a part of the philosophy of our legal system to institute and demand criminal penalties in a civil benefits statute. A law having such effect in offenses other than those involving national security is highly discriminatory and very materially enlarges the already stiff criminal penalties described in the appropriate criminal statutes.

The point Mr. Jones makes is that when a man has paid his debt to society, he has paid it; and to add these civil penalties in the nature of forfeiture of contract benefits is not quite right.

Mr. MONRONEY. Mr. President, will the Senator from Pennsylvania yield?

Mr. CLARK. I yield.

Mr. MONRONEY. I have examined the first page of exhibit A, which indicates that in 44 cases, only 10 individuals received any kind of prison sentences. One was for a year and a half; one was for 3½ years; one was for 1½ to 2 years; one was for a year and a day; one was for 3 years; one was for 60 days; one was for 6 months; one was for a year and a year and a day; one was for 3 months to 12 months; one was for a year and a day; one was for 5 months; one was for 18 months.

Three of the cases also involved fines. One was $1,500. One was a fine of $200, in addition to a jail sentence.

It is quite interesting to note that many of the persons who were caught received suspended sentences, and nothing was done. Yet they are subject to the loss of annuities for which they have paid amounts running into thousands of dollars.

Let me refer to 6 fines out of the 44. In one case there was a fine of $1,500, together with a jail sentence.

But in case 4 the sentence was suspended, and the defendant was assessed $30.15 court costs. That was what the judge thought was the proper punishment. But when we consider what the actual loss to the defendant was, we find that he lost a very valuable annuity which would have been worth $4,500. Is not that carrying the punishment to an unjust degree?

Mr. SALTONSTALL. Mr. President, will the Senator from Oklahoma yield?

Mr. MONRONEY. I yield.

Mr. SALTONSTALL. I completely agree with the Senator in regard to the cases he has mentioned.

At one time I was a district attorney; and I agree that when a man completes his jail sentence, we should make every effort to restore him to citizenship.

As I said to the Senator from Pennsylvania, I think government service is an honor.

I agree with what the Senator from Oklahoma has said in regard to all these cases.

But when serious felonies are involved—and as I have said, without devoting a great deal of thought to this situation, I do not know where the line should be drawn—I wonder whether such persons should be treated in the same way and placed in the same category with citizens who have lived clean lives, even though perhaps working in subordinate positions.

Mr. MONRONEY. I agree with the Senator, up to a certain point. But every Senator knows that some evening when a Senator is traveling by automobile to his home State, he may become involved in an automobile accident; and in the process of attempting to determine who was at fault, the district attorney might decide to bring a manslaughter charge against the Senator, and he might be convicted. If the judge determined that the proper sentence under the circumstances was 10 years or longer in jail, in the opinion of the judge that would be the proper and justifiable punishment. But I do not believe that, in addition, after many years of service in the Senate—or, in the case of postal employees or persons in the military service, after a lifetime in that service—a conviction of manslaughter—although, of course, manslaughter is a serious crime—should be allowed to cancel out all that such a person had accumulated, and in connection with which he had paid large amounts of money, and even though his work for the Federal Government had been satisfactory, only by the chance of fate would he then find that he and his wife and his children would forever be denied the benefits of what he thought was an honest retirement contract with his Government. That is not a reward; it is a contract entered into as part of Government service. The old concept that retirement was a gratuity by the employer has long since ceased to be regarded as correct.

So if the Senator will examine the statistics on the sheets which accompany the committee report, he will find them most informative, and he will find that many of those who are entitled to receive such annuities have lost thousands of dollars' worth of annuities to which they were entitled.

Mr. SALTONSTALL. I agree with 85 percent of what the Senator has said. But the situation disturbs me. However, I do not have an answer.

Mr. MONRONEY. The act has been in effect since 1954; yet, of perhaps hundreds of thousands of Government employees who have retired, there have been only 213 cases of this sort; and certainly it is important that we correct the injustices.

In 28 of the cases, the claims subsequently were allowed after the persons involved had received Presidential pardons; in 3 cases the claims were later allowed, after there had been a decision by the Court of Claims; and in 5 cases the claims later were allowed, as a result of reconsideration of the evidence. Those 3 groups make a total of 36—36 out of the 2,130 cleared. That is a very small percentage.

The claims currently denied under the act are 177. The claims which would have been allowed upon enactment of this measure are 165. And the claims which would continue to be denied because of offenses involving the national security are 12—because of subversive activities or crimes against the national security.

But when we consider the magnitude of the offenses and when we compare the treatment in these cases with the treatment accorded the millions of persons who receive social security, it is proper to ask whether social security benefits are denied one who has been convicted of either a major crime or a minor crime.

These annuities have been earned, and the beneficiaries are entitled to them, just as the beneficiary of a life insurance policy is entitled to the proceeds of the policy after the contract with the life insurance company has been entered into.

But this law seeks to punish those in this small group—this small number of unfortunate persons who, by their own acts—either intentionally or unintentionally, or perhaps as a result of drunkenness—have done things for which subsequently they have been convicted.

We must bear in mind that these cases are not the type of civil jurisprudence cases which arise from time to time in the courts. Instead, those involved in these cases have been denied annuities to which they have become entitled after long years of service.

This measure would make such corrections in only the 165 cases of this sort which have come up in all that length of time.

Mr. SALTONSTALL. Mr. President, I am glad to have had this brief discussion with the Senator from Pennsylvania and the Senator from Oklahoma. I think it is very interesting and very philosophical.

Mr. LAUSCHE. Mr. President, will the Senator from Pennsylvania yield to me?

Mr. CLARK. Mr. President, if the Senator from Ohio will permit me to do so, I desire to yield first to the chairman of the committee, the Senator from South Carolina [Mr. JOHNSTON].

Mr. LAUSCHE. Very well.

Mr. JOHNSTON. Mr. President, the Committee on Post Office and Civil Service studied this measure on three different occasions. On each occasion the committee arrived at what it regarded was a good solution of the problem involved.

We found that the bill which had been passed during the heat of the high feeling which prevailed in 1954—and Senators will recall that there was then a great deal of talk about Communists in the Government service and about the number of Government employees who at that time were alleged to be Communists; and the bill was passed under those circumstances, and went much farther than the committee actually intended. Amendments were adopted on the floor of the House and on the floor

of the Senate; and Senators will recall that at that time it was hard to oppose an amendment which related at all to communism.

The truth of the matter is that the bill as drawn up then has penalized a great many Government employees who have committed minor offenses though that was not the intent of the legislation. We think the punishments have been absolutely wrong and have gone too far. For instance, in connection with this point I read now from page 4 of the committee's report:

CASE NO. 92—EXHIBIT A

A Navy plasterer applied for retirement March 31, 1956—

Two years after the passage of the Act—

and after 35 years and 4 months of service. In adjudicating his retirement claim—

And we must bear in mind that he had been working for the Government up to that point—

it was found that in August of 1946 he had been removed from his position for theft of Government property. He was tried, convicted, and sentenced to 1 hour in the custody of the U.S. marshal.

Public Law 769 imposed the added penalty of denial of an annuity with an actuarial value of $34,000.

Subsequently he received a Presidential pardon which allowed him to receive his earned annuity.

Senators should consider how hard it is, for such persons to obtain Presidential pardons, even though the pardons only restore to them the right to receive their earned annuities. That of course, is what should be done in such instances.

Something has been said about the commission of major crimes. I would like to point out that since September 1, 1954, up to February 1, 1961, no major crime, such as mentioned here on the floor of the Senate, has been committed by such persons. Senators will find that of the 213 claims which have been denied, not one of them was denied because of the commission of a major felony.

What does this measure do? It restores 165 claims that have been denied since 1954. In my opinion, it also adequately protects us in the future in respect to our national security.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point the part of the report relating to pertinent sections of the United States Code, beginning on page 6 and continuing to page 7, just before the words "section 2."

There being no objection, the extract was ordered to be printed in the RECORD, as follows:

TITLE 18, UNITED STATES CODE

Section

*702. Harboring or concealing person with knowledge or suspicion that he may commit or has committed offense under sections 793 or 794.

*793. Gathering, transmitting, or losing defense information.

*794. Gathering or delivering defense information to aid foreign government.

*798. Disclosing classified information.

Section

*2151 to 2156 (ch. 105). Destroying war material, producing defective war material, interfering with war operations, etc.

*2381. Treason.

*2382. Misprision of treason.

*2383. Inciting or assisting rebellion or insurrection.

*2384. Engaging in seditious conspiracy.

*2385. Advocating overthrow of Government.

*2387. Interfering with or affecting morale, etc., of Armed Forces.

*2388. Interfering with Armed Forces during war.

*2389. Recruiting for service against United States.

*2390. Enlisting to serve against United States.

TITLE 42, UNITED STATES CODE (1952 EDITION)

Section

*1810. With intent to injure United States or secure advantage to any foreign nation, acquiring, revealing, mutilating, etc., atomic energy documents, plans, etc.

**1816. Violating or conspiring to violate certain provisions of title 42 relating to atomic energy. (Covered in Public Law 769 whether or not there is intent to injure United States or secure advantage to foreign nation.)

TITLE 42, UNITED STATES CODE

Section

2272. Willfully violating or conspiring to violate specific code sections respecting atomic energy, with intent to injure United States or secure advantage to foreign nation.

2273. Willfully violating or conspiring to violate code sections respecting atomic energy generally, with intent to injure United States or secure advantage to foreign nation.

2274. Communicating restricted atomic energy data, with intent to injure United States or secure advantage to foreign nation.

2275. Acquiring or attempting to acquire restricted atomic energy data, with intent to injure United States or secure advantage to foreign nation.

2276. Tampering with restricted atomic energy data, with intent to injure United State or secure advantage to foreign nation.

TITLE 10, UNITED STATES CODE (UNIFORM CODE OF MILITARY JUSTICE)

Section

904. Aiding the enemy.

906. Spying.

Other sections involving certain statutory violations if sentence includes death, dishonorable discharge, or dismissal.

**Knowingly and willfully failing or refusing to appear, testify, or produce any paper with respect to his Government employment, before a Federal grand jury, Federal court, court-martial, or congressional committee, in any proceeding regarding his relationship with a foreign government or any matter involving any interference with or endangerment of the national security.

**Committing perjury (1) in falsely denying commission of offense covered in the bill, (2) in falsely testifying before a Federal grand jury, Federal court, or court-martial with respect to his Government employment involving interference with or endangerment of national security, or (3) in falsely testifying before a congressional committee involving interference with or endangerment of national security; also committing subornation of perjury in connection with another person's false denial along the same lines.

**Knowingly and willfully making false statement or concealing material fact, in connection with his employment or application for employment, regarding (1) his connections with the Communist Party or similar group, (2) his conviction of an offense described in the bill, or (3) his failure or refusal to appear and testify or produce paper as described.

**Willfully remaining outside the United States, its territories and possessions, and Puerto Rico for more than 1 year with knowledge of indictment for offense described in the bill or of outstanding charges preferred under the Uniform Code of Military Justice.

Mr. JOHNSTON. The part of the report I have put in the RECORD relates to offenses covered by section 1 of the bill.

It relates to title 18 of the United States Code, for instance, section 792, harboring or concealing a person with knowledge or suspicion that he may commit or has committed an offense under section 793 or 794.

Section 793, gathering, transmitting, or losing defense information.

Section 794, gathering or delivering defense information to aid a foreign government.

Section 798, disclosing classified information.

Sections 2151 to 2156, destroying war material, producing defective war material, interfering with war operations, and so forth.

Section 2381, treason.

Section 2382, misprision of treason.

Section 2383, inciting or assisting a rebellion or insurrection.

Section 2384, engaging in seditious conspiracy.

Section 2385, advocating overthrow of Government.

Section 2387, interfering with or affecting morale, and so forth, of the Armed Forces.

Section 2388, interfering with the Armed Forces during war.

Section 2389, recruiting for service against the United States.

Section 2390, enlisting to serve against the United States.

Section 1810, of title 42, with intent to injure the United States or secure advantage to any foreign nation, acquiring, revealing, mutilating, and so forth, atomic energy documents, plans, and so forth.

Section 1816, title 42, violating or conspiring to violate certain provisions of title 42 relating to atomic energy.

The report continues in this vein and reflects the fact that we have written provisions into the law to adequately protect the national security in every instance where it was necessary.

Under this bill an individual is given the right to receive his benefits under a contract previously entered into with the Government of the United States. It not only protects the individual, but an innocent widow also is given the right to receive benefits under the contract. At the present time, under the laws in effect, those rights are taken away.

Is it right to take away from individuals the contractual benefits they were entitled to receive under contracts they had entered into with the Govern-

ment? I think not. The Committee on Post Office and Civil Service has brought this bill forth on three separate occassions because it thought it was right and just to adopt a bill to correct this injustice.

Mr. WILLIAMS of Delaware. Mr. President, first, I wish to say that I agree to a certain extent with members of the committee who have discussed the proposed legislation that there are some meritorious cases with which we should deal but this bill goes too far. I point out that we are not dealing with the question of restoring the retirement benefits of a marine who may have committed some slight indiscretion, nor are we dealing with restoration of the retirement benefits of the widow of some postal clerk. What we shall do, if we pass the bill, as presented by the committee, is to restore retroactively full retirement benefits of every convicted crook and scoundrel who has ever worked for the U.S. Government. This bill restores full retirement benefits to those officials who accepted bribes in connection with their official duties, or who have been convicted—and I emphasize the word "convicted"—of having embezzled Government funds.

The suggestion has been made that the bill has been before the Senate three times, having been reported by the Committee on Post Office and Civil Service. That statement is true. The reason it is here again the third time is that on the two preceding occasions the bill was overwhelmingly defeated and sent back to the committee on the basis that the Senate did not want to pass such legislation.

Now on the New Frontier we find a general letdown of those moral standards which were once expected of public officials.

The slogan that a public office is a public trust is out of date here in this administration. Instead we find the Senator from Pennsylvania advocating a bill which in effect is a private bill for the relief of crooked public officials.

The argument has been made that failure to enact the bill would result in great hardship. One of the examples described was a situation where a Government employee, upon leaving his work and driving home, has an automobile accident. A jury hearing the case decides that it was the fault of the Government employee, and as a result he is convicted of that crime. According to the Senator from Pennsylvania this employee would lose his retirement benefits.

That is not correct. There is not a word or phrase in the existing law which in any way would affect a Government employee's retirement benefits by such an incident.

The present law relates only to certain crime such as embezzlement, accepting bribes, and so forth, in situations connected directly with their official duties as a Government employee.

Mr. President, I ask that the act, as printed on page 10 of the report of the Committee on Post Office and Civil Service, be printed at this point in the RECORD.

There being no objection, the act was ordered to be printed in the RECORD, as follows:

ACT OF SEPTEMBER 1, 1954 (68 STAT. 1142)

[That there shall not be paid to any person convicted prior to, on, or after the date of enactment of this Act of any of the following offenses described in this section, or to the survivor or beneficiary of such person so convicted, for any period subsequent to the date of such conviction or the date of enactment of this Act, whichever is later, any annuity or retired pay on the basis of the service of such person as an officer or employee of the Government:

[(1) Any offense defined in section 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 216, 217, 218, 219, 220, 221, 222, or 223 of chapter 11 (relating to bribery and graft), section 281, 282, 283, 284, 285, 286, or 287 of chapter 15 (relating to claims and services in matters affecting government), section 434, 435, 436, 441, 442, or 443 of chapter 23 (relating to contracts), chapter 37 (relating to espionage and censorship), section 1700, 1702, 1703, 1704, 1705, 1706, 1707, 1708, 1709, 1711, or 1712 of chapter 83 (relating to offenses involving the postal service), chapter 105 (relating to sabotage), or chapter 115 (relating to treason, sedition, and subversive activities) of title 18 of the United States Code or in section 10 or 16 of the Atomic Energy Act of 1946 (42 U.S.C., secs. 1810 and 1816);

[(2) Any offense (not including any offense within the purview of section 13 of title 18 of the United States Code) which is a felony under the laws of the United States or of the District of Columbia (A) committed in the exercise of his authority, influence, power, or privileges as an officer or employee of the Government, or (B) committed after the termination of his service as an officer or employee of the Government but directly involving, directly resulting from, or directly relating to, the improper exercise of his authority, influence, power, or privileges during any period of his service as such an officer or employee;

[(3) Perjury committed under the laws of the United States or of the District of Columbia (A) in falsely denying the commission of an act which constitutes any of the offenses described in paragraph (1) or (2) of this section, (B) in falsely testifying before any Federal grand jury or court of the United States with respect to his service as an officer or employee of the Government, or (C) in falsely testifying before any congressional committee in connection with any matter under inquiry before such congressional committee; or subornation of perjury committed in connection with the false denial or false testimony of another person as specified in this paragraph;

Mr. WILLIAMS of Delaware. The present law specifically provides that retirement benefits can be denied only to Government employees who are convicted of certain crimes—crimes which are committed in connection with their official duties as employees of the U.S. Government. The present law would not in any way affect the retirement benefits of an employee having an accident while driving his car. Any crime which might be committed by the employee after he leaves the U.S. Government has no bearing on the argument here. The present law does and it should deny retirement benefits to public officials who are convicted in the courts of violating their public trust.

The reason the law was first enacted was that at the time the case of Alger Hiss was being considered, there were many who felt that he was not entitled to his retirement benefits. When the bill concerning this question came to the Senate, the Senate, knowing full well what it was doing, enlarged the bill to exclude from retirement benefits public officials who while holding high positions of authority accepted bribes for fixing tax cases or for rendering certain decisions in their department or who have been convicted of embezzling public funds.

Let us not forget that just a few years ago there was quite a scandal in the Revenue Service. There were a great many crooked tax collectors. In several instances Treasury agents were fixing tax cases of some of the biggest racketeers in the country and they were convicted in the courts for these crimes.

The bill could restore the full retirement benefits to every crooked tax official convicted of such a charge.

This bill will restore full retirement benefits to every convicted 5 percenter and influence peddler.

Where are the high moral standards about which so much lipservice has been given during recent campaigns?

Why is there so much concern on the part of some for these unscrupulous public officials?

Oh the committee says only 165 cases are mentioned, and none of the cases involved tax fixing. Only 165 cases are mentioned because only 165 individuals have applied for pension rights and have been denied. No mention is made of the scores or perhaps hundreds of other former employees who have been convicted of accepting bribes or embezzlement but who knew they had no retirement benefits and did not apply and therefore have not been denied. If the bill is passed, all of those employees who have not previously applied for such benefits may then come in and collect their full retirement benefits retroactively.

Some of the retroactive benefits which will be paid to these former convicted officials run as much as $15,000 or $20,000 in retroactive payments. These large payments go to officials who have been convicted and have served time in the Federal penitentiary for accepting bribes or for embezzling Government funds.

At this point I ask unanimous consent that there may be printed in the RECORD, as a part of my remarks, some of the cases wherein retirement benefits will be restored under this bill.

There being no objection, the text of the statute was ordered to be printed in the RECORD, as follows:

CASE NO. 10—CLAIM NO. 372591

Agency last employed: Post Office Department.

Position: Clerk.

Service: 35 years 11 months.

Description of offense: Embezzling letters and money from mails.

Date of offense: June 10, 1954.

Date of final separation: June 30, 1954.

Reason for final separation: Optional retirement.

Sentence of court (as reported by agency): Date, November 22, 1954; prison, suspended; years of probation, 2.

Present value of annuity denied by Public Law 769, $32,000.

Approximate refund due: $4,731.71, March 4, 1955, plus $910 annuity paid.

Annuity: Monthly, $222; accrued to February 28, 1961, $16,480.

H.R. 4601 would remove bar to payment.

CASE NO. 14—CLAIM NO. 365822

Agency in which last employed: Post Office Department.

Description of offense: Theft of mails, several hundred dollars for which restitution made.

Date of offense: March 9, 1954.

Date of final separation: April 9, 1954.

Reason for final separation: Removed.

Sentence of court (as reported by agency): Date, May 10, 1954; prison, suspended; years of probation, —.

Present value of annuity denied by Public Law 769, $29,000.

Approximate refund due: Unpaid, $4,887.01.

Annuity: Monthly, $182; accrued to February 28, 1961, $13,768.

H.R. 4601 would remove bar to payment.

CASE NO. 15—CLAIM NO. 370635

Agency in which last employed: Post Office Department.

Position: Clerk.

Service: 32 years, 1 month.

Description of offense: Embezzlement of $1,200 from Government funds and falsification of records to conceal embezzlement. Restitution of full amount made on March 5, 1954.

Date of offense: Prior to March 5, 1954.

Date of final separation: April 13, 1954.

Reason for final separation: Removed.

Sentence of the court (as reported by agency): Date: ——; prison, suspended; years of probation, 2.

Present value of annuity denied by Public Law 769: $18,000.

Approximate refund due: Paid $5,266.03.

Annuity: Future annuity effective July 1, 1961.

H.R. 4601 would remove bar to payment.

CASE NO. 16—CLAIM NO. 384441

Agency last employed: Post Office Department.

Position: Postmaster.

Service: 35 years 9 months.

Description of offense: Embezzlement of $1,036.44. Falsification of entries. Failure to remit surplus funds. Irregularities. Restitution made on February 20, 1947.

Date of offense: Prior to February 14, 1947. Disclosed on special inspection February 11, 1947.

Date of final separation: February 14, 1947.

Reason for final separation: Removed.

Sentence of court (as reported by agency): Date, March 11, 1947; prison, suspended; years of probation, 1.

Present value of annuity denied by Public Law 769: $14,000.

Approximate refund due: Unpaid, $344.38.

Annuity: Monthly, $102; accrued to February 28, 1961, $11,320.

H.R. 4601 would remove bar to payment.

CASE NO. 98—CLAIM NO. 451482

Agency in which last employed: Post Office Department.

Position: Station superintendent.

Service: 28 years 11 months.

Description of offense: Charged with embezzlement of motor vehicle tax stamp fund and forgery of postal savings certificates in violation of sections 500 and 1711, title 18, United States Code.

Date of offense: Prior to August 3, 1945.

Date of final separation: December 3, 1945.

Reason for final separation: Removed.

Sentence of court (as reported by agency): Date, March 26, 1946; prison, 1 year and 1 day.

Present value of annuity denied by Public Law 769: $14,000.

Approximate refund due: Paid, $570.97.

Annuity: Monthly, $114; accrued to April 30, 1960, $4,474.

H.R. 4601 would remove bar to payment.

CASE NO. 155—CLAIM NO. 548990

Agency last employed: Post Office Department.

Position: Special clerk.

Service: 27 years 4 months.

Description of offense: Charged with embezzlement of interest payments on postal savings certificates in violation of title 18, United States Code, section 355 (now section 1711).

Date of offense: May 16, 1947.

Date of final separation: May 16, 1947.

Reason for final separation: Removal.

Sentence of court (as reported by agency): Date, June 9, 1947; prison, 1 year and 1 day on each of three counts to run concurrently.

Present value of annuity denied by Public Law 769: $13,000.

Approximate refund due: Paid, $3,741.39.

Annuity: Monthly, $97; accrued to April 30, 1960, $1,552.

H.R. 4601 would remove bar to payment.

CASE NO. 187—CLAIM NO. 593831

Agency last employed: Department of the Interior.

Position: Area land officer.

Service: 29 years 10 months.

Description of offense: Charged with violation of section 371, title 18, United States Code, conspiracy to defraud the Government. Also charged with violation of section 1001, title 18, United States Code, on two counts—fraudulent statements in applications for patents and fees and false statements in relation to representations made to the Bureau of Indian Affairs in regard to acquisition of lands for the Confederate Tribes on the Warm Springs Reservation. Offenses committed in the exercise of his power and privileges as a Government employee.

Date of offense: Prior to April 11, 1952.

Date of final separation: August 26, 1952.

Reason for final separation: Removal.

Sentence of court (as reported by agency): Date, May 14, 1953; fine, $5,000; prison, 6 months on each of four counts to run concurrently.

Present value of annuity denied by Public Law 769: $33,000.

Approximate refund due: Unpaid, $6,546.54.

Annuity: Monthly, $240; accrued to February 28, 1961, $4,080.

H.R. 4601 would remove bar to payment.

Mr. WILLIAMS of Delaware. The argument has been made that it is only under this law that the pension right is taken away from an employee of the U.S. Government, for crimes committed in connection with his official duties.

This procedure has long been followed by administrative order, and was followed prior to the time of the passage of this act in 1954. I invite attention to the fact that even today a GI who while serving in the U.S. Army, gets into difficulty and receives a dishonorable discharge, he forfeits not only the military retirement benefits under the law—but in addition also forfeits any rights given him under any GI Bill of Rights—and the proposed legislation would not restore such rights.

Perhaps the GI may have been AWOL—he was at home sick or he did not get back to his post in time, or perhaps he stole a few cigarettes. Yet if he gets a discharge other than an honorable discharge, he loses all benefits. There is nothing in the pending bill which would restore his benefits.

His offense is minor compared to that of a high public official who accepts bribes for fixing the tax case of a racketeer.

Yet the committee is here shedding its crocodile tears for these crooked public officials and wants to restore their full retirement benefits on a retroactive basis. Why?

The bill before us would restore to the retirement rolls every Director of the Internal Revenue Service and every top official in the revenue department, who was convicted of soliciting and accepting bribes for fixing tax cases. I challenge anyone to deny this assertion.

I call attention again to the fact that much is said by the military about the unfairness of the present law. I refer to an article which appeared in the Washington Evening Star of June 23, 1960, entitled "Hiss Act Seen Unjust to Military." I ask unanimous consent that the article may be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HISS ACT SEEN UNJUST TO MILITARY

The Pentagon has told Congress that thousands of servicemen have lost or face the loss of their retirement pay because of the Hiss Act. The Pentagon called this a "gross injustice."

The law, adopted in 1954, bars workers from receiving Federal benefits after conviction on a wide variety of charges. The act was designed to prevent former State Department official, Alger Hiss, from receiving benefits after he had been convicted of perjury. The law, however, embraces all Federal workers and dozens of unlawful acts.

Defense Department General Counsel J. Vincent Burke recently informed the Senate Post Office and Civil Service Committee that the law as written and applied had already deprived servicemen of retirement pay because of relatively minor offenses.

Mr. Burke said this "harshness was never intended by the Congress." He urged the act be rewritten to limit its application to security cases.

The House has already approved the changes suggested by the Pentagon. The Senate committee likewise approved, but the Senate sent it back to the committee with instructions to gather new evidence.

Mr. WILLIAMS of Delaware. Mr. President, immediately following the last insertion I ask unanimous consent to have printed in the RECORD two letters, one signed by Major General Lee, in which he confirms the fact that the armed services still continue to stop retirement benefits for military personnel who are dishonorably discharged. Nor will the enactment of this bill affect such action.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

APRIL 2, 1959.

Hon. JOHN J. WILLIAMS,
U.S. Senate.

DEAR SENATOR WILLIAMS: This is in further reply to your letter requesting a complete

report on the effects of a dishonorable discharge for enlisted or officer personnel of the Armed Forces.

With the exception of personnel awarded retired pay under the provisions of title 10, United States Code, sections 1331 to 1337, enlisted personnel who are dishonorably discharged and officers who are dismissed from the service are not eligible for military retirement benefits. Federal statutes authorizing retirement benefits uniformly require, with the exception of the above mentioned statutes, that an individual hold a military status at the time of his retirement. Since dishonorable discharge and dismissal effect a complete termination of military status, a member separated from the service under such conditions cannot be placed on the retired list.

Title 10, United States Code, sections 1331 to 1337, authorize the payment of retired pay to nonregular personnel. These statutes do not require that the individual hold a military status at the time of eligibility for retired pay. Providing he is otherwise qualified, an individual with 20 or more years of creditable service becomes eligible upon attaining age 60 for retired pay under these provisions of law even though his military status was terminated by dishonorable discharge or dismissal.

The eligibility of personnel for retirement as outlined above is qualified to the extent that consideration is given to the provisions of the so-called Hiss Act (act of September 1, 1954 (68 Stat. 1142), as amended (5, U.S.C., 2281 et seq.)). If an individual's dishonorable discharge or dismissal is predicated upon conviction of an offense within the purview of that act, he is forever barred from receiving retired pay from the Government under any provisions of law.

Inclosed for your information is a copy of a chart prepared in the Department of the Army entitled "Incidents of Discharge."

I am glad to have been of service to you.

Sincerely yours,

R. V. LEE,
Major General, U.S. Army,
The Adjutant General.

VETERANS' ADMINISTRATION,
Washington, D.C.

The Honorable JOHN J. WILLIAMS,
U.S. Senate, Washington, D.C.

DEAR SENATOR WILLIAMS: Your letter of February 10 to the Department of the Army has been sent to us for reply to that part concerning benefits under title 38, United States Code, which incorporates the provisions of the former GI bill.

A veteran who receives a dishonorable discharge is not entitled to benefits from the Veterans' Administration. This applies to officers and enlisted personnel of the Armed Forces.

Very truly yours,

W. J. DRIVER,
Chief Benefits Director.

Mr. WILLIAMS of Delaware. Under date of July 15, 1961, the Department of Defense issued a directive establishing a new code of ethics for that Department.

This bulletin is entitled "Standards of Conduct." It was published July 15, 1961, by the Department of Defense. It outlines penalties for anyone violating this new code of ethics. This new code of ethics of the Defense Department takes away the retirement benefits from any officer violating its provisions even without conviction. I should like to quote briefly from these new rules of conduct. I am quoting from page 4, as follows:

Retired pay of a regular retired officer is subject to forfeiture during any period within 2 years of his retirement if he sells for himself or another any supplies of war materials to the Department of Defense, Coast Guard, Coast and Geodetic Survey, or the Public Health Service.

Under this new rule of conduct outlined by the Department of Defense an officer can lose his retired pay by administrative action without having been convicted in the courts.

Yet the committee here today wants to pass a bill restoring by law full retroactive retirement benefits to every previously convicted U.S. Government official.

I ask unanimous consent that the remainder of this particular chapter of the code of ethics recently approved by the Defense Department be printed in the RECORD at this point as a part of my remarks along with an article appearing in the New York Times of July 5, 1961, commenting upon this new code of ethics.

There being no objection, the chapter and the newspaper article was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF DEFENSE DIRECTIVE No. 5500.7, JULY 15, 1961

STANDARDS OF CONDUCT

I. Purpose and scope

A. This directive prescribes the standards of conduct, relating to possible conflict between private interests and official duties, required of all military and civilian DOD personnel, regardless of assignment. Close adherence to these principles, it is believed, will insure compliance with the high ethical standards demanded of all public servants.

B. There is attached a copy of Executive Order No. 10939 of May 5, 1961, which prescribes special standards applicable to Presidential appointees and others (see enclosure 1).

C. This directive is also intended to insure that DOD personnel do not knowingly transact business with persons who are within statutory prohibitions or under circumstances where there may be a possible conflict of interest between governmental duties and private affairs. It is in consonance with the code of ethics for Government service contained in House Concurrent Resolution 175, 85th Congress, which is applicable to all DOD personnel.

B. Selling or contracting for sale: No regular retired officer of the Armed Forces will sell, contract for the sale of, or negotiate for the sale of anything to the military department in which he has retired status in violation of applicable statutory restrictions. Retired pay of a regular retired officer is subject to forfeiture during any period within 2 years of his retirement if he sells for himself or another any supplies or war materials to the Department of Defense, Coast Guard, Coast and Geodetic Survey, or the Public Health Service. For the purpose of this section, selling means (1) signing a bid, proposal, or contract, (2) negotiating a contract, or (3) contacting an officer or employee of the Department of Defense for the purpose of (i) obtaining or negotiating contracts, (ii) negotiating or discussing changes in specifications, price, cost allowances, or other terms of a contract, or (iii) settling disputes concerning performance of a contract, (4) any other liaison activity with a view toward the ultimate consummation of a sale even though the actual contract therefor is subsequently negotiated by another person. However, it is not the intent of this directive to preclude a retired officer from accepting employment with private industry solely because his employer is a contractor with the Government.

[From the New York Times, Sept. 5, 1961]

ETHICS TIGHTENED FOR U.S. WORKERS—APPEARANCE OF MISBEHAVIOR IS NOW BEING BARRED

(By Joseph A. Loftus)

WASHINGTON, September 4.—Federal departments, acting on President Kennedy's exhortations, have tightened their ethical codes for employes.

The concept of good behavior being written in the Kennedy codes is that employes must avoid not only misbehavior, but also the appearance of misbehavior.

The word "appearance," or a variation of it, appears in all the revised agency codes so far submitted to the White House.

"We consider Caesar's wife," said a Defense Department official, referring to the code he helped to draft.

DEFENSE CODE TIGHTENED

But the Defense Department has gone even beyond the virtue expected of Caesar's wife to remain above suspicion. The department has, in fact, written tighter restrictions into its code.

Retired military officers who are hired by corporations that do business with the Pentagon are particularly affected by the tighter code.

The rule penalizing officers who sell to the services within 2 years of retirement has been criticized. The argument is that some retired officers have evaded the prohibition by doing only the preliminary sales work among their former colleagues. The final selling is left to another person in the corporation.

Selling, within the meaning of the new code, however, is not only "contacting an officer or employe of the Department of Defense for the purpose of obtaining or negotiating contracts" but also, "any other liaison activity with a view toward the ultimate consummation of a sale subsequently negotiated by another person."

VIOLATORS LOSE PENSIONS

The penalty for violation is forfeiture of retirement pay.

"However," the code adds, "it is not the intent of this directive to preclude a retired officer from accepting employment with private industry solely because his employer is a contractor with the Government." In other words, the test is not whether the former officer is employed by, say, a munitions maker, but whether he moves in the selling orbit.

Speaking of appearance, the directive says:

"In any case where Department of Defense personnel have any financial interest in any business entity, or have arranged or are negotiating for their subsequent employment by such entity, they are disqualified from representing the Department of Defense in dealings of any kind with such entity."

The ban on accepting gratuities, entertainment, and bribes is more restrictive. Under the old code, the beneficiary enjoyed some flexibility. He could in the gray areas, interpret the rule for himself.

Now the ban applies to favors, gratuities, and entertainment that might affect, "or might reasonably be interpreted as affecting," the impartiality of the beneficiary. In other words, as one official put it, a free meal might violate the code if a "reasonable" person outside believed, in all the circumstances, that the favor might impair impartial action by the officer or civilian in the department.

The Department of the Interior, apart from anything resembling bribery, is concerned to an extent about conduct after office hours.

"Personal and private conduct of an employee," the Interior code says, "that reflects adversely upon the dignity and prestige of

the Federal service, is also a matter of concern to departmental management. All employes are expected to cultivate those personal qualities which characterize a good civil servant—loyalty to the United States, a deep sense of responsibility for the public trust, and a standard of personal deportment which will be a credit to the individual."

The Department of Labor, while not opopsed to employees holding an outside job, cautions its workers about conflict of interest. This section was tightened to prohibit a department employee from taking a job with any person or private enterprise if the employment "would be related to any contract such person or private enterprise may have with the Federal Government."

The White House is seeking uniformity of those codes so far as practical. The work of the departments vary and not all provisions are appropriate in every case.

PRIVATE DEBT PROBLEM

The Agriculture Department and the Department of Health, Education, and Welfare take different views of their responsibilities for maintaining an employee's private credit rating.

Both codes remind the employees that financial backsliding will not help their Government careers. Agriculture, in addition, appears to extend help to creditors by facilitating collection systems when the creditors complain. The Health Department, while plainly advising employees to pay their just debts, says it is not a collection agency.

Frederick G. Dutton, special assistant to the President, said the Civil Service Commission will be asked to review all the codes for adequacy, uniformity and for simplification and readability. In the meantime, the codes as submitted to the White House are in effect. Complementary legislation proposed by President Kennedy last spring, has passed the House of Representatives. It is not expected that the Senate will act on it this year.

Mr. WILLIAMS of Delaware. The insertion I have made shows that even if we repealed the present law, restoring the retirement benefits of the very crooks and scoundrels who have been convicted by the U.S. Government for having accepted bribes or embezzling public funds we would still have in effect an administrative order imposing the same penalties except that then there would not even have to be a conviction in the courts.

If the sponsors of the bill are sincere in saying that this is an unjust penalty and an extra fine, why is it only an extra fine for corrupt officials who have been convicted?

Let no one be disillusioned. This is in effect a private bill for the benefit of a few convicted public officials who formerly held positions of high public trust.

I have not heard of any member of the committee who has come forward to say that he will propose an amendment to the existing law to repeal the authority of the right of the military to cancel the rights of a GI who has committed a minor offense and received a dishonorable discharge.

There is a great deal of discussion about the widow—and I admit that some of the cases have merit—the postal employee, and the marine who lost his pension rights. Nothing is said about the fact that the marine can still lose his pension rights under existing law even after this bill is passed, by administrative order. If the military authorities want to take the pension away from him, they can still do so.

Will anyone argue that his crime is as bad as that of the top officials in the Revenue Department who were convicted of accepting bribes for fixing tax cases?

This bill would restore retroactively full retirement benefits of every tax agent who was convicted of accepting bribes for fixing tax cases against some of the country's biggest racketeers and gangsters.

Personally, I shall not support this bill. We had enough trouble getting rid of these crooked officials and in many instances could only get rid of them when we put them in the penitentiary. Now Congress is asked to put all of them back on the public payroll by restoring their eligibility to full retirement benefits.

Let us review a few of these cases, to show what we are talking about.

In case No. 1, the individual involved will receive $12,989 in retroactive retirement benefits. He will then get $179 per month in pension payments for the remainder of his life. What was his crime? He was convicted of embezzling parcel post funds.

Another case involves a retroactive payment of $14,130, plus a lifetime pension of $195 a month. He was convicted and sentenced to 1½ years in the penitentiary for robbing the mails.

Here is a third case of $18,959 in retroactive payments given to another man. What was he charged with? He received a 2-year sentence, $500 fine, again for theft of money from the U.S. Government while on official duty.

A fourth case involves a Government employee who was convicted of accepting bribes and unauthorized fees from applicants for naturalization. This man was convicted and sentenced to 3 years in the penitentiary, yet this bill will give this former official $17,744 in back retirement pay plus $224 per month for the rest of his life.

Another employee was convicted of conspiracy to steal Government property, in violation of title 18 of the United States Code. This man was convicted and sentenced to serve 9 months in the Federal penitentiary. Yet he will collect retroactively, $6,878 and receive a payment of $181 a month in pension.

Why should we put this man back on the payroll of the American taxpayer, after violating his public trust?

Remember the contribution which they had made to the retirement fund, plus interest, has been refunded to them. The Government did not keep the money that they had paid in. It withheld from them only that portion of their retirement benefits which would have been paid to them by the Government.

In another case an employee was convicted of four counts of unlawfully and willfully soliciting for personal gain certain sums for using his influence for obtaining promotions in the postal service. In other words, he was a paid influence peddler. This man was convicted in court and sentenced by the court. Yet under this bill he would get $9,317 in retroactive payments. In addition he would be put on the Federal retirement rolls with a $155 per month lifetime pension.

Here is another case involving a clothing inspector. He was convicted and sentenced to 3 years in the penitentiary for the solicitation and acceptance of bribes in connection with his official duties. This man under this bill gets $3,447 in back pay plus $95 per month for the rest of his life. I shall not recite all of the case.

Mr. President, I ask unanimous consent that references to a series of specific examples may be printed at this point in the RECORD.

There being no objection, the references were ordered to be printed in the RECORD, as follows:

CASE NO. 140—CLAIM NO. 501668

Agency in which last employed: New York Quartermaster Procurement Agency, Department of the Army.

Position: clothing inspector.

Service: 15 years, 6 months.

Description of offense: solicitation and acceptance of bribe in violation of title 18, United States Code, section 202.

Date of offense: prior to September 19, 1951.

Date of final separation: November 14, 1952.

Reason for final separation: removal.

Sentence of the court (as reported by agency):

Date: September 19, 1951.

Fine: $500.

Prison: 3 years.

Present value of annuity denied by Public Law 769: $13,000.

Approximate refund due: paid, $2,215.25.

Annuity: monthly, $95; accrued to February 28, 1961, $3,447.

H.R. 4601 would remove bar to payment.

CASE NO. 47—CLAIM NO. 399411

Agency last employed: Post Office Department.

Position: station examiner.

Service: 21 years, 10 months.

Description of offense: charged on four counts of unlawfully and willfully soliciting for personal gains certain sums in consideration of a promise to use his influence to obtain promotions in the Post Office Department in violation of sections 214, 215, and 371, title 18, United States Code.

Date of offense: prior to September 25, 1952.

Date of final separation: September 29, 1952.

Reason for final separation: removed.

Sentence of court (as reported by agency):

Date: July 30, 1954.

Fine: $500 or 30 to 60 days.

Present value of annuity denied by Public Law 769: $19,400.

Approximate refund due: paid, $3,378.51.

Annuity: monthly, $155; accrued to April 30, 1960, $7,767.

H.R. 4601 would remove bar to payment.

CASE NO. 161—CLAIM NO. 439809

Agency last employed: Department of the Army.

Position: warehouse foreman.

Service: 19 years, 11 months.

Description of offense: Charged with conspiracy to unlawfully commit theft of Government property in violation of title 18, United States Code, sections 371 and 641.

Date of offense: about January 6, 1950, to March 15, 1956.

Date of final separation: December 14, 1956.

Reason for final separation: disability retirement.
Sentence of court (as reported by agency):
Date: November 26, 1958.
Fine: $250.
Prison: 9 months.
Present value of annuity denied by Public Law 769: $28,000.
Approximate refund due: paid, $2,201.81; paid annuity from November 1, 1956, to December 31, 1957.
Annuity: monthly, $181; accrued to April 30, 1960, $5,068.
H.R. 4601 would remove bar to payment.

CASE NO. 18—CLAIM NO. 385243

Agency last employed: Justice, Immigration and Naturalization.
Position: naturalization examiner.
Service: 30 years, 5 months.
Description of offense: collected unauthorized fees from applicants for naturalization—bribery.
Date of offense: December 1953.
Date of final separation: December 21, 1953.
Reason for final separation: termination from excepted appointment.
Sentence of court (as reported by agency):
Date: May 14, 1954.
Prison: 3 years, several counts.
Present value of annuity denied by Public Law 769: $31,000.
Approximate refund due: paid, $7,341.84.
Annuity: monthly, $224; accrued to February 28, 1961, $17,744.
H.R. 4601 would remove bar to payment.

CASE NO. 7—CLAIM NO. 378143

Agency last employed: Post Office Department.
Position: general foreman.
Service: 36 years, 11 months.
Description of offense: charged with theft from mail.
Date of offense: September 28, 1954.
Date of final separation: October 29, 1954.
Reason for final separation: removed.
Sentence of the court (as reported by agency):
Date: January 7, 1955.
Fine: $500.
Prison: suspended.
Years of probation: 2.
Present value of annuity denied by Public Law 769: $36,000.
Approximate refund due: paid, $7,127.37.
Annuity: monthly, $267; accrued to February 28, 1961, $18,959.
H.R. 4601 would remove bar to payment.

CASE NO. 2—CLAIM NO. 371214

Agency last employed: Post Office Department.
Position: carrier.
Service: 32 years, 1 month.
Description of offense: theft of money from mail.
Date of offense: July 7, 1954.
Date of final separation: August 8, 1954.
Reason for final separation: removed.
Sentence of the court (as reported by agency):
Date: November 1, 1954.
Prison: 1½ years.
Years of probation: ?
Present value of annuity denied by Public Law 769: $29,000.
Approximate refund due: paid, $4,493.85, January 11, 1955.
Annuity: monthly, $195; accrued to February 28, 1961, $14,130.
H.R. 4601 would remove bar to payment.

CASE NO. 1—CLAIM NO. 373486

Agency last employed: Post Office Department.
Position: Clerk in charge.
Service: 36 years 1 month.
Description of offense: Charged by Post Office Department of embezzling $165 collected for parcel-post mailing matter.
Date of offense: August 13, 1954.
Date of final separation: September 13, 1954.
Reason for final separation: Removed.
Sentence of court (as reported by agency):
Date: October 19, 1954.
Prison: Suspended.
Years of probation: 3.
Present value of annuity denied by Public Law 769: $35,000.
Approximate refund due: Paid, $5,833.11.
Annuity: Monthly, $179; accrued to February 28, 1961, $12,989.
H.R. 4601 would remove bar to payment.

Mr. CLARK. Mr. President, will the Senator from Delaware yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. CLARK. I assume all these cases are referred to in the committee report.

Mr. WILLIAMS of Delaware. Most of them are, but your committee report far from covers all those formerly convicted public officials whose eligibility for retirement benefits will be restored under this bill. I ask unanimous consent to have printed at this point in the RECORD a letter from the Civil Service Commission explaining how many of those former employees were convicted in the courts for violations of their public trust, but who have as yet not applied for their pensions. These men would be eligible upon the passage of this bill to ask for their full retirement benefits, notwithstanding their previous convictions.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. CIVIL SERVICE COMMISSION,
Washington, D.C., April 16, 1959.

Hon. JOHN J. WILLIAMS,
U.S. Senate.

DEAR SENATOR WILLIAMS: There is before me your letter of March 27 regarding application of S. 91, if enacted, to certain specific cases.

This bill is intended to and will amend the existing bar in Public Law 769, 83d Congress, against annuity awards by limiting its application to crimes or actions involving the national security. It will not affect the Civil Service Retirement Act in any other way. For those persons whose annuity payments are barred because of conviction for embezzlement of Government funds or having accepted bribes or kickbacks while in public office, enactment of S. 91 will restore their annuity rights.

Mr. WILLIAMS of Delaware. Mr. President, I will omit the part of their letter in which they name several formerly convicted public officials all of whom would be eligible for retirement benefits under the bill before us. The bill S. 91 to which they refer is identical to the bill before us today.

These persons are not on the committee list, nor are scores of other former public officials who violated their public trust. Only those who have applied for their retirement benefits, are on the list of the committee report.

I cite one other example, the former manager of the Alaska Railroad Company. He was indicted for certain improper activities in connection with his official duties.

Rather than to stand trial, that man skipped the country and went to South America. When the Government threatened to cancel his passport, he renounced his U.S. citizenship rather than come back and stand trial for the offense which he had committed in the course of his official duties.

The existing law provides for the denial of retirement benefits not only for those convicted in the Federal courts, but also for any public official who skipped out of the country to avoid standing trial on the charges involving his official duties.

This bill will restore his eligibility. I ask unanimous consent that section 405 of the code, which denied this man his retirement benefits, be printed at this point in the RECORD.

There being no objection, section 405 of the code was ordered to be printed in the RECORD, as follows:

FORFEITURE OF ANNUITIES OF PERSONS REMAINING OUTSIDE UNITED STATES TO AVOID PROSECUTION

SEC. 405. The Act entitled "An Act to prohibit payment of annuities to officers and employees of the United States convicted of certain offenses, and for other purposes", approved September 1, 1954 (58 Stat. 1142), is amended by adding at the end of section 2 thereof a new subsection as follows:

"(c) In any case in which, after the date of enactment of this subsection, any person under indictment for any offense within the purview of the first section of this Act willfully remains outside the United States, its Territories, and possessions, for a period in excess of one year with knowledge of such indictment, no annuity or retired pay shall be paid, for any period subsequent to the end of such one-year period to such person or to the survivor or beneficiary of such person, on the basis of the service of such person, as an officer or employee of the Government unless and until a nolle prosequi to the entire indictment is entered upon the record or such person returns and thereafter the indictment is dismissed or after trial by court the accused is found not guilty of the offense or offenses charged in the indictment."

Mr. WILLIAMS of Delaware. The bill would repeal that section and will reestablish the eligibility of this Government employee who renounced his U.S. citizenship rather than come back to this country and stand trial for having abused his public office.

The committee says, through the bill, "Let us give him full retirement benefits, just as though he had been a loyal public servant." I shall not support any such bill. I think it is a sad day when we have in power an administration which is issuing high-sounding codes of ethics, while at the same time it asks Congress to pass a law to restore full retirement benefits to every crook or scoundrel who has ever worked for the U.S. Government, no matter how despicable the offense of which he has been convicted.

If we pass the bill in its present form, the only crime will be getting caught.

The bill may have been reported by the committee three times but it was

also defeated twice. I do not care whether it was reported 3 times or 10 times. There may be enough votes on the New Frontier to pass this bill but I want the RECORD to show that there is at least one Senator who will vote against it.

Here is one Senator who does not believe it is necessary that a public official be incarcerated in a Federal penitentiary to keep him off the Federal payroll.

I am not speaking of petty crimes committed by the ordinary employees of the Post Office Department or other Government departments. I am speaking of high public officials who accepted bribes for decisions. Many such employees were top officials. Many were directors of the Internal Revenue Service in their districts. Some were top officials in the Treasury Department right here in Washington. Others held positions in the White House itself. Yet now we are asked to say that the offenses which they committed were not too bad; and that these crooked officials should be entitled to their full retirement benefits.

I shall vote against the bill.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H.R. 6141) was ordered to a third reading, read the third time, and passed.

Mr. CLARK. Mr. President, I move that the Senate reconsider the vote by which the bill was passed.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CLARK. Mr. President, I did not undertake to reply to the Senator from Delaware while the bill was pending, because almost everything he said, he said 2 years ago.

I regret that, in my judgment, what he said 2 years ago and what he said today is substantially inaccurate.

Mr. President, I ask unanimous consent that a synopsis of the case of the former executive of the Alaska Railroad, prepared by the Civil Service Commission last year, may be printed at this point in the RECORD.

Mr. WILLIAMS of Delaware. Mr. President, reserving the right to object—and I shall not object—I challenge the Senator from Pennsylvania to cite one specific point I made which was inaccurate.

Mr. CLARK. I do not choose to do so.

Mr. WILLIAMS of Delaware. The Senator from Pennsylvania cannot challenge the accuracy of a single point I made and he knows it.

My analysis of this bill and the cases cited are accurate. I challenge the Senator from Pennsylvania to point out anything I said which he thinks is inaccurate; otherwise, let him not stand there and say it is inaccurate. I have named cases. I have placed the sections of the law in the RECORD. I had something to do with the passage of the law denying these men retirement benefits. I had something to do with exposing the corruption of some of those public officials. Some of them were top tax collectors. Every one of them—every crooked public official who was convicted in the last 10 years, under the Truman administration or under the Eisenhower administration—would have his retirement benefits restored to him under the bill, and restored retroactively. The Senator from Pennsylvania cannot deny it. For the past 3 years the Senator from Pennsylvania has been trying to restore the retirement benefits of these crooked public officials.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Pennsylvania?

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

CASE NO. 2

Date of birth: January 1, 1902.

Training and experience: mechanical engineer; employed about 24 years, in various positions, by the Atchison, Topeka & Santa Fe Railroad.

Federal service:

Agency, position, date:

U.S. Army, colonel (last rank) from October 10, 1941 to November 30, 1945.

Alaska Railroad, Assistant General Manager, from November 21, 1945 to December 31, 1945.

Alaska Railroad, General Manager, from January 1, 1946 to October 21, 1953.

The dates of military service were not verified, but official correspondence indicates that they are substantially correct and that he was released from the Army to accept the position of General Manager, Alaska Railroad.

Leave without pay from August 7, 1953, was authorized and resignation as General Manager accepted by the Secretary of the Interior, effective October 21, 1953.

INDICTMENT

On September 15, 1953, a grand jury in Alaska returned a sealed indictment which was opened in March 1955.

The indictment charged, in effect, that the defendant acted as an officer and agent of the United States for the transaction of business with a corporation in the profits and contracts of which he was financially interested by reason of its relationship with a company in which defendant was directly interested through ownership of stock. The indictment is still pending.

It appears that the defendant went to South America in June or July 1953 and that he is now a naturalized citizen of Colombia. Application for naturalization was made on May 6, 1955, and granted on October 6, 1955. Prior to October 6, 1955, Colombia was informed of the indictment.

AWARDS

Legion of Merit.

Department of Interior Distinguished Award for outstanding accomplishment in the successful administration of a $70 million program for the rehabilitation of the Alaskan Railroad.

Mr. CLARK. Mr. President, I further ask unanimous consent that an analysis of the purpose and background of the bill and a summary of the bill, made by the staff of the Civil Service Commission, be printed at this point in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

SENATE POST OFFICE AND CIVIL SERVICE COMMITTEE ANALYSIS OF H.R. 6141, "AN ACT TO AMEND THE ACT OF SEPTEMBER 1, 1954, IN ORDER TO LIMIT TO CASES INVOLVING THE NATIONAL SECURITY THE PROHIBITION ON PAYMENT OF ANNUITIES AND RETIRED PAY TO OFFICERS AND EMPLOYEES OF THE UNITED STATES"

PURPOSE

This measure has two major objectives as follows:

First, it continues, clarifies, and strengthens the existing statutory prohibition against the payment of a Federal retirement benefit to any person who has committed an offense against the national security or who refuses to testify before a duly constituted judicial or congressional proceeding in a matter relating to the national security.

Second, it corrects certain inequities resulting from existing law which has denied retirement benefits to individuals and innocent survivors because of offenses in no way related to the national security.

BACKGROUND

This measure has a lengthy background. The Eisenhower administration submitted draft legislation to the 86th Congress which was introduced in the Senate (S. 91) on January 9, 1959 and in the House (H.R. 4601) on February 17, 1959. The later bill passed the House and was referred to the Senate on April 14, 1959. The bill was considered in the Senate on May 12, 1960, and together with S. 91 it was recommitted to this committee. On June 10, 1960, the bill (H.R. 4601) was again favorably reported to the Senate. It received no further consideration in the 86th Congress.

Shortly after the 87th Congress convened, a number of bills identical to H.R. 4601 of the 86th Congress were introduced in the House. None was introduced in the Senate.

The House held hearings on H.R. 6141 and related bills on June 13, 1961. On June 15, the bill was favorably reported; and on July 12 it passed the House without a word of opposition.

Hearings on the measure were held by the Retirement Subcommittee of the Senate Committee on Post Office and Civil Service on July 26, 1961.

Favorable testimony was received from the Bureau of the Budget, the Civil Service Commission, the Post Office Department, the Department of Defense, and representatives of a large number of employee organizations. There was no adverse testimony from any source.

Senator WILLIAMS of Delaware was invited in writing to appear at the hearing but did not do so. He did submit a letter for the record. An offer to reconvene the hearing at a day agreeable to him was declined by Senator WILLIAMS on the basis that his letter "clearly set forth his position."

SUMMARY

Last year's report on H.R. 4601 contains as exhibit 4 a summary of 189 claims for a civilian annuity denied under existing law. Since that time, 24 additional claims have been denied, making a total of 213. Of this number, 28 have since been allowed by virtue of a Presidential pardon, 3 have been allowed by reason of Court of Claims decisions, 5 have been allowed as the result of a reappraisal of evidence—thus a total of 36 of those originally denied have since been allowed leaving a residue of 177 still denied.

If this bill is enacted, 12 cases would continue to be denied and the remainder would be allowed.

The Department of Defense submitted a table listing some 51 cases in which military

retirement has been denied by reason of existing law. The total which might arise in the future cannot be determined without a search of records on a worldwide basis. The Department takes the position that the present law is unduly harsh, has a bad effect on morale, and should be modified as proposed.

AMENDMENT TO SHIPPING ACT OF 1916

Mr. CLARK. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 842, H.R. 6775.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 6775) to amend the Shipping Act, 1916, as amended, to provide for the operation of steamship conferences.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Pennsylvania.

The motion was agreed to; and the Senate proceeded to consider the bill, which had been reported from the Committee on Commerce, with an amendment to strike out all after the enacting clause and insert:

That paragraph Third of section 14, Shipping Act, 1916, is amended by inserting the word "unjustly" before the word "discriminating".

SEC. 2. The Shipping Act, 1916, is amended by adding after section 14a a new section to read as follows:

"SEC. 14b. Notwithstanding any other provision of this Act, on application the Federal Maritime Commission (hereinafter 'Commission') shall, after notice, permit the use by any common carrier or conference of such carriers in foreign commerce of any contract, amendment, or modification thereof, which is available to all shippers and consignees on equal terms and conditions, which provides lower rates to a shipper or consignee who agrees to give all or any fixed portion of his patronage to such carrier or conference of carriers unless the Commission finds that the contract, amendment, or modification thereof, will be detrimental to the commerce of the United States or contrary to the public interest, or unjustly discriminatory or unfair as between shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, and provided the contract, amendment, or modification thereof, expressly (1) permits prompt release of the contract shipper from the contract with respect to any shipment or shipments for which the contracting carrier or conference of carriers cannot provide as much space as the contract shipper shall require on reasonable notice; (2) provides that whenever a tariff rate for the carriage of goods under the contract becomes effective, insofar as it is under the control of the carrier or conference of carriers, it shall not be increased before a reasonable period, but in no case less than ninety days, except in case of war or other force majeure; (3) covers only those goods of the contract shipper as to the shipment of which he has the legal right at the time of shipment to select the carrier: *Provided, however,* That it shall be deemed a breach of the contract if, before the time of shipment and with the intent to avoid his obligation under the contract, the contract shipper divests himself of the legal right to select the carrier and the shipment is carried by a carrier which is not a party to the contract; (4) limits damages recoverable for breach by either party to actual damages to be determined after breach in accordance with the principles of contract law: *Provided, however,* That the contract may specify that in the case of a breach by a contract shipper the damages may be an amount not exceeding the freight charges computed at the contract rate on the particular shipment, less the cost of handling; (5) permits the contract shipper to terminate at any time without penalty upon ninety days' notice; (6) provides for a spread between ordinary rates and rates charged contract shippers which the Commission finds to be reasonable in all the circumstances but which spread shall in no event be more than 15 per centum of the ordinary rates; (7) excludes cargo of the contract shipper which is loaded in bulk without mark or count; and (8) contains such other provisions not inconsistent herewith as the Commission shall require or permit. The Commission shall withdraw permission which it has granted under the authority contained in this section for the use of any contract if it finds, after notice and hearing, that the use of such contract is detrimental to the commerce of the United States or contrary to the public interest, or is unjustly discriminatory or unfair as between shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors. The carrier or conference of carriers may on ninety days' notice terminate without penalty the contract rate system herein authorized, in whole or with respect to any commodity: *Provided, however,* That after such termination the carrier or conference of carriers may not reinstitute such contract rate system or part thereof so terminated without prior permission by the Commission in accordance with the provisions of this section. As used in this section, the term 'contract shipper' means a person other than a carrier or conference of carriers who is a party to a contract the use of which may be permitted under this section."

SEC. 3. Section 15, Shipping Act, 1916, is amended to read as follows:

"SEC. 15. That every common carrier by water, or other person subject to this Act, shall file immediately with the Commission a true copy, or, if oral, a true and complete memorandum, of every agreement with another such carrier or other person subject to this Act, or modification or cancellation thereof, to which it may be a party or conform in whole or in part, fixing or regulating transportation rates or fares; giving or receiving special rates, accommodations, or other special privileges or advantages; controlling, regulating, preventing, or destroying competition; pooling or apportioning earnings, losses, or traffic; allotting ports or restricting or otherwise regulating the number and character of sailings between ports; limiting or regulating in any way the volume or character of freight or passenger traffic to be carried; or in any manner providing for an exclusive, preferential, or cooperative working arrangement. The term 'agreement' in this section includes understandings, conferences, and other arrangements.

"The Commission shall by order, after notice and hearing, disapprove, cancel, or modify any agreement, or any modification or cancellation thereof, whether or not previously approved by it, that it finds to be unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or to operate to the detriment of the commerce of the United States, or to be contrary to the public interest, or to be in violation of this Act, and shall approve all other agreements, modifications, or cancellations. No such agreement shall be approved, nor shall continued approval be permitted for any agreement (1) between conferences of carriers serving different trades that would otherwise be naturally competitive unless each conference retains the right of independent action, or (2) in respect to any conference agreement, which fails to provide reasonable and equal terms and conditions for admission and readmission to conference membership of other qualified carriers in the trade, or fails to provide that any member may withdraw from membership upon reasonable notice without penalty for such withdrawal.

"The Commission shall disapprove any conference agreement, after notice and hearing, on a finding of inadequate policing and enforcing of the obligations under it, or of failure or refusal to adopt and maintain reasonable procedures for promptly and fairly hearing and considering shippers' requests and complaints.

"Any agreement and any modification or cancellation of any agreement not approved, or disapproved, by the Commission shall be unlawful, and agreements, modifications, and cancellations shall be lawful only when and as long as approved by the Commission; before approval or after disapproval it shall be unlawful to carry out in whole or in part, directly or indirectly, any such agreement, modification, or cancellation; except that tariff rates, fares, and charges, and classifications, rules, and regulations explanatory thereof including changes in special rates and charges covered by section 14b of this Act which do not involve a change in the spread between such rates and charges and the rates and charges applicable to noncontract shippers) agreed upon by approved conferences, and changes and amendments thereto, if otherwise in accordance with law, shall be permitted to take effect without prior approval upon compliance with the filing requirements of section 18(b) hereof and with the provisions of any regulations the Commission may adopt.

"Every agreement, modification, or cancellation lawful under this section, or permitted under section 14b, shall be excepted from the provisions of the Act approved July 2, 1890, entitled 'An Act to protect trade and commerce again unlawful restraints and monopolies', and amendments and Acts supplementary thereto, and the provisions of sections 73 to 77, both inclusive, of the Act approved August 27, 1894, entitled 'An Act to reduce taxation, to provide revenue for the Government, and for other purposes', and amendments and Acts supplementary thereto.

"Whoever violates any provision of this section shall be liable to a penalty of not more than $1,000 for each day such violation continues to be recovered by the United States in a civil action."

SEC. 4. Notwithstanding the provisions of section 14b and 15, Shipping Act, 1916, as amended by this Act, all existing agreements which are lawful under the Shipping Act, 1916, immediately prior to the enactment of this Act, shall remain lawful unless disapproved, canceled, or modified by the Commission pursuant to the provisions of the Shipping Act, 1916, as amended by this Act: *Provided, however,* That all such existing agreements which are rendered unlawful by the provisions of such Act as hereby amended must be amended to comply with the provisions of such Act as hereby amended, and if such amendments are filed for approval within six months after the enactment of this Act, such agreements so amended shall be lawful unless and until disapproved, canceled, or modified by the Commission, but if not so amended and filed within said six-month period, such agreements, if thereafter found to be in violation of the Act, as hereby amended, may be declared unlawful by the Commission from the expiration of said six-month period.

SEC. 5. Section 18, Shipping Act, 1916, is hereby amended as follows:

(a) Insert "(a)" immediately after the section number "18".

(b) Add the following subsection 18(b):

"(b)(1) From and after ninety days following enactment hereof every common carrier by water in foreign commerce and every conference of such carriers shall file with the Commission and keep open to public inspection tariffs showing all the rates, fares, and charges of such carrier or conference of carriers for transportation to and from United States ports and foreign ports between all points on its own route and on any through route which has been established. Such tariffs shall plainly show the places between which freight will be carried, and shall contain the classification of freight in force, and shall also state separately such terminal or other charge, privilege, or facility under the control of the carrier or conference of carriers which is granted or allowed, and any rules or regulations which in anywise change, effect, or determine any part or the aggregate of such aforesaid rates, or charges, and shall include specimens of any bill of lading, contract of affreightment, or other document evidencing the transportation agreement. Copies of such tariffs shall be made available to any person and a reasonable charge may be made therefor. The requirements of this section shall not be applicable to cargo loaded and carried in bulk without mark or count.

(2) No change shall be made in the rates, fares, charges, classifications, rules, or regulations, which results in an increase in cost to the shipper, except by the filing, as aforesaid, of a new tariff or tariffs which shall become effective not earlier than thirty days after the date of filing thereof with the Commission, and each such tariff or tariffs shall plainly show the changes proposed to be made in the tariff or tariffs then in force and the time when the rates, fares, charges, classifications, rules, or regulations as changed are to become effective: *Provided, however,* That the Commission may, in its discretion and for good cause, allow such changes upon less than the period of thirty days herein specified. Any new or initial rate, or any change in the rates, fares, charges, or classifications, rules, or regulations which results in a decreased cost to the shipper may become effective upon filing with the Commission. The term 'tariff' as used in this paragraph shall include any amendment, supplement, or reissue.

"(3) No common carrier by water in foreign commerce or conference of such carriers shall charge or demand or collect or receive a greater or less or different compensation for the transportation of property or for any service in connection therewith than the rates and charges which are specified in its tariffs on file with the Commission and in effect at the time; nor shall any such carrier rebate, refund, or remit in any manner or by any device any portion of the rates or charges so specified, nor extend or deny to any person any privilege or facility, except in accordance with such tariffs. Nothing in this Act shall prevent the carriage, storage, or handling of property free or at reduced rates, for the United States, State, municipal, or foreign governments, or for religious organizations or religious personnel, or for charitable purposes: *Provided, however,* That appropriate authority therefor is set forth in a tariff or tariffs on file with the Commission.

"(4) The Commission shall by regulations prescribe the form and manner in which the tariffs required by this section shall be filed; and the Commission is authorized to reject any tariff filed with it which is not in conformity with this section and with such regulations. Upon rejection by the Commission, a tariff shall be void and its use unlawful.

"(5) Whoever violates any provision of this section shall be liable to a penalty of not more than $1,000 for each day such violation continues, to be recovered by the United States in a civil action."

SEC. 6. Section 20, Shipping Act, 1916, is amended by changing the period at the end thereof to a semicolon and adding the following: "or to prevent the giving by any common carrier by water which is a party to a conference agreement approved pursuant to section 15 of this Act, or by any other person subject to this Act, to, or the soliciting or receipt by the conference or any person, firm, corporation, or agency designated by the conference, of information for the purpose of determining whether a shipper or consignee has committed a breach of an agreement with the conference or its member lines or of determining whether a conference member has committed a breach of the conference agreement, or for the purpose of compiling statistics of cargo movement, but the use of such information for any other purpose prohibited by this Act or any other Act shall be unlawful."

SEC. 7. The Shipping Act, 1916, is hereby amended by inserting a new section 43 reading as follows:

"SEC. 43. The Commission shall make such rules and regulations as may be necessary to carry out the provisions of this Act."

SEC. 8. Section 16 First, Shipping Act, 1916 (39 Stat. 734; 46 U.S.C. 815), is hereby amended by deleting the period at the end thereof and adding the following: ": *Provided,* That within thirty days after enactment of this Act, or within thirty days after the effective date or the filing with the Commission, whichever is later, of any conference freight rate, rule, or regulation in the foreign commerce of the United States, the Governor of any State, Commonwealth, or possession of the United States may file a protest with the Commission upon the ground that the rate, rule, or regulation unjustly discriminates against that State, Commonwealth, or possession of the United States, in which case the Commission shall issue an order to the conference to show cause why the rate, rule, or regulation should not be set aside. Within one hundred and twenty days from the date of the issuance of such order, the Commission shall determine whether or not such rate, rule, or regulation is unjustly discriminatory and issue a final order either dismissing the protest, or setting aside the rate, rule, or regulation."

SEC. 9. Section 2 of the Act entitled "To Amend the Shipping Act, 1916", approved August 12, 1958 (72 Stat. 574), as amended by an Act approved June 29, 1960 (74 Stat. 253), and as amended by an Act approved June 30, 1961 (75 Stat. 195), is further amended by striking out "September 15, 1961," and inserting in lieu thereof "March 31, 1962".

SEC. 10. Except for section 9 hereof which shall be effective immediately upon enactment, this Act shall be effective on and after April 1, 1962.

MESSAGE FROM THE HOUSE—ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the Speaker pro tempore had affixed his signature to the following enrolled bills and joint resolutions, and they were signed by the Vice President:

S. 200. An act to amend the act entitled "An act relative to employment of certain adult Indians on or near Indian reservations," approved August 3, 1956;

S. 279. An act to provide Federal assistance for projects which will demonstrate or develop techniques and practices leading to a solution of the Nation's juvenile delinquency control problems;

S. 1528. An act to increase the relief or retirement compensation of certain former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force, and the U.S. Secret Service; and of widows and children of certain deceased former officers of such forces, department, or service;

S. 1529. An act, to amend the act entitled "An act to regulate the height of buildings in the District of Columbia," approved June 1, 1910, as amended;

S. 1719. An act to amend title 23 of the United States Code with respect to Indian reservation roads;

S. 1762. An act to regulate the practice of physical therapy in the District of Columbia;

S. 1768. An act to provide for the restoration to Indian tribes of unclaimed per capita and other individual payments of tribal trust funds;

S. 1807. An act to authorize the disposition of land no longer needed for the Chilocco Indian Industrial School at Chilocco, Okla.;

S. 2241. An act to donate to the Jicarilla Apache Tribe of the Jicarilla Reservation, N. Mex., approximately 391.43 acres of federally owned land;

H.R. 176. An act to amend section 331 of title 28 of the United States Code so as to provide for representation on the Judicial Conference of the United States;

H.R. 2816. An act for the relief of CWO James M. Cook;

H.R. 2883. An act to amend title 28, entitled "Judiciary and Judicial Procedure," of the United States Code to provide for the defense of suits against Federal employees arising out of their operation of motor vehicles in the scope of their employment, and for other purposes;

H.R. 3606. An act for the relief of William C. Winter, Jr., lieutenant colonel, U.S. Air Force (Medical Corps);

H.R. 3863. An act for the relief of Woody W. Hackney of Forth Worth, Tex.;

H.R. 4369. An act for the relief of Henry James Taylor;

H.R. 4458. An act to authorize the Secretary of the Interior to replace lateral pipelines, line discharge pipelines, and to do other work he determines to be required for the Avondale, Dalton Gardens, and Hayden Lake Irrigation Districts in the State of Idaho;

H.R. 4669. An act to amend the law relating to gambling in the District of Columbia;

H.R. 5182. An act for the relief of Charles P. Redick;

H.R. 5559. An act for the relief of Ralph E. Swift and his wife, Sally Swift;

H.R. 6667. An act to amend the act of August 16, 1957, relating to microfilming of papers of Presidents of the United States, to remove certain liabilities of the United States with respect to such activities;

H.R. 6996. An act for the relief of Harry Weinstein;

H.R. 7264. An act for the relief of M. C. Pitts;

H.R. 7447. An act to amend the Strategic and Critical Materials Stockpiling Act to provide for the immediate disposition of certain waterfowl feathers and down;

H.J. Res. 109. Joint resolution designating the 17th day of December 1961 as "Wright Brothers Day"; and

H.J. Res. 499. Joint resolution authorizing a celebration of the American patent system.

ADJOURNMENT TO 11 A.M. TOMORROW

Mr. CLARK. Mr. President, I move, under the order heretofore entered, that the Senate adjourn until 11 o'clock tomorrow morning.

The motion was agreed to; and (at 6 o'clock and 57 minutes p.m.) the Senate adjourned, under the order previously entered, until tomorrow, Wednesday, September 13, 1961, at 11 o'clock a.m.

NOMINATIONS

Executive nominations received by the Senate September 12, 1961:

U.S. ATTORNEYS

William Medford, of North Carolina, to be U.S. attorney for the western district of North Carolina for the term of 4 years, vice James M. Baley, Jr.

William H. Murdock, of North Carolina, to be U.S. attorney for the middle district of North Carolina for the term of 4 years, vice James E. Holshouser, resigned.

IN THE AIR FORCE

Maj. Gen. William H. Blanchard, 1445A, Regular Air Force, to be assigned to positions of importance and responsibility designated by the President in the rank of lieutenant general, under the provisions of section 8066, title 10 of the United States Code.

The following-named officers for temporary appointment in the U.S. Air Force under the provisions of chapter 839, title 10 of the United States Code:

To be brigadier general

Col. William B. Campbell, 2000A, Regular Air Force.

Col. Richard O. Hunziker 4164A, Regular Air Force.

Col. Larry A. Smith, 19176A, Regular Air Force, Medical.

Lt. Gen. Robert W. Burns, 527A, Regular Air Force, to be senior Air Force member, military staff committee, United Nations, under the provisions of section 711, title 10 of the United States Code.

Lt. Gen. Roscoe C. Wilson, 360A (major general, Regular Air Force), U.S. Air Force, to be placed on the retired list in the grade of lieutenant general, under the provisions of section 8962, title 10 of the United States Code.

HOUSE OF REPRESENTATIVES

TUESDAY, SEPTEMBER 12, 1961

The House met at 12 o'clock noon and was called to order by the Speaker pro tempore, Mr. MCCORMACK.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

This petition from the Lord's prayer (Matthew 6: 10): *Thy kingdom come.*

O Thou who art the Supreme Ruler of the Universe, inspire us to fix our minds and hearts upon that glorious time when the kingdom of the earth shall become the kingdom of our Lord and men everywhere shall own Thee as their Father and all their fellow men as brothers.

May we never become disheartened and lose sight of the splendor of Thy kingdom but help us to search diligently for signs and portents of that advancing day which tell us that truth and righteousness are marching on.

Grant that by the generous and gracious exercise of understanding and good will toward all men we may seek to remove those discords and dissensions among the nations which impede the progress of Thy kingdom and the fulfillment of our Lord's petition.

Hear us in His name. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment bills and joint resolutions of the House of the following titles (omitted from the RECORD of September 11, 1961):

H.R. 176. An act to amend section 331 of title 28 of the United States Code so as to provide for representation on the Judicial Conference of the United States;

H.R. 2816. An act for the relief of CWO James M. Cook;

H.R. 3606. An act for the relief of William C. Winter, Jr., lieutenant colonel, U.S. Air Force (Medical Corps);

H.R. 3863. An act for the relief of Woody W. Hackney of Fort Worth, Tex.;

H.R. 4369. An act for the relief of Henry James Taylor;

H.R. 4458. An act to authorize the Secretary of the Interior to replace lateral pipelines, line discharge pipelines, and to do other work he determines to be required for the Avondale, Dalton Gardens, and Hayden Lake Irrigation Districts in the State of Idaho;

H.R. 5182. An act for the relief of Charles P. Redick;

H.R. 5559. An act for the relief of Ralph E. Swift and his wife, Sally Swift;

H.R. 6667. An act to amend the act of August 16, 1957, relating to microfilming of papers of Presidents of the United States, to remove certain liabilities of the United States with respect to such activities;

H.R. 6996. An act for the relief of Harry Weinstein;

H.R. 7264. An act for the relief of M. C. Pitts;

H.J. Res. 109. Joint resolution designating the 17th day of December 1961 as "Wright Brothers Day"; and

H.J. Res. 499. Joint resolution authorizing a celebration of the American patent system.

The message also announced that the Senate had passed with an amendment in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 2010. An act to amend title V of the Agricultural Act of 1949, as amended, and for other purposes.

The message also announced that the Senate insists upon its amendment to the foregoing bill, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. JORDAN, Mr. ELLENDER, Mr. JOHNSTON, Mr. HOLLAND, Mr. AIKEN, Mr. YOUNG of North Dakota, and Mr. HICKENLOOPER to be the conferees on the part of the Senate.

The message also announced that the Senate had passed bills, a joint resolution, and a concurrent resolution of the following titles, in which the concurrence of the House is requested:

S. 1274. An act for the relief of the widow of Julian E. Gillespie;

S. 1761. An act to amend the act of March 3, 1901, relating to divorce, legal separation, and annulment of marriage in the District of Columbia;

S. 2488. An act to increase the number of apprentices authorized to be employees of the Government Printing Office, and for other purposes;

S.J. Res. 132. Joint resolution extending recognition to the International Exposition for Southern California in the year 1966 and authorizing the President to issue a proclamation calling upon the several States of the Union and foreign countries to take part in the exposition; and

S. Con. Res. 40. Concurrent resolution authorizing the printing as a Senate document of the 40th biennial meeting of the Convention of American Instructors of the Deaf; and providing for additional copies.

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 739) entitled "An act to amend the Civil Service Retirement Act, as amended, with respect to the method of computing interest earnings of special Treasury issues held by the civil service retirement and disability fund," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. JOHNSTON, Mr. MONRONEY, Mr. CLARK, Mr. FONG, and Mr. BOGGS to be the conferees on the part of the Senate.

The message also announced that the Senate disagrees to the amendments of the House to the concurrent resolution (S. Con. Res. 14) entitled "Concurrent resolution saluting 'Uncle Sam' Wilson, of Troy, N.Y., as the progenitor of America's national symbol of 'Uncle Sam,'" requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. MCCLELLAN, Mr. KEATING, and Mr. COTTON to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following titles:

S. 279. An act to provide Federal assistance for projects which will demonstrate or develop techniques and practices leading to a solution of the Nation's juvenile delinquency control problems.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 4998) entitled "An act to assist in expanding and improving community facilities and services for the health care of aged and other persons, and for other purposes," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. HILL, Mr. YARBOROUGH, Mr. WILLIAMS of New Jersey, Mr. PELL, Mr.

JAVITS, and Mr. CASE of New Jersey to be the conferees on the part of the Senate.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 5255) entitled "An act to clarify the status of circuit and district judges retired from regular active service," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. EASTLAND, Mr. JOHNSTON, and Mr. HRUSKA to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 7916) entitled "An act to expand and extend the saline water conversion program being conducted by the Secretary of the Interior."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1653) entitled "An act to amend title 18, United States Code, to prohibit travel or transportation in commerce in aid of racketeering enterprises."

HOUSE MEETS AT 10 O'CLOCK A.M. ON SEPTEMBER 13

Mr. ALBERT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 10 o'clock tomorrow.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

COMMITTEE ON APPROPRIATIONS: SUPPLEMENTAL APPROPRIATION BILL, 1962

Mr. THOMAS. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a report on the supplemental appropriations bill, 1962.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BOW. Mr. Speaker, I reserve all points of order on the bill.

EDUCATIONAL AND CULTURAL EXCHANGES

Mr. HAYS. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 8666) to provide for the improvement and strengthening of the international relations of the United States by promoting better mutual understanding among the peoples of the world through educational and cultural exchanges, with a Senate amendment thereto, disagree to the amendment of the Senate and agree to the conference asked by the Senate.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

The Chair hears none and appoints the following conferees: Messrs. HAYS, FARBSTEIN, MONAGAN, ADAIR, and SEELY-BROWN.

AMENDING CIVIL SERVICE RETIREMENT ACT

Mr. MURRAY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 739) to amend the Civil Service Retirement Act, as amended, with respect to the method of computing interest earnings of special Treasury issues held by the civil service retirement and disability fund, with House amendments thereto, insist upon the amendments of the House, and agree to the conference requested by the Senate.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

The Chair hears none, and appoints the following conferees: Messrs. MURRAY, MORRISON, and CORBETT.

AMENDING TITLE V OF THE AGRICULTURAL ACT OF 1949

Mr. POAGE. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 2010) to amend title V of the Agricultural Act of 1949, as amended, and for other purposes, with Senate amendment thereto, disagree to the Senate amendment, and agree to the conference requested by the Senate.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas [Mr. POAGE]?

Mr. COAD. Mr. Speaker, I object.

DEPARTMENTS OF STATE AND JUSTICE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATION BILL—1962

Mr. ROONEY. Mr. Speaker, I call up the conference report on the bill (H.R. 7371) making appropriations for the Departments of State and Justice, the Judiciary, and related agencies for the fiscal year ending June 30, 1962, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. NO. 1163)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7371) "making appropriations for the Departments of State and Justice, the Judiciary, and related agencies, for the fiscal year ending June 30, 1962, and for other purposes," having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 6, 13 and 19.

That the House recede from its disagreement to the amendments of the Senate numbered 5, 10, 15, 16, 17, 23, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$133,250,000"; and the Senate agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,323,000"; and the Senate agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert $4,650,000"; and the Senate agree to the same.

Amendment numbered 4: That the House recede from its disagreement to the amendment of the Senate numbered 4, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$75,000"; and the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,910,000"; and the Senate agree to the same.

Amendment numbered 8: That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,710,000"; and the Senate agree to the same.

Amendment numbered 9: That the House recede from its disagreement to the amendment of the Senate numbered 9, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$7,400,000"; and the Senate agree to the same.

Amendment numbered 11: That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$2,370,000"; and the Senate agree to the same.

Amendment numbered 12: That the House recede from its disagreement to the amendment of the Senate numbered 12, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$4,210,000"; and the Senate agree to the same.

Amendment numbered 14: That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$110,000"; and the Senate agree to the same.

Amendment numbered 18: That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$8,000,000"; and the Senate agree to the same.

Amendment numbered 22: That the House recede from its disagreement to the amendment of the Senate numbered 22, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$7,500,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 20, 21, 24, 25, and 26.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7371) making appropriations for the Departments of State and Justice, the Judiciary, and related agencies for the fiscal year ending June 30, 1962, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

TITLE I—DEPARTMENT OF STATE

Administration of foreign affairs

Salaries and Expenses

Amendment No. 1: Appropriates $133,250,000 instead of $132,000,000 as proposed by the House and $134,750,000 as proposed by the Senate.

Acquisition, Operation, and Maintenance of Buildings Abroad

Amendment No. 2: Provides a limitation of $1,323,000 for administrative expenses instead of $1,273,000 as proposed by the House and $1,373,000 as proposed by the Senate.

Acquisition, Operation, and Maintenance of Buildings Abroad (Special Foreign Currency Program)

Amendment No. 3: Appropriates $4,650,000 instead of $4,500,000 as proposed by the House and $5,300,000 as proposed by the Senate.

International Organizations and Conferences

International conferences and contingencies

Amendment No. 4: Provides a limitation of $75,000 for representation allowances instead of $60,000 as proposed by the House and $100,000 as proposed by the Senate.

United States Citizens Commission on NATO

Amendment No. 5: Appropriates $150,000 as proposed by the Senate instead of $125,000 as proposed by the House.

Amendment No. 6: Deletes language of the Senate.

International Commissions

International fisheries commissions

Amendment No. 7: Appropriates $1,910,000 instead of $1,896,000 as proposed by the House and $1,938,000 as proposed by the Senate.

Educational Exchange

International educational exchange activities

Amendment No. 8: Provides a limitation of $1,710,000 for administrative expenses instead of $1,650,000 as proposed by the House and $1,783,000 as proposed by the Senate.

The conferees are in agreement that funds for travel of dependents should be used only to return dependents now abroad; that no funds should be used to send additional dependents abroad.

International Educational Exchange Activities (Special Foreign Currency Program)

Amendment No. 9: Appropriates $7,400,000 instead of $6,600,000 as proposed by the House and $8,200,000 as proposed by the Senate.

TITLE II—DEPARTMENT OF JUSTICE

Federal prison system

Buildings and Facilities

Amendment No. 10: Appropriates $2,050,000 as proposed by the Senate instead of $1,800,000 as proposed by the House.

TITLE III—THE JUDICIARY

Courts of appeals, district courts, and other judicial services

Salaries of Referees

Amendment No. 11: Appropriates $2,370,000 instead of $2,290,000 as proposed by the House and $2,455,000 as proposed by the Senate.

Expenses of Referees

Amendment No. 12: Appropriates $4,210,000 instead of $4,010,000 as proposed by the House and $4,412,000 as proposed by the Senate.

TITLE IV—RELATED AGENCIES

United States Information Agency

Salaries and Expenses

Amendment No. 13: Appropriates $110,000,000 as proposed by the House instead of $111,700,000 as proposed by the Senate.

Amendment No. 14: Provides a limitation of $110,000 for representation instead of $100,000 as proposed by the House and $120,000 as proposed by the Senate.

Salaries and Expenses (Special Foreign Currency Program)

Amendment No. 15: Inserts language proposed by the Senate.

Amendment No. 16: Appropriates $9,300,000 as proposed by the Senate instead of $7,500,000 as proposed by the House.

Amendment No. 17: Deletes language as proposed by the Senate.

Special international program

Amendment No. 18: Appropriates $8,000,000 instead of $7,382,500 as proposed by the House and $8,603,000 as proposed by the Senate. The conferees are in agreement that none of the increase allowed above the House figure is to be used in connection with trade missions.

Amendment No. 19: Provides a limitation of $30,000 for representation as proposed by the House instead of $50,000 as proposed by the Senate.

Amendment No. 20: Reported in disagreement.

Special international program (special foreign currency program)

Amendment No. 21: Reported in disagreement.

Acquisition and construction of radio facilities

Amendment No. 22: Appropriates $7,500,000 instead of $7,150,000 as proposed by the House and $7,548,000 as proposed by the Senate.

Informational media guarantee fund

Amendment No. 23: Appropriates $1,500,000 as proposed by the Senate instead of $2,500,000 as proposed by the House.

Commission on Civil Rights

Salaries and Expenses

Amendment No. 24: Reported in disagreement.

Amendment No. 25: Reported in disagreement.

Amendment No. 26: Reported in disagreement.

JOHN J. ROONEY,
ROBERT L. F. SIKES,
CLARENCE CANNON,
FRANK T. BOW,
JOHN TABER,
Managers on the Part of the House.

Mr. ROONEY. Mr. Speaker, I should like to briefly explain the action of the managers on the part of the House in the conference with the other body on the pending bill, H.R. 7371, making appropriations for the Departments of State and Justice, the Judiciary, and related agencies for fiscal year 1962.

Mr. Speaker, the conference report now before the House for adoption carries the total amount $756,422,550. This amount is $39,468,652 less than the total budget estimates of $795,891,202 for the items in this bill. The amount carried in the conference report is $5,122,500 more than the amount contained in the bill when it was passed by this body. However, of this amount approximately 40 percent is allowed only for expenditures by the use of foreign currencies. Also, $586,000 of this is occasioned by the extension of the Civil Rights Commission.

Mr. Speaker, compared with the bill as passed by the other body, the amount now recommended in the conference report is $5,616,000 less than the total amount approved by the other body.

The following is a summary of the action taken with regard to the Departments of State and Justice, the Judiciary, and related agencies appropriations bill for fiscal year 1962:

Item	Budget estimates	Passed House	Passed Senate	Conference action	Conference action compared with—		
					Budget estimate	House	Senate
Department of State	$289,675,000	$267,478,000	$272,695,000	$269,717,000	−$19,958,000	+$2,239,000	−$2,978,000
Department of Justice	298,384,000	294,239,900	294,489,900	294,489,900	−3,894,100	+250,000	
The Judiciary	56,050,202	54,497,650	55,064,650	54,777,650	−1,272,552	+280,000	−287,000
U.S. Information Agency	151,480,000	134,782,600	138,901,000	136,550,000	−14,930,000	+1,767,500	−2,351,000
Civil Rights Commission	302,000	302,500	888,000	888,000	+586,000	+586,000	
Grand total	795,891,202	751,300,650	762,038,550	756,422,550	−39,468,652	+5,122,500	−5,616,000

Mr. Speaker, I briefly yield to the distinguished gentleman from Ohio [Mr. Bow] the ranking minority member of the subcommittee.

Mr. BOW. Mr. Speaker, I thank the gentleman for yielding to me. I should like to say simply that we are in full agreement with the conference report. There are no items with which the minority is in disagreement.

Mr. BECKER. Mr. Speaker, will the gentleman from New York yield to me?

Mr. ROONEY. I yield to the distinguished gentleman from New York.

Mr. BECKER. I was unable to hear what was the difference between the bill passed by the House and the amount on which we are about to act in the conference report.

Mr. ROONEY. The difference between the total amount passed by the House, to wit: $751,300,050 and the total amount contained in the pending conference report, to wit: $756,422,550 is $5,122,500 more than the amount contained in the House bill, but of this $5 million plus approximately 40 percent is to be used by expenditure of foreign currencies on deposit in the Treasury of the United States.

Mr. BECKER. I appreciate the gentleman's explanation.

Mr. ROONEY. I thank the gentleman from New York.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The conference report was agreed to.

The SPEAKER pro tempore. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 20: Page 34, line 22, insert: ": *Provided further*, That the unexpended balance of funds heretofore appropriated under the heading 'President's Special International Program' shall be merged with funds appropriated hereunder and accounted for as one fund."

Mr. ROONEY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ROONEY moves that the House recede from its disagreement to the amendment of the Senate numbered 20 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 21: Page 35, line 15, insert: ": *Provided further*, That the unexpended balance of funds heretofore appropriated under the heading 'Special Foreign Currency Program' shall be merged with funds appropriated hereunder and accounted for as one fund."

Mr. ROONEY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ROONEY moves that the House recede from its disagreement to the amendment of the Senate numbered 21 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

Mr. ROONEY. Mr. Speaker, I think it would be more orderly procedure for me to ask unanimous consent that amendment No. 25 in disagreement be considered prior to consideration of amendment No. 24, for the reason that amendment No. 25 provides for the extension of the life of the Civil Rights Commission, whereas amendment No. 24 furnishes the money in regard thereto. So, Mr. Speaker, I ask unanimous consent that we consider amendment No. 25 next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The SPEAKER pro tempore. The Clerk will report the amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 25: Page 36, line 21, insert: *"Provided*, That section 104(b) of the Civil Rights Act of 1957 is amended by striking out 'four years from the date of the enactment of this Act' and inserting in lieu thereof 'September 9, 1963' ".

Mr. ROONEY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ROONEY moves that the House recede from its disagreement to the amendment of the Senate numbered 25 and concur therein with an amendment, as follows: In lieu of the date of "September 9, 1963" in said amendment, insert: "September 30, 1963."

Mr. ROONEY. Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Florida [Mr. SIKES].

Mr. SIKES. Mr. Speaker, I would like to be sure that the House understands just exactly what this amendment proposes. This is an effort to breathe new life into the Civil Rights Commission which expired on September 9.

Mr. Speaker, at a time when we in this Nation need to marshal and coordinate our resources; when we need to stand together if ever we are going to stand together to confront a common foe; when we are being crowded to the very brink of war by an unscrupulous opponent who seeks to destroy our resolve and that of our friends in the world, it appears to me to be utmost folly to waste our time, our funds, and our energies on this issue.

The bill before you is an appropriations bill. It is not a legislative bill. The pending civil rights legislation which has been put into this bill by the other body is not even properly before us. This is legislation on an appropriation bill. If it had been proposed in the House it would have been ruled out as not germane.

Mr. Speaker, the extension of the Civil Rights Commission is both unwise and unsound. It has not justified its existence in the past. There is no reason to assume that it will do so in the future. It has been a complete waste of money. It has said nothing of consequence, it has reported nothing of consequence, it has recommended nothing of consequence during the 4 years of its existence.

In recent days in order to focus attention on its existence and thereby stir up sentiment and support for it, the Commission has issued a flurry of statements which further attest to its inability to perform an effective service. All of its efforts have been disruptive, all have served to create dissension and unrest. None has contributed to national solidarity and strength. This, Mr. Speaker, during the time when our greatest need is unity, solidarity, and strength.

The Civil Rights Commission should be eliminated entirely. Actually it ceased to exist as an agency of Government on September 9, unregretted, unlamented, and largely unnoticed other than by professional mourners.

There is no reason now to breathe new life into it. I hope the House will reject the action of the Senate in reestablishing and refinancing this unwanted agency by slipping it into a bill where it has no business, without hearings, without debate, and without appropriate consideration.

Mr. ROONEY. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, I think we all understand that the extension in this appropriations bill of the life of the Civil Rights Commission for 2 years was first effectuated in the other body and was decided there by a rollcall vote.

The life of the Commission has expired by present law on September 9, which has already gone by. The action now before the House for approval, and agreed to by a majority of the conferees of the House and the other body, would extend the life of the Commission for 2 years, from the 30th of this month.

We all know the Commission on Civil Rights has done an intelligent, decent, dignified job in delving into what some consider a very touchy subject. Some of the most distinguished citizens of this country are members of this Commission. The chairman, Dr. John A. Hannah, is the president of Michigan State University. The Vice Chairman of the Commission is Dean Robert G. Storey, president of the Southwestern Legal Foundation, Dallas, Tex. I believe Dean Storey is also the dean of the Law School of Southern Methodist University. Other members of the Commission are Rev. Theodore M. Hesburgh, C.S.C., president of the University of Notre Dame in Indiana, and Dr. Robert S. Rankin, chairman of the Department of Political Science at Duke University in North Carolina.

This Commission was created in 1957 and extended for a period of 2 years in 1959. The Commission's factfindings and investigations have already been the basis for much needed present legislation. Facts heretofore uncovered by the Commission have been the basis for action by the Attorney General.

On last Saturday, September 9, the Commission on Civil Rights submitted to the President of the United States, the President of the Senate, and the Speaker of the House of Representatives the first volume of a five-volume report on the Commission's activities, findings and recommendations in the fields of voting, education, employment, housing, and the administration of justice. The first volume, on voting, contains the findings and recommendations of the Commission in this vital area. This comprehensive volume on voting dis-

crimination is referred to in the following editorial published in the New York Times of September 11, 1961:

CIVIL RIGHTS REDEFINED

Four years ago last Saturday this country set up by act of Congress a Commission instructed to investigate allegations that certain citizens of the United States are being deprived of their right to vote and have that vote counted by reason of their color, race, religion or national origin.

Exactly 4 years and 380 printed pages later the Commission, as constituted today, has completed its work. Two of its six members dissented on some points, but these dissents dealt with recommendations, not with disputed facts.

The facts held reasonably certain are that in about 100 counties in 8 Southern States Negroes are or have recently been denied the right to vote on grounds of race or color; that the 14th and 15th amendments have been evaded in various ways; and that this situation has not yet been corrected by existing State or Federal laws. There are at least 13 counties in which the Negroes are in a majority but in which no Negro is registered to vote.

Four members of the Commission join in recommending that Congress enact laws sweeping aside all State restrictions not related to age, length of residence, imprisonment or conviction of a felony. Supposedly mental incapacity would be included. Six years of formal schooling would be assumed to prove literacy.

The two eminent southern scholars who dissented were not, of course, arguing for denial of the right to vote. They believed, in the words of Vice Chairman Robert G. Storey, dean of the Law School of Southern Methodist University, that "proposals to alter longstanding Federal-State relationships * * * should not be made unless there is no alternative method to correct an existing evil." It can be argued that existing Federal laws in this field have not been fully applied. The Kennedy administration seems to want to try enforcement a little more before going out for new legislation.

But it can also be argued that the enfranchisement of the southern Negro has gone altogether too slowly and that in these days when justice at home may help win us friends abroad we cannot afford such sluggishness.

And it may be that justice, whether under Federal or under State law, is an end in itself and should be pursued with vigor and unrelenting speed.

Ordinarily, I do not like the attachment of legislative riders to appropriation bills but in this instance there is no alternative. The other body inserted the rider in this bill and if the Civil Rights Commission is to be kept alive for a further period of 2 years, there is, as I say, no alternative but to accept the Senate amendment, with an amendment, changing the date to September 30, 1963. I am confident that this House will continue this Civil Rights Commission, as I suggest, for a further period of 2 years. An "aye" for my pending motion will effectuate such an extension.

Mr. Speaker, I ask unanimous consent that I may insert as part of my remarks an editorial from the New York Times, together with a summary table in connection with my previous remarks today on the adoption of the conference report on this bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. ROONEY. Mr. Speaker, I yield such time as he may desire to the gentleman from California [Mr. COHELAN].

Mr. COHELAN. Mr. Speaker, I warmly support this amendment which would extend the life of the Civil Rights Commission for another 2 years.

Contrary to what some of the opponents to this measure have professed, legislation of this nature is imperative in these perilous times in which we live. We cannot afford, as a matter of fact, not to act on it now—both because it involves the rights and well-being of our own citizens, and because it bears heavily upon the position we hold in the eyes of the newly developing nations of the world.

Although it has been challenged, the fundamental goal of our country has persevered through the nearly two centuries of our existence. This is a goal to guard the rights of the individual, to insure his development and to challenge his abilities. It was set forth simply and yet forcefully by the drafters of the Declaration of Independence when they said:

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty, and the pursuit of Happiness.

Mr. Speaker, this Commission has performed notable and heartwarming service in advancing this fundamental goal of our Nation; it has proven during the last 3 years that it can effectively define problems in the vital field of civil rights and formulate constructive solutions, and it should, as a result, be continued.

My only regret is that stronger action is not being taken at this time. I regret that the legislation which I have joined the distinguished chairman of the Committee on the Judiciary, Mr. CELLER, in introducing, legislation which would make the Civil Rights Commission a permanent branch of our Government and strengthen its factfinding powers, is not being considered today. I am very hopeful, however, that in light of the Commission's distinguished accomplishments, and considering the need for its important work, that we will be able to consider this proposal in the near future, and that the Congress will enact it.

Mr. CRAMER. Mr. Speaker, I move to strike out the last word.

Mr. Speaker, the House just a few minutes ago discussed but did not take a vote on the conference report on the Justice Department and other agencies appropriation bill, H.R. 7371.

Included in the conference report was a very important piece of substantive legislation, the extension of the Civil Rights Commission, which was added by the other body as a rider to this appropriation bill.

The manner in which this has been handled, the lack of opportunity on the part of this body to have the chance to consider the merits with regard to the Civil Rights Commission bill as reported by the Committee on the Judiciary of this body on August 18, clearly indicates that there is something wrong, at least in my opinion, with the manner in which substantive riders are added by the other body to matters that are not related thereto, and in this instance amounts to legislation on an appropriation which would be subject to a point of order if contained in H.R. 7371 in the House—but it is not as a part of the conference report.

Here is what has happened. The Committee on the Judiciary on August 18 reported out an extension of the Civil Rights Commission and included an amendment that is of vital importance so far as the jurisdiction of that Commission is concerned. This amendment was considered on its merits by the committee. The amendment would give the Civil Rights Commission the authority to investigate all vote fraud cases generally, vote fraud cases among the majority as well as the minority. That amendment which I offered in committee was approved by the Committee on the Judiciary, the bill was reported as amended by the Committee on the Judiciary on August 18, but no rule has ever been granted. Therefore, the House has been denied absolutely and completely the opportunity of considering that amendment on its merits. The committee report itself indicates the importance of the amendment, a substantive amendment as proposed and voted out by the Committee on the Judiciary.

I quote the report:

The right to vote is the cornerstone of representative self-government in America. As such, it is imperative that the franchise of every qualified citizen be adequately and effectively safeguarded and protected.

Congress, in 1957, concerned with extensive allegations that certain qualified citizens were being arbitrarily denied the right to vote, or to have their vote properly counted, established the Commission on Civil Rights to investigate charges that the franchise of minorities was being abused. This duty of the Commission was set forth in section 104(a) of the Civil Rights Act of 1957 (42 U.S.C. 1975c(a)):

"The Commission shall—

"(1) investigate allegations in writing under oath or affirmation that certain persons are being deprived of their right to vote and have that vote counted by reason of their color, race, religion, or national origin; which writing, under oath or affirmation, shall set forth the facts upon which such belief or beliefs are based."

In 1956, Mr. Herbert Brownell, then the Attorney General, described the proposed operation of the Commission in an executive communication to the Speaker (see p. 14, H. Rept. 291, 85th Cong., 1st sess.):

"Where there are charges that by one means or another the vote is being denied, we must find out all of the facts—the extent, the methods, the results.

"The need for a full scale public study as requested by the President is manifest. The executive branch of the Federal Government has no general investigative power of the scope required to undertake such a study. The study should be objective and free from partisanship. It should be broad and at the same time thorough."

Since its creation, the Commission has been most vigorous in pursuing these objectives. Its numerous investigations of alleged franchise deprivations have been widely hailed.

President John F. Kennedy, in a recent letter to Chairman CELLER urging extension of the Commission, observed, however, that the Commission has not yet fully realized its

"constructive potential." This is certainly true. Limited as it is in jurisdiction to the protection of minority interests, it is presently powerless to investigate franchise abuses not based upon "color, race, religion, or national origin."

Yet, as Mr. Byron R. White, Deputy Attorney General, recently observed in a communication to your committee, dated August 7, 1961:

"Apart from the Commission there is no Federal executive agency charged with a continuing responsibility for gathering information calculated to assist in the guaranteeing of the protection of constitutional rights."

If it is true that the denial of freedom to any American is a diminution of freedom to all Americans, then we cannot tolerate restrictions on the franchise from any quarter—for any cause. If the constitutional right to vote is worth protecting through a Federal agency for any Americans, it is worth protecting through such agency for all Americans. The time is past, if ever there was such a time, when constitutional protections can be administered in a discriminatory or segregated manner. It is with this conviction, it is to embrace within the ambit of the Civil Rights Commission's operations the job of safeguarding everyone's right to vote, the most fundamental civil right under the Constitution, that paragraph (4) is offered.

The proposed amendment would broaden the functions of the Commission to cover all citizens seeking franchise protection. If the Commission, in the past, performed a useful function, and our action in extending its life would indicate it has, then filling the present civil rights gap in its responsibilities under the proposed amendment should provide it with an even greater challenge and opportunity for service.

It should be noted well that the new investigative power granted the Commission does not extend to any case involving a purely State or local election.

As with its original authorization to initiate Commission action, allegations must be submitted in writing, under oath, or affirmation. It is not permitted to act on mere hearsay or rumor. Unlawfully according the franchise, as well as its denial, is made a ground for Commission action. And, as is already the case, primary elections, as well as general elections, are embraced within the scope of its broadened responsibilities.

The proposed amendment is not directed at any locality, party or election. Rather it is responsive to a long felt general need. Charges of voting irregularities have probably been made in every election since the founding of the Republic. For the most part, such allegations have been without foundation. But occasionally in our history chicanery has occurred and, because of the lack of effective machinery charged with the responsibility to investigate, has gone unpunished and unexposed to the public view.

Belief in, and respect for, the integrity of the methods by which our leadership is chosen must be maintained. If ever that belief and respect are lost, our freedoms will likewise be lost.

The committee is convinced that the proposed amendment will go a long way toward insuring the preservation of the integrity of the ballot in this country.

Attached hereto and made a part of this report is a letter dated August 7, 1961, from the President to the chairman, Committee on the Judiciary, House of Representatives, a letter dated July 20, 1961, from the Department of Justice, and a letter dated May 12, 1961, from the Commission on Civil Rights.

Mr. Speaker, there is no greater right that a human being has, if you talk about civil rights in America, a free society, a representative form of government, than the right to vote by either the majority or minority. This amendment was for the purpose of giving to the people in America the assurance, so far as the Civil Rights Commission could do it, that they would enjoy the right to vote and to have the vote counted. In other words, give somebody the authority to investigate flagrant voting fraud cases, of which I have evidence in substantial quantity in my files and which has been carried in the press. This matter of vote frauds has been discussed all over the country in the past.

The result of adding this substantive rider limiting it to extension of the Commission in the other body and bringing it in, in the form of a part of a conference report, denies the House any opportunity of working its will on the substantive legislation itself, and of greater importance, on the important clean elections amendment that was approved by the Committee on the Judiciary. It does not give the House the opportunity of considering it.

I discussed with the Parliamentarian how this amendment approved by the House Committee on the Judiciary might be considered under the circumstances, with a motion pending to recede and concur or to recede and concur with an amendment offered by the other body, and I was informed that is a priority motion, therefore no parliamentary procedure could be had except to vote that motion down, which in the makeup of the House at the present time is an impossibility. No motion to consider this clean elections amendment would be in order.

This indicates the shortcomings of the procedures of this body that permits such a rider added to an appropriation bill in the Senate to be included in a conference report with no opportunity for this body to work its will on the substantive matter itself.

Mr. POFF. Mr. Speaker, will the gentleman yield?

Mr. CRAMER. I yield to the gentleman from Virginia.

Mr. POFF. May I ask the gentleman if the chairman of the Committee on the Judiciary has asked the Rules Committee to grant a rule?

Mr. CRAMER. Well, whether he has asked or not, I could not say definitely. But he certainly has not been successful. The distinguished chairman of our Judiciary Committee is quite persuasive in other matters with respect to acquiring a rule and a rule would be forthcoming if the leadership wanted it, especially with the stacked Rules Committee. It is inconceivable to me that he would not have been able to acquire a rule had he pressed for it or if the leadership wanted it and that we would have had the Civil Rights Commission extension legislation as a substantive matter on the floor of this House to be considered on its merits, as well as the amendment that was enacted rather than as a rider in a conference report on an unrelated appropriation bill.

Mr. POFF. It is my understanding that the Commission is authorized under the parent legislation to investigate charges of the denial of the right to vote on account of race, creed or color. The amendment adopted in the Judiciary Committee expanded the authority of the Commission to authorize investigations of charges of deprivation of the right to vote by means of fraud or any illegal act; is that correct?

Mr. CRAMER. The gentleman is absolutely correct. In effect, it protects for everyone the basic constitutional right to vote and to have that vote counted; that is, the civil rights being protected. It protects those rights for all Americans, not only for the minority members. That was the objective involved.

The SPEAKER pro tempore. The time of the gentleman from Florida has expired.

Mr. CRAMER. Mr. Speaker, I ask unanimous consent to proceed for 3 additional minutes.

Mr. ANDERSEN of Minnesota. Mr. Speaker, reserving the right to object, I will not object to Mr. CRAMER having 3 additional minutes, but I do want to vote on this other bill before we forget what the matter is all about.

Mr. CRAMER. I appreciate the statement by the gentleman from Minnesota.

Mr. ANDERSEN of Minnesota. Mr. Speaker, I withdraw my reservation.

The SPEAKER pro tempore. Without objection, the gentleman from Florida is recognized for 3 additional minutes.

There was no objection.

Mr. CRAMER. Mr. Speaker, I hope the gentleman will share my concern about my clean elections amendment which was offered in the Judiciary Committee and approved by the Judiciary Committee in the Civil Rights Extension bill. The committee instructed the chairman to request a rule on the extension of the Civil Rights Commission with the vote fraud amendment. Such a rule was not forthcoming. Here we get in the dying days of the session this substantive piece of legislation—the extension of the Civil Rights Commission as a rider to an appropriation bill, with no opportunity whatsoever to work the will of the House on an amendment offered by this body.

Mr. ANDERSEN of Minnesota. If the gentleman will yield further, the fact that my good friend from Florida [Mr. CRAMER] is arguing the matter as he is, is conducive toward my feeling that I should support his position.

Mr. CRAMER. I thank the gentleman from Minnesota. I just wish there were a parliamentary procedure whereby we were able to get in this substantive clean elections provision at this time. The only recourse now is to vote down the motion to recede and concur in the Senate rider, amendment No. 25.

Mr. Speaker, the committee reported favorably on this amendment, and in that report said as follows:

If it is true that the denial of freedom to any American is a diminution of freedom to all Americans, then we cannot tolerate restrictions on the franchise from any quarter—for any cause. If the constitutional right to vote is worth protecting through a Federal agency for any Americans, it is worth protecting through such agency for all Americans.

Can anyone argue with that?

Mr. SMITH of Virginia. Mr. Speaker, will the gentleman yield?

Mr. CRAMER. I will be delighted to yield to the distinguished gentleman from Virginia, the chairman of the Rules Committee.

Mr. SMITH of Virginia. With reference to the question as to whether an application was made to the Committee on Rules for a rule to bring out the judiciary bill, I want to say as chairman of the Rules Committee that to my knowledge no request was ever made for a rule. I did not know the bill had been reported by the Judiciary Committee.

Based upon the way the Rules Committee is now constituted, there certainly would have been no question about your having had an opportunity to get a rule and have the matter debated fully on the floor of the House.

Mr. CRAMER. I thank the distinguished chairman of the Rules Committee. Does the distinguished chairman of the Rules Committee feel that the manner in which this legislation has been considered by tacking on a substantive rider to an appropriations bill for the extension of the Civil Rights Commission and not permitting the House to consider it or my clean elections amendment is the way to legislate?

Mr. SMITH of Virginia. I think not only in this instance, but in other instances it is an outrageous abuse of the parliamentary procedure, and the House should not stand for it.

Mr. CRAMER. I agree and I thank the gentleman.

I would like to say that the purpose for which it was done was to avoid the vote fraud amendment which was adopted by the Judiciary Committee, and avoid the House having the opportunity to work its will on the question. There is no doubt but what the House would have approved this amendment.

It will be my objective in the future to press for the passage of this obviously necessary amendment protecting the civil right of everyone to vote when the civil rights matter is up for further consideration or in the next session when we have an opportunity to work our will on the merits.

Mr. ROONEY. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York.

The question was taken; and on a division (demanded by Mr. SIKES) there were—ayes 61, noes 18.

So the motion was agreed to.

Mr. SIKES. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to the order of the House of September 7, further consideration of the pending motion and the remaining amendments reported in disagreement will be postponed until tomorrow.

WET LANDS DRAINAGE

Mr. POAGE. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 8520) to amend the Soil Conservation and Domestic Allotment Act, as amended, to add a new subsection to section 16 to limit financial and technical assistance for drainage of certain wet lands.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the present consideration of the bill?

Mr. ANDERSEN of Minnesota. Mr. Speaker, reserving the right to object, will I have an opportunity to offer an amendment to this bill?

Mr. POAGE. Yes, the gentleman will have an opportunity to offer an amendment to the bill.

Mr. ANDERSEN of Minnesota. Mr. Speaker, I withdraw my reservation of objection, with the understanding that I will have the opportunity to offer an amendment.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Soil Conservation and Domestic Allotment Act, as amended, is further amended by adding at the end of section 16 thereof the following new subsection:

"(c) The Secretary of Agriculture shall not enter into an agreement to provide financial or technical assistance for wetland drainage on a farm under authority of this Act, if the Secretary of the Interior has made a finding that wildlife preservation will be materially harmed on that farm by such drainage and such finding, identifying specifically the farm and the land on that farm with respect to which the finding was made, has been filed with the Secretary of Agriculture."

With the following committee amendments:

Page 1, line 6, strike out "(c)" and insert "(e)".

Page 1, line 7, following the word "agreement" insert "in the States of North Dakota, South Dakota, and Minnesota".

Page 2, line 4, strike out the period and the closing quotation marks and insert a colon and the following, *"Provided,* That the limitation against offering such financial and technical assistance shall terminate one year after the date on which the adverse finding of the Secretary of the Interior was filed unless during that time an offer has been made by the Secretary of the Interior or a State government agency to lease or to purchase the wetland area from the owner thereof as a waterfowl resource. The provisions of this subsection shall become effective July 1, 1962."

The committee amendments were agreed to.

Mr. ANDERSEN of Minnesota. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ANDERSEN of Minnesota: On page 2, line 6 after the word "Agriculture" insert "within 90 days after the filing of the application for drainage assistance".

Mr. ANDERSEN of Minnesota. Mr. Speaker, I ask unanimous consent to proceed for an additional 5 minutes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. POAGE. Mr. Speaker, will the gentleman yield?

Mr. ANDERSEN of Minnesota. I yield to the gentleman from Texas.

Mr. POAGE. While I have no authority to speak for anyone other than myself, I am glad to accept the gentleman's amendment.

Mr. ANDERSEN of Minnesota. I thank the gentleman. I think the amendment does improve the bill considerably. I might say to my colleague, I am trying to be reasonable in this matter.

Mr. HOEVEN. Mr. Speaker, will the gentleman yield?

Mr. ANDERSEN of Minnesota. I yield to the gentleman from Iowa.

Mr. HOEVEN. The gentleman has given me an opportunity to examine this amendment. I think it is a good amendment and, so far as I am concerned, I am willing to accept it.

Mr. ANDERSEN of Minnesota. I thank the gentleman.

Mr. Speaker, I would like to ask the gentleman from Texas [Mr. POAGE] a few questions in order that we may have a little legislative history brought into the RECORD at this point, so that the intent of the Congress as to this bill will be clearly on record.

The first question I would like to direct to the gentleman from Texas is this: I am disturbed by the fact that in this bill there is no exact definition as to what constitutes "wet lands."

What do you think is the proper definition of wet lands as the committee has adopted it and has referred to it in the report?

Mr. POAGE. Well, there is no definition of wet lands as such in the bill, for two different reasons. First, the committee explored this subject rather thoroughly and came to the conclusion that it would be virtually impossible to write, in legal language, a satisfactory definition defining wet lands which would be applicable to all possible areas which the committee wants covered by the bill and not, perchance, applicable to some others that we do not want to cover.

Second, the committee felt that an academic definition of wet lands as such is not necessary nor even relevant for the purposes of this bill.

The only question here is what wetland areas are to be subject to the provisions of the legislation. This question the committee has answered in the proviso which has been added at the end of the bill, and in doing so has provided a practical working definition of wet lands which are subject to the provisions of the legislation. As explained on page 3 of the committee report, this proviso in itself establishes an effective definition of wet lands for the purposes of this bill. Only those wet lands in the three States affected by the bill which are of such value to the propagation of wildfowl and other wildlife that they would be acquired by the Department of the Interior or by a State agency, either by lease or by purchase, for purposes of wildlife propagation, are wet lands for the purposes of this bill.

Mr. ANDERSEN of Minnesota. Would the gentleman from Texas agree with me, then, that unless the Department of

the Interior is willing to make a definite, bona fide offer, they will have no further restrictions upon this particular wetland area?

Mr. POAGE. That is absolutely correct. If, during the course of the year following the filing of an objection, neither the Department of the Interior nor a State has made a reasonable offer to lease or purchase the wet lands in question, their right to object to the provisions of the drainage application would be extinguished. I think that is perfectly clear in view of the amendment offered by the gentleman from Minnesota that the right of the Department of the Interior to file objections against the drainage application must be exercised within 90 days after the application is filed. This would preclude beyond any question the right of the Department to come in after a year of inactivity, as the gentleman has suggested, and file another objection.

Mr. ANDERSEN of Minnesota. In connection with the definition of these wet lands, the bill speaks of them as such, but there is room for disagreement as to what does constitute wet lands.

Now, the farmers in my area of Minnesota call such areas potholes, and they are a nuisance, in that they hinder farming. But, the Department of the Interior may, under this bill consider such spots wet lands and say they are necessary and must be preserved for the nesting of ducks.

Another thing: This bill is applicable only to the States of Minnesota and the Dakotas.

Now, Mr. Speaker, it does seem to me—I am not going to insist on my amendment by posing this issue—but it does seem to me that if this legislation is good legislation for Minnesota and the Dakotas, it really should be good legislation for the entire Nation. If these potholes or wet lands are so important that they must be preserved in these particular States then we should preserve them in the rest of the country.

One other question: You have said that the 1-year time limit would begin to run as of the filing of the objection by the Department of the Interior. Now, suppose that neither the Department of the Interior nor any State agency makes any such definite, bona fide offer to acquire the wet lands during the 1-year period, can the Department of the Interior then come in at the end of the year's time and say to my farmers, "Well, we are going to object to your proposed drainage"? Can they interpose another objection?

Mr. POAGE. I think I answered that question rather fully a few moments ago. Categorically the answer is "No," it cannot, and once having failed to comply with the provisions of the bill and making a reasonable offer within the 1 year, the right of the Department to interpose an objection is extinguished.

Mr. ANDERSEN of Minnesota. One further question: What does the committee mean by the term "reasonable offer"? This term does not occur in the bill itself, but it is contained in the committee report on page 3. The Department of the Interior may think an offer is reasonable, but the farmer may say, "I do not think that is a reasonable offer, I do not agree with it." What recourse does the farmer have?

Mr. POAGE. May I say that we in the committee had some discussion on this very point, and it seemed to us that "reasonable offer" would be clearly an offer comparable to those which had recently been made to buy or lease a comparable parcel of wetland in the same area and which had been accepted by the farmers involved.

Mr. ANDERSEN of Minnesota. I thank the gentleman from Texas for his courtesy in this matter, and the detailed explanation just given me, just by way of legislative history in the record.

Mr. REUSS. Mr. Speaker, will the gentleman yield?

Mr. ANDERSEN of Minnesota. I yield.

Mr. REUSS. I should like, Mr. Speaker, to ask the gentleman from Texas, who has just been answering questions propounded by the gentleman from Minnesota, to answer a couple of questions on the Andersen amendment. The Andersen amendment would place a statutory limit of 90 days upon the time given the Department of Interior to file an objection to a proposed drainage application. This is 90 days from the time the application is filed with the county committee by the farmer. But there is no time established by the bill within which the county committee must notify the Interior Department that the application has been filed. Suppose a committee either by inadvertence or design does not notify the Interior Department promptly of the filing of the application so that the Fish and Wildlife Service has very little time, or perhaps even no time at all, in which to file its objection?

Mr. POAGE. The Secretary of Agriculture cannot permit this to happen and I cannot believe that he would do so. This is a special provision of law applying to only a certain type of conservation program application. It establishes a statutory time in which another department of the Government must take action on such applications. I think it is clearly incumbent by the very nature of the statute upon the Secretary of Agriculture to promulgate regulations which would require that one of the procedures which must be followed by the County Committee before it can approve any such drainage application is an extremely prompt notification of the Interior Department that the application has been filed. I believe that the Secretary of Agriculture has both the responsibility and the authority to make some such regulation and from the very cooperative way in which these agencies have worked together in the past, I am abundantly sure that he will do so. I do not believe that the problem proposed by the gentleman will arise.

The SPEAKER pro tempore. The time of the gentleman from Minnesota has expired.

(By unanimous consent Mr. ANDERSEN of Minnesota was allowed to proceed for 2 additional minutes.)

Mr. REUSS. Mr. Speaker, will the gentleman from Minnesota yield further?

Mr. ANDERSEN of Minnesota. I yield to the gentleman from Wisconsin.

Mr. REUSS. I would like to ask the gentleman from Texas this additional question:

Suppose the county committee looks at an application for drainage and decides on its own that there are no wet lands of significance to the wildfowl conservation program on the man's farm? Can it make this decision and go ahead and approve the application without referring it at all to the Department of the Interior?

Mr. POAGE. No, it certainly cannot. Here again the very nature of this special legislation will make it obligatory upon the Department of Agriculture, presumably acting through the county committee, to notify the Interior Department promptly of every application for drainage which is filed in the three States included in the bill. The bill gives the Department of the Interior—not the county committee—the statutory responsibility for this decision. I do not see how the Department of Agriculture could justify approval of such an application without referring it to the Interior Department.

Mr. REUSS. I thank the gentleman from Texas for his answers and the gentleman from Minnesota for his courtesy in yielding to me.

Mr. ANDERSEN of Minnesota. Mr. Speaker, in conclusion I may say that while I have extreme reservations relative to this legislation, I do not want to be considered adamant in my line of reasoning. Consequently, Mr. Speaker, if the amendments I have sent to the desk are adopted, I shall withdraw my objection to passage of the bill.

Mr. JOHNSON of Wisconsin. Mr. Speaker, I want to urge passage of H.R. 8520, as it would eliminate the existing inconsistency of the Department of Agriculture's farm drainage program and the Department of Interior's wetlands preservation program. I introduced this bill on August 7, and identical or similar bills have also been introduced by my colleagues, the gentlemen from Wisconsin, Congressman CLEMENT ZABLOCKI, Congressman HENRY REUSS, Congressman ROBERT KASTENMEIER, and Congressman WILLIAM VAN PELT, and by the gentleman from Michigan, Congressman JOHN DINGELL, the gentleman from Pennsylvania, Congressman JOHN SAYLOR, and the gentleman from Florida, Congressman ROBERT SIKES.

The problem which this legislation would solve is a pressing one. Currently, the Agriculture Department furnishes technical and financial assistance to farmers for drainage of wet lands under the agricultural conservation program. At the same time, the Interior Department is conducting a program for the purchase or lease of wet lands in order to save our dwindling duck population. Present requirements of the law do not permit the Secretary of Agriculture to withhold cost-sharing assistance from drainage projects merely because they adversely affect wildlife.

Here we have two programs which are operating at cross-purposes. Clearly, we must resolve his conflict of interest in

order to prevent the taxpayers' money from being wasted because two programs are working against each other.

My bill provides that no contract for agricultural conservation program assistance can be entered into by the Secretary of Agriculture with a farm operator for drainage of land in North Dakota, South Dakota, and Minnesota if the Secretary of Interior has determined that wildlife preservation will be materially harmed by the proposed drainage project. Prior determination of the specific areas of the farm where this would be so must be made by the Department of Interior and filed with the Department of Agriculture in order for this legislation to apply. The limitation against offering Federal financial and technical assistance for such drainage shall terminate 1 year after the date on which the adverse finding of the Secretary of Interior was filed unless an offer has been made during that time by the Interior Department or a State government agency to lease or purchase the wetland area from the owner as a waterfowl refuge.

Mr. Speaker, such cooperation between the two departments will insure a coordinated approach to a problem of great concern to conservationists across the Nation. The region north and east of the Missouri River in the Dakotas and western Minnesota is still referred to as the last important duck factory in the United States. This was originally a glaciated area of undulating grasslands, pockmarked by thousands of shallow lakes and potholes. According to Thomas A. Schrader of the U.S. Fish and Wildlife Service, this tristate region, which is the area affected by H.R. 8520, may at one time have produced 15 million ducks a year.

Proof of its value for duck production is the use still being made of its remaining water. It is the favored mating and nesting area for blue-winged teal, pintail, mallard and other species in lesser numbers. In normal years, it still turns out from 3 to 4 million ducks, which disperse into all four flyways as they wing southward to wintering grounds.

Continued high production from the prairie potholes is essential to the future of waterfowl hunting throughout the Mississippi and central flyways. Band returns from 2,063 mallards, gadwalls and pintails banded in June, July, and August within the prairie pothole region of the United States show that the ducks were shot in 40 States, Canada, Central America, and South America.

Of redheads banded in the pothole region during the same months and recovered away from the immediate banding area, 13.5 percent were taken in the Atlantic flyway. Of the pintails recovered away from the immediate banding area, 19.2 percent were shot in the Pacific and Atlantic flyways in the United States and in British Columbia. It is plain that prairie pothole ducks contribute to good waterfowl hunting in most parts of the Nation.

Mr. Speaker, in 1936, Congress passed the Soil Conservation and Domestic Allotment Act. It was the basis for the subsidization of many worthwhile soil conservation practices such as stripcropping, terracing, contour plowing, and tree planting. However, the provisions for Federal aid for the drainage of farm wet lands have been indiscriminately used and abused. Since 1936, agricultural drainage has been responsible for destroying 5,602,241 acres of wet lands in Dakota and Minnesota alone. Each year, about 3 percent of the remaining wet lands in this area are lost to federally subsidized drainage projects.

The U.S. Department of Agriculture's Soil Conservation Service has estimated that 127 million acres of natural wet lands originally existed in all the States lying south of the Canadian border. In 1956, the Fish and Wildlife Service of the Department of Interior estimated that 74,439,000 acres of wet lands remained. This is slightly over 58 percent of the original acreage.

Of these remaining wet lands, 8,819,900 acres were classified as having high value for waterfowl and 13,616,500 acres as having moderately high or significant value. This total of 22,436,400 acres constitutes just a little over 30 percent of the remaining wet lands as of that date. In the 4 years which have elapsed since these estimates were made, wet lands have continued to disappear both temporarily and permanently.

Mr. Speaker, the handwriting is on the wall. Immediate action is necessary if we are going to save our continental flights of waterfowl.

The Department of Interior already has the authority to offer to lease or buy wet lands for migratory bird refuges and nesting areas. A bill to accelerate this Federal wetlands acquisition program has already passed the House, and the Senate has passed an amended version. Under the accelerated program provided for in this legislation, it would be possible for farmers to sell or lease their wet lands to the Interior Department at a satisfactory price. The 1-year limitation on the withholding of Federal assistance for drainage of wet lands provided for in H.R. 8520 will insure the farmer against undue delay in the lease or purchase of such lands for waterfowl refuges.

When hearings were held on H.R. 8520 before the Conservation and Credit Subcommittee of the House Agriculture Committee, both the Department of Agriculture and the Department of Interior strongly supported the measure. While the testimony indicated that the two Departments have endeavored to cooperate on coordinating the drainage and wetlands acquisition programs, it was equally clear on the point that the Agriculture Department's hands are now legally tied. USDA has no legal authority to refuse to give technical and financial assistance to a farmer in the drainage of wetland areas simply because those areas are valuable as breeding grounds for migratory wildfowl, and even though the Interior Department might be willing to lease or purchase the wet lands in question under its acquisition program.

Mr. Speaker, H.R. 8520 is intended to eliminate this conflict. There is nothing in the bill to prevent any farmer from draining any area of his land he may wish to drain at his own expense. It merely states that if the specific wet lands are of such value to wildlife propagation that the Department of Interior is willing to lease or acquire them for that purpose, the Department of Agriculture will not circumvent this program by assisting the farmer either financially or technically in such drainage.

On September 1, the Agriculture Department issued a news release titled "Wildlife to Benefit from New Features of Conservation Program." It read, in part, as follows:

> The Department also is supporting legislation now under consideration by the Congress which will limit financial and technical assistance for drainage of certain wet lands in the three-State area of Minnesota, North and South Dakota.
>
> The bill, H.R. 8520, has been reported favorably by the House Agricultural Committee. It directs the Secretary of Agriculture to limit financial or technical assistance for wetland drainage on a farm where the Secretary of Interior finds that drainage will be harmful to wildlife.
>
> Other legislation provides that the Secretary of Interior may lease or purchase the wetland area as a waterfowl resource. Where no offer to lease or purchase is made, drainage assistance may be given.

Mr. Speaker, we hear of the days when ducks and geese were so numerous that they darkened the sky in their spring and fall migrations between wintering grounds in the south and summer nesting areas in the north. But those days are gone forever. As I pointed out before, the alarming decline came when farming brought drainage of the wetland area and destroyed more than half of the nesting range of ducks in the prairie pothole region. The additional corn and wheat produced as a result of this drainage can be recorded as a gain in the dollar-and-cents ledger, but the change has left us poorer in the waterfowl resource account, which is kept in a different set of books.

In calculating the value of further drainage, two factors must be considered. First, since the most economically drainable land has been drained, any future drainage is likely to be more difficult and less rewarding. Second, with increasing demand and decreasing supply, the duck has become vastly more valuable. In pioneer days, the value of a duck was expressed in cents per pound, but today, waterfowl values do not find true expression behind a dollar sign. They have recreational, social, and cultural values which make their meat values appear almost inconsequential.

Secretary of Interior Stewart Udall has said that the necessity to meet the outdoor needs of our people now and in the future will in all likelihood be the sharpest and most consistent pressure on our land, water, and forests in the years ahead. It is our responsibility to see to it that there will be sufficient outdoor recreational area available to our increasing population so that our children and their children may enjoy the outdoor opportunities which we have had. H.R. 8520 will help us to meet that responsibility by protecting our priceless waterfowl resource from indiscriminate, federally subsidized drainage of the wet lands where ducks and geese nest

and rest. I urge the speedy passage of this legislation.

Mr. REUSS. Mr. Speaker, for 20 years we have been subsidizing the drainage of farm wet lands where the ducks and geese breed. More than one-third of the potholes in the Minnesota-Dakota wetlands area have been drained up by this process.

As a result, our waterfowl population has suffered severely. This year, there is a sharply curtailed open season on waterfowl in most of the Nation's flyways. Many responsible biologists have suggested that the season should have been closed entirely.

We are at last embarking on a crash program of acquiring Federal wildlife refuges. But unless we are able to stop the indiscriminate drainage of farm wet lands valuable to wildlife, we will find we are moving twice as fast just to go backward as far as waterfowl are concerned.

H.R. 8520 bears the name of a splendid Congressman and a great conservationist, the gentleman from Wisconsin [Mr. JOHNSON]. The bill provides that the Secretary of Agriculture shall not subsidize the drainage of farm wet lands where the Secretary of the Interior finds that wildlife preservation will be materially harmed, and requires the Secretary of the Interior to make an offer in good faith to purchase or lease any such wet land from the farmer whose application for drainage assistance has thus been turned down. H.R. 8520 resembles similar bills which I have pressed upon Congress over the last 4 years. H.R. 10641, 85th Congress, introduced by me on February 10, 1958, likewise denied drainage assistance where the Secretary of the Interior found that wildlife preservation would be materially harmed, and directed the Secretary of the Interior instead to make a good-faith attempt to acquire such lands as a waterfowl refuge. H.R. 10641 was unfortunately never accorded a hearing. Nor was I able to procure hearings on similar bills which I have introduced in every Congress since then. A similar measure in the form of an amendment to this year's Agriculture Appropriation Act which I made on June 6, 1961, was defeated by a rollcall vote of 196–184. An amendment which I introduced to the agricultural bill of 1961 in July 1961, passed the House, but was unfortunately deleted in conference.

It is because of this long history of the effort to end the abuses of subsidized farm drainage that I am particularly grateful to the vigorous attention given the problem by the gentleman from Texas [Mr. POAGE], whose subcommittee favorably reported out H.R. 8520. I should like, too, to express my appreciation to Mr. John Heinburger, the learned and industrious counsel for the House Committee on Agriculture, whose draftsmanship has been of such help.

Mr. Speaker, H.R. 8520 can be a landmark in the history of the conservation movement. I hope that it is speedily enacted.

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from Minnesota [Mr. ANDERSEN].

The amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. POAGE. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to extend their remarks in the RECORD prior to the passage of the bill H.R. 8520.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

THE AMERICAN PRINTING HOUSE FOR THE BLIND

Mrs. GREEN of Oregon. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 9030) to amend the act to promote the education of the blind, approved March 3, 1879, as amended, so as to authorize wider distribution of books and other special instruction materials for the blind, and to increase the appropriations authorized for this purpose, and to otherwise improve such act.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Oregon?

Mr. GROSS. Mr. Speaker, reserving the right to object, I would like to know what this bill proposes to do.

Mrs. GREEN of Oregon. This is a bill which would provide for additional materials for blind children in the United States, for the Printing House for the Blind, in Louisville, Ky.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Oregon?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first sentence of section 3 of the Act entitled "An Act to promote the education of the blind", approved March 3, 1879, as amended (20 U.S.C. 102), is amended to read as follows: "The Secretary of Health, Education, and Welfare is hereby authorized to pay over semiannually, to the trustees of the American Printing House for the Blind, located in Louisville, Kentucky, and chartered in 1858 by the Legislature of Kentucky, upon requisition of their president, countersigned by their treasurer, one-half of such annual appropriation upon the following conditions:".

SEC. 2. The paragraph of such section 3 designated "Second." is amended to read as follows:

"Second. No part of the appropriation shall be expended in the erection or leasing of buildings; but the trustees of the American Printing House for the Blind may use each year a reasonable sum of the annual appropriation for salaries and other expenses of experts and other staff to assist special committees which may be appointed in performance of their functions, and for expenses of such special committees."

SEC. 3. The paragraph of such section 3 designated "Sixth." is amended to read as follows:

"Sixth. The superintendent of each public institution for the education of the blind (or his designee) and the chief State school officer (or his designee), of each State and possession of the United States, the Commonwealth of Puerto Rico, and the District of Columbia, shall each, ex officio, be a member of the Board of Trustees of the American Printing House for the Blind only for purposes of administering this Act."

SEC. 4. The Act entitled "An Act providing additional aid for the American Printing House for the Blind", approved August 4, 1919, as amended (20 U.S.C. 101), is further amended by striking out "the sum not to exceed $400,000" and inserting in lieu thereof the following: "such sum as the Congress may determine".

SEC. 5. The amendments made by this Act shall be effective immediately after the date of its enactment.

The SPEAKER pro tempore. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: On page 3, before the period at the end of line 6 insert the following: ", and by inserting after 'said Act' the following: ', under rules and regulations prescribed by the Secretary of Health, Education, and Welfare,'."

Mrs. GREEN of Oregon. Mr. Speaker, this bill was voted out of the subcommittee and the full committe by a unanimous vote. The ranking Republican on the committee, the gentleman from Pennsylvania has given his full support to this legislation. The purpose of H.R. 9030 is to provide for more Braille textbooks and other special instructional materials for blind children.

Since 1879, the Congress has appropriated funds to the American Printing House for the Blind in Louisville, Ky., to produce and distribute free textbooks for blind children. This program started with a permanent annual appropriation of $10,000. Since then, the Congress has periodically increased the amount authorized. The present ceiling of $400,000 annually was set in 1956.

The Special Subcommittee on Education received testimony from all major organizations interested in the welfare of the blind that this sum no longer is adequate to serve the growing number of blind schoolchildren. The subcommittee received this same word from many special schools for blind children as well as administrators of programs for blind children attending regular public schools.

The Federal contribution per blind child has been going downhill in recent years, because the present ceiling leaves no room to expand with the expanding number of blind students. If the $400,000 ceiling remains, the per capita contribution for this year will be $25.95, the lowest figure since 1952.

Let us consider, for a moment, a few figures. Just 3 years ago, there were 12,024 blind children served by this program. This fall there will be an estimated 15,800 blind students, an increase of 2,776 in the 3-year period. Yet the authorized maximum appropriation has remained the same.

H.R. 9030 would remove the $400,000 ceiling, so that the American Printing House for the Blind could base its request for appropriations on the needs of the blind children it serves. The requested funds, would, of course, be sub-

ject to review by the Appropriations Committee and the Congress.

The bill, H.R. 9030, also would permit the Printing House to use reasonable sums from its annual appropriations to pay salaries and expenses of experts to assist trustees in determining instructional materials to be supplied. It further would expand the ex officio membership of the Printing House Board of Trustees to include chief State school officers or their designees. This would give representation to blind children in public schools, as those in special schools are now represented.

Mr. Speaker, we have been told that books and other educational material for blind children costs 10 times as much as for those with the gift of sight. I trust that the House will pass this modest bill to aid in educating these handicapped youngsters.

Mr. KEARNS. Mr. Speaker, I move to strike out the last word.

Mr. Speaker, I should like to say that everyone on our side is very much in agreement with the gentlewoman from Oregon and approves the bill.

Mr. SMITH of Iowa. Mr. Speaker, I move to strike out the last word.

Mr. SMITH of Iowa. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. SMITH of Iowa. Mr. Speaker, The Congress first recognized a need for legislation in this area in the 45th Congress in 1879. At that time the Congress passed what is now chapter 6 of title 20 of the United States Code. The Congress established a trust fund of $250,000 and made a permanent appropriation of $10,000 per year and designated the American Printing House for the Blind as the agency through which benefits should be given.

As the population increased over the years, the appropriations have been increased. Just as with all of the rest of the population, we have an exploding population of blind children of school age. Just as with almost all other goods and services, the cost of production of materials for the blind has also increased. By 1956 the authorization had been increased to $410,000 per year, and 7,989 children were registered for purposes of the Federal act. That amounted to about $51 per pupil. By January of this year, the number had jumped to 15,973, and this 1956 authorization now amounts to only about $25 per pupil.

The number of blind children has increased so that the amount has been cut in half per child, and this does not account for the fact that there has been an increase in the cost of basic materials. It has been estimated that the cost of blind materials for blind children is 10 times greater than those for sighted children. Fifty-two percent of these children are in public schools spread throughout the Nation under thousands of jurisdictions, and this means that a very wide variety of textbooks used in public school systems throughout the country must be provided in a form that the blind children can use.

I think it is apparent from these facts that the authorization must be lifted. It needed to be lifted 2 or 3 years ago, and it seems to me under this situation and in view of the fact that we know that the number of blind children will continue to increase considerably, that we should remove the authorization ceiling so that there can be some flexibility in taking care of this increasing population as it increases.

In view of the fact that 52 percent of these children are in public schools, the bill provides that chief State school officials should be ex officio members of the board of trustees of the printing house. The code specifically sets forth the purposes for which the money can be used. The American Printing House provides braille books, braille magazines, and braille music. It also provides talking books and talking magazines and recorded educational tapes. It also manufactures special aids for use of the blind; such as, relief maps and globes, braille writers and slates, and various appliances to be used in mathematics.

This bill would clarify the act to make sure that some of the money could be used to secure the benefit of experts to help determine the materials to be supplied and to help distribute information to the State departments of education relative to the most economical and effective use of the materials provided. The entire philosophy has not been to provide financial assistance to States, but rather to create a source of materials not available elsewhere. The printing house furnishes many services and materials that are paid for through other sources. The total value of materials manufactured and distributed in the last fiscal year amounted to $1.5 million, or almost four times as much as the contribution by the Federal Government.

It is vitally important that blind children have these materials available to them when they are young and of school age. I imagine many of you know of some person who became blind as an adult, and if you do know such a person, you know that the adjustment for him was much more difficult than if he had been able to prepare for this situation when he was a child in school.

This is the kind of a matter that cannot wait. There are several organizations doing work in this field; including: the American Association of Instructors of the Blind, the American Association of Workers for the Blind, the American Foundation for the Blind, and the National Federation of the Blind. There are also many civic groups and social clubs that make substantial contributions to alleviate the hardships and to provide help in this area, but the aid of the Federal Government in providing these basic materials is very necessary, and I urge adoption of this legislation.

Mr. WHITENER. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from North Carolina.

Mr. WHITENER. Mr. Speaker, I should like to commend the Committee on Education and Labor for this very outstanding piece of legislation. As some members of that committee well know I have been very much interested in it because it will furnish to many of the near-blind help in getting textbooks which they can use in the public schools.

During my service in Congress I have been particularly interested in the welfare of our blind people. One of the problems with respect to the blind that has been of great concern to me has been the lack of special instruction materials available for our visually handicapped young people.

This spring I had the pleasure of having a thorough discussion on this matter with one of my constituents who has had years of experience in connection with the problems of the blind. My constituent, Mrs. John B. Abernathy of Stanley, N.C., called to my attention the restrictions imposed by the act of March 3, 1879, upon the distribution of educational materials for the visually handicapped.

Mrs. Abernathy has a visually handicapped little girl and has been one of the thousands of people in similar positions throughout the country who have experienced great difficulty in securing the proper type of educational material for their children.

I was so impressed with her knowledge of the problem that I urged her to write our distinguished colleague from West Virginia, Hon. CLEVELAND M. BAILEY, and give him the benefit of her recommendations on the education of the visually handicapped. Mrs. Abernathy corresponded with Mr. BAILEY, and the information she furnished was of great help to him in urging the enactment of legislation to liberalize and extend the provisions of the act of March 3, 1879.

I feel that the enactment of H.R. 9030 will do much to alleviate many of the hardship conditions confronting our visually handicapped in securing appropriate educational material. The additional funds made available under H.R. 9030 will enable a wider distribution of books and special instruction materials for the blind.

I am also pleased that the bill we have under consideration provides that superintendents of each public institution for the education of the blind and the chief State school officer of each State shall be a member of the Board of Trustees of the American Printing House for the Blind for purposes of administering this legislation. By having these educators directly associated with the printing and distribution of educational materials for the visually handicapped I believe we will get a broader and more realistic program for the distribution of educational material for our blind people.

Mr. Speaker, H.R. 9030 does not provide for the appropriation of a large sum of money. It is, however, one of the most important pieces of legislation that we have been called upon to consider at this session of the Congress. I support the passage of H.R. 9030, and I urge that my colleagues in the House join with me in having this bill enacted.

Mr. BURKE of Kentucky. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Iowa. I yield to the gentleman from Kentucky.

Mr. BURKE of Kentucky. Mr. Speaker, I, too, would like to commend the gentlelady from Oregon as well as the committee for their handling of this bill. As one of the sponsors of the original legislation on this subject I appreciate very much, on behalf of the blind children of the United States, this action.

Mr. BURKE of Kentucky. Mr. Speaker, I have prepared a short statement of the history and purposes of the American Printing House for the Blind and the basic Federal act which H.R. 9030 seeks to amend in order to provide basic information to the House for proper consideration of this important legislation.

Activity: Publication of literature for the blind and the manufacture of tangible aids for their use.

Purpose: Provision of a national, nonprofit institution for the purpose of publishing literature for the blind in all media and the manufacture of special aids for the use of the blind which are not available on the commercial market. Under the Federal act "to promote the education of the blind," the printing house acts as the centralized, official textbook printery and manufacturer of educational aids for the blind students of less than college level being educated in public educational institutions throughout the United States and its possessions.

History and description: Chartered by the Commonwealth of Kentucky on January 23, 1858, as a national, nonprofit institution, the American Printing House for the Blind, located in Louisville, Ky., is the oldest national agency for the blind in the United States and the largest publishing house for the blind in the world. In providing literature for the blind, it publishes a wide variety of braille books and magazines, braille music, talking books and talking book magazines, and recorded educational tapes, and also manufactures special aids for use by the blind, such as relief maps and globes, braillewriters and slates, arithmetic appliances, and the like. Through the Federal act of 1879 "to promote the education of the blind," the necessary special materials required in the education of blind students of less than college level, and not available on the commercial market, are provided. To make this service of the Federal Government more flexible to the educational needs of the blind children of the country, the printing house maintains, out of its own funds, a continuous finished goods inventory worth approximately $1 million.

For the year ending June 30, 1961, the total value of materials manufactured and distributed amounted to $1,500,000. Of this amount, the Federal grant for textbooks and educational appliances totaled $410,000, the remainder comprising materials manufactured on contract, on a nonprofit basis, for other agencies for the blind or individuals wishing to supply materials at cost or less, usually free, materials supplied to schools for the blind or public school systems at cost for payment out of their own funds, plus donations to the Reader's Digest and Newsweek Talking Magazine Funds for the Blind.

Legal authorization: Act of the Commonwealth of Kentucky, January 23, 1858—acts of the General Assembly of the Commonwealth of Kentucky, 1857–1858, volume I, chapter 115, page 192—and subsequent amendments; Federal act "to promote the education of the blind, March 3, 1879—U.S. Statutes at Large, 45th Congress, 1879, session 3, chapter 186, page 467—and subsequent amendments.

Obligations, fiscal year 1961: Operating and administration, Federal only, $410,000.

The legislation which we are considering at this time is the result of many months of study, not only by the American Printing House for the Blind which administers the act, but also by a task force of the Department of Health, Education, and Welfare, the legislative committees of the American Association of Instructors of the Blind and the American Association of Workers for the Blind—separately and together—the American Foundation for the Blind, and the National Foundation of the Blind. While I do not suppose it would be possible to prepare legislation which would accomplish everything everyone wishes or please everyone, it is my understanding that the above agencies and organizations are strong in their support of H.R. 9030.

The amendments proposed in this bill are designed to bring the act of 1879 "to promote the education of the blind" into line with present day needs for special materials required in the education of blind children. I should like to outline categorically the proposed changes and the reasons therefor, as follows:

First. To increase the authorization of appropriation, by removing the present dollar ceiling authorized to be appropriated annually to the American Printing House for the Blind for purposes of the act, and to substitute therefor such sums as the Congress each year may determine shall be expended in accordance with the requirements of sections 101, 102, and 104 of the act—title 20, United States Code—under rules and regulations prescribed by the Secretary of Health, Education, and Welfare.

This phase of the legislation is of most immediate concern, for two reasons—the exploding population of blind children of school age to be served, and the mounting costs of production to provide such services. For example, at the time of the passage of Public Law 922 in 1956, only 7,989 children were registered for purposes of the Federal act. One 1 year later, in 1957, the number of children registered had jumped to 11,183, primarily as the result of the 1956 legislation which included all blind children in the Nation being educated in public schools with the seeing. By January 1961, the number had jumped to 15,973, while it is projected that there will be another increase of over 1,000 children in 1962, for a total of 17,175. These registration increases have meant that, with the present authorization ceiling of $410,000, established only 5 years ago, the current per capita allotment for the 1961–62 year amounts to only $25.68. I point this out to you, because a study made by the Office of the Secretary of Health, Education, and Welfare, in 1958, estimated that the cost of minimum basic materials for blind children was some 10 times greater than of those for sighted children, and that, at that time, there should be a per capita allocation of $40 per pupil, in order to supply the same minimum amount of material as was provided by the rate of $31.12 per pupil in 1956. As you well know, costs of production have increased substantially since that time, and the passage of the increased minimum wage law portends an additional increase in costs of materials provided under the Federal act.

In addition to the impact of the large increase in our blind school population in recent times, there have been far-reaching developments in educational trends in the past few years, which again make additional funds necessary. One of the principal trends is the increase in the number of blind children being educated in public schools for the seeing, either in special classes for the blind or as single placements in local school systems. As of January of this year, official registration figures show that 52.8 percent of the total blind school population is now attending public schools. As long as the education of blind children was limited in the main to centralized schools for the blind in each State, it was fairly easy to serve large numbers of children with a minimum choice of basic texts. However, because of the wide variety of textbooks used in public school systems throughout the country, too often the basic curriculum of texts in printing house catalogs does not conform to the requirements of individual public schools. To make available a much wider selection of basic texts by the printing house will, of necessity, reduce the total sales for individual titles, and thus increase unit costs.

I should also like to point out that the need of blind children for educational materials beyond the skeleton curriculum of textbooks is widely recognized. However, if all the available funds must be used to supply basic textbooks and the absolute minimum of basic aids, nothing is left for enrichment of curriculum. In the case of blind children, these supplementary materials are particularly important if we are to hope to give them an education comparable to that provided in the usual public school class for seeing children, and to avoid the mere verbal repetition of texts without the real understanding which the eye so easily provides.

Aside from the problems of increased numbers of children to be served, and increased costs of providing the services they require, there is also a most urgent need to make the provisions of the act "to promote the education of the blind" more flexible to changing needs as they arise. In this connection, it would appear that a specific ceiling of appropriation would no longer be necessary, for the following reasons: First, the Federal program under the act has been in existence for over 80 years, for more than 40 of which there has been an annual

justification before congressional committees for all money appropriated in excess of the permanent annual grant of $10,000. Second, the elimination of the ceiling would make it unnecessary for the Congress to take action periodically to increase authorization on such a long-established and vital program. Third, in many instances in the past, when there has been an unexpected and immediate need for increase in authorization, because of other urgent demands on the time of the Congress, it has taken 2 or more years to get necessary legislation passed, with the result that the educational programs for blind children have suffered from lack of adequate supplies. As an example, I should like to point out that, as a result of the drop to a per capita allotment of $27.77 for the 1961 fiscal year, by December 31, 1960, more than 70 percent of the total appropriation had been used with half the year yet to go. I introduced legislation early in 1960 substantially along the lines of the present bill, but it was impossible to get this legislation before the Congress for passage because of the press of other matters. Today, only 2 months after the beginning of fiscal year 1962, with a current per capita of $25.68, more than 47 percent of the appropriation has already been used, with some 14 schools for the blind and State departments of education, out of a total of 112, already completely out of funds for the remainder of the fiscal year, and with large orders of materials unfilled which are needed for school opening next month. If the ceiling of authorization can be removed, but the annual justification of need continued, the most flexible and practical use of the funds provided by Congress can be obtained.

Second. H.R. 9030 provides for inclusion on the ex officio trusteeship of the printing house, for purposes of the Federal act only, of not only the administrative heads of public educational institutions for the blind, or their designees, but also of the chief State school officers, or their designees, the latter of whom represent the blind children attending public schools for the seeing. As of January 2, 1961, the registrations of blind pupils eligible under the act totaled 15,973, of which 7,539, or 47.3 percent, were in public educational institutions for the blind, 8,258, or 51.7 percent, were attending regular public schools for the seeing, and 176, or 0.2 percent, were in special training classes for the adult blind of less than college grade. When Public Law 922 was adopted in 1956, which law extended the benefits of the act "to promote the education of the blind" to all blind children attending schools which are supported by tax funds, it failed to make the chief State school officers ex officio members of the printing house board of trustees, as agents for those blind children attending regular public schools for the seeing. The proposed amendment would correct the present inequity, and would give to the executive board of the American Printing House for the Blind the needed leadership for service to the children attending regular public schools for the seeing.

Third. A third provision of the present legislation states that "no part of the appropriation shall be expended in the erection or leasing of building; but the trustees of the American Printing House for the Blind may use each year a reasonable sum of the annual appropriation for salaries and other expenses of experts and other staff to assist special committees which may be appointed in performance of their functions, and for expenses of such committees." Please note that no money is to be used for salaries of committee members, all of whom are printinghouse trustees. These funds are needed, so that the printinghouse staff may have the benefit of the help of experts and people responsible for the education of blind children throughout the country in determining the materials to be supplied under the act, and for the forms in which such materials are to be made available. Additionally, such funds would provide the expenses for staff experts of the printing house to visit individual State departments of education and schools for the blind for the purpose of giving counsel on the most economical and effective use of quota funds, as well as helpful information concerning administrative procedures pertaining to the act. The printing house itself has been trying for several years, to the best of its ability, to provide such services at its own expense, but, as a national, nonprofit, private agency, offering the facilities of its plant and services to the entire field of work for the blind, it cannot adequately, nor should it be expected to, provide such counsel out of its own funds, nor through contributions from the general public.

In closing, I should like to point out that it has never been the intent of the act to provide all services or materials needed in the education of blind children, but to provide Federal funds for only those materials which cannot be purchased commercially and for which there is a need for a centralized, special, and, most important, continuing source of supply. In other words, the entire philosophy of the original act was not so much to provide financial assistance to the States for educating their blind children, as to create a source of materials not available elsewhere. This is just as essential today, and perhaps more so, as it was in 1879, when the original act was passed.

I cannot urge too strongly the immediate passage of bill H.R. 9030, to amend the act to promote the education of the blind. I should also like respectfully to call to the House's attention the fact that it is blind children, not schools, who need the books and materials, and the need is exceedingly drastic—as of now.

Mr. FOGARTY. Mr. Speaker, I rise to urge my colleagues to vote in favor of H.R. 9030, a bill to amend the Act To Promote the Education of the Blind, approved March 3, 1879, as amended. By acting favorably on this bill here in the House of Representatives today, we will make it possible for the other body to take action before the end of this session, so that an urgently needed increase in the authorization of appropriations can be implemented.

The program this bill would strengthen was established by the 45th Congress 82 years ago as a means of assuring the blind children of the Nation of a continuing central source of supply of braille textbooks and tactual educational aids through the American Printing House for the Blind, a nonprofit agency incorporated under the laws of the State of Kentucky. In 1919, the law was amended to provide for an annual appropriation of $40,000 to the printing house, in addition to the $10,000 permanent annual appropriation originally provided for. Since 1919, the law has been amended four times, principally to increase the authorization of appropriations to keep pace with the steady increase in the number of blind schoolchildren. In 1956, the last time the law was amended, the authorization of annual appropriations to the printing house through the Department of Health, Education, and Welfare was increased to $400,000.

Although this federally financed program is small in terms of the number of children served and the annual dollar cost, its vital significance to the Nation cannot be overemphasized. For it is with the aid of these special tools provided by the Federal Government that blind children in every State are enabled to receive an education through high school and go on to make their way in life—some with college training for a profession and others with vocational training for a trade—to become self-supporting, contributing citizens in their home communities.

In recent years, there has been a sharp increase in the number of blind children in the country as a result of retrolental fibroplasia, a blinding eye disease in premature babies which was caused by too much oxygen in incubators. Although the cause and prevention of this disease has been determined through the research effort of the National Institutes of Health, we will not experience peak school enrollment of children already blinded by it for approximately another 5 years.

It is estimated that slightly more than 16,000 blind children will receive textbooks and other materials under this program during the current fiscal year; and unfortunately, these blind children will be handicapped by having fewer books and aids available to them because this program is inadequately financed. As chairman of the Appropriations Subcommittee responsible for annually reviewing this item in the budget of the Department of Health, Education, and Welfare, I have seen the allotment of educational aids for each blind child seriously cut for the last fiscal year and the current one as the total number of children increased each year while the dollars available for the program remained at the level fixed by law in 1956.

We can correct this unfortunate situation and prevent it from happening in the future by taking favorable action today on H.R. 9030. This bill would do the following:

First. Increase the authorization of appropriations by removing the statutory ceiling, thus leaving the annual

appropriation to normal budgetary and appropriations procedures.

Second. Authorize the Secretary of Health, Education, and Welfare to make rules and regulations governing the administration of the program.

Third. Make a technical correction in the present law.

Fourth. Authorize the use of a reasonable part of the annual appropriation for administrative costs of the program.

Fifth. Expand the ex officio board of trustees of the printing house to include the chief State school officers or their designees.

These amendment would become effective upon enactment, so that the shortage in books and aids for the current school year can be partially remedied through a supplemental appropriation early in the next session.

I should like to emphasize the fact that H.R. 9030 is not a controversial bill. The Special Subcommittee on Education of the Committee on Education and Labor reported H.R. 9030 after hearings August 22 and 23 on identical bills—H.R. 8207 and H.R. 8212—introduced by the distinguished gentleman from Kentucky, the Honorable FRANK BURKE, and myself. H.R. 8207 and H.R. 8212 had the united support of the major national organizations for the blind and other interested groups.

Therefore, I urge my colleagues to vote in favor of this bill today, and I sincerely hope that the other body will take similar action before adjournment. By so doing, the Congress can assure blind schoolchildren throughout the country that their educational progress will not be hampered owing to the lack of adequate tools.

The SPEAKER pro tempore. The question is on the committee amendment.

The committee amendment was agreed to.

The SPEAKER pro tempore. The question is on passage of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND REMARKS

Mrs. GREEN of Oregon. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the bill H.R. 9030 before its final passage.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Oregon?

There was no objection.

AMENDMENT OF FEDERAL EMPLOYEES' COMPENSATION ACT

Mr. PERKINS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 8871) to amend the Federal Employees' Compensation Act of 1960.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

Mr. GROSS. Reserving the right to object, Mr. Speaker, what is supposed to be done in this bill, if the gentleman will explain briefly.

Mr. PERKINS. I will be delighted to explain what this bill proposes. Last year the Congress amended the basic Federal employees' compensation law, raising the level of compensation afforded disabled Government workers so as to be more nearly in line with present-day living costs and standards. Employees of the District of Columbia government have long been covered by the basic law. Most of the provisions of the 1960 changes were automatically made applicable to District government employees. However, unintentionally and solely through inadvertence section 104 of the 1960 act, which applies to employees injured in Government service prior to 1958, excludes District of Columbia government employees. H.R. 8871 would do nothing more than to correct this inadvertent omission, thereby giving about 43 employees of the District government injured in service prior to January 1, 1958 the benefits of section 104 now enjoyed by other Government workers. At this point in the RECORD I should like inserted the following portions of the report of the House Education and Labor Committee on H.R. 8871 which explains in more detail this legislation:

BACKGROUND

In 1960, Congress amended the basic Federal employees' compensation law raising the level of several of its benefits so as to meet present-day conditions and standards. (Public Law 86-767, approved September 13, 1960; H.R. 12383, 86th Cong., H. Rept. 1743.)

By act of Congress July 11, 1919, 41 Stat. 104, the provisions of the Federal Employees' Compensation Act were extended to all government employees of the District of Columbia, with the exception of employees of the Police and Fire Departments, who were covered by another act. See 5 U.S.C. 794. By virtue of this latter-mentioned provision of the law, all the provisions of the 1960 act, with the exception of section 104, were automatically extended to the employees of the government of the District of Columbia. Section 104 contained a proviso designed to assure exclusion of nonmilitary employees, but which also, not by design, excluded government employees of the District of Columbia.

The committee report in 1960 (H.R. 1743) had this to say about section 104:

"This section increases the monthly pay upon the basis of which compensation for disability or death is computed under the Federal Employees' Compensation Act, as amended for every employee as defined in section 40(b) (1) or (2) of the act by 10 percent if the injury for which compensation is payable occurred before January 1, 1958, but after December 31, 1950; and by 20 percent if it occurred before January 1, 1951, but after December 31, 1945; and by 30 percent if it occurred before January 1, 1946. The section explicity provides that nothing in this or any other act of Congress shall be construed to make the increase in the monthly pay provided by this section applicable to military personnel, or any other person or employee not within the definition of section 40(b) (1) or (2) of the Federal Employees' Compensation Act. The section also explicity provides that the increase in the monthly pay authorized is applicable only with respect to any period beginning on or after the first date of the first calendar month following the enactment of this act and shall not be construed to permit the amount of compensation paid on account of an employee's disability or death to be increased more than 10 percent if the injury for which compensation is payable occurred before January 1, 1958, but after December 31, 1950; by 20 percent if it occurred before January 1, 1951, but after December 31, 1945; and by 30 percent if it occurred before January 1, 1946.

"The increase in the wage base authorized by this section will be applied to all cases on the roll to which this section is applicable before the increase in the minimum wage base for computing death benefits authorized by section 102 of this act and the increase in the minimum compensation rate in total disability cases authorized by section 101 of this act is applied."

H.R. 8871 will amend section 104 so that the reference to the definition section 40(b) (1) or (2) of the Federal Employees' Compensation Act in the first proviso will not operate to exclude employees of the government of the District of Columbia unless they were otherwise excluded (policemen and firemen) from the benefits of the Federal Employees' Compensation Act prior to the 1960 amendments.

On August 31, the General Labor Subcommittee held a hearing on the legislative proposal and heard testimony from representatives of the Board of Commissioners of the District of Columbia and the Director of the Bureau of Employees' Compensation of the U.S. Department of Labor. The evidence presented indicated that there were 43 District of Columbia compensation cases where benefits would be increased if H.R. 8871 were enacted and that the total amount of increased cost to the District of Columbia would be less than $10,000 per year. Of course, in future years the increased cost would decline, as section 104 applies only to employees who were disabled in government service prior to January 1, 1958. H.R. 8871, by express provision would take effect on October 1, 1960, giving these few employees the benefit of the 1960 act on the effective date of the 1960 benefit increases. Costs to make these retroactive payments would require an initial outlay of about $7,000 by the District government.

Section-by-section description of the bill

Section 1. This section inserts language in the first proviso of section 104 of the Federal Employees' Compensation Act Amendment of 1960 so that section 104 shall apply to employees of the government of the District of Columbia except those members of the police and fire departments, pensioned or pensionable, under the provisions of the Policemen and Firemen's Retirement and Disability Act.

Section 2. This section provides that the act will take effect on October 1, 1960.

Changes in existing law

In compliance with clause 3 of rule XIII of the Rules of the House of Representatives, changes in existing law made by this bill, as introduced are shown as follows (new matter is printed in black brackets, existing law in which no change is proposed is shown in roman):

The First Proviso of Section 104 of Public Law 86-767, September 13, 1960 (39 Stat. 742)

SEC. 104. Notwithstanding any other provision of this Act or the Federal Employees' Compensation Act, the monthly pay upon the basis of which compensation for disability or death is computed under the Fed-

eral Employees' Compensation Act shall be increased as follows: If such employee's injury (or injury causing death) occurred before January 1, 1958, but after December 31, 1950, such eligible employee's "monthly pay" shall be increased by 10 percent; if such employee's injury (or injury causing death) occurred before January 1, 1951, but after December 31, 1945, such eligible employee's "monthly pay" shall be increased by 20 percent; if such employee's injury (or injury causing death) occurred before January 1, 1946, such eligible employee's "monthly pay" shall be increased by 30 percent: *Provided,* That nothing in this or any other Act of Congress shall be construed to make the increase in the monthly pay provided by this section applicable to military personnel, or to any person or employee not within the definition of section 40(b) (1) or (2) of the Federal Employees' Compensation Act, [except that this section shall apply to employees of the government of the District of Columbia other than members of the police and fire departments who are pensioned or pensionable under the provisions of the Policemen and Firemen's Retirement and Disability Act]: *Provided further,* That this section shall not be construed to permit the amount of compensation on account of an employee's disability or death to be increased more than 10 percent if such injury (or injury causing death) occurred before January 1, 1958, but after December 31, 1950, nor more than 20 percent if such injury (or injury causing death) occurred before January 1, 1951 but after December 31, 1945, nor more than 30 percent if such injury (or injury causing death) occurred prior to January 1, 1946.

Mr. GROSS. I withdraw my reservation of the right to object, Mr. Speaker.

Mr. KEARNS. Reserving the right to object, Mr. Speaker, I should like to inform the House that the policemen and firemen are covered. This is an extra idea that the gentleman from Kentucky had. I want to say this is unanimous on our side.

Mr. PERKINS. That is correct. They are covered separately. This does not affect the policemen and firemen.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first proviso of section 104 of the Federal Employees' Compensation Act Amendments of 1960 (74 Stat. 906) is amended by adding immediately preceding the colon, the following: ", except that this section shall apply to employees of the government of the District of Columbia other than members of the police and fire departments who are pensioned or pensionable under the provisions of the Policemen and Firemen's Retirement and Disability Act".

SEC. 2. This Act shall take effect October 1, 1960.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

Mr. PERKINS. Mr. Speaker, I ask unanimous consent to revise and extend my remarks, and include an explanation of the bill H.R. 8871.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

PUBLIC WORKS APPROPRIATION BILL, 1962

Mr. CANNON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 9076) making appropriations for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority and certain study commissions, for the fiscal year ending June 30, 1962, and for other purposes; and pending that motion, Mr. Speaker, I ask unanimous consent that general debate on this bill be limited to 2 hours, one-half to be controlled by the gentleman from New York [Mr. TABER] and one-half by myself.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

CALL OF THE HOUSE

Mr. VAN PELT. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

Mr. ROONEY. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 194]

Addabbo	Glenn	Moulder
Arends	Goodell	Multer
Ashbrook	Gray	Nix
Ashley	Green, Pa.	O'Brien, N.Y.
Ayres	Griffiths	Philbin
Barrett	Gubser	Powell
Barry	Hall	Rabaut
Bell	Halpern	Rains
Betts	Harrison, Va.	Riehlman
Bolling	Harsha	Rivers, S.C.
Boykin	Harvey, Ind.	Rogers, Tex.
Brewster	Healey	Roosevelt
Brooks, La.	Hébert	Rostenkowski
Brown	Holland	St. Germain
Broyhill	Holtzman	Schenck
Buckley	Hosmer	Scherer
Celler	Ichord, Mo.	Shelley
Clancy	Inouye	Siler
Cooley	Jones, Mo.	Slack
Corbett	Kee	Staggers
Curtis, Mo.	Keith	Stephens
Dague	Kilburn	Thompson, La.
Davis, Tenn.	Kyl	Thompson, N.J.
Delaney	Latta	Tollefson
Derwinski	Libonati	Ullman
Devine	McDowell	Vinson
Diggs	McSween	Wallhauser
Dooley	Machrowicz	Westland
Farbstein	Miller, Clem	Willis
Fino	Miller, N.Y.	Wilson, Calif.
Flynt	Minshall	Wilson, Ind.
Gallagher	Morrison	Young
Gilbert	Morse	

The SPEAKER pro tempore. On this rollcall 338 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

AMENDING FEDERAL AIRPORT ACT

Mr. HARRIS submitted a conference report and statement on the bill (H.R. 8102) to amend the Federal Airport Act so as to extend the time for making grants under the provisions of such act, and for other purposes.

PUBLIC WORKS APPROPRIATION BILL, 1962

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Missouri [Mr. CANNON].

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 9076, with Mr. BOGGS in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. CANNON. Mr. Chairman, I yield such time as he may require to the gentleman from Ohio [Mr. KIRWAN].

Mr. KIRWAN. Mr. Chairman, it is my purpose to say a few words in behalf of this bill, H.R. 9076, known as the Public Works bill for fiscal year 1962.

Mr. Chairman, the budget estimates for 1962 were $3,732,038,000. Recommended in the bill is $3,662,548,500, a reduction of $69,489,500, and a decrease of $110,776,805 below the appropriations for fiscal year 1961.

Included in this overall total is $2,352,601,000 for operating expenses of the Atomic Energy Commission.

The bill includes 29 unbudgeted surveys put in by the committee; 6 unbudgeted planning starts, 56 new construction starts which were budgeted, plus 9 that the committee has put in, for a total of 64 new starts. There is a total of 436 projects in the construction program, with a total estimated cost of approximately $17 billion.

I would now like to take you back to when this country was young. At that time the railroads operated the coal mines. When a man with a large family of boys started to get ready to mine coal, he petitioned the railroad and they put a siding in to transport his coal. After he loaded the first car they charged him 20 cents per ton-mile. The railroads charged preferred customers only 2 cents per ton-mile. So you know how long the poor fellow lasted. He could not ship his coal. Often he could not pay his taxes and was taken to court for nonpayment of taxes, so he lost his mine and his land.

They knew they had a good thing and to use the language of the street today, they were the first "muscle men." I do not use this term in a derogatory sense.

Now we move on to the next group of "muscle men." There are still millions of acres of land grants that the railroads have never turned back to the U.S. Government. The railroads were told that if we got into a war, an emergency, they would have to haul the freight for 50 cents on the dollar. Down through the years they profited by the sale of land and made billions of dollars. Then when the day came in the Second World War, right here on the floor of Congress they said that the railroads could get the full amount for moving the freight and they never turned back those millions of acres of fine mineral land. They were the second group of "muscle men" in this Nation.

Now we come on to the third group, the lumber barons. I remember as a boy in Pennsylvania they had an Outlaw Baseball League. They built baseball bleachers in numerous towns where they were cutting up the forests—Johnstown, Oil City, Franklin, Williamsport. They charged 15 cents to get into the game. But after they uprooted the timber, they left nothing but the stumps and that was the end of the ball parks and everything else. They were the third group of "muscle men" that we had in America, as they use the term on the streets today—"He muscled in on this."

The next group of "muscle men" then came along and we see them now. About 5 years ago Congress authorized the building of these dams and powerplants under the upper Colorado storage project and I would like to tell you what the act said. Let me clear away the smokescreen that has been befogging the issue and return to the language of the authorizing act.

Under Public Law 485, the 84th Congress, 2d session, they authorized the Secretary of the Interior to construct, operate and maintain the upper Colorado River storage project and participating projects. The Secretary was authorized "to construct, operate and maintain the following initial units of the Colorado River storage project consisting of dams, reservoirs, powerplants, transmission facilities, and appurtenant works."

Let me proceed further, to section 7 of this act, which goes beyond the authorization and directs the manner in which the transmission of power produced by the storage project is to be handled.

Section 7 states that—

> The hydroelectric powerplants and transmission lines authorized by this Act to be constructed, operated, and maintained by the Secretary shall be operated in conjunction with other Federal powerplants, present and potential, so as to produce the greatest practicable amount of power and energy that can be sold at firm power and energy rates.

That is what the act said. Who passed that act? The Congress of the United States. Who signed the act? Was it Harry Truman? No. It was Dwight Eisenhower.

Who was the one that had charge of carrying out the act? The Secretary of the Interior. Was it Stewart Udall? Oh, no; Fred Seaton. He said the United States should construct those powerlines, just the same as the act says.

What do you find going on now? You find the fourth group of musclemen muscling in on the greatest project of all time.

The cost of these transmission lines in question is about $84 million. For $84 million they want to take over the project. They want to get the cream. If you can show me any muscle man in the history of the United States to equal that, that is going some.

The Federal Government is spending over $600 million under either system, whether the public power goes by the Government lines or the private utility lines. The question is who pays $84 million for certain backbone transmission lines. If the private utilities build these lines they will charge $593 million over 86 years for wheeling the power and the Government will have $273 million less in revenue for irrigation assistance. Secretary Seaton, after review of all the facts, recommended that all these lines be built by the Federal Government.

It comes down to whether the Federal Government, after building a house, is going to pay rent for it. If buying a house is good business, it is in this case. The Government is paying for most of the house, anyway, over $600 million. Why should it let the private utilities get in for an investment of $84 million and then charge the Government $273 million for the rent of the house? Under this the Government will lose $273 million in revenues needed for irrigation assistance. The reason we are building this project is not for private utilities but for irrigation. That is why it is being built.

We are now calling up the Reserves to be ready to defend this great country. But it will not be great long if we take actions such as are going to be proposed here—to give to the private utilities the opportunity to take the cream of the revenues from this project needed to provide irrigation assistance. That is why I am asking you here today to stop, look, and listen—do some thinking. This is the greatest country. This the handwork of God, and this is the greatest lawmaking body. Our form of government, the capitalistic system, is the best form of government that was ever put on earth. But, if you do not stop the abuses that are creeping into it, it will not last long. Keep an eye on what is going on. Just stop and think. Your Government, my Government, is spending $600 million on this project and somebody wants to come in and take advantage of it for $84 million. We will have $273 million less under the private utilities system at the end of 86 years, and we will not own the lines. If the Federal Government builds the lines we will have $273 million more and we will own the lines. If you learned anything in the first grade, you would know what would be the best system to follow. We do not have to go to a university to tell the difference between right and wrong and what is the best system to follow and what will make the strongest Nation. If we would only stop and do a little more constructive thinking, we would be better off and we would be much better as a nation on the whole.

In the year 2015, the revenue required for irrigation assistance to the States under the project will be $22.6 million.

Under the Federal system, we will have $83.3 million in the bank.

Under the utilities' latest official proposal, based on the Bureau of Reclamation's analysis, we will have a deficit of $3.5 million.

In the year 2027, we will need $283 million. Under the Federal system we will have $395 million.

Under the utilities proposal, we will have only $239 million, or $156 million less.

In the last year, 2049, under the Federal system, we will need $426 million. Under the Federal system, we will have $899 million. Under the utilities proposal, there will be $625 million, or $273 million less, and we will not own our own lines.

I believe the proper action that we should take on this issue is obvious to all of us. That is why I am asking every one of you here today to think, when you go home tonight, what this question means to your country. We cannot be continuing to call the boys up and sending them away to defend our country and then vote for something like this. So if you have ever done a job in your life, I am asking you to do the right thing today. There is no REA in the district I represent. There are about 5,000 stockholders of private utility companies. I get many letters from them denouncing my stand in support of public power.

But, I know that my idea about this thing is right, and that is why I am asking you to join with me on the right side and not let the people down. I hope that when this bill is voted on tomorrow it will be passed by this body just as Theodore Roosevelt, Dwight Eisenhower, and Franklin Roosevelt would have wanted to have it pass. It is the millions that we have spent on our national resources over the years that have made America what it is today. This is a great project we are considering, to provide essential irrigation to the upper Colorado States, and we should not take action here which will so seriously affect its economic feasibility.

Mr. JENSEN. Mr. Chairman, I yield myself such time as I may need.

Mr. Chairman, we are calling thousands of American boys now to serve in the Armed Forces. Why? For one reason and one reason only, and that is to protect and to preserve this great American constitutional system, the private enterprise system. That is why we are calling up these boys, and that is why we have fought every war in which the United States has been involved: for one reason and one reason only, and I repeat again, to preserve and protect this, the greatest form of government that was ever instituted by man, the capitalistic system, if you please.

Generally speaking, it is a good bill with a few exceptions. There are 436 project items in this bill scattered over the United States for reclamation, irrigation, hydroelectric power, dams, transmission lines, dredging of harbors, and every other sort of public program that one can imagine.

I have served on the committee that originated appropriations for the Bureau of Reclamation for the past 19 years. No man in this Congress today has supported more irrigation projects, reclamation projects, hydroelectric projects, hydroelectric transmission lines in the past 23 years than has the gentleman from Iowa who is now speaking to you and from the bottom of his heart. When we talk about the abuses that have been imposed upon the American people by certain private individuals and industries, let us not forget that as every one of those industries which have been carried on through, so to speak, from the signing of the U.S. Constitution when this Government was instituted, the end

result has been good. Let us not forget that for a minute and let this Congress act accordingly.

At the proper time when the bill is being read for amendment I shall offer an amendment to this bill. The outcome of that amendment—and may I say I am going to read the remarks which I have written myself—I have no ghost-writer—I am going to read these remarks because there are facts and figures therein which I do not want twisted out of shape by anyone because the outcome of that amendment might well determine whether or not the American free enterprise system will or will not be preserved. For the past 10 years Congress has respected and supported our committee position which has been to deny funds for building Federal transmission lines where private utilities and/or REA's and/or municipalities who have existing and adequate facilities to wheel electric power from Federal hydroelectric dams or will build such facilities and would contract in writing to wheel such power to preferred customers and others at reasonable rates which the private utilities affected in this bill have all agreed to do. My amendment seeks to reduce the amount requested in the bill for transmission lines on the upper Colorado project from $13,673,000 to $9,448,000. If these lines are left in the bill that money would be spent to start construction of Federal transmission lines which do not square with the yardstick which I have just explained and which the committee has used very honestly and effectly for the past 10 years.

I say parenthetically that when we started using that yardstick for the building of transmission lines and other requests for power facilities, there was a request for funds to build transmission lines all over the southeastern area from Washington to Florida which would have cost the Federal taxpayers hundreds of millions of dollars. Five union leaders of the electric workers union from that area appeared before the committee and said there is no reason in the world to appropriate all this money to build such lines, because public utilities, REA's, and municipalities are ready, willing, and able to build them. It was that day that the committee decided not to spend the people's money to build unnecessary transmission lines.

We used our yardstick on that bill and have for 10 years both in the House committee and in the Senate, the yardstick and the Congress has respected our action. But now because of political pressure from the top lobbyists for all Federal electric power whose end purpose is for Federal ownership and control of all electric power the bill as it comes to this House today includes $4,225,000 for construction of unnecessary transmission lines, the total cost of which, according to the Bureau's own estimate, will be $135 million which all the taxpayers of America are asked to pay; and get what in return? Nothing, absolutely nothing, including the people in these five States in the upper Colorado River area. Not even the REA will benefit one single dime over the payout period of 86 years if the Federal Government imposes this $135 million bill on the taxpayers of America, because the rate for power will be exactly the same under either program.

Let us keep the record straight. In addition to that, if this amendment to the bill is improved, the five statewide private utilities will pay $105 million in Federal taxes into the U.S. Treasury and the local and State taxes which they will pay during that payoff period amounts to the tidy sum of $184 million that those States can use to build schools, roads, and take care of their needy old people, and so forth.

Mr. Chairman, can this Congress deny these savings to the already overburdened taxpayers of America? There is but one answer—no, a thousand times, no.

Just a few days ago, on September 1, the Upper Colorado River Basin, the organization recognized and approved by an act of Congress in 1949 to supervise regulation, conservation, and utilization of the waters of the Upper Colorado Basin, passed a resolution endorsing the company's offer over the all-Federal scheme. Former Senator Ed Johnson a great statesman, is a member of that commission.

I have listened to the proponents'—of this project—great praise for Eisenhower, former Secretary Seaton, and they are praising Theodore Roosevelt. Where were they, where were all their praises when Mr. Eisenhower was President of the United States, and when Seaton was Secretary of the Interior? Did you hear any praises for them then, worthy of the name? The officers of the International Brotherhood of Electrical Workers from the upper Colorado River area representing several thousand taxpayers in union members, appeared before our subcommittee last spring in opposition to the all-Federal transmission system. The American Farm Bureau Federation, which represents 1,600,000 American farmers, have taken a very firm stand against construction of the all-Federal transmission system on the Colorado River storage project as being wasteful, uneconomical, and unnecessary. Mr. Chairman, it has been intimated that construction of these lines by the private utilities would cause a tollgate to be established which would be against the interests of the Federal Government.

Nothing could be further from the truth.

Mr. Chairman, the Administrators of the Bonneville Power Administration, the Southwest Power Administration, and the Southeastern Power Administration testified before our committee that the partnership program in effect in their areas was of great benefit to all the people, and was working wonderfully well. No complaint whatever by anyone, by the man on the street, the housewife, the businessman, the industrialist, or anyone else. They are satisfied with the rates, they are satisfied with the partnership program which exists in those areas.

Mr. Chairman, the general argument made by proponents of the all-Federal transmission grid in this instance for the control of the projects and so forth are misleading, and are charged with emotion rather than reason. Any fair and well-informed person can plainly see that these are intended to hide the grand design for an all-engulfing federalized power grid, completely covering the Nation. The threat of a federalized giant power grid is not a figment of the imagination. It is here. This is a major link in it. We are sure you will agree that if federalization of the electric utilities industry comes, then federalization of the farming—still our greatest free enterprise—industry, retailing industry, and other businesses in America cannot be far behind.

Mr. Chairman, we had best take a good look at what happened in England after the Socialists who masqueraded there for at least 30 years under the banner of the liberal Labor Party got in control of Parliament. They said to the farmers, they said to the housewife, they said to the merchant, they said to the industrialists, "Do you want electric power?" Of course, the answer was "Sure; we must have it." They said, "All right, then quit fighting the socialization of England." The rest of the socialization of England was an easy pushover. Do not pooh-pooh that. It is coming, just as sure as night follows the day, if we keep on putting government into business and keep spending, spending for everything imaginable, the sad day of reckoning will be here, and sooner than some may think.

Now, what happened to the electric rates in England? They increased, while the wages for the workers decreased. Why? Because the cost of government went up and up and up. The British publication, the Recorder, of September 4, 1948, had this to say:

> Two months after the nationalization, increases in the cost of electricity ranged from 20 percent to 50 percent in different parts of the country. And a recent order of the British electric authority, which brings into force a countryside minimum charge of three-fourths of a penny per unit, means that electric customers will pay an additional 2 million pounds a year for their electricity.

Yet, you hear the proponents of Federal power control tell you that the Federal Government, when it takes over, the power rates will go down. Why will they not go down? Because you know full well that government administration costs are many, many times greater than private administration costs. You might be surprised to know that the administration costs of the five utilities here involved is less than one-sixth of 1 percent, of their revenues. The administration costs for the Bureau of Reclamation is many, many times more than that.

That is one of the good reasons why private utilities can come pretty near matching the rates charged by the Federal Government in all areas of the United States.

I said at the outset of my remarks that the Federal power advocates' end purpose is complete Federal ownership and control of all electric power in these States. Here is one good proof of that statement. Before the G and T REA Co-ops in Oklahoma, Missouri, and Texas could get one kilowatt-hour of power from the hydroelectric dams owned by the Government in that area they were forced, against their will, to sign a contract which provided—and I

shall read the language; and let me tell you that the officials of those G and T's came into my office for a year and more and pleaded, "Cannot Congress do something to keep the Interior Department from forcing us to sign this contract before we can get one kilowatt of power?" But the heavy hand of the power czars were on them. Now here is the exact language in that contract. Listen to it and then think seriously about it.

The cooperative hereby grants to the Government the exclusive right, at the option of the Government, to purchase the transmission system at any time during the term of this agreement and lease for a sum equal to the principal of the cooperative's REA loan attributable to the transmission system, less the actual amount of the rental payments theretofore made by the Government on account of the principal of the cooperative's REA loan attributable to the transmission system and upon the expiration of the term of this agreement and lease for the sum of $10.00. In the event the Government is in default as to any payments under this agreement at the time it exercises its option hereunder, the Government shall be required to pay all payments in arrears before exercising its option hereunder.

Which means simply this, that the Bureau of Reclamation, Uncle Sam, could take over every REA line over which Federal power had been transmitted any time they wanted to take them over.

Clyde Ellis, the top REA lobbyist, played a leading role in persuading those REA officials to sign that contract and now he is parading all over America as the savior of the REA.

In 1953 when I took over the chairmanship of the House Interior Subcommittee on Appropriations, that committee voted unanimously to tell the new Secretary of the Interior that unless the provisions that I have just read was taken out of that contract the Interior Department would get not one dime for anything. Secretary Douglas McKay saw to it that it was deleted, as it was in other similar contracts.

Mr. Chairman, I am sorry and deeply concerned that a number of local and State REA officials and others have been sold a bad bill of goods by high-salaried Federal electric power lobbyists holding forth in this Capital City in believing that their REA co-op would escape the lash of the political power electric power czars, if and when that bunch get the needed political power they crave so much and are bound and determined to have, come hell or high water.

Mr. Chairman, I have supported every dollar Congress has appropriated for every inch of wire, every pole, every facility REA has built during my congressional career. We want the local and State REA officials and farmers to run their own business, which they can do and have done well, without dictation from Washington, D.C., or from anyplace in this wide world.

The adoption of my amendment, Mr. Chairman, will be a step in the direction of preserving our American way of life.

Mr. CANNON. Mr. Chairman, I yield 10 minutes to the gentleman from Tennessee [Mr. EVINS].

Mr. EVINS. Mr. Chairman, I ask unanimous consent to revise and extend my remarks and to include an evaluation of cost studies by the Bureau of Reclamation.

The CHAIRMAN. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. EVINS. Mr. Chairman, we always listen to our genial friend the gentleman from Iowa [Mr. JENSEN] with interest if not always with profit. I do not know that he has convinced many Members. I am not persuaded that I will convince any Members, as most Members have made up their minds on this bill and the amendments to be offered. In a situation like this I do not generally propose to offer advice to my colleagues but I do propose this advice today, support the committee on this bill.

The Subcommittee on Appropriations has considered this matter and voted for the Federal transmission system. The full Committee on Appropriations has also voted on this matter and voted for the Federal Government to build the backbone transmission lines. Four years ago the Congress appropriated funds to make a study of this entire transmission line matter. During the Eisenhower administration we voted for a billion dollars to build and develop the upper Colorado storage project. We knew that in time after developing this area there would come a time when we should build the transmission lines. So the Congress has appropriated money to make a study to find out whether we should build these lines. The report of the study recommends that the Federal Government build the backbone transmission lines—an all-Federal system in the Colorado Basin. In addition, former Secretary of the Interior Seaton has studied this proposition and recommended that the Federal Government appropriate the money to build these backbone transmission lines. When Stewart Udall, our former colleague, became Secretary of the Interior he studied the matter and came up with the same conclusion and same recommendation. He reaffirmed Secretary Seaton's recommendation.

In addition to that, the people in the upper Colorado area, independent groups, bipartisan groups, nonpartisan study groups, all that are concerned and interested in this matter, have also come up with the same conclusion and recommendation that the Federal Government should build these backbone transmission lines. So we have five or six different recommendations that the Federal Government build them. If you do not want to take my advice or Mr. JENSEN's advice, then please take the recommendations of the seven independent bipartisan study groups that have studied this matter and recommended the Federal transmission system.

Mr. Chairman, in the main this is a good bill. This is a big bill. It is a very important measure. The measure really should be called a bill to provide for the conservation of the resources of the United States.

Concerning the amendment to be offered on the transmission lines issue, we have been bombarded and we have been propagandized with all sorts of figures. But, the reports all conclude that the Federal Government should build the transmission lines. The utilities do not object, where there is no population, for the Federal Government to build a transmission system and we are building them at this time. But, they do object where population centers are involved and where profits are involved.

Mr. Chairman, I repeat, the one main issue in this bill is whether the Federal Government shall build the backbone transmission lines for the upper Colorado storage project—this great development—or whether a combination of five utilities, namely, the Pacific Gas & Electric Co. and four other allied utilities, shall move in, build the transmission lines and take the power at the bus bars.

The Federal Government has authorized and developed the great upper Colorado storage project at a cost of approximately $1 billion, and now that the great dams of Flaming Gorge, Glen Canyon, and other major multipurpose dams are nearing completion it is important that the Government complete the job and interconnect and intertie these great power systems together with an all-Federal transmission system.

Mr. Chairman, it is important to note that the Congress, in passing the basic act, has already provided for the building of an all-Federal transmission system to tie-in the power grids of the Colorado storage project.

Both section 1 and section 2 of the basic act provide for the building of these transmission lines.

Moreover, compliance with other sections of the law requires that we operate the system with our own transmission lines. If we want to amend the law, let us do it in the regular way and not in an appropriation bill.

Section 3 provides for entering into contracts which will insure the repayment of the cost of the projects and these projects cannot be paid out without the Federal Government receiving the benefits from the power which it produces.

Section 5 of the basic act provides for the Colorado Basin fund and stipulates that all power revenues and other revenues in connection with the benefits of this project shall go into the basin fund and be available for defraying the costs of operation and maintenance of this great project.

Section 5d provides that funds in excess of operating needs in this project are to be paid into the Treasury and that all costs are to be repaid within 50 years from the date of completion.

Section 5e further provides that revenues in excess of all these requirements, including payments into the Treasury, are to be returned to the States and apportioned among the States—the five States of the Colorado Basin.

Section 7 of the basic act also provides that the transmission lines to be constructed—"shall be constructed and op-

erated with other Federal powerplants, present and potential, so as to produce the greatest amount of power and energy that can be sold at firm power and energy rates."

Mr. Chairman, where will we get the funds to comply with these provisions—to make the required payments to the States, to the Treasury, and to pay out the costs of this great prospect if the profits from the power operations are to be turned over to a combine of private utilities?

In this connection, let me call your attention to the following statement by Commissioner Dominy, page 11708, CONGRESSIONAL RECORD, June 29, 1961:

> To assure full development of the water resources of the Upper Basin States under the requirements of the Colorado River Storage Act, there must be available at least $952 million by the year 2049. Correspondingly, earlier goals of financial assistance must be met to keep construction of the participating projects on schedule.
>
> Under the private utilities' wheeling proposals and at a 6-mill power rate, the same rate as for Federal transmission systems, there would be a deficit in the basin fund in the year 2015. Even if it were legal to have a deficit in 2015, which it is not, the private utilities' proposal would accumulate only $591 million by the year 2045. Thus, we are short of the $952 million which the all-Federal system will produce at the same 6-mill power rate which is needed to assure full development of the upper basin water resources. The only way this financing could be accomplished would be to charge more for the power, and to do this would be to disregard congressional directives.

Mr. Chairman, we cannot afford to forego the present and potential benefits to the public, wisely provided by the Congress.

We must not be overwhelmed by special interests—by selfish interests—no matter how cleverly they have masqueraded the issues. We must be guided by the public interest and the public interest is clearly best served by a Federal transmission system. It will be cheaper in the long run. It will insure the economic soundness of the basic Colorado plan. It will make possible the maintenance of the 6-mill rate. It will provide the funds to pay off the entire project. In addition, under an all-Federal system, at the end of the life of a contract, the Federal Government would own the entire system, having the advantage of a completely unified system, whereas, under the utility proposal, the Government would continue to pay wheeling charges in perpetuity.

Mr. Chairman, it is obvious that the power company proposal is one-sided—it is unfair—it is not in the public interest and it should be defeated.

The original concept of the upper Colorado project should be maintained.

By accepting the proposal of the private utilities we would be jeopardizing the economic feasibility of the entire Colorado project—making it impossible to pay it off on schedule. Furthermore, the basic act provides that funds from power revenue will be used for irrigation assistance. The loss of income that would result from the private transmission system would greatly reduce the funds needed in the coming years to provide this assistance.

The Colorado storage project is primarily an irrigation development. However, the power features of the program are most important to provide for the payout of the project.

In this act and in the initial reclamation project of 1939, and in subsequent legislation, the Congress has repeatedly reaffirmed the fact in authorizing legislation that wheeling charges must not reduce the quality or time of irrigation systems in any way to adversely affect project feasibility or payout.

The Bureau's analysis and studies of the proposal clearly show that if the same rates for power to the customers is to be charged under the utilities proposal, as would be the case under all-Federal construction, there would not be available the necessary amount of irrigation assistance funds at critical times for the payout.

The only way this situation could be corrected under the utilities' proposal would be to increase the charges and the rates to the consumer—to charge the consumers more for the power under the utility proposal than under the all-Federal system.

I quote from the transcript of the Appropriations Committee hearings, page 512:

> It is obvious from the results of our analysis that the utility proposal will not meet the requirements of the act, * * * if the power rates to the preference customers are to remain the same as under an all-Federal system.

It is also obvious that the utility proposal will not meet the provisions of the act if the power rates to the preference customers are to remain the same as to the all-Federal system.

But, an increase in rates would mean increased power costs to the preference customers of an estimated $254 million over the period of the proposed contract.

By accepting the utility wheeling proposal, it is true the Government would reduce its investment for building the transmission facilities by approximately $118 million.

But, Mr. Chairman, to save this $118 million in investment we would be contracting to pay about $300 million more to wheel the power than it would cost for us to do the job ourselves with our own transmission line.

The Department of Interior studies show that total payments to the utilities for wheeling charges under their "all or none" proposal amounts to $625,137,000—an average of $7,672,000 annually. This represents a composite wheeling rate of 1.33 mills per kilowatt-hour on every kilowatt produced and sold from the Federal Government dams—whether wheeled by the utilities or not.

The composite rate on energy actually wheeled by the utilities would actually be 1.63 mills per kilowatt-hour—more than one-fourth of the 6-mill total rate and about twice as much as it would cost to wheel the power over a Federal system.

Moreover, Mr. Chairman, the utilities would have the advantage of having all Federal power tied in to their own companies—their own systems—thus permitting them to sell peaking power at any time to their own customers and also having the advantage of not having to construct generating facilities to produce additional power for their own sales.

In effect, this more than $300 million in excess wheeling charges would be a direct subsidy for the private power companies.

Mr. Chairman, this is another Dixon-Yates scheme. I label it Dixon-Yates of the Colorado storage project.

It is significant that the Congress through the Bureau of Reclamation is already funding four or five transmission lines in the area. The private utilities do not object to these because there are no customers in the area.

The basic principle of the reclamation laws should be reaffirmed and the Government should build the transmission system to have the benefits of this great project for the people and to protect the public interest.

All of the experts—all the outside accountants and study groups that have analyzed the program of the present administration have agreed that the Bureau's plan to build its own grid is sound and in the public interest.

This was recommended by former Secretary of the Interior, Fred Seaton, during the former administration. Secretary Udall of the present administration has also rightly concluded that the Federal Government should build the transmission lines. The Colorado River Association and other groups and organizations vitally and directly concerned with the Colorado project have also strongly urged the Federal transmission system.

The proposal has been bipartisan in its sponsorship. It should be bipartisan in the public interest.

Our committee recommends this action and I strongly urge, Mr. Chairman, the defeat of the private power proposal and that we go forward to construct the transmission lines to bring the benefits of power to people of the area at the lowest possible cost without subsidizing the combined corporate utilities. Although, Mr. Chairman, this is the main point at issue this bill is far more important than this one issue.

This is a most important bill for our Nation's continued growth, strength, and prosperity.

This bill, carries appropriations for the civil works functions of the Corps of Engineers, the Bureau of Reclamation of the Department of Interior, the several power agencies including the Tennessee Valley Authority, the Bonneville Power Administration, the Southeastern and Southwestern Power Administrations, and the Atomic Energy Commission.

The bill provides for appropriations totaling $3,662,548,500 which is $110,776,805 less than the total amount appropriated for these purposes in fiscal year 1961.

This bill calls for the appropriation of a large amount of money—it is a big bill—but the funds appropriated are for capital investments in our own country.

Mr. Chairman, this measure properly should be called the national resources development bill, for it is in every respect a bill concerned with the development of our natural resources.

A great deal of the misunderstanding that sometimes arises about this bill comes from failure to realize that appropriations for the civil works of the Corps of Engineers and the services of other allied agencies are indeed concerned with the development of our Nation's resources.

There are some who still think of this measure as a measure to provide employment. It does indeed have important effects in that regard, but the large stimulation it gives to national employment is one of the beneficial byproducts of this program.

There are some who still like to refer to the public works bill as a "pork barrel" bill. Nothing could be further from the truth.

Here we are dealing with investments, capital investments, for all our country. This is an all-American program in the full sense of that term.

In preserving our resources we are building a foundation for the future growth and strength of our Nation. Such an investment is vital.

Any productive concern, whether it is a private business or a powerful nation like our own, has to keep its productive capacity up to date. This bill is concerned with keeping our productive capacity up to date, developing our natural resources, and investing in the future of America.

Every region and area of our country wants to share equally in the growth of our Nation. Though it is impossible to develop all at once and simultaneously all of the water resources of our country, our committee has sought to reconcile the needs of all areas and to maintain a balance between all areas. This is a difficult task, as is evident from the printed record of the hearings which this year fills nine volumes. Those same volumes record the persistent effort that was made by our committee to effect a reasonable balance, and, as indicated, appropriations are made for projects in all sections and all areas of our common country.

I know that I express the feeling of all my colleagues when I take the occasion to pay a special tribute to our distinguished chairman, the gentleman from Missouri [Mr. CANNON], who personally carried on these hearings and labored with much of the details of this bill. His wide knowledge and long experience, and his fairness and objectivity were, as always, invaluable.

I deem it a great privilege to serve on this subcommittee with the gentleman from Missouri and the other distinguished members of our subcommittee—Hon. LOUIS C. RABAUT, of Michigan; Hon. MICHAEL J. KIRWAN, of Ohio; Hon. JOHN E. FOGARTY, of Rhode Island; Hon. JOHN J. RILEY, of South Carolina; Hon. EDWARD P. BOLAND, of Massachusetts; Hon. DON MAGNUSON, of Washington; Hon. JOHN TABER, of New York; Hon. BEN F. JENSEN, of Iowa; Hon. IVOR D. FENTON, of Pennsylvania; Hon. H. CARL ANDERSEN, of Minnesota; and Hon. JOHN R. PILLION, of New York.

I should like to pay a special tribute to the very able and efficient committee staff members—Carson Culp and "Gene" Wilhelm. They are very capable public employees.

BUREAU OF RECLAMATION

This bill provides total appropriations of $274,983,500 for 1961 reclamation programs and operations.

Our bill includes funds for six new construction starts, along with funds for continuation of projects now underway, including the great Colorado River storage project—that mighty new addition to the Nation's hydroelectric system which will serve a marketing area primarily in Arizona, New Mexico, Colorado, Utah, and Wyoming. This project is nearing the final construction phase. In 1963, power will begin being produced at Flaming Gorge. In 1964, power turbines will hum at Glen Canyon.

One highly significant aspect of the appropriations we are now considering is that the reclamation program is almost totally reimbursable and in fact 92.3 percent of the cost of all authorized reclamation construction will be returned to the Treasury. Furthermore, the reclamation program finances itself, in part, through receipts already paid into the Treasury under basic reclamation law.

Appropriations for reclamation throughout its 59-year history total $4.69 billion. Approximately 75 percent of this cumulative total has been appropriated in the past 16 years—47 percent in the past 10 years. Thus, the bulk of reclamation expenditures has been made in recent years on projects, some of which are still under construction and on others which have not attained a stage of maturity and maximum returns to the Treasury. Notwithstanding this circumstance, reclamation receipts to the Treasury from construction repayments, power revenues, accretions to the reclamation fund from sale of public lands, mineral royalties, and so forth, and miscellaneous income, currently aggregate in excess of $150 million annually.

When we consider the self-liquidating aspects of reclamation projects along with the large contributions they make toward the immediate objective of putting people to work and the longer-term goal of national growth to provide adequate opportunities for an ever-expanding population, it is evident that appropriations for such resources development are investments in our national economy and national strength in the truest sense of that word.

CORPS OF ENGINEERS

For carrying out all of the civil works activities of the Corps of Engineers, this bill provides total appropriations of $912,296,000.

For construction, $680.9 million is provided, which compares with a fiscal year 1961 appropriation of $706.8 million. This bill provides for 49 new planning starts, 58 new construction starts, including reimbursements to local interests for work accomplished, and for maintaining progress on going projects at reasonable rates of construction.

With the amounts proposed projects with an aggregate total Federal cost of $398.2 million will be completed.

The 58 new construction starts are estimated to have a total Federal cost of $506.6 million.

Included also is $10.6 million for the rehabilitation program, involving restoration work on older projects which represents requirements beyond the scope of normal maintenance. The amount included for this purpose will provide a good start on 20 major rehabilitation projects estimated to cost $40.8 million, and for planning 8 additional projects with an estimated cost of $10.6 million. The work and accomplishments of the Corps of Engineers represent some of our Nation's greatest developments.

TENNESSEE VALLEY AUTHORITY

This bill carries a total appropriation of $38,203,000 for the Tennessee Valley Authority. That is an increase of $17,683,000 over the $20,520,000 TVA budget for 1961 which was approved last year, but none of this amount is for the great power program of TVA. Funds appropriated are for other purposes in the comprehensive multipurpose regional development program of the TVA—navigation and flood control. The power program of the TVA is self-sustaining and self-liquidating.

The budget not only does not call for any appropriated funds in financing the power program for 1962 but the TVA provides payments to the Treasury of $50 million or more in power proceeds annually in reduction of and as a return on appropriations earlier invested in the power program.

On June 29 of this year, TVA sold the second $50 million in power revenue bonds which it has issued under the 1959 act of Congress, authorizing this agency to sell up to $750 million in securities to finance its electric power program. A day later, TVA made a payment of $30.1 million to the Treasury, raising to $51.4 the amount TVA has paid back to the U.S. Treasury. TVA has paid into the Treasury some $301 million in revenues.

In addition to these payments to the Treasury from power proceeds, TVA had invested $639,534,000 of net cash income from power operations in electric power facilities through June 30, 1960. In other words we have received more than $1 billion in returns from the TVA—$400 million in cash to the Treasury and $639 million in added power facilities.

Annual payments to States and counties in lieu of taxes represent another substantial financial return on the TVA power investment. The books show a total payment of nearly $6.5 million from TVA power revenues to 7 States and 137 counties in lieu of taxes during fiscal year 1961. In addition, the municipal and rural cooperative electric systems that retail power pay an estimated $10.9 million as taxes or tax equivalents to State and local governments in this same year. It is notable that the combined tax payments of the TVA and its distributors have increased by nearly 50 percent in the past 10 years.

BONNEVILLE POWER ADMINISTRATION

For the Bonneville Power Administration, this bill provides appropriations of $20,875,000 for construction, and $12,205,000 for operation and maintenance. The combined program for 1962 totals $33,080,000 as compared with $30,007,000 for the preceding year.

SOUTHEASTERN POWER ADMINISTRATION

For the Southeastern Power Administration a total appropriation of $800,000, consisting entirely of operation and maintenance funds, is provided in this bill. Of this amount, $66,000 is requested for purchase of energy and wheeling charges, to be devoted exclusively to the purchases of firming energy and the payment of wheeling fees under existing contracts with Virginia Electric & Power Co., and Florida Power Corp. The remaining $334,000 of the appropriation will provide for the system operation and maintenance, power contracts and rates, and general administration activities. This power administration, which serves a 10-State area, estimates that the total of this year's earned revenues will be approximately $19 million, and that the total revenue earned for the budget year will be approximately the same amount. Last year's actual revenues reached a total of over $20 million.

SOUTHWESTERN POWER ADMINISTRATION

The appropriation in this bill for the Southwestern Power Administration, in the total amount of $7,260,000, includes $950,000 for construction, $1,310,000 for operation and maintenance and $5 million for the "Continuing fund" to pay for the purchase of power or wheeling charges and for the leasing of transmission capacity from certain generating and transmission cooperatives.

ATOMIC ENERGY COMMISSION

Included in the bill this year also are the funds for many essential programs of the Atomic Energy Commission. The total appropriation provided for these vitally important programs is $2,380,301,000 as compared with a total of $2,483,235,000 in the 1961 budget for this Commission—a decrease of $102,934,000.

In summary Mr. Chairman, the atomic energy program, the work of the TVA, the Bonneville Power Administration and our other great power agencies, and the work of the Corps of Engineers and the Bureau of Reclamation are all important and must go forward.

This is a vital bill and a very important measure—and although it is difficult and indeed impossible to satisfy everyone on such a bill, the measure is worthy of approval as recommended by the Committee on Appropriations and I urge its passage.

BUREAU'S REPLY TO PRIVATE UTILITIES EVALUATION OF THEIR WHEELING PROPOSALS AND THE ALL-FEDERAL "YARDSTICK" SYSTEM—REPORT OF JUNE 1, 1961

The following are the points claimed in the private utilities June 6 presentation to the Public Works Subcommittee (hearings pt. 4, p. 2334) as the major errors and omissions in the Bureau's report and replies thereto:

Point 1. Line from Glen Canyon to Phoenix: Because power delivered to the Southern Division under the Federal system would be only 450,000 kilowatts whereas under the private utilities proposal 600,000 kilowatts might be delivered to Arizona, the cost of the Bureau's system is increased by the amount of $13,933,000, the private utilities estimate of the cost of a third line from Glen Canyon to Phoenix.

Reply to point 1: At the time the yardstick system was approved, the only fact definitely known was that six 230 kilovolt lines from Glen Canyon were required to transmit Glen Canyon Power. Consequently, the cost estimate for the yardstick system included the cost of 6 lines out of Glen Canyon even though only 5 lines were identified on the maps used. This is affirmed by Commissioner Dominy on page 507 in part 3 of the hearings. The private utilities now claim that the $176,245,000 cost estimate for the yardstick system should be increased by almost $14 million to recognize the sixth line.

Point 2. Lines and facilities: The Bureau used longer lengths for certain transmission lines common to both systems (the noncontroversial lines) under the private utilities' proposal than under the Bureau's yardstick system and included certain substation facilities claimed by the private utilities to be not needed in the Federal system under their proposal. The private utilities contend that these transmission lines should have been the same length in either proposal. The private utilities contend that these transmission lines should have been the same length in either proposal. The amount claimed for this item by the private utilities is a reduction by the Federal investment under the utilities' proposal by $4,999,000.

Reply to point 2: Under this point, the private utilities basically are trying to claim that under the wheeling proposal the Bureau should locate certain lines in the same locations as in the yardstick system regardless of the economics involved. They are also claiming that certain other costs were overlooked in the yardstick system. The Bureau is comparing what it would do under All-Federal construction with what it would do under the wheeling proposals. The economics of transmission line locations dictate that under all-Federal construction without interconnection, a short routing should be adopted for the lines from Glen Canyon to Four Corners to Curecanti.

The private utilities contend that the cost of construction of certain switchyard facilities was included but not needed in the Federal system under their proposal and have, therefore, deducted an amount from the estimate of the Federal system under the wheeling proposal to account for this. This contention is not correct. The Bureau always includes the costs of switchyards with the costs of the powerplants and not with the costs of transmission facilities. These switchyard facilities would be practically the same with or without wheeling and in either case would be constructed by the Bureau. The private utilities contend that the Bureau omitted the cost of one transmission line for Flaming Gorge to Vernal, Utah, in the all-Federal system. This is not an omission but a problem of identification. In the cost estimates under the wheeling proposal, the Bureau identified the two lines. Under the yardstick system, it identified only one line and included the cost of the second line in the $13 million plus allowed for future lines and substations. This is explained in Commissioner Dominy's testimony on page 519 in part 3 of the hearings.

Point 3. Wheeling costs: The Bureau overstated the wheeling costs under the private utilities' proposal by so-called improper application of the wheeling offers. The overcharge claimed by the private utilities is $62,528,000 for the 86-year period of the study.

Reply to point 3: The utilities charge that the Bureau overstated the wheeling charges because of improper application of the wheeling offers.

The Bureau's original analysis of the wheeling proposal was based on offers and information it had received from the utilities at the time of preparation of the report. Subsequent to preparation of the report, Pacific Power & Light modified its proposal (letter of November 10, 1960) by offering a rate of one mill per kilowatt-hour for wheeling from Flaming Gorge to Pilot Butte. This modification reduces total wheeling costs by $14,694,000, and has been taken into account in the Bureau's July 1961 analysis of the utility offer based on their interpretation of wheeling costs.

Arizona Public Service Co. claims the Bureau could have saved almost $17,000,000 in wheeling costs by accepting its alternate offer of $6.74 plus taxes per kilowatt-year rather than its offer of 1,177 mills plus taxes per kilowatt-hour. Actually the company computations using $6.74 per kilowatt-year show the so-called $17,000,000 savings by calculating wheeling costs using smaller loads on its system than the Bureau used. However, the Bureau's July 1 evaluation of the utilities proposal incorporates $6.74 per kilowatt-year applied to the correct loads.

The private utilities contend that the wheeling costs paid the Public Service Co. of New Mexico could be reduced by about $8 million if the kilowatt-year rate had been used in lieu of the kilowatt-hour rate. Estimates of wheeling charges based on New Mexico's offer of 50 cents per month per kilowatt of maximum demand during the preceding 12-month period would be less reliable than an estimate of wheeling costs based on a wheeling charge of 1.25 mills per kilowatt-hour for energy delivered at Albuquerque. This is a matter of engineering judgment and there is no good reason for the Bureau to give an $8 million advantage to the private utilities without reasonable assurance that it could be obtained. As in the previous two items, however, the Bureau has included the utility kilowatt-year rate applied to the correct load in its July 1 evaluation of the utility proposed.

On October 28, 1960, Mr. L. R. Patterson of Public Service Co. of Colorado advised us that as near as the company could determine the wheeling charge for Public Service Co. of Colorado has been applied correctly and that by including displacement values as supplied to them by the Bureau it was essentially in agreement on the wheeling dollars. The company later claimed that the Bureau has overstated the wheeling dollars to be paid Public Service Co. of Colorado because the Bureau would have to pay them under the yardstick system and only the difference should be used. However, in recent testimony before the Senate, the company has withdrawn its criticism.

The Utah Power & Light Co. in computing its wheeling costs for comparison with the Bureau's used $7.739 per kilowatt-year rather than $7.75 per kilowatt-year, the figure furnished to us by the company and agreed upon in meetings with its representatives as the rate to be used in the Bureau's analysis. Also, in its letter of September 16, 1960, the company suggested a rate to be used in the Bureau's analysis. Also, in its letter of September 16, 1960, the company suggested a rate of 0.15 mills per kilowatt-hour be applied to the gross generation of the central Utah plants specified to it by the Bureau. In its computations the company has reduced the specified generation of central Utah plants by 7 percent for losses before applying the suggested rate of 0.15 mills per kilowatt-hour. The company's claims that the overstatement of its wheeling charges by the Bureau is due to application of Utah wheeling charges to the loads to be served adjacent to Glen Canyon.

This claim is false. The Bureau analysis specifically exempted these loads from wheeling. However, the Bureau has also applied the company interpretation, using correct loads, in its July 1 evaluation.

Most of these items under point 3 are discussed by the Bureau witnesses on pages 508–510 in part 3 of the hearings.

Point 4. Transmission losses: The Bureau did not consider increased project revenue which would result from reduced transmission losses alleged under the utilities proposal. The private utilities claimed this increase in revenue would accumulate to about $75,347,000 for the entire study period.

Reply to point 4: The Bureau met with the individual private utilities, explaining its interpretation of their offer, including the matter of losses which were quoted variously up to 10 percent on kilowatts, and asked each if their offer was properly interpreted and handled. There were no disagreements. It can only be concluded from the official offers that the utilities either did not recognize or intended to keep for themselves any benefits in savings in losses resulting from interconnections.

It is a well-known fact that the losses on an independent Federal transmission system plus the losses on the private utility systems without any new interconnections between them would be higher than the losses on the two systems if new interconnections are made.

The same decrease in losses can be secured by the Bureau building the lines and effecting interconnections with the private utilities without wheeling being involved. It must be recognized that in the interconnected system not only are the losses to the Bureau reduced but losses to the private utilities are also reduced. This savings in losses is associated with the interconnection and more efficient use of the systems through displacement and are not related to the wheeling offers. For these reasons, it is appropriate not to claim any added revenue due to savings in losses. The matter was explained in the Bureau's testimony beginning on page 519, part 3, of the hearings.

Point 5. Operation and maintenance: The Bureau estimate of operation and maintenance for the yardstick system amounts to about 1.29 percent of the investment in transmission facilities, but under the private utilities' proposal the Bureau estimate of operation and maintenance of the Federal portion of the transmission system amounted to 2.29 percent of the investment in transmission facilities. The private utilities claim this resulted in an advantage to the Bureau system of about $71,070,000.

Reply to point 5: The private utilities claim the Bureau has overstated the operation, maintenance, and replacement costs of the facilities the Bureau will construct under the private utilities proposal. They base this claim on a contention that the relationship between operation and maintenance costs and the investment in transmission facilities is a constant percentage for all systems. That there is not such a constant relationship is shown by the fact that the operation and maintenance costs of the Arizona Public Service Co. system since 1952 averages 4.45 percent while on Utah Power & Light Co. system operation and maintenance costs for the last 10 years average 1.97 percent. Recognizing the frailties of a rule of thumb approach, the Bureau based its operation and maintenance costs on a detailed study of the personnel requirements for transmission line and substation operation and maintenance crews using its experience on other similar Bureau systems and taking into account the nature of the terrain and isolation of facilities, the long distances to be traveled by maintenance crews, and the efficient utilization of personnel. The Bureau concludes its estimates for operation and maintenance costs made on this basis are a reasonable estimate and the results are consistent with conditions normally found in practice.

Point 6. Interest costs: The private utilities claim interest savings would amount to $135,787,000 for the study period based upon the foregoing points.

Reply to point 6: The claimed savings in interest of $135,787,000 would not materialize with elimination of the cost distortions made by the private utilities.

SUMMARY

Notwithstanding the unjustified increase of the spread in cost of Federal facilities between the yardstick system and the wheeling proposal, the unilateral reduction in power and energy wheeled for computing wheeling charges, the arbitrary increase in revenues from saving losses, and the unrealistic reduction of operation and maintenance costs for the Federal facilities under the private utilities proposal, the studies of the private utilities claim an advantage for the wheeling proposal of only $2,284,000 in irrigation assistance by year 2049. From their own studies this advantage would be wiped out in less than 9 months by the $3,249,000 more net revenues each year beginning in 2049 under the Federal system than under the private utilities proposal. Their own figures show that at the end of a hundred-year period the Federal system would provide $43,202,000 more irrigation assistance than under the private utilities proposal.

In conclusion, the results shown in the report on June 1, 1961, are based upon maximizing the costs of the Federal system and minimizing the costs under the private utilities proposals based on erroneous assumptions.

The Bureau's July 1 evaluation of the wheeling offer incorporating the utilities own evaluation of wheeling offers is shown in column 4 on the attached table.

[1] Using new load data as revised June 19, 1961, and revised Federal costs based on line under construction, Glen Canyon to Shiprock, and other recent cost data.
[2] Preliminary.
[3] Cost is necessarily larger than previously shown because only increased costs of the modified system can be reflected in this part of the system. There are no offsetting decreases in this portion of the system as is the case in arriving at the $183,000,000 estimated for the total modified system.
[4] Includes $1,750,000 for Hoover replacements.
[5] Short of repayment of irrigation allocation within 50 years as required by law.

Mr. JENSEN. Mr. Chairman, I yield 10 minutes to the gentleman from Pennsylvania [Mr. FENTON].

Mr. FENTON. Mr. Chairman, as I have repeatedly said, I have enjoyed being a member of this committee for some time. I have the greatest respect for the membership of the subcommittee and for our very fine clerks. A long time was spent on this bill, and I think it is unfortunate that some subcommittees hold hearings running simultaneously with hearings of other subcommittees, and speaking for myself, it so happens that the hearings of this particular subcommittee ran at the same time as another subcommittee which I had to attend most of the time.

Mr. Chairman, for many years now, we have all been a party to voting huge sums of money for the specific benefit of the so-called reclamation states of the West. Billions of the taxpayers' dollars have been spent on Federal projects designed to provide water storage, irrigation, and flood control on western rivers. There is little doubt in my mind that much of this expenditure provided great benefits both for the area involved and for the Nation as a whole.

Conservation of water is of prime importance to our Nation today, and the economic growth of the Western States which has been made possible by these water projects has made a real contribution to our national economy and to the prosperity and well-being of our citizens.

Unfortunately it has been increasingly evident that public power proponents have seized upon reclamation projects as another means of obtaining public subsidy. The people of the East who pay a lion's share of the cost of these reclamation projects through their taxes, have done so willingly in the belief that they were aiding irrigation and water conservation projects. But now that reclamation is obviously becoming the tool of public power, I do not believe it is the responsibility of the people in the East to further subsidize the already heavily subsidized preference electric power users. These privileged people seem to have come to the conclusion that the billions of dollars spent for giant dams was spent to provide them with cheap electricity.

There is obvious justification for the construction of electric power facilities in conjunction with these dams, since the revenue derived from the generating facilities provides for partial payment of the taxpayers' investment. There is no conceivable reason, however, why the preference customers of the West should obtain this power at anything less than the going rate for wholesale electric power in their respective areas. Nor is there any conceivable reason why they should avoid paying their share of taxes on this power.

There is absolutely no reason why, for example, grandiose electric power transmission lines should be built to carry this Federal tax-free power to these customers. In many cases in the West the power could as easily be carried to them over existing lines, many of which are owned and operated by private electric utilities.

A good case of point is the current attempt on the part of the Bureau of Reclamation to waste taxpayers' money on transmission lines for the Colorado River storage project. This project, which started out with the cost estimate of $760 million has already reached over a billion dollars. The private utilities in the area have offered to carry power over their lines for a very reasonable wheeling charge to the Bureau of Reclamation's preference customers. The preference customers, as a matter of fact, will receive that power at a rate identical to that which will be charged if the Bureau of Reclamation were to build the transmission lines. The conclusion is obvious that these people want the Federal Government to build these lines as part of a huge Federal power network spreading over the whole Nation.

It is now time for us to take a good look at these tactics. It is time for us to decide that unless the public power proponents cease their attempts to obtain future subsidies under the guise of reclamation it may be necessary to curtail otherwise desirable water development projects. Those who are concerned with legitimate reclamation and water

projects should consider the consequences of what public power people are doing. Unless they do, we are going to have to look at every reclamation project in a new light.

Mr. Chairman, the Bureau of Reclamation estimates that it will cost them $183 million to provide transmission lines to deliver the electric power to preference customers from the upper Colorado project to the five States—Utah, Wyoming, Colorado, Arizona, and New Mexico.

According to testimony given our committee most of these preference customers are now being served by investor-owned utilities in those States. It is estimated that two-thirds of these suggested Federal lines, estimated to cost the taxpayers of the Nation about $135 million, are not necessary because the private utilities have offered to transmit or wheel the power over their existing and planned lines for firm and reasonable rates.

As a matter of fact on September 1, 1961, the Upper Colorado River Commission adopted a resolution endorsing the proposal of the private- or investor-owned utilities.

Should the Federal power boys succeed, all these funds will come from the taxpayers of the country, and on the basis of Pennsylvania's share of the Nation's tax burden—around 6.95 or 7 percent—Pennsylvania taxpayers' contribution will be $9,450,000. This exceeds that from the five States involved as follows:

	Percent	*Amount*
Colorado	0.94	$1,280,000
New Mexico	.37	500,000
Utah	.36	490,000
Wyoming	.16	220,000
Arizona	.57	770,000
Total	2.40	3,260,000

The proposal of the private utilities is not new because similar arrangements are quite common and is the same type that is presently in use by the Southwest Power Administration and the Southeastern Power Administration with the utilities in those areas.

The proposed plan of the investor-owned utilities is certainly consistent with what I believe is the intent of Congress—that is not to appropriate funds for transmission facilities when suitable wheeling contracts can be entered into with private facilities.

The Colorado River storage project is a water development project. The generation of electric power is its secondary purpose and the revenues derived from the sale of this power must first pay for the power facilities and then provide money to bring water to land—irrigation—and for other purposes. Therefore the sooner the electric facilities are paid for, the earlier assistance can be given for irrigation, and so forth.

Should the proposal of the private utilities prevail, not only would there be a saving of $135 million in construction costs but also payments of $1.2 million per year from the private utilities out of "wheeling" revenues in Federal income taxes and $2.1 million annually in State and local taxes. Of course the Bureau of Reclamation would pay none.

Other benefits that would accrue from the private utilities proposal would be the repayment to the Federal Treasury the heavy cost of the power facilities at least 7 years earlier—thus permitting of earlier irrigation construction or other water projects. It would also make available about 57,000 kilowatts more power for sale to preference customers through elimination of heavy transmission line losses on the Bureau's proposed system. Sale of this extra energy at 6 mills would increase project revenues by $1 million per year.

I trust when the amendment is offered to eliminate the Bureau of Reclamation's proposed transmission lines that it will be adopted.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. FENTON. I yield to the gentleman from Pennsylvania.

Mr. FULTON. Mr. Chairman, I want to compliment the gentleman on his excellent statement and say that Pennsylvania is a lucky State to have the gentleman as one of the ranking members of the Subcommittee on Public Works of the Committee on Appropriations of the House. Not only for the taxpayers of the country but for private industry, we in Pennsylvania are proud of the gentleman. I may say further that we in Pennsylvania are particularly proud and pleased on what Federal projects the gentleman from Pennsylvania, Dr. FENTON, has been able to work out for the communities in our whole State, in the present appropriation bill. Democrats and Republicans alike in Pennsylvania should appreciate the gentleman's excellent services on the House Appropriations Committee. Congressman FENTON'S accomplishments and success are based on his long service, experience, and legislative competence, as well as his earned seniority in the House and on the House Appropriations Committee.

Mr. FENTON. I thank the gentleman very much.

Mr. KIRWAN. Mr. Chairman, I yield 5 minutes to the gentleman from Massachusetts [Mr. BOLAND].

Mr. BOLAND. Mr. Chairman, the public works appropriation bill now before the committee recommends $3,662,548,000 for fiscal year 1962—about a $70 million reduction from the requested amount. The vast portion of the recommended amount goes to the Atomic Energy Commission—some $2.3 billion.

The water resources programs of the Corps of Engineers and the Bureau of Reclamation are provided for in the amount of $960,369,500.

These funds are allocated to 436 projects and activities, in all of the States, with a total estimated Federal cost of approximately $17 billion. This $17 billion cost is, of course, based on the assumption that all activities recommended in this bill will come to full fruition and ultimate construction. It might very well be that many of the survey and planning starts will result in dropping some of the projects as infeasible and not economically justified.

Mr. Chairman, this bill has often been called the pork barrel and writers and cartoonists use it to have a field day in lampooning the actions of the Members of the Congress in seeking and obtaining particular projects for their districts.

Mr. Chairman, this bill helps to protect and preserve and secure our Nation—to guard and develop its resources—to spread waters on the land to green and bloom our deserts—to engineer our waterways and harbors, enabling food, fiber, minerals, and the sinews of our industrial capacity and might to be shipped from their basic and naked origin to areas of manufacturing, development, and consumption.

Mr. Chairman, this bill is the vehicle for the realization of all of this and it is more. It harnesses the tremendous, magnificent, potential power of water and spreads it as energy to lift the daily burdens of mankind and to ease his way with comfort and convenience.

It is the instrument by which our Nation curbs the ravaging, devastating consequences of uncontrolled and rushing waters. This is the bill that has built the reservoirs, the dams, floodwalls, jetties, breakwaters, pumping stations to stop floods, to protect property and to save lives.

All of these that have been constructed are eloquent monuments to the wisdom of the responsible agencies and to the Congress. For these projects have saved millions of dollars and many human lives. There is not a section of this country that has not felt and appreciated the value of the flood control projects that sprinkle this land.

Within the receding hours of today and yesterday we have witnessed the value of projects that run from New Orleans and Cameron, La., to Corpus Christi, Tex. Hurricane Carla has visited this sweep of area with one of the fiercest storms of the century. It has generated the greatest mass exodus of people in the Nation's history—more than 500,000. The jetties, breakwaters, and seawalls were major factors in protecting property and saving lives and enabling the people to successfully flee the area. And I take this opportunity to commend the civil defense agencies, Red Cross, and all of the local police and fire units and thousands of civilians whose efforts made possible the evacuation.

Coming from New England, I can appreciate the conditions, the fear and terror of windswept, torrential rains, engulfing tides, hurricanes and tornadoes. For we, in New England, have experienced all of these phenomena. We are grateful for the cooperation that we have received from the Federal Government down through the years from the year in the early 1930's, when the Federal Flood Control Act was passed by the Congress.

Since joining this Subcommittee on Public Works Appropriations some 7 years ago, it has been my constant and consistent desire to bring to full realization the flood control program of the

Corps of Engineers designed to give my section of the country adequate protection from floods and hurricanes. The Congress has generously responded to our pleas and daily we are moving closer to our goal.

The bill before us today helps us to meet our objective. I list the flood control projects that are included in it and the effect that they have on our areas in New England—the economics of the projects:

CONNECTICUT RIVER BASIN

Mr. Chairman, these projects affect the Chicopee River and Westfield River Basins which empty into the Connecticut River Basin in the vicinity of Springfield. The committee increased planning funds for the Chicopee Falls local protective works by $50,000, from $75,000 to $125,000. The committee also allocated $50,000 to commence advance engineering and design plans for the Westfield local protective works on the Westfield River below Littleville dam and reservoir. The Corps of Engineers advised the committee that this sum could be used for planning in this fiscal year.

CHICOPEE FALLS, MASS.

(Initiation of planning)

Location and description: The project is located on the Chicopee River at Chicopee Falls, Mass. The project provides for channel excavation and 4,400 linear feet of levees and floodwalls along the left bank of the river. Pumping plants would be provided to dispose of interior storm drainage.

Authorization: 1950 Flood Control Act.

Benefit-cost ratio: 1.3 to 1.

Summarized financial data:

Estimated Federal cost	[1] $1,880,000
Estimated non-Federal cost	60,000
Cash contribution	([1])
Other costs	60,000
Total estimated project cost	1,940,000
Preconstruction planning estimate	170,000
Appropriations to June 30, 1961	[2] 20,000
Planning for fiscal year 1962	75,000
Balance to complete preconstruction planning after fiscal year 1962	75,000

[1] Local interests are required to assume at least 20 percent of the project cost, exclusive of costs for planning. This will necessitate a cash contribution, or a reimbursement over a 50-year period, in an amount estimated to be $294,000.

[2] Preauthorization study costs only.

Justification: Four floods of major proportion have been experienced since 1936. The greatest flood of record occurred in September 1938. The second greatest flood, August 1955, caused the largest damage. Losses in the Chicopee Falls project area during the 1955 flood amounted to $2,800,000. Flood protection is required for three major industrial complexes having a plant value of over $60 million, which produce over $100 million in tires, cotton goods, and firearms annually.

Non-Federal costs: Local interests are required to assume at least 20 percent of the cost (except costs of planning, design, and acquisition of water rights) of the completed project, payable either as construction proceeds or pursuant to a contract providing for repayment with interest within 50 years. The actual cost, or fair market value of lands, easements, rights-of-way, and work performed or services rendered prior to completion of construction of the project, which are furnished by a non-Federal entity, shall be included in the share of the cost to be borne by the non-Federal entity. Local interests are specifically required to furnish all lands, easements, and rights-of-way for construction; provide sewer and utility alterations necessary for construction and operation of the project, including the construction of a water intake and the extension of a low dam for furnishing water to the United States Rubber Co. as a replacement for existing facilities, and permit no encroachment on the improved channels or on the ponding areas or, if ponding areas or capacities are impaired, will provide substitute storage capacity. The estimated costs to local interests are as follows:

Lands and damages	$50,000
Relocations	10,000
Total	[1] 60,000

[1] In addition, a cash contribution, or reimbursement, estimated at $294,000 is required. The cost of preserving and maintaining channel and ponding capacities is not available.

Local interests also are required to maintain and operate the project after completion. Annual maintenance and operation costs are estimated at $2,800.

Status of local cooperation: By resolution dated March 10, 1959, the board of aldermen of the city of Chicopee agreed to provide certain measures of local cooperation necessary for construction of the project. No difficulty is anticipated in securing all required measures of local cooperation.

Comparison of Federal cost estimates: No change from the latest estimate submitted to Congress. (The requirement of a cash contribution, or reimbursement, as specified in the authorization act has not been considered.)

CONANT BROOK RESERVOIR, MASS.

(Initiation of planning)

Location and description: The project is located on Conant Brook, a tributary of the Quaboag River in the Connecticut River Basin. The reservoir lies wholly within the town of Monson, Mass., in the south central part of Massachusetts. The project provides for an earth and rock fill dam approximately 1,235 feet long with a maximum height of about 85 feet above streambed. At spillway crest elevation, 754 feet, the capacity of the reservoir would be 3,840 acre-feet.

Authorization: 1960 Flood Control Act.

Benefit-cost ratio: 1.4 to 1.

Summarized financial data:

Estimated Federal cost	$2,080,000
Estimated non-Federal cost	----------
Cash contributions	----------
Other costs	----------
Total estimated project cost	2,080,000
Preconstruction planning estimate	230,000
Appropriations to June 30, 1961	[1] 20,000
Planning allocation for fiscal year 1962	50,000
Balance to complete preconstruction planning after fiscal year 1962	160,000

[1] Preauthorization studies costs only.

Justification: Construction of the Conant Brook Reservoir is required to provide flood protection in the town of Monson and other damage centers on the Quaboag and Chicopee Rivers. A recurring August 1955 flood (at 1959 price levels) would cause damages amounting to $15,880,000 in the Chicopee River Basin of which $5,265,000 would be prevented by the Conant Brook project.

Non-Federal costs: None required.

Status of local cooperation: Local interests are required to prohibit further obstruction of the floodway along Conant and Chicopee Brooks in the town of Monson. State legislation permits the town to establish flood plain zoning. No difficulty is expected in obtaining necessary action to fulfill the local cooperation requirements.

Comparison of Federal cost estimates: The current Federal cost estimate of $2,080,000 reflects an increase of $20,000 on the latest estimate submitted to Congress of $2,060,000. The increase is due to the inclusion of the costs of preauthorization studies.

LITTLEVILLE RESERVOIR, MASS.

(New start)

Location: The project is located on the Middle Branch of the Westfield River, 1 mile above its confluence with the Westfield River and approximately 2 miles north (upstream) of Huntington, Mass.

Authorization: 1958 Flood Control Act.

Benefit-cost ratio: 1.5 to 1.

Summarized financial data:

Estimated Federal cost	$7,000,000
Estimated non-Federal cost	(1)
Cash contribution	(1)
Other costs	----------
Total	----------
Appropriations to June 30, 1960	116,000
Appropriations for fiscal year 1961	154,000
Appropriations to date	270,000
Appropriations requested for fiscal year 1962	300,000
Balance to complete after fiscal year 1962	6,430,000

Accumulated percent of estimated Federal cost:

Appropriations to date	4
Appropriations requested for fiscal year 1962	8

[1] Local interests are required to reimburse the Federal Government for costs allocated to water supply storage over a period not to exceed 50 years after use of this storage is initiated. The reimbursement required has not been determined.

Physical data

Dam:
- Type: Earthfill.
- Height: 164 feet.
- Length: 1,350 feet.

Spillway:
- Type: Ogee.
- Capacity: 92,000 cubic feet per second.
- Crest length: 430 feet.

Reservoir capacity:
- Flood control: 23,000 acre-feet.
- Water supply: 9,400 acre-feet.

Status, January 1, 1961: Construction not started.

Completion schedule:

Land acquisition	June 1964.
Relocations	December 1963.
Dam	June 1964.
Access road	June 1964.
Buildings, grounds and utilities	June 1964.
Entire project	June 1964.

Justification: The Littleville Reservoir would be operated as a unit of the comprehensive plan for flood control in the

Connecticut River Basin and as such would provide flood reductions to downstream damage centers on the Westfield and Connecticut Rivers. The flood of August 1955 produced losses estimated at $9,160,000, the heaviest loss ever experienced in the Westfield River area downstream of the Knightville and Littleville Reservoirs. Flood protection is urgently needed for Huntington and Westfield, Mass., and other major damage centers on the Westfield and Connecticut Rivers to augment the partial protection provided by the existing projects.

Fiscal year 1962: The requested amount of $300,000 will be applied as follows:

Initiate land acquisition	$100,000
Initiate construction of dam	25,000
Engineering and design	153,000
Supervision and administration	22,000
Total	300,000

Expenditure of these funds will provide for economical prosecution of the project during the fiscal year.

Non-Federal costs: Local interests are required to reimburse the Federal Government for costs allocated to water supply storage over a period not to exceed 50 years after use of this storage begins. The reimbursement required has not been determined.

Status of local cooperation: The city of Springfield, Mass., has furnished assurances for participating in the cost of the project including provision for future water supply and has filed the required petition with the State legislature.

Comparison of Federal cost estimate: The current Federal cost estimate of $7 million is an increase of $1,510,000 over the latest estimate submitted to Congress. The increase is due primarily to present consideration of a dual-purpose project in accordance with the 1958 Water Supply Act.

Mr. Chairman, the other New England construction projects follow:

HOPKINTON-EVERETT RESERVOIR, N.H.

(Continuing)

Location: The site of the Hopkinton Dam is on the Contoocook River, 17.3 miles above its junction with the Merrimack River and about one-half mile upstream from the village of West Hopkinton. The site of the Everett Dam is on the Piscataquog River, 16 miles above its junction with the Merrimack River, and about 1.3 miles southeast of the village of East Weare.

Authorization: 1938 Flood Control Act.

Benefit-cost ratio: 1.9 to 1.

Summarized financial data:

Estimated Federal cost	$22,600,000
Estimated non-Federal cost	----------
Cash contribution	----------
Other costs	----------
Total estimated project cost	22,600,000
Appropriations to June 30, 1960	6,310,000
Appropriations for fiscal year 1961	7,670,000
Appropriations to date	13,980,000
Appropriations requested for fiscal year 1962	6,200,000
Balance to complete after fiscal year 1962	2,420,000

Accumulated percent of estimated Federal cost:

Appropriations to date	62
Appropriations requested for fiscal year 1962	90

Physical data

	Hopkinton	Everett
Dam:		
Type	Earth fill	Earthfill.
Height	76 ft.	115 ft.
Length	790 ft.	2,000 ft.
Spillway:		
Type	Overflow	Overflow.
Capacity	59,700 c.f.s.	28,500 c.f.s.
Crest length	300 ft.	180 ft.
Canals:		
Length	3,500 ft.	13,500 ft.
Width	120 ft.	160 ft.
Dikes:		
Length	9,600 ft.	6,400 ft.
Height	77 ft.	50 ft.

Reservoir capacity: Flood control, 157,300 acre-feet.

Status, Jan. 1, 1961

	Percent complete	Completion schedule
Land acquisition	66	June 1962.
Relocations	36	December 1962.
Dam:		
Everett	61	September 1962.
Hopkinton	19	September 1963.
Dam closure:		
Everett	----------	September 1960.
Hopkinton	----------	July 1962.
Entire project	46	September 1963.

Justification: The Hopkinton-Everett project is an important unit in the comprehensive plan of improvement for flood control in the Merrimack River Basin. This project, together with the three completed reservoirs, will control about 32 percent of the total drainage area of the Merrimack River Basin. Construction of this reservoir is required, in addition to the completed reservoirs, to reduce flood stages to below the grade of dikes at those downstream cities now having local protective works. The downstream protective works will continue to provide a false sense of security until the complementary upstream storage insures adequate control of floodwaters. It is estimated that upon a recurrence of the 1936 and 1938 floods, the Hopkinton-Everett project would reduce stages at Manchester, N.H., by 4 feet and 3.4 feet, respectively, and at Lowell, Mass., by 3 feet and 2.6 feet, respectively. Under present conditions of development, without Hopkinton-Everett protection, these floods would cause $163,700,000 and $53,600,000 in damages, respectively, of which the project could prevent $40 million and $17,400,000 respectively. About 200 industries, producing woolen, cotton and synthetic textiles, mica products, paper, and paper box products, gypsum board, shoe machinery, plastics, and electronic equipment, would benefit from this protection. Annual flood control benefits for the project are estimated at $1,800,000.

WESTVILLE RESERVOIR, MASS.

(Continuing)

Location: The project is located on the Quinebaug River, a tributary of the Thames River in the towns of Southbridge and Sturbridge, Mass., 0.75 mile upstream from the Massachusetts Route No. 131 bridge crossing of the Quinebaug River in Southbridge, Mass., and 56.7 miles upstream from its confluence with the Shetucket River.

Authorization: 1941 Flood Control Act.

Benefit-cost ratio: 1.4 to 1.

Summarized financial data:

Estimated Federal cost	$5,882,000
Estimated non-Federal cost	----------
Cash contribution	----------
Other costs	----------
Total estimated project cost	5,882,000
Appropriations to June 30, 1960	4,182,000
Appropriations for fiscal year 1961	2,455,000
Appropriations to date	4,182,000
Appropriations requested for fiscal year 1962	1,700,000
Balance to complete after fiscal year 1962	----------

Accumulated percent of estimated Federal cost:

Appropriations to date	71
Appropriations requested for fiscal year 1962	100

Physical data

Dam:
- Type: Earthfill.
- Height: 78 feet.
- Length: 560 feet.

Reservior capacity:
- Flood control: 11,000 acre-feet.
- Operating pool: 100 acre-feet.

Spillway:
- Capacity: 24,000 cubic feet per second.
- Crest length: 200 feet.
- Type: Ogee weir, chute in rock.

Status, Jan. 1, 1961

	Percent complete	Completion schedule
Land acquisition	32	December 1961.
Relocations	2	Do.
Dam	23	February 1962.
Dam closure	----------	November 1960.
Entire project	25	February 1962.

Justification: The Westville project is a unit of the authorized plan for flood control in the Thames River Basin. The flood of August 1955 caused damages amounting to $61,680,000 in this basin. Had the Westville Dam been in operation at that time, damages amounting to $5,500,000 would have been prevented on the Quinebaug and Shetucket Rivers.

In combination with the East Brimfield project, the Westville project will provide substantial protection for Southbridge, Mass., and a large measure of protection for other downstream communities, including Putnam, Danielson, Jewett City, and Norwich, Conn., industrial and business centers on the Quinebaug and Thames Rivers.

Fiscal year 1962: The requested amount of $1,700,000 will be applied to:

Initiate and complete recreational facilities and operating equipment	$48,000
Complete construction of dam, reservoir, access road, and buildings, grounds and utilities	539,800
Complete land acquisition	466,600
Complete relocations	528,100
Engineering and design	4,000
Supervision and administration	113,500
Total	1,700,000

Expenditure of these funds will provide for completion of the project during the fiscal year.

Non-Federal costs: None.

Status of local cooperation: None required.

Comparison of Federal cost estimate: The current Federal cost estimate of $5,882,000 is a decrease of $878,000 from the latest estimate ($6,760,000) submitted to Congress. The decrease is based on award of the multi-component contract for the dam and appurtenant works, and on a reduction in land acquisition costs.

NEW BEDFORD, FAIRHAVEN AND ACUSHNET BARRIERS, MASS.

Location: The project is located in New Bedford-Fairhaven Harbor, Mass., on the southern coast of Massachusetts.

Authorization: 1958 Flood Control Act.

Benefit-cost ratio: 1.7 to 1.

Summarized financial data:

Estimated Federal cost	$11,500,000
Estimated non-Federal cost	7,320,000
Cash contributions	7,150,000
Other costs	170,000
Total estimated project cost	18,820,000
Appropriations to June 30, 1960	700,000
Appropriations for fiscal year 1961	----------
Appropriations to date	700,000
Appropriations requested for fiscal year 1962	500,000
Balance to complete after fiscal year 1962	10,300,000

Accumulated percent of estimated Federal cost:

Appropriations to date	6
Appropriations requested for fiscal year 1962	10

Physical data

Main harbor barrier: Type, earth and rockfill; length, 4,500 feet; average height, 20 feet.

Navigation gates: Structure, reinforced concrete; gates, sector; size, 2 leaves 59 feet high by 95 feet outer circumference; mechanism, electric motor driven; clear opening, 150 feet.

Clark Cove and New Bedford dikes: Type, earth and rockfill; length, 10,300 feet; average height, 10 feet.

Fairhaven dike: Type, earth and rockfill; length, 3,100 feet; average height, 13 feet.

Pumping station: Number, 1; structure, reinforced concrete; size, 80 by 30 feet; number of pumps, 4; capacity (each), 55,000 gallons per minute at 20-foot head.

Status Apr. 1, 1961

	Percent complete	Completion schedule
Bypass channel	Not started	December 1962.
Levees and floodwalls	do	March 1965.
Pumping plant	do	June 1964.
Buildings, grounds, and utilities.	do	December 1964.
Entire project	do	March 1965.

Justification: The project will provide full protection for over 1,260 acres in New Bedford, Fairhaven, and Acushnet, Mass., from storm tide flooding. The project will protect the heavily industrialized portion of these communities.

The New Bedford-Fairhaven area has experienced heavy tidal-flood losses in recent hurricanes. The harbor, being open to Buzzards Bay, is particularly susceptible to the onslaught of tidal surges accompanying northward moving hurricanes.

At current price levels, flood losses are estimated at $33 million for a recurrence of the September 1938 hurricane and $31,100,000 for a recurrence of the August 1954 hurricane. The project would prevent $31,800,000 and $30,130,000 of these damages, respectively. This represents practically complete protection for 80 percent of the area flooded during past hurricanes in the New Bedford-Fairhaven area, and a reduction of 97 percent of the losses due to the record hurricane of 1938.

Fiscal year 1962: The requested amount of $500,000 (Federal funds) will be applied to:

Construction of bypass channel	$160,000
Engineering and design	300,000
Supervision and administration	40,000
Total	500,000

Non-Federal costs: The initial investment required of local interests in construction of the project is estimated at $7,320,000, broken down as follows:

Lands and rights-of-way	$125,000
Relocations	45,000
Contributions (30 percent of total estimated cost, less the cost of lands, damages, relocations, and preauthorization studies)	5,440,000
Contribution in lieu of maintenance and operation of main harbor barrier	1,710,000
Total	7,320,000

Local interests are required to maintain and operate the entire project, except the main harbor barrier, upon completion. The estimated annual cost for maintenance and operation is $72,000.

Status of local cooperation: Informal assurances of local cooperation have been received. Legislation has been prepared and is under consideration in the Massachusetts General Court to authorize State assistance in meeting the requirements of local cooperation. It is expected that all requirements of local cooperation will be met.

Comparison of Federal cost estimate: No change from the latest estimate submitted to Congress.

EAST BRANCH RESERVOIR, CONN.

(New start)

Location: The project is located in the city of Torrington, Conn., on the East Branch of the Naugatuck River, 3 miles above its confluence with the West Branch.

Authorization: 1958 Flood Control Act.

Benefit-cost ratio: 1.4 to 1.

Summarized financial data:

Estimated Federal cost	$2,010,000
Estimated non-Federal cost	890,000
Cash contribution	----------
Other costs	890,000
Total estimated project cost	2,900,000
Appropriations to June 30, 1960	20,000
Appropriations for fiscal year 1961	150,000
Appropriations to date	170,000
Appropriations requested for fiscal year 1962	250,000
Balance to complete after fiscal year 1962	1,590,000

Accumulated percent of estimated Federal cost:

Appropriations to date	8
Appropriations requested for fiscal year 1962	21

Physical data

Dam: Type, rolled earth; height, 95 feet; length, 740 feet.

Outlet: Type, reinforced concrete, ungated; size, 38-inch diameter.

Spillway: Type, side channel; capacity, 22,000 cubic feet per second; length, 175 feet.

Reservoir: Flood control, 5,150 acre-feet.

Status January 1, 1961: Construction not started.

Completion schedule:

Relocations	December 1962.
Dam	December 1963.
Entire project	Do.

Justification: Flood protection is urgently needed for the Torrington area and that portion of the Naugatuck River upstream from the Thomaston Reservoir. Six major floods have occurred in the past 30 years. The greatest flood of record, August 1955, took six lives and caused damages amounting to $23,300,000. The East Branch and Hall Meadow Brook projects are the two reservoir units of the plan for flood control above the city of Torrington. Had both these reservoirs been in operation during the 1955 flood, they would have prevented $18,500,000 in damages. The East Branch Reservoir alone would have prevented damages in the amount of $5,900,000

Fiscal year 1962: The requested amount of $250,000 will be applied to:

Initiate road relocation	$180,000
Engineering and design	45,000
Supervision and administration	25,000
Total	250,000

Expenditure of these funds will provide for economical prosecution of the project during the fiscal year.

Non-Federal cost: The initial investment required of local interest in construction of the project is estimated at $890,000 for lands, easements, and rights-of-way.

Local interests are required to operate and maintain the project upon completion. The annual cost for maintenance operation is estimated at $2,000.

Status of local cooperation: In 1957 the Connecticut Legislature authorized a bond issue for the purpose of fulfilling all local assurances for East Branch Reservoir.

Comparison of Federal cost estimates: No change from the latest estimate submitted to Congress.

HALL MEADOW BROOK RESERVOIR, CONN.

(Continuing)

Location: The damsite is located in the city of Torrington, Conn., on Hall Meadow Brook, 0.4 mile above its confluence with the West Branch of the Naugatuck River.

Authorization: 1958 Flood Control Act.

Benefit-cost ratio: 3.1 to 1.

Summarized financial data:

Estimated Federal cost	$2,373,000
Estimated non-Federal cost	570,000
Cash contributions	----------
Other costs	570,000
Total estimated project cost	2,943,000
Appropriations to June 30, 1960	233,000
Appropriation for fiscal year 1961	940,000
Appropriations to date	1,173,000
Appropriations requested for fiscal year 1962	1,200,000
Balance to complete after fiscal year 1962	----------

Accumulated percent of estimated Federal cost:

Appropriations to date	49
Appropriations requested for fiscal year 1962	100

Physical data

Dam:

Type: Earthfill.

Height: 73 feet.

Length: 1,200 feet.

Spillway:
Type: Ogee.
Capacity, cubic feet sper second: 19,200.
Crest length, feet: 100.
Reservoir capacity:
Flood control (acre-feet): 8,620.
Permanent pool (acre-feet): 210.

Status, Apr. 1, 1961

	Percent complete	Completion schedule
Relocations	8	November 1961.
Dam	1	June 1962.
Entire project	16	Do.

Justification: Flood protection is urgently needed for the Torrington area and that portion of the Naugatuck River upstream from the authorized Thomaston project. Damages in the area extending downstream from the proposed damsite on Hall Meadow Brook through Torrington to the upstream limit of the authorized Thomaston Reservoir area in the 1955 flood took six lives and caused losses of $23,300,000. Operation of the Hall Meadow Brook Reservoir project will provide flood protection for the Torrington area, will reduce flood flows in the West Branch of the Naugatuck River and, in combination with the authorized East Branch Reservoir, will reduce flood flows below the East Branch.

Fiscal year 1962: The requested amount of $1,200,000 will be applied to:

Complete road relocations	$340,000
Complete construction of dam, dike and diversion channel	754,000
Engineering and design	11,900
Supervision and administration	94,100
Total	1,200,000

Expenditure of these funds will provide for economical prosecution and physical completion of the project during the fiscal year.

Non-Federal costs: The initial investment required of local interests in construction of the project is estimated at $535,000 for lands and easements, $16,000 for relocation of utilities, and $19,000 for reservoir clearing, a total of $570,000.

Local interests are required to maintain and operate the project upon completion. The annual cost for maintenance and operation is estimated at $3,000.

Status of local cooperation: Local interests are required to provide, without cost to the United States, all lands, easements and rights-of-way necessary for the construction and operation of the project. In 1957 the Legislature of the State of Connecticut authorized a bond issue for the fulfilling of all local assurance for Mad River, Hall Meadow and East Branch Reservoirs. Land acquisition is underway.

Comparison of Federal cost estimate: The current Federal cost estimate of $2,373,000 is an increase of $163,000 over the latest estimate ($2,210,000) submitted to Congress. The change in estimate is based on completion of detailed design studies, including the addition of a diversion channel between the Hall Meadow Brook and Reuben Hart Reservoirs, offset in part by low bids for principal construction features.

MAD RIVER RESERVOIR, CONN.

(Continuing)

Location: The project is located in the town of Winchester, Conn., about 2.2 miles above the confluence with the Still River and about 0.3 mile northwest of the city of Winsted.

Authorization: 1958 Flood Control Act.
Benefit-cost ratio: 1.6 to 1.

Summarized financial data:

Estimated Federal cost	$5,430,000
Estimated non-Federal cost	670,000
Cash contributions	----------
Other costs	670,000
Total estimated project cost	6,100,000
Appropriations to June 30, 1960	261,000
Appropriation for fiscal year 1961	718,000
Appropriations to date	979,000
Appropriations requested for fiscal year 1962	1,800,000
Balance to complete after fiscal year 1962	2,651,000

Accumulated percent of estimated Federal cost:

Appropriations to date	18
Appropriations requested for fiscal year 1962	51

Physical data

Dam:
Type: Earthfill.
Height: 178 feet.
Length: 910 feet.
Spillway:
Type: Side channel.
Capacity: 29,500 cubic feet per second.
Crest length: 340 feet.
Reservoir capacity:
Flood control: 9,700 acre-feet.
Permanent pool: 188 acre-feet.

Status January 1, 1961: Construction not started.

Completion schedule:

Relocations	September 1962.
Dam	October 1963.
Entire project	Do.

Justification: Flood protection is urgently needed for the protection of Winsted, Conn., and downstream areas. Six major floods have occurred in the Mad River Basin since 1900. In the greatest flood of record, August 1955, seven lives were lost and damages downstream of the Mad River Dam site were over $18 million. The operation of the Mad River Dam and Reservoir would reduce flood damages in reaches of the Mad and Still Rivers downstream from the project to the confluence of the Still River and Sandy Brook.

Fiscal year 1962: The requested amount of $1,800,000 will be applied to:

Continue road relocations	$546,000
Continue construction of dam	1,077,000
Initiate reservoir clearing	5,000
Engineering and design	14,000
Supervision and administration	158,000
Total	1,800,000

Expenditure of these funds will provide for economical prosecution of the project during the fiscal year.

Non-Federal costs: The initial investment required of local interests in construction of the project is estimated at $645,000 for lands, easements, and rights-of-way, and $25,000 for relocation of utilities, a total of $670,000.

Local interests also are required to maintain and operate the project upon completion. The annual cost for maintenance and operation is estimated at $1,000.

Status of local cooperation: Local interests are required to provide, without cost to the United States, all lands, easements and rights-of-way necessary for the construction and operation of the project, and zone the channel through the damage areas to prevent further encroachments and to require removal and prevent replacement of obstructive or hazardous structures along the channel whenever they become obsolete. In 1957 the Legislature of the State of Connecticut authorized a bond issue for the fulfilling of all local assurances for Mad River, Hall Meadow and East Branch Reservoirs. Land acquisition by the State of Connecticut is underway.

Comparison of Federal cost estimate: The current Federal cost estimate of $5,430,000 is a decrease of $540,000 from the latest estimate ($5,970,000) submitted to Congress. The current estimate is based on detailed design studies.

PAWCATUCK, CONN.

(New start)

Location: The project is located on the Pawcatuck River at Pawcatuck, Conn.

Authorization: 1960 Flood Control Act.
Benefit-cost ratio: 2.1 to 1.

Summarized financial data:

Estimated Federal cost	$419,000
Estimated non-Federal cost	176,000
Cash contributions	86,000
Other costs	90,000
Total estimated project cost	595,000
Appropriations to June 30, 1960	10,000
Appropriations for fiscal year 1961	38,000
Appropriations to date	48,000
Appropriations requested for fiscal year 1962	371,000
Balance to complete after fiscal year 1962	----------

Accumulated percent of estimated Federal cost:

Appropriations to date	11
Appropriations requested for fiscal year 1962	100

Physical data

Dike: Type, earthfill; length and height, 2,386 by 15 feet.

Floodwall: Type, concrete T-wall; length and height, 208 by 10 feet.

Pumping plant: Structure, brick and concrete block; size, 25 by 33 feet; pumps, two 20,000 gallons per minute; sluice gates, two 4 by 4 feet.

Status January 1, 1961: Construction not started.

Dikes and floodwalls	June 1962.
Pumping plant	Do.
Entire project	Do.

Justification: The Pawcatuck project would afford complete tidal-flood protection to about 31 acres of industrial and residential property in Pawcatuck. The area contains the two largest industrial plants in Pawcatuck, as well as a number of dwellings. Nearly 50 percent of the total flood damages in the 1954 hurricane were sustained within the Pawcatuck area of protection, although geographically it covers about 2 percent of the entire flooded area. A recurrence of Hurricane Carol (August 3, 1954) with a flood stage of 10.4 feet above mean sea level would cause damages estimated at $920,000, at 1958 price levels, within the Pawcatuck protection area; and that of the 1938 hurricane would cause damages of $1,290,000. These damages would be entirely eliminated by completion of this project.

Fiscal year 1962: The requested amount of $371,000 (Federal funds) will be applied to:

Initiation and completion of dikes and flood walls	$250,000
Initiation and completion of pumping station	85,000
Engineering and design	7,000
Supervision and administration	29,000
Total	371,000

Non-Federal costs: The initial investment required of local interests in construction of the project is estimated at $176,000 broken down as follows:

Lands and rights-of-way	$80,000
Relocations	10,000

Non-Federal contributions (30 percent of total estimated cost less the cost of lands, damages, relocations and preauthorization studies)	86,000
Total	176,000

Local interests are required to maintain and operate the project upon completion. The estimated annual cost for maintenance and operation is $5,600.

Status of local cooperation: Officials for the town of Stonington and the State of Connecticut favor the project. It is believed that local requirements will be met when requested.

Comparison of Federal cost estimate: No change from the latest estimate submitted to Congress.

FOX POINT BARRIER, R.I.

Location: The project is located on the Providence River at Fox Point, in the city of Providence, R.I.

Authorization: 1958 Flood Control Act.

Benefit-cost ratio: 2.3 to 1.

Summarized financial data:

Estimated Federal cost	$11,944,000
Estimated non-Federal cost	5,076,000
Cash contributions	3,876,000
Other costs	1,200,000
Total estimated project cost	17,020,000
Appropriations to June 30, 1960	984,000
Appropriations for fiscal year 1961	752,000
Appropriations to date	1,736,000
Appropriations requested for fiscal year 1962	3,200,000
Balance to complete after fiscal year 1962	7,008,000

Accumulated percent of estimated Federal cost:

Appropriations to date	15
Appropriations requested for fiscal year 1962	41

Physical data

River barriers: Type, concrete gravity; length and height, 290 by 48 feet.

River gates: Structure, reinforced concrete; six, 148 by 61.5 by 58 feet high; gates, three—40 by 40 feet tainters; operating mechanism, electric hoist.

Cooling water canal: Size, 1,450 feet long by 70 feet to 150 feet wide; structure, steel and timber wall.

Pumping plant: Structure, reinforced concrete; size, 214 by 91 by 95 feet high; pumps, five—120-inch, 150-revolutions per minute; motors, five—4,300-horsepower electric; cooling water gates, two—10 by 15 feet, slide.

Land dikes: Type, earth with rock facing; length and height, 1,850 by 17 feet, maximum; gates, 3 vehicular.

Status, Jan. 1, 1961

	Percent complete	Completion schedule
Cooling water canal	1 percent	September 1961.
Levees and floodwalls	Not started	March 1964.
Pumping plant	do	Do.
Grounds and utilities	do	September 1963.
Entire project	1 percent	March 1964.

Justification: The Fox Point barrier will provide full protection for the center of Providence from storm-tide flooding. The barrier will protect the downtown area where 35 percent of the total experienced damage in the Narragansett Bay area has occurred.

The Narragansett Bay area has experienced heavy tidal flood losses in recent hurricanes. Hurricane tidal surges are funneled into the bay and flood densely populated and developed areas, especially in the vicinity of Providence, Newport, and Fall River. Flood losses are estimated at $120 million for the September 1938 hurricane and $92 million for the August 1954 hurricane. Over 250 lives were lost in Narragansett Bay and along the Rhode Island coast during the 1938 and 1954 hurricanes. It is estimated that a recurrence of a flood of 1938 magnitude under present economic conditions would cause over $42 million damage in the Fox Point protection area. These losses would be prevented by the project.

Fiscal year 1962: The requested amount of $3,200,000 (Federal funds) will be applied to:

Complete cooling water canal	$580,000
Continue contract for construction of remainder of project	2,360,000
Engineering and design	30,000
Supervision and administration	230,000
Total	3,200,000

Non-Federal costs: The initial investment required of local interests in construction of the project is estimated at $5,076,000, broken down as follows:

Lands and rights-of-way	$1,200,000
Non-Federal contributions (30 percent of total estimated cost less the cost of lands, damages, relocations, and preauthorization studies)	3,876,000
Total	5,076,000

Local interests are required to maintain and operate the project upon completion. The estimated annual cost for maintenance and operation is $93,000.

Status of local cooperation: In a letter dated September 10, 1958, from the mayor of Providence, R.I., local interests agreed to requirements of local cooperation.

The city of Providence has practically completed the real estate map and appraisals of the properties involved and has initiated land acquisition. Agreements have been reached with the city of Providence and the State of Rhode Island whereby the local cash contribution will be available as required.

Comparison of Federal cost estimate: The current Federal estimate ($11,944,000) is an increase of $518,000 over the latest estimate submitted to Congress ($11,426,000). This increase represents 70 percent (Federal share) of the total increase for the project and is the proportionate share of the increased cost for lands and damages, cooling water canal construction, and engineering and design.

Mr. Chairman, the other New England planning projects follow:

THREE RIVERS, MASS.

(Initiation of planning)

Location and description: The project is located at the confluence of the Swift and Quaboag Rivers with the Chicopee River in the town of Palmer, Mass. The project provides for channel improvement, modification of two highway and one railroad bridges and removal of the existing dam.

Authorization: 1960 Flood Control Act.

Benefit-cost ratio: 1.3 to 1.

Summarized financial data:

Estimated Federal cost	$1,270,000
Estimated non-Federal cost	460,000
Cash contribution	([2])
Other	460,000
Total estimated project cost	1,730,000
Preconstruction planning estimate	110,000
Appropriations to June 30, 1961	[1] 10,000
Planning allocation for fiscal year 1962	50,000
Balance to complete preconstruction planning after fiscal year 1962	50,000

[1] Preauthorization studies costs only.

[2] Local interests are required to assume at least 20 percent of the project cost, exclusive of costs for planning with credit allowed for the cost or fair value of items specifically required. No cash contribution is presently required.

Justification: Construction of the Three Rivers local protection project is required to reduce flood damages at the industrial center of the town. Four major floods have occurred since 1935. Two were in March 1936 and one each in September 1938 and August 1955. Recurrence of the August 1955 flood would cause damages estimated at $6,550,000 in the Three Rivers area, after reductions afforded by the existing Barre Falls Reservoir. The authorized Conant Brook Reservoir would prevent $2,140,000 of these recurring losses and the Three Rivers project would prevent $3,765,000.

Non-Federal costs: Local interests are required to assume at least 20 percent of the cost (except costs of planning, design, and acquisition of water rights) of the completed project, payable either as construction proceeds or pursuant to a contract providing for repayment with interest within 50 years. The actual cost, or fair market value of lands, easements, rights-of-way, and work performed or services rendered prior to completion of construction of the project, which are furnished by a non-Federal entity, shall be included in the share of the cost to be borne by the non-Federal entity. Local interests are specifically required to: Furnish all lands, easements, and rights-of-way for construction; make necessary alterations to roads, highway bridges, sewers, and utilities; obtain necessary rights to permit the United States to remove the New England Power Co. dam and powerhouse on the Chicopee River; hold and save the United States free from damages due to the constructions works; permit no encroachment on improved channels including the waterway areas under the bridges; and maintain and operate all the works after completion. The initial investment required of local interests in construction of the project is estimated at $17,000 for lands and damages, and $443,000 for relocations.

Status of local cooperation: Local interests are able and willing to furnish the necessary items of cooperation. The board of selectmen of the town of Palmer, Mass., has given assurances that the New England Power Co. has offered to deed the dam and powerhouse to the town for removal for flood control purposes and that the town will provide all other forms of local cooperation.

Comparison of Federal estimates: The current Federal cost estimate of $1,270,000 reflects an increase of $10,000 over the latest estimate submitted to Congress of $1,260,000. The increase is due to the inclusion of the costs of preauthorization studies.

WEST THOMPSON RESERVOIR, CONN.

(Initiation of planning)

Location and description: The project is located on the Quinebaug River in the town of Thompson, Conn., 2 miles upstream from the city of Putnam. The project provides for a rolled earthfill dam approximately 2,400 feet long with a maximum height of 70 feet above streambed, and an earth dike 400 feet long and 24 feet high. A side channel spillway, 313 feet long, would be constructed in rock on the right abutment. At spillway crest elevation 341 feet m.s.l., the reservoir would have a flood control storage capacity of 25,000 acre-feet.

Authorization: 1960 Flood Control Act.

Benefit-cost ratio: 1.3 to 1.

Summarized financial data:

Estimated Federal cost	$4,060,000
Estimated non-Federal cost	----------
Cash contributions	----------
Other costs	----------
Total	4,060,000

Preconstruction planning estimate	312,000
Appropriations to June 30, 1961	[1] 20,000
Planning allocation for fiscal year 1962	150,000
Balance to complete preconstruction planning after fiscal year 1962	142,000

[1] Preauthorization studies costs only.

Justification: West Thompson Dam and Reservoir is a unit in the comprehensive plan for flood protection for the Quinebaug River Valley. The plan includes four other reservoirs of which three are complete or essentially complete and one is under construction. Six major floods have occurred in the Quinebaug River Valley in the last 30 years causing widespread damage and disruption of the basin economy. The maximum flood occurred in August 1955. It took eight lives and caused damages in the amount of $55,550,000 at 1957 price levels. The four flood control reservoirs would have prevented $36,880,000 of this loss, had they been completed. Completion and operation of the West Thompson Dam and Reservoir would have prevented an additional $6,710,000 in damages.

Status of local cooperation: Local interests are required to zone, in accordance with State law and regulations, the channel through the downstream damage areas to prevent further encroachment and to prevent the replacement of obstructive or hazardous structures along the channel whenever they become obsolete. The State of Connecticut, through its water resources commission has established encroachment lines on the Quinebaug River. This action fulfills the requirements of local cooperation.

Comparison of Federal cost estimate: The current Federal cost estimate of $4,060,000 is an increase of $30,000 over the latest estimate submitted to Congress. The increase is an adjustment in the cost of supervision and administration due to a reanalysis of requirements.

STAMFORD, CONN.

(Initiation of planning)

Location and description: The project is located on the north shore of Long Island Sound about 20 miles east of New York City. The project provides for dikes and floodwalls extending from Cummings Park westerly across the East Branch, terminating in high ground on the easterly side of the West Branch of Stamford Harbor. Total length of dikes and floodwalls is about 10,700 feet. A gated navigation opening would be provided in the East Branch. A pumping station would be provided to evacuate interior drainage.

Authorization: 1960 Flood Control Act.

Benefit-cost ratio: 1.4 to 1.

Summarized financial data:

Estimated Federal cost (Corps of Engineers)	$3,080,000
Estimated Federal cost (U.S. Coast Guard)	14,000
Estimated non-Federal cost	2,556,000
Cash contributions	2,286,000
Other costs	270,000
Total estimated project cost	5,650,000
Preconstruction planning estimate	400,000
Appropriations to June 30, 1961	[1] 50,000
Planning allocation for fiscal year 1962	100,000
Balance to complete preconstruction planning after fiscal year 1962	250,000

[1] Preauthorization studies costs only.

Justification: The city of Stamford, Conn., has sustained heavy damage in the past due to tidal flooding caused by hurricanes and other great storms, and faces the continuing threat of similar damage in the future. The project will provide complete tidal-flood protection to about 460 acres of property in the city of Stamford, below an elevation of 11.0 feet mean sea level that were inundated in the hurricane of September 21, 1938, and August 31, 1954. A recurrence of the tidal flood of record would cause losses estimated at $5,790,000.

Non-Federal costs: Local interests are required to provide all lands, easements and rights-of-way; accomplish all modifications and relocations of buildings and utilities; bear 30 percent of the total first cost with credit allowed for the value of lands and relocations; contribute the capitalized value of annual maintenance and operation of the East Branch barrier, which will be operated by the United States; hold and save the United States free from damage due to the construction works; and maintain and operate all the works except the East Branch barrier after completion. The initial investment required of local interests in construction of the authorized project is estimated at $2,556,000, as follows: lands and damages $150,000, relocations (sewers) $120,000, cash contribution $1,406,000, and cash contribution in lieu of maintenance and operation of main harbor barrier, $880,000. The annual cost for maintenance and operation is estimated at $11,000.

Status of local cooperation: Assurances have not been requested. Local interests have expressed the opinion that all conditions of local cooperation would be met at the appropriate time.

Comparison of Federal cost estimates: The current Federal cost estimate of $3,080,000 and the latest estimate submitted to Congress are the same.

NORTHFIELD BROOK RESERVOIR, CONN.

(Continuation of planning)

Location and description: The damsite is located in Thomaston, Conn., on Northfield Brook, 1.3 miles upstream from its confluence with the Naugatuck River. The project provides for a rolled earthfill dam, approximately 800 feet long with a maximum height of 118 feet above streambed. A chute spillway with an ogee weir 70 feet long would be founded on rock in the right abutment of the dam.

Authorization: 1960 Flood Control Act.

Benefit-cost ratio: 2.0 to 1.

Summarized financial data:

Estimated Federal cost	$1,620,000
Estimated non-Federal cost	----------
Cash contribution	----------
Other costs	----------
Total estimated project cost	1,620,000
Preconstruction planning estimate	190,000
Appropriations to June 30, 1961	[1] 70,000
Planning allocation for fiscal year 1962	120,000
Balance to complete preconstruction planning after fiscal year 1962	----------

[1] Includes $10,000 preauthorization studies costs.

Justification: Construction of the Northfield Brook Dam and Reservoir is required as part of the comprehensive plan of flood protection for the Naugatuck River Valley. This valley comprises the largest nonferrous metal manufacturing area in the Nation; over one-third of the Nation's brass and bronze is produced in this area. A recurrence of the 1955 flood at 1958 price levels would have caused damages of $194 million in the area downstream from Thomaston Reservoir. The operation of the authorized Thomaston, Hall Meadow and East Branch Reservoirs together with the two small protection projects in the city of Torrington would have reduced the losses in this area by $149 million. The Northfield Brook Reservoir together with the remaining reservoirs making up the comprehensive plan, namely Black Rock, Hop Brook and Hancock Brook Reservoirs, would have prevented an additional $24,800,000 in damages.

Non-Federal costs: None required.

Status of local cooperation: Local interests are required to establish encroachment lines downstream from the dam to permit reasonable, efficient reservoir operation. State legislation permits the State water resources commission to establish encroachment lines. Such lines have been established on the Naugatuck River and no difficulty is anticipated on Northfield Brook.

Comparison of Federal cost estimates: No change from latest estimate submitted to Congress.

HANCOCK BROOK RESERVOIR, CONN.

(Continuation of planning)

Location and description: The project is located on Hancock Brook in the town of Plymouth, Conn., 3.4 miles upstream from its confluence with the Naugatuck River. The project provides for a rockfill dam approximately 615 feet long with a maximum height of 50 feet above streambed. A chute spillway with an ogee weir approximately 145 feet long would be founded on rock in the right abutment of the dam.

Authorization: 1960 Flood Control Act.

Benefit-cost ratio: 1.8 to 1.

Summarized financial data:

Estimated Federal cost	$2,520,000
Estimated non-Federal cost	----------
Cash contribution	----------
Other costs	----------
Total estimated project cost	2,520,000
Preconstruction planning estimate	230,000
Appropriations to June 30, 1961	[1] 95,000
Planning allocation for fiscal year 1962	135,000
Balance to complete preconstruction planning after fiscal year 1962	----------

[1] Includes $20,000 preauthorization studies costs.

Justification: Construction of the Hancock Brook Dam and Reservoir is required as part of the comprehensive plan of flood protection for the Naugatuck River Valley. This valley comprises the largest nonferrous metal manufacturing area in the Nation; over one-third of the Nation's brass and bronze is produced in this area. A recurrence of the 1955 flood at 1958 price levels would have caused damage of $194 million in the area downstream from Thomaston Reservoir. The operation of the authorized Thomaston, Hall Meadow and East Branch Reservoirs together with the two small local protection projects in the city of Torrington would have reduced the losses in this area by $149 million. The Hancock Brook Reservoir together with the remaining reservoirs making up the comprehensive plan, namely Northfield Brook, Hop Brook and Black Rock Reservoirs would have prevented an additional $24,800,000 in damages.

Non-Federal costs: None required.

Status of local cooperation: Local interests are required to establish encroachment lines downstream from the dam to permit reasonable, efficient reservoir operation. State legislation permits the State water resources commission to establish encroachment lines. Such lines have been established on the Naugatuck River and no difficulty is anticipated on Hancock Brook.

Comparison of Federal cost estimates: No change from latest estimate submitted to Congress.

COLEBROOK RIVER RESERVOIR, CONN.

(Initiation of planning)

Location and description: The project is located on the West Branch, Farmington River, in the town of Colebrook, Litchfield County, Conn., about 3.3 miles upstream from the confluence of the West Branch with the Still River. The project provides for an earth and rockfill dam approximately 1,160 feet long, with a maximum height of 211 feet above streambed, and an earth dike about 530 feet long to prevent reservoir overflow into Sandy Brook. At spillway crest elevation, 747 feet, the capacity of the reservoir would include 13,000 acre-feet in the Hogback Reservoir pool, 30,700 acre-feet of water supply storage and 50,800 acre-feet for flood control storage.

Authorization: 1960 Flood Control Act.

Benefit-cost ratio: 1.4 to 1.

Summarized financial data:

Estimated Federal cost	$11,300,000
Estimated non-Federal cost	[2]
Cash contribution	[2]
Other	
Total estimated project cost	11,300,000
Preconstruction planning estimate	570,000
Appropriations to June 30, 1961	[1] 20,000
Planning allocation for fiscal year 1962	50,000
Balance to complete preconstruction planning after fiscal year 1962	500,000

[1] Preauthorization studies costs only.

[2] Local interests are required to reimburse the Federal Government for costs allocated to water supply storage over a period not to exceed 50 years after use of this storage is initiated. The reimbursement has not been determined.

Justification: Construction of the Colebrook River Reservoir is required to reduce flood damages at population centers on the Farmington River. The addition of water supply storage will enable both features to be accomplished to mutual advantage. The operation of Colebrook River Reservoir together with the local protection reservoir at Sucker Brook will prevent $20,180,000 of the $29,430,000 flood losses which would occur in a recurring August 1955 flood (1958 base) after reductions made possible through operation of the Mad River Reservoir (under construction).

Non-Federal costs: Local interests are required to reimburse the Federal Government for costs allocated to water supply storage over a period not to exceed 50 years after use of this storage begins. The reimbursement required has not been determined.

Status of local cooperation: The Hartford (Conn.) Metropolitan Water District has expressed strong interest in the water supply features. The degree of local cooperation will be determined during project design.

Comparison of Federal cost estimates: Federal cost estimate of $11,300,000 is an increase of $4,300,000 over the latest estimate ($7 million) submitted to Congress. The increase is due to inclusion of the cost of water supply storage in the Federal project.

LOWER WOONSOCKET, R.I.

(Initiation of planning)

Location and description: The project is located on the Blackstone River and the tributary Mill and Peters Rivers in the city of Woonsocket, R.I. The project consists of three flood protection units, protecting the Social and Hamlet districts and an area in the vicinity of Bernon Dams. The project includes about 9,500 linear feet of levees and flood walls, 4,640 linear feet of channel improvement, 2,300 linear feet of reinforced concrete diversion conduit, and two pumping plants to dispose of interior storm drainage.

Authorization: 1960 Flood Control Act.

Benefit cost ratio: 1.4 to 1.

Summarized financial data:

Estimated Federal cost	$3,010,000
Estimated non-Federal cost	1,285,000
Cash contribution	570,000
Other costs	715,000
Total estimated project cost	4,295,000
Preconstruction planning estimate	290,000
Appropriations to June 30, 1961	[1] 20,000
Planning allocation for fiscal year 1962	130,000
Balance to complete preconstruction planning after fiscal year 1962	140,000

[1] Preauthorization study costs only.

Justification: Four floods of major proportions have been experienced since 1927. The greatest flood of record, August 1955, caused damage estimated at $12,300,000 in the Woonsocket area downstream from South Main Street. Flood protection is required for 270 acres of the highly developed, thickly settled area of Lower Woonsocket. This area, which was inundated in 1955, included more than 300 buildings of all types, housing more than 20 industrial concerns which employ some 2,800 persons. The project would reduce the average annual damages by about 65 percent and would permit increased utilization of the protected area. The project would prevent recurrence of much of the damage caused by recent storms.

Non-Federal costs: Local interests are required to furnish all lands, easements, and rights-of-way; perform all relocations of roads and utilities; hold and save the United States free from claims for damages; and operate and maintain the project after completion. In addition, a cash contribution of approximately 16.1 percent of the construction cost is required, owing to enhancement benefits to be realized.

Status of local cooperation: Assurances have not been requested. By letter dated April 1, 1957, the mayor of Woonsocket expressed the opinion that all conditions of local cooperation would be met at the appropriate time.

Comparison of Federal cost estimates: The present estimate of Federal cost of $3,010,000 is an increase of $40,000 over the latest estimate ($2,970,000) submitted to the Congress. An increase of $20,000 is due to inclusion of preauthorization study costs and $20,000 due to a reanalysis of the requirements for supervision and administration.

Mr. Chairman, under unanimous consent I include, at this point, a status report on New England flood control as of September 1961:

NEW ENGLAND FLOOD CONTROL STATUS REPORT, SEPTEMBER 1961

It has been 6 years since Hurricane Diane in August 1955 swept over New England bringing torrential rains, disastrous flooding, damages of over a half billion dollars, and taking 90 lives.

After the Diane flood, New England, with the assistance of the Congress, buckled down to the task of providing greater flood protection to the region. The 23 projects previously completed at a cost of $62 million, while a start on a protective plan, were woefully inadequate to protect life and property and the economy of New England.

In addition to disaster relief provided under Public Law 875, the Congress responded to needs evidence by their constituents in two ways. First, in a supplemental appropriation bill in the spring of 1956, it advanced funds for expediting design of authorized projects. Secondly, it provided funds for comprehensive flood studies in the area affected by the 1955 flood. It followed up these actions by orderly provisions of additional funds for study, design, and construction. This approach to the then immediate need and the long-range need has now borne fruit and can be seen in the successful advancement of protective works.

Since 1955, 11 reservoirs and 13 local protection projects costing a total of $83 million have been completed. Six projects valued at $52 million are now under construction, and six projects valued at $33 million are under design.

This 36 project program, costing $168 million, of dams, reservoirs, walls, dikes, tunnels, diversions and channel improvements, is spread over all six New England States.

Of the six projects under design, all authorized since 1955, four—Littleville and East Branch Reservoir and the hurricane protection projects at Pawcatuck, Conn., and New Bedford, Mass., are included in the fiscal year 1962 civil works budget for construction starts.

There are currently 13 other active authorized projects in New England with a cost of $50 million. All but two have been authorized since 1955. Funds for initiation of design for seven of these are contained in the fiscal year 1962 civil works budget.

The survey program is continuing to develop needed and economic flood protection. Five projects valued at $14 million have been recommended by the New England division engineer and are being processed through review channels to the Congress.

Detailed tabulations of projects completed, under construction, design, and for the future are attached.

FLOOD CONTROL PROGRAM IN NEW ENGLAND

[1] Multiple purpose—hurricane and shore protection and navigation.

Mr. JENSEN. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois [Mr. MICHEL].

Mr. MICHEL. Mr. Chairman, I shall confine my remarks today to the most controversial item in this appropriation bill—the upper Colorado River storage transmission lines.

The House of Representatives approved the upper Colorado River storage project on March 1, 1956, by vote of 256 to 136. This project had bipartisan support, as indicated by the fact that 136 Democrats and 120 Republicans voted in favor of the project as compared with 63 Democrats and 73 Republicans voting in opposition to the project. It may further be pointed out that the support was nationwide, with Representatives from New England, the Middle Atlantic States, and the East North Central States supporting the project just as strongly as Representatives from the 17 western reclamation States. For example, 23 Representatives from New England favored the project, as compared with 4 opposed; in the Middle Atlantic region, 56 Representatives supported the project as compared with 20 opposed; and in the East North Central region 44 were for and 37 against; for a total of 123 to 61. This is just about the same ratio as turned in by the 17 western reclamation States with their vote of 62 to 31 in favor.

For this reason, it may be said with some assurance that eastern support of the Upper Colorado River Basin storage project played a major role in the favorable enactment of this legislation. I emphasize this fact because due to the concentration of population in the East, the bulk of the money necessary to finance western reclamation projects must come from taxpayers in these more heavily developed industrial areas.

From a careful reading of the House debate, it is clearly evident that this support was given primarily because of eastern appreciation for the water needs of the States of the Upper Colorado Basin for irrigation, reclamation, and human consumptive needs. The East has been pretty reasonable about going along with western needs up to this time.

But the East, with every justification, is becoming more and more suspicious of what is happening under the banner of reclamation. This issue of transmission lines for the Colorado project is another instance of the misuse of reclamation to force another Federal power project on the Nation. This thinly disguised Federal power venture is not lost in the nonreclamation States and they are beginning to question these expenditures which are not directed at improving the Nation's food production capacity but at providing subsidized power for a privileged class of people. It might be well for the elected Representatives in the western part of the Nation to begin giving a little more serious thought to what they are doing to the future of the entire reclamation program.

No one questions the fact that revenue-producing hydroelectric power is necessary as an incidental byproduct to assist in repayment of the storage facilities at reclamation projects, as is the case in the Colorado River storage project.

Serious concern was expressed at the time this project was originally authorized that power production might become the tail that wags the dog by supplanting irrigation and reclamation as the primary purpose of the storage dams. This concern was minimized by the positive statement in House Report No. 1087, 84th Congress, 1st Session, that:

> The Department of the Interior advised the committee that it was sympathetic to the private companies' proposal and indicated that the suggestions would be given studied consideration if the project were authorized. Therefore, the committee expects the proposal by the private power companies for cooperation in the development to be carefully considered by the Department of the Interior and the electric power and energy of the project to be marketed, so far as possible, through the facilities of the electric utilities operating in the area, provided, of course, that the power preference laws are complied with; the project repayment and consumer power rates are not adversely affected.

That, however, was over 5 years ago and many changes have taken place in the Department of the Interior, the Bureau of Reclamation, and the Congress. We now find that the Federal Government is actively lobbying for the so-called all-Federal transmission system to deliver power from the dams in the upper Colorado River storage project to the Government's preferred customers.

This changing attitude of the individuals responsible for this Nation's basic reclamation program will cause those of us from the eastern section of the country serious second thoughts about the future of this program. The original upper Colorado River storage project was accepted—even though it did not specifically benefit the eastern section of the country—on the grounds that irrigation and reclamation would help us all. There can be no justification, however, for now using this project as a springboard for an all-Federal power system as another segment in an overall master plan to construct a nationwide Federal giant power grid. This does affect—and very adversely affect—other sections of the United States, for if Congress permits such a departure from existing policy it may well serve as a precedent for Federal transmission grids in the Southwest, the Southeast, the

middle-Atlantic region, the great Midwest, and even New England. The appetite of public power planners is insatiable until that day when the entire electric power supply of the Nation is controlled by a central bureau in Washington.

There is no doubt that the majority of us in Congress are in favor of full development and proper utilization of natural resources. However, it is equally certain that a majority of us in Congress are not in favor of the socialization of an industry. It seems to me that this is the basic issue underlying these controversies involving private versus public power.

There are those who might say this is an extreme term to use, that this really is not the issue, that there is no desire here to socialize the electric power industry. In this connection, I can only refer my colleagues to the CONGRESSIONAL RECORD of September 6 when the gentleman from Arizona [Mr. RHODES] inserted some correspondence he had received from the manager of a rural electric cooperative. This gentleman from the cooperative is very much in favor of the Federal Government building the transmission lines for the Colorado project.

With his letter of appeal to Mr. RHODES, the co-op manager enclosed an article from a magazine describing how British Columbia has just nationalized the electric power industry in that state—dictatorially, arbitrarily, and without even consulting the people of the state.

As our colleague notes, the gentleman from the cooperative "is applauding the very thing which many people have feared might be the end result of the predominance of public power in the United States."

Now, I will say this for the co-op manager, at least he is honest about his desire to see the electric power industry of this country socialized. Many of his coideologists go to great lenghts to deny this objective.

By means of twisted reasoning and logic they would have us believe that the end product of government displacing business is not socialism but something in the public interest, something which dispenses cheap power, and something which insures that the people benefit from resources development.

On all scores they are wrong. To anyone who has studied even rudimentary economics and politics, Government usurpation of the means of production is socialism and nothing else. Since the people of this Nation are not even being given a chance to express their will and vote on this issue, how can anyone say it is in the "public interest" for the Federal Government to get into the power business. Certainly, there is nothing cheap about Federal power when the true costs are analyzed and the extent of the hidden subsidies are exposed to the light of day. Finally, it is a very special and privileged class that is the recipient of Federal power. If this privileged class can be described as "the people," I would like to know how to describe the 80 percent of the Nation's power consumers who do not get power from Federal projects.

This Colorado transmission line issue seems to me to be a clear case of subverting the cause of reclamation to advance Federal power. It seems to me that the time has come to put a stop to this sort of thing. If Federal power proponents want the Federal Government to take over the power business, lock, stock, and barrel, then let them say so openly and let us get the American people in on the decision. My guess at this moment is they will unequivocally reject any such thought. If any proof of this is needed there are the results of the election last November. It will be recalled that the 17 western reclamation States in which Federal power has been made such a big issue overwhelmingly rejected the candidate whose party so strongly endorsed a greatly expanded program of Federal power. That being the case, let us not be responsible for giving the American people a socialized power industry by default—without their knowledge and without their approval.

Mr. KIRWAN. Mr. Chairman, I yield 10 minutes to the gentleman from Colorado [Mr. ASPINALL].

Mr. ASPINALL. Mr. Chairman, first of all I wish to thank the great chairman of the Committee on Appropriations and the members of his committee for the fine legislation they have brought before the committee at this time. I also wish to take just a moment—I wish I had longer—to thank the gentleman from Ohio [Mr. KIRWAN] for what I consider to be one of the most constructive of statements as to what is involved in the Colorado transmission line controversy.

I wish also to commend the gentleman from Tennessee [Mr. EVINS] and the gentleman from Massachusetts [Mr. BOLAND] and all the others who will speak in support of the additional appropriations for the construction of transmission lines for the Colorado River project. They have made an outstanding contribution.

I am particularly pleased that the committee has provided additional funds for more basic transmission lines for the upper Colorado River project. I have been advised that an amendment is likely to be offered to strike such new moneys from the provisions of this legislation. It is on this subject that I particularly desire to speak at this time.

May I say that nobody ever spoke more honest words than the gentleman from Tennessee [Mr. EVINS] when he said that the most expensive segments of the transmission lines and the less valuable as far as returns to the Federal Government are concerned, have already been started and are being constructed by the Federal Government; and, that the private utilities now wish to come in and take over, from this particular place in the construction, the advantages which, in my opinion, would amount to great value for the investor-owned utilities for which they would be investing very little in return.

I was highly flattered last week when one of my very able colleagues suggested that I try to explain in a couple of minutes just what is the problem involved. This request, on a matter on which scores of trained individuals have been hard at work for many months, brought once again to my attention what limitations of time we work under here in the National Congress but I shall do my best to meet my friend's request.

Now, just what is the problem. First, we must picture in our minds an area equal to 5 percent of the total area of our original 48 States, an area filled full of natural resource values just waiting to be tapped and to be used for the benefit of our national economy and welfare. To make possible such contribution by this area and its people the Colorado River Project Act was enacted and approved in 1956.

Let me take just a moment to reply to two or three statements that have been made here on the floor. I have heard those who are going to support the amendment state the position of the Upper Colorado River Commission as evidenced by a resolution from a meeting which the commission held in Denver on September 1, 1961.

Let me preface my answer thereto by the statement that the Upper Colorado River Commission has no jurisdiction in the particular matter of the controversy over transmission lines, although they are or should be interested in the question of who constructs such transmission lines and the return of net moneys to the basin fund. The commission has no sizable staff and it has made no extended study of this particular matter. Their engineer, who is reported to have spent 3 days studying the proposition, has said, I am advised, that he was unable to make a decision as between the various offers made to the Bureau of Reclamation by the public power group. According to my information, he is reported to have said that the reason he could not make any determination was that the assumptions made and the problems involved were just as different as apples from oranges. I think that we should be careful how we quote or evaluate the position of the Upper Colorado River Commission.

Let me read you a telegram which I received from the Governor of Colorado soon after the meeting of September 1 was held. It reads as follows:

DENVER, COLO.,
September 6, 1961.

HON. WAYNE N. ASPINALL,
Member of Congress,
House Office Building,
Washington, D.C.:

On September 1, 1961, the Upper Colorado River Commission adopted a resolution endorsing a proposal by various private power companies to permit those companies to construct, own, and operate major segments of the Colorado River storage project transmission system. A meeting of the commission was held in Denver, Colo., for this purpose, during my absence from the State. I am sure that you have already been advised of the commission's action.

The official agency of this State in matters pertaining to reclamation development is the Colorado Water Conservation Board. That board, after intensive staff study, adopted a resolution on August 2, 1961, endorsing the construction of the transmission system which heretofore has been approved by Secretary Seaton and Secretary Udall. I have already expressed my complete and continuing support of our State board's position.

The purpose of this communication is to advise you that the recent action of Colorado's commissioner on the Upper Colorado River Commission, who incidentally is my appointed representative to the commission, was undertaken without my knowledge or consent. The action was likewise taken without the knowledge, consent, or counsel of the Colorado Water Conservation Board, our official State agency.

I am also advised that the technical staff of the commission was never requested to make and therefore never made a recommendation on the important issue which was the subject of the commission's resolution.

I am further advised that the so-called new proposals of the private power companies were never made in writing until after the commission adopted its resolution. I also have information that members of the Upper Colorado River Commission met in secret session with officials of the private power companies in Salt Lake City, Utah, about a week before the official commission meeting of September 1, 1961. The proposals made at the Salt Lake City meeting were never communicated to me, to the commission's own staff, nor to the responsible State agencies.

We would be pleased to receive any new proposals by the interested private power companies and to have such proposals made available for review and recommendation by the appropriate State agencies, by the commission's own staff, and by the Secretary of the Interior. Until such proper reviews and recommendations are made, I shall forthwith ask the Upper Colorado River Commission to withdraw its resolution of September 1, 1961.

I have just communicated with Colorado's commissioner, Ed Johnson, who has agreed to join me in asking the Upper Colorado River Commission to reconsider its position. I will likewise ask our State water board immediately to reevaluate its position in light of the new private power companies proposal.

Until the foregoing action takes place, I wish to emphasize that the action of the Upper Colorado River Commission and of Colorado's commissioner thereon as herein described, was and is contrary to my position and to the official position of the State of Colorado.

Sincerely,

STEVE MCNICHOLS,
Governor of Colorado.

Accordingly, the resolution that was supposedly agreed upon, at the request of the representatives of the private utilities involved, is not firm and cannot be so considered.

There has been a statement made in this debate that the private enterprise system was in danger because of this particular program. Let me say that if the private enterprise system is in danger because of the proposal to permit the Federal Government to construct the necessary backbone transmission lines in this project then it has been in danger a long, long time, because if I remember correctly, every multiple-purpose irrigation and power project that has ever been authorized has carried with it the authorization for the necessary facilities for such generation together with the transmission facilities to carry that power to load centers—if transmission facilities were not already in existence to render the required service.

In other words, for some 30 years we have followed such a course and in my thinking no one can successfully make the cry of "socialism" or say with conviction that we are now approaching a new ideology—something other than the principle of the private enterprise system or capitalism, if you please, to which all of us give our adherence and loyalty.

There has been a statement to the effect that, perhaps, the nonreclamation areas are getting tired of financing some of these reclamation projects. I listened very attentively and very interestedly to the statement of the gentleman from Illinois. May I say that his predecessor who was here in the Congress at the time the vote was taken did not support the legislation authorizing the upper Colorado River project although his President advised him to do so. I can understand why the gentleman's predecessor might have been opposed to the project but it is my thinking that he was not opposed to the project because of the fact that it carried with it the authorization for the construction of power facilities in order to make possible the contribution to the basin fund of the necessary revenues to build the irrigation facilities of the project.

Mr. Chairman, I wish to state just as briefly as time will allow what I consider to be involved in this controversy. Under the reclamation law of 1902, we authorized the construction of those projects found by the Secretary to be economically, physically, and financially feasible. Such projects were single purpose projects—and that purpose was irrigation. Only a very few projects were authorized from 1902 on until 1939, which carried with them other facilities. I believe that those which did were authorized by separate authorization by the Congress. In each instance, history records that where generating facilities were authorized that transmission lines were also authorized to carry the power to the load centers providing already existing transmission facilities were not present. That is all that is involved in the matter now before this committee. There are no existing transmission lines, private or otherwise to load centers. The facts of the case are that many of us are willing that agreements for wheeling that are mutually advantageous to the upper Colorado River project and the private utilities, or the public power users, the preferred customers in the marketing area be entered into where such facilities are in existence and able to serve efficiently. In the Colorado River Project Act we authorized the construction, as speakers previous to me have said, of the necessary backbone transmission facilities just as had been done in previous authorizations. Not only that, we went even further—and it was language which I helped with, after listening to the private utilities—we placed language in the House report to the effect that wherever it was possible to enter into mutual agreements between private utilities and the Bureau of Reclamation for the wheeling of power in the marketing areas, we recommend that it be done. Now what has happened? The Bureau of Reclamation began the necessary studies for the construction of the required transmission lines soon after the project was authorized. Then they were requested by the representatives of the private utilities to make known to such utilities the plan which the Bureau had developed. It is a very involved process to determine what load centers there are going to be around an area and to determine how the power is going to flow. It taxes the abilities of the best trained engineers.

The investor-owned utilities in the area, five in number, pressed quickly—too quickly in fact—for the Bureau of Reclamation to announce its system—overall transmission system—so that the investor-owned utilities might make their offer. The transmission system was announced and the private utilities made their offer. It was studied by the Bureau of Reclamation and found not to be in the best interests of the Colorado River project and the people to be served thereby. This decision was made by Secretary of the Interior Seaton and later concurred in by Secretary Udall. The private utilities found themselves in trouble.

Then, after continuing study—and there must be further studies—the Bureau of Reclamation modified its original proposal. The investor-owned utilities then saw their opportunity and complained that the signals had been changed without taking the private utilities into consideration. So they, the private utilities, then proposed their own plan known as the combination plan which in effect served their interests primarily. In the meantime the "preferred customers" groups began making their ambitions known because under existing law they have first right to the use of the power generated at the Federal installations.

Then began, Mr. Chairman, one of the hottest lobbying battles that Congress has seen for a long, long time—national in scope. This controversy soon found itself before the Subcommittee on Public Works of the House Committee on Appropriations. The subcommittee was soon enmeshed with contentions, allegations, and figures. At the same time the committee had the responsibility of protecting the Federal investment and the integrity of the Colorado River project.

The committee has done an outstanding service to the Nation generally and to the reclamation program specifically in the conclusions that they have reached and the recommendation they have made to the Members of the House on this particular matter. Again, I commend them most heartily.

Mr. Chairman, I have appeared here in the well of this Chamber as a sincere, and, I hope, prepared advocate of the Colorado River storage project—an advocate who desires to see this great multiple-purpose water resource project make the contribution to our national economy and welfare, and security in some instances, that it can make if it is permitted to develop as originally proposed and planned, an advocate who desires this reclamation project to be treated in the same manner as other multiple water resource projects authorized and constructed before it, an advocate who believes that when public

moneys are spent or Government credit advanced, benefits received therefrom should flow to the people generally, an advocate who desires to keep his commitments to his colleagues who supported this undertaking more than 5 years ago by the overwhelming vote of 256 to 136.

Mr. Chairman, I do not find myself in the well of this forum for the purpose of defending or upholding in all particulars the activities of the Federal agency charged with the administration of this program. On the other hand I would say that in my opinion it is as honorable and constructive in its activities as any agency of Government. I might add that it is my opinion that the harsh words uttered on this floor last week against Commissioner Dominy and other personnel of the Bureau were ill advised and most unfortunate. Commissioner Dominy is an able and honorable public servant and deserves far better treatment than to be assailed in a forum where he is not privileged to answer personally.

This is not—and should not be so considered—a public versus private power controversy. I make this statement knowing full well that others contend contrawise. I would only suggest that if there are those who wish to make it a public power versus private power controversy, then in my opinion it is the overzealous in each instance who would make it such.

The one thing I do not want to see is for this potentially great project to be crucified on the yardarms of public or private power. Neither do I want to see it sacrificed on the altar of bureaucratic ambitions or legislative prejudices.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. JENSEN. Mr. Chairman, I yield such time as he may desire to the gentleman from New York [Mr. ROBISON].

Mr. ROBISON. Mr. Chairman, as some evidence that there is something else in this bill besides the upper Colorado River project, I call the attention of the committee to the language on page 5 of the report which specifically states:

> The funds provided include the budget amount of $80,000 for the north branch of the Susquehanna River survey. This survey is to be limited to a study of possible levee systems and channel improvements.

Mr. Chairman, as the sponsor of that survey resolution, which was approved by the House Committee on Public Works on June 9, 1960, I am seriously concerned that that limiting language may negate much of the value of the survey. I also am assuming that this limiting language is the outgrowth of certain local upstream opposition to several large dams or reservoirs that were authorized, some of them as long as 25 years ago, but never constructed. It was my hope that this survey would be comprehensive enough and being made in coordination with the Soil Conservation Service of the Department of Agriculture, would constitute an objective look at the continuing necessity and justification for those dams. It seems to me that that is the only vehicle we have with which to hope to resolve a longstanding dispute in a spirit of mutual compromise.

Mr. Chairman, I have talked with certain members of the committee on this subject, and I have their assurance that the committee will at a later time consider this limiting language, about which I can do nothing on the floor under this procedure, and that they will reconsider the justification for this language as soon as practicable.

Mr. JENSEN. Mr. Chairman, I yield the balance of the time to the gentleman from Arizona [Mr. RHODES].

Mr. RHODES of Arizona. Mr. Chairman, first I want to congratulate and compliment the members of the Subcommittee on Public Works of the Committee on Appropriations not only for the bill which they have brought out but for the high level of the debate which has occurred today. This is a great committee and a great subcommittee. It is headed by the chairman of the full Committee on Appropriations, the gentleman from Missouri [Mr. CANNON] and ably seconded by the gentleman from Ohio [Mr. KIRWAN]. On our side, of course, we have the gentleman from Iowa [Mr. JENSEN] who is as knowledgeable in this field as any Member of the House. Each of these gentlemen is a respected Member of the House. So, I think those of you who have listened carefully to their remarks will be well educated in this matter, which is controversial, to say the least.

I would like to set the record straight on one particular matter. I want it understood that I am a reclamation man. I believe very strongly in the program of reclamation; I have all of my life, and I always expect to believe very strongly in that program. Like the gentleman from Illinois [Mr. MICHEL] I think that reclamation will prosper and will expand as long as it continues to make sense to all of the country. One reason I am up here today is to do what I can to make sure that it does continue to make sense, so that the great water resources, the great power resources of our country, may be developed as they must be developed for the advancement of all of our people, all of the citizens of the great United States of America.

I must take exception, respectfully, to a term used by my good friend from Ohio [Mr. KIRWAN]. I do not believe that the people who want to build these transmission lines should be referred to as "muscle men," and I say this with all good humor to my friend. I was on the Interior and Insular Affairs Committee when this particular project was authorized, as was my good friend from Colorado [Mr. ASPINALL].

Mr. Chairman, when the testimony was taken for the upper Colorado storage project, all of these utilities came before the committee and testified. I might say to my friend from Colorado I do not remember their having made any difference between a backbone system and a system of transmission of power between market areas; I do not recall that the distinction was made. I do not really see how I could make it at the present time. They testified at the time on building a backbone transmission system for the upper Colorado storage project. Further, may I say to my good friend from Ohio that these people did not volunteer; these people were invited to come in by the Congress of the United States.

It is true that the preference customers do not want them. It is true that the Bureau of Reclamation apparently does not want them. The Congress of the United States did want them when the upper Colorado storage project was passed, as indicated by the hearings and the committee report. They have every right to be in this picture, and I submit they have made a proposition which the Government of the United States should not turn down.

It has been asked as to why the utilities want to build these transmission systems. I have asked this myself. We have heard people say the Government is building dams and now the utilities want to "skim the cream." This is not the true situation, and cannot be, because in the reclamation law there is what we call the "preference clause." A preference customer of power roughly defined, is a State, county, municipality, REA, or any public body which qualifies under the law, and under the law the preference customer gets all the power it can properly use. Preference customers in the upper Colorado storage project marketing area have applied for power which is in excess of the amount which will be distributed or distributable from the transmission facilities of the upper Colorado storage project. So there is no question of anybody but preference customers getting any "cream" from the production of this power. If anything is to be derived by the utilities from the building of these transmission lines it will have to be, then, from the lines themselves, from the wheeling or from some other condition which exists because of the fact that they built the lines.

What are they charging? They are charging approximately 1.1 mills per kilowatt-hour to wheel the power. This is figured to amortize the cost of the system, plus interest in about 50 years. This could hardly be called profiteering. It was indicated by my good friend from Tennessee, Mr. EVINS, that after the companies amortize the lines they will reap great sums of money because they will own the utility lines and will continue to charge the same amount for wheeling. This is not the situation, because after the utility lines are paid out then the only wheeling charge made is an amount equal to the local taxes paid plus operation and maintenance of the lines themselves; in other words, at the end of 50 years, or at the end of the pay out period, whichever occurs first, the wheeling cost goes down to a figure equal to the local taxes and the operation and maintenance charge.

Mr. EVINS. Mr. Chairman, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Tennessee.

Mr. EVINS. Will the gentleman deny that the utilities will be paid a wheeling charge in perpetuity as long as the lines last if the utilities proposal is adopted?

Mr. RHODES of Arizona. The only wheeling charge will be the actual cost to the utilities after the 50-year payoff period. The lines will have to be operated and as long as they are, there will have to be an operation and maintenance charge, no matter who builds these lines, the only difference is that utility-owned lines will continue to pay State and local taxes, whereas Government-owned lines will never pay such taxes. I do not object to that fact. I think it is very essential, that the localities be able to collect some taxes because of the existence of these lines.

So the only profit that the utilities can possibly get from the construction of these lines comes, then, from the operation of an integrated, multiple-purpose system of electric transmission. The Government and the utilities themselves will benefit from the existence of this type of system because it will mean less line loss to both of them as this particular project operates through the years. This saving must be shared.

It has been estimated that the Government will save as much as $55 million just by line loss alone if its power is thus transmitted by an integrated multiple-purpose system.

The Bureau of Reclamation has utterly refused to take this benefit into consideration in figuring the economics of the utilities proposal. This is only one of the great fallacies involved in the figures which the Bureau of Reclamation advances as a reason for rejecting the proposal of the utilities.

It has been said that if there is this great advantage in integration, Why does not the Government build the lines and have this advantage to itself? This could be done, if the Government pays the utilities any difference in benefit which results from the integration. It is impossible right now to tell how much this benefit will be worth. The utilities offered a package proposal. If they build the lines, integration will occur at no extra cost. However, if the Government builds the lines, then it desires to integrate, the benefit which occurs from integration will be subject to negotiation. It has been estimated by some that the benefits will be about equal. It has been estimated by more people, however, that the benefit to the Government will be somewhere in the neighborhood of $1 or $2 million a year in excess of the benefit to the utilities. This must be added to the cost of the upper Colorado storage project to determine the economic feasibility of the participating projects. If you do not accept the utility proposal, you cannot expect them to give something for nothing. If they get an advantage, from integration, the Government gets a commensurate advantage.

If the Government lets the utilities build the line, and later does not like the way the utilities are operating these lines, the Government has several outs. One would be to parallel the lines. That is not a very popular thing to do. This great committee, I am sure, would frown on such a proposal as that. There is another way, however. The Government can take over these lines by eminent domain. The Government under the Constitution and the law has the right to condemn the lines if the utilities do not operate them in accordance with the best interests of the taxpayer, the consumer, and everyone else who has a vested or legal interest in the upper Colorado River storage project. Do not think you are getting into a situation you cannot get out of. You can get out of it You can get out of it by the process of eminent domain, if by no other way.

I have said that all of the power will go to the preference customers. What will they pay for power? The preference customers will pay the same rate for this power, a postage stamp rate of 6 mills, no matter who builds the utility lines. This has been demonstrated time after time by testimony, as well as otherwise. Also, as far as the participating projects of the upper Colorado storage project are concerned, they will be paid out no matter who builds the lines. In fact, they will be paid out sooner if the utilities build the lines than if the Government builds the lines.

The gentleman from Ohio and I have separate sets of figures. We disagree on them, except I do not think the gentleman from Ohio has taken into account a fairly recent proposition involving a change in the wheeling rate after the 50-year payout period. This is what the figures show. In 50 years the utilities proposal will result in a net of $380 million in the way of a net revenue to the upper Colorado storage project over and above the amount which will accrue to that project if the Government builds the lines. At the end of 86 years that amount will be $477 million. In other words, all of the presently authorized participating projects will have been paid out and there will be $477 million left in the bank.

Mr. KIRWAN. Mr. Chairman, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Ohio.

Mr. KIRWAN. The committee and the Department of the Interior have taken into consideration the last offer. Has the gentleman another one that has not been officially offered to the Department of the Interior?

Mr. RHODES of Arizona. It is my understanding this offer was made to the members of the Upper Colorado Commission.

Mr. KIRWAN. Did they take it into consideration?

Mr. RHODES of Arizona. It was offered in the presence of the Upper Colorado Commission, and the commission then voted unanimously to endorse the utilities proposal.

Mr. KIRWAN. I do not think that an offer to the commission can be accepted as an official offer to the Federal Government.

Mr. RHODES of Arizona. Now, just a minute. The gentleman from Ohio should look at the law which authorized the project.

The Federal Government has by a compact agreed that there should be an Upper Colorado Commission. This is created by interstate compact. This is a very important board. It oversees the operation of the upper Colorado compact, which is the legal document which divides the waters of the Colorado River allocated to the upper basin States. I will have to state that the gentleman from Ohio [Mr. KIRWAN] and I must disagree on some of the figures involved in this particular presentation.

Mr. Chairman, another thing which we should take into consideration is the firmness of the figure offered by the Government for the construction of its transmission lines. The original yardstick system which was propounded by the Bureau of Reclamation and, incidentally, upon which Secretary Seaton made his findings, is a system which will not work. It was agreed by practically everybody that the yardstick system would not work. It would not transmit power.

So, we have here, then, a situation in which the Federal Government has never yet told this committee or any other committee exactly what plans it has for this transmission system. If we do not know what the transmission system is going to be like, we cannot know how much it will cost. We do not know what that cost might do to the economic feasibility of the upper Colorado River storage project. On the other hand, we do know what the cost will be, if the utilities are allowed to build the line. The cost will be an amount equal to about 1.1 percent of the wheeling cost for the first 50 years or——

Mr. EVINS. Mr. Chairman, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Tennessee.

Mr. EVINS. The gentleman will agree that there have been proposals and counterproposals and further reductions, and the further we fight this, the more the utilities reduce their prices offered to the Government.

Mr. RHODES of Arizona. This is one of the best reasons I can think of for not funding these lines this year. Maybe we ought to wait to see just how good a proposition we can get.

Mr. Chairman, since the gentleman from Tennessee [Mr. EVINS] has made this very valid point, perhaps we should take several looks at this particular project and make sure we are getting the best deal. Certainly we should make the Bureau of Reclamation put on paper in some way the lines it intends to build and firm up its marketing criteria, and also set a reasonable cost for the construction lines themselves. Very frankly, one reason why I must, as a Representative of Arizona, look askance at the plans of the Bureau of Reclamation is this: Their marketing criteria says they are going to market 600,000 kilowatts of energy in Arizona, but their plans call for a line going to Phoenix with 345 kilovolts capacity. I do not know how you are going to get 600,000 kilowatts of energy over a line with a 345-kilovolt capacity.

Mr. ASPINALL. Mr. Chairman, will the gentleman yield?

Mr. RHODES of Arizona. I yield to the gentleman from Colorado.

Mr. ASPINALL. I think that my colleague, the gentleman from Arizona [Mr. RHODES], will admit that there have been discussions had by representatives of the Arizonia Public Service Co., which is presently building a powerplant at Four Corners, and that under any kind of agreement which we hope will be arrived at, we will be able to coordinate the activities of this private utility of Arizona and the operations of the Bureau of Reclamation in the Colorado River program to the mutual advantage of all concerned.

Mr. RHODES of Arizona. The gentleman will have to admit, however, that that is conjecture, and it depends completely upon whether or not the proper ratio of benefits can be agreed upon and the proper contracts executed.

Is that correct?

Mr. ASPINALL. I think that is right, but I think that what has been proposed for the Glen Canyon and Four Corners facilities and what the Bureau of Reclamation wishes to do between Glen Canyon and Pinnacle Peak in the gentleman's area will not destroy either the future operations of the investor-owned facilities or the Bureau of Reclamation operation and will in fact aid the coordinated activities which have been proposed.

Mr. RHODES of Arizona. I am glad the gentleman from Colorado agrees that 600,000 kilowatts of electricity shall be marketed in Arizona.

Mr. MICHEL. Mr. Chairman, I ask unanimous consent that the gentleman from Massachusetts [Mr. CONTE], may extend his remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. CONTE. Mr. Chairman, included among the items in the public works apropriation bill for 1962 are two projects of interest to my constituents in the First Massachusetts Congressional District. These are $300,000 to commence the construction of the Littleville Dam, and $50,000 for planning local protective flood control projects on the Westfield River. I am very pleased, Mr. Chairman, that these two items are included in this appropriation bill now under consideration. The need for the Littleville Dam is unanimous, although many of the citizens of the area do have objection to the use of the reservoir as a source of water for the city of Springfield, Mass. It was their hope that the reservoir could be used for recreational purposes. However, being the good citizens that they are, they have sympathetic understanding of the water needs of their neighbors in Springfield.

Mr. Chairman, I want particularly to commend the committee for including in this bill the appropriation of $50,000 for planning urgently needed flood control projects on the Westfield River. In the past, floods on the Westfield have caused extensive property damage. The Army Corps of Engineers have recommended the construction of earth dikes and concrete floodwalls to eliminate the havoc resulting from these floods. This bill makes available the funds necessary to commence the planning of these projects.

Mr. KIRWAN. Mr. Chairman, I yield such time as he may require to the gentleman from Alabama [Mr. BOYKIN].

Mr. BOYKIN. Mr. Chairman, I wish to express regret that the Appropriations Committee deleted $275,000 for the acquisition of the Choctaw National Wildlife Refuge in connection with the Jackson lock and dam project in Alabama.

The committee, in reporting on this reduction in the budget estimate, said it was not satisfied with the justification offered by the Corps of Engineers and indicated the belief that if it is considered further, it should be justified by the Fish and Wildlife Service in its regular budget presentation to the Congress for the 1963 fiscal year. I am informed, however, that the proposed Choctaw refuge is to mitigate losses of wildlife habitat caused by inundation from the navigation pool and to enhance wildlife values at a most strategic point. Further, the proposed $275,000 item, which was deleted, properly belongs in the Corps of Engineers budget in accordance with the Fish and Wildlife Coordination Act which clearly provides for facilities such as this with funds to be supplied by the project agency. Moreover, the Choctaw refuge was specifically authorized in 1960.

Failure to acquire the lands likely will result in additional increased costs which, due to the Federal investment in this project, have gone up from $120,000 to the $275,000.

The Corps of Engineers and the Department of the Interior are in accord with the Choctaw project. The Alabama Department of Conservation plans to locate a wildlife management area adjacent to the refuge and strongly urges appropriation of the necessary funds.

Mr. Chairman, I hope that if the other body sees fit to include funds for the Choctaw refuge our House managers may reconsider the committee's action in conference.

Mr. KIRWAN. Mr. Chairman, I yield the balance of the time on this side to the chairman of the Committee on Appropriations, the gentleman from Missouri [Mr. CANNON].

Mr. CANNON. Mr. Chairman, the Committee on Appropriations had, as always, a large number of requests for appropriations for much needed projects throughout the country.

There is never enough money to go around, and that was particularly true this year because of the insistent demands of national defense.

So, reluctantly, regretfully, the committee has had to deny many meritorious requests for appropriations and as a result we report a bill considerably less than that reported last year.

And this bill carries the one vital item debated by every speaker here this afternoon—the provision for completion of the Federal power system by construction of the transmission lines to connect up the dams and centers of generation already installed or to be installed.

The question raised by the proposal to construct these lines is the most important question, outside of national defense, to come before the Congress this session. In its effect upon the future development of the country and upon the future welfare of the present and future American citizen it is the paramount question before the country today.

It touches every family in America. Every household in the Nation every month pays an electric power bill, and the amount of that bill increases every year as the demands for power increase in our increasingly intricate and complicated economy.

No other action that could be taken by Congress will affect so many so directly as this provision, not even the mails, because every day the tabulator on the electric meter is spinning day and night charging for current supplied in every family, to every consumer in America. It is ubiquitous and uniform—universal and omnipresent, in every household, urban and rural. The mailman knocks twice but the meter reader knocks until he is admitted. It is more certain than taxes and as inevitable as death.

As you may have noted, there are two classes of companies which are supplying this ever-accelerating demand. There is the investor-owned company widely advertised in the national magazines and there is the consumer-owned company provided for in this bill.

We deal here with the consumer-owned company. Of course, all national resources, including these powersites, rivers, water power, and their appurtenances, belong to the Nation, belong to the people, belong to the consumer. The investor-owned companies can secure them only by grant or purchase through Congress, including those provided for in the pending bill.

As explained in the report the Federal Government has elected to improve them and is now requesting funds to connect up the widely separated units to complete the grid.

But the investor companies are attempting to muscle in—"reaping where they have not sown and gathering where they have not strawed." They are interested in dividends—the highest rates obtainable to provide high returns on their stock. Service is secondary.

The consumer-owned companies are interested in service—at the lowest rates possible.

So, the issue here is whether we will support the consumer-owned company and provide lowest rates and cheapest electric service to every family in our respective districts or whether we will support investor-owned companies and high dividends to be paid, of course, by the consumer. That is the question pending in this amendment.

The statement has been made that there is an ulterior purpose here—to establish a Federal monopoly in the production and distribution of power. Nothing could be more absurd—and nothing could be further from the facts.

Never in the history of this House in all the flood of thousands of bills that

flow every session into the hopper, has a single bill been introduced by any Member even suggesting a Federal power monopoly. Never has any single Member of Congress, in either the House or the Senate, suggested either directly or indirectly—on the floor or off the floor—that there should be a Federal monopoly of power. We believe the bulk of the power business should be transacted by private companies, by private industry, by free enterprise.

What we insist on is that there should be sufficient public power to keep rates reasonable, to have a yardstick, to have a policeman on the corner, to have enough competition to control predatory rates and service.

There have been widely varying quotations of figures on both sides this afternoon. The committee has had before it, both in the last administration and in this administration, the best, most experienced, experts that could be secured. There can be no question about the accuracy and dependability of the accountants who have staffed the departments and bureaus of the two administrations and the committee accepts their figures. All computations show it would cost the taxpayer less for the Federal Government to build than to turn it over to private producers to build. The private companies have shifted their basis of computations from time to time but all estimates demonstrate a decided saving to the taxpayers through Federal construction.

They are trying to put up a tollgate on a necessity of life that is as indispensable to the average family as are air, water and sunlight. Today every family must have electricity, and Congressmen must see that they get it at as reasonable a rate as can be provided.

The cost of producing power is being steadily reduced through mass production and scientific and mechanical development. It costs less every year to produce electricity, but have you ever known a private utility voluntarily to reduce the cost to the consumer? In many of our municipally owned public power enterprises they give the consumer the December bill. In the Christmas month more electricity is consumed than in any other month. Many of them at the end of the year make the consumer a present of the December bill.

The other day the TVA announced a permanent reduction in rates. The announcement produced such an outcry on the part of the private utilities you would have thought TVA was suspending the writ of habeas corpus. Although the private companies in the TVA territory are doing more business and making more money than they ever made before TVA was built. We are producing and distributing power at a lower cost all the time and we are ready to give the customer the benefit of the saving. But the private utilities object.

If you vote for this amendment today you vote to turn our rivers and dams and generators over to a few men in the great centers of wealth, men largely subservient to Wall Street and eventually controlled by Wall Street capitalists. Don't tell us that Wall Street is a slogan. Capital in such sums cannot be negotiated anywhere else and the Wall Street Journal is a daily testimonial to the fact.

Now I am not decrying Wall Street or the Wall Street Journal. Both are adjuncts and factors in American enterprise and I take great pride in them. But I do not trust them to administer our national assets without proper safeguards and limitations.

If our powerplants are owned by the Government they will be under control of Congress. Any consumer who is not properly cared for has his recourse. He can appeal to his Congressman. But if the private monopolies are in control and rates are too high or service unsatisfactory he can "holler his head off" and no one will hear or care.

Once the power trust takes over our powersites, all control—all consumer right to redress—is gone forever. And in a generation we will have a superclass—an aristocracy of wealth—"economic royalists" as Franklin Roosevelt termed them—who neither toil nor spin but who clip coupons and draw dividends and fare sumptuously every day. And the rest of us will be serfs and coolies and peasants and lackeys. You can see it on every hand in Europe today.

This is the question with which we are really dealing when we vote to take our choice of investor-owned companies or consumer-owned companies as offered in the pending bill today.

I realize that when you come to strike a trial balance and figure where political expediency lies, the consumer cannot offer you much political return for your vote. The power trust keeps books. They will paste the rollcall in the ledger. They will remember how you vote. But the consumer, the housewife, the taxpayer the wage earner may not even know there was such a vote—or if they do know about it, will probably forget it before the next election. I must acknowledge it is rather a bleak outlook—rather a thankless stint. But we do know that while there is a large staff here of high-powered, high-paid public relations men to take care of the interests of the investor-owned companies, there is no one here to look after the consumer but you. They are under every roof in your district. They are engaged in a constant struggle against the ever-mounting high cost of living. Unless you protect them nobody will.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. DADDARIO. Mr. Chairman, this bill contains two sums, amounting to $150,000 and $140,000 respectively, to complete the engineering and design of a dam on the Quinebaug River in West Thompson, Conn., and the sum of $1.7 million to complete the construction, already in progress, of another dam at Westville, Mass., which is part of the Thames River Valley flood protection project.

I also want to present to this House the endorsement of these projects by the Honorable John Dempsey, Governor of Connecticut. Governor Dempsey was mayor of Putnam, Conn., when the devastating floods of 1955 struck his town. He knows from firsthand experience the need for better flood protection in the valley.

The case for these appropriations was presented to the Public Works Subcommittee of the Committee on Appropriations by Samuel T. Sheard, chairman of the Quinebaug-French River Manufacturers Association executive committee. This association represents about 75 business concerns, but speaks, I know, for the entire population of the valley.

Governor Dempsey wrote me to endorse fully the testimony of Mr. Sheard, and he added, and I quote:

> As a former mayor of Putnam, which alone suffered nearly $7 million in damage during the 1955 flood, I am highly aware of how greatly this protection is needed.

We have read in our newspapers today of the tremendous damage being inflicted by hurricanes and floods that have hit Galveston and the Texas coast. Our sympathy goes out to the stricken. The lesson of what water can do should reinforce our determination today to continue to make progress in protecting communities against such onslaughts.

Floods may be expected in the 1,474-square-mile Thames Riven Basin at any time of the year. Damages in the record flood of 1955, which was caused by torrential rains accompanying Hurricane Diane, were estimated at $62 million and eight lives. Operation of flood control works completed prior to that flood were estimated to have saved more than $4.3 million.

A general improvement program envisioned five to seven dams to give protection to the valley. Three of those dams are now complete. The fourth and fifth are those on which we may vote today, and I would earnestly urge that the House give its full support to these appropriations. The Engineers have recommended a new look at the other proposals.

I want to congratulate the Committee on Appropriations for its action in approving these recommendations by the Army Engineers and hope they are enacted into law.

Mrs. SULLIVAN. Mr. Chairman, the public works appropriation bill now before us is of great importance to St. Louis because it contains additional funds to continue work on our great floodwall to protect our city from future flood disasters. The committee has provided us with the full amount of the budget request, and I am grateful for that.

I am taking these few moments, Mr. Chairman, for the express purpose of getting on the record here today a fact which we in St. Louis are aware of, but which I think bears repeating. It is this:

If it were not for the gentleman from Missouri, CLARENCE CANNON, the chairman of the Committee on Appropriations, the dean of the Missouri delegation in the House, the most courtly gentleman any of us have ever had the good fortune to know, we would not now have a flood control project rapidly approaching effectiveness in St. Louis. We had to overcome the gravest delays of the Budget Bureau during the previous administration in getting an

initial appropriation to start the work. Congressman CLARENCE CANNON made it possible—used his great know-how and put his heart into this for us—and we in St. Louis are and will be eternally grateful.

As we prepare to end this session and return to our districts, I look around this Chamber and see many Members who have similar reason to be grateful for the kindness and legislative skill of the gentleman from Missouri, the Honorable CLARENCE CANNON, for saving numerous lives and untold property values of residents of their districts by helping to provide effective flood control.

Mr. Chairman, it is contrary to the rules of the House for me to turn and say personally to the gentleman from Missouri [Mr. CANNON] "Thank you from the bottom of my heart." If it were proper for me to do that under our rules, I would certainly do so.

Mr. BOW. Mr. Chairman, all of us who live in Canton, Ohio, and its environs are pleased to note that the funds required for a study of flood problems in our area are included in this measure.

This is an important step forward in an effort that began 2 years ago when unusually severe winter weather caused two successive and serious floods in Canton and nearby communities.

At my request, the House Committee on Public Works adopted a resolution authorizing the Corps of Engineers to conduct a review and study of our problem.

The corps proposes to study conditions on Sandy Creek and its tributaries including Nimishillen Creek in and near Canton.

The corps estimates that the study will cost $40,000. That amount is appropriated in the pending measure.

Canton's flood problem is one that was neglected for many years. As in so many other situations, little or nothing was done by the responsible officials of the city until disaster struck. We can only hope that the proposed studies may be completed and corrective action undertaken before we have other difficulties.

Mr. Chairman, the mayor and Stark County officials, local citizens' groups and others now assure me that they are prepared to cooperate fully in any plan proposed by the Corps of Engineers.

In this spirit and with the cooperation of the Federal Government, evidenced by the appropriation of this study fund, I am confident we can look forward to the day when residents of Canton and vicinity need have no fear of flood.

Mr. WEAVER. Mr. Chairman, I feel that there has been a great deal of confusion and far too much emotionalism injected into the general discussion of the transmission line business contained in this bill. It has become, in the minds of many, a public versus private power fight. This, it is not. It has become billed as a fight over governmental economy. It is not that, either.

First of all, there is no question in anybody's mind as to who will build the dams and powerplants to supply this million-plus kilowatts of power. That issue has long been settled. The plants on the upper Colorado River will be built by the Bureau of Reclamation and, under existing law, the power will go first to priority customers and then to nonpreference customers. This is a long-established and well-worked-out principle of law.

The Government is already supplying the power. Now the question is: Shall the Bureau carry its own power to marketing centers at which time it will be turned over to preference customers and to private utility firms?

As to the issue of Government economy, that does not exist here. Regardless of which party constructs the lines, the taxpayers will not be out one cent. Every penny of the costs of these transmission lines—if built by the Bureau—will be repaid to the Treasury. And, because this involves power and not irrigation, these repayments will contain an interest payment. So, in fact, the taxpayers will be ahead by Bureau construction.

The only question involved here is cost to the consumers. Under terms of the program worked out by former Secretary of the Interior Seaton and approved by former President Eisenhower, the consumers in the area—including the western part of my own State of Nebraska—will be getting the power at a little better than half a mill less than under the proposals worked out by the private power utility firms.

We are interested here only in providing electricity to a great number of consumers at the best possible rate while still looking out for the interests of the taxpayers. The only way we can accomplish both is through Bureau construction of these lines. I therefore am opposed to any amendment which would strike this provision from the bill.

Mr. JOHNSON of Wisconsin. Mr. Chairman, I am grateful for the opportunity to speak today in support of H.R. 9076, the 1962 public works appropriation bill.

This measure contains an appropriation of $247,000 for advance engineering and design of the long-awaited flood control dam on the Eau Galle River at Spring Valley, Wis., and an appropriation of $15,000 for a study of the proposed flood control project on the Trempealeau River at Arcadia, Wis.

Since I have spoken before you in previous years about the Eau Galle Dam, I will not take up your time by going into the details of this project. However, I would like to point out that the people of the Spring Valley and Elmwood area have suffered through three disastrous floods while waiting for almost 20 years for the proposed Eau Galle Dam to become a reality.

And when I say waiting, I do not mean that they have been idly waiting. Spring Valley has complied with all the stipulations set up by the Corps of Engineers as conditions for participation of the Federal Government in the project. Its citizens have even agreed to purchase the land for the reservoir.

I understand that the Federal Government usually bears this expense. However, the people of Spring Valley are so anxious to do everything possible to carry out this project that they readily agreed to buy the land for the reservoir.

Actually, the flood control project at Spring Valley was started way back in 1941, with a resolution of the Senate Committee on Commerce. World War II intervened, and a detailed survey report was not submitted to the Army Engineers until 1948. The project went before Congress in 1955 and received congressional approval in 1958, but no money was authorized until the following year.

Mr. Chairman, at this point, I would like to comment briefly on the need for the proposed flood control project on the Trempealeau River at Arcadia. Following disastrous floods in 1954, I initiated action to obtain flood control assistance for the people of the Trempealeau watershed. After a 2-year preliminary survey of the area, the Army Engineers recommended that the bulk of the flooding problems on the Trempeauleau River be solved by small watershed projects. However, they also recommended that levees be built at Arcadia.

Original plans called for including the cost of the levees under the small authorized program. However, when it was found that the total cost of constructing the Arcadia levees would exceed the $400,000 limitation on such projects, the Army Engineers requested funds for a detailed study of the proposed project.

In the civil works budget submitted to Congress in January by the outgoing administration, $10,000 had been recommended for study of the levee project at Arcadia. I was glad to see that the amended budget presented to Congress by President Kennedy added another $5,000, bringing the total to the $15,000 requested by the Corps of Army Engineers.

Mr. Chairman, I am fully, wholeheartedly supporting H.R. 9076 and funds for the Eau Galle and Trempealeau River projects. I know that approval of funds for these worthy projects will alleviate the fear of floods under which the residents of Spring Valley, Arcadia, and the surrounding area have lived for so many years.

Mr. KARTH. Mr. Chairman, I rise in support of the public works appropriation bill for 1962.

I think it entirely true that this bill is a liberal and progressive piece of legislation. For he who thinks we can stagnate at home while the world continues to move at its present tremendous speed, is one who obviously still lives in the 18th century. Public works projects are not pork barrel sops. As an illustration, I call to your attention the million-dollar item on page 17 of the committee report. More specifically this is the St. Paul and South St. Paul, Minn., flood control project. For many years these two contiguous areas of my State have been harassed by destructive floods. Human lives and property were in constant peril each spring during high water periods. This project will protect and enhance that area to a tremendous degree. A hundred and more acres are involved right in the heartland of St. Paul. For the first time this land will

provide a vast and valuable industrial park upon the project's completion. Industry can locate at the levee's edge to take advantage of cheap but extremely efficient water transportation 8 months out of each year. It will be on the very brink of St. Paul's great railroad center for shipping east, west, north, and south. Superhighways with new bridge construction assisting, will provide truck transport a ready and immediate access to and from the city. Adjacent to it will be St. Paul's Holman Field Airport. Every conceivable advantage will accrue to Ramsey County's half million people. Jobs will be added and prosperity will receive another shot in the arm under this administration's and this committee's leadership. In addition I personally thank my three colleagues, the gentlemen from Minnesota, Congressmen FRED MARSHALL and Congressman H. CARL ANDERSEN of the Appropriations Committee who have greatly assisted this St. Paul project and Congressman JOHN BLATNIK of the Public Works Committee. In closing let me again state the fact: What often is erroneously referred to as pork barrel, turns out to be a real community blessing for industry, labor, business, and all forms of commerce. It is good that wisdom, rather than slick slogans, prevail.

Mr. GRAY. Mr. Chairman, I want to take this opportunity to congratulate the chairman and members of the distinguished Committee on Appropriations for the excellent job they have done in bringing out the bill now before us. Public works in the fields of flood control, navigation, reclamation, and power development is most important to the social and economic well being of our country. We must continually strive to protect our great natural resources through prevention of floods and provide water and recreational facilities that are so vital to a growing population. I realize it is a difficult task for the Appropriations Committee to include every item requested by Members of the House; however, I believe the bill as presented, represents a fair approach.

I want to particularly thank the committee for allowing my request for $50,000 to continue the feasibility study of canalizing the Big Muddy River and Beaucoup Creek in southern Illinois. We have billions of tons of presently landlocked coal deposits with no economical way of marketing this coal at the present time. We must provide cheaper freight rates through navigation on the river if we are to realize the full industrial potential of southern Illinois.

The $50,000 provided in the appropriation bill, and a small amount next year, will complete this economic study. In an area suffering from high unemployment, it is certainly good to know that we can continue to find ways of utilizing our God-given natural resources to a good advantage.

In southern Illinois we had some unfortunate floods in May of this year and extensive crop damage was sustained on the inside of the Mississippi River levee due to inadequate internal drainage. I had hoped the committee would see fit to include adequate funds to study this important problem. However, as I have pointed out earlier, I realize the committee cannot comply with every request made. I am hopeful the U.S. Army Corps of Engineers will see fit to include funds in the fiscal 1963 budget request for this purpose. A river levee is adequate protection from river floods but causes severe damage to property. When drainage outlets are closed to prevent river water from backing up through the levee without adequate drainage from the internal side of the levee, the water cannot get into the river and, therefore, inundates land inside the river. We have spent millions on the Mississippi River levee from St. Louis, Mo., to Cairo, Ill., and the entire levee project is almost complete. However, the internal drainage problem has only been tackled in a few levee and drainage districts. Therefore, I hope the corps will be able to speed up this important phase of flood control work. In closing, I want to again thank the committee for their consideration and the excellent job they have done on this bill.

Mrs. PFOST. Mr. Chairman, I want to add my voice to those supporting this appropriation to initiate the building of power transmission lines for the Colorado River storage project.

This project, authorized by Congress in 1956, represents a sound program of regional development based on the area's most important river complex. Its impact will be felt in every State in the West, for the day is not far ahead when such regional projects will be linked together to meet power shortages wherever they may rise.

The more than 16 million folks in rural America who are served by electric cooperatives have a real stake in this fight as to who will build the transmission lines—the Federal Government or the private utilities. For what the private utilities want to do, in effect, is to set up tollgates so that they can charge power users some $3 to $5 million more yearly on their electric bills than would be charged otherwise.

This means out-of-pocket money for the average rural electric user in the five-State area—Wyoming, Utah, Colorado, Arizona, and New Mexico, who are directly involved in the project. I, frankly, would rather see the money spent on buying a needed tractor for the farm, or to build an addition to the house or barn, or to send a son or daughter to college.

This makes far more sense to me than to see this extra money go to private companies which are owned and controlled by big eastern interests.

But the private utilities, we should note, are not merely asking for blanket permission to build the transmission lines. What they want to do is build just certain ones—and let Uncle Sam worry about pushing lines into the more remote areas where costs of building the lines run extremely high.

I recall arguments used by the private power companies when the Rural Electrification Administration was born 26 years ago. They called it impractical and said their companies could not afford to build the lines and that the people would not pay for the service. Consequently, only 3 percent of American farms were electrified by 1925, and barely 11 percent when REA began operating. Now, thanks to REA, some 97 percent of our farms and ranches are served by electricity.

I mention these facts simply to put into perspective the arguments being advanced by the private utilities in connection with the administration's request for $13.6 million for planning the first phases of constructing some 3,000 miles of transmission lines by the Bureau of Reclamation.

What the companies want to do is build lines to service the major population hubs, and not bother with sparsely populated areas. In short, they not only want the cream, but they want the milk to go with it.

We must bear in mind that the folks who use the power generated in the $1 billion Colorado River storage project will repay to Uncle Sam the full cost of the dams, along with the cost of the transmission lines, plus interest. They do not need that middleman in there—the private power companies—scooping up the profits.

Congress made its position very clear with respect to the construction and operation of the transmission lines in the Colorado River project when Public Law 84–485 was passed 5 years ago. Section 1 specifically authorized the Secretary to build the lines. The plan was outlined by the Eisenhower administration on January 17, 1961. These plans were reaffirmed 2 weeks later by the Kennedy administration. It was on this solid bipartisan base that the funds were requested to carry out the intent of the act.

It has been estimated that 70 rural electric cooperatives are dependent on the power of Colorado Basin dams. Their service to individual farms is doubling every 7 years. The research services of the Agriculture Department predicts that consumption per farm will reach 5,600 kilowatt-hours annually by 1963 and 10,800 kilowatt-hours by 1975. Yet this use by families will represent only a small part of the power consumed in the five-State area.

Industry, particularly electronics plants, are making increasingly heavy demands. Important missile and other defense installations are also found in the area. The need for low-cost power thus becomes more obvious. The area, moreover, is said to contain great quantities of uranium, coal and other minerals, and the future development of this economic potential will be dependent in large part on the effective use of planning we make now for use of our water and power resources. Irrigation, of course, will add still another broad dimension to the project.

I, therefore, urge the Members to reaffirm the position taken by Congress in 1956 in support of an all-Federal system of transmission lines for the Colorado River storage project. The private utilities' plan goes counter to congressional intent and administrative decision. It would delay the repayment of the public's investment in the project and it

would extend the patchwork, jerry-built type of transmission and distribution systems that have long characterized the development by the investor-owned companies. These shortcomings might be tolerated if the net effect of private-Federal operation to the consumer were the same as an all-Federal system. But studies indicate conclusively that private operation would mean higher rates to consumers. This strikes me as just not being fair and square.

Under all-Federal development, the full potential of the Colorado River storage project will be used to the maximum in the best interests of the people and the Nation as a whole. I sincerely hope the Members will keep in mind the vision of a growing America, and defeat the move to delete the funds for the transmission lines.

Mr. ROUSH. Mr. Chairman, the bill we have before us today is one of vital importance to this Nation. It is important not only to us in this day, but it has unusual importance for the generations which will follow us. We place great emphasis on the great abundance of this land of ours and we rightly should be proud of it. Its preservation and careful use should be also part of our thinking.

Man, in this modern age, has found that he can, to a limited extent, harness the great forces of nature and use them to his advantage. I am referring specifically to our flood control projects.

In the Fifth District of Indiana three projects have been carefully planned to provide for the control of the floodwaters which have devastated our State periodically for years. These floodwaters have caused millions of dollars worth of damage. They have left people homeless. They have swept away our best top soil. They have caused the loss of life and have endangered hundreds of lives each year. Cities and other governmental units have struggled in vain to hold back these forces which nature has periodically unleashed against them. Now, with the construction of dams, they have an ally which will permit them to build, plan and feel secure in their attempts to bring progress to their communities.

The three dams planned for the Fifth District of Indiana are the Salamonie, Mississinewa, and Huntington Dams. Both the Salamonie and Mississinewa Dams are scheduled to have construction commence this fall or early next spring. This is dependent upon the inclusion of the funds earmarked for such construction being approved by this Congress.

I think it is advisable to point out what the construction of these projects will mean to my community. Of course, it will mean effective flood control which is of primary importance. But it will mean much more than this. The construction of the dams and reservoirs will bring millions of dollars into the Fifth District community. It will mean the employment of many men. The creation of the reservoirs will provide recreational benefits, the scope of which we have never experienced in our area.

The Mississinewa seasonal pool will cover 3,300 acres of ground. This is about the size of Lake Wawasee, Indiana's largest natural lake. The seasonal pool for the Salamonie Reservoir will cover approximately 2,700 acres and, if present plans should work out, the Huntington Reservoir would have a permanent pool of about 500 acres. The utilization of these reservoirs as recreation areas should be secondary to the real purpose of the dams, and that is, of course, to provide flood control. However, to fail to use the recreational potential to its fullest would be to deprive the public of a benefit which will be the natural consequence of the construction of the reservoirs.

These manmade lakes will provide fishing and boating facilities far beyond anything we presently have in Indiana. The shorelines will become a natural refuge for the wildlife which civilization is gradually causing to become extinct. These same shorelines will provide hunting grounds, picnicking areas and camping grounds for our ever-increasing population. It will become a sportman's paradise and the realization of the conservationist's dream.

Mr. Chairman, I cannot give strong enough emphasis to the need of these projects. I know of no domestic appropriation, other than those that deal directly with our national defense, which mean more to the people of Indiana and particularly to the people of the Fifth District than the appropriations included in this bill. The $53,000 included for the Huntington Reservoir will complete the planning of that project. The $500,000 included for the Mississinewa project will permit construction of the reservoir to commence. The $700,000 included for the Salamonie project will also permit the construction of that reservoir to start either this fall or early next spring.

When that first spadeful of dirt is turned, it will mean that the dream of many prominent Hoosiers will suddenly start to take the form of reality. Many of these men have for many years worked diligently and without easing on behalf of these projects. Time and time again some of them have made trips to Washington—at their own expense—to testify before our committees.

They are unselfish, dedicated men whose determination has made the need of these projects come to life and have such meaning that Congress is now acting. To enumerate all of these people would be impossible, but two men who have contributed so much to this effort deserve special mention. They are Ralph Roessler, of Marion, Ind., and Carlos Life, of Peru, Ind. It has been my good fortune to work with these men for the past 3 years and to have the benefit of their experience, their wisdom, and their counsel. There are no stronger advocates of flood control and the proper use and conservation of our water resources than these two men. The people of the Fifth District owe to them and their colleagues a real debt of gratitude.

In closing, Mr. Chairman, I want to emphasize that this is not the end of our effort to improve Indiana. It is only the beginning of the final phase of a long hard effort. There are many problems ahead. The completion of these projects at the earliest possible date is a must. This means the appropriation of sufficient funds each year to permit the capabilities of the engineers to be used to their fullest. This I urge. And while watching these projects take form, I respectfully request the cooperation of the membership of this House in our efforts to take every possible step to relieve all areas of the Fifth District of their flood problems, their drainage problems, their water problems, keeping in mind that we must protect and conserve our natural resources for the benefit of the generations which will follow us.

Mr. BENNETT of Florida. Mr. Chairman, I wish to express my gratitude to the Appropriations Committee for approving an item for $50,000 for study and planning of the Cross-Florida Barge Canal. Although I had hoped that the committee would approve the full budgeted amount of $195,000, I am grateful for what was allowed and I hope before the legislation becomes law it may be for the larger amount. In any event, I feel that we should bear in mind that this project is not only of value to our country because of its economic values but also and in fact primarily because of its defense values. There is in war times no other practical way to move petroleum economically from the western oil producing areas to the eastern consuming areas. This is of great vitality to our national defense and we should get on with the construction of this canal for this defense reason if none other.

The Clerk will read the bill for amendment.

The Clerk read as follows:

TITLE I—CIVIL FUNCTIONS, DEPARTMENT OF THE ARMY

Cemeterial expenses

Salaries and Expenses

For necessary cemeterial expenses as authorized by law, including maintenance, operation, and improvement of national cemeteries, and purchase of headstones and markers for unmarked graves; purchase of four passenger motor vehicles, of which three shall be for replacement only; maintenance of that portion of Congressional Cemetery to which the United States has title, Confederate burial places under the jurisdiction of the Department of the Army, and graves used by the Army in commercial cemeteries; $10,440,000: *Provided*, That this appropriation shall not be used to repair more than a single approach road to any national cemetery: *Provided further*, That this appropriation shall not be obligated for construction of a superintendent's lodge or family quarters at a cost per unit in excess of $17,000, but such limitation may be increased by such additional amounts as may be required to provide office space, public comfort rooms, or space for the storage of Government property within the same structure: *Provided further*, That reimbursement shall be made to the applicable military appropriation for the pay and allowances of any military personnel performing services primarily for the purpose of this appropriation.

Mr. HOLIFIELD. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. HOLIFIELD. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] One hundred and five Members are present, a quorum.

Mr. SAYLOR. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I would like to have the attention of the gentleman from Ohio [Mr. KIRWAN] and the chairman of the full committee, the gentleman from Missouri [Mr. CANNON].

On page 34 of the report appears the following:

Pump-back storage units: The committee is convinced that there is considerable potential for enhancing the economics of some Bureau and Corps reservoir projects with the installation of pump-back storage units for generation of electric power. Up to $150,000 of the available funds under this appropriation are to be used to begin a survey of the potential of this type of development on reservoirs for which the Secretary of the Interior is the marketing agent for hydroelectric power, including those in the Southwestern Power Administration area.

I would like to know under what act of Congress the Committee on Appropriations included that $150,000 in this bill. It is my understanding that before any appropriation is to be included in this or any other bill there must be a legislative act to cover it, and I would like to find out what bill this is covered under.

Mr. EVINS. Mr. Chairman, if the gentleman will yield, the Flood Control Act of 1934, I will say to the gentleman.

Mr. SAYLOR. I would like to say to the gentleman that I do not know who the solicitor is for your committee, but he can look over the Flood Control Act of 1934 until he is blind and he will not find any authorization.

Mr. EVINS. The 1944 act.

Mr. SAYLOR. Or the 1944 act, and he will not find any authorization for this.

And in addition this is an authorization to the Secretary of Interior not the Army Engineers.

The reason that I would like to call your attention to it, it seems that Mr. Wright, who happens to be the Administrator of the Southwestern Power Administration, admits he has no authority for it; that there is absolutely no legislation for it. The Library of Congress can find no legislation for it. And, I might say that the chairman of the House Committee on Interior and Insular Affairs realizes that this is an important phase and should be covered. Consequently, the gentleman from Colorado arranged and we have had some preliminary hearings.

At the first hearing Mr. Wright, who has charge of this program in the Southwestern Power Administration, appeared before our committee, and I would like to read into the RECORD at this point a portion of his testimony:

Mr. Chairman, I would like to say, first, that I appreciate the chance to appear before this committee. I am probably the stinker that started this stuff over before the Appropriations Committee, and the reason I did so, it was the only committee of Congress I had an opportunity to talk to, and I asked them to listen to me enough to get some other committee of Congress with the proper authority to authorize the necessary studies.

Actually, we are in the position of the United States when they set off the atom bomb at Los Alamos. We set something off. We know we got it, but we do not know enough about it to know what we can do with it or what we dare do with it yet.

If there is no authorization for this bill the thing I would like to see—and the man who is in charge of it admits that his attorneys can find none, the lawyers for our committee say there is none——

Mr. EVINS. Mr. Chairman, will the gentleman yield?

Mr. SAYLOR. I yield.

Mr. EVINS. We have specific testimony from the Southwest Power Administration, also from the Bureau of Reclamation, as to the desirability and feasibility of this study. The gentleman is not opposed to a study, is he? This is a study; this is not a construction. We have many important studies authorized in the bill. This is just a study to get information. He would not be opposed to acquiring information, would he?

Mr. SAYLOR. It is still an appropriation in this bill without any legislative authorization. I am not opposed to a study, but that was the purpose for which our committee held hearings. We had people from the Bureau of Reclamation; we had Mr. Max Edwards, legislative counsel, Department of the Interior; accompanied by George W. Toman, engineer, Washington office, Bonneville Power Administration; Douglas Wright, Administrator, Southwestern Power Administration; Daniel McCarthy, Bureau of Reclamation. Maj. Gen. William F. Cassidy, Director of Civil Works, Corps of Engineers, Department of the Army, accompanied by Eugene W. Weber, chief, planning division. They all admitted that this was desirable, but they could find absolutely no law which would authorize it. If this is the case I would like to know where the Appropriations Committee finds this authority. If they do not have the authority then I certainly hope that this committee will not infringe upon the jurisdiction of the Interior Committee but will let them proceed with their study and authorize it, if found desirable.

The Clerk read as follows:

CONSTRUCTION, GENERAL

For the prosecution of river and harbor, flood control, shore protection, and related projects authorized by law; and detailed studies, and plans and specifications, of projects (including those for development with participation or under consideration for participation by States, local governments, or private groups) authorized or made eligible for selection by law (but for studies shall not constitute a commitment of the Government to construction); $680,893,000, to remain available until expended: *Provided*, That no part of this appropriation shall be used for projects not authorized by law or which are authorized by law limiting the amount to be appropriated therefor, except as may be within the limits of the amount now or hereafter authorized to be appropriated: *Provided further*, That none of the funds appropriated for "Construction, General", in this Act shall be used on the project "Missouri River, Kansas City to mouth", for any purpose other than bank stabilization work: *Provided further*, That $550,000 of this appropriation shall be transferred to the United States Fish and Wildlife Service for studies, investigations, and reports thereon as required by the Fish and Wildlife Coordination Act of 1958 (72 Stat. 563–565) to provide that wildlife conservation shall receive equal consideration and be coordinated with other features of water-resource development programs of the Department of the Army.

Mr. BECKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BECKER: On page 4, line 13, strike out "$680,893,000" and insert in lieu thereof "$681,045,880".

Mr. BECKER. Mr. Chairman, this amendment and the sum included in the amendment, $152,880, is to reimburse the State of New York on a project known as Fire Island Inlet authorized by the Congress with moneys appropriated by the Congress. In the interim, from the time the Congress appropriated the money, there has been modification of this project that has now been concluded. The modifications were agreed to by the Corps of Engineers. However, to be perfectly frank with you, there is some dispute at the present time as to whether or not this was included in the original authorization of the project.

For your benefit and in support of this amendment I wish to read a letter addressed to me by the chairman of the House Committee on Public Works, the distinguished gentleman from New York [Mr. BUCKLEY]. This letter will give you a complete explanation in support of this amendment. It is dated September 9, 1961, and reads as follows:

COMMITTEE ON PUBLIC WORKS,
HOUSE OF REPRESENTATIVES, CONGRESS OF THE UNITED STATES,
Washington, D.C., September 9, 1961.

Hon. FRANK J. BECKER,
House of Representatives,
Washington, D.C.

DEAR COLLEAGUE: This is in answer to your request for clarification of the authorization of a certain part of the Federal project for beach erosion control at Fire Island Inlet, Long Island, N.Y. This project was included in an omnibus river and harbor bill reported by this committee and enacted as the River and Harbor Act of 1958 (Public Law 85–500). Extensive hearings were held on the project at which you and other Members of Congress, witnesses from the Corps of Engineers, the Long Island State Park Commission, and other local interests testified. The project, which is partly completed, is designed to check the serious erosion problem along the ocean side of Long Island in the vicinity of Fire Island Inlet, east of Jones Beach.

The project provides for the placement of sand at several locations on the north shore of Fire Island Inlet. Specific details of the exact locations and form of the placements were understood by the committee to be subject to modifications within the discretionary authority of the Chief of Engineers, since House Document 411, 84th Congress, the basic document referred to in the authorizing legislation, specifically stated that the plan was recommended "with such modifications as in the discretion of the Chief of Engineers may be advisable." In the several years between the studies which were made prior to authorization of the project and the time

that appropriations were made and construction undertaken, conditions progressively worsened in this area and, therefore, the Chief of Engineers made what can be considered to be minor engineering modifications in the specific plan as outlined in his report. One of the causes of the deterioration of the beach was the increased erosive action of the Federal navigation channel immediately offshore from Oak Beach. This, in turn, posed an ever-growing threat to the beach itself. The Chief of Engineers determined that it would be advisable to move this channel to the south and to close off the then existing channel by extending the placement of the authorized fill material at Oak Beach in the form of a sand groin or dike across the old channel. The contract for the project was let with sufficient fill material added to this particular portion to permit the Federal Government to construct this dike. Funds available for this stage of the prosecution of the project were not sufficient to carry the height of the dike to what appeared to be a desirable elevation and funds were therefore made available by the Long Island State Park Commission to assist in the work of raising the dike.

In this connection, your attention is invited to the first sentence in paragraph 2 of the report of the Chief of Engineers contained in the project document referred to previously. This is important because it indicates the intent of the Corps of Engineers in formulating the plan and the understanding of this committee in recommending its adoption.

"After full consideration of the report secured from the district and division engineers, the beach erosion board recommends that a project be adopted by the United States to restore and protect the shore from Oak Beach to Jones Inlet under a plan which provides for dredging the inlet shoal opposite the western part of Oak Beach to relieve the pressure of tidal currents against Oak Beach, to provide a deposition area for littoral drift, and to obtain fill material for the feeder beach and for Oak Beach."

It became apparent during the construction of the project that the relief of the pressure of tidal currents against Oak Beach, referred to in the sentence quoted above, could not be accomplished and the basic purpose of the plan could not be carried out unless the old channel was closed off by means of the sand dike referred to above. The minor change in plan with respect to the relocation of the navigation channel and the placement of the dike across the old channel are considered to be modifications well within the discretionary authority of the Chief of Engineers and eligible for the cost-sharing participation set up in the plan as approved by this committee and as passed by the Congress and signed into law. In fact, the lower portion of the dike has already been accepted as part of the authorized project and it would be unreasonable to exclude the upper portion.

The cost of raising the sand dike was $364,000, of which the Federal share of 42 percent under the terms of the authorized project would be $152,880. This is the amount which should be reimbursed to local interests.

Sincerely yours,

CHARLES A. BUCKLEY,
Chairman.

Mr. KEOGH. Mr. Chairman, will the gentleman yield?

Mr. BECKER. I yield to the gentleman from New York.

Mr. KEOGH. Mr. Chairman, I know of the great interest the gentleman from New York has displayed over the years in the preservation of the waterways on Long Island. I am sure he knows about the tremendous importance that preservation is to the millions of people in Brooklyn and in Queens. I hope the amendment offered by the gentleman is adopted.

Mr. BECKER. I appreciate the support of the gentleman from New York [Mr. KEOGH].

Mr. KIRWAN. Mr. Chairman, we accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. BECKER].

The amendment was agreed to.

Mr. EVERETT. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count. [After counting.] Sixty-five Members are present, not a quorum. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 195]

Addabbo	Garmatz	Nix
Arends	Gilbert	Norrell
Ashbrook	Glenn	O'Brien, N.Y.
Ashley	Hall	Philbin
Ayres	Halpern	Powell
Barrett	Harrison, Va.	Rabaut
Barry	Harsha	Rains
Bell	Healey	Rogers, Tex.
Betts	Hébert	Roosevelt
Brooks, La.	Holland	St. Germain
Brown	Holtzman	Schenck
Broyhill	Ichord, Mo.	Scherer
Buckley	Jones, Mo.	Shelley
Celler	Kearns	Sheppard
Clancy	Kee	Siler
Conte	Keith	Slack
Cooley	Kilburn	Staggers
Curtis, Mo.	Kyl	Steed
Dague	Landrum	Stephens
Davis, Tenn.	Latta	Thompson, La.
Devine	Machrowicz	Thompson, N.J.
Diggs	Martin, Nebr.	Thompson, Tex.
Dooley	Miller, Clem	Ullman
Fallon	Miller, N.Y.	Vinson
Farbstein	Minshall	Wallhauser
Fino	Morrison	Westland
Flynt	Moulder	Wilson, Ind.
Friedel	Multer	Young

Accordingly, the Committee rose; and the Speaker pro tempore having assumed the chair, Mr. BOGGS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill H.R. 9076, and finding itself without a quorum, he had directed the roll to be called, when 352 Members responded to their names, a quorum, and he submitted herewith the names of the absentees to be spread upon the Journal.

The Committee resumed its sitting.

Mr. RHODES of Arizona. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, much of the debate on this bill has been consumed with talk about the transmission lines of the upper Colorado River storage project. I think it behooves us to look at the economics of the proposition offered by the private utilities for the construction of the transmission system of the upper Colorado River storage project.

Mr. Chairman, the economic comparison of the all-Federal transmission system with the cost under the utilities' wheeling proposal must include all the costs and benefits under each of the competing systems.

Over a 50-year payout period, the wheeling costs are estimated to be $339 million. These wheeling costs cover all the utilities' charges for providing the additional transmission lines capacity and other facilities needed to deliver Colorado River storage project power to the preference customers. As the utilities now have or must provide transmission lines and other facilities for future load growth on their system, additional transmission capacity is now available and can or will be made available at a lower incremental cost than the cost of providing specific new all-Federal lines for preference customers service alone.

It is estimated that the all-Federal transmission system will cost at least $135 million more in Federal funds than would be the case under the wheeling proposal. Interest during construction would add $4 million to the Federal investment. Interest on the $139 million investment would, over a 50-year payout period, amount to $186 million. Operation and maintenance cost would be $103 million greater on the all-Federal system than under the utilities' wheeling proposal.

When electric power is transmitted from the point of generation to the consumer, there is a certain amount of power lost in the process. Using network system analyzers and electric computers, the relative losses on the all-Federal transmission system and under the wheeling proposal can be determined. Studies in this regard show the losses under the all-Federal system would be 48,000 kilowatts more than under the utilities' wheeling proposal. This loss in Federal revenues would amount to $55 million over a 50-year period.

The above Federal cost and revenue losses total $483 million or $144 million more than the wheeling costs, over the 50-year payout period.

In addition, Federal income taxes amounting to $61 million over the 50-year period would be foregone, as would $107 million in State and local taxes.

With the same unit charge for power, the net revenues under the wheeling proposal would provide for earlier repayment of the irrigation investments and would save the taxpayers an estimated $68 million in interest costs since such interest is not charged against the irrigation projects.

All told, the economic advantage of the utilities' proposal amounts to $380 million over a 50-year period; $273 million would benefit the Nation's taxpayers and $107 million would go to State and local treasuries for schools, roads, and so forth.

In addition to the economic advantage of the utilities' wheeling proposal over the all-Federal system, there is a Federal versus private power issue involved that transcends the economic advantage. There can be no question that the proponents of this all-Federal transmission system consider it but another link in the nationwide Federal power grid they want to have in order to socialize the entire electric utilities industry.

If we permit the socialization of the electric utilities industry, complete socialization of farming, retail business, and all industry cannot be far behind.

Mr. BONNER. Mr. Chairman, I rise in opposition to the pro forma amendment.

Mr. Chairman, during the consideration of the public works appropriation bill of 1960, in the month of April 1959, the engineers proposed the closing of the Dismal Swamp Canal in North Carolina and Virginia, which is part of the original intercoastal canal from Maine to Florida.

The Dismal Swamp Canal is an historic waterway engineered by General Washington and opened for commerce in about 1800. The engineers then built a second diversionary route through Currituck Sound, North Carolina, and Virginia. The waterway through Currituck Sound, in North Carolina and the upper part in Virginia, is open and exposed.

In the ratio of credit given to commerce the engineers do not take into account yachts. The yachting people from Maine to Florida, and the States of Virginia and North Carolina were shocked in 1959 at this proposal. The Legislature of the Commonwealth of Virginia passed a resolution petitioning Congress to keep this part of the intercoastal waterway open. Likewise the General Assembly of North Carolina petitioned Congress, and yachting interests from the Great Lakes to the Gulf of Mexico sent letters, requests, and petitions, as is shown in the hearings that were conducted on April 27, 1959, to be found beginning at page 60 of the hearings at that time.

The House Appropriations Committee did not put the item in. Then we had a hearing, and interested Members of Congress, both the House and the Senate, and General Itschner heard it. So impressed was General Itschner that he made a personal visit to this waterway and came back and made the statement that had he known the conditions of the waterway and the utilization of it by private yachts which cost from $40,000 to $200,000 each, and their preference for using this waterway, he would never have recommended its closing.

An agreement was reached that certain funds for maintenance and operation could be used to carry it on. In the budget that came down this year there were budgeted funds for the operation of this branch of the intercoastal waterway through Virginia and North Carolina; and not only were there budgeted funds for operation, but funds were budgeted for its improvement. But in some manner or other in the effort to save money the House Appropriations Committee did not include these items in the present bill.

I have discussed the matter with members of the Appropriations Committee of the House and members of the Senate Appropriations Committee.

This branch of the canal transited in the present year 2,518 vessels. It is, as I said, the most secure and safe part because the other route goes out in the ocean and is dangerous for small vessels. In addition, this route passes one of the largest towns in eastern North Carolina, Elizabeth City, which has a number of shipyards.

Mr. Chairman, I ask unanimous consent to proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. BONNER. Mr. Chairman, this canal passes Elizabeth City, N.C., where there is a very active shipyard. About 50 percent of its business is repairs on yachts and the wintering and storing of yachts going north and south. In this area there is a peculiar water known as juniper or cyprus water that is destructive to barnacles and nonproductive of barnacles. That is the reason the yachts are stored there. It is an artificial way of cleaning the bottoms and a way they do not accumulate others. Therefore, the maintenance and operation of this canal involves a payroll of $1,400,000 to this town and the general mercantile interests of the town.

I merely call the attention of the House to this matter so that if it is included by the Senate, and I hope it will be, with the record that was established in the hearings in 1959, this record and the extensive record with the resolutions from the yachting interests, together with resolutions of Virginia and North Carolina, it will be agreed to in conference.

There is an industrial development that is now proceeding along this water route. I hope it will be maintained. If it is not put in here, I hope the Senate will put it in, and I feel certain the Senate will include this item.

Mr. HARDY. Mr. Chairman, will the gentleman yield?

Mr. BONNER. I yield to the gentleman from Virginia.

Mr. HARDY. I am very much impressed with the necessity for funds for the maintenance of this canal, as the gentleman has so well pointed out.

Do I understand the gentleman is not going to offer an amendment to include this?

Mr. BONNER. I did not want to take up the time of the House. The committee has been very cooperative in the discussion of this matter. The committee fully realizes the proposition. I feel with the record the gentleman from Virginia [Mr. HARDY] and myself have built up here, and the record that we established in 1960, together with the personal examination of General Itschner at that time, with the statement if he had known he would not have recommended the closing of it, that this item will be included.

Mr. HARDY. I commend the gentleman for his position. I think it is very well taken. I have talked to members of the Appropriations Committee in the other body, and I am led to believe this item will be inserted over there. I hope it will. I hope the conferees will retain it in the bill when it comes back to the House. There is every reason in the world why this very picturesque, historic recreational area should be preserved; and, in addition to that, it is important from the standpoint of the waterborne commerce which it carries. It is a very important canal. General Itschner, as the gentleman pointed out, recognized the importance of it after we called it to his attention 2 years ago. I hope it will be included in this bill.

Mr. BONNER. General Itschner also made the statement that on account of the peculiar water that is used in the locks of this canal, there has been no corrosion and rusting or deterioration of the lock gates or the machinery in the locks whatsoever.

Mr. HARDY. I would like to suggest that all Members of the House would do well to visit this Dismal Canal.

Mr. DOWNING. Mr. Chairman, will the gentleman yield?

Mr. BONNER. I yield to the gentleman from Virginia.

Mr. DOWNING. I would like to commend the gentleman from North Carolina for the excellent statement he has made. I am familiar with the Dismal Swamp, having lived in that area all of my life, and I can assure the House it has a great value, not only as a commercial proposition but it offers a safe passage for the boats that use this canal every year.

Mr. BONNER. It has a history and a great interest in this part of the waterway by those who use the intercoastal waterway by pleasure yachts.

Mr. DOWNING. And, again, the reason the ratio is low is that the engineers did not give credit for the employment and the materials that are used in pleasure yachts.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

GENERAL INVESTIGATIONS

For engineering and economic investigations of proposed Federal reclamation projects and studies of water conservation and development plans and activities preliminary to the reconstuction, rehabilitation and betterment, financal adjustment, or extension of existing projects, including not to exceed $350,000 for investigations of projects in Alaska, to remain available until expended, $6,523,000, of which $5,423,000 shall be derived from the reclamation fund and $500,000 shall be derived from the Colorado River development fund: *Provided,* That none of this appropriation shall be used for more than one-half of the cost of an investigation requested by a State, municipality, or other interest: *Provided further,* That $250,000 of this appropriation shall be transferred to the United States Fish and Wildlife Service for studies, investigations, and reports thereon as required by the Fish and Wildlife Coordination Act of 1958 (72 Stat. 563–565) to provide that wildlife conservation shall receive equal consideration and be coordinated with other features of water-resource development programs of the Bureau of Reclamation.

Mr. SAYLOR. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. SAYLOR, of Pennsylvania: Strike out the period, insert a colon and the following provision: "*Provided further,* That no part of the funds herein appropriated shall be available for conducting a survey of pump-back storage."

Mr. SAYLOR. Mr. Chairman, this is the matter that I spoke about some time ago.

If the committee would have this item of $150,000 as a separate project I would make a point of order against it.

Rule XXI (2) states:

No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law, unless in continuation of appropriations for such public works and objects as are already in progress. Nor shall any provision in any such bill or amendment thereto changing existing law be in order, except such as being germane to the subject matter of the bill shall retrench expenditures by the reduction of the number and salary of the officers of the United States, by the reduction of the compensation of any person paid out of the Treasury of the United States, or by reduction of the amounts of money covered by the bill: *Provided*, That it shall be in order further to amend such bill upon the report of the committee or any joint commission authorized by law or the House Members of any such commission having jurisdiction of the subject matter of such amendment, which amendment being germane to the subject matter of the bill shall retrench expenditures.

Mr. Chairman, House Committee on Appropriations Report No. 1125, in describing the actions taken on the general investigations appropriations for the Bureau of Reclamation, the first appropriation in the Department of the Interior section of the bill H.R. 9076, states that— .

Up to $150,000 of the available funds under this appropriation are to be used to begin a survey of the potential of this (pump-back storage unit) type of development on reservoirs for which the Secretary of the Interior is the marketing agent for hydroelectric power, including those in the Southwestern Power Administration area.

This item was inserted by the committee without a budget request. The appropriations made available to the Bureau of Reclamation under H.R. 9076 are for the purpose of carrying out its functions, and I quote, "as provided in the Federal reclamation laws (act of June 17, 1902, 32 Stat. 388, and acts amendatory thereof or supplementary thereto) and other acts applicable to the Bureau."

The general investigations appropriation is available only for engineering and economic investigations of proposed Federal reclamation projects and studies of water conservation and development plans and activities preliminary to the construction, rehabilitation, and betterment, financial adjustment, or extension of existing projects.

Now, Mr. Chairman, the dams and reservoirs for which the Southwestern Power Administration is the marketing agent for the Secretary of the Interior are Corps of Engineers projects and the authority of the Secretary for the marketing of such power has its origin in the Flood Control Act of 1944 and not in reclamation law. Appropriations available to the Bureau of Reclamation accordingly cannot be available for pump-back storage unit studies at Corps of Engineers dams in this area without amendments to basic law authorizing extension of Bureau of Reclamation responsibilities and authority. In view of this, the action of the Appropriation Committee in this respect clearly constitutes legislation in an appropriation bill because it authorizes expenditures not previously authorized by law. Furthermore, the operations of the Bureau of Reclamation have historically for the 60 years since its creation been limited to not more than the 17 Western States, Alaska and Hawaii.

Acceptance of the committee's action would constitute a major departure from this tradition without consideration by the substantive committees responsible for recommendations for such an activity. In fact, there are now pending before the House Committee on Interior and Insular Affairs two bills, H.R. 4809 and H.R. 4843, which would give the Secretary of the Interior authority to conduct such studies. Hearings on these bills were held on August 21, 1961, by the House Subcommittee on Irrigation and Reclamation of the House Committee on Interior and Insular Affairs. The chairman of the full committee pointed out at this hearing that the Bureau of Reclamation operations are dependent primarily upon irrigation matters and that when it gets into pump storage it is getting into an area of new policy—even in the reclamation States. In response to a direct question from a member of the subcommittee to the legislative counsel of the Department of the Interior, "You also did not have any authorization, did you?" the legislative counsel answered, "That is right." Also in the hearings before the Subcommittee on Irrigation and Reclamation on H.R. 4809 and H.R. 4843 the Administrator of the Southwestern Power Administration said:

I am probably the stinker that started this stuff over before the Appropriations Committee and the reason I did so, it was the only committee of Congress I had an opportunity to talk to, and I asked them to listen to me enough to get some other committee with the proper authority to authorize the necessary studies.

Even the Administrator of the Southwestern Power Administration states that there exists no legal authority to make the study.

It is obvious from the testimony presented at this hearing that there is no legislative authority for these studies, particularly if they are to be conducted by the Bureau of Reclamation.

However, I hope that my amendment will be adopted and that this $150,000 will not be spent until there is legislation authorizing the study.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. SAYLOR].

The amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

UPPER COLORADO RIVER BASIN FUND

For the Upper Colorado River Storage Project, as authorized by the Act of April 11, 1956 (43 U.S.C. 620d), to remain available until expended, $55,468,000 of which $53,268,000 shall be available for the "Upper Colorado River Basin Fund" authorized by section 5 of said Act of April 11, 1956, and $2,200,000 shall be available for construction of recreational and fish and wildlife facilities authorized by section 8 thereof, and may be expended by bureaus of the Department through or in cooperation with State or other Federal agencies, and advances to such Federal agencies are hereby authorized: *Provided*, That no part of the funds herein appropriated shall be available for construction or operation of facilities to prevent waters of Lake Powell from entering any national monument.

Mr. JENSEN. Mr. Chairman, I offer an amendment:

The Clerk read as follows:

Amendment offered by Mr. JENSEN of Iowa: Page 11, line 13, strike out "$55,468,000" and insert "$51,243,000"; on page 11, line 14, strike out "$53,268,000" and insert "$49,043,000"; and on page 11, line 24, strike out the period, insert a colon and the following proviso: "*Provided further*, That no part of the funds herein appropriated shall be available for constructing the following transmission lines and facilities:

"Vernal-Provo No. 1 transmission line and substation 138 kilovolts;

"Craig-Sinclair transmission line and substation 115 kilovolts;

"Glen Canyon-Sigurd-St. George transmission lines and substations 138 kilovolts;

"Glen Canyon-Phoenix transmission lines and substations 230 kilovolts (double circuit);

"Four Corners-Albuquerque transmission line and substation 230 kilovolts (double circuit);

"Curecanti-Rangely transmission line 230 kilovolts;

"And the Gunnison-Midway section of the Curecanti-Midway transmission lines and substation."

Mr. JENSEN. Mr. Chairman, this amendment seeks to strike out the transmission lines, the names of which the Clerk has just read. There will still remain in the bill, if my amendment is adopted, about 35 percent of the transmission lines that are requested in the bill along with all the related facilities which are necessary to construct the necessary lines and everything that is required for a workable machine, so to speak, for delivering this electric power. As I said early in the debate, the Congress has for years honored the yardstick which the committee has used for the past 10 years in appropriating money for such transmission lines. That yardstick, as I explained before, was simply this: that where private utilities and/or REA's and/or municipalities have already adequate facilities or will build such facilities and will wheel power at reasonable rates to preference customers and others, then the Congress is not justified in appropriating money for such facilities. It is that yardstick which I am attempting to defend by my amendment.

Let us not forget that the private utilities of America pay in Federal taxes each year over $1 billion into your U.S. Treasury. They also pay local and State taxes, over $1 billion, which is used for all the needs of the local governments and States. I have opposed every bill all during my congressional career which strikes at our free enterprise system from the peanut vendor on the corner to the farmer, to the largest, honest company in America. And may I say, if that be un-American, I pray God to forgive me, and a great majority of the thinking American people who I am sure I speak for now.

A number of years ago—to be exact, on March 4, 1959—I made a speech on the floor of this House titled "The Power To Not Tax Is Also the Power To Destroy."

I gathered information and material for that speech over a period of 15 years. Every statement I made in that hour-long speech is documented. I named names of those who recommended the very thing that the Fabian Socialists of England recommended and put into effect when they got into power there.

I shall never forget the day when our committee, about 12 years ago, ordered Mr. Stephen Raushenbush before us. Stephen Raushenbush had written a book about 25 years ago which recommended the socialization of America. That book was a complete takeoff of the Fabian Socialist blueprint. He recommended that the Federal Government should take over first of all the private utilities in America, next, all the banks in America, next all the communications in America, and next all the farms in America. You can get the book. It is in the Congressional Library. I do not mind telling you that he did not stay in the Interior Department long after that, but he did wind up a year or so afterward as secretary of the President's Natural Resources Committee. He had been the program director of the Department of the Interior for years. A very good place to advocate his socialistic schemes. Ike fired him quick early in 1953.

You think we have not had a problem to keep this country from getting into the hands of people like that? We will lose our free enterprise system if a lot of the Members of Congress keep on pounding the kind of people that made America great, the people that by the sweat of their brow and by their honest works, your forebears and mine, labored and builded here the free private enterprise system which today is suffering every sort of abuse and criticism that can be piled on their backs including higher and higher taxes because of the spending spree over almost all of the last three decades. What will the harvest be? You know.

Mr. KIRWAN. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, in 1946 Harry Truman was President of the United States. Oscar Chapman, his Secretary of the Interior, gave him the plan for the Upper Colorado River Basin. They asked for too much in their request and the legislative committee cut it down. Then came Dwight Eisenhower and Douglas McKay, who was his Secretary of the Interior. They agreed on the plan that is in front of you today. Then Fred Seaton came into the picture and he agreed with the plan. They all agreed the basic purpose of the act is to provide irrigation assistance. That is why the lines must be built, to put people on farms where they can make money to pay taxes and have a good living. The Federal Government is spending over $600 million under either system. The question is, who pays the $84 million for certain backbone transmission lines? If the private utilities build these lines they will charge $593 million over 86 years and the Government will have $273 million less revenue for irrigation assistance.

The question is whether the Federal Government is eventually going to own the house or is going to pay rent forever. If buying and owning a home was ever good business, it is in this case. The Government is paying for most of the house anyway. It is paying over $600 million. Why should the Government let the private utilities finish the house with an investment of only $84 million, and then charge the Government $593 million in rent for the use of the house? Under this, the Government would lose $273 million in revenues for irrigation assistance. The reason for building this project is not to provide assistance to the utilities, and I ask that this amendment be voted down.

Mr. ASPINALL. Mr. Chairman, will the gentleman yield?

Mr. KIRWAN. I yield to the gentleman from Colorado.

Mr. ASPINALL. I wish to join the gentleman from Ohio in his opposition to this amendment. The upper Colorado River project was a very closely studied project. Not only its economic feasibility but its financial feasibility depends upon the project as it was originally proposed and originally authorized and as it is being constructed at the present time. The gentleman from Ohio [Mr. KIRWAN] is absolutely correct when he says that the amendment that has been proposed is likely to destroy the very thing that makes possible the participating irrigation projects which will serve the people of the area as they should be served and at the same time render their contributions to the national economy and welfare.

Mr. Chairman, I ask unanimous consent to extend my remarks and place in the RECORD at this point a rather lengthy statement I have made, but which in the interest of the time of the Commitee I do not want to give orally.

The CHAIRMAN. Without objection, it is so ordered.

There was no objection.

Mr. ASPINALL. Mr. Chairman, I am in strong opposition to the amendment proposed by the gentleman from Iowa [Mr. JENSEN]. I have taken this time to speak in support of the proposition which is specifically set forth in Public Law 485, 84th Congress, that—

> The Secretary of the Interior is hereby authorized to construct, operate, and maintain the following initial units of the Colorado River storage project, consisting of dams, reservoirs, powerplants, transmission facilities, and appurtenant works.

Further, as stated in section 7 of said law:

> The hydroelectric powerplants and transmission lines authorized by this act to be constructed, operated, and maintained by the Secretary shall be operated in conjunction with other Federal powerplants, present and potential, so as to produce the greatest practicable amount of power and energy that can be sold at firm power and energy rates.

Mr. Chairman, the Colorado River storage project is the largest single reclamation project ever authorized by the Federal Government. That means, of course, that it is the largest reclamation project ever authorized by one piece of legislation in the history of the world. It is primarily and basically an irrigation project. The production and marketing of power, although most necessary to the success of the project, together with the supplying of municipal water, the development of recreational values and other benefits, are secondary and incidental to the primary purpose of the legislation. The construction and operation of this great program with its interrelated development and coordination with similar facilities in the lower basin of the Colorado River and in the Missouri Basin will provide for the maximum contribution of this vast area to the welfare and security of our Nation.

The support and sponsorship of this greatest of all reclamation projects has been entirely bipartisan—or nonpartisan, if you wish to state it thus—from the very beginning. It has been studied, surveyed, sponsored, and supported by representatives of every Federal administration since the 1920's. The first preliminary report was made and released under President Truman's administration through the Office of former Secretary of the Interior, Oscar Chapman. The succeeding administration, under President Dwight Eisenhower, through the Offices of the two former Secretaries of the Interior, Douglas McKay and Fred Seaton, supported it right from the beginning of such administration and followed it through to its final successful authorization.

Here, in Congress, its effective support has also been entirely bipartisan. The legislation, as presented, was on a bipartisan basis. I believe my colleagues will be interested in a few statistics at this point. The authorizing bill passed the House of Representatives on the 1st day of March 1956, by a vote of 256 to 136. The "yea" vote consisted of 138 Democrat votes and 118 Republican votes. The "nay" consisted of 62 Democrat votes and 74 Republican votes. This shows that the report as well as the opposition was completely bipartisan. Of the 138 Democrats who supported the measure, 110 of them are presently Members of the House. Of the 118 Republicans who supported the measure, 52 of them are presently Members of the House. I am most pleased to find such a large number of the supporters of the program still Members of this great forum.

Now, just what is the controversy that is presently before us? It is my sincere hope that in a brief and concise statement I shall be able to present to you, my colleagues, my understanding of the problem. Please keep in mind that I am somewhat prejudiced in the matter but may I say to you, my colleagues and friends of many years, and those of more recent months, I sincerely trust that my prejudice—whatever it may be—goes only to what I consider to be necessary to make this great project one of the outstanding successes of reclamation, conforming in all particulars with policies and guidelines laid down by Congress for reclamation programs. I was one of the sponsors of the House legislation to authorize the Colorado River storage project, and I put all of the energy and talent which I possess in supporting the passage of the act, but in doing so, I can say to all, without any

fear of successful contradiction, that the act itself is one of the more conservative reclamation authorizations of the last three decades and that it conforms to policies enunciated by Congress itself for such programs.

The most important new policy established in the Colorado River Storage Project Act was the authorization for and the establishment of a basin fund into which all appropriations from the Federal Treasury and all revenues, including payments from users, revenues from power generation, and so forth, are to be paid; and from which basin fund all moneys owed to the Federal Government—for construction costs advanced, as well as all other expenses of the project—are to be expended. If and when—and may I call your particular attention to this part of my statement—if and when there are any net revenues (that is revenues not needed to pay the operation and maintenance costs, the power and municipal water costs with interest, and the irrigation costs of the storage units) such net revenues shall be available for and will be used to pay those costs of construction of the participating projects which the users of such participating projects are unable to pay. Hereinbefore I stated that this is in fact an irrigation project. It is these participating projects that make it so. Without them there would be no project. Eleven of such projects have been authorized for construction by the original act, and some 24 others are authorized for planning. It is hoped that in the decades ahead that the majority of those authorized for planning will be authorized for construction. All other facilities, that is other than the participating projects, were intended to be, and must continue to be, subordinate to this particular use which is "irrigation." Without the smaller dams and the attendant reservoirs in the upper reaches of the tributaries of the Colorado River this program would be unnecessary and of little value to the area served. That is especially so in Colorado where over 70 percent of the water of the Colorado River rises.

Now, what is needed to make the participating project program successful? The answer is obvious to anyone—it is to put just as much net revenue in the basin fund as it is possible to obtain under the provisions of the act and the operation of the facilities authorized therein. The Federal Treasury must be repaid and the smaller reservoirs must be constructed, otherwise the objective is missed and the project is doomed to failure.

My position, therefore, is one easy of understanding, and I trust equally easy of explanation. I want just as many dollars in the basin fund as can be placed there within the provisions of the law itself. In my thinking and in my understanding of what is involved, this matter now before us should not be a controversy between, or generated by, advocates and supporters of public power and of private power. There is room for the business of each in this great project undertaking. Neither should be placed at the mercy of the other. Neither should ask for the advantages it would not grant if it were in the position of the other. All too often we find these battlelines drawn by the overzealous advocates of these two opposing views. As I have said before, in this particular instance there is plenty of room for each to serve under existing law and policy.

Please keep in mind that what I am seeking is the maximum flow of dollars into the basin fund on which the economic and financial success of this project depends.

As I go now to the next step in my presentation, let me advise my colleagues that I shall not attempt to confuse you with a lot of figures and details. There has been, in my opinion, all too many charges and countercharges made by the zealots of each side. The air is completely filled with fallout that confuses even the best qualified experts on these matters. Largely, the differences arise because of the objective sought or the initial assumptions made. I take no prejudiced issue with either side. I just want as many dollars in the basin fund as can be provided under the authorizing law and the operation of the facilities authorized therein. I want this project to do what it was intended to do when it was authorized.

Please permit me to go now to what I consider to be the crux of the present issue. In the beginning of my statement I quoted the statutory provisions governing the Federal Government's responsibility in the construction and operation of transmission lines. Let me quote one of those passages again:

> The hydroelectric powerplants and transmission lines authorized by this act to be constructed, operated, and maintained by the Secretary shall be operated in conjunction with other Federal powerplants, present and potential, so as to produce the greatest practicable amount of power and energy that can be sold at firm power and energy rates.

This means, of course, that the Secretary of the Interior is authorized and directed to construct and operate certain transmission facilities. What facilities? To put it very plainly, the answer is those transmission facilities which will insure the success of the project. This means, as I understand it, those facilities which will permit the Secretary of the Interior to coordinate and correlate all of the facilities of the project for its overall success. This means the generation of power to produce "the greatest practical amount of power and energy that can be sold at firm power and energy rates." This means, if my thinking is clear, that the Secretary is charged with the responsibility of producing the power and getting it to the consumer. He must not be at the mercy of any party in between. If it is to the advantage of the project that he construct basic transmission lines to the load centers, then he is directed to do so. If it is to the advantage of the project—and, mark you, I emphasize the word "project"—in situations which may not be specifically to the advantage of the power consumers or any other party or parties, to enter into agreements with private or public utilities to "wheel" power to the customers, then he should enter into such agreements. But, within the authority and responsibility granted by the authorizing act, this decision is left to the Secretary.

What are the other guidelines? They are to be found in the established policies of the Congress set out in the reclamation laws and in House Report No. 1087, 84th Congress, on H.R. 3383, the House bill authorizing the Colorado River storage project. There is not one word concerning this matter in Senate Report No. 128 accompanying Senate action on S. 500, the Senate bill authorizing the Colorado River storage project. Neither is there any mention of the matter in part 2 of House Report No. 1087 which was a supplemental report on H.R. 3383, nor in the conference report accompanying S. 500 and designated as House Report No. 1950, 84th Congress, 2d session.

Under these circumstances, I feel, therefore, that it is safe to assume—and I was the sponsor of the House bill and a member of the conference committee—that all concerned were of the understanding that the matter was thoroughly covered in the provisions of the legislation itself and the references to this particular matter in the House report.

Let us see what the House report provided. It reads as follows:

> PROPOSAL OF THE PRIVATE POWER COMPANIES
>
> The committee finds that this project is unique in that there is no public versus private power controversy involved. Representatives of the 10 private power companies operating in the area presented testimony before the committee indicating their desire to cooperate with the Federal Government in the transmission and marketing of electric power and energy from the Colorado River storage project. Their proposal provides essentially that the Secretary construct the backbone transmission lines connecting major powerplants of the project and that use be made of the existing systems of the companies and additions thereto to market the power. The companies assured the committee of their willingness to serve preference customers either through wheeling or through resales with appropriate safeguards to protect the rights and interests of the preference customers, and of the desire of the private utilities of the area to purchase power in excess of that taken by preference customers.
>
> The proposal by the power companies seemed entirely reasonable to the committee. The proposal is consistent with the policy expressed by the Congress for many years in appropriation acts and elsewhere whereby the Federal Government builds the basic backbone transmission system and distribution is made through existing systems where satisfactory arrangements can be worked out. The procedure proposed is similar to that which has worked very satisfactorily for the Ceneral Valley project.
>
> The Department of the Interior advised the committee that it was sympathetic to the private power companies' proposal and indicated that the suggestions would be given studied consideration if the project were authorized. Therefore, the committee expects the proposal by the private power companies for cooperation in the development to be carefully considered by the Department of the Interior and the electric power and energy of the project to be marketed, so far as possible, through the facilities of the electric utilities operating in the area,

provided, of course, that the power preference laws are complied with and project repayment and consumer power rates are not adversely affected.

The reference, in this language, to general policy must first be examined, and here I must reemphasize by quoting once again the pertinent part:

The proposal is consistent with the policy expressed by the Congress for many years in appropriation acts and elsewhere whereby the Federal Government builds the basic backbone transmission system and distribution is made through existing systems where satisfactory arrangements can be worked out.

I have reviewed the record of congressional actions regarding Federal construction of transmission facilities and reach the conclusion that the Congress has historically favored construction of backbone transmission lines to interconnect powerplants constructed by Federal agencies and to deliver power to load centers. The authority for construction of transmission lines exists under general reclamation law as well as in specific project acts and, pursuant to this authority, many cooperative arrangements with private utilities have been worked out.

One congressional expression on this matter is found in section 5 of the Flood Control Act of 1944 which reads as follows:

The Secretary of the Interior is authorized, from funds to be appropriated by the Congress, to construct or acquire, by purchase or other agreement, only such transmission lines and related facilities as may be necessary in order to make the power and energy generated at said projects available in wholesale quantities for sale on fair and reasonable terms and conditions to facilities owned by the Federal Government, public bodies, cooperatives, and privately owned companies.

This is exactly what this committee had in mind for the Colorado River storage project—that is, that the Federal Government construct only transmission lines to make power available in wholesale quantities to facilities owned by the Federal Government and to preference customers provided satisfactory arrangements for distribution beyond load centers could be worked out.

In implementing the policy expressions of the Congress on the marketing of electric energy, the Department of the Interior has generally followed the following criteria with respect to arrangements for the delivery of power produced at Federal hydroelectric projects:

First, private utilities have ample surplus transmission capacity or are willing to construct transmission lines for that purpose.

Second, private utilities are willing to furnish such service to the Department at a reasonable price.

Third, such arrangements will enable the Department to render acceptable power service to customers having preference, under existing law, in the purchase of federally produced power.

The committee also had these principles in mind in connection with the language in its report.

There has been reference to the Keating amendment which has appeared in all recent public works appropriation acts and reads as follows:

"Provided, That no part of this appropriation shall be used to initiate the construction of transmission facilities within those areas covered by power wheeling service contracts which include provision for service to Federal establishments and preferred customers, except those transmission facilities for which construction funds have been heretofore appropriated, those facilities which are necessary to carry out the terms of such contracts or those facilities for which the Secretary of the Interior finds the wheeling agency is unable or unwilling to provide for the integration of Federal projects or for service to a Federal establishment or preferred customer.

This language is applicable only in those areas covered by existing wheeling arrangements.

Having examined general congressional policy with respect to the construction of transmission lines and the marketing of electric power and energy to which reference is made in the House report, then what additional requirements must be taken into consideration? Such requirements, relating specifically to the Colorado River storage project, are to be found in the last sentence of that portion of the House report relating to the subject. Once again for the purpose of reemphasizing, I requote:

Therefore, the committee expects the proposal by the private power companies for cooperation in the development to be carefully considered by the Department of the Interior and the electric power and energy of the project to be marketed, so far as possible, through the facilities of the electric utilities operating in the area, provided, of course, that the power preference laws are complied with and project repayment and consumer power rates are not adversely affected.

The important direction here, of course, is "that the power preference laws are complied with and project repayment and consumer power rates are not adversely affected."

This means not only that the basin fund must not be violated but that all revenues possible must flow into it, thus providing for project repayment. To me, as I have stated before, this is the issue.

As soon as it seemed appropriate for them to do so following project authorization, the representatives of the private utilities requested the Bureau of Reclamation to provide them with the plan to be followed in the construction of the transmission lines for the project so that they could submit their proposal for participation in the construction of the required transmission system. Two important matters must be borne in mind at this point of our discussion. The first is that whoever controls the main operation of an electrical transmission system is in position to receive large values which are difficult of exact measurement but recognized by all experts in this field. These values which result from flexibility in operation mean dollars and cents to the controlling party. This is particularly true because of the vagaries of electrical power generation and transmission. From the standpoint of the Federal Government such control of the storage project transmission system and its interconnection with other existing Federal systems will tremendously enhance its value to the project and will add flexibility which will permit better utilization of the public investment in the overall development of our water resources.

The second matter that must be borne in mind is that it is impossible to set forth a definite and final plan for any transmission system until the time immediately preceding construction because power demands and locations of load centers are so difficult of ascertainment. Accordingly, I do not believe that we should be unduly bothered by the charge of the representatives of the private utilities that the plans have been somewhat modified since the first plan was offered to them. Neither should we be bothered unnecessarily because of the changing requests of the preferred customers. These matters just do not lend themselves to a fixed and final decision and do not appear to be of major importance in examining the merits of the private utilities' proposal.

Having all these matters brought to my attention with the related contentions and charges, and not being an expert in such matters myself, and further, after having several conferences with representatives of each interested group, I proceeded to ask for advice from as qualified and expert a source as I could find, a source that I considered to be not prejudiced in favor of either private utilities or preferred customers groups—his only interest in the final outcome being its effect upon the future development of Colorado's water resources. I requested help from the engineer of the Colorado Water Conservation Board which is the policymaking administrative agency for all water resources matters in Colorado and which serves under the direction of the Governor. Colorado's particular interest in this matter is that the State of Colorado, by the provisions of the Colorado River Storage Project Act, is entitled to receive benefits from the basin fund in the amount of 46 percent of all of the net revenues therein. Colorado's share of the revenues in the basin fund is to be used to help pay for the construction of any participating project authorized by Congress to be built within the State of Colorado. These are the benefits to the State which contributes over 70 percent of the water to the Colorado River.

In his analysis, my consultant worked from the June 1, 1961, report evaluating the wheeling proposals of the private utilities and prepared by them. He used the utilities' own figures and computations where they disagreed with the Bureau's interpretation of their offer. In his report to me, he advises that, even using the utilities' own figures, his analysis shows that all-Federal construction of the basic transmission system, and here I refer to what is known as the necessary backbone system in such a project, is in the best interest of the project users and the States of the Upper Colorado River Basin.

On the basis of his study, the dollar amounts which would be received as net

revenues in the basin fund and available for development of participating projects during the period from the time the power goes on the line to 2049 would be about $117 million more under an all-Federal transmission system than under the private utilities' proposal and the financial advantage of the all-Federal system after the year 2049 would be about $4.8 million per year. Again, I point out that this is based upon using the utilities' figures. The Bureau's study comparing the utilities' proposal with the so-called modified system, shows a difference in favor of an all-Federal system of $274 million over the same period. The financial advantage to the all-Federal system is due primarily to the fact that the Federal transmission grid is paid out in 44 years with interest with revenues thereafter available to assist in the repayment of participating projects, whereas the rent or wheeling charges paid under the proposal of the private utilities goes on in perpetuity.

What this means with respect to development of the water resources of the Upper Colorado River Basin is that either such development would be delayed under the utilities' proposal or the power rates would have to be increased above 6 mills because the Colorado River Storage Project Act requires that there must be net revenues in the basin fund to repay the cost of each participating project in 50 years following its construction and development period. This was the finding of both former Secretary of the Interior Fred A. Seaton and the present Secretary, Stewart L. Udall, and the basis upon which they both disapproved the private utilities' proposal.

My friends, I have spent a lot of time studying this matter and I have tried to be completely fair in attempting to justify acceptance of the private utilities' proposal. However, I can arrive at only one conclusion. Federal construction of the backbone transmission lines to interconnect Federal powerplants and systems is necessary for maximum development and use of the water resources of the Upper Colorado River Basin.

I hope that the funds will be retained in this bill to keep the transmission system construction on schedule so there will be no delays in the marketing of power and energy when it becomes available. Such delays could result in extensive revenue losses to the Federal Government.

Remember, my friends, the deletion of funds from this bill for the transmission lines in question is not a decision as to who builds the lines. The Secretary of the Interior has been given certain authority and responsibility under the Colorado River Storage Project Act and he cannot enter into a contract with the private utilities unless he determines that such contract is consistent with such authority and responsibility. In my opinion, he cannot make such a determination with respect to the present proposal of the private utilities for wheeling power and energy of the Colorado River storage project. Having given the Secretary of the Interior the statutory responsibility for determining what part of the electric transmission system must be constructed by the Federal Government in order to retain the necessary operating control and provide maximum development of the water resources of the basin, it would seem extremely unwise for the Congress to now prevent, by its refusal to provide funds, the implementation of such determination by not one but by two Secretaries of the Interior.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. KIRWAN. I yield to the gentleman from Massachusetts.

Mr. BOLAND. I wish to direct a question to the gentleman from Colorado. The gentleman from Colorado is a knowledgeable gentleman in this area. He is a recognized expert on reclamation projects and is chairman of the legislative Committee on Interior and Insular Affairs. I would like to propound this question to him. Does the gentleman know of any other Bureau of Reclamation project where we have power where the Bureau of Reclamation has not built the backbone transmission line?

Mr. ASPINALL. If the gentleman from Ohio will yield to me, I will be glad to answer that question. Every multiple-purpose project authorized by the Congress, where power has been provided, has also been given the authority and the direction to provide the proper transmission facilities to the load centers.

Mr. BOLAND. And that is precisely what we are doing by this bill today.

Mr. ASPINALL. The gentleman is correct.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield?

Mr. KIRWAN. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. Mr. Chairman, I commend the able gentleman from Ohio for the splendid presentation he has made on this point. I wish to commend the committee for the fine bill they have brought forth. I hope the bill can be adopted without any change or amendment.

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

Mr. KIRWAN. I yield to the gentleman from New York.

Mr. ROONEY. Mr. Chairman, I should like to join in commendation of the distinguished gentleman from Ohio [Mr. KIRWAN]. I supported the gentleman from Ohio and the gentleman from Missouri [Mr. CANNON] in the subcommittee as well as in the full committee, and I support them in their opposition to this pending amendment today. I think this issue is very, very important and one that should be decided decisively once and for all.

Mr. JENSEN. Mr. Chairman, will the gentleman yield?

Mr. KIRWAN. I yield to the gentleman from Iowa.

Mr. JENSEN. I am sure the gentleman from Ohio does not want the statement to stand unchallenged when he said that we have built all the backbone lines or intimated that the Government built all of them. The facts are that the line proposed in this bill runs out into the hinterland no end. They are not just tying ends together as you and I, may I say to my colleague from Ohio, have always insisted on doing. We did not run transmission lines in the Missouri Valley out into the hinterland. We stopped them at the load center and said to the people, "Come there and get your groceries." No; we have done it all over this country.

Mr. KIRWAN. The lines in question only go to main load centers and intertie other Federal powerplants. They do not go into the hinterlands. I believe this is one of the best things that has ever come before the Congress of the United States and the proposed amendment to delete these lines should be defeated.

Mr. HOSMER. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I would like to at this point ask a question of the gentleman from Colorado, chairman of the Committee on Interior and Insular Affairs. The question is this: Is it not a fact that during the long and tortuous trail of the upper Colorado project through this Congress its financial feasibility was calculated upon selling power for 6 mills at the bus bar?

Mr. ASPINALL. Mr. Chairman, if the gentleman will yield, that was the essence of the hearings which we had, and it is the foundation upon which the Bureau of Reclamation is presently operating. And, it is also the understanding of the gentleman from Colorado, after being in conference with several experts on this matter, that what the five investor-owned utilities propose will cost the consumers 6.57 mills per kilowatt-hour, I believe it is.

Mr. HOSMER. Well, I am not particularly interested in how much it is going to cost the consumers in this five-State area that are getting this power at an already reduced rate. I am interested in what it will cost the taxpayers of the United States to generate and wheel that power.

Now I am going to ask the gentleman from Colorado another question. Will he tell us which end of the transmission line the bus bars are on? And by that I mean are they at the generating facilities end or are they down at the using facilities end?

Mr. ASPINALL. As the gentleman from Colorado understands this particular project, the points to be served by the transmission lines will be known from the generating plants to the load centers, wherever they may be. There has been an indication that there will be 15 of them; others have asked for 24. The gentleman from Colorado doubts that there is any necessity for all 24, but that is a determination that cannot be made until there is proper study and final decisions. What is requested, so far as this project is concerned, are necessary transmission lines to go to the load centers that are already recognized or will be determined before construction is started.

May I add one further thing. The construction by the Federal Government

of these transmission lines is not going to cost the Federal Government one cent. The Federal Government will be repaid in full with interest.

Mr. HOSMER. Well, I do not yield further to the gentleman from Colorado for a statement like that, because there are several hundred millions of dollars involved, or at least well over $100 million involved, and I think the gentleman has made my point. We have heard all afternoon these fairly tales about how this project is not going to be financed feasibly unless we come in and build these lines with public money, and yet in all the years that this project was being pleaded for through this Congress, every single argument made by everybody on that side or on this side of the aisle was that the feasibility of the project was based on 6-mill power at the bus bar, which is in the generating end of the transmission line. And, as a consequence, I think it ill behoves anybody to stand in the well of this House and tell us now that you have to have public-owned transmission lines at a tremendous cost to the U.S. taxpayers in order to bail out these projects financially.

Mr. RHODES of Arizona. Mr. Chairman, will the gentleman yield?

Mr. HOSMER. I yield to the gentleman from Arizona.

Mr. RHODES of Arizona. Actually, is it not a fact that the proposal of the utilities to wheel the power to the load centers at 6.57 is a much better proposition than the Committee on Interior and Insular Affairs had before it before the upper Colorado River project was authorized?

Mr. HOSMER. I am glad the gentleman made the point.

Mr. Chairman, I yield back the balance of my time.

Mr. TABER. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, it is clear to me that the only support for this provision and for this transmission line is that it is a camouflage. We have heard the story here that Wall Street was going to control it. We all know that the only people who can control it are the folks back home who use the power; and they can be made to pay for the use of the power only what is a fair price, everything considered. Wall Street has nothing more to do with it than a babe in arms.

If we intend to do this job in an unbusinesslike way we will turn down the amendment offered by the gentleman from Iowa [Mr. JENSEN], because that would mean that these fellows who are running these big power lines would have their own way.

I ran across one thing that made me absolutely certain that we ought not to put any of this powerline in certain hands, a man named Diefendorf, of New York City, representative of the Webb & Knapp Co., a very active real estate outfit. They control a lot of other setups. There is an outfit known as the Gulf State Land & Industries, and the people who want to build this powerline have made a contract with the Gulf State outfit to supply them with a steel mill up in Anaconda, Mont.

How are we going to have any intelligent administration or any practical business handling of such a proposition if we are silly enough to allow a fellow like that to go out and make a contract with a proposed steel company which does not exist as far as having any field plant goes, at a rate which would induce an outfit to put in a powerline running a long distance, from Anaconda down to where the power is produced on the river below. If we are going to do that we are showing very poor business judgment indeed.

I hope the amendment will be adopted.

Mr. CANNON. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, as has been said, the provision in the pending bill for Federal conservation of water power is but a part of the national program initiated by Theodore Roosevelt and fostered by every President from his day down to this time.

It was especially endorsed and supported by President Eisenhower and all members of his Cabinet.

Under this administration it has been particularly stressed by President Kennedy and all associated members of his administration.

In corroboration of this may I read a statement by President Kennedy, made this morning and just received from the White House:

STATEMENT BY JOHN F. KENNEDY, ON TRANSMISSION LINE PROVISIONS, PUBLIC WORKS APPROPRIATION ACT OF 1961

I approve wholeheartedly the action of the House Appropriations Committee last week in approving funds requested by the administration to construct Federal backbone transmission lines to market power generated at the upper Colorado project and the Trinity project in California. In order to insure that the Federal investment in these projects will benefit the general public and insure that the generated power will be delivered to points where both public and private agencies are able realistically to purchase and distribute this power, Federal transmission lines are necessary. The breadth of the support for this principle is evidenced by the strong congressional action in authorizing the upper Colorado transmission system of 1956, by the recommendation of the Eisenhower administration in January of this year, and by the vigorous advocacy of the same concept by this administration through the Secretary of the Interior.

I believe this project to be fundamental to a sound power policy and sincerely hope the Congress will approve the appropriations items recommended by the House Appropriations Committee.

Mr. KIRWAN. Mr. Chairman, I ask unanimous consent that all debate on the pending amendment and all amendments thereto close at 5 o'clock.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. BRUCE. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, I would like to briefly discuss some most interesting—but rather frightening—facts about Federal encroachment into the electric power business. I am sure that all Americans who believe in our traditional free-enterprise and private-initiative philosophy, must view with some concern the significant advance federalization of the electric utility industry has made in the last 30 years. Nationalization of the electric power business carried forward at the 1930–45 rate would kill the investor-owned power industry by 1980.

I cannot believe that the American citizen desires nationalization of the electric power business. Most Americans, when they take time to reflect, recognize the immeasurable contribution to our way of life that the electric power industry has made in the short space of a man's lifetime—in the 80 years since Thomas A. Edison founded the electric power industry. In these 80 years the private electric power industry has opened the way to a new and remarkable world of industrial progress and scientific achievement. Yet we still hear a hue and cry from certain small segments of our citizenry demanding so-called cheap Federal electric power—cheap Government power at any cost. Certain voices are heard calling for giant Federal power transmission grids at super high voltages, regardless of need or economic considerations. These same voices cry out for Federal construction of single-purpose powerplants, ignoring our time-honored concept of Government power production only as an incidental element of reclamation purposes. We find Federal yardsticks that conveniently shrink to measure Government power schemes and stretch suspiciously when measuring private power proposals.

Reasonable men reaching reasonable conclusions can only observe that there seems to be an organized program afoot dedicated to killing or crippling the private power industry. The Federal superpower schemes, whether fostered as a facet of creeping socialism or merely a part of bureaucratic empire building, can have only one end result: the abolition of private power in our country through socialization of the electric power industry.

Back in 1948 the Bureau of Reclamation published a book entitled "Program of Power Development—Fiscal Years 1948 Through 1957," which presented the power development program of the Bureau of Reclamation for that 10-year period in the 17 Western States. The purpose and scope of the Bureau's program is noted on page 1 of this book:

This report presents the proposed power development program of the Bureau of Reclamation over the next 10 years.

It looks ahead to the future power systems to be developed by the Bureau in the West. Each of the seven administrative regions has prepared a 10-year power program and each of these programs constitutes one of the following sections. Mention of a particular powerplant or transmission line does not necessarily mean that it is as yet authorized, but that it is considered as a necessary part of the development to accomplish the program to provide for the estimated future load.

This 1947–58 power program report has tentative Federal power transmission grids stretched all over the 17 Western States, including a proposed transmission network in the Upper Colorado River Basin. Read this report and

you will receive firm impressions that as far as the Bureau is concerned power development is its sole function and that private power companies are nonexistent.

The Bureau's 1947–58 power program is strong evidence of long-range plans to federalize the electric power industry. Why else is there now such persistent political clamor to have the Bureau of Reclamation build a Federal transmission grid in the Colorado River storage project area when private companies have offered to transmit Colorado project power at less cost? I say this despite the claims of Federal power advocates that the price of power to preference customers would have to be increased if the private companies do the transmission job. When we investigate this claim we find that it just is not true.

We find that the Bureau of Reclamation has devised a so-called yardstick transmission system which is incapable of fulfilling the power marketing criteria established for the Colorado River storage project. The wheeling offer of the private companies meets these same marketing criteria.

We find a double standard of operating costs applied in the Bureau's evaluation of the private utilities' offer: a reasonable annual operating cost applied to the Bureau's yardstick; an annual cost almost twice as great for the same facilities in the utilities' offer.

We find a double standard of power deliveries; bus bar deliveries for the yardstick; arbitrary and unrealistic power flows for the same power in the evaluation of the utilities' offer.

We find beneficial interconnections with other transmission systems assumed for the yardstock without consideration of accompanying costs.

Yet, despite all this, a fair and proper evaluation of the utilities' offer shows these private companies can still do the job quicker and better and cheaper.

It is about time we pulled our heads out of the sand to take a long hard look at this question of federalization of electric power. I think we would find that good time-proved American private enterprise is still the best short-range and long-range way to do things.

Mr. BECKER. Mr. Chairman, will the gentleman yield?

Mr. BRUCE. I yield to the gentleman from New York.

Mr. BECKER. Mr. Chairman, it has been said that the controversy over construction of transmission lines for the Colorado River storage project was not a public-private power fight. Several other proponents of an all-Federal transmission system have made the same statement. Well, if it is not a private-public power fight I do not know what it is. It is certainly not a reclamation question.

I say without reservation that it is a private-public power fight and one of much greater magnitude than meets the eye. It concerns a great deal more than some transmission lines for the Colorado River project. These lines are a part and parcel of a plan to greatly expand Government power. We do not want to forget for 1 minute when we vote on this question that we are not voting on a relatively small appropriation this year, we are voting for the unnecessary, wasteful expenditure of $136 million which is only a beginning that will lead to the expenditure of millions of additional Federal funds.

If you have any doubt about that, I hold in my hand a document which begins to tell the story, but only a part of it.

First, there is a letter of July 7, 1961, from a Mr. F. M. Clinton, regional director of the Bureau of Reclamation, from Salt Lake City, written to Mr. John J. Bugas, manager of Colorado-Ute Electric Association, Inc., a generation and transmission electric cooperative with headquarters at Montrose, Colo. The letter refers to discussions the two have had about the co-op building steamplants. It stated:

> For the purpose of securing a loan from the Rural Electrification Administration for the construction of a steamplant, you desired that we furnish you a statement as to the benefits that would accrue directly to the Bureau. * * *

After much other discussion, the regional director of the Bureau tells the G. & T. manager that considerable benefit to the Bureau system would result from the installation of a steamplant in the Craig area.

Here we have the Bureau of Reclamation and a generation and transmission electric cooperative scheming out a method to get a steam generating plant constructed in the Colorado River project area—a plant which, of course, which would be financed in whole by the Federal Treasury.

Next, there is a letter dated July 11, 1961, from Mr. Bugas, the co-op manager, to a Mr. Leslie Alexander, assistant manager of the Salt River project in Arizona. This letter states in substance that the Rural Electrification Administration is ready to make funds available immediately to the co-op to build a steamplant if they substantiate a need. The writer considers that the letter from the Bureau substantiates the need and the only other thing needed is for the Salt River project to issue a letter of intent to take 100,000 kilowatts of this power during the early years of the development.

A third letter in the folder is from Mr. R. J. McMullin, general manager of the Salt River project, dated August 11, 1961, to Mr. Bugas, the co-op manager, in which the Salt River project agrees to take the 100,000 kilowatts of power from the cooperative.

The last letter in this document is from a Mr. H. F. McPhail, executive director, Colorado River Basin Consumers Power, Inc., dated August 15, 1961, addressed to Mr. Floyd Dominy, Commissioner, U.S. Bureau of Reclamation. It discusses the Clinton letter and the agreement between the Salt River project and the Colorado-Ute Co-op.

The document also includes a map showing existing and proposed Bureau transmission lines in the Colorado River project area and steamplants proposed to be built by co-ops.

This is quite a document and tells quite a story. The Bureau of Reclamation, the Rural Electrification Administration, a generating and transmission cooperative and the Salt River project together working out a scheme to get an all-Federal transmission system. This is another example of the unholy alliance my colleague from Pennsylvania [Mr. SAYLOR] referred to in the fine speech he made last Thursday—an alliance that can only bring harm to the reclamation program.

The steamplant the Colorado-Ute Co-op proposes building is far removed from its own service area. Furthermore, the co-op could only use a fractional part of the capacity of the proposed plant. The Salt River project is down in Arizona some 540 airline miles and 800 transmission line miles from the proposed co-op steamplant. The Salt River project is perfectly capable of financing any additional capacity it needs on the open money market. It has been doing so for years. The Salt River project has conditioned its purchase of Colorado-Ute power upon construction by the Bureau of an all-Federal transmission line system.

These Government power advocates are not satisfied with asking the Congress to make a wasteful appropriation of $136 million tax dollars to construct unnecessary Federal transmission lines but are already planning to tap REA for millions of additional dollars of 2-percent money to construct steamplants. Even as now planned by the Bureau, the presently proposed Federal system would not deliver power to all of the preference customers, so the Bureau would have to have millions of additional tax dollars to extend the presently proposed system, or the co-ops would be borrowing additional millions of tax dollars from the Government at 2-percent interest to build lines to the Federal system. After all of this is done, then the Bureau will be back for millions of additional tax dollars to tie the all-Federal Colorado River project system in with other Federal systems.

The Government power zealots want to spend these millions of tax dollars to do a job that can be better done by the Bureau working with the five investor-owned electric companies now serving the area, and it can be done without increasing the cost of power to the preference customers. Such wild schemes do not make good sense.

COLORADO RIVER BASIN
CONSUMERS POWER, INC.,
Salt Lake City, Utah, August 15, 1961.

Mr. FLOYD DOMINY,
Commissioner, U.S. Bureau of Reclamation, Washington, D.C.

DEAR MR. DOMINY: A study made by the Colorado River Basin Consumers Power indicates that loads of our consumer-owned utilities in the States of Colorado, Wyoming, Arizona, Utah, and New Mexico, will exceed present and proposed resources in 1964. For this reason, we must construct thermal plants to supply our needs until, and following full usage of Colorado River storage project power.

In planning for thermal plants it is our opinion that by joint effort we can install fewer plants of larger capacity, while preserving the market for storage project power.

The fossil fuel plant power requirements of consumer-owned utilities in the five-State area, in addition to absorption of stor-

age project power, will be about 1 million kilowatts by 1970. In fact, the thermal plant requirements of Salt River project, over and above present resources, and storage project power, is expected to be 700,000 kilowatts by 1970.

By interconnecting thermal plants to the all-Federal transmission system, the greatest amount of storage project power can be moved with the least amount of line construction. Construction of thermal plants by our group further improves the reserve capabilities of the system, provides additional standby, and thus further substantiates the Bureau's claim that no outside standby line or generating capacity payments will be necessary.

The use of the all-Federal system for displacement or actual transmission of thermal power and energy enhances the project payout because in the first case, fewer lines and thus lesser investment is needed, and, in the second case, collection of wheeling charges by the Bureau would enhance project revenues. Mr. Frank M. Clinton, regional director, region IV, U.S. Bureau of Reclamation brought this out in his July 7 letter, copy attached.

Thermal plants such as those proposed for construction by our group in the coal bearing areas as shown on the attached map justify construction of the second 345-kilovolt line between Glen Canyon and Phoenix. Displacement will keep this link of the transmission system fully loaded.

Construction of thermal plants by our group will (a) develop fossil fuel fields to assist the coal mining industry whose economy is one of the hardest hit in our country and (b) provide mutual interconnection benefits to both private utilities and the Bureau of Reclamation.

Mr. Clinton's letter of July 7 stated that such plants will enhance the overall Bureau system. This decision has prompted the Colo-Ute Electric Association and the Salt River project to proceed with plans to construct a plant in the coal bearing area as indicated in attached letter agreement dated August 11, 1961. Such construction, however, is necessarily predicated on the construction of a Federal system for transmission of power and energy. In the absence of such lines plants burning higher cost natural gas would have to be constructed in central and southern Arizona.

Sincerely,

H. F. McPHAIL,
Executive Director, Colorado River Basin, Consumers Power, Inc.

SALT RIVER PROJECT,
Phoenix, Ariz., August 11, 1961.

COLORADO-UTE ELECTRIC ASSOCIATION, INC.,
Montrose, Colo.

(Attention of Mr. John J. Bugas, general manager).

GENTLEMEN: You have advised us of Colorado-Ute's intention to construct a coal-fired steam generating station of about 150 megawatts capacity on the coalfields of northern Colorado to be placed in operation in 1964, provided Colorado-Ute can obtain a market for approximately 100 megawatts beginning in 1964, with decreasing amounts thereafter in equal increments to a minimum of 60 megawatts by 1974, and can also obtain the necessary standby power to back up the station during emergency and planned outages.

Mr. Clinton, regional director, region 4, of the Bureau of Reclamation, in his letter to you of July 7, 1961, indicates that the planned Bureau transmission system for the Colorado River storage project would have sufficient capacity to transmit to preference customers in the southern division (Arizona and parts of California and Nevada) the power and energy you propose to market and that such capacity would be made available for this purpose, and also to furnish you with standby power. You have asked whether our project would be interested in entering into a power interchange arrangement with Colorado-Ute along the lines stated above.

You have also informed us that funds for construction of the station would be obtained through a loan from the Rural Electrification Administration and REA has requested you submit a letter of intent from our project with your loan application which states the general terms and conditions under which the project would be willing to purchase power from Colorado-Ute assuming our project desires to make such arrangement. It is understood, also, that you have instructed your engineers to undertake immediately a site selection study.

Consequently, if the Bureau constructs the transmission system for the Colorado River storage project in accordance with its plans submitted to this Congress and makes transmission capacity available as aforesaid, you may consider this letter as a definite commitment of the Salt River project agricultural improvement and power district, a preference customer of the southern division, to take and/or pay for electric power and energy from your proposed station, it being understood that such power and energy will be available to our project at the Bureau delivery point for storage project power near Phoenix, Ariz.

It is further understood that purchases by our project will be approximately 100 mw. in March 1964, with decresing amounts for the remainder of the 10-year purchase. This agreement is contingent upon the availability to us of 100 mw. from said plant by March 1964. The charges for this service would be expected to represent a pro rata share of the fixed cost on the station based on our project's year-to-year participation and the actual cost of fuel for the energy delivered plus any transmission charge imposed by the Bureau, provided the average cost per kilowatt-hour does not exceed the amount which has been agreed upon by the parties.

Our project will, to the extent of its own available reserve resources and those available by contract with others, provide Colorado-Ute standby power for purpose of emergency outages in an amount not to exceed 150 megawatts during the 10-year period. Provided that planned outages are confined to the months of October through March and coordinated with our unit maintenance schedule our project will provide planned outage standby power for the proposed unit during the 10-year period. Charges shall represent the incremental costs for energy plus any transmission charges imposed upon delivery by the Bureau.

We contemplate that, in addition to the above purchase and sale provisions, the final contract may provide for standby to the project and reciprocal excess energy arrangements to the extent possible within the limitations of either party, cooperation and coordination in making future system additions and in operation of the respective systems for interchange of power between the systems, and the establishment of a committee to administer the contract. The usual contract language relating to standard provisions would be a part of the agreement.

It must be emphasized such a contract is possible only if the Bureau proceeds with its plans for the storage project transmission system, and as a common carrier feature thereof does make available transmission capacity for the purposes of this contract. The proposed formal written agreement, when prepared, shall be subject to the approval of our respective boards of directors and such others as may be deemed necessary.

Yours very truly,

R. J. McMULLIN, *General Manager.*
SALT RIVER PROJECT, AGRICULTURAL IMPROVEMENT AND POWER DISTRICT.

COLORADO-UTE
ELECTRIC ASSOCIATION, INC.,
Montrose, Colo., July 11, 1961.

Mr. LESLIE M. ALEXANDER,
Assistant Manager, Salt River Project, Phoenix, Ariz.

DEAR LES: Recent studies completed by Colorado-Ute indicate that it is both practical and feasible for Colorado-Ute to construct a 150 megawatt steamplant on the coal fields of northern Colorado providing that Colorado-Ute can, in the early years, sell to the Salt River project, or to some other customer, approximately 100 megawatts from this plant.

Recent board studies conducted by the Bureau of Reclamation reveal that it is possible to transmit, over the storage project transmission system, power and energy from a plant located in northern Colorado to the Salt River project in Phoenix, Ariz. These studies also indicate that such a plant located in northern Colorado would be beneficial to the Bureau of Reclamation and to the preference customers.

The Rural Electrification Administration has indicated that it will make loan funds available immediately for the construction of this plant based on the fact that our loan support study does substantiate the need for this powerplant.

REA has, however, requested that we obtain a letter from the Bureau of Reclamation which will support the need for construction of the plant during the early years of operation of the storage project and which, in a general way, will indicate that the storage project transmission system may be used to transmit power to beneficiaries of the Rural Electrification Act and other preference customers in the basin.

We are enclosing a copy of Mr. Clinton's letter which we feel does state the need for the construction of a steamplant in northern Colorado, and further does set down the general policies under which the transmission system will be made available for power and energy interchange.

REA has also requested that our loan application include a letter of intent from the Salt River project stating briefly the general terms and conditions under which it would be willing to purchase power from Colorado-Ute. It is understood that this letter of intent will provide the basis for negotiating the interchange power contract between the Salt River project and Colorado-Ute.

Your letter of intent should cover the points outlined in the enclosed suggested draft.

It is our intention to complete our loan application within the next 2 weeks, and to submit the request for loan funds to the Administrator about August 1, 1961.

Very truly yours,

JOHN J. BUGAS,
General Manager.

U.S. DEPARTMENT OF THE INTERIOR,
BUREAU OF RECLAMATION, REGIONAL OFFICE, REGION 4,
Salt Lake City, Utah, July 7, 1961.

Mr. JOHN J. BUGAS,
Manager, Colorado-Ute Electric Association, Inc., Montrose, Colo.

DEAR MR. BUGAS: Reference is made to the discussions held with you in Salt Lake City in regard to the association's proposal to construct a steamplant near Craig, Colo. At that time you advised that the principal concern and reason for proposing construction of such a steamplant would be to provide the preference customers with a guarantee of service in the event low water years prevented the filling of Glen Canyon Reservoid sufficiently to supply the amounts of power that would then be required by the preference customers. You proposed a method of operation wherein a portion of the plants' output would be used to supply

the requirements of the Salt River project in order to provide it with a firm source of power during the initial years of operation of the Glen Canyon powerplant.

For the purpose of securing a loan from the Rural Electrification Administration for the construction of a steamplant, you desired that we furnish you a statement as to the benefits that would accrue directly to the Bureau and the extent to which these benefits would be available to its customers. Total loads of REA cooperatives in the northern division that could be supplied from the storage project would amount to about 50 megawatts in December 1963. Under the proposed construction schedule for Flaming Gorge, sufficient power would be available from that plant to supply these loads. Studies also show that by August 1964 requirements of REA cooperatives including those in the southern division would amount to approximately 120 megawatts. December 1964 requirements for this latter group of cooperatives would be about 95 megawatts. Under the present construction schedule for Glen Canyon powerplant there would not be capacity to supply fully the August 1964 REA and other preference customer loads even with favorable water conditions. As a matter of fact, the load estimates show that storage project power even with favorable water conditions would fully supply the preference customer summer requirements only in 1966. Other sources of supply in addition to the storage project will be needed. If water conditions were such that the dead storage space in the Glen Canyon Reservoir could not be filled, there would be no generation at Glen Canyon. Under this condition a much larger portion of the needs of all the preference customers in the market area, including the REA cooperatives, could not be filled from storage project power.

In order to be assured of a continued power supply not available from the storage project in event of low water conditions, some of the cooperatives would have to commit themselves to long-term contracts for a power supply from other sources and would for the term of these contracts lose the benefits of storage project power. This would be particularly true of those cooperatives who do not have their own generation. Your proposed powerplant could constitute a firm and reliable source from which power could be obtained to permit the Bureau to meet contract commitments for storage project power for these REA and other customers in the event of low runoff of the Colorado River during the initial years of operation of the storage project plants.

In order to assure that generation from your plant would be available to REA cooperatives and other preference customers, the Bureau transmission system would have to have sufficient capacity and be utilized for delivery of power. The charge for this service has not been determined. Charges for transmission service would have to be considered in two categories; i.e., (1) when power and energy from your steamplant is purchased and delivered by the Bureau in lieu of storage project power, and (2) when steamplant power is delivered in addition to storage project power. Our studies show the system would have the necessary capacity and we would agree to make it available for this purpose. In the first case a wheeling charge would not apply and in the second case the charge would be commensurate with the cost of transmission, taking into consideration net benefits that might accrue to the Colorado storage project, and to REA cooperatives and other preference customers.

Our studies show that considerable benefit to the Bureau system would result from the installation of the steamplant in the Craig area particularly if this power were used in future years as a supply for preference customers in the southern division. Through displacement, power to the southern division would be supplied from Glen Canyon while the northern division customers could be supplied from generation from the proposed steamplant. Transmission losses could be reduced, fuel costs for energy at a mine-mouth steamplant would be lower than fuel costs in the southern division from natural gas or coal transported to the area. The location in northwestern Colorado for the proposed steamplant is ideal to provide the stabilizing influence inherent in synchronous machines. The proposed steamplant would also reduce the requirement for synchronous condensers in the Craig, Colo., area for voltage regulation and provide more reserve capacity. Integrated operation of the steamplant with the hydroplants at Flaming Gorge, central Utah project, and Curecanti would permit full utilization of peak capacity of these plants. Consideration is being given to possible increases in the peaking capacity in the latter two plants.

The basis for determining firm power supply from the storage project is the use of average generation over a longtime period with purchase of off-peak energy during the years of less than average flow to maintain the average. An arrangement whereby this offpeak thermal energy could be supplied from your proposed steamplant would be an efficient and desirable arrangement.

Further discussions with you and additional studies would be required in order to determine the details and arrangements that would be required in order to properly integrate the steamplant output with hydropower from the storage project. If the steamplant is located near Craig, it would be desirable to terminate the 230-kilovolt line north from Curecanti at the plant rather than at Rangely. The necessity for additional lines will need further study along with the possibility of delaying construction of other contemplated lines. Due to the urgency of initiating construction of transmission lines necessary to accomplish satisfactory integration of the steamplant with the storage project, it is urgent that any decisions in this matter be made as soon as possible.

Very truly yours,

F. M. CLINTON,
Regional Director.

Mr. KIRWAN. Mr. Chairman, I do not want to take any more time of the Committee. There has been enough said on this question already.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa [Mr. JENSEN].

The question was taken; and the Chairman announced that the "noes" appeared to have it.

Mr. RHODES of Arizona. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. JENSEN and Mr. EVINS.

The Committee divided, and the tellers reported that there were—ayes 114, noes 135.

So the amendment was rejected.

The Clerk concluded the reading of the bill.

Mr. SELDEN. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. SELDEN. Mr. Chairman, the appropriation bill under consideration contains $750,000 for beginning construction on the Holt lock and dam located on the Warrior River in the congressional district I have the privilege to represent. This project, part of the overall plan for the full development of the Warrior-Tombigbee River system, will complement and supplement the modern Warrior, Demopolis, and Jackson locks and dams that have improved 350 miles of the channel by eliminating nine inadequate navigation structures between Tuscaloosa and the mouth of the river at Mobile. The Holt lock and dam itself will replace four obsolete structures which present one of the last major bottlenecks to efficient navigation on the waterway. Its construction is the next step in the carefully considered, expertly devised blueprint which the Army's Corps of Engineers has projected to harness this major river system to serve the growing needs of the people along the waterway.

Those of us who have worked through the years to obtain first the authorization and then the planning funds for this important structure, which is so urgently needed for the efficient movement of commerce along the upper reaches of the Warrior-Tombigbee River system, were exceedingly pleased when the members of the Appropriations Committee approved the budgeted funds of $750,000 for beginning actual construction on the Holt lock and dam. We are most appreciative of the consideration always extended to us by the members of the committee, and we are grateful for the interest they have shown over the years in the program to improve the Warrior-Tombigbee Waterway.

By drastically reducing locking time and eliminating delays caused by traffic congestion, highwater closures and other hazards, the Holt lock and dam will greatly reduce the voyage time for the movement of commerce along the waterway. It is expected that it will also offer public recreation facilities. In addition, a power installation of 40,000 kilowatts is contemplated in the project. It has been anticipated that the installation of these power facilities would be undertaken by the Alabama Power Co. under a license issued by the Federal Power Commission. Although an application for a license was filed by the Alabama Power Co. on November 5, 1959, the Appropriations Committee on pages 29 and 30 of the report correctly points out that a license has not yet been granted. The committee in its report urges that the Public Works Committee consider authorizing Federal construction of the power facilities. In view of this recommendation, I feel it important to review the steps leading to the Alabama Power Co.'s application for a license to install a powerhouse at the proposed Holt lock and dam.

Under a license issued by the Federal Power Commission on September 12, 1957, the Alabama Power Co. constructed the Lewis Smith Dam, located on the Sipsey Fork of the Warrior River. This 300-foot-high structure is one of the largest earthfill dams in the entire world, and its reservoir is able to furnish the Birmingham district with a new industrial water supply of approxi-

mately 75 million gallons of water daily. Power facilities are presently being installed at the Bankhead lock and dam on the Warrior River by the Alabama Power Co. under the same license.

In May 1956, the Alabama Power Co. filed an application for a preliminary permit to install a powerhouse at the proposed Holt lock and dam. The permit was granted on January 7, 1957. This action was followed by an application for a license submitted by the company on November 5, 1959, and an application for amendment in April 1961, with a second amendment in June 1961.

It is important to note that power development at both the Bankhead lock and dam and the Holt lock and dam is justified solely by streamflow regulation furnished by the Alabama Power Co.'s Lewis Smith Dam.

Water required for lockage at Holt lock and dam is estimated by the U.S. Corps of Engineers at 300 cubic feet per second. The natural flow in the Warrior River during low-flow periods is less than this amount, and no water is available for power. Discharges from Lewis Smith Dam increase this flow during dry periods to approximately 1,100 cubic feet per second, justifying an installation of 40,000 kilowatts at Holt lock and dam. This power available at Tuscaloosa will improve the reliability of electric service to industrial and other customers in the Tuscaloosa area.

The Alabama Power Co. expects to spend approximately $10 million on power facilities at the Holt lock and dam. It is estimated that the company will pay Federal taxes of some $386,000 per year on this project and State and local taxes of approximately $114,000.

The Alabama Power Co. has studied this project continuously since 1956 and has spent a considerable sum in developing a plan satisfactory to the Corps of Engineers and the Federal Power Commission.

Mr. Chairman, certainly I am not opposed to the development of power facilities by the Federal Government. As a matter of fact, I have voted to bring about such development. For example, I supported legislation in 1959 which gave the Tennessee Valley Authority permission to expand its facilities through the issuance of $750 million in bonds. Today I am supporting funds for Federal construction of certain electric power transmission lines for the Colorado River storage project. At the same time, I recognize the importance of partnership projects in the development of our river systems. For instance, I joined with the majority of my colleagues from Alabama in introducing and supporting legislation that is making possible the development of the Coosa-Alabama River system jointly by the Federal Government and private industry.

In view of what has already transpired in connection with three constructed or proposed hydroelectric structures on the Warrior River and its headwaters, Mr. Chairman, I cannot concur with the committee's recommendation that the Public Works Committee should at this late date consider authorizing Federal construction of the power facilities at the Holt lock and dam.

Mr. Chairman, I have been authorized by the gentleman from Alabama [Mr. BOYKIN], the gentleman from Alabama [Mr. GRANT], the gentleman from Alabama [Mr. ANDREWS], the gentleman from Alabama [Mr. RAINS], the gentleman from Alabama [Mr. ROBERTS], and the gentleman from Alabama [Mr. HUDDLESTON], to state that each of them have reached the same conclusion expressed in my remarks.

Mr. JONES of Alabama. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. JONES of Alabama. Mr. Chairman, I rise to express my great gratification and support of the action of the Appropriations Committee with respect to Holt lock and dam on the Warrior River in Alabama. The amount of $750,000 has been included by the committee to begin construction on this project. This is a great advancement in the multipurpose development of the Warrior system, a project that means so much to the development of our great State. A power installation of 40,000 kilowatts is to be included. For some time a permit from the Federal Power Commission has been held by the Alabama Power Co. to investigate the feasibility of construction of the power installation by non-Federal interests, namely, the Alabama Power Co. The Appropriations Committee has noted that so far a license for this work has not been granted as yet. It further urges that the Public Works Committees consider authorizing Federal construction of the power facilities. It states that this is based on testimony by both the Corps of Engineers and the Southeastern Power Administration that the power could be efficiently used in the Southeastern Power Administration marketing area and that it is needed to meet expanding requirements of preference customers.

The project for the Black Warrior-Warrior-Tombigbee system has been under the jurisdiction of the Federal Government for navigation and power development since 1884. There have been 14 congressional acts from that time to date which have authorized the construction of the channel and the necessary locks and dams. In 1937 a modernization program was started to replace the old structures. Most of this replacement has now been accomplished. The construction of the Holt lock and dam, approved by the Secretary of the Army in December 1958, will replace the four old locks immediately above Tuscaloosa and represents the last unit in the modernization program.

In 1956 the Corps of Engineers submitted to Congress a report on the headwaters of the Warrior River in which they found that power development was economical and feasible at several of the future dams and also at one dam which was to be reconstructed. Under the authority of the 1909 River and Harbor Act, the Secretary of the Army has recommended power development at the Holt lock and dam. Unfortunately the Alabama Power Co. stepped in about that time and sought to take over the power features of some of these proposed projects. I regret to say that they have succeeded in some cases. They have had a permit for a considerable period of time to investigate the power potential at the proposed Holt lock and dam, but they have never been granted a license by the Federal Power Commission. The Commission has specifically given the company 30 days in which they should show cause why a license should be issued to the company for development of power at the Holt site. It is my sincere hope that when the matter is gone into in detail the Federal Power Commission will refuse to grant this license.

As a member of the Public Works Committee, I am very anxious to take up the suggestion of the Appropriations Committee and to see to it that power is authorized and developed by the Federal Government.

Mr. Chairman, I cannot find words strong enough to express my views of private power companies like the Alabama Power Co. taking over the cream of the Nation's water resources for the benefit of a few, when power development, which is one of the most productive of the water uses, should benefit all the people. I can point out many examples where public power development has created prosperity and strengthened the economy beyond all expectation. The Tennessee River development by the Tennessee Valley Authority and the Columbia Basin are outstanding examples where the tremendous development under a comprehensive project by the Federal Government has benefited all the people not only because of flood control, navigation, and land reclamation but the generation of huge amounts of hydroelectric power which alone has been responsible for the growth of industries in these areas and has made it possible to create an entire new economy for the people of the Tennessee Valley and for those in the Pacific Northwest.

These rivers, the Black Warrior, the Warrior, and the Tombigbee, should not be developed by the Federal Government with the cream being given to private power companies. It is the people's money which goes into these projects, into these river basin developments, and the people should reap the benefit which flows from the power developed by the generators and turbines.

I congratulate the chairman and the members of the Appropriations Committee for taking the public-spirited approach and having the foresight to include funds for Holt lock and dam for construction by the Federal Government, the power to be sold through the Southeastern Power Administration to the benefit of all the people served by that great system.

The scheme for the multipurpose development of the Warrior will give the preferential customers—the people of Alabama—opportunities to acquire power through rural cooperatives and municipal distribution systems. This, of course, means that the water resources of

Alabama shall be appropriated for public use and not for private profits.

Mr. HUDDLESTON. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. HUDDLESTON. Mr. Chairman, as you know, I have the privilege of representing the Ninth District of Alabama. This district comprises Jefferson County, Ala., in which Birmingport at the headwaters of the Warrior-Tombigbee Waterway is located. The Holt lock and dam is to be located on the Warrior River a few miles below or downstream from Birmingport. This lock and dam, when completed, will replace four existing obsolete locks and dams and not only will accelerate locking time and towing speeds but will generally eliminate unfavorable navigation conditions.

We in Alabama are delighted that the House Appropriations Committee has approved $750,000 for the commencement of construction of the Holt lock and dam which is so vital to the continued development of the Warrior-Tombigbee Waterway and the many industrial and agricultural communities which it serves.

The Appropriations Committee in its report recommended that consideration be given by the House Public Works Committee to authorize Federal construction of power facilities at the Holt Dam.

In May 1956 the Alabama Power Co., the public utility which serves the area surrounding the proposed location of the Holt lock and dam, filed an application with the Federal Power Commission for a preliminary permit to install electric power generating facilities at this dam. This preliminary permit was granted on January 7, 1957. Pursuant to and in reliance on this permit, the Alabama Power Co. has studied this project continuously and has expended substantial sums of money and the time of its personnel in good faith in developing its plans. On November 5, 1959, the company filed its application for a license with the Federal Power Commission. If this license is granted, the company will construct the required facilities at a cost of approximately $10 million.

As a result of the power facilities at Holt lock and dam, the company will pay taxes annually in the approximate amount of $500,000.

It is my hope that the license application of the Alabama Power Co. will be approved by the FPC as soon as practicable and that the study suggested in the Appropriations Committee's report will not cause undue delay in the construction of the power facilities at the Holt lock and dam.

Mr. HIESTAND. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HIESTAND: On page 24, after line 3, insert a new section as follows:

"TITLE IV—GENERAL PROVISIONS

"SEC. 401. Funds appropriated in this Act shall not be available for apportionment or obligation in excess of 90 per centum of the amounts specified herein except in the event of national emergency declared by the President."

Mr. HIESTAND. Mr. Chairman, this may seem a unique amendment. I view it as a rare opportunity for every Member in this House. Here is an opportunity to vote for fiscal responsibility against inflation and for all the things that we feel made this country. Here is an opportunity to do all of these things without any district or any area or any project getting really hurt. It would reduce the availability of funds 10 percent right across the board. We can say there are a few, perhaps, the extreme cases where a project cannot take a 10-percent cut, but I suggest to you, Mr. Chairman, that every Member here knows that practically all of his projects, his pet projects, can take a 10-percent cut without really getting hurt. Here is a chance to register as voting for fiscal responsibility. Here is a chance to go back to our districts and say, "I voted to cut the so-called pork barrel bill."

Mr. TABER. Mr. Chairman, will the gentleman yield?

Mr. HIESTAND. I yield to the gentleman from New York.

Mr. TABER. Does the gentleman realize the bill carries appropriations amounting to $3,700 million?

Mr. HIESTAND. I thank the great Member from New York and I do very much realize what the gentleman from New York says. This would be a substantial cut which would save your country and mine $360 million. We can vote for that saving without anybody getting hurt very much. I might say the district I represent, or part of it at least, has $16 million in there. It would cut it $1,600,000 and it is not easy to take.

We know that these project requests, when they come in, have been made in a generous way.

The Committee on Appropriations has conscientiously gone over them and has cut them here and there where they felt they could be cut without getting hurt. But here is a chance we rarely have. This whole bill is a tremendous bill. It can save $360 million of the taxpayers' money. Mr. Chairman, that should be worth saving. While we might say that one particular project where the work is done and the amount is only enough to pay the bill—in extreme cases like that, a supplemental appropriation can catch it up next January. I know there will be some. There are bound to be some of them. As a matter of fact, there will be some in the next supplemental anyway. If we can cut another $360 million from this bill, we, Members of the House, can vote that way and can go back to our districts and report, "I voted to cut the so-called pork barrel bill," for which we are all paying, by $360 million. I think it will be a real achievement. I hope the House will consider this amendment and that every Member can go back to his district and say, "I voted to cut the so-called pork barrel bill."

Mr. EVINS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I oppose this amendment. It is a meat-ax approach and an unintelligent approach after the committee has studied this matter at length and the committee did cut $40 million out of the bill. For the Corps of Engineers the total amount of the cuts would be more than $70 million. The great bulk of the cut would fall on the Atomic Energy Commission which is vitally concerned with national defense. It would also cut out funds for atomic testing which is underway at this time. I do not think the Congress wants to do that.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. EVINS. I yield to the gentleman from Massachusetts.

Mr. BOLAND. As the gentleman from Tennessee has pointed out, this is a 10 percent across-the-board cut. We have already cut this bill by more than $70 million. We have taken account of slippages in this bill and I think we have gone as far as we possibly can go.

As the gentleman from Tennessee pointed out, I would remind the House that if this amendment carries, we will be cutting out of the Atomic Energy Commission more than $200 million. That is the real effect of this amendment.

Mr. HIESTAND. Mr. Chairman, will the gentleman yield?

Mr. EVINS. I yield to the gentleman from California.

Mr. HIESTAND. May I direct the attention of the gentleman to the last line of the amendment, which states that the President, in case of an emergency or extreme need, could allow the expenditure in excess of 90 percent. They can expend 90 percent without any question, and the President has the authority to grant that additional amount by way of an exception in extreme cases.

Mr. EVINS. I think the amendment should be voted down. It is most unwise at this time.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California [Mr. HIESTAND].

The amendment was rejected.

Mr. BOLAND. Mr. Chairman, I move that the Committee do now rise and report the bill back to the House with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker pro tempore having assumed the chair [Mr. BOGGS], Chairman of the the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 9076) making appropriations for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority, and certain study commissions, for the fiscal year ending June 30, 1962, and for other purposes, had directed him to report the bill back to the House with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended do pass.

Mr. BOLAND. Mr. Speaker, I move the previous question on the bill and the amendment thereto to final passage.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the amendment.

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. JENSEN. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. JENSEN. I am, Mr. Speaker, in its present form.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. JENSEN moves to recommit the bill H.R. 9076 to the Committee on Appropriations with instructions to report the same back forthwith with the following amendment: Page 11, line 13, strike out "$55,468,000" and insert "$51,243,000"; and on page 11, line 14, strike out "$53,268,000" and insert "$49,043,000"; and on page 11, line 24, strike out the period, insert a colon and the following proviso: *"Provided further,* That no part of the funds herein appropriated shall be available for constructing the following transmission lines and facilities:

"Vernal-Provo No. 1 transmission line and substation 138 kilovolts;

"Craig-Sinclair transmission line and substation 115 kilovolts;

"Glen Canyon-Sigurd-St. George transmission lines and substations 138 kilovolts;

"Glen Canyon-Phoenix transmission lines and substations 230 kilovolts (double circuit);

"Four Corners-Albuquerque transmission line and substation 230 kilovolts (double circuit);

"Curecanti-Rangely transmission line 230 kilovolts;

"And the Gunnison-Midway section of the Curecanti-Midway transmission lines and substation."

Mr. CANNON. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the motion to recommit.

Mr. JENSEN. Mr. Speaker, on that I ask for the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Under the order of the House of September 7 further consideration of the bill will go over until tomorrow.

GENERAL LEAVE TO EXTEND

Mr. JENSEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. GROSS. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. GROSS. Does this mean that the rollcall on this bill is ordered for tomorrow?

The SPEAKER pro tempore. That is correct.

Mr. GROSS. Would this be the first order of business tomorrow?

The SPEAKER pro tempore. Not necessarily.

ADMISSION OF CERTAIN ALIENS

Mr. WALTER submitted a conference report and statement on the bill (S. 2237) to permit the entry of certain alien orphans.

TWENTY-FIFTH ANNIVERSARY OF TRAFFIC INSTITUTE OF NORTHWESTERN UNIVERSITY

Mrs. CHURCH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Illinois?

There was no objection.

Mrs. CHURCH. Mr. Speaker, I rise today to inform the Congress that on October 14, 1961, the Traffic Institute of Northwestern University will celebrate its 25th anniversary. On that day, its approximately 1,000 graduates, and thousands of other persons—former faculty members, patrons, and friends, as well as current students and members of the institute staff—will attend day-long activities on the campuses of Northwestern University in Evanston and in Chicago.

I rise also today to pay my personal tribute to the Traffic Institute of Northwestern University for the immeasurable contribution that it has made to human safety, through its emphasis on the need and training for traffic control and accident prevention, during the quarter-century since its founding.

It is difficult indeed to overemphasize what the institute has accomplished for America and for the entire world in its efforts to solve the safety problems that have arisen through the growing magnitude of motor vehicular use. When the institute first opened its doors, the traffic death rate was 15.1 deaths per 100 million vehicle miles: last year, the National Safety Council reported a mileage death rate of 5.3.

The traffic institute, established in 1936 as a police traffic training school, now includes in its program virtually all types of traffic training, field and extension services, research and development, a legal information service, and publications in the field of street and highway traffic. It provides training for police, traffic engineers, motor vehicle fleet supervisors, driver license personnel, members of the military forces, traffic court judges and prosecutors, and others concerned with the movement and safety of traffic.

The institute assists in establishing training programs at various universities and colleges and collaborates on programs with the American Bar Association, the International Association of Chiefs of Police, the National Safety Council, and other organizations. Its guiding principle is that the traffic problem will yield more readily to the combined talents and resources of all who are working for traffic safety rather than to those of any one agency or force.

Through its publications and training materials and its well-known research project, "Case Studies of Traffic Accidents"; through its field training programs in communities throughout the country; and through the efforts of traffic institute-trained police—many of whom now serve as heads of State, county, and city police departments—significant headway has been made in the reduction in accident frequency and severity, relief of traffic congestion, and the acceptance of traffic safety programs by the public and local governments.

The city of Evanston, in which my home is located, is proud to note that it was a lieutenant of the Evanston Police Department, Franklin M. Kreml, who in 1932 first conceived the idea of a traffic institute, and became its first director when it was established in 1936 with the financial backing of the Automotive Safety Foundation of Washington, D.C., and the Kemper Foundation for Traffic Safety, Chicago.

The six founders of the institute who are to be particularly honored by a silver anniversary tribute at the celebration on October 14 are the Honorable James S. Kemper and Hathaway C. Kemper, insurance executives and civic leaders; the Honorable Paul G. Hoffman and Norman Damon, automotive industry leaders; Andrew J. Kavanaugh, veteran police official, and Franklin M. Kreml. Honor will also be paid at the coming celebration to two former directors of the institute—Robert E. Raleigh and Robert L. Donigan—and the present director, Bernard R. Caldwell.

It was the vision of these men and their dedication to public service which led them to sponsor and buttress the progress of the traffic institute in the important field of traffic safety. So signal has been the success of the institute that it is well-termed throughout the world as "the West Point of traffic policing."

THE JACK PAAR INCIDENT

Mr. SHORT. Mr. Speaker, I ask unanimous consent that the gentleman from Illinois [Mr. HOFFMAN], may extend his remarks at this point in the RECORD and revise and extend his remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

Mr. HOFFMAN of Illinois. Mr. Speaker, much has been said and written within the past few days with respect to the untimely filming of a television show on the tense East-West Berlin border by Jack Paar. I call to your attention the item which appeared in the Chicago Daily Tribune of September 12, 1961.

In spite of Mr. Paar's repeated statements that foreign newspapers are supporting his position, it appears from the news item referred to, that the paper closest to the incident does not concur in his statements. In my opinion these films should not be shown because they were taken for the benefit of a few while endangering the safety of many. Mr. Paar's actions before the last election might entitle him to some consideration,

but this incident goes far beyond propriety. It is most difficult to believe that Mr. Paar was given this permission by an Army colonel. The authorization must have come from a much higher echelon.

The news story follows:

PAAR TOLD TO "GET LOST" BY BERLIN PAPER

BERLIN, September 11.—The West Berlin newspaper B.Z. said today that Jack Paar, television comic, "soiled the honor" of American soldiers defending the city and made them "extras in a cheap propaganda trick."

The newspaper, in an editorial titled, "Get Lost, Mr. Paar," said, "Pack your bags and go back to the United States. Your countrymen are very welcome here all the time and so are American journalists but we can do without you."

FILMS SHOW AT BORDER

The powerful newspaper criticized Paar for filming a television show on the tense East-West Berlin border last Thursday. Six officers, including 2 colonels, and 50 armed American soldiers, took up positions at the Friedrichstrasse crossing point while Paar filmed the show. It will be released in the United States tomorrow.

The Army relieved one officer of his duties and admonished another as a result.

"American soldiers stand here along with British and French soldiers to defend the freedom of our city," the B.Z. said. "We thank them and respect them. But you, Mr. Paar, have soiled the honor of these soldiers and debased them to extras in a cheap propaganda trick."

RAP HIS MOTIVES

"We have no understanding for a television comic trying to gain personal popularity out of the Berlin crisis. We agree with the American public and politicians who say 'the Berlin crisis is bitterly serious and is no backdrop for play acting,'" the B.Z. said.

The newspaper said soldiers guarding the border were game.

"Draw the proper conclusion, Mr. Paar," the newspaper said. "Pack your bags and get out." Paar left here for Paris last night.

THE NATIONAL DEFICIT

Mr. SHORT. Mr. Speaker, I ask unanimous consent that the gentleman from Pennsylvania [Mr. SAYLOR], may extend his remarks at this point in the RECORD and revise and extend his remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

Mr. SAYLOR. Mr. Speaker, were it not for the fact that the general populace has become callous to the Federal Government's habit of perennially spending above its revenue, Secretary of the Treasury Dillon's statement on television Sunday would have created quite a start hereabouts. His estimate of $6 billion as the Government's deficit during the current fiscal year would seem to be enough to disturb the aware, the apathetic, and the visionary.

Despite the enormous revenue that will accrue to the U.S. Treasury, the administration now admits that it will be $6 billion in the red for the 12 months ending next June 30. Six billion dollars, I might point out, still constitutes a lot of spending money, even with the dollar devaluated to present levels. Left in the hands of taxpayers, $6 billion could buy almost 2½ million automobiles, thus supporting the economy not only of the Detroit area but in the steel towns of Pennsylvania, in mining communities, and in Akron, and everywhere that parts and accessories are manufactured.

Looking at this pile of money from another angle, it would be enough to allow 10 million Americans to take a nice vacation from border to border or coast to coast and provide needed revenue for railroads besides stimulating hotel, restaurant, and other consumer service business.

At many of our junior colleges and universities, 4 million students could matriculate at a total cost of no more than $6 billion. In any case, $6 billion in the hands of the people who earn the money would do the country in general a lot more good than to have it dispersed and dissipated by a bureaucratic government. Unfortunately, the amount about which we are speaking in this instance is not even going to be collected by the Federal Government; it is merely going to be added to the colossal national debt, thus firing the flames of inflation and making the necessaries of life more difficult for wage earners and retirees to obtain.

If anyone is so naive to assume that any substantial part of an additional $10 billion expected to accrue to the Federal Treasury in the fiscal year beginning next July 1 is to be used to reduce the debt, a news story in yesterday's New York Herald Tribune would quickly put such hopes to rest. According to that report, President Kennedy is getting a $90 billion spending budget—largest in the Nation's peacetime history— ready to submit to Congress when it returns in January.

In the past week the President himself has voiced grave concern over conditions that may put the current more moderate inflationary climb into an acute upward binge. The President is to be commended for stating publicly that inflation seriously imperils the national economy. Congress must do everything possible to assist in holding down the line through the utilization of whatever means are legitimate and desirable.

Tomorrow the House is scheduled to have an opportunity to restate its case against an unnecessary expenditure of $58 million. That is the amount which the House-Senate conference committee now places on the proposed electric powerplant at Hanford, Wash. It represents a savings of $37 million over the amount stipulated in the bill to which we have objected on three separate occasions, but I submit that it does not take a financial expert to reach the conclusion that the U.S. Government is in no position to lay out $58 million—or even $58—for this kind of nonsense.

The contraption planned for Hanford has no relationship to the national defense. It offers no opportunities for technological progress. It would subordinate another encampment of workers to Federal authority through the medium—direct or indirect—of the payroll.

All this news about the present plunge into another $6 billion debt, plus estimates for next fiscal year's budget, should prompt every Member of Congress who has not previously objected to Hanford to reappraise his position. If ever there was a time that anything but absolutely essential appropriations should be cut off, this is it. The big defense outlays have been occasioned by the roars of the big Red bear which may actually be afraid to carry out his threats. Perhaps he is attempting to divert attention from other insidious activities throughout the world. Whatever the intent, there is very definitely immediate danger of an explosion that could bring the universe into the most tragic holocaust of all times.

The Federal budget does not take an all-out emergency into consideration. The Herald Tribune explained it this way yesterday:

Defense spending could climb even more sharply than now is planned if international tensions become worse but officials see virtually no chance of a move in the other direction—of a dramatic international improvement that would make it possible to cut back military programs.

The prospect imposes a new responsibility upon Congress. We are morally obligated to disenchant any group or region of any ambitions for special projects at the expense of the National Government. The temper of the times calls for caution, economy, and unselfishness. The House cannot under any circumstances permit the conference report on the AEC authorization bill to be enacted. The dawning of an adjournment does not lessen the urgency of our case. The Senate's disdain of our decision must be met with the answer that has already thrice been served: in the national interest, the Hanford power project must be stricken.

CIVIL RIGHTS LEGISLATION

Mr. SHORT. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. LINDSAY] may revise and extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

Mr. LINDSAY. Mr. Speaker, the Commission on Civil Rights has again documented the case for civil rights legislation. In the Commission's most recent report to the Congress, issued September 9, we are reminded that the right to vote is being denied because of race or color.

Purges of qualified voters, economic reprisals, restrictive voter qualification laws, and a host of arbitrary registration procedures are the continuing tools of systematic discrimination.

The Commission is of the opinion that although the 1957 and 1960 Civil Rights Acts are extremely helpful laws, broader measures are necessary.

Most of the new recommendations of the Commission are included in the omnibus civil rights bill I introduced shortly after the Congress convened and which I have pressed for ever since. The bill provides for: First, the prevention of discriminatory practices in the labor

movement; second, the prevention of discrimination in Government employment; third, fair employment practices with respect to concerns operating in interstate commerce; fourth, the grant of authority to the Attorney General to seek court action to protect the constitutionally secured rights of all; fifth, technical assistance to States attempting to comply with school desegregation orders; sixth, strong sanctions to prevent lynchings; and seventh, the elimination of the use of poll taxes and literacy tests arbitrarily to deny the franchise.

This session of the Congress is closing and yet no Presidential message on the subject of civil rights has been received. In view of all the promises of the campaign, and now the impact of this report, this is inexcusable. As a result, the Judiciary Committee of the House of Representatives has not even called hearings or scheduled the subject for discussion. The administration has even refused to press for an extension for the Civil Rights Commission beyond 2 years.

The Civil Rights Commission is to be commended for its objective and comprehensive report. The Commission has concluded that "the promise of the Constitution is not yet fulfilled." It is our job to see to it that the Constitution means what it says.

WILL STRIKES PREVENT AN ADEQUATE NATIONAL DEFENSE?

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, confronted by a national emergency to meet which we have appropriated billions of dollars; with the President sending an additional 40,000 men to Berlin to aid our forces already there; with hundreds of millions being paid to alleviate unemployment here at home—it certainly is difficult to understand the action of Reuther in advising local union members to strike shortly after he agreed with General Motors to an overall contract for the next 3 years.

Some 90 plants, the morning press tells us, have been closed by this strike and 257,390 employees are out of work. This happens the same week that Secretary of Labor Goldberg is telling the steel industry that it should not raise its prices, although the industry not long ago was forced to raise wages.

Just how much of this situation is due to Goldberg's insistence that jobs should be given to union members—and Judge Ricca at Detroit decided that any worker seeking to go to his job through a picket line assumed the risk of a beating—has been undetermined.

What President Kennedy and his Labor Secretary Goldberg seem to be unable to understand is that the desire for a profit exists in the minds of employers and stockholders as well as in the minds of workers.

We are all a little selfish and we will all have to sacrifice a little if the national good is to be served.

PUBLIC WORKS APPROPRIATION BILL

Mr. DOMINICK. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD, and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. DOMINICK. Mr. Speaker we will have before us for debate today and for vote tomorrow H.R. 9076 the public works appropriation bill which includes funds for an all-Federal system for transmitting power from the upper Colorado River project. On August 2, 1961, the Colorado Water Conservation Board recommended this proposal and subsequent to such time the private utilities modified their original proposal to reduce wheeling charges after their construction investment is repaid so that future charges would cover only ad valorem taxes and operation, maintenance, and replacement costs. This offer was requested by the Upper Colorado River Commission consisting of a representative appointed by the President and a representative of each of the Governors of Colorado, Wyoming, Utah, and New Mexico on September 1, 1961, and was agreed to by the utilities in writing. This board computed that the utilities combination plan would bring $89 million more revenue into the basin fund for participating projects by the year 2012 than the modified all-Federal system and thereafter would bring into the basin fund almost as much as the all-Federal system; hence the board recommended adoption of the utilities modified proposal. Since this recommendation was in conflict with that of the original resolution of August 2, 1961, of the Colorado Water Conservation Board, a meeting was held on September 8, 1961, to review the situation. At that meeting the Honorable Ed C. Johnson, former Democratic Senator and former Governor of the State of Colorado and the present representative of the State of Colorado on the Upper Colorado River Commission, gave his testimony to the Colorado Water Conservation Board. Following this meeting and discussions by the Governor of Colorado, the Colorado Water Conservation Board adopted a new resolution.

Since I feel these matters are of interest to all Members in this controversy, I wish to include in the RECORD the testimony of former Senator Johnson and the new resolution of the Colorado Water Conservation Board:

STATEMENT OF HON. ED C. JOHNSON, FORMER SENATOR FROM COLORADO

Mr. Chairman and members of the Colorado State Water Conservation Board, I am pleased to have this opportunity to review with you my activities in the highly controversial dispute which has developed with respect to the construction of transmission facilties to serve the Colorado River storage project.

As the Colorado commissioner of the upper Colorado River, I have deemed it my primary duty and responsibility to be concerned with and informed on all problems affecting the development of the Upper Colorado River Basin. A gigantic venture indeed in which I have been very active as U.S. Senator, Governor, and commissioner for more than 20 years.

Since the sale of Colorado River storage project electric energy must underwrite the development of irrigation in this basin, its direct importance cannot be passed over routinely by the Upper Colorado River Commission or by an individual commissioner. The adequacy and integrity of the basin fund out of which assistance to the participating irrigation projects will make many of them feasible, must be protected and nurtured.

This is and has been my objective. I have kept my mind on this one ball. Perhaps in doing so I have offended. But this is my conception of my duty and my responsibility and I have been faithful to it. Nor have I been backward about expressing it. There is no basis for the element of surprise in anything that I have said or done.

On August 2, 1961, I attended the special meeting of this board. You may recall that I was asked to speak. As the Colorado River commissioner I tried to make it crystal clear then that my official interest was neither in private nor public power but was centered in participating project revenue. I was disappointed that there appeared to be little or no interest in this angle and no interest whatever in the views of the Upper Colorado River Commission as such.

While I thought your action was premature and inconsiderate and that you should have sought a conference with the Upper Colorado River Commission, to iron out any misunderstandings, it appeared to me that the all-Federal system as presented by Felix Sparks would put more money in the basin fund annually after about 70 years. Therefore, had I been called upon to vote on the proposition as then presented, my interest in the basin fund would have caused me to vote with the majority.

In this meeting Mr. Sparks made the very strong point that the wheeling charges as proposed by the utilities would be out of line after the construction investment of their transmission system had been fully recovered. This would require about 45 years according to the calculations they had submitted. Accordingly in the interest of developing the water resources of the basin I suggested to the utilities that after the amortization of the costs of their transmission system was completed wheeling charges be reduced to payment of local ad valorem taxes and actual operation, maintenance and replacement. In the all-Federal system O.R. & M. must be paid out of the basin fund.

On May 11, 1961, the Commission of the Upper Colorado River requested Ival Goslin, its chief engineer and executive secretary, to make a detailed comparison of the all-Federal and the combination transmission systems to determine which would contribute the most money to the basin fund out of which the participating projects could be financed.

After 3 days of research and study by him and his staff, Mr. Goslin reported there was simply no common items that could be compared. He said it was like comparing apples and oranges. It seems each party had proceeded from a different set of factors, circumstances, and engineering and accounting data. Since then Mr. Goslin has kept on top of every development large and small. He has transmitted to each commissioner events as they have taken place, copies of correspondence with Bureau officials and pertinent data from all sources. He and his staff have done a most thorough job.

On July 17, 1961, I spent half a day in Salt Lake City with Mr. Goslin and his competent staff, checking a mass of figures, claims and counterclaims of both parties.

From time to time I have spent many hours with Mr. Kuiper or Mr. Spark's staff checking and counterchecking the claims of each party. Mr. Kuiper has been exceedingly patient with me and objective always. I have great respect for his integrity and engineering capability.

Also I have attended conferences with Mr. Patterson of the Public Service Co. of Colorado and Mr. Kuiper, in his office, which were held for the purpose of clarifying data submitted by the utilities to the State board.

Early in July 1961, I met with Howard E. Scott, manager, Colorado Rural Electric Association and Leslie M. Alexander, assistant general manager of the Salt River project of Phoenix, Ariz., in Mr. Scott's office for a full and frank discussion of the whole controversy. Mr. Alexander submitted some very interesting charts. He contended also that a provision of Public Law 485 limited the activities of private utility distribution of storage project energy. Mr. Sparks advised me later that he entertained no such interpretation of Public Law 485.

On June 8, 1961, I prepared a statement in the form of testimony before the Public Works Subcommittee of the House Committee on Appropriations in which I stated among many other things:

"In my opinion, while the wheeling charges of the Public Service Co. of Colorado and Pacific Power & Light of Wyoming are fair and equitable, this cannot be said of the wheeling charges of Arizona Public Service, New Mexico Public Service, and Utah Power & Light. Further negotiations should be undertaken between the Bureau and these three companies to develop a combination system which would serve the areas in their respective States at a more reasonable combined system cost."

Here is another quote from my June 8 testimony:

"I do not take second position to anyone in or out of Congress in the determination to protect the rights of the preference users. Wherever investor-owned utilities hesitate or neglect to provide for them adequate transmission facilities or satisfactory service or equitable wheeling rates, I favor the immediate construction of transmission lines by the Federal Government. On no other pretext should the Government get into the transportation of energy business. It has no more right to do so than it has to build railroads.

"Based on these standards, public funds are, or should be, made available by Congress to the Bureau of Reclamation for the construction of the following transmission lines and substations: Glen Canyon, Farmington; Flaming Gorge, Oak Creek; Farmington, Poncha; Gunnison, Montrose; Curecanti, Rangely; Craig, Sinclair, Wyo."

On June 13, 1961, Congressman WAYNE N. ASPINALL replied to me as follows:

JUNE 13, 1961.

Hon. EDWIN C. JOHNSON,
Denver, Colo.

DEAR ED: I received your letter of the 8th on time together with the original of your statement for use before the Subcommittee on Appropriations for Public Works. Fifty additional copies arrived a few days later. Neither arrived in time, Ed, for me to use before the committee during my appearance. However, I did secure permission to have your statement placed in the record of the committee's hearings. My position has been similar to yours as far as the Colorado part of the project has been concerned. So far I have not attempted to take the position for those areas outside of Colorado except the leadlines from Glen Canyon to Four Corners and Flaming Gorge to Rangely and Sinclair, Wyo.

It is always good to hear from you and to work with you, Ed.

With best wishes, I am,

Sincerely yours,

WAYNE N. ASPINALL,
Chairman.

For some weeks Governor Clyde, of Utah, had been anxious to have an informal conference of the commissioners on the transmission line controversy. Several dates had been considered and finally August 29, 1961, was agreeable to all the commissioners. In the meantime the utilities had expressed interest in my proposal that they reduce wheeling charge to cover only local ad valorem taxes plus O.M. & R. after the payout period was completed.

No. 1: The Upper Colorado River Commission did not hold their informal conference in Salt Lake on the proposed concession of the utilities on wheeling charges. We did meet to discuss amoung ourselves the transmission line controversy. In the course of our conference the new proposal did come up and the commissioners said they should like to talk with the utilities and get a better understanding of the proposal. They were called on the phone and since Mr. Patterson was in conference with Mr. Naughton of the Utah Power & Light we asked them both to meet with us immediately.

Since this conference in Salt Lake on August 29 was not a regular or special meeting of the commission we could not take any action on anything other than to set a special meeting in Denver for Friday, September 1. The utilities agreed to reduce their proposal to writing and to submit it to us in Denver. The commission agreed to prepare a resolution on the subject stating their position on this new offer of cooperation. The utilities stated they were making their concession in the interest of progress in the development of the water resources of the basin.

The special meeting of the Upper Colorado Commission held in Denver, Friday, September 1, 1961, was not a secret meeting. Mr. Sparks' office arranged a meeting place for it and persons from various parts of Colorado attended. It was an open meeting. However, after five or six routine matters were disposed of, Governor Clyde moved for an executive session and announced that it would last about 20 minutes. Instead the executive session lasted most of the day.

In addition to the chairman, Mr. Newell, the chief engineer and executive secretary, Mr. Ival Goslin, the reporter, the four commissioners, the treasurer, Mr. R. J. Coury, of Farmington, Mr. Reynolds and Mr. Davis, of New Mexico, and Mr. Sparks and Mr. Kuiper, of Colorado, sat in the executive session. Mr. Sparks was very helpful in pointing out errors in the resolution and complained about haste in which action was taken.

The purpose of the executive session was to adjust the language of the resolution of the committee to the satisfaction of the four commissioners and receive the five written proposals of the five utilities that had been promised. When these two steps were taken the doors were thrown open and motions were made, seconded and recorded and voted on in open session.

No member of the Colorado State Water Conservation Board asked to be heard or offered any objections to the proceedings. Mr. Bert Hanna of the Denver Post objected to the executive session.

Under the new investor-owned utility combination proposal the following payments will be made by the two systems. This money is used to build participation projects:

Year:	*Utilities*
2008	$1,180,000
2009	22,707,000
2010	22,707,000
2011	22,707,000
2012	22,707,000
Total	92,008,000

Year:	*All-Federal*
2008	None
2009	None
2010	None
2011	None
2012	$3,200,000
Total	3,200,000

In each year thereafter the all-Federal will pay slightly more to the basin fund than the utilities. The excess will be equal to the ad valorem local taxes paid by the utilities in Arizona, New Mexico, Colorado, Utah, and Wyoming on the transmission lines that serve the storage projects. Speaking personally, I kind of like local taxpayers.

Mr. Kuiper believes the all-Federal system when and if interconnected with the utilities steamplant at Farmington will be able to make much greater payments to the basin fund than shown above.

I go along with Mr. Goslin on this. It does not seem realistic to me for the all-Federal people to expect the utilities to pull the all-Federal system out of the fire with their new thermal plant at Farmington. I have no idea what the utilities may do. However, I do know that without interconnections at Farmington the all-Federal will be in serious trouble and the basin fund will be impaired.

This is what Mr. Goslin said with respect to this matter: "The Bureau of Reclamation is currently making an analysis of the modified transmission system interconnected at Four Corners. If and when we receive the results of this analysis we will forward a copy to you. I will predict, however, that the Bureau and the utilities will not be able to agree on an analysis of the interconnection at Four Corners due to being unable to agree on an assignment of the benefits derived from the interconnection."

Governor McNichols feels very strongly that he should have been informed of the meeting of the commissioners held in Denver September 1, 1961. The error is mine and mine alone. However, I had no idea the Governor felt as he does about this controversy. He had never mentioned it to me. I thought that it was not in his best interest to involve him in this vicious controversy. At 2:10 p.m., September 1, 1961, I was handed a copy of a letter the Governor had written some days previous to each of the Governors of the four States. I returned the letter unread.

After reading Governor McNichols letter to Chairman CLARENCE CANNON and the members of the House Appropriations Committee I am inclined to feel that it is fortunate the Governor was in no way responsible for working out the utilities historic wheeling rate concession.

Mr. Ival Goslin says: "You will note from the tables enclosed that in changing from the 'yardstick' to the 'modified' system the irrigation assistance to States has been reduced approximately $50 million. It should be interesting to know how much of this reduction is due to the addition of more lines to deliver power to preference customers, especially when it has been stated that the change from 230 kilovolt to 345 kilovolt lines from Glen Canyon to Phoenix and Glen Canyon to Four Corners will not

cause additional losses and may even reduce line losses."

This very unfortunate controversy over the construction of a transmission system for the Upper Colorado River Basin is more of a regional matter than a one-State affair. In fact about 95 percent of the controversial transmission lines are beyond the borders of the State of Colorado, while about 95 percent of the noncontroversial lines are in Colorado and Wyoming. It appears therefore that this Colorado State Water Conservation Board thinks that the tail should wag the dog. Most respectfully may I suggest that regional matters should be met with a regional approach.

The REA has done a remarkable job in bringing electricity to the rural areas of this country. They have every right to take great pride in it, but they are one of the Nation's most potent pressure groups and whenever a conflict develops between water conservation and power it is better for a water board such as this to keep preference users at arm's length. I realize that you came here to criticize and not to receive advice.

But I have worked with this board a long, long time and hold its members in affectionate regard. It has pleased me to note the progress and effectiveness the board has attained under the phenomenal leadership of Felix Sparks. No man in Colorado has done more for water conservation and utilization than he.

In addition I should like to say this—I should like to develop a better understanding and relationship between this board and the Upper Colorado River Commission. I think we should have joint sessions occasionally and an interchange of views frequently.

RESOLUTION OF THE COLORADO WATER CONSERVATION BOARD

Whereas the Colorado Water Conservation Board views with deep concern the action of the Upper Colorado River Commission taken at its meeting held September 1, 1961; and

Whereas the Colorado Water Conservation Board has had no opportunity to consider the revised offer of the private utilities to wheel power from the Colorado River storage project; and

Whereas the Colorado Water Conservation Board is charged with the responsibility of promoting conservation of the water of the State of Colorado: Now, therefore, be it

Resolved, That the staff of this board be immediately directed to enter into negotiations with the investor utility companies, the Bureau of Reclamation, and the Upper Colorado River Commission to the end that any new proposals heretofore or hereafter made by said utility companies shall be thoroughly evaluated; and that until such evaluation takes place, this board reaffirms its resolution of August 2, 1961, on the basis of information then and now before the board; be it further

Resolved, That this board, in response to the offer made by the Colorado member of the Upper Colorado River Commission, requests that said commissioner seek a meeting of said commission further to reconsider this matter, so that the action of the commission may truly reflect the views of the several States and that this board and its staff be allowed to attend and participate in such meeting; and be it further

Resolved, That the Governor of our State of Colorado be requested to initiate appropriate action to the end that the State of Colorado shall hereafter have a unified official position with respect to the protection and development of the water resources of this State.

THE COMMUNIST PARTY CASE

Mr. WALTER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALTER. Mr. Speaker, on Monday, June 5, 1961, the Supreme Court of the United States announced its decision in the case of the Communist Party of the United States of America, petitioner, against the Subversive Activities Control Board. I regard this decision as a landmark of importance in law and in relation to the congressional effort to curb Communist internal subversion. At issue in this case was the constitutionality of certain basic provisions of the Internal Security Act of 1950, more particularly the registration and disclosure provisions thereof, as applied to Communist-action organizations. It is to be expected that in the October term of the Court next ensuing, the Supreme Court will promptly dispose of the Communist Party's petition for rehearing, so that this litigation, already much too long in process, will be concluded with due dispatch. With the case thus in its terminal stage, and the Congress approaching adjournment, I think it appropriate at this time for the House to refresh its mind on the issues presented.

Before entering upon an analysis of the decision I should first call your attention to certain matters of interest. The decision came as a shotgun blast causing a frantic scurrying to and fro among the vermin gathered at Communist Party headquarters in New York City. To permit the leadership time to compose themselves, the petition for rehearing was filed and a stay of proceedings obtained, which occurred in June toward the end of the last term of Court, thus allowing the Communist Party at least until the October term, about to commence, to agitate against the decision and to take advantage of it as a "cause" for improving the finances of the party. You will shortly witness the high point of the most extensive Communist propaganda effort since the Rosenberg espionage case—a case that will be long remembered. The extent and power of that effort, the success with which it involved even legitimate organs of communication, seemed then to surprise and confound many people.

While one may be shocked, perhaps one should not be mystified. Some few weeks ago, I addressed the House in connection with the current publication of a scurrilous and mendacious volume titled "The Un-Americans," written by a Frank J. Donner, counsel for the United Electrical Workers Union, an independent union several years ago evicted from the CIO because it was found to be Communist dominated. Thrice identified as a Communist at hearings before this committee, Donner was deceptively described in the foreword of the publisher as a "constitutional lawyer," and nothing else. I spoke of the millions of dollars available to Communist parties for propaganda purposes throughout the non-Communist world. This money comes from many sources, including not only dues contributed by the party faithful, and funds acquired from the public at large through solicitation at mass meetings staged by the party for ostensible causes through its front organizations, but also from Moscow directly, and lately, transmitted from Moscow indirectly through Cuba, which is now in fact the base of operations in this hemisphere for the international conspiracy, of which the local party is an integral part. And we have witnessed the open support given to Communist causes by certain wealthy persons within our midst, the Canadian-born Cyrus Eaton being most notable, pitiable misled persons who do not seem to apprehend that their persons and wealth, nurtured in free enterprise, are the first victims of communism.

A concerted drive, to pressure and influence the U.S. Supreme Court in its consideration of the petition for rehearing, will presently reach its apogee. Spearheading the activity is the Emergency Civil Liberties Committee in Support of the Victims of the Hollywood Blacklist, which will sponsor a rally at Carnegie Hall, New York City, on Friday, September 22. A mammoth rally following is planned for September 23 and 24, at St. Nicholas Arena, same city, which will be euphemistically titled a "National Assembly for Democratic Rights," at which an attendance of about 6,000 persons or more is hoped for, who will be asked to submit at that time a registration fee of $2 per person. Incidentally, this registration will form a convenient means for ascertaining sympathizers and developing mailing lists. The letterhead sponsors of the National Assembly for Democratic Rights presents the usual motley crowd—a few previously identified but not commonly known Communists, several fellow travelers and sympathizers, together with some quite respectable but perhaps uninformed persons who, I am quite sure, would be ashamed of themselves if they fully understood the objectives of the Communist Party to which they are lending support. Allied in this unfortunate activity, one also finds the American Civil Liberties Union, but this is not a matter for surprise. Where the honey is, the bees are sure to gather.

These rallies, by their literature, are addressed to "all trade unions, Negro peoples organizations, national group organizations, civic, fraternal, and community organizations, youth and womens organizations," and "to Americans concerned with the preservation of our democratic liberties." This form of address is typical. While good people talk of unity, the Communist seeks to fragment our people, to break down the population into groups which he anticipates may have particular dissatisfactions, actual or fancied, and whom he intends to victimize by the poison of Communist propaganda fed with the sugar of constitutional liberties. In accordance with

the instruction of Lenin, the Communist—by agitation on isolated issues involving these groups—is enjoined not to correct or reform, but on the contrary to "stimulate" in their minds the idea that the whole American political system is worthless. A divided people will not hang together, they will be hanged separately.

As in the Rosenberg espionage case, the immediate objective of Communist propaganda will be to obstruct the wheels of justice, and in the present instance to stampede the U.S. Supreme Court into reversing itself, or at least to delay the execution of the decision and the enforcement of the Internal Security Act. Concurrent objectives will be to swell the party treasury, to agitate against the American political system and its foreign policy, to recruit new members for the conspiracy and its front organizations, and generally to exercise the party organization. Through the instrumentality of the Communist press—from the time of the proposal of the Internal Security Act of 1950 and during the years of litigation involving it—the Communist Party leadership has communicated this program to its membership and sympathizers. A steady flow of articles on this subject appeared in the Worker, Peoples World, Political Affairs, Mainstream, Morning Freiheit, World Marxist Review—an international publication of the party—and others. In this effort, the hard-core press has been joined by its satellite press, the National Guardian, the U.E. News, the Dispatcher (ILWU), Mine-Mill Union, Russky Golos, and Glos Ludowy, to name but a few.

Having thus—and likewise, of course, at closed party meetings throughout the country—communicated the line to the faithful, the party continued in its familiar and orderly course, next activating and alerting its front organizations. These familiar fronts are paper organizations with deceptive liberal titles, organized and controlled by the secret revolutionaries, who, not revealing their identity, solicit non-Communists to lend their names and support. Propaganda activities are then conducted under such disguise through leaflets, paid advertisements, personal contact, and mass meetings. Lenin has described the front as a "transmission belt," that is, the means by which the underground conspiracy, while preserving its secrecy may establish communication with the masses. In his notorious document, "What's To Be Done," Lenin posed and in this way solved the difficult problem how to preserve the essential secrecy of the party's activities and membership and yet be able to maintain contact with the masses, and to transmit among them the brainwashing activity of propaganda and agitation. He then referred to the front as a "committee" which explains the habitual adoption of the word "committee" as an appendage of the Communist-front title. The American Committee for the Protection of the Foreign Born, the Emergency Civil Liberties Committee, and the Civil Rights Congress are but a few of the shifting scenes or countless fronts behind which the Communist Party has undertaken the effort to discredit the Internal Security Act, frequently by them termed the "McCarran Act"—but which in fact should be termed the "Wood Act."

To further obscure the basic Communist direction and control of front activity, the Communists have frequently set up fronts to mask fronts. These are usually letterhead organizations or ad hoc groups. Such for example was the Civil Rights Assembly, sponsored by apparently reputable people who, fronting for the fronts, sponsor or lend their names for particular mass meetings in which various fronts participate. These names give prestige, or the appearance of substance to the occasion, and serve as the vehicle for attracting a mass audience.

It is precisely because the Internal Security Act, in part, aims to control the deceptive front operations of the Communist Party that it has become an object of bitter and imperative attack. The registration and disclosure provisions of the act, an issue in the Communist Party case, constitute a congressional effort to control front deception. The act does not prevent the Communist from speaking, but establishes the means by which the speaker will be identified. This is not legislation aimed to suppress the free expression of ideas, however fraught with error they may be, nor does it curb debate. The Congress fully appreciates the importance of debate in the orderly evolution of a free society. We recognize that it is the abrasion that polishes the diamond. But we must not permit Communist dialectic to confuse the right of dissent with a right of betrayal. Deliberate deception methodically employed to advance the world Communist movement, is conspiracy. It is not the language of debate. The overwhelming majority of our people strongly demand the protection afforded them by the Internal Security Act of 1950, so that they may judge what organizations are entitled to their money or support. To the Communists I say:

> And this is the condemnation, that light is come into the world. For every one that doeth evil, hateth the light, neither cometh to the light, lest his deeds should be reproved. But he that doeth truth cometh to the light, that his deeds may be manifest.[1]

I am pleased to point out that the Internal Security Act of 1950 was the product of many years of intensive hearings and study conducted by the Committee on Un-American Activities and its predecessors. Legislation to counter the program of internal subversion presents complex problems, some of which we believe are basically solved in the Internal Security Act of 1950, as amended. These problems, both legal and practical, are of the utmost subtlety. As a free society, responding to ethical and constitutional inhibitions, we proceed in accordance with the tenor of our institutions.

Accordingly, the Internal Security Act of 1950 is not a police-State statute. On the contrary, it is designed to draw the Communists from the underground and from the ratholes into the light of day, so that our people may better judge and evaluate their activities, as Justice Frankfurter said, "against the revealed background of their character, nature, and connections." The registration and disclosure provisions of this statute, designed to promote and preserve the integrity of free speech, therefore serve to strengthen democratic processes.

Under sections 12 and 13 of the act, the Subversive Activities Control Board was established as a quasi-judicial body for the purpose of making certain determinations in relation to the requirements for registration of Communist organizations. Having reason to believe that the Communist Party of the United States was required to register under section 7 of the act, the Attorney General, pursuing procedures set up in the act, filed with the Board on November 22, 1950, a petition requiring that party to register as a Communist-action organization. After extensive hearings, the Board found that the Communist Party of the United States was an organization operating in this country under Soviet Union control, for the purpose of establishing a Soviet-type dictatorship in the United States, and was hence a Communist-action organization required to register as such.

The order of this Board, requiring the Communist Party of the United States to register as a Communist-action organization under section 7 of the act, was upheld by a majority of the Court consisting of Justices Frankfurter, Clark, Harlan, Whittaker, and Stewart. Dissenting—in which capacity they appear perhaps all too familiarly, particularly in cases of this type—were the Chief Justice, and Justices Black, Douglas, and Brennan. The majority opinion, luminous and powerfully expressed, written by Justice Frankfurter, is undoubtedly a monumental effort. I applaud the wisdom and ability of that learned jurist. This decision confirms the power of Congress to strengthen the national security by the adoption of this type of statute which, aimed principally to inform rather than to prohibit or punish, is representative of, as well as calculated to assist in preserving, a free society.

For its purpose, the Internal Security Act of 1950 classifies Communist organizations within the United States as either "Communist action" or "Communist front." A third category designated as "Communist infiltrated," is created by the Communist Control Act of 1954, as an amendment to the act. A Communist-action organization is that which is substantially directed, dominated or controlled by a foreign government or a foreign organization controlling the world Communist movement, and operates primarily to advance the objectives of the world Communist movement.

A Communist-front organization is that which is substantially directed, dominated, or controlled by a Communist-action organization, and is primarily operated for the purpose of giving aid and support to a Communist-action organization, a Communist foreign government, or the world Communist movement. A Communist-in-

[1] St. John, ch. 3, verses 19–21.

filtrated organization is that which is substantially directed, dominated, or controlled by an individual or individuals who are, or who within 3 years have been actively engaged in, giving aid or support to a Communist-action organization, a Communist foreign government, or the world Communist movement, and is serving, or within 3 years has served, as a means for giving aid or support to any such organization, government, or movement, or the impairing of the military strength of the United States or its industrial capacity to furnish material support required by its Armed Forces.

Under section 13 (e) and (f) of the act, certain relevant and material evidential guidelines, segregated as to action and front groups, are laid down, but which are not exclusive, to assist the Board in reaching its determination as to the character of the organization. As will appear from a reference to this section, a just application of the detailed rules will leave no reasonable basis for error in the designation of the organization. Yet, of course, as one might anticipate, the section has been assailed by Communists as an adoption of the principle of "guilt by association," a phrase to which they have given currency if not meaning and respectability. The phrase, taken from the Communist smear vocabulary, is just another application of Communist semantics, in conformity with propaganda principles expressly laid down by Lenin, designed solely to obscure the issue and to foreclose reasoned discussion. The section above mentioned in reality is not limited to any one form of proof, but nonetheless guilt by association is, in fact, a most reliable form of proof—depending on how close the association may be. Familiarly known to the law as "circumstantial evidence," and accepted in both criminal and civil proceedings, it is recognized by the experts as a form of proof even more reliable, in certain instances, than a confession of guilt. The late Justice Jackson, in his concurring opinion in *Communications Association* v. *Douds* (339 U.S. 382, at 432f), had occasion also to note:

> However, there has recently entered the dialectic of politics a cliche used to condemn application of the conspiracy principle to Communists. "Guilt by association" is an epithet frequently used and little explained, except that it is generally accompanied by another slogan, "guilt is personal." Of course it is; but personal guilt may be incurred by joining a conspiracy. That act of association makes one responsible for the acts of others committed in pursuance of the association. It is wholly a question of the sufficiency of evidence of association to imply conspiracy.

Under section 7 of the act, each Communist-action organization required by a final order of the Board to register as such, shall, within the time limited, register with the Attorney General as a Communist-action organization. The statement accompanying the registration must contain the name of the organization and the address of its principal office; the name and last-known address of each individual who is, and was at any time during the 12 months preceding the filing of such statement an officer of the organization; an accounting of all moneys received and expended, including the sources from which received and the purposes for which expended during the 12 calendar months preceding, the filing thereof; the name and last-known address of each individual who was a member of the organization at any time during the preceding 12 months; and a listing of all printing presses or machines in the possession or control of the organization, or in which its officers and members have an interest. After the organization has registered, it must file an annual report containing the same information as is required in the registration statement.

The procedures and requirements of registration for Communist-action and Communist-front organizations are identical, except that the fronts need not list their nonofficer members. Communist-infiltrated organizations are not required to register with the Attorney General, but are under other sections of the act, as is the case with front and action organizations, required to label their publications or mail transmitted through the channels of interstate or foreign commerce, and to identify themselves in any broadcast by radio or television sponsored by them; and no deduction for income tax purposes shall be allowed in the case of contributions to or for the use of such organizations, nor shall such organizations be entitled to exemption from Federal income tax; and they are deprived of certain benefits under the National Labor Relations Act.

It is gratifying to note that the congressional findings which form the statement of necessity for the legislation, embodied in the preamble to the Internal Security Act of 1950, have received judicial recognition and sanction, and indeed have not been disputed by any of the nine Justices. Upon these findings which spring from investigations and study mandated to the Committee on Un-American Activities, Justice Frankfurter made the following observations:

> On the basis of its detailed investigations Congress has found that there exists a world Communist movement, foreign-controlled, whose purpose it is by whatever means necessary to establish Communist totalitarian dictatorship in the countries throughout the world, and which has already succeeded in supplanting governments in other countries. Congress has found that in furthering these purposes, the foreign government controlling the world Communist movement establishes in various countries action organizations which, dominated from abroad, endeavor to bring about the overthrow of existing governments, by force if need be, and to establish totalitarian dictatorships subservient to that foreign government. And Congress has found that these action organizations employ methods of infiltration and secretive and coercive tactics; that by operating in concealment and through Communist-front organizations they are able to obtain the support of persons who would not extend such support knowing of their true nature; that a Communist network exists in the United States; and that the agents of communism have devised methods of sabotage and espionage carried out in successful evasion of existing law. The purpose of the Subversive Activities Control Act is said to be to prevent the worldwide Communist conspiracy from accomplishing its purpose in this country.
>
> It is not for the courts to reexamine the validity of these legislative findings and reject them. See *Harisides* v. *Shaughnessy* (342 U.S. 580, 590). They are the product of extensive investigation by committees of Congress over more than a decade and a half. Cf. *Nebbia* v. *New York* (291 U.S. 502, 516, 530). We certainly cannot dismiss them as unfounded or irrational imaginings. See *Galvan* v. *Press* (347 U.S. 522, 529); *American Communications Assn.* v. *Douds* (339 U.S. 382, 388–389). And if we accept them, as we must, as a not unentertainable appraisal by Congress of the threat which Communist organizations pose not only to existing government in the United States as a sovereign, independent nation—if we accept as not wholly unsupportable the conclusion that those organizations "are not free and independent organizations, but are sections of a worldwide Communist organization and are controlled, directed, and subject to the discipline of the Communist dictatorship of [a] foreign country," section 2(5)—we must recognize that the power of Congress to regulate Communist organizations of this nature is extensive.

Moreover, unless we regard the dissent of Chief Justice Warren—which rested principally upon procedural grounds—as a suspension of judgment on the issue, none of the Justices has taken exception to the specific conclusion of the Subversive Activities Control Board which, after receiving voluminous evidence, pronounced the Communist Party of the United States to be a foreign-dominated organization, controlled by the Soviet Union, and operating primarily to advance the objectives of the world Communist movement. Justice Douglas, although dissenting on other grounds, accepted the specific findings of the Board, and said:

> The Subversive Activities Control Board found, and the court of appeals sustained the finding, that petitioner, the Communist Party of the United States, is "a disciplined organization" operating in this Nation "under Soviet Union control" to instill "Soviet-style dictatorship in the United States." Those findings are based, I think, on facts; and I would not disturb them.

Equally striking was the degree of unanimity with which the Court disposed of the first amendment objections to the statute. With the lone exception of Justice Black, who stood to the contrary, defiant and unbowed, none of the justices found the Communist Party defense on that basis attractive. In view of the congressional findings and the evidence laid before the Subversive Activities Control Board, it would seem that no other conclusion could sensibly be reached. Moreover, it would seem obvious that the registration and disclosure provisions of the statute, which were treated by the Court as separable from other provisions, and which were alone at issue, effected no denial of free speech, peaceable assembly or association by their terms, but required only that the speaker be identified.

For the majority, Justice Frankfurter made clear that:

> The present statute does not, of course, attach the registration requirement to the incident of speech, but to the incidents of foreign domination and of operation to advance the objectives of the world Communist

movement—operation which, the Board has found here, includes extensive, long-continuing organizational, as well as speech activity.

To state that individual liberties may be affected is to establish the condition for, not to arrive at the conclusion of, constitutional decision. Against the impediments which particular governmental regulation causes to entire freedom of individual action, there must be weighed the value to the public of the ends which the regulation may achieve.

Where the mask of anonymity which an organization's members wear serves the double purpose of protecting them from popular prejudice and of enabling them to cover over a foreign-directed conspiracy, infiltrate into other groups, and enlist the support of persons who would not, if the truth were revealed, lend their support, it would be a distortion of the first amendment to hold that it prohibits Congress from removing the mask.

For the minority—excepting Justice Black—Justice Douglas said:

If lobbyists can be required to register, if political parties can be required to make disclosure of the sources of their funds, if the owners of newspapers and periodicals must disclose their affiliates, so may a group operating under the control of a foreign power.

The Bill of Rights was designed to give fullest play to the exchange and dissemination of ideas that touch the politics, culture, and other aspects of our life. When an organization is used by a foreign power to make advances here, questions of security are raised beyond the ken of disputation and debate between the people resident here. Espionage, business activities, formation of cells for subversion, as well as the exercise of first amendment rights, are then used to pry open our society and make intrusion of a foreign power easy. These machinations of a foreign power add additional elements to free speech just as marching up and down adds something to picketing that goes beyond free speech.

These are the reasons why, in my view, the bare requirement that the Communist Party register and disclose the names of its officers and directors is in line with the most exacting adjudications touching first amendment activities.

Thus, although the first amendment was a relevant consideration, the court did not allow the tail to wag the dog. The first amendment is but one item in the bundle of constitutional liberties guaranteed to our people. All liberty will perish upon the demise of this Government which gives life to liberty and the first amendment its application. As the late Chief Justice Vinson said in *Dennis* v. *United States* (341 U.S. 494, at p. 509), a Smith Act prosecution, "if a society cannot protect its very structure from armed, internal attack, it must follow that no subordinate interest can be protected."

While the minority associates of Justice Black found no substance in the first amendment claim of the Communist Party—a claim which in relation to the facts would seem clearly contrary to reason and precedent—their well-known antipathy toward regulation of Communist activities was not to be entirely frustrated. They were nimble enough to erect the fifth amendment as an alleged constitutional barrier with plausible effect. Any port will do in a storm, I believe, is a classic and applicable comment. They argued that the order of the Subversive Activities Control Board requiring the organization, that is, the Communist Party, U.S.A., to register would conflict with the fifth amendment privileges of the officers who presumably would be responsible for completing the registration of the organization. This fifth amendment claim, which the minority asserts on the behalf of the officers of the organization, Justice Frankfurter correctly describes as premature. The order of the Board was against the organization and not against the officers. The organization cannot under existing law assert, as an organization, a privilege against self-incrimination which is reserved only to specific individuals who, in any event, are required themselves to claim its protection when the issue is presented.

Although Justice Black found no support among his colleagues for the first-amendment claim, he nevertheless persisted in his reliance upon this ground for striking down the statute, despite his strong dissent and seemingly contrary views expressed in *Viereck* v. *United States* (318 U.S. 236), which involved the Foreign Agents Registration Act of 1938, a registration and disclosure statute aimed at the Nazi Party. In that case, Justice Black wanted to jail Viereck, who had registered as a Nazi agent, but who, in a supplemental form required to be filed by regulations of the Secretary of State, refused to disclose information of political activities which were wholly on his own behalf and not on behalf of any foreign government. I do not think that this result can aptly be described as "libertarian" thinking. Indeed, the language of his dissenting opinion, in which Justice Douglas concurred, contained expressions which, in the light of present events, must now appear quite remarkable. I quote in part from his dissent in that case:

The general intent of the act was to prevent secrecy as to any kind of political propaganda activity by foreign agents. Both the House and Senate committees reporting the bill under consideration, declared it to be their purpose to turn "the spotlight of pitiless publicity" upon the propaganda activities of those who were hired by foreign principals. Appreciating that propaganda efforts of such a nature are usually conducted in secrecy they wanted to make full information concerning it available to the American public and sought by "the passage of this bill" to "force propaganda agents representing foreign agencies to come out in the open in their activities, or to subject themselves to the penalties provided in said bill." They declared that the purpose of the bill was to require all such hired agents to register with the State Department and to supply information about their political activities, their employers, and the terms of their contracts.

Resting on the fundamental constitutional principle that our people, adequately informed, may be trusted to distinguish between the true and the false, the bill is intended to label information of foreign origin so that hearers and readers may not be deceived by the belief that the information comes from a disinterested source. Such legislation implements rather than detracts from the prized freedoms guaranteed by the first amendment. No strained interpretation should frustrate its essential purpose.

I agree entirely with his general language in Viereck although I do not believe that it supports the specific result he reached; because in the Viereck case the statute required the registration only of persons acting as agents of a foreign principal and was not intended to authorize regulation or registration of activities on one's own behalf, and of course this was the majority conclusion from which Justices Black and Douglas then dissented.

Apparently, to Justice Black, Russian agents differ from Nazi agents in some esoteric respect not apparent or clearly comprehensible to me. The Viereck case survived to plague Justice Black in the Communist Party case. Unlike Justice Douglas who frankly considered himself bound by his concurrence in Viereck, Justice Black faced a dilemma if he chose to advance the first amendment claim in the Communist Party case, having rejected it in the Nazi Party case. He must either repudiate or distinguish Viereck. He chose the latter course and for that purpose urged that the Internal Security Act of 1950 was more than a registration statute, and further, he said that when Viereck "registered under the earlier and genuine registration statute, he was not to be branded as being engaged in an evil, despicable undertaking bent on destroying this Nation."

These distinctions I believe to be sophistical and unsound. In the Communist Party case the issue for decision was limited exclusively to the registration and disclosure provisions of the statute. These provisions were treated as separable by the court, and indeed the separability of the provisions was intimated by section 32 of the act. Therefore, as in the case of the Foreign Agents Registration Act of 1938, there was squarely before him a registration and disclosure issue only. Further, it was not accurate for Justice Black to state that Viereck was not branded by his registration. In fact he was, because registering as a Nazi agent was, in the temper of the time and our people, as evil and despicable as the registration of a Communist.

The real difficulty seems to be that Justice Black cannot disabuse his mind of the mirage that the Communist Party is just another "political party" similar, if you please, to the Republican and Democratic Parties, or the Socialist Party of Norman Thomas. Moreover, the language of his dissenting opinion in the Communist Party case indicates that he mistakenly equates the activity of the Communist Party with the revolutionary activities of our own Thomas Jefferson and other patriots. For example, he said:

I believe with the framers of the first amendment that the internal security of a nation like ours does not and cannot be made to depend upon the use of force by Government to make all the beliefs and opinions of the people fit into a common mold on any single subject. Such enforced conformity of thought would tend only to deprive our people of the bold spirit of adventure and progress which has brought this Nation to its present greatness. The creation of public opinion by groups, organizations, societies, clubs, and parties, has been and is a necessary part of our democratic society. Such groups, like the Sons of Liberty and the American Corresponding So-

cieties, played a large part in creating sentiment in this country that led the people of the colonies to want a nation of their own.

The father of the Constitution—James Madison—said, in speaking of the Sedition Act aimed at crushing the Jeffersonian Party, that had that law been in effect during the period before the Revolution, the United States might well have continued to be miserable colonies, groaning under a foreign yoke.

No doubt taking its cue from the above, the Communist Party in its open letter on the case published in the New York Times this June 22, found it advantageous, for its malicious purposes, to advance the same thought. The comparison is odious. John Hancock boldly affixed his hand to the Declaration of Independence. The Communist prefers to skulk in the shadows. The dignified and rational efforts of the American revolutionaries, who sought independence and civil liberty as an end by honorable means when other solutions to their grievances had been decently explored and exhausted, equated with the base and dishonest tactics of the Communist Party in the United States which seeks to enslave and by minority violence to yoke our people to a foreign master, employing degraded means to that end, is to publish such an absurdity as to say that the lamb and the wolf are equivalent because they are both animals.

Indeed, coming events do seem to cast their shadows before. The late Justice Stone, an eminent scholar and noted liberal, wrote to Professor Frankfurter, later Justice Frankfurter, some years ago when Justice Black had been on the Bench for only a few months and inquired:

Do you know Black well? You might be able to render him great assistance. He needs guidance from someone who is more familiar with the workings of the judicial process than he is. I am fearful though that he will not avoid the danger of frittering away his opportunity for judicial effectiveness by lack of good technique, and by the desire to express ideas which, however valuable they may be in themselves, are irrelevant or untimely. There are enough present-day battles of importance to be won without wasting our efforts to remake the Constitution ab initio, or using the judicial opinion as a political tract.[2]

I believe that Justice Holmes in *Frohwerk* v. *United States* (249 U.S. 204) provides a sufficient answer to Justice Black. Frohwerk was charged with conspiracy between himself and one Gleeser, who were then engaged in the preparation and circulation of a German newspaper in 1917, to obstruct recruiting, in violation of the act of June 15, 1917. Their offense was the publication of 12 articles to the general effect that the United States was in the wrong and giving false and hypocritical reasons for its course. In affirming the conviction, Justice Holmes declared—at page 208:

The first amendment while prohibiting legislation against free speech as such cannot have been, and obviously was not, intended to give immunity for every possible use of language. * * * We venture to believe that neither Hamilton nor Madison, nor any other competent person, then or later, ever supposed that to make criminal the counseling of a murder within the jurisdiction of Congress would be an unconstitutional interference with free speech.

Justice Holmes further pointed out, at page 210, that "the conspiracy is the crime, and that is one, however diverse its objects."

Mr. Speaker, I believe that what Justice Black, and indeed many others, fail to apprehend is that the Communist Party in the United States is a secret conspiratorial organization, a tentacle of the world Communist conspiracy, the corrupted speech of whose members is intertwined with and subservient to purposive action, tuned in concert at the direction and control of a foreign power which regards the United States as its enemy, and works ceaselessly toward the destruction of this free society, employing all means toward that end including espionage, sabotage, deceit, murder, terrorism and violence. These are not matters of mere individual "belief" or "dissent"—which, of course, the Communists would have us believe—but acts and conduct, a "ganging-up" that no civilized community can tolerate or endure.

This is the congressional finding. This is the evidence adduced before the Subversive Activities Control Board. This is what the Communists themselves denote the nature of their organization to be. For example, the Communist Internationale, December 1, 1933, early carried instructions to international party groups upon the basic principles of illegal work, and leaders were reminded that "conspiracy is a supremely organizational concept. If you hear complaints about the lack of conspiracy in the cadres of this or that party, it means that the party's system of work, of leadership, and of education of cadres are no good."

It should be clearly understood that Communist propaganda and agitation are not aimed toward the fulfillment of the democratic process of free and open discussion or the orderly evolution of our society. On the contrary, they are tactics employed in aid of Soviet imperialism, calculated not to improve or reform our free society, but to inspire internal disorder, to recruit adherents to the conspiracy, to create and strengthen revolutionary organizations preparatory to the seizure of political power which is to be accomplished not by constitutional means or at the ballot box, but by deceit and violence, and in that way to impose upon the majority of our people the will of a morbid and fanatic minority.

The function and mission of the Communist Party has been well summarized by the learned historian, Stefan T. Possony, professor of international politics at Georgetown University:

Conventional political parties are loose organizations designed to win elections. Communist parties are revolutionary, paramilitary, or military machines, designed for conflict, violence, and social fission. While Communist parties, like other political organizations, have patronage and election functions, they are primarily what Seiznick calls combat parties or organizational weapons. Whether Communist parties are operating singly or in conjunction with other parties of a similar type, whether they operate openly or clandestinely, they are an integral part of the worldwide Communist military and nonmilitary effort.

The primary mission of the Communist armed forces is to defeat the armed forces of the non-Communist powers. The primary mission of Communist parties is to weaken and disorganize the rear of anti-Communist armed forces and to destroy their inner cohesion. While the specific mission of the Communist armed force, like that of any other armed force, is physical and military destruction, the broad mission of Communist parties (and their subsidiary organizations) is the political, social, economical, and psychological paralysis and fission of anti-Communist states and coalitions.

The specific functions of Communist parties can be divided into three broad categories: organization, deployment and operations.

* * * * *

(3) The operations of Communist parties may be divided into four broad categories: Intelligence, nonmilitary, paramilitary, and military activities.

(a) Intelligence operations: collection of information, transmission to local collection points, transmission to the political and military command posts of international communism, dissemination of misinformation and disinformation, and deception and double deception.

(b) Nonmilitary operations: agitation and propaganda, character assassination and building up of individuals, antimilitarism and defeatism, economic warfare, inclusive slowdowns, strikes, political warfare, inclusive elections and diplomacy, policy sabotage, subversion, disintegration of hostile organizations, and provocation.

(c) Paramilitary operations: retail sabotage, mass sabotage, individual terror, mass terror, demonstrations, coups de main, riots, and guerrilla undertakings.

(d) Military operations: auxiliary military missions, for example, scouts, couriers, signalmen, disobedience, desertion, rebellion, mutiny, breakoff of military units and their incorporation into revolutionary forces, attacks by revolutionary forces, partisan and irregular warfare, uprisings, local/nationwide, independently, or in support of Red army, civil war.

In addition to their main functions, Communist Parties devote great attention to the control of their members and their operations.

In fine, then, just as the Navy is the force waging naval warfare, the Communist Party is the force waging social fission warfare. To phrase it differently: The Armed Forces wage front warfare, the Communist Party, rear warfare. Together with the conventional military force, the Communist Parties, are integral parts of the Soviet conflict machine, components of a machine responsive to the nature and needs of modern total war, which consists of front and rear warfare. Not only with atomic weapons is this war fought but with military forces and social fission organizations. Modern war is a conflict between political structures and organized societies. The Communist Party is a machine designed for use in a war in which the front is everywhere.[3]

On June 5, 1961, concurrently with the decision in the Communist Party case,

[2] Quoted in Wallace Mendelson, "Justice Black and Frankfurter: Conflict in the Court," University of Chicago Press, 1961, p. 115.

[3] Stefan T. Possony, "A Century of Conflict: Communist Techniques of World Revolution," Chicago, Regnery, 1953, quoted in "The Communist Conspiracy," pt. I, p. 14 ff., H. Rept. No. 2240, 84th Cong., 2d sess., Committee on Un-American Activities.

the Supreme Court announced its decision in the case of Julius Irving Scales, whose conviction under the Smith Act as a "purposive and active member" of the Communist Party was affirmed. Scales was the chairman of the North and South Carolina Districts of the Communist Party in the United States. Among other things, he recruited new members into the party, promoted and advanced the education of selected young party members in the theory and practices of communism undertaken at secret schools, in one of which he was the director. At the school of which Scales was a director, students were told of the party program and necessity for placing Communists in key industrial positions. In Scales' presence, students at the school had been shown how to kill a person with a pencil, a device described as a handy weapon on a picket line, for one could, and I quote from the evidence, "just take the pencil and place it simply in the palm of your hand so that the back will rest against the base of the thumb, and then we were to take it and the person, and give a quick jab so that it would penetrate through here, and enter the heart, and then if we could not do that, we just take it and jab it at the base of the throat." Other evidence showed Scales made several statements and distributed literature containing implicating passages. Scales, for example, explained to one witness that the Communists in this country would have to start the revolution, and would have to continue fighting it, but that the Soviet Union would aid the Communist Party in this endeavor; and that "if the United States declared war on the Communists in their revolution, then the Soviet Union would land troops, and he said that would be a bloody time for all." Now, I pause to inquire. Is this the conduct of a "political party"? Is this discussion of "political affairs"?

It may be of interest to note that, with all this evidence before them, Chief Justice Warren and Justices Black, Douglas, and Brennan again dissented in the Scales case, just as they did in the Communist Party case, decided the same day. But in the Scales case, Justice Douglas based his dissent on the ground of the first amendment, which he now said prohibited Congress from outlawing "membership in a political party or similar association merely because one of the philosophical tenets of that group is that existing governments should be overthrown by force at some distant time in the future when circumstances may permit." Oh, Consistency! Thy name is not Douglas, nor is it Black. Justice Douglas had that very same day—in the Communist Party case—subscribed to just the contrary. I repeat, in part, what he there said:

> The Bill of Rights was designed to give fullest play to the exchange and dissemination of ideas that touch the politics, culture, and other aspects of our life. When an organization is used by a foreign power to make advances here, questions of security are raised beyond the ken of disputation and debate between the people resident here. Espionage, business activities, formation of cells for subversion, as well as the exercise of first amendment rights, are then used to pry open our society and make intrusion of a foreign power easy. These machinations of a foreign power add additional elements to free speech just as marching up and down adds something to picketing that goes beyond free speech.

On the other hand, Justice Brennan demonstrates how to kill two birds with one stone. Sharing the evident personal prejudices of his minority colleagues against legislation designed to control Communist activities, and seeking to impose these prejudices upon the Congress, he gave a curious and novel turn to his dissent in the Scales case. He found that section 4(f) of the Internal Security Act—which extended immunity to membership per se in the Communist Party—legislated immunity from prosecution under the broader membership clause of the Smith Act and suspended, although it did not repeal, operation of that clause. A reading of both acts will evidence the patent absurdity of this position, but nonetheless Justice Brennan thought that there "clearly" emerged from section 4(f) of the Internal Security Act "a congressional decision" to extend immunity from prosecution under the Smith Act clause. If this was so clear, I wonder why five other Justices did not see it. And he voided the Smith Act clause on the basis of the Internal Security Act, an act which he concurrently declared void. I must confess that I cannot follow this winding course. Nor would I understand how the Congress could presumably intend to void a live act by a dead one, and thus kill both.

Mr. Speaker, these are the issues and these are the facts. Now I do not believe that the fate or future of the United States hangs upon these decisions. But I do believe that the effort of Congress to provide a sound legislative base—carefully and fairly designed to insure the safety of our free society, in the due exercise of constitutional duty and prerogative—must not be frustrated either by undisciplined judicial veto or executive ineptness, especially in these days of challenge and crisis when powerful enemies within and without seek to bring us down. Even the mighty oak will fall by repeated chips taken from its sturdy trunk. Our courage, our patience and our wisdom will meet grim tests in the days that lie ahead. Our country stands as a beacon of humanity in troubled seas. This light must not fail. The byplay and sophistry of friendlier days is not appropriate to the hour. To preserve unto our people and all mankind the victories of the human spirit won for us by generations of good and brave men, is our noble and imperative task, and for that purpose we must keep strong the heart of America.

WHEAT LEGISLATION

Mr. BREEDING. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. BREEDING. Mr. Speaker, today, I have joined with several of my colleagues in introducing a bill which will provide for permanent wheat legislation using bushels instead of acres as a means of limiting the quantity of wheat moving into the marketplace. This is the program developed and sponsored by the National Association of Wheat Growers, the National Grange, and the National Farmers Union.

We have seen the supplies of wheat gradually building up over the past few years, until now we have a supply more than double our needs for next year. Even with the reduced allotment in effect for the 1962 crop year, we have no absolute assurance that the carryover will be reduced next year. If we have average weather conditions, we could expect a reduction in production in 1962 as a result of the legislation recently passed by the Congress. But if we should have another bumper crop year like 1958, I seriously doubt if production will be reduced below demand. Only by changing over to bushel quotas can we be sure that wheat marketings will not exceed effective demand.

This bill is designed to provide for an orderly reduction in Commodity Credit Corporation wheat holdings at a rate of 100 million bushels, or more, each year by restricting the quantity of wheat available from producers for food and export. In addition, it will provide wheat producers with near parity prices for primary use wheat—wheat for food and export.

A national wheat requirement for primary use—estimated domestic food consumption and exports, less the quantity to be withdrawn from CCC stocks would be apportioned through States and counties to farms. Wheat could be processed into food products or exported only if certified to be—first, within the farm primary use share; second, purchased from CCC; or third, in the normal channels of trade on July 1, 1963.

In order to be eligible to market primary use wheat within a farm share, the producer would be required to retire tillable acreage equal to 10 percent of his wheat base acreage—as defined in the bill—without compensation. If a general land retirement program is in effect, the producer would be required to place 20 percent of the wheat base acreage in it to the extent funds available for such a program permit.

Price support at not less than 75 percent of parity would be provided as an aid to orderly marketing only on the farm share of primary use wheat. Wheat withdrawn from CCC stocks for primary use could not be sold by the CCC at less than parity.

The quantity of wheat to be withdrawn from CCC stocks each year is (a) 150 million bushels in 1963 and 100 million bushels in each succeeding year until desired level is reached, plus (b) one-half the quantity in excess of 450 million bushels exported as wheat or wheat products. Thus, if exports for 1963 were estimated to equal 1961 exports of 675 million bushels, the quantity to be withdrawn from CCC stocks in 1963 would be (a) 150 million bushels, plus (b) one-half (675–450) or 112.5 million bushels, or a total of 262 million bushels withdrawn.

This program has many advantages over the present acreage control program. First and foremost, it provides a mechanism for an orderly reduction in CCC stocks, and shifts the responsibility for storage of any surplus production from the Commodity Credit Corporation to the individual producer, thus resulting in significant savings to the American taxpayer.

Second, and almost of equal importance, it will encourage the production of higher quality wheat. Under present acreage programs, a producer has a market for all of the production on his allotted acres—either to the trade or the Commodity Credit Corporation. Thus his incentive is to produce the maximum number of bushels on his allotment. In contrast, under the bushel program, each producer has a limited number of bushels to sell into the market for food and export. Thus his incentive is to produce the highest quality possible in order to receive the most dollars for this limited quantity.

In a similar manner, since only a limited volume of wheat will flow through trade channels, warehousemen and subterminal operators will tend to select the highest quality possible to ship forward to mills or exporters. This would be a big step forward in upgrading the wheat moving into world markets, and thus increase demand for U.S. grown wheat.

These are benefits to the consuming public and to the taxpayers. This program is equally beneficial to our farmers. Under this plan, each producer can grow the crop best adapted to his individual farm, without artificially restricting the acreage of a single crop, and thus forcing the farmer to grow a crop on the balance of his land for which the land, or the producer's machinery, may not be so well adapted.

The only limitation placed on the wheat farmer is in the quantity which he can market, plus—and this is very important—a requirement that he retire at least 10 percent of his wheat base acres. The wheatgrowers have expressed a willingness to retire this acreage at no cost to the Government.

They do this because they realize the fallacy of the policy of limiting acreage of a single crop, and then planting the remainder of the land to a competing crop. Under this plan, the reduction in wheat acres will not be devoted to other feed grains, as has been the case in past years. In getting their own house in order, the wheatgrowers are anxious that they not create chaos in the markets of producers of other commodities. I might add that to my knowledge the wheatgrowers are the only commodity group to express a willingness to retire acreage without payment.

The other unique provision of this program is that the wheat producers are not looking to the Government to provide a market for their crop. All they are seeking is a means for self-control of marketings so that they can receive a fair price for their produce in the marketplace.

Mr. Speaker, I am firmly convinced that the wheat program provided in this bill is the ultimate answer to the perennial wheat problem.

FEDERAL RESERVE NOW FANNING FIRES OF BANK MERGER ACTIVITY

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Texas [Mr. PATMAN] is recognized for 30 minutes.

Mr. PATMAN. Mr. Speaker, last Wednesday, September 6, the Federal Reserve Board approved the merger of two New York banks—the Manufacturers Trust Co. and the Hanover Bank—to form the fourth largest in the world. This followed hard on the heels of the Comptroller of the Currency's approval the previous week of the merger of Continental Illinois Bank & Trust Co. with City National Bank & Trust Co. to create the largest bank in Chicago, and the ninth largest in the country.

Comptroller of the Currency Gidney's action opened the floodgates and tore asunder the so-called accord among the Attorney General, the Secretary of the Treasury, and the Comptroller of the Currency to hold up any new bank mergers pending the outcome of test cases in Philadelphia, Pa., and Lexington, Ky.

It is obvious that Mr. Gidney's action—taken in the face of opposition to the Chicago bank merger expressed by the Federal Reserve, the Federal Deposit Insurance Corporation, and the Attorney General—was the "break" the banks had been looking for. Apparently, the pressures shifted immediately to the Federal Reserve Board and two New York banks drove through approval by the Board of this new giant bank merger in New York.

FEDERAL RESERVE MAKES DECISION FIRST, GIVES REASONS LATER—IF EVER

Mr. Speaker, I have been doing some investigating in this matter and find that the Federal Reserve Board made its decision to approve the merger of these two New York banks without issuing any opinion or analysis showing why it concluded that the merger had no undue adverse competitive effects. Last Friday, two days after the merger was approved by the Board, I requested a copy of the Board's opinion and am deeply disturbed to find that it was not yet complete. I still have not received a copy.

Of course, occasionally courts issue opinions without supporting written or oral opinions, and then wait for a spell before issuing their full opinions. But here a serious problem is presented. I rather imagine that the antitrust division should see the reasoning upon which the Federal Reserve based its conclusion that this merger was not detrimental to competition. I imagine, too, that the antitrust division and the public would like to know why it is that the Federal Reserve could conclude that the merger of the two Chicago banks forming the country's ninth largest bank was bad for competition but that the merger of the two New York banks—to form the fourth largest bank in the world—had no such adverse effects on competition.

FEDERAL RESERVE ACTS BEHIND CLOSED DOORS

The strange fact is that the Federal Reserve Board has had the Manufacturers-Hanover merger under consideration since January of this year. Last May the Department of Justice notified the Federal Reserve that the merger might violate the antitrust laws. The Federal Reserve remained silent regarding its attitude toward the merger, but suddenly on Wednesday, September 6, after what the American Banker called "a surprise move following an all-day closed hearing at which leading officials of the banks urged support of the planned junction."

The Board approved the proposed merger.

To quote further from the American Banker:

> Appearing at the FRB hearings, behind closed doors were Horace C. Flanigan, chairman; Charles J. Stewart, president, and Dr. Gabriel Hauge, chairman, finance committee, all of Manufacturers; William S. Gray, chairman, and R. E. McNeill, Jr., president, both of Hanover, and counsel for both banks.

It is my understanding that representatives of the Antitrust Division were not invited to this hearing. Only the advocates of the merger—the banking officials vitally interested in seeing it approved were present before the Board. The meeting was closed to the public.

BANKS MERGE QUICKLY

Shortly after the hearing adjourned, and while the bankers were on their way back to New York City, the Federal Reserve Board issued its approval. Just as in the case of the Chicago bank merger the preceding week, the New York bankers acted swiftly to complete the merger before the Antitrust Division could act. This was graphically described by the New York Times of September 8 as follows:

> In addition, the banks undoubtedly moved swiftly to forestall any attempt by the Department of Justice to throw a roadblock in the way of the merger.

The Department of Justice made a last-minute effort to forestall the merger of the two New York banks, but was unsuccessful, just as it was in Chicago the previous week. According to the New York Times, September 10:

> The speed with which both Manufacturers and Hanover acted, plus the Chicago precedent, made it difficult, if not impossible, for the Department to step in to block the New York merger.

Thus, once again the sequence of events was repeated. A Government banking authority—this time the Federal Reserve Board—approved a major bank merger. The banks quickly moved to put the merger into effect. The Department of Justice sought to enjoin the merger. The banks pleaded that the restraining order had a deleterious effect. The Court permitted the merger to go ahead, and this morning another hearing is to be held, at which the banks must show why a temporary injunction should not be granted against the merger.

WHAT ARE THE FEDERAL RESERVE'S STANDARDS IN MEASURING COMPETITION?

I think it is fair to conclude from all that has gone on in the bank merger field for the past several years—and particularly in the past 2 weeks—that our appointed banking authorities really have little or no interest in preserving competition in the banking business. It is only with great reluctance that they examine into questions of competition when a merger is proposed.

I have challenged Mr. Gidney and asked for his resignation because it is clear that he favors monopoly in the banking business—not competition. Now I wonder what the position of Mr. William McChesney Martin is in this regard. What were the opinions of the other members of the Board of Governors? I understand a vote was taken regarding the Chicago bank merger among the Board members? How many voted in favor of the merger and how many opposed it?

What were the votes on the New York bank merger? How many of the Board members favored this, and how many opposed it? These facts have not been revealed to the public.

According to Washington Banktrends:

Even blase officials of this Government city were jolted with agency decisions permitting two big banks to merge all within approximately 10 days. The Reserve Board's approval of the Manufacturers-Hanover consolidation which was to be effective on Friday at 3 o'clock to possibly thwart action by Justice followed hard on the consolidation of the Continental-Chicago national banks. The latter won a delaying action through the courts. The New York merger was approved by the Reserve Board on September 6 and without revealing the names of the Governors who voted for or against it. There were dissents. Governor Robertson's record against such mergers is in evidence.

THE FEDERAL RESERVE SHOULD ISSUE OPINIONS TO THE PUBLIC

Mr. Speaker, I am very disturbed by the covert approach to these matters taken by the Federal Reserve and the Comptroller of the Currency. The public is entitled to know the facts and analyses on which they base their conclusions that one merger is bad and another one good. Government must operate in a goldfish bowl. The acts and decisions of Government officials are not above and beyond the scrutiny of the people. The Federal Reserve may feel that it is separate and apart from the Government. It may feel that it can operate like our big corporations—beyond the surveillance of the public. But this must be changed. The Federal Reserve is not a private club. It must act in the public interest. And its actions must be explained to the public. Secrecy has no place in the activities of the Federal Reserve.

Under the Banking Act of 1960, the Board of Governors is required to include in its annual report its approvals or disapprovals of mergers. There may be no statutory compulsion for the Board to issue well-documented opinions in regard to bank mergers at the time it makes its decision to approve or disapprove. But the Federal Reserve is a quasi-judicial body and I would think that, in the public interest, it should issue opinions at the time of handing down its decision on merger matters.

As a matter of fact, since there are seven members of the Board of Governors, there might even be majority and minority opinions issued in these matters. It is only through a full disclosure of the facts developed by the Board which led to its opinions that the public can know the standards of competition observed by the Federal Reserve.

STANDARDS FOLLOWED BY FEDERAL RESERVE IN CHICAGO MERGER

I have discussed at some length in the RECORD of September 6, beginning at page 18304, the way in which the Antitrust Division was checkmated by the approval of the Comptroller of the Currency in its attempt to get a temporary restraining order to forestall the Chicago bank merger. The Antitrust Division secured from the Board of Governors the Board's report on the competitive effect of the Chicago bank merger and submitted it into evidence in connection with the proceedings. However, although the Board's report constituted a strong prima facie showing, this was disregarded by the district court and the approval of the Comptroller of the Currency was the governing factor considered by the court in rejecting the Government's effort to hold up the merger.

Some significant facts were shown in the Federal Reserve report. The geographic markets served by the two merging banks were examined; competition between the two institutions was analyzed in terms of the trade each handled with individuals, partnerships, and corporations; the extent of the competition between them for correspondent bank deposits, and for deposits of U.S. Government and other public funds were considered. The Board found that there were 48 common borrowers of both institutions, with loans totaling $118.8 million in Continental and $23.2 million in City National. As the Board report points out, "of these related customers, seven had loans in amounts of $1 million or more from each of the banks and may be placed within the category of national borrowers."

The Board's report indicated that there were 379 common demand depositors with deposits of some $274 million in Continental and $67 million in City National. There were 1,200 common time depositors with deposits of $3.2 million in Continental and $2.8 million in City National.

After examining a wide variety of matters, the Board concluded:

The proposed merger of the second and sixth largest banks in the [Chicago] area would substantially lessen both existing and potential competition. As both banks serve similar clientele, the elimination of the smaller bank would remove an alternative source of competitive credit and deposit facilities as well as terminate its future capability for growth and enhanced competitive capacity. The competitive position of the applicant, already one of two dominant banks in the city, would be strengthened. As a consequence the preservation of effective competition in the area would be more difficult.

FEDERAL RESERVE REPORTS ON NEW YORK MERGER NOT AVAILABLE TO BE COMPARED WITH ITS REPORT ON CHICAGO MERGER

Unfortunately, we do not yet have the Federal Reserve Board's report on the New York bank merger, so we cannot make a direct comparison of the standards which were followed in the two cases. All we can do for the time being is wonder why on the one hand, the Board of Governors disapproved of a bank merger in Chicago establishing the ninth largest bank in the country, but approved one in New York setting up the fourth largest in the Nation and the world. We can only wonder why it is that the Board saw no deleterious effect on competition in a merger which, as alleged by the Attorney General, would result in an increase in concentration in the hands of the five largest banks in New York City from 70 to 75 percent of the total deposits for all banks in New York City and from 72 percent to 77 percent of the total commercial bank loans in New York City.

VEIL MUST BE LIFTED FROM FEDERAL RESERVE HEARINGS

Mr. Speaker, the Federal Reserve and the Comptroller of the Currency are issuing opinions on bank mergers which have great influence over the courts, and for all practical purposes, make virtually impossible the efforts of the Department of Justice to prevent the scrambling up of the business of the merging banks. As a result, the acquired bank will probably never be fully restored as an independent factor in competition. Hence, I make the following proposals:

First. Both the Comptroller and the Federal Reserve should hold open hearings in which oral argument is heard.

Second. The reports submitted by the examiners which form a basis for the conclusions reached by the Comptroller and the Federal Reserve Board should be made public.

Third. After a full hearing, where all sides may be heard, including the Department of Justice, the Comptroller or the Board should issue written opinions. Under Federal Reserve proceedings, the votes of the members of the Board should be recorded, and majority and minority opinions issued.

Fourth. The merger should be stayed for 30 days pending the filing of antitrust proceedings by the Attorney General where the Board or the Comptroller has given its approval.

This is a program which will remedy the current chaos and make it possible for the Antitrust Division to effectively invoke its injunctive powers. This is the only way that the public interest can be protected, for as Comptroller Gidney has acknowledged, it is virtually impossible to restore competition in the banking business by a divestiture, once the merger has been permitted to take place.

BETRAYAL IN THE CONGO

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Indiana [Mr. BRUCE] is recognized for 60 minutes.

Mr. BRUCE. Mr. Speaker, last week, meeting an invitation to appear as a guest on the radio program, "Capital Assignment," I made the statement that I would request an investigation by both the other body and this body of the Congress into developments that I consider tragic in the Congo. At that time I charged that the U.S. State Department by its incredible silence is acquiescing in the Communist takeover of the Congo.

I fully realize the seriousness of that statement. While I am a freshman in Congress, I have been a close observer of the national political scene as a newsman for many, many years, and I am fully aware of the pressure, the attacks, and the heat that come upon any individual, over the years, who dares raise the question of the failure of policy.

I make no charges of treason. I cannot prove any. I simply say that over a period of years the tragic growth of communism and its victories in one area after another of the world forms a consistent pattern.

As a newsman over the years, I heard the anguished voices of Congressmen, of Senators, the Members of this body on both sides of the aisle, raised in warning of events that were taking place in Poland, Czechoslovakia, Yugoslavia, Hungary, Laos, Cuba, and British Guiana. Back in Indiana we heard these voices, and even more deafening was the silence of those charged with responsibility.

It is too late to prevent the Communist takeover in Cuba. Yes, it is too late to prevent the Communist takeover in British Guiana. These are accomplished facts. Yet there were those in this House who on the matter of Cuba, while Fidel Castro was still in Mexico, rose in this Chamber and warned about him, about "Che" Guevara, about Raul Castro, about the motley crew of trained Soviet agents who were around Fidel Castro, and they were met with the silence of those in position to act.

It is no pleasure for me to stand here and push myself into this area. As I say, I am familiar with the attacks that have been made over the years against those who do this. But when I became a candidate for the Congress of the United States I did so with no reservations and with no limitations upon what one might be called upon to do in accordance with one's beliefs and principles.

I realize there is a frustration in talking about the situation when I do so after the regular order of business, because I would like to shout from the highest platform that the Congo is going into the hands of those who would destroy it. If this Communist takeover was inevitable I would not have risen today; but it is not. It is being done with the acquiescence of American leadership, of silence; it is being done with the tax dollars of American citizens, $32 million from the United States to support the Communist takeover in the Congo.

You say, "Oh, Congressman, you are excited." I am excited, and admit it. But it is a concerned excitement, an excitement that I cannot possibly describe without a real emotional display on my part.

Bit by bit we see a tide that is creeping ever closer to the shores of the United States. I do not minimize the crisis in Berlin—not for one second. I recognize that from the beginning of the setup in Berlin the risk of war was there, with the division that was taking place. It has been there consistently. It is still there today. Under that kind of setup, at any instant a war could develop. But, I also recognize and have recognized over the years the technique of diversion of the international Communist movement which with great deliberation centers our attention in one given spot and then moves elsewhere. Oh, what a beautiful operation. They did it in the seizure of China. They had our attention centered in one spot in Europe and they moved with the collaboration of Americans for the conquest of China.

What has all this to do with the Congo? My colleagues, it has everything to do with it because time is running out, if it is not too late already. We have 3 to 4 weeks at the most in which to change our disastrous policy in the Congo and prevent it from going into the hands of the Communists.

I know this pattern. I have watched it as a news commentator. It did not take any crystal ball to be able to predict what was going to happen in Cuba. I tried as one citizen with a microphone in front of me to warn in that area. Some people listened. I can do no less than at least raise a voice of warning in a release I have already given to every member of the Committee on Foreign Affairs of the House of Representatives on both sides of the aisle.

I am heartened by the action of the junior Senator from Connecticut in the other body, who on Friday of last week, the same day of my statement on the Mutual network program, issued a similar statement without any collaboration with me whatsoever and then who yesterday in the Senate introduced a resolution for the creation of a select committee of the Senate right now—not tomorrow, but now—to report back by January 2. His Senate resolution called for an appropriation of $75,000 to investigate the tragedy that is taking place in the Congo.

What are the facts? What is happening in the Congo? The New York Times of September 6 reported from the Belgrade Conference of Neutrals, and I use the term loosely, that Cyrille Adoula, the new Premier of the Congo, spoke out of both sides of his mouth at the neutralist conference.

While he was critical of the Soviet Union's resumption of atomic testing, he made it clear that he would follow the policies of the late Patrice Lumumba. In this sentiment he was joined by his deputy premier, Antoine Gizenga, who was former deputy to Lumumba and succeeded that Communist puppet in leading a Soviet-backed government in Stanleyville, in Oriente Province of the Congo.

Here we have the declaration of the man Adoula himself, placing his position on the world scene in a clear light. He will continue the policies of Patrice Lumumba.

Thus, we can only expect a Congo regime which will draw closer and closer to the Soviet bloc.

This is the regime the United Nations is supporting in its Congo operations—which operations are heavily financed by American money.

In the Congo, the U.N. has actively, by use of force, been attempting to crush the independent State of Katanga led by the pro-Western, Christian, Moise Tshombe.

Our State Department supports this U.N. policy, and so, once again, we see the spectacle where our money is used to destroy a leader who is Christian, pro-Western, and pro-freedom—in our camp—to build up and support a leader whose own words prove him to be in the pro-Soviet camp.

This morning's edition of the Washington Post on page A–11 carries a story with the heading "Tshombe Charges U.N. Fails To Protect Aides."

I quote from the article in the Washington Post:

ELISABETHVILLE, CONGO, September 11.—President Moise Tshombe of Katanga tonight claimed the United Nations plans to end the independence of his breakaway province before the opening of its General Assembly session September 19.

Tshombe told his second press conference of the day that "Katanga is the object of political maneuvering and even threats" by the U.N.

The Katangan leader called the conference as heavily armed Katangan patrols rumbled through the streets of Elisabethville in the face of mounting tension over a threatened showdown between the Katangan regime and the Central Congolese Government.

The threat developed as United Nations Secretary General Dag Hammarskjold prepared to leave New York Tuesday for Leopoldville at the invitation of the Central Government.

Tshombe claimed he had rejected a U.N. "ultimatum" to go to Leopoldville today or face "grave consequences."

Remember that statement, as I proceed, a little later.

The article reads further:

However, Conor O'Brien, chief U.N. representative in Katanga, told reporters he did not give an ultimatum to Tshombe but indicated it would be preferable if the President went to Leopoldville.

Tshombe said Katanga is willing to negotiate with Adoula's government anywhere except Leopoldville. Four Katangan legislators recently sent to the Congolese National Parliament in Leopoldville had not had their freedom guaranteed by the U.N. as promised, he said.

Two, he said, fled Friday to Brazzaville and the two others were believed to be hiding. Tshombe said his government has "energetically protested" to the U.N.

Now, as I pointed out, in the Congo, the pro-Western Methodist, Moise Tshombe, has consistently raised his voice in a plea to the Western World. He said, "I like you people; I like the West." But nobody listens. And I should remind you of a man by the name of Mikhailovich of Yugoslavia who was shot by the Communist partisan Tito after we betrayed him and others. Our State Department supports this U.N.

policy; and so, once again, tragically we see the spectacle where American money is used to destroy a leader who is a Christian, who is pro-Western, whose pro-freedom philosophy is evident to anyone, who is in our camp by declaration and by deed, where our money is being used to build up and support a leader whose own words prove him to be in the pro-Communist camp.

Mr. Tshombe has shown the world an administration of a state that reflects order and progress for over a year, during which period the Congo has flamed with unrest and disorder.

Since breaking with the Congo because its then leader, Patrice Lumumba, sought to aline the new Republic with the Soviet bloc, Katanga has drawn up its own constitution. It has its own flag. This next item is most important. Its currency is accepted for exchange in American banks and those of other nations. It has its own uniformed soldiers, and its own national anthem. Mr. Tshombe can put no law into effect alone. He needs approval of Katanga's Parliament. He has a Cabinet of 12 ministers and 4 secretaries. Katanga is equal in size to the total area of four independent African nations, three of them newly emergent from colonial rule—Ghana, Guinea, Senegal, and Liberia.

Did not the State Department recognize Senegal, the wealthy part of the former Mali Federation, when it sought and gained independence?

Now, what kind of a double standard are we operating on here?

It is probably one of the richest parts of the African Continent.

It produces annually about 8,200 metric tons of cobalt—60 to 70 percent of the world's output. Its annual output of copper, 300,000 metric tons, is 7.5 percent of the world's production.

In this regard, the Chicago Sun-Times editorialized on July 31, 1961:

> But the fact remains that Russia is on the verge of winning an important cold war victory by default. For if the Soviets extend their influence into Katanga, they will be in a position to control 70 percent of the world's cobalt supply.
>
> Radioactive cobalt is an important element in hydrogen bombs, thus potentially is the most lethal force on earth. It is also a valuable weapon in the medical world's fight against cancer. The nonradioactive variety is used for high strength steel alloys, used in conventional weapons, and for casings for missiles requiring tremendous heat-resistant qualities.
>
> While present U.S. stockpiles of the metal are held to be sufficient to meet foreseeable needs, the West should certainly do more than sit idly by while the Communists gain access to territory that can prove of immense strategic and political value to them. The world knows that Tshombe was anti-Communist from the beginning. He took Katanga out of the Congo Republic because he objected to attempts by the late Patrice Lumumba to draw the new nation into the Soviet orbit.

It is easy to see why Katanga is such a tempting morsel for the insatiable Soviet appetite. Reliable sources have published information that the Communist Eastern European Council for Economic Assistance—COMECOM—at its last meeting in Prague, April 11 to 22, 1961, decided to utilize the mineral resources of Katanga in the framework of the 5-year plan worked out for Czechoslovakia.

Is it not interesting that this Eastern European Council for Economic Assistance of Communist countries is already so sure of itself that it is including the Katanga output in the 5-year plan for Czechoslovakia? What would give them such confidence? What would make them so sure of the moves of the future?

What is not at all understandable is why the U.S. State Department should support the United Nations policy which seems must inevitably bring this rich state under the domination of the Soviets.

Secretary General Dag Hammarskjold had sent to the Congo as his personal representative the Indian, Rajeshwar Dayal. Dayal's policies in the Congo were highly questionable, and he became the man most hated by the Congolese outside of Patrice Lumumba's pro-Communist group.

After Lumumba had been assassinated, his successor, Gizenga, tried to enlarge the area under his control by force. Tshombe met force with force—but here Dayal showed his hand, by cracking down on Tshombe, but not the aggressive Soviet puppet Gizenga. President Kasavubu as well as Tshombe became fed up with United Nations operations in the Congo.

The Congo leaders assembled in March to try to prevent the complete disintegration of the Congo. They met in Tananarive in the Malagasy Republic—formerly Madagascar. These leaders, including Kasavubu and Tshombe, agreed upon a federation of states as the solution to the Congo problem.

At this point the American Government announced it would not support a confederation if it meant that the Congo would no longer be a single nation. It would be interesting to know why our State Department took this position. It always talks about respecting the desires of peoples emerging from their colonial days. Could it be, as the Indianapolis News on March 17 indicated, that the Department was once more not on the side of anti-Communist friends abroad? The News said:

> Indeed, if our policy had any semblance of reason, we would bend every effort to make the confederation succeed, because it represents a victory for the anti-Communists—a defeat for the Communists.

After our position was expressed in opposition to the agreed-upon federation of states in the Congo, strange intrigues set in, intrigues that demand investigation. Suddenly Dayal was withdrawn by the U.N. Secretary General, supposedly on temporary leave. But he did not return.

Then the U.N. moved more aggressively—ultimately taking the unprecedented step under questionable authority of seizing and arresting all the white advisers to Tshombe on August 28 and under the weight of such force pressured Tshombe to relieve these advisers of their duties. In a military operation, the New York Times of August 29 reported:

> A task force of Swedish and Indian troops commanded by Brig. Singappa Raja, of India, struck at Elisabethville, the capital, at dawn.
>
> They seized the airport, post office, telephone exchange and radio station, and raided army headquarters. Guards were posted at hospitals.
>
> Armored cars with heavy machine guns roved the streets.

The United Nations in action—it moved with brute force against the most peaceful state in the Congo. Never has there been a clearer example of the extent to which Soviet influence has penetrated U.N. operations.

I cannot say how, I cannot say why or what their program was or how they did it. But it has happened.

The U.N. is no longer just a debating society.

Sometime before this dastardly move on the part of the international organization supposed to be dedicated to peace, the American and U.N. policies had evidently forced President Kasavubu to change his position respecting Katanga's independence as an equal partner in a Congo confederation.

Kasavubu reneged on his Malagasy agreement with Tshombe and signed an agreement with the United Nations giving it the authority to force out of the Congo all foreign advisers not on Kasavubu's payroll.

The U.N. Security Council had passed a resolution calling for withdrawal of these foreign officers and advisers.

President Kasavubu took another step, one that shocked world opinion everywhere. Moise Tshombe of Katanga went to Coquilhatville, in Equator Province, for a political conference with Kasavubu. Tshombe condemned the agreement with the U.N. Kasavubu had signed and when he tried to leave the conference Kasavubu arrested him and charged him with high treason. This treacherous act was condemned everywhere outside the Soviet bloc. The New York Times May 9, 1961, editorialized:

> The United Nations has asked President Kasavubu to adhere to the principles of "fair treatment and due process of law" with regard to Mr. Tshombe. One can imagine what an uproar would have been created in many quarters if Premier Gizenga of secessionist Stanleyville had been similarly seized. The United Nations has the duty to insist on Tshombe's release.

Kasavubu released Tshombe, but not until many weeks had passed, and General Mobutu interceded personally in behalf of Tshombe with the weight of the army behind him.

Now, the situation has developed further.

Early in August, the United Nations pressured practically all Congolese politicians except Katanga's to agree to a new national government headed by Adoula, whose position, as I said, earlier, is to follow the policies of the late Soviet puppet Lumumba.

The Minister of Interior in Adoula's regime is Christopher Gbenye. He held the same post in Gizenga's pro-Communist government in Stanleyville. On

this point the Wall Street Journal of August 29 quoted one Western diplomat as saying:

> I can't forget that the classic Communist strategy for subverting a country begins with control of the Interior Ministry.

Why is this? The Interior Secretary controls the police. He controls the police organization of the country. Give the Communists control of the police and you give them control of the country.

The junior Senator from Connecticut in his remarks made on Saturday made this statement, and these are his charges. He says that Gizenga is a cadre Communist. I did not go that far. I say there is a pattern. The junior Senator from Connecticut said that Gbenye is a Prague-trained Communist.

The junior Senator from Connecticut made that statement. Those are most serious charges.

I had said simply that there was a pattern here which was a repeat performance. I was familiar with the ultraleftist leanings of Gizenga and Gbenye.

Perhaps this is why our State Department did not want a federation with anti-Communist Tshombe as a powerful figure in the Congo. It seems to have preferred to help set up a regime that could be counted upon to be neutral, with a pro-Soviet coloration; one we American taxpayers can be expected to pitch in foreign aid to in order to keep it from going into the Communist camp. Yet it is being delivered to them lock, stock, and barrel.

Mr. Speaker, on July 10 the U.S. delegation handed the United Nations a check for $32,204,061 as the American contribution to the account for operations in the Congo from January 1 to October 31, 1961. Mr. Speaker, this would be unbelievable—absolutely unbelievable—action on the part of our State Department and the United Nations which our money has supported, if it had not happened over and over in the past, and if we did not know that Castro is getting money from the U.N. right now; if we did not know that the pink gentleman from British Guinea, Cheddi Jagan, had held his hand out and had it filled from the same source just before the recent election in British Guinea.

Mr. Speaker, over the years, as a newsman, I have heard the cry—I have read it in the Associated Press, the United Press, and newspapers from all over the country—of scattered individuals here in this body, and in the other body and elsewhere, raising the same question, "What is wrong in Foggy Bottom?" And I do not mean to be facetious. I simply say I ask the same question now. What is wrong in the State Department? Who? Why? And, for what reason?

Mr. Speaker, our distinguished colleague, the Honorable WALTER JUDD, after the loss of China, summarized our disastrous foreign policy in these succinct words:

> We have been trying to make friends out of our enemies by making enemies out of our friends.

He was so right. It does not work. If I have a friend here, and there is a man over there who is my enemy, I do not walk up and hit my friend in the nose and say, "I am your friend." He would think I was a fool, and I would be. But this is what we have done time and time again in our foreign policy.

Mr. Speaker, the State Department, regardless of the administration in power and, oh, I get so amused in debates on the floor of the House where issues come up and I hear one side or the other refer to President Eisenhower's having said this or somebody saying President Kennedy said this, or President Truman said this. I do not care who said what. I am interested in what is happening. They can be wrong in all administrations. I say in the matter of foreign policies they have been wrong, and they are wrong. I want to know why, before it is too late for our children who soon will be adults, and will be bearing these responsibilities if they are given the opportunity.

It has not been Republicans. It has not been Democrats. It is an entrenched group that is never elected. They stay there. Administrations come and administrations go. Why these things happen, I do not know. I simply say that they do, and the time is past when we can sit silently by and wring our hands and issue white papers, as the State Department did on Cuba, and say things like: "Castro betrayed the revolution."

Nonsense. How can we say a Communist betrayed a successful Communist revolution? Cuba today is a Communist country. Castro led a successful Communist revolution in Cuba.

Yet, that is what the State Department said in its white paper—Castro betrayed the revolution. Oh, no. He betrayed the hopes of the people that they would have a better way of life, and a freer society. But he did not betray the revolution, because this was his plan for the revolution from the beginning. Do they not understand what communism is all about? Do they not understand the dialectics and semantics and the upside-down language—war is peace, black is white, negotiation meaning an extension or an instrument of war?

Cannot they understand this? Oh, the record is so long, it is so dismal, and I am so thwarted in trying to get the answer.

In 1933, going away back, we betrayed the Russian people by recognizing the Soviet regime as the legitimate government of that land whose fate it was to be but the first of a long list of nations to be conquered by the World Communist Movement. Voices were raised, but, oh, no—$90 million in trade. We had economic problems. Get the money flowing, boys; everything is going to be all right. Ignore the principle, ignore the plot, ignore the movement. Make a deal somewhere along the line. Take a palliative, take a sleeping pill, and you will feel better in the morning. But let us not fool ourselves. One of these mornings, when you get in the habit of taking these sleeping pills, you may not wake up.

In Teheran in 1943 we agreed with Great Britain and the U.S.S.R. to supply Tito and his Communist partisans with supplies and equipment to the greatest possible extent. This, in spite of the fact that the Minister of War of King Peter's Yugoslav government in exile was fighting on the lines, carrying on combat. General Mikhailovich was at the head of troops fighting in the field.

As a result, in 1946, the abandoned Mikhailovich was executed by the triumphant regime of Communist Tito.

The Yalta Agreement finalized the sellout of the Christian nation, Poland. You say, "You are digging up dead cats"? My friends, these dead cats are making a mighty big odor these days, a mighty bad odor. It is hard to live as the odor of Poland and Yugoslavia, Czechoslovakia, Latvia, Estonia, Rumania, and the rest of them seep through the sills of our windows. It is an unbearable stench, this tragedy of betrayal.

Why? I do not know, but let us find out. The Polish situation was so bad and so obvious that the American Ambassador to Poland, Arthur Bliss Lane, quit in 1947 and wrote a book called "I Saw Poland Betrayed." What happened? Did that book become a best seller? Did anybody listen? Was he welcomed with open arms for his patriotic position and sacrifice? No. "I Saw Poland Betrayed."

A deadly silence emanated from the State Department. The pattern of Yalta was carried out in Bulgaria and Rumania with the abandonment of the anti-Communist forces. There was the murder of Nikola Petkov, the respected Bulgarian leader. After the agreement our inaction was derided by the Communists themselves. We should draw a lesson from this. While we tried to woo them and make them our dear friends, they laughed at us.

Here is proof that the Communists are deadly serious about their deviltry. Here we have been shown up to be merely protesters, occasionally.

After the execution of our friend Petkov, the Communist Prime Minister, a man by the name of Georgi Dimitrov, in the Bulgarian National Assembly, boasted to his hearers—this is a Communist, and I shall quote him, speaking to the Bulgarian Assembly, after the Communist had just shot the pro-Western political leader:

> You said the court will not dare to sentence him to death. It would be too horrible. Both Washington and London will rise against it. * * * What happened? * * * The court * * * fulfilled the will of the people and sentenced the traitor to death.
>
> Then you said: If they execute the death sentence, the glass of patience will overflow. The whole world will rise against it, and all its wrath will fall on the back of the Bulgarian people.
>
> It was executed.
>
> What happened then? Who rose against it in the country? Where were the demonstrations, the mutinies with which we were threatened? Nothing like that happened.
>
> And what happened abroad? * * * No one raised a hand in defense of Petkov. Some people in the West shouted for a while, but soon quietened [sic] down. * * * The whole incident was soon forgotten ("Cold War and

Liberation," John F. O'Conor, Vantage Press, New York City, p. 174).

Could anything be more clear, could anything be more tragic? They knew that for some reason there would be no action from the West, only a few weak words.

We all know the story of China. People like Owen Lattimore and others advised us through the medium of which I was a member, of radio, of television, of the press, certain areas—and let us accept our blame—that Mao Tse-tung was not really a Communist at all, just an agrarian reformer; that, after all, that nasty Chiang Kai-shek could not be tolerated; that this Mao Tse-tung was different; he was ready to free the people from their tyranny. Our State Department sold that line. China was lost to the Communists and the Korean war was fought, and every casualty, every drop of blood that was shed in Korea you can draw back to the failure of policy in China itself.

The then Secretary of State in February of 1949 told Members of Congress the solution of China's problems would have to wait "until the dust settled." That same Secretary when asked about that remark by the Senate Foreign Relations Committee on June 2, 1951, in hearings on The Military Situation in the Far East, stated on page 1765:

> As I recall, what I was trying to say at that time was that I could not see clearly as to what the outcome in China was going to be until, as my phrase was, "until the dust settled"; that is, until the situation had become more clear.

I am still quoting, and note these words:

> It was not a policy which I was advocating. It was a phrase which I used to describe my own inability to see very far in this situation.

What a statement to make; what a confession to make—our Secretary of State. This is what I am saying when I said, "I am not charging treason." I cannot prove anything like that. I am charging a heartbreaking repetition of the failure of policy time and time again. While the State Department could not see very far, or saw with tinted glasses, many reliable voices warned our Government about the dire consequences of its action and what they would be, but the State Department continued to favor the agrarian reformers like the modern Castro. "He is not a Communist," they said, "he is just an agrarian reformer."

General Marshall went to China to force the Nationalist government to accept the Chinese Communists in a coalition government. That was the official policy of the United States of America. When it was too late, the policy was reversed. Chiang was on Taiwan; Mao Tse-tung was in control on the vast mainland of China. When it was too late, we admitted our error, but not until the Communists were assured of victory.

The Communists were quick to act in Korea when they were told, in effect, that Korea was outside the defense perimeter of the American forces protecting Japan.

Secretary Acheson told the Press Club in Washington January 12, 1950, as reported in the State Department Bulletin, January 23, 1950, page 116:

> I can assure you that there is no intention of any sort of abandoning or weakening the defenses of Japan and that whatever arrangements are to be made, either through permanent settlement or otherwise, that defense must and shall be maintained.
>
> The defensive perimeter runs along the Aleutians to Japan and then goes to the Ryukyus. The defensive perimeter runs from the Ryukyus to the Philippine Islands.

That excluded Korea, and the Communists were quick to move there. They attacked 6 months later.

TAKE A LOOK AT INDONESIA

I know Sukarno is coming to visit and I should not say anything nasty about him. In Indonesia we sent weapons to Sukarno to help put down a Moslem insurrection that was caused by their fear of Communist influence in the National Government. Recently Sukarno in Moscow expressed his hope for long life for the Soviet regime in the U.S.S.R.

One could go on for hours and hours and hours and shed bitter tears over freemen that have become slaves. We could use all kinds of rhetoric. We could cite illustration after illustration.

We could go into Tibet, to China, or Castro's Cuba, Laos and what may be coming up in Vietnam, and what has happened in British Guiana and all of the European captive states—not satellite states but captive states, like Czechoslovakia, Rumania, Latvia, and East Germany and so on, one after the other.

Now it is not too late in the Congo. Not right now. The same pattern is being repeated again; a man whom the junior Senator from Connecticut says is a Prague-trained Communist is imposed upon the Congolese as interior secretary; Gizenga, who the junior Senator from Connecticut says is a cadre Communist, as deputy premier. Adoula, a leftist neutralist—and that is different from being neutral—is in the premier's spot.

Do we not ever learn? I beg the members of the Foreign Relations Committee, and the Foreign Affairs Committee of the House of Representatives—I beg anyone and everyone in this Chamber to lend their influence toward raising a cry that an investigation, not necessarily of subversion but of a repetition of failure of policy, be carried out right now in regard to the Congo. It cannot wait until next year. The time for action is now, not when it is too late. I beg my colleagues to listen—now.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. BRUCE. I am glad to yield to my colleague.

Mr. ROUSSELOT. Mr. Speaker, I rise to associate myself with the remarks of my colleague, the gentleman from Indiana, and to compliment him on the research job he has done on this critical Congo problem that faces our Nation. I know the gentleman from Indiana is aware of the desperate need in this time for our American foreign policy experts to understand how we can best support a true ally within a given country, or how we can refuse to support individuals who by their past performance turn out to be enemies. May I ask the gentleman from Indiana if he has discussed this carefully gathered information with the State Department? The seriousness of this particular problem is well known to many and I wish to know what the State Department response might have been?

Mr. BRUCE. I have not personally discussed this. I have spoken with people who have, however.

Mr. ROUSSELOT. These people that you spoke with, would you consider them to be experts in this particular problem?

Mr. BRUCE. Of the Congo?

Mr. ROUSSELOT. Yes. Did these happen to be people from the Congo?

Mr. BRUCE. Yes.

Mr. ROUSSELOT. And what did these gentlemen from the Congo tell you has been the response they received from the State Department when they tried to point out these problems in the Congo?

Mr. BRUCE. The reaction generally was—our policy, present policy, in the Congo was correct and was not to be changed.

Mr. ROUSSELOT. In other words, our policy was one of supporting the extreme leftist point of view?

Mr. BRUCE. Well, of course, I would say to the gentleman from California, those terms are not used in such a discussion. It was simply an expression that present policy was correct and they just did not see any reason to change it at this time.

Mr. ROUSSELOT. In other words, our State Department told these gentlemen Tshombe was not necessarily a friend of ours; or how did they discuss this?

Mr. BRUCE. I would sooner reserve the answer to that question for use at a later time, if the gentleman from California will grant me that privilege.

Mr. ROUSSELOT. I would be glad to do so.

Let me ask just one more question. Did the State Department express any concern that the Katanga Province which does have such a large portion of the supply of cobalt, a very critical material in the manufacture of hydrogen bombs and other types of weapons—did the State Department not express any concern to these Congolese visitors that possibly this particular province could go into the Communist orbit?

Mr. BRUCE. I do not believe that particular question regarding the mineral assets was under discussion.

Mr. ROUSSELOT. I wish to compliment the gentleman from Indiana who has devoted his life not only in the short time that he has been here, but in the time that he served in the news communication field, to the important problem of understanding the Communist threat to this country. Further, I am aware that the gentleman from Indiana has studied the number of instances that the Communist conspiracy has been successful in influencing our U.S. foreign policy. I wish to thank him for bringing this particular problem to light, especially showing us there is time to reverse

the disastrous direction of events that are now occurring in the Congo. I wish to compliment him for his very forceful and resourceful presentation here today.

Mr. BRUCE. I thank the gentleman from California.

I would like to make this observation, that at no time in this discussion have I referred to a Communist conspiracy in our Government. I have referred only to a failure of policy, and I suggest that it is the responsibility of the proper committees of the Congress to pursue it on this basis. If it leads elsewhere, that is something else again.

Mr. ROUSSELOT. Let me say this. I appreciate the fact that you did not refer to the Communist conspiracy in our Government. I was the one who referred to it. I personally feel that on many occasions our foreign policymakers have shown a tremendous lack of understanding of what the Communist conspiracy is and what it is doing. So, if you did not say it, I do.

Mr. BRUCE. Well, if you are going to put it in that terminology, I will have to accept it. If you refer to failure of policy, which has been repeated over and over again, such as I have cited in my presentation, then I would certainly have to agree. But, as far as describing it within circles of our own Government, as part of the Communist conspiracy, in the absence of any factual proof, names, times, places, and dates, I would have to reserve myself from that particular aspect.

Mr. ROUSSELOT. Certainly our policy has greatly contributed to the Communist cause in a great many cases.

Mr. BRUCE. I would have to agree with the gentleman from California.

Mr. SHORT. Mr. Speaker, will the gentleman yield?

Mr. BRUCE. I yield to the gentleman from North Dakota.

Mr. SHORT. Mr. Speaker, I, too, want to commend the gentleman from Indiana for raising his voice. As he has pointed out, too few people have taken the time or taken the interest, for some reason beyond my understanding, to raise their voices on this very question. You have done a great service to the American people in attempting to apprise them of the current project of the Communists in the colonies. This sorry situation is going on because we are preoccupied with the Berlin crisis. I do not mean to depreciate the seriousness of the Berlin crisis and its potential, but I happen to believe that Premier Khrushchev understands the American people and their frame of mind at this particular time well enough to realize that the United States will stand its ground in the Berlin situation. And, Mr. Khrushchev is enough of a realist, I believe, to recognize that the implementation of hostilities in Berlin could trigger off an atomic war that neither the Soviet Union nor the Western World could win. If we do not keep abreast of what is going on in the Congo, we are setting the stage for the firm establishment of a Communist beachhead in Africa which could be as tragic for the future of Africa as the establishment of a beachhead in Cuba can be and I fear will be for Latin America.

Again I thank the gentleman for yielding.

Mr. BRUCE. I am certainly grateful to the gentleman for his penetrating analysis.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. BRUCE. I yield to the gentleman from Iowa.

Mr. GROSS. Let me also commend the gentleman for the excellent presentation he has made. I would like to ask the gentleman this question. I was here most of the time during the gentleman's presentation, but did he mention Nkrumah of Ghana?

Mr. BRUCE. No; I did not refer to Nkrumah of Ghana as such.

Mr. GROSS. To my mind he is one of the worst dictators in the African area. I would hope that the gentleman at some future time would include him in a further presentation.

Mr. BRUCE. I would say to the gentleman from Iowa that there are so many areas in this connection that it would take an entire night to detail them. I do certainly have strong reservations about Mr. Nkrumah.

I am interested most vitally in this Congolese situation because if we do not act quickly but allow ourselves to be diverted, we are drawn away from what we ought to do immediately in the Congo. This comes first. I think we ought to look at all these areas. I have had reliable people call in my office and tell me to forget Africa, it is gone. I will not agree to that until there is not one vestige of liberty left in the continent of Africa.

Mrs. BOLTON. Mr. Speaker, will the gentleman yield?

Mr. BRUCE. I yield to the gentlewoman from Ohio.

Mrs. BOLTON. I not only want to commend the gentleman for the effort he has put into this, because he knows all the implications of it for himself, but I also want to thank him very earnestly. For many years I have been working as well as I know how to work in the anti-Communist field, and I have wanted very much a spokesman for a small group who would really move in. Now that we have an exponent over in the other body perhaps if we help from this end we can get immediate action.

I know as does the gentleman that time is of the essence. We have been slow. The people just do not listen, and then they laugh it off, and then they say: "Oh, she's just a little mad." I have heard that for over 30 years, and it is very gratifying indeed to have listened this afternoon to your very clear, very unemotional presentation of a situation which may mean the entire result of the world's history.

I thank the gentleman very much.

Mr. BRUCE. I certainly am grateful to the gentlewoman from Ohio, one of the most respected Members of this body, and I believe a member of the Foreign Affairs Committee of the House of Representatives, for her most kind remarks.

Mr. Speaker, at this point I wish to insert the full text of the editorial in the Indianapolis News of March 17, 1961, to which I referred earlier. I yield back the balance of my time.

IS THIS WHAT YOU WANT?

American foreign policy has had many low points over the past two decades: Yalta, the fall of China, mute complicity in the torture of Hungary, the subversion of Cuba.

But for sheer folly, and for flagrant disservice to American interests, this week's performance must rank somewhere near the bottom of the list.

To begin with, the United States has taken no action to back the faltering confederation of states achieved a week ago in the Congo—a step which alone offers hope of rescuing that area from communism. Instead, our Government announces it will not support the confederation if it means the Congo will cease to be a single state.

Why? What is the compulsion to force these diverse ethnic groups into a single government? What happened to the revered principle of self-determination? If a confederation as separate states is what these anti-Communist leaders want, why should we take it upon ourselves to oppose them?

Indeed, if our policy had any semblance of reason, we would bend every effort to make the confederation succeed, because it represents a victory for the anti-Communists, a defeat for the Communists.

The stark truth of the matter is this: Our policy is devoted to doing whatever the United Nations wants; the United Nations is devoted to doing whatever the neutralists want; the neutralists are devoted to doing whatever the Communists want.

By that process of graduated submission, our own policy is made an instrument of Communist strategy. We are in effect destroying ourselves, our anti-Communist allies, and the cause of freedom.

If this indictment seems too harsh, consider two other items in the week's news concerning Africa:

It has been acknowledged, even by such liberal journalists as Stewart Alsop, that U.N. forces in the Congo are working to promote the pro-Communist elements, and to subvert the pro-Western government of President Kasavubu. The principal agent of the pro-Communist cause has been Rajeshwar Dayal, the Indian military chief of the U.N. mission.

Which side is the United States assisting? "The U.S. Air Force," reported UPI 2 days ago, "proceeded with plans to fly the first tough Gurkha warriors from India into the Congo despite protests of Congolese President Joseph Kasavubu." In short, we are actively supporting the cause of our enemies against our friends.

A vote in the U.N. Security Council Wednesday presented a clear-cut confrontation of East and West. A motion was proposed against America's stanchly anti-Communist ally, Portugal, concerning the Portuguese territory of Angola. The motion was prepared by "neutralists" and supported by the Soviet Union. What did the United States do? It joined the Communists in voting against its own anti-Communist ally.

The outlines of American policy under the Kennedy regime are thus becoming frighteningly clear: We destroy those who would help us, and help those who would destroy us.

At this rate—unless the American people wake up soon, and flood their Government with protests—it should not be long before communism absorbs all of Africa, and our disheartened allies in Europe and Asia give up the struggle altogether. Is that what

you want? If not, why not let your Senators, Congressman, and President Kennedy know your feelings?

TOO LONG DELAYED

Mr. BAILEY. Mr. Speaker, I ask unanimous consent that the gentleman from Michigan [Mr. DINGELL] may extend his remarks at this point in the RECORD and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia.

There was no objection.

Mr. DINGELL. Mr. Speaker, pursuant to permission granted I insert in the CONGRESSIONAL RECORD an editorial appearing in the New York Journal of Commerce on September 6, 1961, entitled "Too Long Delayed," setting forth the strong moral, if not actually the strong legal, obligation the United States has to complete payment of the unpaid balance of war claims approved by this country in the Philippine Rehabilitation Act of 1946.

The United States is giving away billions to uncommitted nations, many of which, while not enemies of this country, consort with and give aid and comfort to our enemies in the great power struggle now going on to determine whether mankind will go down the road to freedom or tyranny. In such circumstances it is difficult to believe that this Nation would fail to honor its obligations as set forth in this excellent editorial.

The strong justice of these claims commends itself to us, as does the vigorous and courageous friendship, unflinchingly portrayed, by the people of the Philippine Republic and their leaders, outstanding among whom is the Ambassador of the Republic of the Philippines, the Honorable Carlos P. Romulo. General Romulo is a distinguished friend of freedom who, since long before the days of his service in this Congress, has been a constant spokesman to the world in America's behalf, and a true friend to all who seek liberty, freedom, and self-determination.

It would appear that these deserving claims should be met at an early date, if not from the compelling justice in them, then as a return for the friendship so richly given without reservation or cavil by our friends, the people of the Philippines.

The editorial follows:

TOO LONG DELAYED

In view of the vastness of the foreign aid programs the present and previous administrations have managed, by one means or another, to steer through Congress, it seems odd to us that so many legislative and other difficulties invariably crop up when Congress is called upon to authorize funds to pay what we owe to one particular foreign country—namely, the Philippine Republic.

Something on the order of $73 million is owed in all good conscience by this country to the Philippines, not in terms of foreign aid, but in compensation for damage done to the Philippines during World War II, when that land was a territory of the United States and as such, suffered heavily under the Japanese occupation and from warfare conducted both by American and Japanese forces.

Representative ZABLOCKI, of Wisconsin, has introduced a measure authorizing the payment of this sum in full. It does not represent any increase in Philippine war damage claims against the United States—but merely payment of the unpaid balance of such claims as were approved by this country under the Philippine Rehabilitation Act of 1946.

The present difficulty is not that a majority of either House of Congress opposes the Zablocki bill. It is—as has so often been the case in the past with such measures—that Congress is getting so preoccupied with the single issue of adjournment that the measure is in danger of being lost in the shuffle.

Many good and deserving measures have thus been lost in the past with the result that only later, when the legislators have returned home and had time for a certain amount of reflection, have the consequences of their omission become evident.

What would the consequences in this case be? It might be argued that it would merely be to postpone a decision which is practically inevitable, the nature of the American people and its Government being what it is. But to postpone a decision is, in effect, to make a decision. Or, as the Philippine Ambassador, Gen. Carlos P. Romulo quietly remarked recently, "justice delayed is justice denied."

Justice, in this instance, has been much too long delayed. As Gen. Douglas MacArthur remarked 2 months ago on his return from a visit to the Philippines, "there is a strong undercurrent of feeling (there) in its relative dealings with the nations of the world the United States has tended to overlook to some extent the needs and necessities and even the just claims upon us of the Philippines. The restitution of the damage inflicted by our forces which was, of course, necessitated by the exigencies of war, has not received adequate compensation, especially when compared with the lavish grants made to nations proclaiming neutrality and even to former enemy countries of Germany and Japan."

This newspaper understands perfectly well the compelling considerations underlying the foreign aids given neutrals and former enemies, and it has supported these aids in the main as essential to national security as well as to the welfare of society generally.

The United States tends to look ridiculous, however, when its legislators sit down solemnly to enact general foreign aid measures running into the billions—merely because such appropriations are very large—while neglecting strong moral commitments merely because their dollar count is relatively small.

This is neither the right way to legislate nor the right way to conduct foreign relations. Nor is it the right way—in a purely selfish sense—to promote the best interests of the United States itself.

After all—what nations, now neutral or semihostile—will be drawn any closer to the United States in times of stress by the all too obvious evidence of the difficulty Manila is having in collecting the war damage claims which Washington itself admits is owed to the Philippines?

Would they do better to remain neutral, or at least aloof from the United States when the chips are down, as they could be at almost any moment from now on? The Filipino people didn't think so. Are they now to be rewarded with conclusive evidence that they guessed wrong? And if so, can we expect that in a future emergency there will be many others who will guess what we would like to call "right"?

EMERGENCY FEED GRAIN PROGRAM

Mr. BAILEY. Mr. Speaker, I ask unanimous consent that the gentleman from North Carolina [Mr. FOUNTAIN] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from West Virginia.

There was no objection.

Mr. FOUNTAIN. Mr. Speaker, in March of this year, I voted for the proposed 1961 emergency feed grain program. This vote for the proposed program was made because I was firmly convinced that we had to take some action to stop the buildup of Government stocks of corn and grain sorghums. Also, I felt that the farmers producing corn and grain sorghums wanted a program to reduce the Government stockpile and which would eventually bring better prices and higher income for their efforts. I was convinced in my own mind that a continuation of the program developed by the previous administration for unlimited acreage and guaranteed support prices was a bad program and would result in more acreage, larger production, more Government stocks, more Government expenditures and less income to farmers.

The feed grain program provided for reduced acreages in order to qualify for price support and payments to compensate for the loss in income as a result of the reduced acreages. I felt that the payment feature was good; also since corn would be taken out of Government stocks and sold to reimburse CCC for the payments made.

All of us like to feel that decisions we have made were right. After reviewing the September crop report I am fully convinced that my vote for the feed grain program was in the best interest of the farmers and in the best interest of all our people. Many of the opponents of the feed grain program may ask, Why and how have you reached these conclusions? My reasons are:

First. It is true that the feed grain program has resulted in 13 million acres less corn for grain and 4.4 million acres less grain sorghum being planted this year.

Second. Corn and grain sorghum yields are the highest on record.

Third. These high yields are attributed to unusually favorable weather conditions and not to additional use of fertilizer or the planting of the best land. This can be proven by the increase in the soybean yield which increase is greater on a percentage basis than either corn or grain sorghums.

Fourth. With these favorable weather conditions resulting in abnormally high yields, the total production of corn and grain sorghums without a feed grain program probably would have been 700 million bushels more corn and 183 million bushels more grain sorghums.

Fifth. This potential excessive supply would have served as a burden holding down prices on farmers' production and Government stocks for years to come.

Sixth. If this much more had been produced, the majority of this additional production would have gone into Government stocks.

Seventh. The ultimate costs of each bushel of corn in Government stocks for

handling, storage, interest, and transportation is $1.10.

Eighth. Net farm income will be increased because of the program.

Ninth. Government costs will be less by an enormous amount from which they would have been without a program.

I am glad that I supported the feed grain program and also thankful to our Maker for the favorable weather conditions that will result in more income for our farm people.

THE EMERGENCY FEED GRAIN PROGRAM

The SPEAKER pro tempore. Under the previous order of the House the gentleman from Iowa [Mr. SMITH] is recognized for 15 minutes.

Mr. SMITH of Iowa. Mr. Speaker, I wonder how many realize that a five-vote margin in the House this year on the emergency feed grain bill saved the taxpayers from being obligated to support every bushel of a nearly 5-billion-bushel feed grain crop at about $1.06 per bushel. When the administration early this year proposed the 1961 emergency feed grain program, its objective was to first improve farm income and second, to reduce Government costs.

The September crop report clearly indicates that these two objectives have been fully achieved.

Farm income will be increased as a result of payments through the program and will be boosted additionally by the high yields achieved through favorable growing conditions.

At the same time, Government costs will be reduced tremendously—even more than originally estimated, as a result of the feed grain program.

Had there not been a feed grain program, the production of corn and grain sorghums would have been far in excess of the high production achieved in 1960. This enormous production would have added to the stocks of grain in the Commodity Credit Corporation. A poll of genuine farmers in Iowa indicated they would have increased acreage of both corn and soybeans by 10 percent had the emergency program not been passed. These increased Government stocks would have resulted in increased costs to the American taxpayer. Under the 1961 program, this has been greatly reduced.

Had it not been for the feed grain program, all corn and grain sorghums produced would have been eligible for price support. But under the feed grain program only the corn and grain sorghums produced on participating farms will be eligible for price support and the Government will not have any obligation to farms where acreage was not reduced.

And the price support will be limited on such farms to the average production in 1959 and 1960 on the acreage involved. This assures that the Government will not be financing any increased use of fertilizer on these individual farms where more fertilizer than needed for average production was used.

Near perfect growing weather is combining with the Nation's vaunted agricultural technology to set some of the highest production yields in the history of farming.

The September crop report of the U.S. Department of Agriculture indicates that major field crop production will show per acre yields beyond levels which 5 years ago could not have been imagined. Only in the high plains area where drought conditions still remain serious has farm productivity suffered.

In practically every other section of the country, weather conditions have been the major factor in pushing acreage yields to record levels in corn, grain sorghums and soybeans. Even poorer land is pushing out about as large a crop as rested land. This can happen only when just about the exact proportion of moisture is combined with minerals in the soil.

In Iowa, for example, corn produced for grain is estimated to average 73 bushels an acre, an average 9.5-bushel increase in per acre yield as compared to 1960 figures. The increase over the 10-year 1950–59 average annual yield figures is more than 17 bushels per acre.

Illinois shows an increase in per acre production of 8 bushels, raising the average yield per acre to 76 bushels as compared to 68 bushels in 1960. This represents a similar 17 bushel per acre increase over the 10-year average.

In the major corn-producing areas, the average increase in per acre yield varies from 3 in Ohio to 10 in Missouri. It is obvious that had we not changed the corn program, we would have been seeing predictions of a near 5 billion bushel feed grain crop with the Government obligated to support every bushel at about $1.06 per bushel. Huge storage costs would follow.

Grain sorghums show the same effect with the average increase in per acre yield estimated now to be 4.2 bushels per acre. It is a good thing for the taxpayers that the bill passed by a five-vote margin and thus the acreage is reduced. The big spenders of 1961 were those who opposed the 1961 emergency feed grain program.

In soybeans the same sharp rise in productivity has increased per acre yield estimates an average 3 bushels over 1960 figures.

The increase in productivity and the rise in farm income which will follow as a result can be credited principally to the helping hand of the weather. The shift from beans to corn under the 1959–60 corn program had caused the carryover of soybeans to become so low that a bad crop year would have endangered our ability to hold our markets. We need a good crop of soybeans.

The September estimates which saw corn production jump almost 3 bushels per acre over the August crop estimates can be credited only to weather as the use of fertilizer or any other piece of manmade technology could no longer be applied to improve production. Fertilizer is applied no later than June.

A further indication of this booming assist from nature is the fact that corn and soybeans, both of which are grown in the same major areas, have both shown impressive increases in per acre yields. Soybean acreage was increased while corn acreage was reduced. However, soybean yield shows a higher percentage increase over 1960 futures—13 percent as opposed to 11 percent—which would indicate that weather, rather than better land and increased fertilization, has played a major role.

In addition, the increase in per acre yield between July—when the use of fertilizer drops sharply—and September cannot be credited to the quality of land since it did not change.

There is little doubt, then, that had there been no new feed grain program passed which reduced acreage, for 1961, the cost to the Government for a record crop under the program that would have been in effect would have been higher than at any time in history. It bears out the statements that the estimate of savings which will result from the 1961 feed grain program are very conservative.

The program in effect in 1959 and 1960 would still be in effect had we not passed the 1961 Emergency Feed Grain Act.

With every rise in production the savings from the feed grain program will increase in comparison to the program in effect in 1959 and 1960 which supported all corn raised without limitation on acreages. Farmers could even break up new land or put the whole farm into corn production and secure Government price supports on the increased production.

It is estimated that farmer cooperation in the feed grain program this year alone will save the taxpayers at least $500 million. This is the difference between the estimated $500 million cost of the program, and the estimated $1 billion cost if the Government had continued to add to its stocks the grain that would have been produced on the diverted acres. I believe this estimate of savings for the taxpayers is low.

As for farm income, happily the U.S. Department of Agriculture has been given a tremendous boost by favorable weather conditions this year in its effort to increase the cash return to the farmer.

The crop report issued yesterday indicates good weather will play an important part in boosting the farm income to corn and other feed grain producers, as well as soybean producers.

This crop report indicates the average yield per acre for corn will be 60.4 bushels, which is 6 bushels per acre better than the 1960 yield, and approximately 16 bushels per acre above the 10-year average yield.

The yield for grain sorghums will be 44 bushels per acre—4.2 bushels better than last year and 20 bushels per acre higher than the 10-year average yield.

At the same time the yield of soybeans has been increased 3 bushels per acre over the 1961 production and 5 bushels per acre over the 10-year average. The soybean acreage also has been increased by 3½ million acres over 1960 and approximately 9 million acres over the 10-year average.

These increases in yield per acre are directly attributable to improved weather conditions this year.

The higher yield, the increased income, the lower Government costs under the feed grain program in a good weather year all add up to a happy picture in 1961—a picture of hard labor and wise planning smiled upon by a beneficent Providence.

MISS AMERICA OF 1962

The SPEAKER pro tempore. Under previous order of the House, the gentleman from North Carolina [Mr. TAYLOR] is recognized for 15 minutes.

Mr. TAYLOR. Mr. Speaker, this is indeed a pleasant occasion for me. I feel honored and proud that one of my constituents has been selected as Miss America of 1962. She is Miss Maria Beale Fletcher, a 19-year-old Asheville citizen who held us breathless during the final tense moments of the Miss America contest at Atlantic City. She is a beautiful, talented, and queenly American girl, and I wish that I could place her picture in the CONGRESSIONAL RECORD.

Maria Fletcher is the daughter of Mr. and Mrs. Beale Fletcher of Governor's View Road, Asheville, N.C., who are among our leading citizens and operate a dancing school. Maria learned to dance almost before she learned to walk. I first saw her sing and dance on top of a table at a State convention of a North Carolina business group when she was only 7 years of age. Her first award came that year, and she has won 14 talent awards in contests sponsored by various civic clubs in Asheville. She has been outstanding on the local level for her singing, dancing, personality, and charm, and for her courteous manner and fine influence on other young people.

Maria Fletcher was a fine student, having finished A. C. Reynolds High School in Buncombe County near Asheville, in 3 years with an average grade of 93. Her high school principal stated to me that she is humble, thoughtful, a wonderful young lady, outstanding in every way and that he expected her to win.

When asked by the contest master of ceremonies what was the greatest problem facing our Nation today, she replied sincerely and eloquently:

> I feel that the greatest problem facing our country today is making other foreign nations realize that we seriously mean what we say when we say that we are all for peace and that everyone here is hoping and praying for it all the time.

A former Radio City Rockette, she hopes to enter college later and to eventually make the entertainment world her career.

North Carolinians are celebrating and rejoicing. Maria Fletcher has brought great recognition to the Tar Heel State as she has to herself and I am confident that she will reign as Miss America with honor and dignity, and be a great inspiration to other young people throughout our Nation.

I congratulate Maria Fletcher and offer her my sincerest esteem and admiration. The hearts of North Carolinians everywhere will follow her throughout her eventful days as Miss America of 1962.

Mr. Speaker, I ask unanimous consent that all Members of the House who desire to do so be permitted to extend their remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. SCOTT. Mr. Speaker, as the Representative of only one congressional district out of many in the United States, I join my colleagues in proud and appropriate recognition of a representative of America, Miss Maria Beale Fletcher, the selected, titled, and crowned Miss America of 1962.

While watching the contestants in last Saturday night's pageant, as they demonstrated their fine talents in the several test categories, it occurred to me that beauty may often be more than skin deep. Physical beauty alone did not bring these young ladies to the pageant's finals. And it is upon her fine qualities of character, intelligence, talents, and achievements that I would congratulate our new Miss America. To have been singled out and chosen as No. 1 among many possessing these values is indeed an honor. Attendant upon the honor is the serious responsibility of representing the ideals and aspirations of American young womanhood, and this I am confident she will meet. I join in wishing her a successful and happy reign, and in gratefully acknowledging the distinction she has brought to our great State of North Carolina.

Mr. LENNON. Mr. Speaker, North Carolina is justifiably proud of the attainment of Miss Maria Beale Fletcher in her selection as Miss America of 1962. She typifies the Miss America pageant theme—"The All-American Girl"—with her beauty, charm, graciousness, intellect, and talent.

Miss Fletcher was coached for this pageant by a constituent of mine, Mrs. Hannah Block, a councilwoman of Wilmington, N.C. The city of Wilmington has, therefore, additional pride in the accomplishment of Miss America.

All of us who represent the Tar Heel State here in the Congress take pleasure in expressing the hope that Members of the Congress may have the opportunity to meet this attractive young lady as she travels throughout our Nation during her reign.

Mr. KORNEGAY. Mr. Speaker, I arise to take this opportunity to heartily commend my distinguished colleague, Congressman ROY A. TAYLOR, for calling this important matter to the attention of the House. It is a privilege to join with all of my fellow North Carolinians in expressing pleasure and pride over the fact that one of our fair fellow citizens has attained the great honor and distinction of being selected as Miss America for 1962.

I should also like to point out that Miss Maria Beale Fletcher was chosen as Miss North Carolina at the North Carolina Beauty Pageant held in my hometown of Greensboro. As a former member of the junior chamber of commerce for 11 years, I am proud to say that the pageant was sponsored by the Guilford College Junior Chamber of Commerce. The pageant took place in our beautiful and modern and spacious coliseum in Greensboro—one of the finest facilities of its kind in America.

It is a pleasure to commend the Guilford College Junior Chamber of Commerce for the splendid job they did in promoting the beauty pageant and for the selection of such a wonderful candidate for the Miss America crown as Miss Fletcher.

All Tar Heels are understandably jubilant over having this beautiful and talented young North Carolinian representing the United States of America as the epitome and pride of young womanhood, and we are confident that she will wear her crown with great dignity and distinction and will well deserve the plaudits and prestige which this position carries.

Mr. WHITENER. Mr. Speaker, I join with my distinguished colleague from North Carolina [Mr. TAYLOR] in paying tribute to a very lovely North Carolinian, Miss Maria Beale Fletcher, Miss America of 1962. While North Carolinians take particular pride in her accomplishments today, I am confident that all Americans will have the same pride in this young lady as they get to know her during her reign as Miss America.

Those of us who were privileged to witness by television the ceremonies in Atlantic City last Saturday night saw many young ladies of outstanding talent and beauty. Each of them represented their particular States with great dignity, character, and ability. Only one could be selected as Miss America. The fact that each of the contestants was outstanding in her own right makes the selection of our own "Miss North Carolina" even more impressive.

The answers given to the questions propounded to this young lady were thrilling to all of us. Particularly we were pleased with the very splendid statement which she made in response to the serious question presented to her. Congressman TAYLOR has already quoted her answer. I commend the young lady for her understanding of the real problem of today and the proper attitude which Americans should take in meeting that problem of preserving world peace.

Mr. Speaker, I also salute the parents of this young lady for the excellent training which they have given to her. The guidance which they have given during the 19 years of her life has paid big dividends to them, their daughter, and to our Nation.

Also I would like to commend the North Carolina Junior Chamber of Commerce for its sponsorship of the Miss North Carolina pageant, as well as many local pageants which led to the selection of Miss Fletcher as the representative of the Tar Heel State in the national competition. It was my privilege to serve as president of the North Carolina Junior Chamber of Commerce several years ago, and I have had an abiding and continuing interest in its program of service to our State. In paying tribute to Miss America of 1962 we also pay tribute to the Jaycees of North Carolina who gave many thousands of hours in the development and presenting of the local and

State beauty pageants which resulted in the selection of such a splendid representative of our State in the Miss America competition.

In the Washington Evening Star of September 11, 1961, the brief story by the Associated Press sets forth some of the facts with reference to this lovely young lady. I include it as a part of my remarks at this point in the RECORD.

MISS AMERICA HOPING FOR CAREER AS STAR

NEW YORK, September 11.—The Nation's newest dream girl started happily today along the year-long path she hopes may lead to a glowing career in the entertainment world.

It was in this show business center that Maria Beale Fletcher—the newly crowned Miss America—received her first glare of the bright lights.

The 19-year-old North Carolina beauty was a member of the Radio City Music Hall's famed Rockettes last year before she returned to her Asheville home to spruce up for the Miss North Carolina contest.

She was still sprucing today, but this time it was to prepare for her reign in the Miss America role that she won over 54 other beauties at Atlantic City, N.J., Saturday night.

The brown-haired, hazel-eyed Miss Fletcher will spend a month here, much of it in selection of a wardrobe suitable for her queenly proportions. She stands 5 feet 5½ inches tall, weighs 118 pounds and measures 35–24–35.

HONORED, THRILLED

Miss Fletcher said she was "very, very honored and very thrilled" at winning the Nation's oldest beauty title.

And the photographers didn't bother her a bit, she said.

"I think all of us are blessed with a little bit of ham. I have just a little bit more than most. I don't mind smiling at all."

Her parents, Mr. and Mrs. Charles Beale Fletcher, both dancing teachers and former professional dancers, were present for her triumph.

"That made it so much more real and wonderful," she said. "I've envied them so much."

Maria, an accomplished dancer, won her first talent prize at the age of 7. She said she would like to use the $10,000 scholarship she won in the Miss America pageant to study in some field of entertainment, possibly at the Pasadena Playhouse in California.

TO GET $75,000

Besides the scholarship, she will get about $75,000, plus expenses, for personal appearances during the year. Her first one will be at the Air Force Association Convention in Philadelphia September 22–23.

Miss America has two sisters, Margaret, 17, and Bonnie, 10, and a brother, Walter, 9, who watched the pageant on television at Asheville.

She has "romantic interests, but not in one specific place."

"I'll be interested in marriage when the right boy and I get together and decide we're ready for marriage," she said.

Mr. Speaker, North Carolina is proud of Miss America of 1962. I am sure that those whom I am privileged to represent in the Congress share my pride in the accomplishments of our lovely neighbor from the 12th Congressional District of North Carolina.

LEAVE OF ABSENCE

By unanimous consent leave of absence was granted to Mr. THOMPSON of New Jersey (at the request of Mr. DANIELS) for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. FEIGHAN, for 30 minutes, tomorrow, September 13, 1961.

Mr. SMITH of Iowa, for 15 minutes, today and to revise and extend his remarks and include extraneous matter.

Mr. TAYLOR (at the request of Mr. BAILEY), for 15 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. WALTER and to include extraneous matter.

Mr. ASPINALL the remarks he will make today during consideration of H.R. 9076 in the Committee of the Whole, and to include certain pertinent material.

Mr. POAGE in two instances.

Mr. ANDERSEN of Minnesota his remarks in the House today and to include extraneous matter.

Mr. CANNON to revise and extend the remarks he made in the Committee of the Whole today and include extraneous matter.

Mr. BOLAND to revise and extend the remarks he made in the Committee of the Whole today and include extraneous matter.

Mr. EDMONDSON.

Mr. BECKER to revise and extend his remarks on H.R. 9076 in the Committee of the Whole today and include letters.

Mr. EVINS (at the request of Mr. BAILEY) to revise and extend the remarks he made today on the bill H.R. 9076 and to include therein extraneous matter and tables.

(The following Members (at the request of Mr. SHORT) and to include extraneous matter:)

Mrs. MAY.

Mr. KEARNS.

(The following Members (at the request of Mr. BAILEY) and to include extraneous matter:)

Mr. COOLEY.

Mr. TOLL.

Mr. FASCELL.

Mr. GARMATZ.

Mr. CAREY.

Mr. MORGAN.

SENATE BILLS, JOINT RESOLUTION, AND CONCURRENT RESOLUTION REFERRED

Bills, a joint resolution, and a concurrent resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 1274. An act for the relief of the widow of Julian E. Gillespie; to the Committee on Foreign Affairs.

S. 1761. An act to amend the act of March 3, 1901, relating to divorce, legal separation, and annulment of marriage in the District of Columbia; to the Committee on the District of Columbia.

S. 2488. An act to increase the number of apprentices authorized to be employees of the Government Printing Office, and for other purposes; to the Committee on House Administration.

S.J. Res. 132. Joint resolution extending recognition to the International Exposition for Southern California in the year 1966 and authorizing the President to issue a proclamation calling upon the several States of the Union and foreign countries to take part in the exposition; to the Committee on Foreign Affairs.

S. Con. Res. 40. Concurrent resolution authorizing the printing as a Senate document of the 40th biennial meeting of the Convention of American Instructors of the Deaf, and providing for additional copies; to the Committee on House Administration.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and joint resolutions of the House of the following titles, which were thereupon signed by the Speaker pro tempore:

H.R. 176. An act to amend section 331 of title 28 of the United States Code so as to provide for representation on the Judicial Conference of the United States;

H.R. 2816. An act for the relief of Chief Warrant Officer James M. Cook;

H.R. 2883. An act to amend title 28, entitled "Judiciary and Judicial Procedure," of the United States Code to provide for the defense of suits against Federal employees arising out of their operation of motor vehicles in the scope of their employment, and for other purposes;

H.R. 3606. An act for the relief of William C. Winter, Jr., lieutenant colonel, U.S. Air Force (Medical Corps);

H.R. 3863. An act for the relief of Woody W. Hackney, of Fort Worth, Tex.;

H.R. 4369. An act for the relief of Henry James Taylor;

H.R. 4458. An act to authorize the Secretary of the Interior to replace lateral pipelines, line discharge pipelines, and to do other work he determines to be required for the Avondale, Dalton Gardens, and Hayden Lake Irrigation Districts in the State of Idaho;

H.R. 4669. An act to amend the law relating to gambling in the District of Columbia;

H.R. 5182. An act for the relief of Charles P. Redick;

H.R. 5559. An act for the relief of Ralph E. Swift and his wife, Sally Swift;

H.R. 6667. An act to amend the act of August 16, 1957, relating to microfilming of papers of Presidents of the United States, to remove certain liabilities of the United States with respect to such activities;

H.R. 6996. An act for the relief of Harry Weinstein;

H.R. 7264. An act for the relief of M. C. Pitts;

H.R. 7447. An act to amend the Strategic and Critical Materials Stock Piling Act to provide for the immediate disposition of certain waterfowl feathers and down;

H.J. Res. 109. Joint resolution designating the 17th day of December 1961 as "Wright Brothers Day"; and

H.J. Res. 499. Joint resolution authorizing a celebration of the American patent system.

SENATE ENROLLED BILLS SIGNED

The SPEAKER pro tempore announced his signature to enrolled bills of the Senate of the following titles:

S. 200. An act to amend the act entitled "An act relative to employment of certain adult Indians on or near Indian reservations," approved August 3, 1956;

S. 279. An act to provide Federal assistance for projects which will demonstrate or develop techniques and practices leading to a solution of the Nation's juvenile delinquency control problems;

S. 1528. An act to increase the relief or retirement compensation of certain former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force; and the U.S. Secret Service; and of widows and children of certain deceased former officers of such forces, department, or service;

S. 1529. An act to amend the act entitled "An act to regulate the height of buildings in the District of Columbia," approved June 1, 1910, as amended;

S. 1653. An act to amend title 18, United States Code, to prohibit travel or transportation in commerce in aid of racketeering enterprises;

S. 1719. An act to amend title 23 of the United States Code with respect to Indian reservation roads;

S. 1762. An act to regulate the practice of physical therapy in the District of Columbia;

S. 1768. An act to provide for the restoration to Indian tribes of unclaimed per capita and other individual payments of tribal trust funds;

S. 1807. An act to authorize the disposition of land no longer needed for the Chilocco Indian Industrial School at Chilocco, Okla.; and

S. 2241. An act to donate to the Jicarilla Apache Tribe of the Jicarilla Reservation, N. Mex., approximately 391.43 acres of federally owned land.

BILLS PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills of the House of the following titles:

H.R. 1021. An act to extend for 2 years the definition of "peanuts" which is now in effect under the Agricultural Adjustment Act of 1938;

H.R. 2877. An act to authorize the Director, Office of Civil and Defense Mobilization, to approve a financial contribution for civil defense purposes to the State of Oklahoma;

H.R. 6302. An act to establish a teaching hospital for Howard University, to transfer Freedmen's Hospital to the university, and for other purposes;

H.R. 6309. An act to amend title VI of the Merchant Marine Act, 1936, as amended, in order to increase certain limitations in payments on account of operating-differential subsidy under such title;

H.R. 6732. An act to amend the Merchant Marine Act, 1936, as amended, to encourage the construction and maintenance of American-flag vessels built in American shipyards;

H.R. 6969. An act to amend title 39, United States Code, to increase dependency and indemnity compensation in certain cases;

H.R. 6974. An act to amend section 607(b) of the Merchant Marine Act, 1936, as amended;

H.R. 7043. An act to extend to employees subject to the Classification Act of 1949 the benefits of salary increases in connection with the protection of basic compensation rates from the effects of downgrading actions, to provide salary protection for postal field service employees in certain cases of reduction in salary standing; and for other purposes;

H.R. 7622. An act to repeal sections 1176 and 1177 of the Revised Statutes of the United States relating to the District of Columbia;

H.R. 8406. An act to further amend Reorganization Plan No. 1 of 1958, as amended, in order to change the name of the office established under such plan, and for other purposes;

H.R. 8466. An act to authorize the construction of a railroad siding in the vicinity of Taylor Street NE., District of Columbia; and

H.R. 8719. An act to amend the act of July 28, 1947, chapter 301, as amended, to extend for 2 years the authority to make temporary appointments and promotions in the U.S. Coast Guard.

ADJOURNMENT

Mr. BAILEY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 29 minutes p.m.) under its previous order, the House adjourned until tomorrow, Wednesday, September 13, 1961, at 10 o'clock a.m.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MORGAN: Committee on Foreign Affairs. H.R. 9118. A bill to establish a U.S. Arms Control Agency, without amendment (Rept. No. 1165). Referred to the Committee of the Whole House on the State of the Union.

Mr. HARRIS: Committee of conference. H.R. 8102. A bill to amend the Federal Airport Act so as to extend the time for making grants under the provisions of such act, and for other purposes (Rept. No. 1166). Ordered to be printed.

Mrs. NORRELL: Committee on Post Office and Civil Service. H.R. 6695. A bill to amend title 39 of the United States Code with respect to the transportation of mail by highway post office service, and for other purposes; with amendment (Rept. No. 1167). Referred to the Committee of the Whole House on the State of the Union.

Mrs. NORRELL: Committee on Post Office and Civil Service. H.R. 8565. A bill to permit certain Government employees to elect to receive compensation in accordance with section 401 of the Federal Employees Pay Act of 1945 in lieu of certain compensation at a saved rate, and for other purposes; without amendment (Rept. No. 1168). Referred to the Committee of the Whole House on the State of the Union.

Mr. JAMES C. DAVIS: Committee on Post Office and Civil Service. H.R. 7377. A bill to increase the limitation on the number of positions which may be placed in the top grades of the Classification Act of 1949, as amended, and on the number of research and development positions of scientists and engineers for which special rates of pay are authorized; to fix the compensation of hearing examiners; and for other purposes; with amendment (Rept. No. 1170). Referred to the Committee of the Whole House on the State of the Union.

Mr. LANE: Committee on the Judiciary. H.R. 6759. A bill for the relief of the Prince Georges County School Board, Maryland; without amendment (Rept. No. 1171). Referred to the Committee of the Whole House on the State of the Union.

Mr. WALTER: Committee of conference. S. 2237. A bill to permit the entry of certain eligible alien orphans (Rept. No. 1172). Ordered to be printed.

Mr. LANE: Committee on the Judiciary. H.R. 8741. A bill to amend the act of April 29, 1941, as amended, to authorize any Federal agency to waive performance and payment bonds, and for other purposes; without amendment (Rept. No. 1173). Referred to the Committee of the Whole House on the State of the Union.

Mr. LANE: Committee on the Judiciary. H.R. 8958. A bill to remove the present $5,000 limitation which prevents the Secretary of the Air Force from settling certain claims arising out of the crash of a U.S. Air Force aircraft at Midwest City, Okla.; without amendment (Rept. 1174). Referred to the Committee of the Whole House on the State of the Union.

Mr. THOMAS: Committee on Appropriations. H.R. 9169. A bill making appropriations for the fiscal year ending June 30, 1962, and for other purposes; without amendment (Rept. No. 1175). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MOORE: Committee on the Judiciary. H.R. 1720. A bill for the relief of Paul Vassos (Pavlos Veizis); with amendment (Rept. No. 1164). Referred to the Committee of the Whole House.

Mr. WALTER: Committee on the Judiciary. H.R. 5324. A bill for the relief of Dr. Serafin T. Ortiz; with amendment (Rept. No. 1169). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BREEDING:

H.R. 9131. A bill to amend the Agricultural Adjustment Act of 1938, as amended, to establish a marketing program for wheat; to the Committee on Agriculture.

By Mrs. MAY:

H.R. 9132. A bill to amend the Agricultural Adjustment Act of 1938, as amended, to establish a marketing program for wheat; to the Committee on Agriculture.

By Mr. HORAN:

H.R. 9133. A bill to amend the Agricultural Adjustment Act of 1938, as amended, to establish a marketing program for wheat; to the Committee on Agriculture.

By Mr. ROGERS of Colorado:

H.R. 9134. A bill to amend the Agricultural Adjustment Act of 1938, as amended, to establish a marketing program for wheat; to the Committee on Agriculture.

By Mrs. PFOST:

H.R. 9135. A bill to amend the Agricultural Adjustment Act of 1938, as amended, to establish a marketing program for wheat; to the Committee on Agriculture.

By Mr. WICKERSHAM:

H.R. 9136. A bill to amend the Agricultural Adjustment Act of 1938, as amended, to establish a marketing program for wheat; to the Committee on Agriculture.

By Mr. ULLMAN:

H.R. 9137. A bill to amend the Agricultural Adjustment Act of 1938, as amended,

to establish a marketing program for wheat; to the Committee on Agriculture.

By Mr. REIFEL:

H.R. 9138. A bill to amend the Agricultural Adjustment Act of 1938, as amended, to establish a marketing program for wheat; to the Committee on Agriculture.

By Mr. AVERY:

H.R. 9139. A bill to amend the Agricultural Adjustment Act of 1938, as amended, to establish a marketing program for wheat; to the Committee on Agriculture.

By Mr. BATTIN:

H.R. 9140. A bill to amend the Internal Revenue Code of 1954 to mitigate the tax burdens which result from the irregularity of farm and farm-related income by permitting established farmers, ranchers, livestock growers, and livestock feeders to average their taxable income over a 5-year period; to the Committee on Ways and Means.

By Mr. CELLER:

H.R. 9141. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ADDONIZIO:

H.R. 9142. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ANFUSO:

H.R. 9143. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. CAREY:

H.R. 9144. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. DANIELS:

H.R. 9145. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. DULSKI:

H.R. 9146. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. FARBSTEIN:

H.R. 9147. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. GALLAGHER:

H.R. 9148. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. GILBERT:

H.R. 9149. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. HEALEY:

H.R. 9150. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. KEOGH:

H.R. 9151. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. MULTER:

H.R. 9152. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. POWELL:

H.R. 9153. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. RYAN:

H.R. 9154. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ZELENKO:

H.R. 9155. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. BUCKLEY:

H.R. 9156. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. HOLTZMAN:

H.R. 9157. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. GARMATZ:

H.R. 9158. A bill to amend title 14 of the United States Code to authorize the Secretary of the Department in which the Coast Guard is operating to establish and enforce structural safety standards for certain artificial islands or fixed structures which are in or over certain waters or lands over which the United States has jurisdiction; to the Committee on Merchant Marine and Fisheries.

By Mr. MORRIS:

H.R. 9159. A bill to amend Public Law 86–376; to the Committee on Ways and Means.

By Mr. RANDALL:

H.R. 9160. A bill to amend the Internal Revenue Code of 1954 to provide an additional income tax exemption for a taxpayer or spouse who is a victim of chronic respiratory polio; to the Committee on Ways and Means.

By Mr. SIBAL:

H.R. 9161. A bill to amend paragraph 1101(b) of the Tariff Act of 1930 to provide for the duty-free importation of certain wools for use in the manufacture of polishing felts; to the Committee on Ways and Means.

By Mr. WINSTEAD:

H.R. 9162. A bill to provide for the withholding and the forfeiture of the pay and allowances of certain members of the uniformed services who, while prisoners of war, aid the enemy or are guilty of other misconduct, and for other purposes; to the Committee on Armed Services.

By Mr. ABERNETHY:

H.R. 9163. A bill to provide for the withholding and the forfeiture of the pay and allowances of certain members of the uniformed services who, while prisoners of war, aid the enemy or are guilty of other misconduct, and for other purposes; to the Committee on Armed Services.

By Mr. BECKWORTH:

H.R. 9164. A bill to amend title II of the Social Security Act to provide that income derived by an individual from a trade or business carried on by a partnership shall not constitute "earnings" for purposes of deductions on account of work unless he renders personal services in such trade or business; to the Committee on Ways and Means.

By Mr. BENNETT of Florida:

H.R. 9165. A bill to amend chapter 61 of title 10, United States Code, to provide that where a member of an armed force in receipt of disability retired pay is separated from his wife or children, a portion of such disability retired pay may be apportioned and paid to his wife or children; to the Committee on Armed Services.

By Mr. ROGERS of Texas:

H.R 9166. A bill to amend the Agricultural Adjustment Act of 1938, as amended, to establish a marketing program for wheat; to the Committee on Agriculture.

By Mr. SCHWENGEL:

H.R. 9167. A bill to establish a U.S. Agency for World Peace With Justice and Security Through Disarmament; to the Committee on Foreign Affairs.

By Mr. ZABLOCKI:

H.R. 9168. A bill to amend title IV of the Social Security Act to provide that local agencies may distribute aid to dependent children in the form of commodities, and may demand an accounting of the way in which aid to dependent children in the form of money payments is used by the recipient, in appropriate cases; to the Committee on Ways and Means.

By Mr. THOMAS:

H.R. 9169. A bill making supplemental appropriations for the fiscal year ending June 30, 1962, and for other purposes.

By Mr. CHELF:

H.R. 9170. A bill to provide that the House of Representatives shall be composed of 453 Members, and for other purposes; to the Committee on the Judiciary.

By Mr. PETERSON:

H.R. 9171. A bill to amend the act of August 27, 1954 (68 Stat. 868), with respect to the Uintah and Ouray Reservation in Utah; to the Committee on Interior and Insular Affairs.

By Mr. RODINO:

H.R. 9172. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. HOLIFIELD:

H.J. Res. 569. Joint resolution to waive certain provisions of the Atomic Energy Act of 1954 so as to permit the agreement for cooperation between the United States and France to be made immediately effective; to the Joint Committee on Atomic Energy.

By Mrs. NORRELL:

H. Con. Res. 390. Concurrent resolution declaring the sense of the Congress that no further reductions in tariffs be made during the life of the present Reciprocal Trade Agreements Act; to the Committee on Ways and Means.

By Mr. RYAN:

H. Con. Res. 391. Concurrent resolution, to establish a joint congressional committee to

conduct a full and complete investigation and study of the civil defense program of the United States; to the Committee on Rules.

By Mr. HARVEY of Indiana:

H. Con. Res. 392. Concurrent resolution proposing establishment of a State safety council and local safety councils within each State; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BATTIN:

H.R. 9173. A bill for the relief of Miles City Saleyards Co. of Miles City, Mont.; to the Committee on the Judiciary.

By Mr. BREWSTER:

H.R. 9174. A bill for the relief of Ana Nogiyte de Bujevicius; to the Committee on the Judiciary.

By Mr. DINGELL:

H.R. 9175. A bill for the relief of Helena Zelazny; to the Committee on the Judiciary.

By Mr. EVERETT:

H.R. 9176. A bill for the relief of Edwin Chi-Chang Cheng; to the Committee on the Judiciary.

By Mr. FINO:

H.R. 9177. A bill for the relief of Despina Doxis and Vassilire Doxis; to the Committee on the Judiciary.

H.R. 9178. A bill for the relief of Francesco Lupo; to the Committee on the Judiciary.

By Mr. GUBSER:

H.R. 9179. A bill for the relief of Hamilton Kwai-Wah Ho; to the Committee on the Judiciary.

By Mr. HARDING:

H.R. 9180. A bill for the relief of Noreen Joyce Baden; to the Committee on the Judiciary.

By Mr. HORAN:

H.R. 9181. A bill for the relief of Hong-Kyw Cho; to the Committee on the Judiciary.

By Mr. KARTH:

H.R. 9182. A bill for the relief of Mohine W. Bakhos; to the Committee on the Judiciary.

By Mr. MACDONALD:

H.R. 9183. A bill for the relief of Commander Gardiner Luce; to the Committee on the Judiciary.

By Mr. MAGNUSON:

H.R. 9184. A bill for the relief of the estates of Ida Ella Floe, Stephen Floe, and Claudette N. Bline, and for the relief of Kerri Marie Bline; to the Committee on the Judiciary.

By Mr. QUIE:

H.R. 9185. A bill for the relief of Owen L. Green; to the Committee on the Judiciary.

By Mr. RODINO:

H.R. 9186. A bill for the relief of Eladio Aris (also known as Eladio Aris Carvallo); to the Committee on the Judiciary.

By Mr. SANTANGELO:

H.R. 9187. A bill for the relief of Biagio Zago; to the Committee on the Judiciary.

By Mr. SISK:

H.R. 9188. A bill to relieve Theodore A. Anderson from loss of agricultural conservation program benefits; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

209. The SPEAKER presented a petition of Mr. Arthur E. Smith, Americanism chairman, Fourth District, the American Legion Department of Ohio, Cincinnati, Ohio, stating that "under no circumstances should the Government or people of the United States of America extend diplomatic recognition or aid to the pretended government of the Communist conspiracy in China or any such part thereof as Outer Mongolia," which was referred to the Committee on Foreign Affairs.

EXTENSIONS OF REMARKS

The Cattle Brand—Identification—Inspection Program in Texas

EXTENSION OF REMARKS

OF

HON. W. R. POAGE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 12, 1961

Mr. POAGE. Mr. Speaker, the cattle industry has historically been by far the largest agricultural activity in the State of Texas. Cattle stealing, or rustling, has always been one of the greatest problems. The Texas and Southwestern Cattle Raisers' Association was organized at Graham, Tex., almost 90 years ago for the primary purpose of eliminating cattle stealing. It is today the largest livestock association in the United States and its primary activity remains the abolishing of cattle rustling.

Actually, there is more cattle stealing today than at any time in history. It is probably due in large part to the development of modern transportation which enables a cow thief to load stolen animals into a truck at night and sell them in any one of a hundred different markets tomorrow. The need for a coordinated system of cattle identification was never as great as it is today.

Historically, branding has provided the best and most practical means of identification, but branding is not now and never has been a universal practice, nor is it the exclusive method of identification. Obviously, natural breed, size, age, coloring, and so forth, provides effective identification, but it is not as readily described as brand identification.

About 1942 Congress passed legislation which empowered the Department of Agriculture to authorize local agencies to conduct brand inspection within their areas. In many States there is an official or State program of brand inspection. In Texas this program is conducted by the Texas and Southwestern Cattle Raisers' Association, and it involves the identification of cattle by all practical means, not simply by a record of brands alone. For a number of years this inspection was confined very largely to the larger terminal markets. With the extension of Federal control to all auction rings, this service was extended to possibly 200 markets in Texas and some in more distant points. The association provides inspectors, pays their salaries, and maintains a general clearinghouse at Fort Worth, where records of all animals brought on to a posted market are kept, as well as reports of all stolen cattle. The reports of sale go into the Fort Worth market every night. Of course, reports of theft are made as rapidly as they are discovered. Here, within the limits of information available, the association conducts a kind of fingerprint identification. Such identification cannot be conducted by any other existing agency because there is no such agency presently in existence which has the organization or facilities for this activity. This checking of sales has resulted in the apprehension of hundreds of cases of cattle stealing.

Apparently, there was no objection to the work of the association until the large number of auction rings were brought under its jurisdiction in 1957. At that time 13 rings joined in protest. Two of the operators have formally withdrawn their protest in the meantime and no one knows if many of the remaining 11 are actually interested in conducting this protest. It is, however, clear that the protest and the only protest to the activities of the Association was filed by the operators of auction rings, not by livestock producers.

If the legislation was passed for the benefit of livestock producers, as the Congress apparently assumed it was, it seems that the Department would want to determine the degree of producer acceptance of the present practice. On the other hand, if the legislation is to be interpreted as having been passed for the benefit of auction rings, then it would seem that the number of auction rings favoring the program is many times greater than those opposing it. In the above-mentioned protest those auction rings opposing the program indicated that their opposition was based on, first, the fact that the association makes a charge of 8 cents per head for each animal on which they file a report. This is indeed a fact, but apparently no one contends that the 8 cents is excessive. On the contrary, it is apparently the smallest charge made in any State for this purpose. It is also contended that in some cases the inspector did not actually inspect the animals for which the charge was made. The association has agreed that this situation should be corrected and that in the future no charges will be made for animals not physically inspected.

The protesting auction rings in their complaint also argued that in many parts of Texas branding was not common practice. Admittedly, it is not a universal practice in any part of Texas. Admittedly, it may not be conducted by a majority of producers in certain parts of Texas, but certainly branding is used by a representative number of cattlemen in every part of Texas. In discussing the prevalence of branding, however, the auction operators ignore the fact that this inspection program is indeed an in-

spection of all identifying marks, not simply a brand inspection program. Much of the confusion in regard to this program seems to stem from a misunderstanding of this point.

Marketing Program for Wheat

EXTENSION OF REMARKS
OF
HON. CATHERINE MAY
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Tuesday, September 12, 1961

Mrs. MAY. Mr. Speaker, as a member of the Committee on Agriculture, I am glad to join with a number of my colleagues from wheat-producing areas of the United States in today introducing legislation to establish a marketing program for wheat. At the same time, we are urging the Secretary of Agriculture to develop, under the procedures provided by the Agricultural Act of 1961, recommendations for a comprehensive, long-range wheat program, embodying the principles of this legislation, in sufficient time so that the Secretary's recommendations can be submitted to the Congress by January 1962.

Basically, this is a simple program. Instead of wheat acreage allotments as we know them, each producer would be assigned a quota in bushels which he can sell into the market for food and export. The total quota for all producers would be established somewhat less than the total wheat requirements, with the balance needed to come out of Commodity Credit Corporation stocks.

In order for a producer to receive a marketing quota, he would retire at least 10 percent of his historical wheat acres. This will prevent the shifting of the burden of overproduction to other commodities.

This program has many advantages over the present allotment program. Most important, I believe, will be the effect on quality of wheat produced. Under the present program a farmer can dispose of all the bushels he can raise on his allotted acres. Thus, his incentive is to grow the most bushels possible, regardless of the quality of wheat. Under the legislation I have introduced today, since the farmer can sell only a limited number of bushels for food and export, he will want to produce the highest quality possible in order to receive a premium for this limited quantity. As a result we will have a higher quality of wheat for domestic consumption as well as an improved quality in our wheat exports.

Another important feature of this program will be an orderly reduction of Government stocks to a desirable level. By this approach the Government will be able to reduce its stocks each year without disrupting the market. This will result in a tremendous saving to the taxpayer.

As compared with the wheat program in effect in 1961, this new approach could save the Government at least $200 million the first year and up to $500 million by the end of the third year. This saving would be due to the disposition of Government stocks plus the savings in storage charges as a result of the reduction in inventory.

I am hopeful, Mr. Speaker, that the Department of Agriculture will support this meaningful and workable program, which also deserves the support of the Congress.

A Bill To Deal With Problems Arising by Reason of Communist Propaganda Originating Abroad and Distributed in the United States by First-Class Mail

EXTENSION OF REMARKS
OF
HON. FRANCIS E. WALTER
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, September 12, 1961

Mr. WALTER. Mr. Speaker, on yesterday I introduced a bill which is designed to deal with certain aspects of the rather complex problems arising by reason of the influx of millions of pieces of Communist propaganda which have their origin abroad and are now disseminated in great part by first-class mail within the United States. This bill is proposed to amend the Subversive Activities Control Act of 1950 so as to require the Postmaster General in certain cases to give notice to the addressee of the use of the mail for the dissemination of Communist propaganda.

Within recent months we have observed an acceleration of the Communist brainwashing effort directed at the free world and particularly to residents of the United States. This increased tempo of Communist propaganda activity, I believe, bears a close relation to the rising temperature of the international situation, which in turn is a consequence of the growing power and arrogance of the Communist bloc. Communist propaganda items from abroad transmitted through the U.S. postal service have increased in the year 1960 to an astounding 137 percent over the year 1959, whereas the increase in the year 1959 over the year 1958 was only 18 percent. During the year 1959, the U.S. Customs Service processed over 6 million packages of Communist propaganda, containing over 10 million items of printed matter. In 1960, over 14 million packages were processed, containing in excess of 21 million items, such as newspapers, magazines, books, pictures, and posters. During the 2 months of February and March 1961, over 162,000 packages of magazines and 11,000 packages of newspapers were addressed to the United States from Communist Cuba, which is now the base of Communist operations in this hemisphere. The extraordinary Communist effort in the field of propaganda is further attested by a report of the U.S. Office of Education indicating that in 1959 the Soviet Union published over 30 million books, containing 830 titles, in 26 foreign languages, for dissemination to non-Communist countries and which were either distributed free or sold far below cost mainly to Asia, Africa, and Latin America.

In the above figures of packages of Communist propaganda entering the United States, I did not include in that number the millions of pieces of first-class mail, containing Communist propaganda, also received from abroad. Such mail is not opened for inspection, and presents certain obvious problems. It is significant that the Communist conspiracy is now extensively utilizing first-class mailing privileges as a means for disseminating their poison and fiction. I have received reports and complaints from all areas of the United States. Many people have become annoyed, and some confused, and others alarmed. A good bit of this mail is addressed to foreign language groups, who sense the possibility of blackmail or harm. The extent of the effort clearly attests the importance with which the Communists regard this propaganda campaign. George V. Allen, formerly Director of the U.S. Information Agency, previously estimated that the amount expended by the Communists in the year 1957 for propaganda in the non-Communist world was between $500 to $750 million. Present estimates of the amount being expended in this field indicates that the amount may well exceed $2 billion.

How does one cope with this propaganda? Does one collect and destroy such items of propaganda piece by piece? Is this presently practicable, or even desirable? Curiously, Lenin long ago pointed up the absurdity of such an effort. In his notorious theoretical document, "What's To Be Done," Lenin laid down the basic doctrine for the conduct of Communist propaganda, and agitational activities. While stressing the importance of the distribution of "illegal literature" by his band of secret Communist revolutionaries, he amused himself by pointing out the difficulties which the opponents of communism would find in coping with it. He said, "the police will soon come to realize the folly and futility of setting the whole judicial and administrative machine into motion to intercept every copy of a publication that is being broadcast in thousands."

Now I would point out that the success of such "illegal literature" depends upon the people to whom it is addressed. Lenin must have assumed the existence of an unsophisticated audience. That will not be the case in the United States. The antidote for the poison of Communist propaganda is knowledge and truth. I have no real fear that this absurd Communist propaganda will seduce any appreciable segment of our people, or lead them from the path of reason and loyalty—if our people are adequately informed as to its nature, origin, and character.

In the Internal Security Act of 1950 (title I, cited as the Subversive Activities Control Act) we there had to deal with

the problems involved in the dissemination of Communist propaganda within the United States by Communist-action and front groups. Under section 10, these problems were met in part simply by requiring Communist organizations, against whom a final order to register is in effect, to label all publications transmitted in the mail as being disseminated by a Communist organization, and to announce that sponsorship of any radio or television broadcast conducted by them. We there felt that if our people were informed of the nature, origin, and contents of such propaganda activity, they would be able to judge and deal with it. The bill which I have introduced yesterday, in fact and in effect, supplements section 10 of the Internal Security Act. While section 10 requires the labeling of Communist propaganda disseminated by internal Communist organizations, the bill I introduced extends the disclosure process to publications transmitted by mail from without the United States to persons resident here.

Moreover, I believe that it is important to strengthen the democratic process, which I believe is the natural effect and result of this type of disclosure and information statute. If our people are informed of the nature and techniques of Communist propaganda—and this is a responsibility of the educational process and the free press—we shall not need fear that our people will become infected. Knowledge is the most effective immunization against the propaganda virus. I believe that when all our people understand the degraded and corrupt tactics of Marxism-Leninism, the Communists will find their propaganda effort to be waste of money and paper. They will not undermine our society. They shall only destroy themselves.

Propane Gas Import Restrictions Should Be Lifted

EXTENSION OF REMARKS
OF
HON. DANTE B. FASCELL
OF FLORIDA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, September 12, 1961

Mr. FASCELL. Mr. Speaker, the Office of Civil and Defense Mobilization has presently under consideration the question of the need of lifting of the restrictions on the importation of residual oil. I wish to point out that during the consideration of this question, we must not overlook an additional product which is now restricted and on which such restrictions should have been lifted.

Mr. Speaker, I am talking about the importation of propane gas.

An objective study of the background leading to the issuance of the President's proclamation on import restrictions indicates that mandatory import controls were not intended to apply to propane and could not reasonably have been an influencing factor in the issuance of the proclamation. The proclamation was based upon a report of the Director of the Office of Civil and Defense Mobilization. The Director's analysis in no instance makes any reference to propane gas or to "unfinished products." It is also important to note that propane was not included under the voluntary control program. It is apparent from this cursory examination that propane was not an influencing factor in the promulgation of the President's proclamation, as can be amply demonstrated from that fact that no propane was imported into district 1 through 4 during the period covered by the Director's report. Furthermore, there has been and is no allocation for the importation of propane.

Therefore, it is obvious that an order to prevent importation could not and should not apply to a product that was not at the time even being imported.

It is also clear that the importation of propane had absolutely no effect upon the growth and development of the domestic propane business or on the production of crude oil or unfinished products. It is obvious that propane was not intended for mandatory control and the Director should decontrol propane.

The unique position of Florida, Mr. Speaker, makes it desirable and necessary to decontrol the importation of propane into Florida. This would be true, even if it were found reasonable and justifiable to impose controls upon the importation of propane. In my view, there is no such justification.

Notwithstanding that, however, Florida does have a special case. Florida is the 10th leading State in the consumption of propane, with an expected phenomenal increase in population, and a corresponding increase in propane consumption. It has no underground storage facilities and the geophysical structure of the soil does not make such facilities feasible. It has no production of propane and has a wide seasonal fluctuation in demand and consumption.

In addition, Florida is far removed from the sources of domestic propane and, therefore, has an unusually long supply line which makes the cost of transportation of domestic propane extremely high. The facts show that historically, over an average period, transportation amounts to over 50 percent of the cost of the product delivered in Florida by tank cars.

In the Miami area alone, there are over 15,000 household consumers who are entirely dependent on propane for home-heating purposes. Florida produces no coal, natural gas, or oil products, and must rely upon products from outside, distant sources for such heating fuels. Electric power is not available for mass space-heating needs. One only needs to briefly examine the newspapers of my district during any winter season to see the urgings of the power company that residents do not make unnecessary demand upon electric consumption for heating purposes and, strange as it may seem, the power company urges people to convert to other sources such as oil or propane for space-heating purposes.

Notwithstanding this unique demand and the unusual position of Florida, the importation needs are comparatively quite small and could not in any sense, adversely affect competition with fuel oil, coal, or other domestically produced fuels. It has been estimated that the needs in my area are 1 percent of the total propane produced or consumed in the United States. It is, therefore, Mr. Speaker, extremely difficult to perceive how an importation of this amount could in anywise adversely affect competition with other heating fuels.

Fundamentally though, Mr. Speaker, it is impossible to understand how the importation of propane gas could in anywise impair national security or result in damage to the oil import program.

Therefore, the refusal to decontrol the importation of propane into Florida is completely unjustified on the basis of the national security or unjust competition and only results in severe hardship and higher costs to the users of this product in my district.

Civil Defense Experiment in Baltimore Highly Effective

EXTENSION OF REMARKS
OF
HON. EDWARD A. GARMATZ
OF MARYLAND
IN THE HOUSE OF REPRESENTATIVES
Tuesday, September 12, 1961

Mr. GARMATZ. Mr. Speaker, there has been much criticism of our civil defense program, many persons feeling that it would be absolutely useless in case of attack; others believing that it should be left entirely in the hands of the military; others equally strong in the belief that it should be left to the civilian authorities. In the spring of this year, an experiment was conducted in Baltimore which I believe proves that the military and civilian groups can work together effectively and provide the protection necessary.

The entire program was coordinated by a public relations man, William J. Muth, and provided an all-out informational and instructional project based on the necessity of a greatly accentuated fallout shelter program. It included protection against chemical, biological, and radiological contaminants.

It proved that the military, civilian, and industrial segments of the population can combine efforts to accomplish such a mission. It also established concretely that all media of press, radio, and television are more than willing to cooperate. Many continuing stories on this shelter project appeared in 113 newspapers from Texas to Maine and as far west as Ohio. Complete coverage was provided by UP, AP, and INS.

This experiment included the sealing of a young nurse from the University Hospital, Miss Sara Rafter, in a fallout shelter for 7 complete days. Prior to this, Maj. William Kiser, U.S. Air Force Reserve, spent 24 hours sealed in the shelter to test the operation for safety.

The following organizations cooperated in this subject:

The 628th U.S. Air Force Hospital Reserve Unit, Baltimore, Maj. William S. Kiser, commanding.

State of Maryland Civil Defense Agency, Sherley Ewing, director.

Baltimore City Civil Defense Organization, Col. Arthur H. Shreve, U.S. Army, retired, director.

Dr. Arthur A. Woodward, Aberdeen Proving Ground.

Chemical Corps, U.S. Army.

Miss Sara Rafter, R.N., University Hospital, Baltimore.

Lasting Distributors, Inc., Baltimore, Martin Rankin, president.

Allied Public Relations, Baltimore, William J. Muth, president.

Members of the press, radio, and television.

In addition to providing important data, it is especially interesting to note that the program coincides with the directives on civil defense issued by President Kennedy more than a month after this experiment was conducted.

The following newspaper article gives further information on this project:

Finally a realistic, positive approach is being taken to the necessity of our Government to make the American people aware of shelter protection against CBR attack.

In a coordinated program originated by Martin Rankin of Baltimore, the Air Force, the Office of Civil Defense and Mobilization, Army Ordnance and Chemical Corps demonstrated that military and civilian components of defense can coordinate their efforts in a joint project designed to make scientific and informational facts available to the American public.

Miss Sara C. Rafter, R.N., University Hospital, shown above [illustration not printed in RECORD] emerging from a Lasting Blast and Fallout Shelter, is being greeted, left to right, by Maj. William S. Kiser, 628th U.S. Air Force Hospital Reserve Unit, Baltimore, Col. Arthur H. Shreve, director, civil defense, Baltimore, Capt. Jean F. Davis, and Sherley Ewing, director of civil defense, State of Maryland.

When asked what she thought had been accomplished by her 7-day stay in the shelter at the Baltimore Home Show, Miss Rafter answered that these things will have to be evaluated and reduced in form by Dr. Arthur A. Woodward and the medical staff of the 628th along with the civil defense officials, but "in my opinion Mr. Rankin and Mr. Knight, executives of the Lasting Distributors, have made a definite contribution to the shelter and civil defense program for which our people should be everlastingly thankful."

In Secretary Ribicoff's Great Speech Before the American Educational Theater Association He Called for a Federal Arts Council

EXTENSION OF REMARKS
OF
HON. CARROLL D. KEARNS
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, September 12, 1961

Mr. KEARNS. Mr. Speaker, in a great speech before the American Educational Theater Association, meeting in the Waldorf Astoria hotel in New York City on August 29, 1961, Secretary Abraham Ribicoff, of the Department of Health, Education, and Welfare declared:

There has never been a time when interest in the arts at the seat of government has been so high. The Kennedy administration would like to see the establishment of a National Advisory Council on the Arts—a group of eminent citizens from the arts whose duty it would be to cultivate and encourage our artistic resources and heritage.

The bill setting up the Council has been favorably acted upon by the House Committee on Education and Labor and is now awaiting House action. I have urged the Congress to enact this bill. Under it, the Council would recommend ways to maintain and increase the cultural resources of the United States; propose methods to encourage private initiative in the arts; cooperate with local, State, and Federal departments and agencies to foster artistic and cultural endeavors and the use of the arts in the best interests of the Nation; and strive to stimulate greater appreciation of the arts by our citizens.

I include Secretary Ribicoff's significant statement on the arts as part of my remarks for the information of my colleagues:

THE THEATER AS TEACHER

(Address by Abraham Ribicoff, Secretary of Health, Education, and Welfare)

It is legend at the Players Club that the god of all the arts once whispered into the ear of young Edwin Booth, and this is what he said:

"I shall give you hunger, and pain, and sleepless nights. Also beauty and satisfactions known to few and glimpses of the heavenly life. None of these you shall have continually and of their coming and going you shall not be foretold."

You whose lifework is the theater—and the introduction of young people to the theater—you have known the sleepless nights, as well as the satisfactions and "glimpses of the heavenly life" your art offers.

You will appreciate the answer one of my favorite critics gave me the other day when I asked him why he prefers the theater to the rest of his amusement-page beat.

"That's simple," he said. "In television, the people are diminished. They are thumb-sized. In the movies, the people are enlarged. They're bigger than I am. But in the theater, the people are just my size. When I watch them, I can even forget where I am."

How right he is. Other art forms can be wonderful indeed. But the theater mirrors life in scale. In the theater, you lean forward for fear you will miss something—you are drawn ahead—you are carried out of your seat by the live people on the stage.

There is an immediacy about a good play that is irresistible. It is an extension, an illumination of our experience. It satisfies our appetites for further experience, for fascinating language, for the chance of meeting interesting people. This is true of plays that truly entertain and truly enlighten.

The best plays are more than diversions. They are great teachers. They convince us that what is happening on the stage—however far removed in time or in geography—is not very different from what is happening in our hearts and in our everyday lives. And so we learn from them.

You members of the American Educational Theater Association know the effect such plays have on an audience. You know too the hunger that audiences have for the theater—the theater that delights the eye and ear and enriches the mind and heart.

If anyone doubted this hunger for a minute—and we in public life frequently hear the excuse that the public isn't ready for or doesn't appreciate this or that fine art—such doubts should have been erased by the long queues that formed this summer to see "Much Ado About Nothing" in Central Park.

You know these things. For a quarter of a century, they have been your concern and your vocation.

On this, your silver jubilee celebration, you have chosen as your theme "The Theater and the Human Bond." "A group of strangers," you say, "becomes one living unit in the darkened house when the curtain opens—all over the world, at all times, and at all ages."

On this, your silver jubilee, then, I think it is appropriate to ask how you teachers of the theater can help strengthen this human bond.

Yours is a tremendous opportunity. More of our youngsters are enjoying college and university education than ever before. In the next years their numbers will, we all hope, increase even further. Community theater and children's theater groups mushroom across the land. This means that out of all the people in the theater, you members of the American Educational Theater Association are the ones who have the chance to touch young—and not so young—minds.

Your first challenge is to teach so creatively, so imaginatively, that you will convey the best of our dramatic heritage, experience, and taste to a new generation, and to adults as well—that you will strengthen the ties that bind our civilization to the great civilizations of the past.

There is no greater opportunity than the teacher's, and our national tragedy is that we have not made full use of it.

Asked what the theater had given him, the actor, Howard Lindsay, answered:

"It has been my education. Where else could I have traveled so far? I have been in the streets of Corinth when Jason and Medea were throwing harsh words at each other. I was at Aulis when the Greek fleet sailed to Troy. I was in Mycenae when Orestes came back to kill his mother Clytemnestra. I have been in the drawing rooms of Lady and Lord Windermere of London. And I shouldn't forget to say, I have ridden into western towns with the James brothers. Where else could I have done things like that?"

Where else indeed?

Can you teachers of the theater take your students to these—and further places? Can you give them the sense of continuity, the depth and breadth of vision that a deep knowledge of your art conveys?

Can you give them something more? Many of our young people have lost the satisfaction of the craftsmen of old—the satisfaction of doing a job carefully and lovingly—the fulfillment of work well done. They go to school—they graduate—they get jobs to support themselves and their families.

You can help them find this satisfaction. For the theater is a place where people share responsibility—where they labor hard together—where they have such fun that they even forget they are learning and working. If you give this experience to youngsters and to amateur community players, you will truly have taught well, you will have strengthened the ties that bind human beings, one with another.

You have a further responsibility—a further challenge. It lies waiting to be seized.

There are only, I am told, about 70,000 commercial theater seats available to the public in the United States. Some 30,000 of these are in New York City, and their number is diminishing. There are many reasons

for this—you are all aware of the problem; I will not go into it today.

But Americans want to go to the theater. They flock to see great plays. When stripped of its social pretensions—what Prof. Eric Bentley calls its "amazingly upper class mores and extraordinarily inconvenient prices and schedules"—the theater is a tremendously popular attraction.

Bentley speaks of the "social apparatus" that used to stand between the public and the enjoyment of good music. "Opera and symphony," he says, "were addressed to dowagers. The workingman didn't have the right clothes for the occasion, or the right accent, or the right kind of chitchat. Invited to a concert he could hardly be expected not to feel a pariah. Much the same is true of theater."

He goes on to point out that in the cultural revolution that is underway all over the world, the theater could play a leading part because it is "more accessible to the new untrained audiences than perhaps any other high art whatsoever." * * * And this fact "gives it a certain responsibility."

This is the responsibility you theater educators shoulder today. This is your challenge: to strengthen the bond between the theater and diverse communities throughout the land.

The word "educate" comes from the Latin verb "lead out." This is what you can do—lead people out of themselves and into the common meeting place—where they can share their art with others. Your theater groups do not fulfill their purpose if they confine themselves to a series of exercises—if they do not reach all the audiences that are anxious to be reached.

Some of your members have of course served their communities with notable success. They have done so in their own cities, and they have traveled abroad in many lands, delighting their audiences and creating great good will and friendship for our country.

They have truly given of themselves to strengthen the bond between human beings throughout the world. They have set a standard for us all.

Will you join them?

I think—I know—you will.

Just as it plays a role in bridging the gap between different segments and groups and countries in our society, the theater can play an important role in bridging the gap between what C. P. Snow has called "the two cultures." We are all concerned about the wall that divides the humanities from the ever-expanding physical sciences. We are all anxious to do what we can to further our scientific achievements. We are not "antiscientists," who deplore the discoveries of science in favor of the beauties of art. Far from it. We know there is great beauty as well as hope in the giant revolution which has taken place in man's knowledge of himself and of the world.

But we know that if we are to act constructively, we must tap our magnificent artistic resources imaginatively and diligently. A broad and deep awareness of the arts enriches the scientist as well as the nonscientist and is indispensable to the full life of all mankind.

We live today in one of the crucial eras of world history. The impact of man's new power upon man himself is the stuff of real drama—and through drama as well as other arts could man better understand his place in the new world that he is creating.

There has never been a time when interest in the arts at the seat of government has been so high. The Kennedy administration would like to see the establishment of a National Advisory Council on the Arts—a group of eminent citizens from the arts whose duty it would be to cultivate and encourage our artistic resources and heritage.

The bill setting up the Council has been favorably acted upon by the House Committee on Education and Labor and is now awaiting House action. I have urged the Congress to enact this bill. Under it, the Council would recommend ways to maintain and increase the cultural resources of the United States; propose methods to encourage private initiative in the arts; cooperate with local, State, and Federal departments and agencies to foster artistic and cultural endeavors and the use of the arts in the best interests of the Nation; and strive to stimulate greater appreciation of the arts by our citizens.

Further, it could act as a coordinating group between private and governmental activities in the arts, pointing out where it believes official encouragement might be helpful, yet always sensitive to the need for the fullest possible freedom of creativity.

For in fostering and encouraging the arts, we must have it strictly understood that the Government cannot and does not wish to speak through the arts. The arts must be free and not an official mouthpiece. A play is not a state paper. The only test for an actor or a director or a painter or a musician should be the excellence of his endeavor before the judgment of his peers.

In this crucial moment when the currents of history are swift and changing, we who bear the responsibility of Government seek to build. We know that the old ways alone will not do—that we must seek new ways and find new means.

And all segments of American society are responding. Each is examining its role and its potential. Each is dedicating itself to constructive action for the common good.

You whose lifework is the arts—you whose lifework is education—you too are examining your role and your potential.

I ask you only to do your best, to achieve the high levels that you yourselves value, and to inspire in your students an appreciation of the enduring and the beautiful.

I ask you to strive to reflect the times in which we live—to understand them—to teach from them—to improve upon them. We must work to make our arts so rich—so exciting—so inventive—that they mirror our life together as did the arts of the Greeks and of the Elizabethan Age.

Then we will have met our challenge. Then we will have done our part to strengthen the human bond.

Address of Congressman Fernand J. St. Germain, of Rhode Island, at the Centennial of the Death of Taras Shevchenko, Soyuzivka, N.Y., Sunday, August 27, 1961

EXTENSION OF REMARKS

OF

HON. HUGH L. CAREY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 12, 1961

Mr. CAREY. Mr. Speaker, on Sunday, August 27, our distinguished colleague, the gentleman from Rhode Island, Mr. ST. GERMAIN, visited the Catskill area of New York to deliver an address to an assembly of people of Ukrainian origin. The address is notable not only for its subject matter and context but also because it was delivered by Mr. ST. GERMAIN in Ukrainian dialect. Our most versatile Member is fluent in French, most eloquent in English, and now demonstrates his command of this most difficult language. We are truly fortunate to have him among us.

The text of the speech follows:

ADDRESS OF CONGRESSMAN FERNAND J. ST. GERMAIN, OF RHODE ISLAND, AT THE CENTENNIAL OF THE DEATH OF TARAS SHEVCHENKO, SOYUZIVKA, N.Y., SUNDAY, AUGUST 27, 1961

"Bury me, be done with me,
Rise and break your chain,
Water your new liberty
With blood for rain.

Then, in the mighty family
Of all men that are free,
May be sometimes, very softly
You will speak of me?"

My friends, wherever the people of the Ukraine can gather in freedom, even if it be the freedom of their own minds, they remember Taras Shevchenko. The poetic words of Shevchenko echo now, as they did a hundred years ago, the past, the present, and the future of the Ukranian peoples. His sentiments, his hopes, his fears are present today as they were in his day and age. The same fears that gripped the hearts of the Ukraines of the 19th century grip the hearts of the Ukraines of the 20th century. The love of freedom which found its expression in the lines of Shevchenko is echoed by those same lines today. The flame which began to burn in the 19th century is still burning and is growing ever hotter while those who would suppress that love of freedom try to stamp it out.

A part of my heritage brings me to your lovely estate, here in the Catskills. My maternal grandmother left the Ukraine in 1907 to find freedom in this country. She brought with her the love of God, the customs, traditions, heritage and language of the Ukrainian people. She has been, to me, a reflection of Shevchenko's words: "* * * in your own house lies your righteousness, your strength, and your liberty."

My mother carried on the customs of her native land. We celebrated the Ukrainian Christmas and had the traditional caroling and the foods which are so much a part of that season in the Ukraine.

In my childhood, no one could deny the existence of a Ukrainian language. I learned of my heritage in the tongue of that heritage. I learned the folklore, customs, and hopes of the Ukraines in a tongue which was more than simply a peasant idiom, as the language of the Ukraines was once called. The Ukraines have a proud history and can stand shoulder to shoulder with the other great peoples of our globe.

The survival of Ukrainian lore and language is a testament to the will and strength of the people of the Ukraines. The story of your homeland, and it is partly mine, is a tragedy which reflects the sufferings of all areas which have been strapped by oppression. In "The Dream" Shevchenko vividly described a people under the thumb of the oppressor. The clothing is stripped from beggars and the poor must provide shoes for the feet of princes, widows are pummeled for their taxes and the sons are taken off to the army only to die in the mud and filth which dictators and oppressors provide for their belabored armies who fight because of force rather than because of ideals. He points to the forced labor for which the people receive no compensation except the scorn of the masters for whom they dig the gold which is poured down the throats of the greedy.

Does this sound familiar? It is the Ukraine dominated by the Russian czar, it is Germany under Hitler, it is the Jews under Egypt, it is the Russians under com-

munism, it is Europe under the barbarians, it is the Ukraine under Stalin and now under Khrushchev. Oppression has not changed whether it be in the times before Christ or 1,961 years after Christ. I doubt it will ever change just as man's desire for freedom has never, and will never, change.

In a blazing indictment of oppressors of the Ukrainian people Shevchenko wrote:

"Our souls yield not to grievous ills,
To freedom march our stubborn wills
Through waves of trouble o'er us roll
The waves move not the steadfast soul
Our living spirit is not in chains
The word of God in glory reigns."

The Ukraines began to find their modern identity in the 19th century. The publication of Kotlyarevsky's "Eneida" in 1798 is the beginning of modern Ukrainia. This poem revived the patriotism and pride of heritage that had been sleeping in the breasts of the people for almost a century. It came after various attempts, attempts that were almost successful to end the Ukrainian identification. By the mid-18th century the czars of Russia had destroyed all Ukrainian political forms and began to Russianize the culture of the people. The name Ukraine was abolished, the area was called Little Russia, the language was abrogated and the customs strangled. As America emerged a free and independent entity, the Ukraine began to sink beneath the swell of oppression and lose her identity.

The Ukraine needed an impetus for it to emerge as an identifiable and dynamic nation. It needed a genius who could transform the smoldering emotions of the people to words which could be written, spread, heralded throughout the world. It was Shevchenko who emerged as that genius. Through the medium of the Ukrainian written word he brought to the fore the yearnings for liberty, the sufferings under oppression, the hopes for a brighter future, of a great people. In the passage I quoted a few moments ago, he told the world that even under the hand of a tyrant the spirit of the people was unbroken and the people have kept their faith in themselves and in their God. It is to God that they look for hope and salvation.

Shevchenko did not delve into political prophecy. He did not try to predict the future course of Ukrainian events nor did he think the old system would return to his people. His loyalty was to the mother country; he wanted her free, independent, and under a just system of government.

Shevchenko used the vernacular Ukraine language, for it was by way of this vehicle that the hopes and wishes of the people could best be expressed. Because of political circumstances he could not come forth directly with his sentiments but had to use allusions and vagueness. His poems are rich with the folklore and history of the Ukraine. It is the use of the tongue and heritage of the people that has endeared him to the Ukrainians for a century.

Shevchenko was a reflection of the tragedy of the Ukrainians in his personal life as well as in his poetry. He typified the sufferings of his native land and the hardship which all the sons of the Ukraine had to undergo. In him we can see embodied the past of the Ukraine but in him we can also see the fires of the future. He spoke for the future as well as the past, a future of liberty and freedom.

Of his 47 years, only 9 were spent as a freeman. He was born a slave and remained so for 24 years; for 10 he was a prisoner in Siberia and for 3½ he was under police supervision. He lived as his country lived, under oppression, tyranny, and enforced guidance. Clarence Manning, a great scholar of Shevchenko's work, poignantly described his work as the "poetical synthesis of national aspirations."

"Our cause shall rise
Our freedom rise
Though tyrants rage."

And, rage the tyrants did. His early works tell of the people under serfdom and the precarious life of the peasants. He tells of social injustice and the debauchery of the masters in a land ruled by the lords and their henchmen. Although his words are of despair and sadness during the exile in Siberia, he has a message of hope as in the lines just quoted. Oppression may slow and restrain the cause of freedom but it cannot stop the will of people to be free. This was as true in the 19th century as it is today in the mid-20th century

Great poetry is timeless. It is composed of lines wherein people may find themselves whether it be at the time the poem is written or a century later. Shevchenko's poetry is in such a category. It has as much meaning today as it did when it was written. His words are as vivid in 1961 as they were in 1861 because the Ukraines, and millions of other freedom-loving peoples, are under the yoke of a new tyranny. It is a new tyranny in name only, for communism is as old as tyranny itself. It is not new for the mind to be blocked from the knowledge of truth, for the will to be dominated, for the present to be controlled and the future planned without the free reasoning of the people involved. The only thing new is the name "communism."

"Arouse ye, be men.
For evil days come.
Quickly a people enchained
Shall tear off their fetters;
Judgment will come.
Dnieper and the hills will speak."

Shevchenko foretold the rising of his people. He knew then, as we know now, that a free people will bear the chains only so long and then they shall tear off their fetters. The tsar and those who aided his tyranny would be overthrown for

"They harness the people
With heavy yokes.
Evil they plough
With evil they sow.
What crops will spring?
What harvest will you see?"

The Communists, in this centennial year of the bard of the Ukraine, are using Shevchenko's poetry in an attempt to convince the people of the Ukraine that their beloved bard was predicting the Communist social revolution. In order to reap this message from the lines of Shevchenko, the Communists have "adjusted" his poetry to eliminate any counterrevolutionary doctrines which he might have expressed. Parts of his poems have been eliminated, new words and ideas have been substituted for the original lines, meanings have been slurred and references to God and religion have been left out. It is this new Shevchenko which is fed to the people of the Ukraine this centennial year.

Why have the Communists been compelled to give recognition to Shevchenko? They have been compelled to do so for the same reason that their new Shevchenko has failed. The people of the Ukraine, remember Shevchenko whether they be free, as those here today, or enslaved as they are in the homeland. They remember his glorification of their past, his presentation of the tragedies of his day and his hopes for the future. Those ideas were not passed from generation to generation by books and magazines. The words of Shevchenko, his hopes and ideals, were and are still being, spread by the people to their sons and grandsons. Pravda may broadcast the new Shevchenko but the people know the real Shevchenko, the true reflection of their sentiments and ideals.

Because he is so loved and revered by his people, the Communists must honor him, and because his ideals are known to the people they heed not the new Shevchenko.

Shevchenko wanted freedom, justice, and dignity for his people and his words utter the same cry today for the people of Russia, of China, of Eastern Europe and of Cuba. The bard did not want his people to go from the tyranny of the czars to the oppression of the commissars. Shevchenko foresaw a long, hard struggle to gain the ideals he held so dearly but the final victory would come; a cold war, a hot war, a lukewarm war—freedom will out. He saw freedom as the victor for:

"Fear not to fight, you'll win at length
For you, God's ruth,
For you is freedom, for you is strength,
And Holy Truth."

The truth and freedom are partners and those who would deny them to their people are doomed to failure, are doomed to lose the loyalty of their people, are bound to be caught beneath the waves of justice and dignity to which all people aspire.

The people of the Ukraine, because their heritage and their knowledge of Shevchenko is handed down from generation to generation, are not fooled by the Communist line. God is a part of Ukrainian life, as it was for Shevchenko. Religion has played a great role in the lives of the people. Freedom was the cry not slavery, be it of the serf or Communist variety.

The people of East Berlin, until barbed wire and Russian troops made it impossible, echoed the thoughts of Shevchenko when they chose freedom over tyranny, liberty over oppression, democracy over communism. Throughout the world people watch Russian moves with care and concern; they remember Budapest and the savagery with which the freedom fighters were crushed. I hope we do not again see such brutality but as long as people desire peace and are kept from it such scenes will occur. The fetters will be broken unless those who rule with the iron thumb relax the grip and let the people determine their own destinies.

"Why freedom grew up with us
Bathed in the Dneiper
Rested her head on our hills
The far-flung Steppes are her garments."

Has anyone said better than Shevchenko that the Ukrainian people have been free, want to be free and will be free? The Ukraines have a history that is one of an oppressed people reaching for freedom and their history has done much to keep their faith in God that freedom, liberty, and justice might come to their people.

Development Research

EXTENSION OF REMARKS
OF
HON. THOMAS E. MORGAN
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 12, 1961

Mr. MORGAN. Mr. Speaker, during the debate on the foreign-aid bill, my distinguished colleague from Iowa, the Honorable FRED SCHWENGEL, called my attention to an interesting and informative letter he had received from Dr. James A. Robinson, assistant professor in the Department of Political Science at

Northwestern University. At the request of my colleague, under unanimous consent, I am inserting Dr. Robinson's letter in the CONGRESSIONAL RECORD, together with my comments on the important points he raises in his letter on the subject of the development research program authorized in the foreign-aid legislation.

Dr. Robinson's letter follows:

NORTHWESTERN UNIVERSITY,
Evanston, Ill., August 14, 1961.

Hon. FRED SCHWENGEL,
House of Representatives,
Washington, D.C.

DEAR MR. SCHWENGEL: I am writing you about a provision in the Act for International Development. Title V would authorize $20 million for "development research." This is an encouraging move by the administration toward using and promoting research in economics and the other social sciences in the hope of making foreign economic assistance a more successful instrument of U.S. foreign policy. Although the amount is small compared to the total foreign-aid request, and although this provision has not received much attention compared to the more controversial features of the bill, a modest amount for research might do more to help improve the effectiveness of foreign aid than many other more expensive provisions.

My interpretation of the presentation materials by the Department of State and the ICA is that this money would be used for "contract research" with universities and private study groups. There is, of course, ample precedent for contract research as a means of gaining new knowledge and applying it to practical governmental problems. The various branches of the armed services have long had offices of research which subsidize private groups and universities by contracting for special studies. Compared to the amount of money and effort which have previously been devoted to the evaluation of our mutual security programs and for research to improve them, $20 million is a significant sum.

I hope that discussion on the House floor will elicit from the committee and other Representatives that it is the intent of Congress that this provision be interpreted broadly enough that it will allow for research in addition to what is sometimes narrowly conceived as "developmental economics." That is a very vital subject in understanding and helping with the modernization of new nations. Other disciplines also have significant knowledge to contribute to policymaking and execution. For example, cultural anthropology is relevant to determining what kinds of projects will be best received among different kinds of people. Research in public administration might reveal why our aid programs sometimes do not reach the people for whom they are intended but instead support unpopular, corrupt, and decadent regimes. There are many examples of how scholarly research by several academic fields could help AID better achieve its ends. I hope that Congress will intend that AID adopt a broad interpretation of development research.

The State Department presentation indicated that these sums could go toward contracting with existing research institutions or establishing new research programs. A broad interpretation, which would result in contracting with a wide range of research centers, seems to me necessary for two further reasons. First, the Government should not inadvertently discriminate against research in some fields of social inquiry relevant to this problem at the expense of other fields. Many people have lamented that the NDEA favors science and language while neglecting the humanities. Similarly, I think it would be unfortunate to exclude social studies other than economics, especially a particular branch of economics, from this provision. Second, a broad conception of development research will tap a wide range of different persons and institutions and assure Congress that the Government will not be limited to a small number of sources for research and ideas.

The language of the bill is quite adequate, so far as my nonlegal reading indicates. What counts is its interpretation. An amendment is not necessary, and at this date would be impracticable. However, I hope that the House debate will establish a legislative record to guide the administration in the interpretation and implementation of the act.

This is a significant step forward, and whatever the outcome of the more controversial features of the act, this provision already makes it a better bill than those of previous years. A broad interpretation of title V will further strengthen the values which new research can give to foreign aid.

Cordially,

JAMES A. ROBINSON,
Assistant Professor.

Mr. Speaker, I believe that it is always helpful for us Members of Congress to receive such pertinent and well thought out recommendations on pending legislation. I am particularly pleased to comply with the request of Congressman SCHWENGEL to comment on Dr. Robinson's letter and I wish to state that the Committee on Foreign Affairs has devoted much time and study to the executive branch presentation of data in support of the Development Research Program. I believe the following comments will help to assure Dr. Robinson that the program will be based on soundly conceived lines; and that many of his suggestions will be followed in its implementation.

The role of the proposed development research program can be described in terms of the nature of the research to be encouraged and the primary functions to be performed:

(a) Nature of research to be supported: The Development Research Program will focus on scientific investigations of benefit to the U.S. program of development assistance. The test of relevance to be applied will be the degree to which a given research effort gives promise of providing results which can be usefully applied in the assistance program itself. The research program will, therefore, emphasize applied research. However, desirable basic research on many issues or subjects may be, the program will not be prepared to sponsor such activity unless this test of usefulness is met. However, either basic or applied research may in some instances require a long period to produce fully mature results. Where the probable usefulness to development assistance is established, we must be prepared to support sustained research efforts.

The research to be undertaken must often cut across traditional classifications of scientific knowledge. This is one of the characteristic features of the development process and of the research that is needed to support it. It is more useful for this reason to categorize the research to be done in terms of the developmental problems and opportunities it is addressed to than by the areas of knowledge involved. Many different kinds of knowledge will need to be enlisted, and communication between the different areas will be highly important. Generally, the research will be in four broad categories:

1. The identification and modification of the factors in a society that determine the success or failure of economic, social, or technological innovation;

2. The collection or development of scientific information that has been bypassed or fallen into disuse in our own society, but is needed to advance modernization elsewhere;

3. The simplification and adaptation of technologies to fit conditions in the less developed countries; and

4. The selective support of basic research.

(b) Functions to be performed: The development research program will perform three main functions:

1. A liaison function, by which research being carried out through other governmental programs or under private auspices is reviewed and examined so that results useful for the aid program are uncovered and used to the maximum extent. This implies a clearinghouse activity which can be of help in guiding the growth of the community of research facilities as well as of benefit to the assistance program itself.

2. A support function, by which problems or requirements encountered in development assistance programs that can be usefully made the subject of research are identified and research on them is encouraged and supported. This implies a readiness to strengthen existing facilities where they are weak, and to establish new ones as needed.

3. An execution function, by which the results of relevant research application are made available to operating staffs and personnel in usable form and are placed in operation where feasible. This will involve serious attention to the large issue of training future generations of personnel qualified to work in development assistance. It will also mean a feedback of actual field experience to the people engaged in continuing research projects.

Foreign Language Program

EXTENSION OF REMARKS
OF
HON. HERMAN TOLL
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, September 12, 1961

Mr. TOLL. Mr. Speaker, had the parliamentary conditions permitted, I would have offered an amendment for the deletion of the word "modern" from "modern foreign languages" in H.R. 9000, the National Defense Education Act, when it was extended last week, so that all languages which are widely studied in the United States would receive the support of the act.

The purpose of my proposed amendment was to have the classical languages—Latin and Greek—included in the act's provisions.

It is not a very great change—it will not visibly alter the course of world or national events; but I ask you, my colleagues, to look around you:

As you look around the top of this Chamber at the 23 relief portraits in marble of men noted in history for the part they have played in the evolution of what has become American law, you will note that six of these great lawgivers are from the classical world:

First, Lycurgus, author of the laws of Sparta; second, Solon, the great Athenian lawgiver; third, Gaius, the celebrated Roman jurist; fourth, Papinian, a juridical genius; fifth, Justinian, the emperor who published the Corpus Juris Civilis; and sixth, Tribonian, the able lawyer who codified Justinian's laws.

In addition, although not really part of the classical world, many medieval and Renaissance lawgivers wrote in the Latin language; among these:

First, Gregory IX, who maintained the remnants of Roman law; second, Innocent III, who also preserved the remnants of Roman law; and third, Hugo Grotius, author of the first treatise on international law, De Jure Belli Et Pacis.

The mace at the front of this Chamber is a true and exact replica of the Roman symbol of authority which graced the presence of their magistrates.

The Speaker's words which we hope to hear soon, "sine die," are Latin, as well as many others with which you are all acquainted.

On a larger scale, the entire city of Washington is a great collection of classic-style Roman and Greek monuments and buildings, such as the National Archives Building, where the treasures of this Nation's freedom are stored.

It is clear that we owe an incalculable debt to the classical civilizations. The Graeco-Roman languages and civilizations lie at the heart of the American way of life.

But, there are also some very down-to-earth considerations for this amendment. Language professors—members of the American Philological Association—point out that:

> By omitting the classical languages from provisions of H.R. 9000 * * * the Federal Government would be using its influence and public moneys to support a program of language study which is badly balanced, and would result in a lopsided language curriculum throughout the Nation * * *.

This is what the professors themselves say, and they are the ones who should know. One professor, in a letter to me, said:

> What concerns me is that by giving generous fellowships to all other languages the ancient languages * * * are left at a decided disadvantage in attracting graduate students. Throughout the country there is a rising demand for teachers of classical literature and history.

But this is not all.

The language professors claim that "the classical languages provide a valuable introduction to general language study. Latin in particular is a sound basis for a full and sensitive understanding of various modern foreign languages, especially the Romance tongues which are Latin's direct descendants."

In addition, a furthering of classical studies in this country can have tremendous impact and prestige-value abroad. Dr. Michael H. Jameson, a Greek professor at the University of Pennsylvania, made front-page headlines in the New York Times in June 1960 with the report of his discovery of a decree of Themistocles at Troezen, in Greece. This past spring, Dr. Jameson's work received national publicity in the magazine, the Scientific American. In a letter to me, Dr. Jameson says:

> "Our fostering of classical studies has considerable effect on our status abroad, on both sides of the Iron Curtain. At the risk of immodesty, I have mentioned that the American discovery of the decree of Themistocles, and its quick and thorough publication, has raised our cultural prestige a great deal. I have had requests for a semi-popular article for an East German magazine and a Czechoslovakian extravaganza called 'Laterna Magica,' combining movies and live actors, asked at once for material to use for one of their productions on the Persian Wars."

Finally, the most important reason for the adoption of this amendment is, perhaps the easiest overlooked. Latin and Greek are the prime instruments for attaining a firsthand knowledge of some of the most important documents in our humanistic tradition.

Nevertheless, there still may be some doubt as to why we should chose to preserve the languages of civilizations written off as dead letters over 18 centuries ago. However, the purpose is not to emulate the past, but to achieve an awareness of the past. For if we should lose our past, we shall have lost the future. If we are to build a sound future, the past must be continually re-evaluated. And what better way is there to do this than with the original materials—a firsthand investigation.

Totalitarian societies burn books and distort history. But there are acts of omission as well as commission. We can let this heritage be swallowed up and we, too, shall have been guilty of killing it.

Makers of the laws should be especially interested in the classics. Our laws owe a debt to the classical world, as the medallions above testify. Out of the classical world came this great heritage of democracy and the tradition of the freedom of man. If the tree of democracy is worth preserving, so are its roots.

STATEMENT IN SUPPORT OF PROPOSED AMENDMENTS TO S. 1726 AND H.R. 6774

AMERICAN PHILOLOGICAL ASSOCIATION,
HUNTER COLLEGE IN THE BRONX,
New York, N.Y.

The American Philological Association, a nationwide organization of scholars and teachers in the field of classical studies, recommends that S. 1726 and H.R. 6774 be amended so as to provide that, wherever the words "modern foreign languages" occur in the National Defense Education Act of 1958, title III, and title VI (sec. 611), the word "modern" be deleted, so that all languages which are widely studied in the United States may receive the impartial support of the act. The purpose of this amendment is to have the classical languages included in the act's provisions on a par with modern foreign languages and English.

Fact: The most recent census of foreign language teaching in the public schools of the United States discloses that Latin accounts for nearly one-third (32.2 percent) of all foreign language enrollments. (Source: Wesley Childers, "Foreign Language Offerings and Enrollments in Public Secondary Schools," fall 1958; research conducted by the Modern Language Association of America for the U.S. Office of Education). The proportion is even higher in private schools.

We submit that: (1) since one-third of our children receive a substantial part of their language learning in Latin classrooms, it is vital to the success of our entire national language teaching program that this instruction be of the highest possible calibre, and that the teachers of Latin be encouraged to improve their materials and their methods to take advantage of recent developments in the area of classical language teaching; (2) by omitting the classical languages from provisions of S. 1726 and H.R. 6774 which now cover all modern foreign languages and English, the Federal Government would be using its influence and public moneys to support a program of language study which would be badly balanced, and would result in a lopsided language curriculum throughout the Nation; (3) Latin and Greek are the prime instruments for attaining a firsthand knowledge of some of the most important documents in our humanistic tradition; (4) the classical languages provide a valuable introduction to general language study. Latin in particular is a sound basis for a full and sensitive understanding of various modern foreign languages, especially the Romance tongues which are Latin's direct descendants.

Supporting statement: We present herewith, as an unbiased evaluation made by experts in a kindred field, the official statement of policy on the teaching of the classical languages declared by the Modern Language Association of America, as set forth in section II of the report of Mr. Donald D. Walsh to the Northeast Conference on the Teaching of Foreign Languages at its 1960 meetings, appearing on pages 23 and 24 of the conference's 1960 supplementary reports.

HARRY L. LEVY,
Secretary-Treasurer.

MAY 1961.

P.S.—We have just been informed that the American Council of Learned Societies fully endorses our recommendation as set forth in the first paragraph above.

THE MODERN LANGUAGE ASSOCIATION FOREIGN LANGUAGE PROGRAM—EXCERPTS FROM THE REPORT OF DONALD D. WALSH

I. FOREIGN LANGUAGE ENROLLMENT

The only questionnaire that has produced any reportable results so far is that on foreign language enrollments in the high schools. Returns from 33 out of 50 States show encouraging overall gains between 1954 and 1958. In 11 of these 33 States there is an increase of 50 percent or more in total foreign-language enrollment: Alabama, Colorado, Idaho, Kansas, Montana, Nebraska, North Dakota, Oklahoma, Oregon, South Dakota, and Tennessee. I hasten to point out, before some of my listeners do, that several of these States could make a 50-percent gain because they started with a very low percent of foreign-language enrollment. But I am none-the-less impressed by the improvement. In the Northeastern States, where there has always been a much higher percentage of foreign-language study, startling gains are harder to make, but seven States in this region for which we have comparative statistics show solid improvement: Connecticut, up from 40 to 43 percent; Delaware, up from 29 to 37 percent; Maine, up from 26 to 34; New Hampshire, up from 31 to 39; Pennsylvania, up from 27 to 32; Vermont, up from 28 to 37; the District of Columbia, up from 29 to 34; and, most pleasantly, our host State, New Jersey, with the highest percentages, from 39.4 to 43.7 percent.

II. THE CLASSICAL LANGUAGES

Note that the above percentages are for all foreign languages, not just modern foreign languages. The Modern Language Association, though constitutionally limited to a concern with English and other modern languages, believes firmly in the importance of Latin, Greek, and other ancient tongues and cultures. One of the official statements

of policy of the association states this concern unequivocally: "The steering committee for the foreign language program of the Modern Language Association of America believes that the obvious relevance of modern language study to modern life should not blind educators of the American public to the importance of our having more citizens who know ancient languages. It is not only that our Western civilization is more intelligible to those who can directly read its origins and development in our heritage from Greece and Rome; there is also the urgently modern fact that our children and grandchildren are going to have to understand this Western heritage in relation to the cultural traditions of the East.

"Accumulating evidence shows that a first foreign language can most readily be learned in childhood and learned primarily as spoken language. Unless Latin is taught in this way, we believe that study of an ancient language can be learned most efficiently if a modern foreign language has first been approached as speech. Hence we recommend that the study of Latin as a second foreign language be vigorously promoted in our secondary schools, and we further recommend that administrators, counselors, and teachers of modern languages in our colleges and universities take practical steps to encourage more students to learn ancient Greek, Hebrew, classical Arabic, Chinese, and Sanskrit.

"Latin is the parent language of French, Italian, Spanish, and Portuguese. It has also, with Greek, furnished nearly the whole of our English intellectual vocabulary. Its literature is the key to many basic concepts that we have modified to create what we tend to think of as our uniquely modern political, esthetic, and intellectual life. Ignorance of this cultural heritage is a dubious preparation for cultural advance. Ignorance of one's linguistic heritage is, moreover, a dubious basis for informed and effective use of either English or a modern Romance language. We view the decline of Latin in American education as an unfortunate result of radical and shortsighted efforts to 'modernize' the curriculum and make education 'practical.'

"The curriculum of the future, if it is designed to meet problems of the future, will recognize that the classical languages—Eastern as well as Western—have a claim to the attention of educated men and women who would, through language study, know the significant past at firsthand. This is an essential contribution of the humanities, which the modern languages—whose own past is steadily lengthening—share in, but cannot monopolize."

In Defense of Project Hope

EXTENSION OF REMARKS
OF
HON. ED EDMONDSON
OF OKLAHOMA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, September 12, 1961

Mr. EDMONDSON. Mr. Speaker, I was astounded to read in the Washington Post of September 8, 1961, that an unnamed "high ranking International Cooperation Administration official" is apparently raising objections to any further Government support of the American mercy ship *Hope* and has been quoted as regarding the vessel as "showcase democracy."

It is particularly difficult to square this published point of view with the formally signed statement of Assistant Secretary of State Brooks Hays, dated March 8, 1961, in which Mr. Hays informed the chairman of the Senate Committee on Foreign Relations that "the Department welcomes and supports this proposed congressional commendation of this project"—referring to Senate Concurrent Resolution 8, commending Project Hope.

The Department of State's official report to the Senate Committee continued to point out that the U.S. Government has provided substantial assistance to Project Hope, including $2.7 million of mutual security program funds to place the surplus Navy hospital ship in operating condition, and an additional $500,000 of mutual security program funds as an interest-free loan—supplementing hundreds of thousands of dollars in private American contributions for the project, collected all over the country.

In the words of Assistant Secretary Hays:

> The Department has been impressed by the cordial reception accorded in Indonesia to *Hope I* and its fine medical and dental staff. We fully expect that the response in future ports of call will be equally favorable.

There can be little doubt, Mr. Speaker, of the enthusiasm of Assistant Secretary Hays of the Department of State for the accomplishments of the hospital ship *Hope* thus far. Since his report specifically refers to Bureau of the Budget clearance, it should certainly be clear that Mr. Hays was speaking for the administration when he addressed the Senate Committee in March.

Shortly after receipt of this report, the Senate formally passed Senate Concurrent Resolution 8, and I have been informed by Chairman Morgan that the House Committee on Foreign Affairs expects to consider it soon.

In view of the assurance given on the floor of the House during debate of the foreign assistance bill, only a few weeks ago, it seems clear that the House Committee on Foreign Affairs regards Project Hope in a highly favorable light and fully expected that funds authorized in title II of that measure would be available for support when needed. Specific reference was made during that debate to the availability of section 211 funds for *Hope*, and this was assuredly a factor of some importance in the support of the measure in the House.

Now we read, in a Washington newspaper, that some anonymous ICA official has doubts about the project's value, questioning such policies as flying the American flag and paying U.S. maritime wages to its crew. Furthermore, a special assistant to the President is quoted as saying that "The President has reached no decision in the matter."

Mr. Speaker, I have no personal doubt that the President, on review of the facts, will conclude that the job being done by Project Hope is an outstanding example of American achievement in the continuing effort to build good will throughout the world, and to bring the people of the world closer together in a bond of mutual trust and friendship.

When the unknown critic of Project Hope told the Washington reporter that "working together is better than showcase democracy," he gave convincing evidence of his ignorance of procedures aboard the hospital ship in foreign ports.

One of the most important features of the *Hope's* mission has been the cooperation of its staff with local professional people in every port visited.

In Indonesia, for example, *Hope* records show that more than 200 Indonesian doctors and 300 Indonesian nurses participated in the joint medical program of training and treatment.

In Vietnam, more than 200 Vietnamese nurses took part in shipboard training and treatment programs, and teams from the *Hope's* staff worked ashore in clinics, in 6 civilian hospitals and in Saigon's military hospital.

Dr. William B. Walsh, president of Project Hope, has consistently emphasized the importance of partnership with local doctors and nurses in the foreign countries visited by the ship, and has stressed working together with local people in both the training and treatment programs.

In Indonesia, Project Hope reports that more than 18,000 patients were treated by the joint Indonesian-American committees, and 700 major operations were performed. In Vietnam, there were more than 10,000 patients, and more than 500 major operations.

Mass inoculations of children with training of local vaccination teams in Vietnam; more than 800 lectures and seminars in Indonesia; the introduction of oral surgery for the first time in Vietnam; the provision of more than 8,000 books and medical journals for hospitals, clinics, and libraries in the two countries; substantial medical supplies in both—these are some of the substantial achievements of the effort so lightly described as "showcase democracy."

Mr. Speaker, it is not hard to understad why the "high-ranking official" quoted in the Washington Post elected to remain unnamed.

If mail from home is any indication of public sentiment, the people are overwhelmingly enthusiastic about the good ship *Hope* and its mercy mission abroad. I am sure they will continue to support it with voluntary contributions, in increasing sums, as they learn of its good work and its need for their support.

I am equally sure, Mr. Speaker, that the relatively modest sums of American tax dollars which go into this project—to help send an American vessel under our own flag on its mercy mission abroad—will have far greater support at home than will many of the projects conceived by our unknown official in ICA.

This certainly does not mean there is no merit in his reported suggestion that some of our surplus hospital ships could be made available to friendly nations, for their own operation to relieve distress and spread medical knowledge. Without doubt, many countries could operate hospital ships at a lower cost than we do, and be of great help to their people.

But surely it is no sin to have an American flag flying proudly above such a vessel, and to pay American wages to the seamen who sail her, and to invest a very small percentage of our foreign-assistance funds in such an undertaking.

Discrimination in the Peanut Support Program

EXTENSION OF REMARKS
OF
HON. W. R. POAGE
OF TEXAS
IN THE HOUSE OF REPRESENTATIVES
Tuesday, September 12, 1961

Mr. POAGE. Mr. Speaker, in an effort to clarify the misunderstanding about the differentials established by the Department of Agriculture between the support price of various types of peanuts, it should be understood that there are five major types of peanuts: The Virginia type grown in Virginia and North Carolina; the Southwest Spanish type grown in Texas, Oklahoma and New Mexico; the Southeast Spanish type grown in Georgia, Alabama and Florida; the Runner type also grown in Georgia, Alabama and Florida; and the Valencia type grown almost exclusively in New Mexico.

Next, it should be understood that since the Commodity Credit Corporation support prices are expressed for each type in dollars per "average ton" of farmers' stock or unshelled peanuts, no meaningful comparisons may be made between the support by types since the "average ton" of the various types are not comparable as to kernel content and quality. The meaningful price to the commercial user of peanuts is expressed in support per pound of sound mature kernels, for that is what the commercial buyer uses. The Virginia and Valencia types will contain a substantial percent of premium nuts which will sell for more than the regular sound mature kernels. Likewise, all farmers' stock peanuts will contain a small percentage of immature, split, or otherwise imperfect kernels. These imperfect nuts must naturally bring something considerably less than the sound mature kernels.

For many years the Runner type was recognized as an inferior peanut and was considered basically a hog feed. Over the years plant breeders have been able to develop Runner peanuts until they now fully compete on even terms with other varieties in the commercial market. In fact, they are preferred to other types by some users. The sheller who buys the farmers' unshelled peanuts and processes them for the manufacturer pays for them principally on the basis of sound mature kernel content. The manufacturer buys peanuts, not by type of "average grade ton," but on the basis of shelled peanuts. In other words, the buyer of peanuts is not interested in the weight of unshelled—farmers' stock—peanuts. What he wants to know is how many pounds of sound mature kernels he is buying. Of course, if he buys split, damaged or immature kernels, he expects to pay a lesser price, no matter what the type of peanuts.

For a number of years the Department has maintained two differentials in the support price about which there has been considerable argument. Southeastern Spanish type peanuts have in the past been supported at several dollars per ton of sound mature kernels higher than southwestern Spanish type peanuts of the same grade. This differential has gradually been reduced. Last year it was $2 per ton. This year it has been eliminated. The change has made southeastern Spanish type peanuts more competitive with southwestern Spanish.

At the same time, Runner peanuts have been supported at $9 per ton of sound mature kernels less than southwestern Spanish peanuts of the same quality. This gives a very decided marketing advantage to the Runner-type peanuts. The commercial user can and in fact does buy the type of peanuts which gives him the largest amount of sound mature kernels for his money. Growers in the Southwest have contended that all differentials, except premiums for large nuts and nuts for roasting in the shell, should be abolished and supports should be based solely on what the processor actually buys—that is, sound mature kernels with a lesser competitive payment for other kernels. In this way, all types will compete fairly in the market.

Representatives of the Southeast have realized that they enjoy an advantage in the market and have objected to equalizing the differential between Runners and Southwest Spanish-type peanuts, but they asked for and secured an equalization of the differentials in support between southeastern and southwestern Spanish-type peanuts. It is interesting to note that this adjustment was made the first of August in spite of the fact that the southeastern people successfully argued with the Department that it was too late in the season to make any change in the differentials between Runner and Spanish-type peanuts. To the impartial observer this seems to be an unwarranted discrimination on the part of the Department in favor of the Southeast.

To make it clear just what the new support prices do, here is the picture. The support price per pound of sound mature kernels of peanuts is:

	Cents
Virginia type	16.00
Southwestern Spanish type	15.85
Southeastern Spanish type	15.85
Runner type	15.45

Thus, it can be seen that the new supports do not, as the Department's news release indicates, continue the 1960 differential which existed between southeastern and southwestern Spanish-type peanuts, but they do continue the differential which has existed between the Runner-type and Spanish-type peanuts.

All that the Virginia-Carolina and the southwestern peanut producers and shellers are asking, since all of these peanuts go to the same end use, is that this differential be eliminated, just as the Department eliminated the differential between the two types of Spanish peanuts. They are completely agreed that the Virginia and high quality larger Valencia peanuts should receive a higher support price. A number of Senators and Representatives from Virginia to Texas have introduced legislation to achieve this result. Hearings were held by the Oilseed Subcommittee but due to the pressure of adjournment these hearings were not completed and will be continued early next session unless the Department shall in the meantime have equalized these supports.

There seems to be some hope that this may happen because the Honorable Stephen Pace, spokesman for the southeastern interests, stated in a letter of August 5 that "we had insisted at the last hearing, July 31, (3) that differentials should be fixed in the fall or first of each year," and he added, "You will observe that the Under Secretary concurs." This would indicate that we could expect action before next session.

As to the nature of the action which we can expect, we can only refer to the Department's report on the bills forwarded to Chairman COOLEY over the Under Secretary's signature on August 24, 1961. In this report Mr. Murphy stated "In the circumstances, and particularly because the planting time for the 1961 crop was past, it did not seem wise to change substantially the differentials established for the prior crop."

At least if we are again denied equal treatment we will have to be given a new reason.

The southwestern producers full well recognize the desirability of maintaining a united front in the peanut industry but they feel very strongly that this unity cannot be purchased at the price of acceptance of any differential between the support price of a pound of sound mature peanut kernels, whether these kernels come from a Runner vine in the Southeast or a Spanish bush in the Southwest.

Sugar Policy

EXTENSION OF REMARKS
OF
HON. HAROLD D. COOLEY
OF NORTH CAROLINA
IN THE HOUSE OF REPRESENTATIVES
Tuesday, September 12, 1961

Mr. COOLEY. Mr. Speaker, the House Committee on Agriculture on Thursday, September 7 adopted three resolutions relating to the operation of the Sugar Act, which is one of our most important and most successful agricultural programs. These resolutions have a bearing upon our domestic production of sugar and upon our imports of sugar from other countries.

For the information of the House, I am inserting these resolutions, along with other matter relating to the sugar program, in the CONGRESSIONAL RECORD.

The resolutions follow:

Whereas Public Law 87-15, extending the Sugar Act of 1948 to June 30, 1962, conferred on the President the authority to withdraw the sugar quota assigned to Cuba and to obtain that sugar elsewhere; and

Whereas the law provided that after reassigning a portion of the former Cuban quota pursuant to specific directives in the act, the balance was to be obtained from any

other country "except that special consideration shall be given to countries of the Western Hemisphere and to those countries purchasing United States agricultural commodities"; and

Whereas in the calendar year 1961 more than 1.2 million tons of sugar was purchased under this discretionary authority, with the preference directive above quoted applying to all such sugar so purchased after March 31, 1961; and

Whereas the legislative history of Public Law 87-15 made it clear that the preferential purchase directive was meant to apply to offers which were made by potential supplying countries to purchase U.S. agricultural commodities in addition to their previous or normal purchases; and

Whereas several countries were prepared to or did actually make such offers but not one of such offers was approved; and

Whereas those officials to whom the President had delegated this authority under the act not only failed to carry out the intent of Congress to secure additional exports of U.S. agricultural commodities in connection with the purchase of such sugar but indicated that the making of such offers would be discouraged and that actual preference would be given to those countries not making any such offer: Therefore, be it

Resolved, That the President be requested to instruct those in charge of this aspect of the sugar program that the clear intent of Congress is to be carried out and that in making any such purchases of sugar for the calendar year 1962 clear preference is to be given those countries which offer to buy a reasonable quantity of U.S. agricultural commodities in return for our purchase of their sugar.

Whereas it has come to the attention of this committee that certain officials in the executive branch of the Government are reported to favor the adoption of a "global quota" system for the importation of sugar into the United States; and

Whereas the existing system under which specific import quotas are established by law has for many years operated effectively to protect domestic sugar production, assure consumers of ample sugar supplies at fair and stable prices, and to promote the export trade of the United States: Therefore be it

Resolved, That this committee would regard with extreme disfavor any action or statement by any representative of the United States at the conference in Geneva, Switzerland, on the International Sugar Agreement which would commit the United States or imply, either directly or indirectly, any commitment on the part of the United States to adopt any system of sugar importation other than fixed statutory quotas such as have heretofore operated so effectively under the Sugar Act of 1948 and previous laws; and be it further

Resolved, That it is the sense of the Agriculture Committee of the House of Representatives that in allocating the sugar tonnage necessary to supply the domestic "growth factor" the Secretary of Agriculture should make allocations to new mills so that this new tonnage can support the development of the sugar industry in new areas in anticipation of the passage of legislation revising the Sugar Act in 1962.

Mr. Speaker, on August 3, I announced on behalf of the House Committee on Agriculture that, since the Department of Agriculture was not then ready to submit its recommendations on future sugar policy, the consideration of new sugar legislation would be postponed until the 2d session of the 87th Congress convenes in January. I stated that sugar legislation then would be given preferred treatment. I am submitting for the RECORD a copy of the news release issued at that time, as follows:

ACTION ON NEW SUGAR LEGISLATION POSTPONED

Upon receiving word from Secretary Freeman that the Department of Agriculture is not now ready to submit recommendations for new legislation relating to sugar, Chairman HAROLD D. COOLEY of the House Committee on Agriculture announced today postponement of Committee consideration of such legislation until the 2d session of the 87th Congress convenes in January.

"Sugar legislation will be given preferred treatment when the Congress returns in January," Mr. COOLEY said.

"Early this year we extended the Sugar Act from March 31, 1961, to June 30, 1962. It was the committee's intention to consider long range legislation when we completed work on the general farm legislation which was finally approved by the Congress today. We have been awaiting recommendations from the Department, which administers the sugar program, on new legislation to extend the Sugar Act further and deal with the long-term problems of sugar production and supply.

"Today I received a letter from Secretary Freeman in which he says 'it appears inadvisable to present such recommendations before the beginning of the next session of Congress', primarily because world production and marketing of sugar are undergoing realinement and the situation has not yet stabilized."

The Secretary's letter follows:

"DEAR CONGRESSMAN COOLEY: This is in response to your inquiry about recommendations from this Department for amending and extending the Sugar Act.

"For several reasons it appears inadvisable to present such recommendations before the beginning of the next session of Congress. World production and marketing of sugar are undergoing realinement and the situation has not yet stablized. This fact coupled with other uncertainties in the international field lead us to believe it wise to reserve judgment for the present about some of the major issues respecting sugar import quotas.

"Within the domestic sugar industry there are also important unresolved issues. These issues, too, may require long and difficult hearings by your committee and the Senate Finance Committee as well as study by the executive agencies.

"I know that you, as well as we, wanted to get the Sugar Act extended at this session. However, because of the heavy workload in connection with the general farm legislation, work on specialized legislation, such as the Sugar Act, had to be postponed. It appears doubtful that sufficient time would be available to get new sugar legislation enacted during the remainder of this session."

Mr. Speaker, for the further easy and ready reference of the Members, I believe this report should embrace also that part of the statement of policy by the managers on the part of the House, in the conference on S. 1643—H.R. 8230—the Agricultural Act of 1961 relating to sugar. This statement follows:

Exchange of sugar for surplus agricultural commodities: The committee of conference deplores the fact that the responsible departments of the Government has not taken the opportunity in purchasing ex quota sugar (that bought from nonquota countries as the result of withdrawal of the Cuban quota) to sell additional quantities of agricultural commodities.

In the law extending the Sugar Act from March 31, 1961, to June 30, 1962, the Congress provided that "special consideration" in the purchase of ex quota sugar should be given to those countries purchasing U.S. agricultural commodities. In spite of this requirement, not one pound of surplus commodities has been sold under this provision.

Authority to administer this provision of law was delegated by the President to the Secretary of Agriculture in Proclamation No. 3401 in these words:

"Do hereby continue the delegation to the Secretary of Agriculture of the authority vested in the President by section 408(b)(2) and section 408(b)(3) of the Sugar Act of 1948, as amended, such authority to be continued to be exercised with the concurrence of the Secretary of State."

In spite of this clear delegation of authority, the Department of Agriculture did not establish any regular procedures or method for receiving proposals to exchange sugar for agricultural commodities and it appears that the part played by the Department of State has been substantially larger than the "concurrence" required by the President.

In testimony before the House Agriculture Committee, an Assistant Secretary of State asserted that he did not agree with the directive of Congress with respect to the exchange of sugar for agricultural commodities, that he considered this to be poor policy, and assumed full responsibility for turning down specific proposals for such an exchange which have been made by delegations from foreign countries.

This position was reiterated by another Assistant Secretary of State in a letter to a Member of Congress in which he said:

"From the foregoing considerations, it was decided that proposals to make allocations of sugar quotas conditional, upon purchases of surplus wheat or other commodities or products, would complicate administration of the sugar program and would be contrary to sound commercial trade policy. This view was made known to officials of the Brazilian Government when they requested a discussion of the matter."

Obviously some subordinate officials in the Department of State not only frown upon the clear intent and meaning of legislation which has been enacted by Congress, but arrogantly and deliberately refuse to execute the laws enacted as Congress has clearly indicated such laws should be administered.

While these officials and representatives of the executive branch of the Government might not be guilty of malfeasance they very well may be guilty of misfeasance of office.

Apparently every roadblock that can possibly be arranged and devised has been provided to obstruct and to delay the disposition of surplus agricultural commodities except for foreign currencies. Certainly strategic materials vital in our own economy are worth far more to our Government, in exchange for our agricultural commodities, than are foreign currencies of doubtful value. We still need many strategic materials in our stockpiles, yet those who are administering our programs seem to prefer stockpiles of these currencies of doubtful value which have accumulated and are being accumulated in many nations around the world.

If these programs which Congress has initiated and authorized are not honestly and fairly administered and executed, only representatives of the executive branch of the Government can be blamed. In no one of these programs has Congress written mandatory provisions, but on many occasions Congress has indicated that strategic materials or sales for dollars or dollar credit, are to be preferred to sales for foreign currency. Notwithstanding we continue to accumulate these currencies instead of strategic and vital materials. If some drastic action is not taken by the executive branch of the Government the disposal of our agricultural commodities will be retarded and the taxpayers will bear the burden of the storage costs involved.

HOUSE OF REPRESENTATIVES

WEDNESDAY, SEPTEMBER 13, 1961

The House met at 10 o'clock a.m.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

Psalms 19: 14: *Let the words of my mouth, and the meditation of my heart, be acceptable in Thy sight, O Lord, my strength and my Redeemer.*

Almighty God, whose love and goodness are everywhere, grant that in all the hours of this new day, we may have a clear perception of Thy gracious presence, kindling our hearts with renewed consecration and energy for the tasks which confront us.

May Thy divine counsel illumine our human judgment; Thy righteous purposes direct our human desires; Thy sovereign will control all our actions and constrain us to a glad and spontaneous obedience.

Help us to recognize and be more responsive to those heavenly and hopeful signs which betoken that the heart of humanity is putting out its tendrils of deep longing and yearning toward peace and that more abundant life which is spiritual and eternal.

Hear us in Christ's name. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment a bill of the House of the following title:

H.R. 6141. An act to amend the Act of September 1, 1954, in order to limit to cases involving the national security the prohibition on payment of annuities and retired pay to officers and employees of the United States, to clarify the application and operation of such act, and for other purposes.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 7057. An act relating to the application of the terms "gross income from mining" and "ordinary treatment processes normally applied by mine owners or operators in order to obtain the commercially marketable mineral product or products" to certain clays and shale for taxable years beginning before December 14, 1959.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 2393. An act to extend for 2 additional years the expired provisions of Public Laws 815 and 874, 81st Congress, and the National Defense Education Act of 1958, and for other purposes.

The message also announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following title:

S. 1317. An act to change the designation of that portion of the Hawaii National Park on the island of Hawaii, in the State of Hawaii, to the Hawaii Volcanoes National Park, and for other purposes.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7035) entitled "An act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1962, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House to the amendments of the Senate Nos. 7, 29, and 50, to the foregoing bill.

CALL OF THE HOUSE

Mr. KYL. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

Mr. ALBERT. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 196]

Ashley	Fino	Robison
Barry	Glenn	Rogers, Tex.
Betts	Griffin	Schenck
Blatnik	Hall	Shelley
Bromwell	Harrison, Va.	Slier
Brooks, La.	Harsha	Slack
Brown	Healey	Ullman
Buckley	Hébert	Vanik
Casey	Ichord, Mo.	Vinson
Colmer	Jones, Mo.	Wallhauser
Cooley	Mailliard	Weaver
Curtis, Mass.	Minshall	Westland
Dague	Morgan	Willis
Davis, Tenn.	Morse	Winstead
Diggs	O'Brien, N.Y.	Young
Dooley	Powell	
Farbstein	Rabaut	

The SPEAKER pro tempore. On this rollcall, 384 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

MILITARY CONSTRUCTION APPROPRIATION BILL, 1962 (H.R. 8302)

The SPEAKER pro tempore. The unfinished business is the vote on the motion of the gentleman from California [Mr. SHEPPARD], on which the previous question had been ordered.

"In lieu of the sum proposed in said amendment, insert $154,122,000."

Mr. YATES. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. YATES. As I understand the parliamentary situation, the motion has been made by the gentleman from California to strike an appropriation out of the conference report. Is that correct?

The SPEAKER pro tempore. The Chair will state that that is not a parliamentary inquiry; that is a matter for the House to determine.

Mr. YATES. An "aye" vote on this motion of the gentleman from California will result in the installation being retained in Chicago, will it not?

The SPEAKER pro tempore. The Chair, of course, cannot determine that. The Chair, however, has his own personal opinion.

The question is on the motion of the gentleman from California [Mr. SHEPPARD].

Mr. YATES. Mr. Speaker, on this vote I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 212, nays 185, not voting 39, as follows:

[Roll No. 197]

YEAS—212

Abbitt	Garmatz	Morris
Abernethy	Gathings	Moss

NOT VOTING—39

Ashley	Glenn	Rogers, Tex.
Barry	Hall	Schenck
Betts	Harrison, Va.	Shelley
Bromwell	Harsha	Siler
Brooks, La.	Healey	Slack
Brown	Hébert	Thomas
Buckley	Ichord, Mo.	Thompson, La.
Cooley	Jones, Mo.	Ullman
Dague	Kirwan	Vinson
Diggs	McMillan	Weaver
Dooley	Morrison	Westland
Farbstein	Rabaut	Winstead
Fino	Robison	Young

So the motion was agreed to.

The Clerk announced the following pairs:

Mr. Buckley for, with Mr. Hébert against.

Mr. Morrison for, with Mr. McMillan against.

Mr. Bromwell for, with Mr. Winstead against.

Mr. Brown for, with Mr. Barry against.

Mr. Fino for, with Mr. Betts against.

Mr. Harsha for, with Mr. Glenn against.

Mr. Schenck for, with Mr. Hall against.

Mr. Siler for, with Mr. Robison against.

Mr. Rogers of Texas for, with Mr. Weaver against.

Mr. Cooley for, with Mr. Westland against.

Mr. KNOX changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

A motion to reconsider the votes by which action was taken on the several motions was laid on the table.

DEPARTMENTS OF STATE AND JUSTICE, THE JUDICIARY AND RELATED AGENCIES APPROPRIATION BILL, 1962

The SPEAKER pro tempore. The unfinished business is the further consideration of the bill (H.R. 7371) making appropriations for the Departments of State and Justice, the judiciary, and related agencies for the fiscal year ending June 30, 1962, and for other purposes. The question is on the motion of the gentleman from New York [Mr. ROONEY], on which the previous question has been ordered. Without objection, the Clerk will again report the motion of the gentleman from New York.

There was no objection.

Mr. CRAMER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. CRAMER. This amendment is the extension of the Civil Rights Commission, receding by the House to the amendment offered as a rider in the other body——

The SPEAKER pro tempore. What is the gentleman's inquiry?

Mr. CRAMER. To the appropriation bill for the Departments of State and Justice and the judiciary, is it not?

The SPEAKER pro tempore. The Clerk is about to report the motion.

The Clerk read as follows:

Mr. ROONEY moves that the House recede from its disagreement to the amendment of the Senate numbered 25 and concur therein with an amendment as follows: In lieu of the date of "September 9, 1963" in said amendment, insert: "September 30, 1963."

The SPEAKER pro tempore. The question is on the motion.

Mr. CRAMER. Mr. Speaker, a further parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. CRAMER. The vote then occurs on the motion to recede and concur in the amendment to the Senate rider extending the life of the Civil Rights Commission for 2 years. The Committee on the Judiciary of the House voted out H.R. 6496, which contained an amendment providing for vote fraud protection for all citizens.

Mr. ROONEY. Mr. Speaker, the gentleman is not stating a parliamentary inquiry.

Mr. CRAMER. I am coming to the parliamentary inquiry, Mr. Speaker, which is——

The SPEAKER pro tempore. The Chair wants to cooperate with the Members in protecting their rights under the rules. That means all Members' rights. If the gentleman will state his parliamentary inquiry, the Chair will be glad to hear him.

Mr. CRAMER. Is it true, Mr. Speaker, that if this motion is voted upon favorably, there will be no opportunity on the part of the House whatsoever to consider the vote fraud amendment approved in a bill——

Mr. ROONEY. Mr. Speaker, I submit that is not a parliamentary inquiry.

Mr. CRAMER. Which is now pending before the Committee on Rules?

The SPEAKER pro tempore. The Chair has stated before that he has his own personal opinion. The Chair cannot construe the result of the vote.

Mr. CRAMER. Mr. Speaker, a further parliamentary inquiry. Is it true that the motion pending before the House has priority over any other motion and that the only opportunity for the House to consider the vote fraud amendment would be to vote this down, and at that time the vote fraud amendment could be considered?

The SPEAKER pro tempore. The Chair will answer the first part of the gentleman's inquiry. The latter part is not the subject of a parliamentary inquiry. It does have priority, answering the first part.

The question is on the motion.

Mr. CRAMER. Mr. Speaker, what is the parliamentary situation if this motion is voted down?

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York [Mr. ROONEY]. The determination of the vote is a matter for the House to work its will on.

Mr. SIKES. Mr. Speaker, on that I demand the yeas and nays.

Mr. FULTON. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. FULTON. Will the Speaker restate the issue so we know what it is?

The SPEAKER pro tempore. The question has already been stated twice.

Mr. FULTON. But I have asked that it be again stated. Some of us at the present time do not understand it; we could not hear it.

The SPEAKER pro tempore. Without objection the Clerk will again read the motion.

The Clerk read as follows:

Mr. ROONEY moves that the House recede from its disagreement to the amendment of the Senate numbered 25 and concur therein with an amendment as follows:

"In lieu of the date 'September 9, 1963' in said amendment insert 'September 30, 1963.'"

Mr. ROONEY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. ROONEY. This concerns the Commission on Civil Rights, does it not?

The SPEAKER pro tempore. The question concerns what is contained in the motion.

The gentleman from Florida demands the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New York.

The question was taken; and there were—yeas 301, nays 106, not voting 30, as follows:

[Roll No. 198]

YEAS—301

Adair	Albert	Arends
Addabbo	Anderson, Ill.	Aspinall
Addonizio	Anfuso	Auchincloss

NOT VOTING—80

Ashley	Hall	Rogers, Tex.
Barry	Harrison, Va.	Schenck
Betts	Harsha	Siler
Brooks, La.	Healey	Slack
Brown	Hébert	Thomas
Buckley	Ichord, Mo.	Thompson, La.
Cooley	Jones, Mo.	Ullman
Dague	Morrison	Vinson
Diggs	Rabaut	Westland
Dooley	Robison	Young

So the motion was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Buckley for, with Mr. Hébert against.

Mr. Rabaut for, with Mr. Brooks of Louisiana against.

Mr. Healey for, with Mr. Morrison against.

Mr. Ashley for, with Mr. Cooley against.

Mr. Ullman for, with Mr. Harrison of Virginia against.

Mr. Diggs for, with Mr. Vinson against.

Mr. Brown for, with Mr. Thompson of Louisiana against.

Mr. Betts for, with Mr. Rogers of Texas against.

Until further notice:

Mr. Ichord of Missouri with Mr. Barry.

Mr. Slack with Mr. Hall.

Mr. Thomas with Mr. Schenck.

Mr. Young with Mr. Robison.

Mr. BAKER, Mr. AYRES, and Mr. AUCHINCLOSS changed their vote from "nay" to "yea."

Mr. COLLIER changed his vote from "present" to "yea."

The result of the vote was announced as above recorded.

Mr. CURTIS of Missouri. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

THE FULL RIGHT OF FRANCHISE

Mr. CURTIS of Missouri. Mr. Speaker, I believe it was unfortunate that the rules of the House did not permit the gentleman from Florida [Mr. CRAMER] to fully explain the vote the House was taking on the Rooney amendment.

The House had been maneuvered into a parliamentary situation on the extension of the Civil Rights Commission where it was not possible to vote to include the amendment adopted in the Judiciary Committee to extend the jurisdiction of Civil Rights Commission to include vote fraud. There was only one vote that a Member who was interested in seeing this amendment become part of the Civil Rights Commission legislation could cast and that was "nay." Had the nays carried there was no question that the Civil Rights Commission extension could then have been presented so the Congress could vote up or down the extension of its jurisdiction, to include the honest counting of the ballots.

There is no question that this situation was deliberately planned by the leadership of the Congress which decided against extending the jurisdiction of the Civil Rights Commission to include vote fraud. The statement of the gentleman from Florida [Mr. CRAMER] yesterday along with the colloquy that followed—pages 19119–19121 of the RECORD—should be read by all persons interested in the subject of civil rights.

I will say only this on the substantive question involved: The right of franchise consists of two parts; first, the right to cast a ballot freely; second, the right to have the ballot cast counted honestly. The first right is meaningless if the second right is denied. For years I have seen those who claim great interest in civil rights legislation go all out for the right to vote, but when it is sought to make that right meaningful by including the right to have the ballot counted honestly they not only lose interest, but indulge in parliamentary maneuvering to prevent the issue from being joined. This in itself is in the nature of a denial of a civil right.

I believe the issue is being drawn, however, and not much longer will these half-hearted advocates of civil rights be able to pose as the champions of the basic civil rights—the full right of the franchise—the right to vote freely and the right to have the vote counted honestly.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 24: Page 36, line 21, strike out "$302,000" and insert "$888,000".

Mr. ROONEY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ROONEY moves that the House recede from its disagreement to the amendment of the Senate numbered 24 and concur therein.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. SIKES. Mr. Speaker, on that I demand the yeas and nays.

The SPEAKER pro tempore. Twenty-nine Members have arisen, not a sufficient number.

The yeas and nays were refused.

The question was taken, and on a division (demanded by Mr. SIKES) there were—ayes 225, noes 72.

So the motion was agreed to.

The SPEAKER pro tempore. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 26: Page 37, line 2, insert: ": *Provided further*, That the compensation of any employee paid from funds provided under this head shall not exceed $20,500 per annum."

Mr. ROONEY. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ROONEY moves that the House recede from its disagreement to the amendment of the Senate numbered 26 and concur therein.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the several motions was laid on the table.

PUBLIC WORKS APPROPRIATION BILL, 1962

The SPEAKER pro tempore. The further unfinished business is the vote on the motion of the gentleman from Iowa [Mr. JENSEN] to recommit the bill H.R. 9076, the public works appropriation bill for 1962, on which the yeas and nays were ordered on yesterday.

Without objection, the Clerk will again report the motion to recommit.

There was no objection.

The Clerk read as follows:

Mr. JENSEN moves to recommit the bill H.R. 9076 to the Committee on Appropriations with instructions to report the same back forthwith with the following amendment: Page 11, line 13, strike out "$55,468,000" and insert "$51,243,000"; and on page 11, line 14, strike out "$53,268,000" and insert "$49,043,000"; and on page 11, line 24, strike out the period, insert a colon and the following proviso: "*Provided further*, That no part of the funds herein appropriated shall be available for constructing the following transmission lines and facilities:

"Vernal-Provo No. 1 transmission line and substation 138 kilovolts;

"Craig-Sinclair transmission line and substation 115 kilovolts;

"Glen Canyon-Sigurd-St. George transmission lines and substations 138 kilovolts;

"Glen Canyon-Phoenix transmission lines and substations 230 kilovolts (double circuit);

"Four Corners-Albuquerque transmission line and substation 230 kilovolts (double circuit);

"Curecanti-Rangely transmission line 230 kilovolts;

"And the Gunnison-Midway section of the Curecanti-Midway transmission lines and substation."

Mr. HALLECK. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. HALLECK. I am led to present this inquiry because of some questions that have been asked of me by some of the newer Members. As I understand, this is a motion to recommit with instructions to strike out certain parts of the bill. If this kind of a motion to recommit is carried, then would it follow immediately that the bill would come back to the House for a vote as amended by the motion to recommit, and it would come back immediately for a vote up or down?

The SPEAKER pro tempore. The answer to the parliamentary inquiry is in the affirmative, that it would, because the motion calls for reporting back forthwith.

Mr. HALLECK. I thank the Chair.

The SPEAKER pro tempore. The question is on the motion on which the yeas and nays were demanded.

The question was taken; and there were—yeas 182, nays 225, not voting 29, as follows:

[Roll No. 199]

YEAS—182

Abbitt	Fino	Monagan
Adair	Fisher	Moore

NOT VOTING—29

Ashley	Hall	Rogers, Tex.
Betts	Harrison, Va.	Schenck
Brooks, La.	Harsha	Siler
Brown	Healey	Slack
Buckley	Hébert	Thompson, La.
Colmer	Ichord, Mo.	Ullman
Cooley	Jones, Mo.	Vinson
Dague	Morrison	Westland
Diggs	Rabaut	Young
Dooley	Robison	

So the motion to recommit was rejected.

The Clerk announced the following pairs:

On this vote:

Mr. Vinson for, with Mr. Hébert against.

Mr. Hall for, with Mr. Rogers of Texas against.

Mr. Harrison of Virginia for, with Mr. Brooks of Louisiana against.

Mr. Betts for, with Mr. Westland against.

Mr. Harsha for, with Mr. Buckley against.

Mr. Schenck for, with Mr. Cooley against.

Until further notice:

Mr. Thompson of Louisiana with Mr. Dooley.

Mr. Ullman with Mr. Siler.

Mr. DEVINE changed his vote from "nay" to "yea."

The vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the passage of the bill.

Mr. JENSEN. On that, Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 378, nays 31, not voting 27, as follows:

[Roll No. 200]

YEAS—378

Abbitt	Dominick	King, Utah

Mr. Harrison of Virginia with Mr. Dooley.
Mr. Powell with Mr. Schenck.
Mr. Healey with Mr. Harsha.
Mr. Vinson with Mr. Hall.

Mr. ASHBROOK changed his vote from "nay" to "yea."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AMENDING TITLE V OF THE AGRICULTURAL ACT OF 1949

Mr. SISK, from the Committee on Rules, reported the following privileged resolution (H. Res. 455, Rept. No. 1176) which was referred to the House Calendar and ordered to be printed.

Resolved, That immediately upon the adoption of this resolution the bill (H.R. 2010) to amend title V of the Agricultural Act of 1949, as amended, and for other purposes, with the Senate amendment thereto, be, and the same hereby is, taken from the Speaker's table, to the end that the Senate amendment be, and the same is hereby, disagreed to and that the conference requested by the Senate on the disagreeing votes of the two Houses be, and the same is hereby, agreed to.

AUTHORIZING APPROPRIATIONS FOR THE ATOMIC ENERGY COMMISSION

Mr. HOLIFIELD. Mr. Speaker, I call up the conference report on the bill—H.R. 7576—to authorize appropriations for the Atomic Energy Commission, in accordance with section 261 of the Atomic Energy Act of 1951, as amended, and for other purposes, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. VAN ZANDT. Mr. Speaker, reserving the right to object, it is my understanding we will have 1 hour of debate on this conference report?

The SPEAKER pro tempore. There will be 1 hour of general debate, and the gentleman from California [Mr. HOLIFIELD] will have control of the time.

Mr. VAN ZANDT. Mr. Speaker, several weeks ago when this matter was on the floor, this side of the aisle allocated half of the time to the majority. Would my friend from California advise whether or not this side of the aisle will be extended the same courtesy at this time.

Mr. HOLIFIELD. The gentleman from California will be glad to yield 30 minutes to the gentleman from Pennsylvania.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 1101)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 7576) to authorize appropriations for the Atomic Energy Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"SEC. 101. PLANT OR FACILITY ACQUISITION OR CONSTRUCTION.—There is hereby authorized to be appropriated to the Atomic Energy Commission in accordance with the provisions of section 261a(1) of the Atomic Energy Act of 1954, as amended, the sum of $194,440,000 for acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion as follows:

"(a) SPECIAL NUCLEAR MATERIALS.—

"Project 62-a-1, modifications to production and supporting installations, $7,500,000.

"Project 62-a-2, fission product recovery, phase II, Hanford, Washington, $1,500,000.

"Project 62-a-3, modifications for improved natural fuel elements, Savannah River, South Carolina, $3,950,000.

"Project 62-a-4, solvent purification installation, Savannah River, South Carolina, $500,000.

"Project 62-a-5, additional reactor confinement, Savannah River, South Carolina, $3,000,000.

"Project 62-a-6, electric energy generating facility for the new production reactor, Hanford, Washington, $58,000,000: *Provided*, That the electric energy generated by this facility shall be used exclusively by the Commission in connection with the operation of the Hanford, Washington, installation.

"(b) SPECIAL NUCLEAR MATERIALS.—

"Project 62-b-1, relocation of Clinch River pumping station, Oak Ridge, Tennessee, $1,425,000.

"Project 62-b-2, feed vaporization building, Paducah, Kentucky, $585,000.

"Project 62-b-3, permanent Gallaher Bridge, Oak Ridge, Tennessee, $1,265,000.

"(c) ATOMIC WEAPONS.—

"Project 62-c-1, weapons production, development, and test installations, $7,500,000.

"Project 62-c-2, specialized plant addition and modification, Oak Ridge, Tennessee, $3,500,000.

"Project 62-c-3, Tandem Van de Graaff facility, Los Alamos, New Mexico, $3,500,000.

"(d) REACTOR DEVELOPMENT.—

"Project 62-d-1, test plant for Project SNAP, Santa Susana, California, $3,375,000.

"Project 62-d-2, experimental beryllium oxide reactor, National Reactor Testing Station, Idaho, $8,000,000.

"Project 62-d-3, fuels recycle pilot plant, Hanford, Washington, $5,000,000.

"Project 62-d-4, high radiation level analytical laboratory, Oak Ridge National Laboratory, Tennessee, $2,000,000.

"Project 62-d-5, improvements to radioactive liquid waste system, Oak Ridge National Laboratory, Tennessee, $1,700,000.

"Project 62-d-6, experimental organic cooled reactor loops, National Reactor Testing Station, Idaho, $6,000,000.

"Project 62-d-7, ultrahigh temperature reactor experiment building, Los Alamos Scientific Laboratory, New Mexico, $3,500,000.

"(e) REACTOR DEVELOPMENT.—

"Project 62-e-1, additional transient housing, Argonne National Laboratory, Illinois, $300,000.

"Project 62-e-2, technical services building, National Reactor Testing Station, Idaho, $1,500,000.

"Project 62-e-3, instrumentation and health physics building, Brookhaven National Laboratory, New York, $2,000,000.

"Project 62-e-4, study, development, and design for nuclear processes which have application for improving and utilizing coal and coal products, $5,000,000.

"(f) PHYSICAL RESEARCH.—

"Project 62-f-1, modification to CP-5 reactor and low energy accelerator installations, Argonne National Laboratory, Illinois, $1,650,000.

"Project 62-f-2, accelerator and reactor additions and modifications, Brookhaven National Laboratory, New York, $1,875,000.

"Project 62-f-3, accelerator improvements, Cambridge and Princeton accelerators, $500,000.

"Project 62-f-4, accelerator improvements, Lawrence Radiation Laboratory, California, $550,000.

"(g) PHYSICAL RESEARCH.—

"Project 62-g-1, high energy physics laboratory, Argonne National Laboratory, Illinois, $6,900,000.

"Project 62-g-2, chemistry laboratory, Brookhaven National Laboratory, New York, $6,000,000.

"Project 62-g-3, cosmotron laboratory addition, Brookhaven National Laboratory, New York, $525,000.

"Project 62-g-4, mechanical shops building, Lawrence Radiation Laboratory, California, $2,640,000.

"Project 62-g-5, physics building, University of Chicago, Illinois, $800,000.

"(h) BIOLOGY AND MEDICINE.—

"Project 62-h-1, laboratory for mixed fission product inhalation studies, Lovelace Foundation, Albuquerque, New Mexico, $2,000,000.

"(i) BIOLOGY AND MEDICINE.—

"Project 62-i-1, cell physiology laboratories, Oak Ridge National Laboratory, Tennessee, $500,000.

"Project 62-i-2, mammalian genetics laboratories, Oak Ridge National Laboratory, Tennessee, $760,000.

"Project 62-i-3, controlled environment laboratory, Brookhaven National Laboratory, New York, $1,000,000.

"Project 62-i-4, animal bioradiological laboratory, Lawrence Radiation Laboratory, California, $700,000.

"(j) COMMUNITY.—

"Project 62-j-1, additional junior high school construction, Los Alamos, New Mexico, $1,750,000.

"Project 62-j-2, additional elementary school construction, Los Alamos, New Mexico, $700,000.

"Project 62-j-3, Mesa public library addition, Los Alamos, New Mexico, $70,000.

"Project 62-j-4, real estate development, Los Alamos County, New Mexico, $410,000.

"(k) GENERAL PLANT PROJECTS.—$34,510,000.

"SEC. 102. LIMITATIONS.—(a) The Commission is authorized to start any project set forth in subsections 101 (a), (c), (d), (f), and (h), only if the currently estimated cost of that project does not exceed by more than 25 per centum the estimated cost set forth for that project.

"(b) The Commission is authorized to start any project set forth in subsection 101 (b), (e), (g), (i), and (j), only if the currently estimated cost of that project does not exceed by more than 10 per centum the estimated cost set forth for that project.

"(c) The Commission is authorized to start a project under subsection 101(k) only if it is in accordance with the following:

"1. For community operations, the maximum currently estimated cost of any project shall be $100,000 and the maximum currently estimated cost of any building included in such project shall be $10,000.

"2. For all other programs, the maximum currently estimated cost of any project shall be $500,000 and the maximum currently estimated cost of any building included in such a project shall be $100,000.

"3. The total cost of all projects undertaken under subsection 101(k) shall not exceed the estimated cost set forth in that subsection by more than 10 per centum.

"SEC. 103. ADVANCE PLANNING AND DESIGN.—There are hereby authorized to be appropriated funds for advance planning, construction design, and architectural services, in connection with projects which are not otherwise authorized by law, and the Atomic Energy Commission is authorized to use funds currently or otherwise available to it for such purposes.

"SEC. 104. RESTORATION OR REPLACEMENT.—There are hereby authorized to be appropriated funds necessary to restore or to replace plants or facilities destroyed or otherwise seriously damaged, and the Atomic Energy Commission is authorized to use funds currently or otherwise available to it for such purposes.

"SEC. 105. CURRENTLY AVAILABLE FUNDS.—In addition to the sums authorized to be appropriated to the Atomic Energy Commission by section 101 of this Act, there are hereby authorized to be appropriated to the Atomic Energy Commission to accomplish the purposes of this Act such sums of money as may be currently available to the Atomic Energy Commission.

"SEC. 106. SUBSTITUTIONS.—Funds authorized to be appropriated or otherwise made available by this Act may be used to start any other new project for which an estimate was not included in this Act if it be a substitute for a project or portion of a project authorized in subsections 101 (a), (b), and (c) and the estimated cost thereof is within the limit of cost of the project for which substitution is to be made, and the Commission certifies that—

"(a) the project is essential to the common defense and security;

"(b) the new project is required by changes in weapon characteristics or weapon logistic operations; and

"(c) it is unable to enter into a contract with any person, including a licensee, on terms satisfactory to the Commission to furnish from a privately owned plant or facility the product of services to be provided in the new project.

"SEC. 107. AMENDMENT OF PRIOR YEAR ACTS.—(a) Section 101 of Public Law 86-457 is amended by striking therefrom the figure '$211,476,000' and substituting therefor the figure '$338,476,000'.

"(b) Section 101(f) of Public Law 86-457 is amended by striking therefrom 'Project 61-f-7, design and engineering, linear electron accelerator, $3,000,000' and substituting therefor 'Project 61-f-7, linear electron accelerator, $114,000,000'.

"(c) Section 101(d) of Public Law 86-457 is amended by striking therefrom the figure '$24,000,000' for project 61-d-9, advanced test reactor, and substituting therefor the figure '$40,000,000'.

"SEC. 108. PROJECT RESCISSIONS.—(a) Public Law 86-457 is amended by rescinding therefrom authorization for a project, except for funds heretofore obligated, as follows:

"Project 61-b-2, high-velocity test track, Sandia Base, New Mexico, $2,100,000.

"(b) Public Law 86-50, as amended, is further amended by rescinding therefrom authorization for projects, except for funds heretofore obligated, as follows:

"Project 60-a-2, prototype installations, gaseous diffusion plants, $1,000,000.

"Project 60-b-1, cylinder storage area, Paducah, Kentucky, $500,000.

"(c) Public Law 85-590, as amended, is further amended by rescinding therefrom authorization for projects, except for funds heretofore obligated, as follows:

"Project 59-c-9, test assembly building, $510,000.

"Project 59-d-1, reprocessing pilot plant, Oak Ridge National Laboratory, Tennessee, $3,500,000.

"Project 59-d-3, fast reactor safety testing station, Nevada test site, $1,367,000.

"(d) Public Law 85-162, as amended, is further amended by rescinding therefrom authorization for a project, except for funds heretofore obligated, as follows:

"Project 58-b-6, additions to gaseous diffusion plants, $6,600,000.

"(e) Public Law 84-506, as amended, is further amended by rescinding therefrom authorization for projects, except for funds heretofore obligated, as follows:

"Project 57-a-6, charging and discharging system, Hanford, Washington, $3,450,000.

"SEC. 109. COOPERATIVE POWER REACTOR DEMONSTRATION PROGRAM.—

"(a) Section 111 of Public Law 85-162, as amended, is further amended by striking out the date 'June 30, 1961,' in clause (3) of subsection (a) and inserting in lieu thereof the date 'June 30, 1962.'

"(b) There is hereby authorized to be appropriated to the Atomic Energy Commission

the sum of $7,000,000 to be available, in addition to the funds heretofore authorized, for carrying out the Commission's power reactor demonstration program in accordance with the terms and conditions provided in sections 110 and 112 of Public Law 86–50. The maximum amount of the program authorization, specified in subsection 110(b) of Public Law 86–50 and section 109 of Public Law 86–457, is increased by $12,000,000. In addition to the amounts authorized under subsection 110(c) of Public Law 86–50 and section 109 of Public Law 86–457, the Commission is authorized to use funds not to exceed $7,000,000 in the aggregate, to provide research and development assistance in support of unsolicited proposals from the utility industry to construct nuclear powerplants.

"(c) Funds appropriated to the Commission pursuant to the authorization contained in subsections (b) and (d) of section 110 of Public Law 86–50 shall be available to the Commission, notwithstanding the provisions of section 111(f) of Public Law 85–162, for a cooperative arrangement in accordance with the basis for an agreement described in the program justification data for arrangement numbered 60–110–2, a cooperative power reactor project designated as the LaCrosse boiling water reactor."

And the Senate agree to the same.

CHET HOLIFIELD,
MELVIN PRICE,
Managers on the Part of the House.

JOHN O. PASTORE,
ALBERT GORE,
HENRY M. JACKSON,
HENRY DWORSHAK,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7576) to authorize appropriations for the Atomic Energy Commission in accordance with section 261 of the Atomic Energy Act of 1954, as amended, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report.

The Senate struck out all of the House bill after the enacting clause and inserted a substitute amendment. The committee of conference has agreed to a substitute for both the House bill and the Senate amendment. Except for technical, clarifying, and conforming changes, the following statement explains the differences between the House bill and the substitute agreed to in conference.

SECTION 101

The House, in considering H.R. 7576, deleted project 62–a–6, electric generating facilities for the new production reactor, Hanford, Wash., $95,000,000. The Senate in acting upon the bill passed by the House, struck all after the enacting clause and inserted a substitute amendment which provided for the aforementioned electric generating facilities. In addition, the Senate added a project 62–e–4, study, development, and design for nuclear processes which have application for improving and utilizing coal and coal products, $5,000,000.

The committee of conference agreed to a modified version of project 62–a–6 to read as follows:

"Project 62–a–6, electric energy generating facility for the new production reactor, Hanford, Washington, $58,000,000: *Provided*, That the electric energy generated by this facility shall be used exclusively by the Commission in connection with the operation of the Hanford, Washington installation."

Project 62–a–6 authorizes $58,000,000 for the installation of an electric generating facility at the New Production Reactor (NPR) at Hanford, Wash. This facility will consist principally of one turbine generator unit with a rated capacity of approximately 400,000 kilowatts.

The statutory language specifies that the electric energy generated by this facility shall be used by the Commission in connection with the operation of the Hanford, Wash., site. Since the site has an estimated 400,000 kilowatt requirement, this plant as designed, should be capable of meeting the power requirements of the Hanford site. The Hanford site is situated at Richland, Wash., and consists of approximately 428 square miles, owned by the Federal Government. At the site, there are eight plutonium producing reactors, various installations for separation of plutonium metal, and the fabrication of fuel elements for these reactors and related support facilities. The entire complex is operated under contract for the government by the General Electric Co.

Studies submitted to the Joint Committee on Atomic Energy on the economics of such a plant indicate that, operating at an 85 percent load factor, all costs could be paid back, including payments of a 4 percent interest charge, in 9 years. These studies assume an 11-year plutonium production campaign beginning in 1962 when the plutonium reactor goes into operation. This period is believed to be reasonable, particularly in view of the recent Soviet decision to resume nuclear weapons testing and development. A letter of August 18 from the Atomic Energy Commission summarizes the results of these studies (see appendix A to this report).

It is recognized that the Commission may enter into negotiations to make necessary adjustments under its existing arrangement with the power supplier at the Hanford site in the best interests of the Government. This authorization does not contemplate commercial sales of electric power by the Commission. It is understood that the Commission may, by negotiation with its current supplier of electric power, provide for emergency reserve capacity to guarantee continuity of power supply in the event of any interruption in power from the AEC facility.

The disposition of energy produced by these facilities will be similar to the practice followed at other AEC sites where electricity is generated incident to the operation of Government-owned reactors. A letter from the AEC summarizing the practice at these other sites is attached as appendix B to this report.

In view of the limitations imposed upon the Commission with respect to the disposition of the power produced by the facilities constructed under project 62–a–6, the conferees agreed to delete section 110 of H.R. 7576. Section 110 had provided for transfer to the Secretary of Interior of the power produced by the larger facility originally proposed under project 62–a–6. In view of the fact that the project, as agreed to by the conferees, provides for use of the power at the Hanford installation, section 110 was no longer deemed necessary.

In summary, the authorization of the single electric generator facility as recommended by the conferees would have the following advantages:

1. All of the electric power produced at the facility will be used for national defense purposes at the AEC Hanford plutonium weapons material production installation.

2. Since the electric power production is limited to the AEC Hanford installation, the question of whether or not AEC would be in the "commercial power business" is completely eliminated.

3. The Hanford atomic electric plant at 400,000 kilowatts would still be the world's largest atomic powerplant from a single reactor.

4. Economic studies submitted by the Atomic Energy Commission indicate that the entire capital cost of the generating facility will be paid for with interest in nine years of dual purpose operation.

COAL RESEARCH

With respect to project 62–e–4, added by the Senate and providing $5,000,000 for study, development and design for nuclear processes which have application for improving and utilizing coal and coal products, the conferees on the part of the House agreed to the Senate amendment.

The authorization provided by project 62–e–4 will be used to explore the areas in which nuclear energy may be used to aid the coal industry. Among the projects for which this authorization might be used are research and development work in the use of radioisotopes in the coal industry, gasification of coal by high temperature nuclear heat and related laboratory investigations into the nature of radiation induced chemical reactions. Provision is made for participation by the Department of the Interior through its Bureau of Mines and in connection with research work, the Office of Coal Research, by means of interagency agreements and transfers of funds. A letter from AEC summarizing this program is attached as appendix C to this report.

(APPENDIX A)

U.S. ATOMIC ENERGY COMMISSION,
Washington, D.C., August 18, 1961.

MR. JAMES T. RAMEY,
Executive Director, Joint Committee on Atomic Energy, Congress of the United States.

DEAR MR. RAMEY: In accordance with your request of August 16, we have calculated the duration of the dual-purpose period at the Hanford NPR necessary to pay off the investment in a powerplant consisting of one turbine-generator unit. The unit assumed was sized at the 400 emw level now under study for a 2-unit project. The budget estimate is $58 million.

As requested, the calculations have been performed on three different bases:

1. FPC's primary evaluation
2. FPC's secondary evaluation
3. FPC's secondary evaluation including credit for advanced power sales.

The results are as follows:

1. On the basis of the primary evaluation, a 12-year dual-purpose period (14-year production campaign) would pay off the plant.

2. On the basis of the secondary evaluation, a 10-year dual-purpose period (12-year production campaign) would pay off the plant.

3. On the basis of the secondary evaluation including credit for advanced power sales, a 9-year dual-purpose period (11-year production campaign) would pay off the plant.

You will recall that current studies have assumed an 8-year dual-purpose period—10-year production campaign.

Sincerely yours,

A. R. LUEDECKE,
General Manager.

(APPENDIX B)

U.S. ATOMIC ENERGY COMMISSION,
Washington, D.C., August 31, 1961.

MR. JAMES T. RAMEY,
Executive Director,
Joint Committee on Atomic Energy,
Congress of the United States.

DEAR MR. RAMEY: In accordance with your verbal request of August 30, to Mr. Hollingsworth, attached are two tabulations: Table I, AEC-owned plants, operating or dismantled, that generate power; table II, AEC purchased electric power.

Note that table I includes all electric powerplants owned and operated by the AEC, and AEC-owned reactor facilities producing steam used for electric power generation by others. It includes only plants that are in operation as of June 30, 1961, or have been in operation and have been dismantled. Table II covers AEC power purchases for the fiscal year ending June 30, 1960, for installations with demands of 1 megawatt and over; complete data for fiscal year 1961 are not yet available. We are attaching, however, a report of AEC electric power statistics which shows the actual and projected requirements for our major installations, fiscal years 1960 through 1964; the projected fiscal year 1961 requirements are not appreciably different than the actual fiscal year 1960 usage.

We will be happy to supply whatever other information you may desire.

Sincerely yours,

A. R. LUEDECKE,
General Manager.

TABLE I.—*AEC-owned plants operable or dismantled that generate power*

Name of plant	Location	Capacity, electric kilowatts (net)	Year of startup	Interconnecting utility
Nuclear:				
Shippingport Atomic Power Station	Shippingport, Pa	60,000	1957	Duquesne Light.[1]
Experimental boiling water reactor	Lemont, Ill	4,500	1956	(2).
Sodium reactor experiment	Santa Susana, Calif	6,000	1957	Southern California Edison.[3]

[2] 1 megawatt-hour is equivalent to 1,000 kilowatt-hour.

(APPENDIX C)

U.S. ATOMIC ENERGY COMMISSION,
Washington, D.C., August 7, 1961.

HON. CHET HOLIFIELD,
Chairman, Joint Committee on Atomic Energy, Congress of the United States.

DEAR MR. HOLIFIELD: In your letter of August 4, 1961, you asked for information concerning the programs and projects which we would initiate or accelerate if the Congress adopts the amendment to our fiscal year 1962 authorization bill which authorizes us to spend $5 million for research on nuclear processes which would have application for utilizing coal.

In view of the fact that funds for such a program are not included in our fiscal year 1962 budget, we have not developed our plans as completely as we have for other programs which are in the budget. However, we have given quite a bit of thought to this area and the points discussed in this letter are reasonably firm.

There are a number of areas where nuclear energy holds promise of being of great assistance to the coal industry. The scope of the areas in which nuclear energy could be of help is very broad, extending from the actual mining operation through the development of new uses and new markets for coal and coal products. For example, nuclear radiation may make it possible to utilize coal as the raw material in the production of various materials for use in industry and agriculture which are now produced from other sources. Similarly, the heat generated by nuclear reactions may speed the day when gasification of coal is an economic reality rather than a dream, or it may point the way toward more efficient and more economic means of removing the coal values from their place in nature. Of equal importance is the fact that radioisotopes produced by nuclear processes may well be instrumental in improving health and safety conditions in mining operations as well as in showing the way to improvements in mining and processing operations themselves.

The programs which we would carry out starting in fiscal year 1962, should the necessary authorization and appropriations be given by Congress, cover all of the potential areas where nuclear processes may benefit the coal industry.

The largest program which we would undertake covers studies and research and development aimed at solving the problems of coal gasification. This program, which we estimate at approximately $2,000,000 in fiscal year 1962, is divided into four parts as follows: (1) conceptual design of a nuclear reactor capable of delivering outlet coolant at 2,200° F. using long-lived low-cost fuel, (2) conceptual design of a coal gasification plant to use the heat from such a reactor, (3) development and design of critical key components for the overall plant, including the reactor, and (4) an expansion of the work on high temperature, long-life fuels to be used in this reactor.

The results of this integrated program, some work on which has been under way for the past few years, should lead to a pilot plant and eventually to a prototype should the economics prove interesting.

The work on this program would be undertaken by our national laboratories and by industrial contractors, and would require very close cooperation with the Bureau of Mines, at the Morgantown, W. Va., site.

Another program, of almost equal magnitude, and possibly of more far-reaching consequence to the coal industry in the event of success, deals with the possibility that

chemical reactions induced by massive nuclear radiation may make possible the use of coal as the basic raw material in the production of chemicals which are used in large quantities by industry and agriculture. In this effort, we plan a two-pronged approach. One, which we estimate will cost of the order of $400,000 in fiscal year 1962, will be basic in nature and will be aimed at obtaining a better understanding of radiation induced reactions. This work would be done primarily at our laboratories and at those of the universities. The other part of this program would be of a more applied nature and would be aimed at determining the technical and economic feasibility of producing specific chemical compounds or mixtures of compounds by reacting coal with water, hydrogen, nitrogen, oxygen and other materials under the influence of massive nuclear radiation. This latter effort, which would cost approximately $1,500,000 in fiscal year 1962, would be carried out at our laboratories, at universities and in the engineering laboratories of industry.

Another program which we feel can have immediate as well as long range beneficial impact on the coal industry is a proposed $500,000 program aimed at the use of radioisotopes to improve health and safety conditions of mining operations and to increase efficiency in mining, processing, transportation, and utilization of coal.

There are several areas where it appears that use of radioisotope tracer and gaging techniques can be useful in mine safety. In fiscal year 1962, we propose to initiate studies on such things as:

(1) The use of radiation from radioisotopes to minimize the probability of static discharge and thus to lessen the chances of mine explosions.

(2) The use of radioactive tracers to follow the flow of noxious gaseous and liquid mine effluent and thus to improve the control of pollution from coal mining and processing operations.

(a) The use of radioisotope gaging and detection equipment for on-the-spot checks of integrity of roof support structures, hoisting equipment, and other critical equipment.

Aside from the safety directed programs, we would undertake work aimed at using radioisotope techniques to improve efficiency of operation. Examples of such activities are:

(1) use of radioisotope gages in bore holes to determine quality and extent of reserves.

(2) Use of radioisotope gages in analyses of coal for more efficient burning and processing.

(3) Use of radioisotope sensing instruments to assist in the automatic control of mining, transport, and processing equipment.

The work on utilization of radioisotopes by the coal industry would be done largely by industrial laboratories and it would require very close cooperation, not only with the Office of Coal Research of the Department of Interior, but also with the mine and processing operators themselves.

In addition to these programs which have fairly definite objectives, we would propose to institute a series of longer range studies to determine in what other areas nuclear processes might be expected to have a beneficial impact on the coal industry. Our initial efforts in this work would be to look at the feasibility, practicality, and potential long-range economics of using nuclear reactors at mine sites to produce high temperature, high pressure steam which might be used to extract the coal values from their place in nature, not as a solid, but as a gaseous or liquid material.

In this general study program, we would also try to find out if nuclear processes could make it possible once again for coal to be the starting point in production of such things as benzene and anthracene which were once produced from coal but are now largely produced from liquid or gaseous hydrocarbons.

These general studies would cost an estimated $400,000 in fiscal year 1962, and would be made by industrial contractors or our laboratories working in close cooperation with the Office of Coal Research and the coal industry.

As one last and much longer range effort to assist the coal industry, we propose a program of grants to universities in coal producing areas to encourage increased effort on research and development aimed at improving coal mining, processing, or utilization by means of nuclear processes. The cost of this phase of our proposed program in fiscal year 1962 is estimated at $200,000.

With regard to your questions about the role of the Department of Interior in the program, I have already indicated that large portions of the program must, of necessity, be carried out in close cooperation with the Office of Coal Research or with the Bureau of Mines. While we have not yet developed the details of such cooperation, it is clear that the full talents of both agencies, and of the entire coal industry, must be brought to bear if the program is to be a success. Some programs, such as conceptual design of reactors, development of nuclear fuels, studies of the effect of massive nuclear radiations on chemical reactions, and the construction and operation of any nuclear pilot plants or prototypes which might develop as the program progresses, together with all aspects of nuclear safety, are clearly areas where the AEC will take the lead and the Department of Interior will furnish support. In other cases, such as the programs aimed at utilizing radioisotopes to improve safety or to enhance operational efficiency of specific mining or processing operations, it seems equally clear that the Department of Interior will take the lead and the AEC will give technical support to the effort. In still other cases, such as design and development of overall coal gasification plants or studies of the possible use of nuclear reactors at mine sites, the joint talents of both agencies will be required.

In order to assure a unified program, aimed at the primary objective of using nuclear processes to assist the coal industry, I would suggest that funds for the entire program be appropriated to the AEC with such transfer to the Department of Interior as is required being made after more definitive agreements have been reached between the two agencies.

Sincerely yours,

GLENN T. SEABORG, *Chairman.*
CHET HOLIFIELD,
MELVIN PRICE,
Managers on the Part of the House.

Mr. HOLIFIELD. Mr. Speaker, I yield 30 minutes to the gentleman from Pennsylvania [Mr. VAN ZANDT], and retain the balance of the time for myself.

Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, we are nearing the end of a long and laborious session. I know that the Members, like myself, are all tired and anxious to go home. On these last concluding items of business I hope that we can have the attention of the Members of the House so that we can look at this problem today devoid of emotion and hysteria, and consider it upon its merits.

Mr. Speaker, St. Paul, one of the great Apostles, once said in a speech to the Romans, "Come and let us reason together." This is what I am asking for today. Let us reason together.

Mr. Speaker, today we have before us the conference report on H.R. 7576. It contains authorization for construction of production and weapon facilities, research and development facilities and power generation assistance projects. Practically all of the items are directly connected with the defense of our nation. I shall not belabor the RECORD today with further comment on the items which are in agreement. I shall speak directly to the procedures of the conference and the merits of the issue in disagreement.

Mr. Speaker, on August 8 the House sent to the conference the authorization bill as passed by the other body.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. I shall be happy to yield to the gentleman from Indiana.

Mr. HALLECK. Mr. Speaker, I have had numerous questions asked of me as to what the result would be if the conference report is voted down. Of course, the gentleman from California [Mr. HOLIFIELD] has just said that there are many items of vital importance to the country contained in this bill. We all knew that from the beginning. But now, as I understand it, under the rules of the House, if the conference report is voted down that would simply mean that the other body would have to act further in respect to this item that is in dispute. In other words, it would not mean that the bill is killed?

Mr. HOLIFIELD. Well, of course, I cannot tell the gentleman what it would mean because I do not know what the action of the other body will be. But I do intend to comment on this situation, if the gentleman from Indiana will bear with me.

Mr. HALLECK. I thank the gentleman.

Mr. HOLIFIELD. Mr. Speaker, on August 8 the House sent to the first conference the authorization bill as passed by the Senate. The House did a most unusual thing in that it instructed the House conferees—the gentleman from Illinois [Mr. PRICE] your present Speaker, and the gentleman from Pennsylvania [Mr. VAN ZANDT]—to reject project 62-a-6 as passed by the Senate, and that amendment that was retained in the original bill by the Senate and deleted by the House provided for the construction of two electric generators of approximately 400,000 kilowatts of capacity each, at a total cost of $95 million. The Members will note that the conferees were instructed not to accept this amendment of the Senate. Your conferees were faced with a difficult problem. The Senate had included this item by a vote of 54 to 36, a 60-percent majority vote on their side. The House had rejected the Senate amendment by a recorded vote of 235 to 164, which was a 59-percent majority vote.

Mr. Speaker, it is evident to all of us that the two legislative bodies were almost equal percentage wise in their advocacy for the item in the other body and in their rejection here in the House of Representatives.

The majority of the conferees in the Senate were adamant in their position. The majority of the conferees on the House side, aware of their instructions,

did not accept the Senate position. The conferees of each body were then faced with three possible courses of action. The Senate conferees could remain firm in their instructed position; the House conferees could remain firm in their instructed position; either side could surrender. Neither body would surrender completely to the position of the other body.

Under this condition of absolute stalemate, the authorization bill would die in conference and the atomic energy program, which is vital to our national defense, would be injured. It was obvious that neither House could impose its will completely on the other body. Neither House is sovereign over the other body on legislative matters. A compromise between the coequal legislative bodies was not only necessary but it was imperative.

So we come to the third alternative, which is a compromise. Your House conferees have brought to you for your consideration today a legitimate, reasonable compromise. The gentleman from Illinois [Mr. PRICE] and your present speaker signed the majority conference report and the statement of the managers on the part of the House. The gentleman from Pennsylvania [Mr. VAN ZANDT] was in disagreement on one of the two items of difference. I understand from one of Mr. VAN ZANDT'S letters to the Members under date of September 1 that he agrees with the gentleman from Illinois [Mr. PRICE] and with me on the $5 million research item for coal research. We appreciate the gentleman's cooperation on an item that helps his own congressional area and wish he could extend the same spirit of cooperation to the great northwest area of our United States.

What does the compromise between the two legislative bodies do?

The House conferees rejected the original two-generator, $95 million provision of the Senate.

The House conferees accepted a compromise amendment offered by the Senate which reduced the provision from two generators to one generator.

We accepted a reduction in the appropriation from $95 million to $58 million.

The Senate conferees accepted language in the conference amendment which provided—and I hope the Members on the floor will listen to this very carefully—they accepted language which provided that the electric energy generated by this facility will be used by the Commission in connection with the operation of the Hanford reactor. Every kilowatt of electricity will be used in a defense establishment. We are now buying our energy from the Bonneville system, which is a Government-owned facility, at 2.3 mills per kilowatt. If this generating facility is approved we will obtain all of the energy that we need at Hanford at a reduced rate. Every kilowatt of it will go for defense purposes. Not one kilowatt of it will go into the commercial market. So it means that instead of buying from the Bonneville system, as it now does, the AEC will use its own free byproduct steam to provide its own electric power to run its own installation, to make weapons material.

This provision completely eliminates any charge of commercial distribution of Government-produced kilowatts of electric energy. It uses Government-produced energy instead of buying it from another Government agency. It follows many precedents of Government utilization of its own power, including other AEC sites.

Right here in this Capitol Building the Government operates its own steam plant for our own use. In this case, however, the Government buys coal and oil to produce the heat. In the Hanford case the steam is produced as a byproduct. Surely no reasonable person can object to the merits of this compromise arrangement. We are using free steam, steam that is going to be made anyway, and we are paying for it here in the Capitol for use right here in the House Office Buildings and the Senate Office Buildings. We can get it free at Hanford to operate this great eight-reactor complex which is making plutonium for the weapons that stand between the United States and the slave world.

Again, let me emphasize this point. It is byproduct steam. It is free. It does not displace coal. It does not displace oil. It does not displace gas. It does not displace the private sale of electrical energy. If it did any of these things, somebody might have a reasonable, logical argument, but it does none of these three or four things.

As to the economics, our economic studies show it will amortize the cost of the generating equipment, that is, one big generator, the largest in the world, of 400,000 kilowatt capacity; it will amortize it, including interest at 4 percent, in from 9 to 11 years. It should be noted that this plant will operate at 85 percent of plant factor load instead of a 30 to 50 percent load factor estimated by the Federal Power Commission in its original report on the 800,000 kilowatt plant. Accordingly, the economics of this plant look very good. The cost of the electric power to the Government will be less than 2 mills per kilowatt.

Let me impress upon you this fact. We are now paying 2.3 mills to the Bonneville system for every kilowatt we use. The estimate we have from the experts is that this will produce electricity at 1.7 mills per kilowatt, a saving of 0.6 of a mill for every kilowatt we use, and over the years we use billions of them in this installation. This is a saving of 30 percent upon the present cost of electricity at the Hanford plant, 1.7 mills in place of 2.3 mills, and all of this will be used for national defense purposes, every kilowatt of it. Not one kilowatt will be sold commercially.

I have given you the points on this. I think that the logic is unassailable. I want to say to the Members of the House that your majority conferees, the gentleman from Illinois [Mr. PRICE] and your present speaker, present this conference report as a necessary and reasonable solution to the strongly expressed attitudes of two coequal legislative bodies. We have acted in good faith as representatives of the House. We realize that the instructions of the House were a strong expression of the attitude of the majority of its Members. We were faced in conference with a strongly felt position of the conferees on the part of the other body. We have acted in the time-honored tradition of fair and reasonable compromise of the differences between the two great and coequal legislative bodies of our Congress.

On this I rest my case, and I ask for the support of the House in the adoption of this conference report, which has only these two items, the $5-million coal research item and this one-generator item, which are different from the bill as originally passed by the House. On the coal research item, the gentleman from Pennsylvania [Mr. VAN ZANDT] has said in his letter that the House should not turn this down. So this leaves the one generating facility in disagreement. If you support the conference report and approve it, you cast a vote for economy.

This is not a private versus public power fight. This is not a coal fight. The plant is going to be built. The electric energy is needed. And whether it is from waste steam out of a generator or from the Bonneville public power system, you are going to have Government-generated power in either instance. In one instance, you are going to pay 2.3 mills for it and in the other instance you are going to pay 1.7 mills.

Upon this, Mr. Speaker, I rest my case.

The SPEAKER pro tempore (Mr. EVINS). The gentleman has consumed 15 minutes.

Mr. VAN ZANDT. Mr. Speaker, I yield myself 10 minutes.

Mr. Speaker, first let me express to my colleague, and chairman of the joint committee, my appreciation for yielding the minority or the opposition to the Hanford compromise half of the time or 30 minutes.

Mr. Speaker, I arise in opposition to the conference report before us and wish to state that when the opportunity presents itself it is my intention to ask for the yeas and nays so that the House may emphatically state its opposition for the fourth time against the proposed electric powerplant at Hanford, Wash.

To refresh our memories of the previous action taken by the House on the Hanford proposal, the record shows that on July 13 the Hanford project authorizing $95 million for an 800,000-kilowatt powerplant was eliminated from the AEC authorization bill by a teller vote of 176 to 140.

On July 18, the Senate restored the Hanford project to the AEC authorization bill and when the bill was returned to the House on August 8, I offered a motion instructing the House conferees not to agree to the Senate action, and after due debate a motion to table my motion was defeated by a rollcall vote of 235 to 164. Then by another rollcall vote of 235 to 164 the motion was adopted. On both votes the majority was 71.

Since August 8 the conferees have met twice and on the second meeting by a vote of 6 to 2 the so-called Hanford compromise was adopted with Senator

HICKENLOOPER, of Iowa, one of the Senate conferees, and myself refusing to sign the conference report.

This brief history of House action brings us up to this moment when we have before us the conference report on the AEC authorization bill which contains the so-called Hanford compromise reducing the $95 million 800,000-kilowatt powerplant to a $58 million 400,000-kilowatt station.

Mr. Speaker, it is not my intention to take up the time of this body debating the Hanford issue because all has been said that can be said about it.

I would like, however, to call attention to the following reasons why the House should continue its opposition for the fourth time against the Hanford project.

First. In authorizing the 400,000-kilowatt facility at a cost of about $58 million, Congress would be granting the Hanford project on the installment plan.

Second. If authorization is granted to construct the facility, to utilize half the steam, regardless of cost to the Nation's taxpayers, it would be almost impossible to prevent the Government from taking the next step in 1962 by authorizing the addition of another 400,000-kilowatt facility.

Third. By cutting the $95 million 800,000-kilowatt powerplant down to a $58 million 400,000-kilowatt power station such action would increase the per kilowatt of installed capacity cost by 22 percent and thus make each kilowatt-hour of electric energy more expensive to the taxpayer.

Fourth. The construction of the Hanford project would have the effect of releasing 400,000 kilowatts of firm power—previously supplied to Hanford—into the Bonneville system.

This quantity of power would add to the present surplus and could be used by the BPA to justify further the proposed Bonneville-California intertie as the first leg of an all-Federal giant power grid.

Fifth. The construction of such a facility will not make Hanford self-sufficient in terms of power because BPA would still be required to tie into the installation to supply standby power to meet the needs of Hanford during those periods when the reactor would be shut down for any reason.

Sixth. The construction of the 400,000-kilowatt facility would still have the effect of putting the AEC in the power business on a very large scale even though this power supposedly would be used exclusively at the Hanford station.

Mr. Speaker, these are six powerful reasons why the House should refuse to accept this new, bob-tailed version of the Hanford project which in reality provides for the original project in reduced form.

Furthermore, if the House were to accept this installment plan compromise it would be simply surrendering to the Senate's persistence in trying to obtain approval for the Hanford project.

Mr. Speaker, during the course of the debate on the so-called Hanford compromise an attempt will be made to link the Hanford power project with national security.

Frankly, the resumption of nuclear tests has no bearing whatsoever on the merits of Hanford except that it emphasizes the need for eliminating unnecessary projects of this kind in order to meet actual defense budgetary requirements.

In addition, voting down the conference report containing the so-called Hanford compromise will not affect the weapons program or in fact, our national defense in any way whatsoever.

The record will show that the plutonium production reactor at Hanford is nearing completion and the AEC's planning provides for the increased needs of the Nation for weapons grade plutonium to meet the requirements for the resumption of nuclear testing and expanding our stockpile of nuclear weapons.

Mr. Speaker, I hope that this conference report will be voted down by a large majority so that the House may request a new conference with the Senate after which the AEC authorization bill will come back to us in a few days with the Hanford power project deleted.

Then the House can proceed to take final action on the bill and in no way interfere with adjournment.

Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts [Mr. BATES].

Mr. BATES. Mr. Speaker, the purpose of the Joint Committee on Atomic Energy is to advance the nuclear art. That is our purpose. That is the reason why we consider legislation. Now, that is the first test that any bill emanating from our committee should fulfill.

Mr. Speaker, this project here will not advance the nuclear art and, as far as I know, there is no one who says that it will.

On page 258 of the hearings, Senator PASTORE, of Rhode Island, said this:

> In other words, there is no pretense on the part of anyone that this project is going to improve the nuclear technology.

So this project fails the first and foremost test we should have in any bill which we present to this body.

Number 2: This project raises important questions of law and policy of this Congress as far as its role should be when we bring legislation before you. In the Atomic Energy Act of 1954, section 44, which has been discussed at great length here on the floor, this statement is made:

> Nothing in this Act shall be construed to authorize the Commission to engage in the sale or the distribution of energy for commercial purposes except when it is incidental to the operation.

Let us consider that particular feature. This bill contains $58 million. It does not appear to me that $58 million is purely incidental. Furthermore, we have already put $25 million into this project for purposes of convertibility. It does not seem to me that this is merely incidental when we consider the way taxes are these days.

Mr. VAN ZANDT. Mr. Speaker, will the gentleman yield?

Mr. BATES. I yield to the gentleman from Pennsylvania.

Mr. VAN ZANDT. I think it is only proper to point out to the House at this time that the $25 million mentioned by the gentleman is not included in the cost factor mentioned by the chairman of the Joint Committee.

Mr. BATES. I was going to go into that a little later.

Mr. HOLIFIELD. Mr. Speaker, will the gentleman yield?

Mr. BATES. I yield to the gentleman from California.

Mr. HOLIFIELD. The gentleman knows, of course, that section 44 of the act of 1954 states that any energy—and I am reading from that section—

> Produced by the AEC incident to the operation of research and development facilities of the Commission or by production facilities of the Commission can be sold or distributed by the Commission.

The gentleman raises the point of incidence and states that $58 million is not incidental. I point out to the gentleman that the expenditure of the $58 million will be returned with 4 percent interest within 9 years; and after that the income will more than take care of the $25 million which has already been spent on the reactor and which will be wasted unless this generator is provided for. Is not that correct?

Mr. BATES. I cannot, of course, agree with the gentleman.

Mr. HOLIFIELD. The gentleman cannot agree that the $25 million will not be wasted?

Mr. BATES. Permit me to develop the point later.

In addition to the $58 million we authorize here, in addition to the $25 million we have already spent—in addition to that there is a cost of approximately $27 million which will be used for overhead purposes that would not have been incurred if the question of utilizing this heat had not come up. This makes a total of $110 million, and I say to the gentleman that $110 million is not just incidental to the utilization of the reactor.

How about the power marketing arrangements? These, in my judgment, are contrary to the express statements which have been made to this Congress when we had the bill up before us and it was discussed in the Senate by the Senator from Rhode Island. He said:

> It will not go into the grid of either public or private companies. But the cold hard fact of the matter is that this power will go into the Bonneville chain.

The next question that was considered in respect to this matter is the question of contribution to national defense. I think I know a little something about national defense. For 23 years, over half of my lifetime, I was engaged in nothing but military defense, either on active duty or as a member of the Armed Services Committee of the House; and I can say to you without any fear of contradiction whatsoever that I can think of hundreds of places where we can spend this money that will contribute much more to the defense of our country than utilizing a type of steam that was discarded by our engineers over a hundred years ago. We can find

many better places where this money can be spent.

Will this reactor produce power economically? Go through this record, if you will, and try to determine in your own mind whether there is any economical feasibility. Why, the figures you will see will amaze you. Nothing has ever been put together in concrete form that you can really understand, so far as cost is concerned. I can tell you when the 800,000 kilowatt project was before us they told us that for 25 years of the 33-year period it would only be marginal.

Now, we are going to produce under this bill 400,000, or one-half of what we had before.

What does the record show in connection with this particular matter? In a report to the Atomic Energy Commission by the Federal Power Commission, here is what the Federal Power Commission said:

> In order to gain operating experience and to permit the design of the second unit to take advantage of steam conditions which are found to exist in actual reactor operation, it may be desirable to install initially only one unit, and to operate the reactor for a period of at least 1 year before beginning design of the second unit.

It goes on further and says:

> However, as indicated above, it is more desirable from an economic standpoint, based on consideration of power needs and values used in this report, to install both units initially.

So, if the two units were marginal, this report indicates that the one which is proposed here today is submarginal.

How about the cost of convertibility which the gentleman referred to? That will not be considered in the cost of the power utilized there. It has been so recommended before by the same Federal Power Commission. It stated:

> Costs of convertibility, now being incurred in the construction of the reactor, are not considered in this report in determining economic feasibility. However, since these costs are being incurred to make power production possible, they are proper charges to the cost of power, and should be recovered from power revenues, if possible.

The fact of the matter is nobody knows, there is not a single soul in this Chamber today can tell you what the cost is going to be to the Federal Government as far as this matter is concerned. This will depend on later consultation between the Secretary of the Interior, the Atomic Energy Commission, and Bonneville.

This matter was voted down, and properly so, when it was considered by the House, by a vote of 235 to 164. The House was right then and it will be right today if it votes this matter down again.

Mr. HOLIFIELD. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois [Mr. PRICE].

Mr. PRICE. Mr. Speaker, I rise in support of the conference report, and would like to state at the outset that the chairman of the committee has explained the situation which existed in conference and the necessity for a compromise if the conferees were to come to any agreement and submit any proposal to this House.

The other body felt just as strongly about the position it took on rollcall vote as this membership felt about the position of the House. It became apparent and obvious that they wanted a free conference and would not agree except on the basis of a compromise. I cannot see anything wrong with that. That is more or less in keeping with normal procedures here in the Congress. That is the reason we have conference committees; that is the reason we call them conference committees.

The signers on the part of the House feel that they have made a fair compromise, and we believe that the House should agree to this conference report.

First of all, let me say there is no competition with coal involved in this project. There is no competition with private power involved in this project. Hanford does not use coal, it does not use gas. It gets none of its power at the present time from private sources. It gets it exclusively from Bonneville.

Mr. Speaker, it has been stated here that national defense is not involved, but all the oratory on this floor to the contrary cannot erase the testimony before our committee to the effect that this is in the interest of national defense and that it is important to our national defense.

Nor can all the oratory to the contrary here on the floor of the House today erase the fact that this action would be in keeping with existing law.

The gentleman from Pennsylvania said that this raises a question of law. I do not think it raises any question of law in a controversial fashion. It merely complies with existing law.

Mr. Speaker, section 44 of the Atomic Energy Act which the chairman of the Joint Committee, the gentleman from California [Mr. HOLIFIELD] explained a moment ago in a query to the gentleman from Pennsylvania, gives this authority. It states as follows:

> If energy is produced at production facilities of the Commission or is produced in experimental utilization facilities of the Commission, such energy may be used by the Commission, or transferred to other Government agencies or sold to publicly, cooperatively or privately owned utilities or users at reasonable and nondiscriminatory prices.

The gentleman from Massachusetts [Mr. BATES] read a different part of the same section of that act, but he left out one important word. The gentleman from Massachusetts read the concluding sentence of section 44, which reads as follows:

> Nothing in this Act shall be construed to authorize the Commission to engage in the sale or distribution of energy for commercial use except such energy as may be produced by the Commission incident to the operation of research and development facilities of the Commission, or of production facilities of the Commission.

The gentleman from Massachusetts left out the words "commercial use."

Mr. BATES. Mr. Speaker, will the gentleman yield?

Mr. PRICE. I yield to the gentleman from Massachusetts.

Mr. BATES. I think that was included in my remarks. I thought I left it in.

Mr. PRICE. That is the key word in this sentence, because this energy is not being used for commercial purposes. It is being used for the operation of a national defense plant, a national defense facility, the Hanford atomic energy installation.

Mr. BATES. If the gentleman will yield further, the only point I tried to establish in quoting from that, and I thought I had included it all, the only word I wanted to stress was that the power should be incidental.

Mr. PRICE. We feel it is incidental, because you have the steam regardless of what we do here today. You can either use the steam profitably for the operation of the plant, and if you use it properly as we propose to do, in time you will pay for the operation of this particular plant.

Mr. HOLIFIELD. Mr. Speaker, will the gentlemen yield?

Mr. PRICE. I yield to the gentleman from California.

Mr. HOLIFIELD. At this particular time at the Argonne laboratory we have a reactor that is running there and we are using 5,000 kilowatts of electricity for the Government's use at the Argonne facility. At Oak Ridge, Tenn., we plan to use approximately 22,000 kilowatts for the operation of the Oak Ridge plant out of an AEC-owned reactor. So this is not anything different than we planned. This is not anything different insofar as the principle involved is concerned as between Argonne, Oak Ridge, and Hanford.

In all instances energy is being produced at a reactor and being used by the Commission itself, as the gentleman has shown in section 44, where it says if energy is produced at production facilities of the Commission it can be used by the Commission, and that is exactly what the law says. There is no question of law. There may be a question of whether someone likes the law or not, but that is the law. We are following the use of the law.

Mr. PRICE. The gentleman from California is absolutely correct. I was about to point that out. The gentleman from California, however, did it much more ably than I could. That was the point I was getting to, and the point which I wanted to make clear to the House. This is steam incidental to the operation of this reactor, and this project provides for the amortization of this reactor over the years. So any vote to eliminate this project will be a vote in favor of waste, in my opinion.

Mr. HOLIFIELD. If the gentleman will yield further, a vote to approve this conference report is a strong vote for economy, because we are now spending around $7 million a year for Bonneville power. We can produce that and amortize the generation facilities. Then, after it is amortized, after possibly 9 years of operation, you will have this capital plant amortized. Outside of the operating expense, you will have practically free power.

The gentleman from Massachusetts [Mr. BATES] used a collection of figures

which totaled up to $110 million. I have studied this very thoroughly; and where he gets the figures I cannot tell you. He brought in a factor of $27 million for operating expenses over the life of the reactor. Of course, there are operating expenses in a reactor, but that is also figured in in the amortization of the reactor; and not only is that figured in, but 4 percent interest is figured in. The original F.P.C. estimate was on a 35 to 50 percent plant factor for the 800,000 kilowatt plan in the Northwest region, and with one generator for the Hanford installation you have an 85 percent plant factor. That is what makes the difference in economy as between two reactors and one reactor.

Mr. PRICE. Mr. Speaker, the gentleman from Pennsylvania [Mr. VAN ZANDT] made the remark that there are few items involved in this particular authorization bill that pertain to the weapons program. I was just looking over the authorization appropriation for the atomic energy program and the projects which the Commission is seeking and which are involved in this particular conference report. I can see numerous important projects that are tied in with the weapons program. For instance modifications to production and supporting installations, $7,500,000, which I understand is very vital to the weapons program.

There is the fission product recovery facility at Hanford, Wash., $1,500,000, which is important to the weapons program.

There is the relocation of the Clinch River pumping station, Oak Ridge, Tenn., $1,425,000, which is also important.

There is the test plant for Project SNAP, Santa Susana, Calif., which is vital to the military program.

There is a very substantial item in this conference report that has to do with stepping up the advanced test reactor program, and that is considered to be very important and very vital to the Atomic Energy naval reactor program.

Mr. Speaker, who are the people who recommended this project? This did not originate among Members of Congress. This project is recommended by the Atomic Energy Commission unanimously. The present Chairman, Dr. Seaborg, endorses this program. The former Chairman under the previous administration, Mr. McCone, endorsed it and is very much interested in this particular program. These are many items in this conference report that are vital to the weapons program. The gentleman from Pennsylvania [Mr. VAN ZANDT], in a letter which he sent out, said that delay in the adoption of this conference report would in no way interfere with the AEC appropriations contained in the public works bill. That is not a fact. It will interfere with the AEC appropriations contained in the public works bill. The gentleman overlooks the fact that there are no construction items in the public works bill that passed this House, and there can be no construction items in the public works bill that passes the other body unless we approve this authorization. So it does vitally affect the appropriations for the Atomic Energy Commission, very vitally affects them.

Mr. VAN ZANDT. Mr. Speaker, will the gentleman yield?

Mr. PRICE. I yield to the gentleman from Pennsylvania.

Mr. VAN ZANDT. I am sure that the gentleman knows this Congress would never adjourn without the passage of an Atomic Energy authorization bill.

Mr. PRICE. The gentleman has made the point that failure to adopt this conference report will not delay adjournment. I say he can give no such guarantee.

The SPEAKER pro tempore. The time of the gentleman from Illinois has expired.

Mr. VAN ZANDT. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts [Mr. BATES].

Mr. BATES. Mr. Speaker, the question of what costs are going to be considered in total costs has been under debate. The $58 million with 4-percent interest will be included, but the $25 million for convertible features certainly will not be included. There is an additional $27 million in additional operating costs that will not be included. In addition, this bill requires transmission lines, the cost of which is not included in this bill.

Mr. HOLIFIELD. Mr. Speaker, will the gentleman yield?

Mr. BATES. I yield to the gentleman from California.

Mr. HOLIFIELD. The gentleman knows this does not require significant transmission lines. They exist on the Hanford facility with eight different reactors, and there are lines that come from the Bonneville Dam for the backup power. Small transmission lines may be required but there is no item of any consequence involved in transmission lines. Of course, the $27 million will accrue over a period of years in operating this, and it will be paid off by the savings on the power.

Mr. VAN ZANDT. Mr. Speaker, I yield 10 minutes to the gentleman from California [Mr. HOSMER].

CALL OF THE HOUSE

Mr. HOFFMAN of Michigan. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER pro tempore. The Chair will count. Ninety-nine Members are present, not a quorum.

Mr. DAVIS of Tennessee. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 201]

Anfuso	Harrison, Va.	Siler
Ashley	Healey	Slack
Bass, Tenn.	Hébert	Spence
Brooks, La.	Jones, Mo.	Springer
Brown	McDonough	Thompson, La.
Buckley	Morrison	Vinson
Cooley	Rabaut	Winstead
Dague	Robison	
Hall	Rogers, Tex.	

The SPEAKER pro tempore. On this rollcall 412 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

AUTHORIZING APPROPRIATIONS FOR THE ATOMIC ENERGY COMMISSION

The SPEAKER pro tempore. The Chair recognizes the gentleman from California [Mr. HOSMER].

Mr. HOSMER. Mr. Speaker, so far we have had one teller vote, two rollcall votes, and many hours of argument on this matter. We are about to have another rollcall vote on it. Basically, we have had all these because this particular issue in the atomic energy authorization bill makes it a battleground for the public versus private power issue.

Mr. Speaker, whether or not public power is or is not logically intertwined in this matter, as a matter of fact it is intertwined, and it is intertwined to the detriment of the Nation's nuclear science program. If we do not today reject this conference report and thereby reject atomic energy authorization bills as a battleground for the public power issue, all this is going to plague us again and again, year after year after year, and the accumulated delay and detriment to the Nation's nuclear science program will, in the aggregate, be far more serious than if we made no authorization and no appropriation whatsoever this year.

Mr. Speaker, this kind of issue belongs over in the public works bills where it can be discussed along with unrelated items, without detriment and delay to those others. It would be very simple to handle these matters via authorizations to the power authorities—Bonneville, TVA, or whatever other authorities there are—let the issue be fought out cleanly on that battleground rather than here. By doing so we would not hamper, hamstring, and delay our nuclear science program which, my colleagues, we must do everything we can to implement in this great day of scientific progress and scientific competition, if you will, for survival.

Let me emphasize that point by saying this: I do not believe there is a person in this Chamber who does not agree that should these 400,000 kilowatts go into Hanford under this authorization, that somebody would not be back here next year for the other 400,000 kilowatts at Hanford to complete the originally planned program.

In other words, this is not a compromise. This is merely the first of two steps toward getting the 800,000 kilowatts at Hanford, 400,000 at a time, and much more expensively.

Mr. HALLECK. Mr. Speaker, will the gentleman yield?

Mr. HOSMER. I yield to the gentleman from Indiana.

Mr. HALLECK. I made a few observations earlier when the gentleman from California [Mr. HOLIFIELD] very graciously yielded to me at the opening of the debate. In line with what the gentleman has just said, the House has twice expressed itself as being against this project. Now, the only way for the

House to maintain this position is to vote down this conference report. Then when that is done, that does not mean the end of this bill. It does not mean that you have voted against the other provisions in the bill, which we are for. It simply means that the House insists upon its position which we have twice taken. Then under the rules of the House it would be in order to move that the House insist upon its position and put the other body to the vote. I think that is what ought to be done.

Mr. HOSMER. The gentleman is entirely correct. By insisting upon the position of the House, we place this kind of a fight in the proper battleground and keep it away from the nuclear science program.

Mr. Speaker, I want to touch upon the economics of the proposition before us. $58 million for 400,000 kilowatts of power, they say, but that does not include $25 million that has already gone into this piece of machinery.

It does not include $27 million additional operating cost and at least $21 million for transmission interties. That makes not a $58 million project but a $131 million project. In other words, we are not talking about $58 million today, we are talking about $131 million. And we are not talking about its taking 9 years to pay back the cost of the investment, but over a quarter of a century for, remember, that the $95 million project that was originally proposed was to take over a quarter of a century to pay out. This one is even more costly.

In addition to that, this 400,000 kilowatts would not be firm power that the Hanford project could depend upon. It would be interruptible power. The hearings are replete with statements from witnesses that the plutonium reactor will be in production, then it will be out of production, and all the interruptions to power production will make it necessary for Hanford to call on Bonneville for other sources for power. So this is not any bonanza that is going to make Hanford self-sufficient from the power standpoint at all.

You are still going to have an additional 400,000 kilowatts of capacity which must be available. In short, this is economic roulette and a very sophisticated form of economic roulette because it will be forever impossible for the taxpayers to receive back the $58 million in any form that is billed as the cost of this bill or, more properly, the $131 million which is its actual price tag.

But let us assume just for a moment that this could be paid back in 9 to 11 years, as they say it might. How many things can happen in 9 to 11 years to change these hypotheses upon which this calculation is made? Nine years ago it was September 1952. How many things have happened in these last 9 years that none of us could foresee? Nine years ago the Korean war was still on. Stevenson and Eisenhower were contesting for the Presidency. Many Members of this House in September 1952, had not the remotest notion they would ever be in politics, let alone Members of the Congress of the United States. Nikita Khrushchev was unknown outside the Soviet Union 9 years ago. That is how things can change in 9 short years. Vietnam was a free country. Polaris was not heard of. There are some two-score nations on the face of this earth that 9 years ago were not here.

So you see things can change very quickly and there is no guarantee, even under the most optimistic circumstances, that those circumstances would persist long enough for any of this investment ever to be returned to the taxpayers of the United States.

Moreover, and beyond that, in 9 years from now, when this is supposed to pay off, we are either going to be at peace or we are going to be at war. If we are at war, Hanford will be one of the prime enemy targets and the $58 million investment will stand a great chance of being blown to atoms. If we are at peace it will undoubtedly be because agreements have been made between the United States and the Soviet Union and the other great powers with respect to the reduction or elimination of nuclear weapons and therefore we will not be producing plutonium at Hanford; and therefore there will be no steam to run this plant; and therefore the $58 million could not be recovered.

That is why I say the Hanford finances are a sophisticated form of economic roulette, because not half the chambers are loaded with bullets but all the chambers are loaded.

In conclusion, I ask that this conference report be voted down, first, so that we may once and for all and firmly establish the Atomic Energy authorization as no battleground for the public power issue and that issue shall not be allowed to delay our nuclear science program. Second, because we have before us no compromise, but only a step toward 800,000 kilowatts of public power. Third, because it will prove impossible to get back the public investment—the money will go down a rathole.

Mr. VAN ZANDT. Mr. Speaker, I yield myself the remainder of the time.

Mr. Speaker, in the few minutes allotted to me I would like to conclude the debate on the part of those of us who are in opposition to the Hanford compromise.

It has been mentioned during the debate that this compromise is a fair one. As one of the conferees, I think the House should know that the conference was offered the proposition of the Senate's yielding on the Hanford project and the House accepting the $5 million for the Morgantown, W. Va., laboratory. Of course, the Senate confereees said "No." They insisted on not only retaining the $5 million item in the bill but likewise the Hanford project. Then the compromise was approved by a vote of 6 to 2.

Since the last House vote on the Hanford project, a war of nerves has been conducted. Frankly, in all my legislative experience over a period of many years never have I encountered the pressure that was applied in connection with this issue. It went so far that investigators of the other body investigated those elements of our industrial life who were supporting opposition to the Hanford project.

Therefore the Hanford compromise is not a fair one as far as the House is concerned. As a matter of fact it would give to the Senate everything they asked for and ignore the wishes of this body. As stated, it is the first step toward the ultimate construction of the Hanford project and a giant Federal power grid. I think that we have proved our case here today to the point that the compromise contained in this conference report will put the Atomic Energy Commission in the power business. It has been mentioned also that the power will be economical. But as the gentleman from Massachusetts [Mr. BATES] said, when you take into consideration all of the cost factors of the project, the energy produced will be mighty expensive.

Mr. Speaker, I hope those who are in opposition to the Hanford project will vote down the conference report and send this bill back to conference.

Mr. HOLIFIELD. Mr. Speaker, I yield myself the remainder of the time.

Mr. Speaker, I ask unanimous consent that all Members who desire to do so may extend their remarks at this point in the RECORD on this subject.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ULLMAN. Mr. Speaker, I rise in support of adoption of the conference report. First, I want to pay sincere tribute to the gentleman from California [Mr. HOLIFIELD] and the gentleman from Illinois [Mr. PRICE]. They are to be commended for their work and have truly earned the gratitude of the House for an able job carried out under most difficult circumstances. As I made clear when that issue was before us, I felt strongly that the decision to instruct our conferees prior to any meeting with the conferees from the other body was not a sound one. However, it was done and it is a credit to these two gentlemen that the proposal which they have brought back to us is truly a good and a fair compromise.

While I have consistently urged the House to authorize full conservation of the byproduct steam that will be produced at Hanford, I am fully in support of this compromise. It should eliminate completely the false issue of public versus private power which has been consistently raised by the opponents of the Hanford proposal. Like the earlier proposal it is completely feasible, both technically and economically. It is, as well, in the national interest—a point which I want to stress very strongly.

As the gentleman from California has so ably stated, the proposed authorization of one generator to utilize this byproduct heat will put the vital atomic energy facilities at Hanford on a fully self-sustaining basis in terms of electric energy. Not only would this represent a very substantial saving to the taxpayers of the United States, but it has even more important implications from the standpoint of national security. The plutonium production reactor and the other facilities at the AEC complex there are obviously of basic importance to our defense effort. At the present time, they are dependent on outside sources for the

great quantities of electric energy which are utilized. Adoption of the conference report will make possible the elimination of that dependence on outside energy sources. In my opinion, this aspect alone, in these dangerous and difficult times, demands that we accept the proposal of the conference committee and authorize the one generator.

Mr. Speaker, the people of the Pacific Northwest are united behind this important project. They recognize its value to our area and to the entire Nation. I urge my colleagues not to be misled by the false arguments raised by the sectionalists and the shortsighted special interest groups. I urge you to adopt this report.

Mr. CORMAN. Mr. Speaker, I rise in support of the conference report and the position of my very able and esteemed colleague from California [Mr. HOLIFIELD]. The economics and the philosophy of this issue have been amply debated on both sides by competent spokesmen for the opposing views.

One matter which has not been touched on, and of which the community I represent is acutely aware, is the relation of generating electricity to the problem of air pollution. I fully appreciate the fact that prospects of Hanford electric energy coming to Los Angeles are remote. Yet the tremendous advantage to any community by producing its electricity through hydro or atomic energy is a matter which deserves our consideration. Pollution of the air in our metropolitan cities is a complex one and extremely expensive to solve. The taxpayers of Los Angeles, and of California, have spent substantial amounts of money to identify, and where possible to eliminate, air pollutants. One of the factors was the generation of electricity through the use of crude oil. At substantial cost to the power users, production of power with this type of fuel is banned during certain periods of the year. It would be greatly to the advantage of Los Angeles if all of its power could be generated with hydro or atomic energy. The Los Angeles Air Pollution Control District informs me that a steam generating plant producing 800,000 kilowatts of power—the amount to be generated by the original Hanford proposal—and using as their fuel crude oil, which is the least expensive and at times the only available fuel, this steam generating plant would pump into the atmosphere daily 90 tons of sulfur dioxide, 60 tons of nitrate oxides, and 10 tons or aerosols, a total of 160 tons of air pollutant per day. The issue is whether or not the public shall have the advantage of this quantity of power production without the evils of air pollution.

Some comments as to the size and efficiency of the original Hanford proposal had led me to believe that the project was of such minor size and efficiency that it should concern me little. On further checking, I discover that this quantity of electric energy exceeds that which is available to California from the great hydroelectric producing facility at Hoover Dam. I know that Hoover Dam supplies to California an appreciable part of its electricity, and that every kilowatt which comes from hydropower decreases by that much the amount of air pollution which the people of Los Angeles must suffer. I am most hopeful that the position of the conferees will be sustained and that we could hope for a reevaluation of the original proposal at some later date. I urge a "Yes" vote on the conference report.

Mr. HOLIFIELD. Mr. Speaker, I find the position of the gentleman from Pennsylvania very strange. He has supported the $100 million atomic reactor in Shippingport which delivers its subsidized power to a private utility company.

He is supporting now the atomic powerplant in Pennsylvania which is built on top of a coal mine. He is supporting the atomic plant in New England which uses oil and which will replace oil. He is supporting an atomic powerplant at Peach Bottom, Pa.

Mr. VAN ZANDT. Mr. Speaker, will the gentleman yield?

Mr. HOLIFIELD. Mr. Speaker, I cannot yield to the gentleman at this time.

Mr. VAN ZANDT. The gentleman mentioned my name.

Mr. HOLIFIELD. Mr. Speaker, I cannot yield at this time.

Mr. Speaker, this is a compromise between two coequal bodies. We will be having one generator instead of two under this compromise. There is no competition in this instance with coal, oil, or gas. There is no competition with private power. The present power for the Hanford eight reactors in existence comes from the Bonneville system. The proposed electric power will come from the one new dual-purpose reactors, and it would take care of that reactor's operation and the other reactors.

The studies prove that this has economic value. This is an economic vote. It is a vote for economy. We are paying 2.3 mills for power from the Bonneville system and this will produce power at 1.7 mills. This will give a 30-percent saving on the annual electricity bill for the defense plant at Hanford. All of the power will be used exclusively under the terms of the amendment in the conference report for a defense plant. Not one kilowatt will be sold commercially and not one kilowatt of power will compete with commercial power. Those are the facts of the case in spite of the oratory you have heard here on this floor; and upon these facts, Mr. Speaker, I rest my case. I ask for the adoption of the conference report.

The SPEAKER pro tempore. The time of the gentleman from California has expired.

All time has expired.

PARLIAMENTARY INQUIRY

Mr. VAN ZANDT. Mr. Speaker, a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state it.

Mr. VAN ZANDT. Mr. Speaker, as I understand the parliamentary situation, we are about to vote on the conference report and those in opposition to the Hanford project by voting "no" on the conference report will support their position; is that correct?

The SPEAKER pro tempore. The Chair does not consider that to be a parliamentary inquiry. The conference report speaks for itself.

Mr. HOLIFIELD. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the adoption of the conference report.

Mr. VAN ZANDT. Mr. Speaker, I ask for the yeas and nays on this vote.

The yeas and nays were ordered.

The question was taken; and there were—yeas 156, nays 251, not voting 28, as follows:

[Roll No. 202]

YEAS—156

Addabbo	Hansen	O'Hara, Mich.
Addonizio	Harding	O'Konski

NOT VOTING—28

Abernethy	Dooley	Robison
Ashley	Green, Pa.	Rogers, Tex.
Boggs	Hall	Siler
Boykin	Harrison, Va.	Slack
Brooks, La.	Hébert	Thompson, La.
Brown	Jones, Mo.	Vinson
Buckley	Lankford	Westland
Cooley	Morrison	Young
Dague	Powell	
Dawson	Rabaut	

So the conference report was rejected.

The Clerk announced the following pairs:

On this vote:

Mr. Buckley for, with Mr. Brooks of Louisiana against.

Mr. Ashley for, with Mr. Rogers of Texas against.

Mr. Rabaut for, with Mr. Hébert against.

Mr. Dawson for, with Mr. Cooley against.

Mr. Morrison for, with Mr. Harrison of Virginia, against.

Mr. Powell for, with Mr. Slack against.

Mr. Thompson of Louisiana, for, with Mr. Abernethy against.

Mr. Green of Pennsylvania, for, with Mr. Brown against.

Mr. Westland for, with Mr. Dooley against.

Mr. Lankford for, with Mr. Hall against.

Until further notice:

Mr. Jones of Missouri with Mr. Siler.

Mr. MOORHEAD of Pennsylvania changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The Clerk will report the Senate amendment.

The Clerk read as follows:

Strike out all after the enacting clause and insert:

"SEC. 101. PLANT OR FACILITY ACQUISITION OR CONSTRUCTION.—There is hereby authorized to be appropriated to the Atomic Energy Commission in accordance with the provisions of section 261a(1) of the Atomic Energy Act of 1954, as amended, the sum of $226,440,000 for acquisition or condemnation of any real property or any facility or for plant or facility acquisition, construction, or expansion, as follows:

"(a) SPECIAL NUCLEAR MATERIALS.—

"Project 62-a-1, modifications to production and supporting installations, $7,500,000.

"Project 62-a-2, fission product recovery, phase II, Hanford, Washington, $1,500,000.

"Project 62-a-3, modifications for improved natural fuel elements, Savannah River, South Carolina, $3,950,000.

"Project 62-a-4, solvent purification installation, Savannah River, South Carolina, $500,000.

"Project 62-a-5, additional reactor confinement, Savannah River, South Carolina, $3,000,000.

"Project 62-a-6, electric energy generating facilities for the new production reactor, Hanford, Washington, $95,000,000.

"SPECIAL NUCLEAR MATERIALS.—

"Project 62-b-1, relocation of Clinch River pumping station, Oak Ridge, Tennessee, $1,425,000.

Project 62-b-2, feed vaporization building, Paducah, Kentucky, $585,000.

"Project 62-b-3, permanent Gallaher Bridge, Oak Ridge, Tennessee, $1,265,000.

"(c) ATOMIC WEAPONS.—

"Project 62-c-1, weapons production, development, and test installations, $7,500,000.

"Project 62-c-2, specialized plant addition and modification, Oak Ridge, Tennessee, $3,500,000.

"Project 62-c-3, Tandem Van de Graaff facility, Los Alamos, New Mexico, $3,500,000.

"(d) REACTOR DEVELOPMENT.—

"Project 62-d-1, test plant for project SNAP, Santa Susana, California, $3,375,000.

"Project 62-d-2, experimental beryllium oxide reactor, National Reactor Testing Station, Idaho, $8,000,000.

"Project 62-d-3, fuels recycle plant, Hanford, Washington, $5,000,000.

"Project 62-d-4, high radiation level analytical laboratory, Oak Ridge National Laboratory, Tennessee, $2,000,000.

"Project 62-d-5, improvements to radioactive liquid waste system, Oak Ridge National Laboratory, Tennessee, $1,700,000.

"Project 62-d-6, experimental organic cooled reactor loops, National Reactor Testing Station, Idaho, $6,000,000.

"Project 62-d-7, ultra high temperature rreactor experiment building, Los Alamos Scientific Laboratory, New Mexico, $3,500,000.

"(e) REACTOR DEVELOPMENT.—

"Project 62-e-1, additional transient housing, Argonne National Laboratory, Illinois, $300,000.

"Project 62-e-2, technical services building, National Reactor Testing Station, Idaho, $1,500,000.

"Project 62-e-3, instrumentation and health physics building, Brookhaven National Laboratory, New York, $2,000,000.

"Project 62-e-4, study, development, and design for nuclear processes which have application for improving and utilizing coal and coal products, $5,000,000.

"(f) PHYSICAL RESEARCH.—

"Project 62-f-1, modifications to CP-5 reactor and low energy accelerator installations, Argonne National Laboratory, Illinois, $1,650,000.

"Project 62-f-2, accelerator and reactor additions and modifications, Brookhaven National Laboratory, New York, $1,875,000.

"Project 62-f-3, accelerator improvements, Cambridge and Princeton accelerators, $500,000.

"Project 62-f-4, accelerator improvements, Lawrence Radiation Laboratory, California, $550,000.

"(g) PHYSICAL RESEARCH.—

"Project 62-g-1, high energy physics laboratory, Argonne National Laboratory, Illinois, $6,900,000.

"Project 62-g-2, chemistry laboratory, Brookhaven National Laboratory, New York, $6,000,000.

"Project 62-g-3, cosmotron laboratory addition, Brookhaven National Laboratory, New York, $525,000.

"Project 62-g-4, mechanical shops building, Lawrence Radiation Laboratory, California, $2,640,000.

"Project 62-g-5, physics building, University of Chicago, Illinois, $800,000.

"(h) BIOLOGY AND MEDICINE.—

"Project 62-h-1, laboratory for mixed fission product inhalation studies, Lovelace Foundation, Albuquerque, New Mexico, $2,000,000.

"(i) BIOLOGY AND MEDICINE.—

"Project 62-i-1, cell physiology laboratories, Oak Ridge National Laboratory, Tennessee, $500,000.

"Project 62-i-2, mammalian genetics laboratories, Oak Ridge National Laboratory, Tennessee, $760,000.

"Project 62-i-3, controlled environment laboratory, Brookhaven National Laboratory, New York, $1,000,000.

"Project 62-i-4, animal bioradiological laboratory, Lawrence Radiation Laboratory, California, $700,000.

"(j) COMMUNITY.—

"Project 62-j-1, additional junior high school construction, Los Alamos, New Mexico, $1,750,000.

"Project 62-j-2, additional elementary school construction, Los Alamos, New Mexico, $700,000.

"Project 62-j-3, Mesa public library addition, Los Alamos, New Mexico, $70,000.

"Project 62-j-4, real estate development, Los Alamos County, New Mexico, $410,000.

"(k) GENERAL PLANT PROJECTS.—$34,510,000.

"SEC. 102. LIMITATIONS.—(a) The Commission is authorized to start any project set forth in subsections 101 (a), (c), (d), (f), and (h), only if the currently estimated cost of that project does not exceed by more than 25 per centum the estimated cost set forth for that project.

"(b) The Commission is authorized to start any project set forth in subsections 101 (b), (e), (g), (i), and (j), only if the currently estimated cost of that project does not exceed by more than 10 per centum the estimated cost set forth for that project.

"(c) The Commission is authorized to start a project under subsection 101(k) only if it is in accordance with the following:

"1. For community operations, the maximum currently estimated cost of any project shall be $100,000 and the maximum currently estimated cost of any building included in such project shall be $10,000.

"2. For all other programs, the maximum currently estimated cost of any project shall be $500,000 and the maximum currently estimated cost of any building included in such a project shall be $100,000.

"3. The total cost of all projects undertaken under subsection 101(k) shall not exceed the estimated cost set forth in that subsection by more than 10 per centum.

"SEC. 103. ADVANCE PLANNING AND DESIGN.—There are hereby authorized to be appropriated funds for advance planning, construction design, and architectural services, in connection with projects which are not otherwise authorized by law, and the Atomic Energy Commission is authorized to use funds currently or otherwise available to it for such purposes.

"SEC. 104. RESTORATION OR REPLACEMENT.—There are hereby authorized to be appropriated funds necessary to restore or to replace plants or facilities destroyed or otherwise seriously demaged, and the Atomic Energy Commission is authorized to use funds currently or otherwise available to it for such purposes.

"SEC. 105. CURRENTLY AVAILABLE FUNDS.—In addition to the sums authorized to be appropriated to the Atomic Energy Commission by section 101 of this Act, there are hereby authorized to be appropriated to the Atomic Energy Commission to accomplish the purposes of this Act such sums of money as may be currently available to the Atomic Energy Commission.

"SEC. 106. SUBSTITUTIONS.—Funds authorized to be appropriated or otherwise made available by this Act may be used to start any other new project for which an estimate was not included in this Act if it be a substitute for a project or portion of a project authorized in subsections 101 (a), (b), and (c) and the estimated cost thereof is within the limit of cost of the project for which substitution is to be made, and the Commission certifies that—

"(a) the project is essential to the common defense and security;

"(b) the new project is required by changes in weapon characteristics or weapon logistic operations; and

"(c) it is unable to enter into a contract with any person, including a licensee, on terms satisfactory to the Commission to furnish from a privately owned plant or facility the product or services to be provided in the new project.

"SEC. 107. AMENDMENT OF PRIOR YEAR ACTS.—(a) Section 101 of Public Law 86–457 is amended by striking therefrom the figure '$211,476,000' and substituting therefor the figure '$338,476,000'.

"(b) Section 101(f) of Public Law 86–457 is amended by striking therefrom 'Project 61–f–7, design and engineering, linear electron accelerator, $3,000,000' and substituting therefor 'Project 61–f–7, linear electron accelerator, $114,000,000'.

"(c) Section 101(d) of Public Law 86–457 is amended by striking therefrom the figure '$24,000,000' for project 61–d–9, advanced test reactor, and substituting therefor the figure '$40,000,000'.

"SEC. 108. PROJECT RESCISSIONS.—(a) Public Law 86–457 is amended by rescinding therefrom authorization for a project, except for funds heretofore obligated, as follows:

"Project 61–b–2, high velocity test track, Sandia Base, New Mexico, $2,100,000.

"(b) Public Law 86–50, as amended, is further amended by rescinding therefrom authorization for projects, except for funds heretofore obligated, as follows:

"Project 60–a–2, prototype installation, gaseous diffusion plants, $1,000,000.

"Project 60–b–1, cylinder storage area, Paducah, Kentucky, $500,000.

"(c) Public Law 85–590, as amended, is further amended by rescinding therefrom authorization for projects, except for funds heretofore obligated, as follows:

"Project 59–c–9, test assembly building, $510,000.

"Project 59–d–1, reprocessing pilot plant, Oak Ridge National Laboratory, Tennessee, $3,500,000.

"Project 59–d–3, fast reactor safety testing station, Nevada test site, $1,367,000.

"(d) Public Law 85–162, as amended, is further amended by rescinding therefrom authorization for a project, except for funds heretofore obligated, as follows:

"Project 58–b–6, additions to gaseous diffusion plants, $6,600,000.

"(e) Public Law 84–506, as amended, is further amended by rescinding therefrom authorization for projects, except for funds heretofore obligated, as follows:

"Project 57–a–6, charging and discharging system, Hanford, Washington, $3,450,000.

"SEC. 109. COOPERATIVE POWER REACTOR DEMONSTRATION PROGRAM.—

"(a) Section 111 of Public Law 85–162, as amended, is further amended by striking out the date 'June 30, 1961,' in clause (3) of subsection (a) and inserting in lieu thereof the date 'June 30, 1962,'.

"(b) There is hereby authorized to be appropriated to the Atomic Energy Commission the sum of $7,000,000 to be available, in addition to the funds heretofore authorized for carrying out the Commission's power reactor demonstration program in accordance with the terms and conditions provided in sections 110 and 112 of Public Law 86–50. The maximum amount of the program authorization, specified in subsection 110(b) of Public Law 86–50 and section 109 of Public Law 86–457, is increased by $12,000,000. In addition to the amounts authorized under subsection 110(c) of Public Law 86–50 and section 109 of Public Law 86–457, the Commission is authorized to use funds not to exceed $7,000,000 in the aggregate, to provide research and development assistance in support of unsolicited proposals from the utility industry to construct nuclear power plants.

"(c) Funds appropriated to the Commission pursuant to the authorization contained in subsections (b) and (d) of section 110 of Public Law 86–50 shall be available to the Commission, notwithstanding the provisions of section 111(f) of Public Law 85–162, for a cooperative arrangement in accordance with the basis for an agreement described in the Program Justification Data for Arrangement Numbered 60–110–2, a cooperative power reactor project designated as the LaCrosse Boiling Water Reactor.

"SEC. 110. DISPOSITION OF ELECTRIC ENERGY.—

"(a) Electric energy produced during the operating life of the electric generating facilities constructed under section 101(a) shall be delivered by the Commission at the site of said generating facilities to, and pursuant to agreement with the Secretary of the Interior who shall transmit and dispose of such energy under the terms prescribed by section 44 of the Atomic Energy Act of 1954, as amended.

"(b) Allocation of costs to the production of such electric energy shall be made jointly by the Commission and the Secretary of the Interior, and, in the event of disagreement, shall be made by the President. Costs so allocated shall be returned to the Treasury from revenue derived by the Secretary from the disposition of electric energy marketed through the Bonneville Power Administration."

Mr. HOLIFIELD (interrupting the reading of the Senate amendment). Mr. Speaker, I ask unanimous consent that further reading of the Senate amendment be dispensed with, and that it be printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HOLIFIELD. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. HOLIFIELD moves that the House insist on its disagreement to the Senate amendment.

The motion was agreed to.

A motion to reconsider was laid on the table.

AMENDMENTS TO FEDERAL AIRPORT ACT

Mr. HARRIS. Mr. Speaker, I call up the conference report on the bill (H.R. 8102) to amend the Federal Airport Act so as to extend the time for making grants under the provisions of such act, and for other purposes.

The Clerk read the title of the bill.

The Clerk read the conference report.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 1166)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 8102) to amend the Federal Airport Act so as to extend the time for making grants under the provisions of such Act, and for other purposes, having met, after full and free conference, have been unable to agree.

OREN HARRIS,
JOHN BELL WILLIAMS,
SAMUEL N. FRIEDEL,
JOHN JARMAN,
JOHN B. BENNETT,
WILLIAM L. SPRINGER,
HAROLD R. COLLIER,
Managers on the Part of the House.

WARREN G. MAGNUSON,
A. S. MIKE MONRONEY,
GEORGE A. SMATHERS,
NORRIS COTTON,
ANDREW F. SCHOEPPEL,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 8102) to amend the Federal Airport Act so as to extend the time for making grants under the provisions of such act, and for other purposes, report that the conferees have been unable to agree.

OREN HARRIS,
JOHN BELL WILLIAMS,
SAMUEL N. FRIEDEL,
JOHN JARMAN,
JOHN B. BENNETT,
WILLIAM L. SPRINGER,
HAROLD R. COLLIER,
Managers on the Part of the House.

The SPEAKER pro tempore. The Clerk will report the Senate amendment.

The Clerk read as follows:

Strike out all after the enacting clause and insert: "That section 4 of the Federal Airport Act (49 U.S.C. 1103) is amended by inserting '(a)' immediately after 'SEC. 4.' and by adding at the end thereof the following new subsection:

"'ANNOUNCEMENT OF PROGRAM

"'(b) It shall be the duty of the Administrator to make public by January 1 of each year the proposed program of airport development intended to be undertaken during the fiscal year next ensuing and he may revise such program to the extent he finds necessary to accomplish the purposes of this Act.'

"SEC. 2. (a) The first sentence of section 5(a) of such Act (49 U.S.C. 1104(a)) is amended by inserting immediately before the period at the end thereof the following: 'and the sum of $66,500,000 for each of the fiscal years ending June 30, 1962, June 30, 1963, June 30, 1964, June 30, 1965, and June 30, 1966'.

"(b) Section 5(b) of such Act (49 U.S.C. 1104(b)) is amended by inserting '(1)' immediately after '(b)' and by adding at the end thereof the following new paragraph:

"'(2) For the purpose of carrying out this Act with respect to projects in Hawaii, Puerto Rico, and the Virgin Islands, in addition to such sums as may otherwise be authorized to be obligated by this Act, there is hereby authorized to be obligated by the

execution of grant agreements pursuant to section 12 of this Act the sum of $1,500,000 for each of the fiscal years ending June 30, 1962, June 30, 1963, June 30, 1964, June 30, 1965, and June 30, 1966. Each such authorized amount shall become available for obligation beginning July 1 of the fiscal year for which it is authorized, and shall continue to be so available until so obligated. Of each such amount, 40 per centum shall be available for projects in Hawaii, 40 per centum shall be available for projects in Puerto Rico and 20 per centum for projects in the Virgin Islands.'

"(c) Section 5 of such Act is further amended by redesignating subsections (c) and (d) as subsections '(d)' and '(e)', respectively, and by inserting immediately after subsection (b) the following new subsection:

"'SPECIAL AUTHORIZATION FOR CERTAIN GENERAL AVIATION AIRPORTS

"'(c) In addition to other sums available under this Act, there is authorized to be obligated by the execution of grant agreements pursuant to section 12 the sum of $7,000,000 for each of the fiscal years ending June 30, 1962, June 30, 1963, June 30, 1964, June 30, 1965, and June 30, 1966, for the development in the several States of airports the primary purpose of which is to serve general aviation and to relieve congestion at airports having high density of traffic serving other segments of aviation. Each such authorized amount shall become available for obligation beginning July 1 of the fiscal year for which it is authorized and shall continue to be so available until so obligated.'

"(d) Subsection (d) of such section 5 (as so redesignated by subsection (c) of this section) is amended by striking out 'subsections (a) and (b)' and inserting in lieu thereof 'subsections (a), (b), and (c)'.

"(e) Subsection (e) of such section 5 (as so redesignated by subsection (c) of this section) is amended by striking out 'section 204 of the Civil Aeronautics Act of 1938 (49 U.S.C. 424)' and inserting in lieu thereof 'subsection (a) of section 303 of the Federal Aviation Act of 1958 (49 U.S.C. 1344(a))'.

"SEC. 3. (a) Paragraph (1) of section 6(b) of such Act (49 U.S.C. 1105(b)(1)) is amended to read as follows:

"'(b)(1) Twenty-five per centum of all amounts authorized to be obligated by section 5(a) and all of the amounts authorized to be obligated by section 5(c) shall, as such amounts become available, constitute a discretionary fund.'

"(b) Paragraph (2) of section 6(b) of such Act (49 U.S.C. 1105(b)(2)) is amended to read as follows:

"'(2) Such discretionary fund shall be available for such approved projects in the several States, Puerto Rico, and the Virgin Islands as the Administrator may deem most appropriate for carrying out the national airport plan, regardless of the location of such projects. The Administrator shall give consideration, in determining the projects for which such fund is to be so used, to the existing airport facilities in the several States, Puerto Rico, and the Virgin Islands, and to the need for or lack of development of airport facilities in the several States, Puerto Rico, and the Virgin Islands.'

"(c) Paragraph (3) of section 6(b) of such Act (49 U.S.C. 1105(b)(3)) is amended by striking out 'and national forests' and inserting in lieu thereof 'national forests, and special reservations for Government purposes'.

"(d) Section 6(c) of such Act (49 U.S.C. 1105(c)) is amended to read as follows:

"'REDISTRIBUTION OF FUNDS

"'(c) Any amount apportioned for projects in a State pursuant to subsection (a) of this section which has not been obligated by grant agreement at the expiration of the fiscal year following the fiscal year for which it was first authorized to be obligated shall be added to the discretionary fund established by subsection (b) of this section.'

"SEC. 4. Section 9(d) of such Act (49 U.S.C. 1108(d)) is amended by inserting '(1)' immediately after '(d)' and by adding at the end thereof the following new paragraphs:

"'(2) No project shall be approved by the Administrator which does not include provision for installation of such of the landing aids specified in section 10(d) as are determined by him to be required for the safe and efficient use by aircraft of the airport taking into account the category of the airport and the type and volume of traffic utilizing the airport.

"'(3) No project shall be approved by the Administrator unless he is satisfied that fair consideration has been given to the interest of communities in or near which such project may be located.'

"SEC. 5. (a) Section 10 of such Act (49 U.S.C. 1109) is amended by striking out subsection (e) and inserting in lieu thereof the following:

"'LANDING AIDS

"'(d) To the extent that the project costs of an approved project represent the cost of installation of (1) land required for the installation of approach light systems, (2) in-runway lighting, (3) high intensity runway lighting, or (4) runway distance markers, the United States share shall be not to exceed 75 per centum of the allowable costs of such installation.'

"(b) Subsection (a) of such section 10 is amended by striking out '(d), and (e)' and inserting in lieu thereof 'and (d)'.

"SEC. 6. (a) Paragraph (5) of section 11 of such Act (49 U.S.C. 1110) is amended to read as follows:

"'(5) the airport operator or owner will furnish without cost to the Federal Government for use in connection with any air traffic control activities, or weather-reporting activities and communication activities related to air traffic control, such areas of land or water, or estate therein, or rights in buildings of the sponsor as the Administrator may consider necessary or desirable for construction at Federal expense of space or facilities for such purposes;'.

"(b) Section 11 of such Act is further amended by adding at the end thereof the following new sentence: 'Whenever the Administrator shall obtain from a sponsor any area of land or water, or estate therein, or rights in buildings of the sponsor and shall construct thereon at Federal expense space or facilities, he is authorized to relieve the sponsor from any contractual obligation entered into under this Act to provide free space in airport buildings to the Federal Government to the extent he finds such space no longer required for the purposes set forth in paragraph (5) of this section.'

"SEC. 7. Section 13(b) of such Act (49 U.S.C. 1112) is amended to read as follows:

"'COSTS NOT ALLOWED AFTER JUNE 30, 1961

"'(b) With respect to amounts obligated under this Act after June 30, 1961, the following shall not be allowable project costs: (1) the cost of construction of that part of a project intended for use as a passenger automobile parking facility; or (2) the cost of construction of any part of an airport building except such of those buildings or parts of buildings intended to house facilities or activities directly related to the safety of persons at the airport.'

"SEC. 8. (a)(1) Paragraph (7) of section 2(a) of such Act (49 U.S.C. 1101(a)(7)) is amended by striking out 'Alaska, Hawaii,';

"(2) Paragraph (12) of section 2(a) of such Act (49 U.S.C. 1101(a)(12)) is amended by striking out 'on May 13, 1946,'.

"(b) Section 3(a) of such Act (49 U.S.C. 1102(a)) is amended—

"(1) by striking out 'Alaska, Hawaii, and' where it appears in the first sentence thereof; and

"(2) by striking out 'Alaska, Hawaii,' in the third sentence thereof.

"(c)(1) The heading of section 7 of such Act (49 U.S.C. 1106) is amended to read as follows: 'Availability of funds for projects in Puerto Rico and the Virgin Islands'.

"(2) The text of section 7 of such Act is amended by striking out 'Alaska, in Hawaii, or in Puerto Rico,' and inserting in lieu thereof 'Puerto Rico'.

"(d) Section 9(c) of such Act (49 U.S.C. 1108(c)) is amended by striking out 'Alaska, Hawaii,' and by inserting before the period at the end thereof a comma and 'or a special reservation for Government purposes'.

"(e) Section 10(c) of such Act (49 U.S.C. 1109(c)) is amended by striking out 'Alaska and' where it appears in the heading and in the text of such section.

"SEC. 9. The Federal Aviation Act of 1958 (49 U.S.C. 1301 et seq.) is amended by adding at the end of section 1109 thereof of a new subsection as follows:

"'(e) The head of any agency of the Federal Government charged with any duty of inspection, clearance, collection of taxes or duties, or other similar function, including, but not limited to, the Secretary of the Treasury, Secretary of Agriculture, Attorney General, and Secretary of Health, Education, and Welfare, is authorized to acquire by purchase, condemnation, lease, or otherwise, space at public airports which he deems necessary for the performance of such duties and to pay a reasonable compensation therefor.'

"SEC. 10. The amendments made by this Act shall not apply with respect to projects for which amounts have been obligated by the execution of grant agreements before their enactment. With respect to such projects, the Federal Airport Act shall continue to apply as if this Act had not been enacted."

Mr. HARRIS (interrupting the reading of the amendment). Mr. Speaker, I ask unanimous consent that further reading of the amendment be dispensed with and that it be printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. HARRIS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. HARRIS moves that the House recede from its disagreement to the amendment of the Senate and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following:

"That section 4 of the Federal Airport Act (49 U.S.C. 1103) is amended by inserting '(a)' immediately after 'SEC. 4.' and by adding at the end thereof the following new subsection:

"'ANNOUNCEMENT OF PROGRAM

"'(b) It shall be the duty of the Administrator to make public by January 1 of each year the proposed program of airport development intended to be undertaken during the fiscal year next ensuing, and he may revise such program to the extent he finds necessary to accomplish the purposes of this Act.'

"SEC. 2. (a) Section 5 of such Act (49 U.S.C. 1104) is amended by redesignating subsection (d) as subsection (e), and by inserting immediately after subsection (c) the following new subsection:

"'APPROPRIATION AUTHORIZATION FOR PROJECTS

"'(d)(1) For the purpose of carrying out this Act with respect to projects in the sev-

eral States, in addition to other amounts authorized by this Act, appropriations amounting in the aggregate to $199,500,000 are hereby authorized to be made to the Administrator over a period of three fiscal years, beginning with the fiscal year ending June 30, 1962. Of amounts appropriated under this paragraph, $66,500,000 shall become available for obligation, by the execution of grant agreements pursuant to section 12, beginning July 1 of each of the fiscal years ending June 30, 1962, June 30, 1963, and June 30, 1964, and shall continue to be so available until expended.

"'(2) For the purpose of carrying out this Act with respect to projects in Hawaii, Puerto Rico, and the Virgin Islands, in addition to other amounts authorized by this Act, appropriations amounting in the aggregate to $4,500,000 are hereby authorized to be made to the Administrator over a period of three fiscal years, beginning with the fiscal year ending June 30, 1962. Of amounts appropriated under this paragraph, $1,500,000 shall become available for obligation, by the execution of grant agreements pursuant to section 12, beginning July 1 of each of the fiscal years ending June 30, 1962, June 30, 1963, and June 30, 1964, and shall continue to be so available until expended. Of each such amount, 40 per centum shall be available for projects in Hawaii, 40 per centum shall be available for projects in Puerto Rico, and 20 per centum shall be available for projects in the Virgin Islands.

"'(3) For the purpose of developing, in the several States, airports the primary purpose of which is to serve general aviation and to relieve congestion at airports having high density of traffic serving other segments of aviation, in addition to other amounts authorized by this Act for such purpose, appropriations amounting in the aggregate to $21,000,000 are hereby authorized to be made to the Administrator over a period of three fiscal years, beginning with the fiscal year ending June 30, 1962. Of amounts appropriated under this paragraph, $7,000,000 shall become available for obligation, by the execution of grant agreements pursuant to section 12, beginning July 1 of each of the fiscal years ending June 30, 1962, June 30, 1963, and June 30, 1964, and shall continue to be so available until expended.'

"(b) Subsection (e) of such section 5 (as so redesignated by subsection (a) of this section) is amended by striking out "section 204 of the Civil Aeronautics Act of 1938 (49 U.S.C. 424)" and inserting in lieu thereof subsection (a) of section 303 of the Federal Aviation Act of 1958 (49 U.S.C. 1344 (a))'.

"SEC. 3. (a) Section 6(a) of such Act (49 U.S.C. 1105 (a)) is amended to read as follows:

"'APPORTIONMENT OF FUNDS

"'SEC. 6. (a) As soon as possible after July 1 of each fiscal year for which any amount is authorized to be obligated by section 5(a) or 5(d)(1), 75 per centum of the amount made available for that year shall be apportioned by the Administrator among the several States, one-half in the proportion which the population of each State bears to the total population of all the States, and one-half in the proportion which the area of each State bears to the total area of all the States. Each amount so apportioned for a State shall, during the fiscal year for which it was first authorized to be obligated and the fiscal year immediately following, be available only for grants for approved projects located in that State, or sponsored by that State or some public agency thereof but located in an adjoining State, and thereafter any portion of such amount which remains unobligated shall be redistributed as provided in subsection (c) of this section. Upon making an apportionment as provided in this subsection, the Administrator shall inform the executive head of each State, and any public agency which has requested such information, as to the amounts apportioned for each State. As used in this subsection, the term "population" means the population according to the latest decennial census of the United States and the term "area" includes both land and water.'

"(b) Paragraph (1) of section 6(b) of such Act (49 U.S.C. 1105(b)(1)) is amended to read as follows:

"'(b)(1) Twenty-five per centum of all amounts authorized to be obligated by sections 5(a) and 5(d)(1) and one hundred per centum of all amounts authorized to be obligated by section 5(d)(3) shall, as such amounts become available, constitute a discretionary fund.'

"(c) Paragraph (2) of section 6(b) of such Act (49 U.S.C. 1105(b)(2)) is amended to read as follows:

"'(2) Such discretionary fund shall be available for such approved projects in the several States, Puerto Rico, and the Virgin Islands as the Administrator may deem most appropriate for carrying out the national airport plan, regardless of the location of such projects. The Administrator shall give consideration, in determining the projects for which such fund is to be so used, to the existing airport facilities in the several States, Puerto Rico, and the Virgin Islands, and to the need for or lack of development of airport facilities in the several States, Puerto Rico, and the Virgin Islands.'

"'(d) Paragraph (3) of section 6(b) of such Act (49 U.S.C. 1105(b)(3)) is amended by striking out 'and national forests' and inserting in lieu thereof 'national forests', and special reservations for Government purposes".

"'(e) Section 6(c) of such Act (49 U.S.C. 1105(c)) is amended to read as follows:

"'REDISTRIBUTION OF FUNDS

"'(c) Any amount apportioned for projects in a State pursuant to subsection (a) of this section which has not been obligated by grant agreement at the expiration of the two fiscal years for which it was so apportioned shall be added to the discretionary fund established by subsection (b) of this section.'

"'SEC. 4. Section 9(d) of such Act (49 U.S.C. 1108(d)) is amended by inserting '(1)' immediately after '(d)' and by adding at the end thereof the following new paragraphs:

"'(2) No project shall be approved by the Administrator which does not include provision for installation of such of the landing aids specified in section 10(d) as are determined by him to be required for the safe and efficient use by aircraft of the airport, taking into account the category of the airport and the type and volume of traffic utilizing the airport.

"'(3) No project shall be approved by the Administrator unless he is satisfied that fair consideration has been given to the interest of communities in or near which such project may be located.'

"SEC. 5. (a) Section 10 of such Act (49 U.S.C. 1109) is amended by striking out subsection (e) and inserting in lieu thereof the following:

"'LANDING AIDS

"'(d) To the extent that the project costs of an approved project represent the cost of (1) land required for the installation of approach light systems, (2) in-runway lighting, (3) high intensity runway lighting, or (4) runway distance markers, the United States share shall be of not to exceed 75 per centum of the allowable costs thereof.'

"(b) Subsection (a) of such section 10 is amended by striking out '(d), and (e)' and inserting in lieu thereof 'and (d)'.

"SEC. 6. (a) Paragraph (5) of section 11 of such Act (49 U.S.C. 1110(5)) is amended to read as follows:

"'(5) the airport operator or owner will furnish without cost to the Federal Government for use in connection with any air-traffic control activities, or wheather-reporting activities and communication activities related to air traffic control, such areas of land or water, or estate therein, or rights in buildings of the sponsor as the Administrator may consider necessary or desirable for construction at Federal expense of space or facilities for such purposes;'.

"(b) Section 11 of such Act is further amended by adding at the end thereof the following new sentence: 'Whenever the Administrator shall obtain from a sponsor any area of land or water, or estate therein, or rights in buildings of the sponsor and shall construct thereon at Federal expense space or facilities, he is authorized to relieve the sponsor from any contractual obligation entered into under this Act to provide free space in airport buildings to the Federal Government to the extent he finds such space no longer required for the purposes set forth in paragraph (5) of this section.'

"SEC. 7. Section 13(b) of such Act (49 U.S.C. 111(b)) is amended to read as follows:

"'COSTS NOT ALLOWED AFTER JUNE 30, 1961

"'(b) With respect to amounts obligated under this Act after June 30, 1961, the following shall not be allowable project costs: (1) the cost of construction of that part of a project intended for use as a public parking facility for passenger automobiles; or (2) the cost of construction of any part of an airport building except such of those buildings or parts of buildings intended to house facilities or activities directly related to the safety of persons at the airport.'

"SEC. 8. (a)(1) Paragraph (7) of section 2(a) of such Act (49 U.S.C. 1101(a)(7)) is amended by striking out 'Alaska, Hawaii,';

"(2) Paragraph (12) of section 2(a) of such Act (49 U.S.C. 1101(a)(12)) is amended by striking out 'on May 13, 1946,'.

"(b) Section 3(a) of such Act (49 U.S.C. 1102(a)) is amended—

"(1) by striking out 'Alaska, Hawaii, and' where it appears in the first sentence thereof; and

"(2) by striking out 'Alaska, Hawaii,' in the third sentence thereof.

"(c)(1) The heading of section 7 of such Act (49 U.S.C. 1106) is amended to read as follows:

"'AVAILABILITY OF FUNDS FOR PROJECTS IN PUERTO RICO AND THE VIRGIN ISLANDS'

"(2) The text of section 7 of such Act is amended by striking out 'Alaska, in Hawaii, or in Puerto Rico,' and inserting in lieu thereof 'Puerto Rico'.

"(d) Section 9(c) of such Act (49 U.S.C. 1108(c)) is amended by striking out 'Alaska, Hawaii,' and by inserting before the period at the end thereof the following: ', or a special reservation for Government purposes'.

"(e) Section 10(c) of such Act (49 U.S.C. 1109(c)) is amended by striking out 'Alaska and' where it appears in the heading and in the text of such section.

"SEC. 9. Section 1109 of the Federal Aviation Act of 1958 (49 U.S.C. 1509) is amended by adding at the end thereof the following new subsection:

"'(e) There are authorized to be appropriated such sums as may be necessary to enable the head of any department or agency of the Federal Government charged with any duty of inspection, clearance, collection of taxes or duties, or other similar function, with respect to persons or property moving in air commerce, to acquire such space at public airports (as defined in the Federal Airport Act) as he determines, after consultation with the Administrator of the Federal Aviation Agency, to be necessary for

the performance of such duty. In acquiring any such space, the head of such department or agency shall act through the Administrator of General Services in accordance with the procedures established by law which are generally applicable to the acquisition of space to be used by departments and agencies of the Federal Government.'

"SEC. 10. The amendments made by this Act shall not apply with respect to projects for which amounts have been obligated by the execution of grant agreements before their enactment. With respect to such projects, the Federal Airport Act shall continue to apply as if this Act had not been enacted."

Mr. HARRIS. Mr. Speaker, I yield myself 10 minutes.

Mr. Speaker, if the Members will bear with me for just a few minutes, I think I can explain this situation with reference to the extension of the Federal aid to airports program. There is a question in disagreement here with which the Members of this House are vitally concerned. For that reason I would ask your attention while I undertake with the assistance of other members of the committee to bring this matter to you.

You are familiar with the fact that the House reported a bill extending the airport program for a period of 5 years, and it carried with it a concept of financing under the usual method of appropriations. That bill passed the House by an overwhelming vote but without a rollcall. The other provisions contained in the bill were not in serious disagreement.

The Senate has returned the House bill with a good many changes, including a change in the method of financing which would permit the continuation of the present program of contractual authority, that is, by authorizing the Administrator of the Federal Aviation Agency to make grant agreements with airport sponsors in advance of appropriations.

As may be noted from the conference report, the conferees met and after several meetings and rather extensive consideration and argument came to no agreement. We have just reported the disagreement to the House. The conferees are offering here now a substitute bill. We hope that the other body will accept this substitute.

The bill as passed by the House authorized a 5-year program of grants to sponsors at the rate of $75 million a year or a total of $375 million. The amount contained in the bill as it passed the Senate was the same. The difference is that the House bill authorized appropriations while the Senate proposed to extend the present method of making grant agreements in advance of appropriations.

There are some minor differences in the Senate and the House versions, which I will explain.

The House conferees were willing to go along in general with these Senate amendments but could not agree to the Senate method of providing funds for the program. A suggestion was advanced, incidentally by me, in the conference, and discussed, to accept the Senate provision on grant agreements with the provision that the Administrator must submit to the House and Senate Committees on Appropriations a list of projects to receive Federal grants, with such commitments to become final, if not disapproved, within 60 days by either committee. But a majority of the House conferees would not go along with this suggestion. I might say there also was some reluctance on the part of some of the conferees of the other body.

After consultation, this substitute proposal has been worked out which would retain the House method of providing funds, but limiting the program to 3 years. This, perhaps, might—and I emphasize the word "might"—offer a basis of compromise between the two bodies.

Sponsors in the hearings said they needed a minimum of 18 months to make plans and financial arrangements to participate in the Federal airport program. It would appear that to permit orderly planning, funds must be made available at least 2 years in advance. The reason we adopted the advance commitment in 1955 was to give sponsors advance knowledge of the availability of funds to permit long-range planning.

In addition to that reason, I might say in all frankness, the appropriation for the program had gone down year after year and finally reached exactly zero. If we authorize appropriations for a 3-year program, as provided in this substitute, and an appropriation is made this session for 2 years, that is the total of $150 million—$75 million a year for 2 years—and then followed at the next session by another appropriation of an additional $75 million for the following year, the sponsors then would be assured, in my opinion, of sufficient time for advance planning.

I might mention, if this were to be done, the agency can obligate or enter into agreements of only $75 million a year. If this proves satisfactory, Mr. Speaker, we could come back in 1963 with a simple extension to complete the 5-year program. In other words, what we are saying is that this is an opportunity to see that this regular method of providing funds can carry on the program as the Congress intends, because of this great issue and because there is so much feeling on the part of the membership of the House as well in other areas throughout the country. Everyone is of the opinion, and we are together on that, as to the need for continuation of the airport construction program. It is a necessity, and as a matter of fact, it is imperative that we have an additional airport construction program. But, if during this 3-year period the plan proposed in this substitute is not satisfactory and does not work out to permit the program to be carried on, then we can come back and consider some other approach to it, if not the present method. But, at least this is an opportunity to see and to demonstrate that this regular method now can be effectuated and carry out this program as the Congress intends.

I would like to make it clear that we have no assurance that the other body will accept this 3-year extension program.

The Senate conferees absolutely refused to accept the House provision authorizing appropriations for 5 years. They pointed out to us that in the other body they had a rollcall vote on the question and the vote was 73 to 9. In other words, they have had a vote on the issue on the record, and it will be our intention here in the House today to have a rollcall vote on this provision, so we can have a record of the votes in the House on the provision. And, I will say that those who want to insist that we continue the contractual grant agreement program should vote "No" on this proposal and those who want to insist that we again adopt the procedure of regular appropriations should vote "Yes" on this substitute. I think that is the only way that we can show for the record what the actual feeling is of the membership of the House.

On the other hand, when we passed the airport bill the House did not take a record vote, if you will recall, on the proposal, but if the House insists on financing this program by appropriations, the substitute offered today, if not accepted by the Senate, would give us something new to consider in the conference. I hope it will not be necessary to go to conference. There simply, in my judgment, is no use going back to a conference on the diametrically opposed provisions of the Senate and the House bills as they now stand.

Except for the method of financing the program, the pending substitute generally accepts the Senate amendment to the bill passed by the House. The amendment passed by the Senate included a provision for Hawaii. The substitute accepts that proposal. The House bill authorized an appropriation of $1.5 million a year, 65 percent going to Puerto Rico and 35 percent to the Virgin Islands. The Senate amendment permits Hawaii to share in this $1.5 million with the fund being divided 40 percent to Hawaii, 40 percent to Puerto Rico, and 20 percent to the Virgin Islands.

Under the 2-year extension of the program voted in 1959, Alaska, Hawaii, Puerto Rico, and the Virgin Islands shared in a $3 million annual allocation, divided as follows: 45 percent to Alaska, 25 percent to Hawaii, 20 percent to Puerto Rico, and 10 percent to the Virgin Islands. This made the following amounts available: Alaska, $1,350,000; Hawaii, $750,000; Puerto Rico, $600,000; Virgin Islands, $300,000.

Under the Senate amendment, as included in the substitute, Hawaii would get $600,000 annually of the $1.5 million fund. Puerto Rico would get $600,000, and the Virgin Islands $300,000.

Under the House bill, Hawaii's apportionment as a State would be $131,618, which it still would receive under the Senate proposal. This added to the $600,000 available from the special fund still would be short of the $750,000 a year Hawaii has been getting under the old formula.

The other body felt that Hawaii is entitled to this special treatment because water areas, which complicate the State's transportation problems, were not taken into consideration in the apportionment formula, which is based on a State's population and land area. The Senate

bill would make Puerto Rico and the Virgin Islands eligible for grants from the discretionary fund. This would permit the Administrator to take care of any emergency which might result from the revision of the distribution formula.

The House bill includes an amendment offered by the gentleman from New York [Mr. DEROUNIAN], which, in effect, would require approval of the Board of Supervisors of Nassau County, N.Y., before any funds under the bill could be made available for any project in Nassau County.

The Senate adopted a substitute for this language, which is general in nature, applicable to all projects and which reads:

> No project shall be approved by the Administrator unless he is satisfied that fair consideration has been given to the interest of communities in or near which such project may be located.

The Senate also included an amendment to make special reservations for Government purposes eligible for discretionary funds. Under present law Federal agencies may apply for discretionary funds for airport projects, in national parks, recreation areas, monuments, or forests. The Senate amendment would in effect extend existing authority to the Pribilof Islands, so that a field could be built on one of the islands in the Bering Sea.

The Senate also has an amendment to permit the head of a Federal agency charged with any duty of inspection, clearance, collection of duties, or other similar functions to obtain space at public airports necessary for the performance of such duties.

The proposed substitute includes a rewritten provision of that amendment.

Mr. Speaker, that generally explains this substitute, and I again repeat that we are proposing here a forward funding program through the regular direct appropriation route. It is the intention, as we have gone into it and discussed it with members of the appropriate committee, that in the first appropriation this year forward funding for 2 years would be provided. That is a total of $150 million, out of which grant agreements can be entered into to an extent of $75 million a year, thus permitting the carrying out of long-range plans, by providing in advance funds necessary for these sponsoring municipalities to arrange to finance their projects. That is simply and factually just what is proposed here, and we feel that the Congress should approve it, and carry it out; and it is our hope and our desire that it will be adhered to. Then we will again be doing away with this whole issue of so-called back-door spending which has been with us so long. Under the proposed substitute the Appropriations Committee will have a review of the program before the commitments and obligations are made.

We think that is as it should be and as intended. I hope to see this work out satisfactorily.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. You are advocating that the House adhere to its opposition to the so-called back-door spending?

Mr. HARRIS. I am trying to.

Mr. HOFFMAN of Michigan. If we have long-range planning how can we keep the policy of going to the Appropriations Committee without repudiating the planning boys?

Mr. HARRIS. No plan can be consummated until the appropriation is made under this provision.

The Government cannot go out and make promises in advance of appropriations.

Mr. HOFFMAN of Michigan. Yes, but representatives of the Government do make promises.

Mr. HARRIS. Not in this; and this has nothing to do with any other program. This is a domestic program. In my judgment we should do as much for our own people as we are doing for people in other countries throughout the world.

Mr. HOFFMAN of Michigan. What is that?

Mr. HARRIS. I thought the gentleman would agree with me on that.

Mr. HOFFMAN of Michigan. Yes, but it is a new philosophy, is it not?

Mr. HARRIS. It is not new with me.

Mr. HOFFMAN of Michigan. Seriously, if the administration, whichever party is in power, or some top representative promises another nation something, are we not bound or is not a subsequent Congress bound, by that promise, not legally but morally, to make good on that promise?

Mr. HARRIS I can say to the gentleman practically, legally, or any other way there is no way under this bill to make commitments under this program until an appropriation has been made.

Mr. HOFFMAN of Michigan. That is fine, if that be the result.

Mr. HARRIS. Once the appropriation has been made, they can then obligate those appropriated funds up to $75 million a year, and funds appropriated remain available until expended.

Mr. HOFFMAN of Michigan. Do I vote "yes" or "no" to help out on the gentleman's substitute?

Mr. HARRIS. I am going to vote "yes" because I have offered the substitute. I think it is the only way I can see at this moment of getting a bill in keeping with the ideas that an overwhelming majority of this House would like.

Mr. HOFFMAN of Michigan. Is that the next record vote that is coming up?

Mr. HARRIS. Yes.

Mr. HOFFMAN of Michigan. Then I vote "yea"?

Mr. HARRIS. I trust the gentleman will vote "yes."

The SPEAKER pro tempore. The time of the gentleman from Arkansas has expired.

Mr. HARRIS. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois [Mr. SPRINGER].

Mr. SPRINGER. Mr. Speaker, I do not know that the chairman made it absolutely clear where we are today. We did have a conference. We were in disagreement on several matters, most of which were minor, and we have ironed those out. There is, however, one fundamental difference between the House bill and the Senate bill, and that was the method of financing.

The Senate bill came in with the same number of years that we did. The Senate, however, retained the power of the Administrator to borrow from the Treasury. This is commonly known as back-door spending. This was the Senate version, not the House version. The House version is that we appropriate, then we spend.

This was the point of disagreement between the House and Senate. We did not yield to the Senate on that point. All of the conferees on the Senate side were in agreement they wanted to retain this feature. We did say we would come back to the House and recommend that the program be for 3 years on this kind of a pay-as-you-go basis instead of 5 years. If this passes the House today we will send it over to the Senate, and they can do what they want to do with it. They can either pass it or ask for another conference. It is either 3 years or nothing, as far as I am concerned. Three years I think is the minimum this program ought to be carried out on.

It is possible for the Administrator of the FAA to plan new programs, but he must come to the Appropriations Committee and get the appropriations first. It has been very well understood that there has to be some leadtime. In other words, you do not construct airports on a 12-month basis. Where you have a bond issue to be considered, 24 months leadtime is essential. I think it ought to be appropriated to the Administrator for that period. If the Appropriations Committee makes 24 months leadtime the rule, it will be possible for the Administrator to plan well ahead on the program and to bring it out.

Mr. LAIRD. Mr. Speaker, will the gentleman yield?

Mr. SPRINGER. I yield to the gentleman from Wisconsin.

Mr. LAIRD. This procedure has worked out very well with the Hill-Burton hospital program, and it should work out very well here.

Mr. SPRINGER. There is no reason why this could not be worked out under the program we are presenting to you today. I believe it is a good arrangement, and you certainly ought to approve it today.

Mr. HARRIS. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois [Mr. COLLIER].

Mr. COLLIER. Mr. Speaker, I take this time—and I will not take the full 5 minutes allotted me—to direct my remarks to a memorandum which I presume every Member of this House received, and one which I am sure carried a lot of weight, and properly so, with every Member of the House in connection with this legislation. I refer to the memorandum on this bill, dated September 7, which came from the U.S. Conference of Mayors and the Airport Operators' Council.

Mr. Speaker, in that memorandum—and I shall not elaborate on it—they pointed to four or five specific reasons

why the original bill and the Senate version of the bill was in their opinion necessary in meeting the airport construction needs of the Nation. However, I wanted to make it clear that in going through each point set forth in the memorandum from the Council of Mayors and from the Airport Operators' Association that in the proposal that we bring before you today with the 3 years of advance financing, we meet each and every one of them. In fact, in some instances the fact that the 3 years of funds will be available in advance should, I believe, make the program even more effective under this the 5-year back-door financing proposal. At the same time we steer entirely away from the contract authority approach which I am sure many Members of this House—as reflected in the temper of the House when the foreign aid bill came before us—would prefer to do in dealing with this legislation.

Mr. YOUNGER. Mr. Speaker, will the gentleman yield?

Mr. COLLIER. I yield to the gentleman from California.

Mr. YOUNGER. Mr. Speaker, I want to associate myself with the conference committee and congratulate them for standing firm on the committee and House position.

Mr. COLLIER. I thank the gentleman from California.

Mr. HARRIS. Mr. Speaker, I yield such time as he may require to the chairman of the subcommittee, the gentleman from Mississippi [Mr. WILLIAMS].

Mr. WILLIAMS. Mr. Speaker, I support the proposal that has been offered by the chairman of my committee. However, there was some concern expressed on the part of Members regarding the question of whether or not sufficient leadtime will be given by the Appropriations Committee in order to permit a system of orderly planning in the development of this program. I do not see the chairman of the Subcommittee on Appropriations on the floor at the moment. However, I may say that he has authorized me to inform the House that he will recommend appropriations for a minimum of 2 years, which should meet the needs for advanced planning time, which need was established in testimony of witnesses before our subcommittee.

Mr. CORMAN. Mr. Speaker, I rise in opposition to the committee amendment. As I understand the distinguished gentleman from Arkansas, the committee chairman, he desires an expression of opinion from Members of the House concerning the matter of future borrowing authority as was provided in the Senate version of the airports bill. It is further my understanding that a "no" vote at this time constitutes an endorsement of the Senate's proposed method of financing.

Statements concerning the tremendous projected growth of air travel have been made by a great number of experts and I would not presume to add my personal opinion except to note that in the expansion of metropolitan areas and their problems, planners themselves are normally passed up by statistics. No one questions the necessity for adequate ground facilities to handle this projected traffic, nor I would think is there any contention that the great cost for these installations should be borne solely by the local government responsible for the area in which they are located. It is true that there is advantage to local communities, their people, and their industry in the development of adequate airport facilities which attract a portion of air commerce.

This fact the city of Los Angeles recognized many years ago, and it has extended great local effort to provide itself and its visitors with the finest international airport in the world. But this airport, and its extensive and costly equipment, benefit not just the Los Angeles city taxpayer. They benefit every traveler who passes through our city, every shipper who wishes to deliver or receive the vast array of commodities which pass through this port of the air. It adds substantially to the wealth and strength of this whole Nation. A similar statement can be made for airport facilities everywhere. Accepting this fact, the Congress has wisely adopted legislation over the years creating a partnership between local governments and the Federal Government, so that each may pay a reasonable share of the substantial cost of such terminals. Our city has, to some degree, been benefited by this program.

But anyone familiar with the severe strain on the tax base of the large American city knows that it takes sound, detailed and long-range planning for cities to equip themselves with their portion of the matching funds for the program. To suppose that a city could accomplish such a feat on a year-to-year basis is folly. I would respectfully suggest that if the city as one partner must make long-range plans and firm commitments, the Federal Government's plans must be equally long range and firm if the two partners are to be able to work together efficiently and effectively.

The American taxpayer, whether he is paying city taxes, State taxes, or Federal taxes, is acutely aware of the fact that there are great demands at every level which must be met and which, I am certain, he is willing to meet.

But these demands place upon the legislator the highest responsibility for efficiency in these expenditures. For one-half of this city-Federal partnership to refuse to make firm commitments for periods longer than 1 year makes no sense to those responsible for the municipal portion of the financing, and I must say it makes no sense to me. I respectfully submit that firm, long-range commitments from both local and Federal Government are a necessity for an efficient program. For this reason I shall vote "no."

Mr. HARRIS. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the motion of the gentleman from Arkansas [Mr. HARRIS].

Mr. HARRIS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 398, nays 4, not voting 34, as follows:

[Roll No. 203]

So the motion was agreed to.

The Clerk announced the following pairs:

Mr. Hébert with Mr. Wilson of California.
Mr. Cooley with Mr. Robison.
Mr. Morrison with Mr. Hall.
Mr. Powell with Mr. Brown.
Mr. Rogers of Texas with Mr. Dooley.
Mr. St. Germain with Mr. Siler.
Mr. Fogarty with Mr. Garland.
Mr. Brooks of Louisiana with Mr. Westland.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AMENDING THE IMMIGRATION AND NATIONALITY ACT

Mr. WALTER. Mr. Speaker, I call up the conference report on the bill (S. 2237) to permit the entry of certain eligible alien orphans, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 1172)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2237) to permit the entry of certain eligible alien orphans, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and agree to the same with the following amendment: In lieu of the matter proposed to be inserted by the House amendment insert the following:

"That section 101(b) of the Immigration and Nationality Act (8 U.S.C. 1101) is hereby amended by adding the following new subparagraph (6):

"'(6) The term "eligible orphan" means any alien child under the age of fourteen at the time at which the visa petition is filed pursuant to section 205(b) who is an orphan because of the death or disappearance of both parents, or because of abandonment, or desertion by, or separation or loss from, both parents, or who has only one parent due to the death or disappearance of, abandonment, or desertion by, or separation or loss from the other parent, and the remaining parent is incapable of providing care for such orphan and has in writing irrevocably released him for emigration and adoption.'

"SEC. 2. Section 101(b)(1) of the Immigration and Nationality Act (8 U.S.C. 1101) is hereby amended by adding the following:

"'(F) a child who is an eligible orphan, adopted abroad by a United States citizen and spouse or coming to the United States for adoption by a United States citizen and spouse: *Provided*, That no natural parent or prior adoptive parent of any such child shall thereafter, by virtue of such parentage be accorded any right, privilege, or status under this Act.'

"SEC. 3. (a) Section 205(b) of the Immigration and Nationality Act (8 U.S.C. 1155) is hereby amended to read as follows:

"'(b) Any citizen of the United States claiming that any immigrant is his spouse or child and that such immigrant is entitled to a nonquota immigrant status under section 101(a)(27)(A), or any citizen of the United States claiming that any immigrant is his parent or unmarried son or unmarried daughter and that such immigrant is entitled to a quota immigrant status under section 203(a)(2), or any alien lawfully admitted for permanent residence claiming that any immigrant is his spouse or his unmarried son or his unmarried daughter and that such immigrant is entitled to a quota immigrant status under section 203(a)(3), or any citizen of the United States claiming that any immigrant is his brother or sister or his married son or his married daughter and that such immigrant is entitled to a preference under section 203(a)(4) may file a petition with the Attorney General. No petition for quota immigrant status or a preference in behalf of a son or daughter under paragraph (2), (3), or (4) of section 203(a) of the Immigration and Nationality Act shall be approved by the Attorney General unless the petitioner establishes that he is a parent as defined in section 101(b)(2) of the Immigration and Nationality Act of the alien in respect to whom the petition is made, except that no such petition shall be approved if the beneficiary thereof is an alien defined in section 101(b)(1)(F). No petition for nonquota immigrant status in behalf of a child as defined in section 101(b)(1)(F) shall be approved by the Attorney General unless the petitioner establishes to the satisfaction of the Attorney General that the petitioner and spouse will care for such child properly if he is admitted to the United States, and (i) in the case of a child adopted abroad, that the petitioner and spouse personally saw and observed the child prior to or during the adoption proceedings, and (ii) in the case of a child coming to the United States for adoption, that the petitioner and spouse have complied with the preadoption requirements, if any, of the State of such child's proposed residence. The petition shall be in such form and shall contain such information and be supported by such documentary evidence as the Attorney General may by regulations prescribe. The petition shall be made under oath administered by any individual having authority to administer oaths, if executed in the United States, but, if executed outside the United States, administered by an immigration officer or a consular officer.'

"(b) The second sentence of section 205(c) of the Immigration and Nationality Act (8 U.S.C. 1155) is hereby amended to read: 'Not more than two such petitions may be approved for one petitioner in behalf of a child as defined in section 101(b)(1)(E) or (F), unless necessary to prevent the separation of brothers and sisters.'

"SEC. 4. The first sentence of section 221(c) of the Immigration and Nationality Act (8 U.S.C. 1201) is hereby amended to read: 'An immigrant visa shall be valid for such period, not exceeding four months, as shall be by regulations prescribed, except that any visa issued to a child lawfully adopted by a United States citizen and spouse while such citizen is serving abroad in the United States Armed Forces, or is employed abroad by the United States Government, or is temporarily abroad on business, shall be valid until such time, for a period not to exceed three years, as the adoptive citizen parent returns to the United States in due course of his service, employment, or business.'

"SEC. 5. (a) Title I of the Immigration and Nationality Act (8 U.S.C. 1101) is hereby amended by adding the following:

"'JUDICIAL REVIEW OF ORDERS OF DEPORTATION AND EXCLUSION

"'SEC. 106. (a) The procedure prescribed by, and all the provisions of the Act of December 29, 1950, as amended (64 Stat. 1129; 68 Stat. 961; 5 U.S.C. 1031 et seq.), shall apply to, and shall be the sole and exclusive procedure for, the judicial review of all final orders of deportation heretofore or hereafter made against aliens within the United States pursuant to administrative proceedings under section 242(b) of this Act or comparable provisions of any prior Act, except that—

"'(1) a petition for review may be filed not later than six months from the date of the final deportation order or from the effective date of this section, whichever is the later.

"'(2) the venue of any petition for review under this section shall be in the judicial circuit in which the administrative proceedings before a special inquiry officer were conducted in whole or in part, or in the judicial circuit wherein is the residence, as defined in this Act, of the petitioner, but not in more than one circuit;

"'(3) the action shall be brought against the Immigration and Naturalization Service, as respondent. Service of the petition to review shall be made upon the Attorney General of the United States and upon the official of the Immigration and Naturalization Service in charge of the Service district in which the office of the clerk of the court is located. The service of the petition for review upon such official of the Service shall stay the deportation of the alien pending determination of the petition by the court, unless the court otherwise directs;

"'(4) except as provided in clause (B) of paragraph (5) of this subsection, the petition shall be determined solely upon the administrative record upon which the deportation order is based and the Attorney General's findings of fact, if supported by reasonable, substantial, and probative evidence on the record considered as a whole, shall be conclusive;

"'(5) whenever any petitioner, who seeks review of an order under this section, claims to be a national of the United States and makes a showing that his claim is not frivolous, the court shall (A) pass upon the issues presented when it appears from the pleadings and affidavits filed by the parties that no genuine issue of material fact is presented; or (B) where a genuine issue of material fact as to the petitioner's nationality is presented, transfer the proceedings to a United States district court for the district where the petitioner has his residence for hearing de novo of the nationality claim and determination as if such proceedings were originally initiated in the district court under the provisions of section 2201 of title 28, United States Code. Any such petitioner shall not be entitled to have such issue determined under section 360(a) of this Act or otherwise;

"'(6) if the validity of a deportation order has not been judicially determined, its validity may be challenged in a criminal proceeding against the alien for violation of subsection (d) or (e) of section 242 of this Act only by separate motion for judicial review before trial. Such motion shall be determined by the court without a jury and before the trial of the general issue. Whenever a claim to United States nationality is made in such motion, and in the opinion of the court, a genuine issue of material fact as to the alien's nationality is presented, the court shall accord him a hearing de novo on the nationality claim and determine that issue as if proceedings had been initiated under the provisions of section 2201 of title 28, United States Code. Any such alien shall not be entitled to have such issue determined under section 360(a) of this Act or otherwise. If no such hearing de novo as to nationality is conducted, the determination shall be made solely upon the administrative record upon which the deportation order is based and the Attorney General's findings of fact, if supported by reasonable, substantial and probative evidence on the record considered as a whole, shall be conclusive. If the deportation order is held invalid, the court shall dismiss the indictment and the United States shall have the right to appeal to the court of appeals within thirty days. The procedure on such appeals shall be as provided in the Federal rules of criminal procedure. No petition for review under this section may be filed by any alien during the pendency of a criminal proceeding against such alien for violation of subsection (d) or (e) of section 242 of this Act;

"'(7) nothing in this section shall be construed to require the Attorney General to defer deportation of an alien after the issuance of a deportation order because of the right of judicial review of the order granted by this section, or to relieve any alien from compliance with subsections (d) and (e) of section 242 of this Act. Nothing contained in this section shall be construed to preclude the Attorney General from detaining or continuing to detain an alien or from taking him into custody pursuant to subsection (c) of section 242 of this Act at any time after the issuance of a deportation order;

"'(8) it shall not be necessary to print the record or any part thereof, or the briefs, and the court shall review the proceedings on a typewritten record and on typewritten briefs; and

"'(9) any alien held in custody pursuant to an order of deportation may obtain judicial review thereof by habeas corpus proceedings.

"'(b) Notwithstanding the provisions of any other law, any alien against whom a final order of exclusion has been made heretofore or hereafter under the provisions of section 236 of this Act or comparable provisions of any prior Act may obtain judicial review of such order by habeas corpus proceedings and not otherwise.

"'(c) An order of deportation or of exclusion shall not be reviewed by any court if the alien has not exhausted the administrative remedies available to him as of right under the immigration laws and regulations or if he has departed from the United States after the issuance of the order. Every petition for review or for habeas corpus shall state whether the validity of the order has been upheld in any prior judicial proceeding, and, if so, the nature and date thereof, and the court in which such proceeding took place. No petition for review or for habeas corpus shall be entertained if the validity of the order has been previously determined in any civil or criminal proceeding, unless the petition presents grounds which the court finds could not have been presented in such prior proceeding, or the court finds that the remedy provided by such prior proceeding was inadequate or ineffective to test the validity of the order.'

"(b) This section shall take effect on the thirtieth day after its approval and, notwithstanding the provisions of any other law, including section 405 of the Immigration and Nationality Act, shall then be applicable to all administrative proceedings involving deportation or exclusion of aliens notwithstanding (1) that the person involved entered the United States prior to the effective date of this section or of the Immigration and Nationality Act or (2) that the administrative proceeding was commenced or conducted prior to the effective date of this section or of the Immigration and Nationality Act. Any judicial proceeding to review an order of deportation which is pending unheard in any district court of the United States on the effective date of this section (other than a habeas corpus or criminal proceeding in which the validity of the deportation order has been challenged) shall be transferred for determination in accordance with this section to the court of appeals having jurisdiction to entertain a petition for review under this section. Any judicial proceeding to review an order of exclusion which is pending unheard on the effective date of this section shall be expedited in the same manner as is required in habeas corpus. All laws or parts of laws inconsistent with this section are, to the extent of such inconsistency, repealed. If any particular provision of this section, or the application thereof to any person or circumstance, is held invalid, the remainder of this section and the application of such provision to other persons or circumstances shall not be affected thereby.

"SEC. 6. Section 222 of the Immigration and Nationality Act (8 U.S.C. 1202) is hereby amended by deleting from subsection (a) the language 'race and ethnic classification;', and by deleting from subsection (c) the language 'his race and ethnic classification:'.

"SEC. 7. (a) Section 101(d)(1) of the Immigration and Nationality Act (8 U.S.C. 1101) is hereby amended by inserting immediately after 'December 31, 1946,' the following: 'or from June 25, 1950, to July 1, 1955,'.

"(b) Section 101(d)(2) of the Immigration and Nationality Act (8 U.S.C. 1101) is hereby amended (1) by striking out 'and (C)' and inserting in lieu thereof '(C)', and (2) by inserting immediately after 'December 31, 1946' the following: '; and (D) the term "Korean hostilities" relates to the period from June 25, 1950, to July 1, 1955'.

"SEC. 8. (a) Section 329(a) of the Immigration and Nationality Act (8 U.S.C. 1440) is amended by inserting after 'December 31, 1946,' the following: 'or during a period beginning June 25, 1950, and ending July 1, 1955,'.

"(b) Section 329(b)(4) of the Immigration and Nationality Act (8 U.S.C. 1440) is hereby amended by inserting after 'December 31, 1946,' the following: 'or during a period beginning June 25, 1950, and ending July 1, 1955,'.

"SEC. 9. Section 202(e) of the Immigration and Nationality Act (8 U.S.C. 1152) is hereby amended to read as follows:

"'(e) After the determination of quotas has been made as provided in section 201, revision of the quotas shall be made by the Secretary of State, the Secretary of Commerce, and the Attorney General, jointly, whenever necessary, to provide for any change of boundaries resulting in transfer of territory from one sovereignty to another, a change of administrative arrangements of a colony or other dependent area, or any other political change, requiring a change in the list of quota areas or of the territorial limits thereof. In the case of any change in the territorial limits of quota areas, not requiring a change in the quotas for such areas, the Secretary of State shall, upon recognition of such change, issue appropriate instructions to all consular offices concerning the change in the territorial limits of the quota areas involved. Whenever one or more colonies or other component or dependent areas overseas from the governing country, or one or more quota areas have been subject to a change of administrative arrangements, a change of boundaries, or any other political change, the annual quota of the newly established quota area or the number of visas authorized to be issued under section 202(c)(1), notwithstanding any other provisions of this Act, shall not be less than the sum total of quotas in effect or number of visas authorized for the area immediately preceding the change of administrative arrangements, change of boundaries, or other political change.'

"SEC. 10. Section 205(c) of the Immigration and Nationality Act (8 U.S.C. 1155) is hereby amended by adding at the end thereof the following new sentence: 'Notwithstanding the provisions of this subsection, no petition shall be approved if the alien previously has been accorded, by reason of marriage determined by the Attorney General to have been entered into for the purpose of evading the immigration laws—

"'(1) a nonquota status under section 101(a)(27)(A) as the spouse of a citizen of the United States, or

"'(2) a preference quota status under section 203(a)(3) as the spouse of an alien lawfully admitted for permanent residence.'

"SEC. 11. Section 212(a)(6) of the Immigration and Nationality Act (8 U.S.C. 1182) is hereby amended to read as follows:

"'(6) Aliens who are afflicted with any dangerous contagious disease;'.

"SEC. 12. Section 212 of the Immigration and Nationality Act (8 U.S.C. 1182) is hereby amended by adding the following additional subsection:

"'(f) Any alien afflicted with tuberculosis in any form who (A) is the spouse or the unmarried son or daughter, or the minor unmarried lawfully adopted child, of a United States citizen, or of an alien lawfully admitted for permanent residence, or of an alien who has been issued an immigrant visa, or (B) has a son or daughter who is a United States citizen, or an alien lawfully admitted for permanent residence, or an alien who has been issued an immigrant visa, shall, if otherwise admissible, be issued a visa and admitted to the United States for permanent residence in accordance with

such terms, conditions, and controls, if any, including the giving of a bond, as the Attorney General, in his discretion after consultation with the Surgeon General of the United States Public Health Service, may by regulations prescribe.'

"SEC. 13. Section 212(a)(9) of the Immigration and Nationality Act (8 U.S.C. 1182) is hereby amended by changing the semicolon at the end to a period, and adding thereafter the following: 'Any alien who would be excludable because of the conviction of a misdemeanor classifiable as a petty offense under the provisions of section 1(3) of title 18, United States Code, by reason of the punishment actually imposed, or who would be excludable as one who admits the commission of an offense that is classifiable as a misdemeanor under the provisions of section 1(2) of title 18, United States Code, by reason of the punishment which might have been imposed upon him, may be granted a visa and admitted to the United States if otherwise admissible: *Provided*, That the alien has committed only one such offense, or admits the commission of acts which constitute the essential elements of only one such offense.'

"SEC. 14. Section 212 of the Immigration and Nationality Act (8 U.S.C. 1182) is hereby amended by adding the following additional subsection:

"'(g) Any alien, who is excludable from the United States under paragraphs (9), (10), or (12) of this section, who (A) is the spouse or child, including a minor unmarried adopted child, of a United States citizen, or of an alien lawfully admitted for permanent residence, or (B) has a son or daughter who is a United States citizen or an alien lawfully admitted for permanent residence, shall, if otherwise admissible, be issued a visa and admitted to the United States for permanent residence (1) if it shall be established to the satisfaction of the Attorney General that (A) the alien's exclusion would result in extreme hardship to the United States citizen or lawfully resident spouse, parent, or son or daughter of such alien, and (B) the admission to the United States of such alien would not be contrary to the national welfare, safety, or security of the United States; and (2) if the Attorney General, in his discretion, and pursuant to such terms, conditions, and procedures as he may by regulations prescribe, has consented to the alien's applying or reapplying for a visa and for admission to the United States.'

"SEC. 15. Section 212 of the Immigration and Nationality Act (8 U.S.C. 1182) is hereby amended by adding the following additional subsection:

"'(h) Any alien who is the spouse, parent, or child of a United States citizen or of an alien lawfully admitted for permanent residence and who is excludable because (1) he seeks, has sought to procure, or has procured, a visa or other documentation, or entry into the United States, by fraud or misrepresentation, or (2) he admits the commission of perjury in connection therewith, may be granted a visa and admitted to the United States for permanent residence, if otherwise admissible, if the Attorney General in his discretion has consented to the alien's applying or reapplying for a visa and for admission to the United States.'

"SEC. 16. Section 241 of the Immigration and Nationality Act (8 U.S.C. 1251) is hereby amended by adding the following:

"'(f) The provisions of this section relating to the deportation of aliens within the United States on the ground that they were excludable at the time of entry as aliens who have sought to procure, or have procured visas or other documentation, or entry into the United States by fraud or misrepresentation shall not apply to an alien otherwise admissible at the time of entry who is the spouse, parent, or a child of a United States citizen or of an alien lawfully admitted for permanent residence.'

"SEC. 17. Section 310 of the Immigration and Nationality Act (8 U.S.C. 1421) is hereby amended by adding the following additional subsection:

"'(e) Notwithstanding the provisions of section 405(a), any petition for naturalization filed on or after the enactment of this subsection shall be heard and determined in accordance with the requirements of this title.'

"SEC. 18. (a) Section 340(a) of the Immigration and Nationality Act (66 Stat. 260; 8 U.S.C. 1451(a)) is hereby amended by inserting, following the language 'that such order and certificate of naturalization' the language 'were illegally procured or'.

"(b) Section 340(b) of the Immigration and Nationality Act (66 Stat. 260; 8 U.S.C. 1451(b)) is hereby amended by inserting, immediately preceding the word 'procured', the language 'illegally procured or'.

"SEC. 19. Section 349 of the Immigration and Nationality Act (8 U.S.C. 1481) is hereby amended by adding the following subsection:

"'(c) Whenever the loss of United States nationality is put in issue in any action or proceeding commenced on or after the enactment of this subsection under, or by virtue of, the provisions of this or any other Act, the burden shall be upon the person or party claiming that such loss occurred, to establish such claim by a preponderance of the evidence. Except as otherwise provided in subsection (b), any person who commits or performs, or who has committed or performed, any act of expatriation under the provisions of this or any other Act shall be presumed to have done so voluntarily, but such presumption may be rebutted upon a showing, by a preponderance of the evidence, that the act or acts committed or performed were not done voluntarily.'

"SEC. 20. Section 354(4) of the Immigration and Nationality Act (8 U.S.C. 1486) is hereby amended to read as follows:

"'(4) who has attained the age of sixty years, and has had a residence outside of the United States and its outlying possessions for not less than ten years, during all of which period he has been engaged in an occupation of the type designated in paragraphs (1), (2), or (4) of section 353, or paragraph (2) of this section, and who is in bona fide retirement from such occupation; or who is the spouse or child of the national described in this paragraph and who has his residence abroad for the purpose of being with such American citizen spouse or parent; or'.

"SEC. 21. The language 'CHAPTER 3—ISSUANCE ON ENTRY DOCUMENTS' of the table of contents of the Immigration and Nationality Act, as amended, is hereby amended to read as follows:

"'CHAPTER 3—ISSUANCE OF ENTRY DOCUMENTS'

"SEC. 22. (a) The title preceding section 212 of the Immigration and Nationality Act, as amended, is hereby amended to read as follows:

"'GENERAL CLASSES OF ALIENS INELIGIBLE TO RECEIVE VISAS AND EXCLUDED FROM ADMISSION; WAIVERS OF INADMISSIBILITY'

"(b) The title preceding section 329 of the Immigration and Nationality Act, as amended, is amended to read as follows:

"'NATURALIZATION THROUGH ACTIVE-DUTY SERVICE IN ARMED FORCES DURING WORLD WAR I OR WORLD WAR II OR THE KOREAN HOSTILITIES'

"SEC. 23. (a) The table of contents (TITLE I—GENERAL) of the Immigration and Nationality Act is hereby amended by adding the following:

"'Sec. 106. Judicial review of orders of deportation and exclusion.'

"(b) Section 212 of the table of contents of the Immigration and Nationality Act is hereby amended to read as follows:

"'Sec. 212. General classes of aliens ineligible to receive visas and excluded from admission; waivers of inadmissibility.'

"(c) Section 329 of the table of contents of the Immigration and Nationality Act, is hereby amended to read as follows:

"'Sec. 329. Naturalization through active-duty service in Armed Forces during World War I or World War II or the Korean hostilities.'

"SEC. 24. (a) The following Acts and all amendments thereto and parts of Acts and all amendments thereto are repealed:

"(1) Section 4 of the Act of September 3, 1954 (68 Stat. 1145; 8 U.S.C. 1182a);

"(2) Section 4 of the Act of September 11, 1957 (71 Stat. 639–640; 8 U.S.C. 1205);

"(3) Sections 5, 6, and 7 of the Act of September 11, 1957 (71 Stat. 640–641; 8 U.S.C. 1182b; 8 U.S.C. 1182c; 8 U.S.C. 1251a);

"(4) Section 15 of the Act of September 11, 1957 (71 Stat. 643–644; 50 U.S.C. App. 1971a, note);

"(5) Sections 9 and 12 of the Act of September 11, 1957 (71 Stat. 641–642; 8 U.S.C. 1255a; 8 U.S.C. 1153, note);

"(6) Section 2 of the Act of August 21, 1958 (72 Stat. 699; 8 U.S.C. 1255; 8 U.S.C. 1153, note);

"(7) Sections 4 and 6 of the Act of September 22, 1959 (73 Stat. 644–645; 8 U.S.C. 1153, note).

"(b) Paragraphs (4), (5), (6), and (7) of subsection (a) of this section shall take effect upon the expiration of the one hundred and eightieth day immediately following the date of enactment of this Act.

"SEC. 25. (a) Any alien eligible for a quota immigrant status under the provisions of section 203(a) (2) or (3) of the Immigration and Nationality Act on the basis of a petition filed with the Attorney General prior to July 1, 1961, shall be held to be a nonquota immigrant and, if otherwise admissible under the provisions of that Act, shall be issued a nonquota immigrant visa: *Provided*, That, upon his application for an immigrant visa, and for admission to the United States, the alien is found to have retained his relationship to the petitioner, and status, as established in the approved petition.

"(b) At any time prior to the expiration of the one hundred and eightieth day immediately following the enactment of this Act a special nonquota immigrant visa may be issued to an eligible orphan as defined in section 4 of the Act of September 11, 1957, as amended (8 U.S.C. 1205; 71 Stat. 639, 73 Stat. 490, 74 Stat. 505), if a visa petition filed in behalf of such eligible orphan was (A) approved by the Attorney General prior to September 30, 1961, or (B) pending before the Attorney General prior to September 30, 1961, and the Attorney General approves such petition."

And the House agree to the same.

That the title of the bill be amended to read as follows: "An Act to amend the Immigration and Nationality Act; and for other purposes."

Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2237) to permit the entry of certain eligible alien orphans, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The language of the legislation agreed to differs from the language of the House amendment to S. 2237 in the following technical respects:

1. It is proposed in section 3(a) that immigration officers as well as consular officers may administer the oaths in connection with a petition.

2. In section 5(a) and section 21 the title of the new section 106 of the Immigration and Nationality Act was amended to conform with the provisions of the said section 106, to read:

"JUDICIAL REVIEW OF ORDERS OF DEPORTATION AND EXCLUSION"

3. In section 24(b) a provision regarding the deferred repeal of section 15 of the act of September 11, 1957, was agreed to.

4. In section 25 the dates of June 30, 1961, were changed to July 1, 1961 and September 30, 1961, respectively, so as to facilitate the processing of pending applications filed with, or approved by, the Attorney General.

FRANCIS E. WALTER,
MICHAEL A. FEIGHAN,
FRANK CHELF,
RICHARD H. POFF,
ARCH A. MOORE, Jr.,
Managers on the Part of the House.

The SPEAKER pro tempore. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

EXPANDING THE SALINE WATER CONVERSION PROGRAM

Mr. ASPINALL. Mr. Speaker, I call up the conference report on the bill (H.R. 7916) to expand and extend the saline water conversion program being conducted by the Secretary of the Interior, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

Mr. GROSS. Mr. Speaker, reserving the right to object, will the gentleman briefly explain what happened in conference?

Mr. ASPINALL. If the gentleman will yield to me I shall be pleased to.

The managers on the part of the House were able to get the conferees to stay very close to the language of the House bill. We did accept the amendment that had to do with patents which is similar to a provision heretofore adopted in the coal research legislation.

The Senate provided $100 million for a 10-year program. The House provided $50 million for a 5-year program. The committee on conference compromised on a 6-year program with a $75 million appropriation to be used for a basic and applied research program.

None of this money is to be used for demonstration plans. The Department will have to come back to the Congress of the United States if they desire any new demonstration plants.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. No. 1158)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7916) to expand and extend the saline water conversion program being conducted by the Secretary of the Interior, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment as follows: In lieu of the language inserted by the Senate amendment insert the following: "That the Act of July 3, 1952 (66 Stat. 328), as amended (42 U.S.C. 1951–1958), is further amended to read as follows:

"'SECTION 1. In view of the increasing shortage of usable surface and ground water in many parts of the Nation and the importance of finding new sources of supply to meet its present and future water needs, it is the policy of the Congress to provide for the development of practicable low-cost means for the large-scale production of water of a quality suitable for municipal, industrial, agricultural, and other beneficial consumptive uses from saline water, and for studies and research related thereto. As used in this Act, the term "saline water" includes sea water, brackish water, and other mineralized or chemically charged water, and the term "United States" extends to and includes the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States.

"'SEC. 2. In order to accomplish the purposes of this Act, the Secretary of the Interior shall—

"'(a) conduct, encourage, and promote fundamental scientific research and basic studies to develop the best and most economical processes and methods for converting saline water into water suitable for beneficial consumptive purposes;

"'(b) conduct engineering research and technical development work to determine, by laboratory and pilot plant testing, the results of the research and studies aforesaid in order to develop processes and plant designs to the point where they can be demonstrated on a large and practical scale;

"'(c) recommend to the Congress from time to time authorization for construction and operation, or for participation in the construction and operation, of a demonstration plant for any process which he determines, on the basis of subsections (a) and (b) above, has great promise of accomplishing the purposes of this Act, such recommendation to be accompanied by a report on the size, location, and cost of the proposed plant and the engineering and economic details with respect thereto;

"'(d) study methods for the recovery and marketing of commercially valuable byproducts resulting from the conversion of saline water; and

"'(e) undertake economic studies and surveys to determine present and prospective costs of producing water for beneficial consumptive purposes in various parts of the United States by the leading saline water processes as compared with other standard methods.

"'SEC. 3. In carrying out his functions under section 2 of this Act, the Secretary may—

"'(a) acquire the services of chemists, physicists, engineers, and other personnel by contract or otherwise;

"'(b) enter into contracts with educational institutions, scientific organizations, and industrial and engineering firms;

"'(c) make research and training grants;

"'(d) utilize the facilities of Federal scientific laboratories;

"'(e) establish and operate necessary facilities and test sites at which to carry on the continuous research, testing, development, and programing necessary to effectuate the purposes of this Act;

"'(f) acquire secret processes, technical data, inventions, patent applications, patents, licenses, land and interests in land (including water rights), plants and facilities, and other property or rights by purchase, license, lease, or donation;

"'(g) assemble and maintain pertinent and current scientific literature, both domestic and foreign, and issue bibliographical data with respect thereto;

"'(h) cause on-site inspections to be made of promising projects, domestic and foreign, and, in the case of projects located in the United States, cooperate and participate in their development in instances in which the purposes of this Act will be served thereby;

"'(i) foster and participate in regional, national, and international conferences relating to saline water conversion;

"'(j) coordinate, correlate, and publish information with a view to advancing the development of low-cost saline water conversion projects; and

"'(k) cooperate with other Federal departments and agencies, with State and local departments, agencies, and instrumentalities, and with interested persons, firms, institutions, and organizations.

"'SEC. 4. (a) Research and development activities undertaken by the Secretary shall be coordinated or conducted jointly with the Department of Defense to the end that developments under this Act which are primarily of a civil nature will contribute to the defense of the Nation and that developments which are primarily of a military nature will, to the greatest practicable extent compatible with military and security requirements, be available to advance the purposes of this Act and to strengthen the civil economy of the Nation. The fullest cooperation by and with Atomic Energy Commission, the Department of Health, Education, and Welfare, the Department of State, and other concerned agencies shall also be carried out in the interest of achieving the objectives of this Act.

"'(b) All research within the United States contracted for, sponsored, cosponsored, or authorized under authority of this Act, shall be provided for in such manner that all information, uses, products, processes, patents, and other developments resulting from such research developed by Government expenditure will (with such exceptions and limitations, if any, as the Secretary may find to be necessary in the interest of national defense) be available to the general public. This subsection shall not be so construed as to deprive the owner of any background patent relating thereto of such rights as he may have thereunder.

"'SEC. 5. (a) The Secretary may dispose of water and byproducts resulting from his operations under this Act. All moneys received from dispositions under this section shall be paid into the Treasury as miscellaneous receipts.

"'(b) Nothing in this Act shall be construed to alter existing law with respect to the ownership and control of water.

"'SEC. 6. The Secretary shall make reports to the President and the Congress at the beginning of each regular session of the action taken or instituted by him under the

provisions of this Act and of prospective action during the ensuing year.

"'SEC. 7. The Secretary of the Interior may issue rules and regulations to effectuate the purposes of this Act.

"'SEC. 8. There are authorized to be appropriated such sums, to remain available until expended, as may be necessary, but not more than $75,000,000 in all, (a) to carry out the provisions of this Act during the fiscal years 1962 to 1967, inclusive; (b) to finance, for not more than two years beyond the end of said period, such grants, contracts, cooperative agreements, and studies as may theretofore have been undertaken pursuant to this Act; and (c) to finance, for not more than three years beyond the end of said period, such activities as are required to correlate, coordinate, and round out the results of studies and research undertaken pursuant to this Act: *Provided*, That funds available in any one year for research and development may, subject to the approval of the Secretary of State to assure that such activities are consistent with the foreign policy objectives of the United States, be expended in cooperation with public or private agencies in foreign countries in the development of processes useful to the program in the United States: *And provided further*, That every such contract or agreement made with any public or private agency in a foreign country shall contain provisions effective to insure that the results or information developed in connection therewith shall be available without cost to the United States for the use of the United States throughout the world and for the use of the general public within the United States.'

"SEC. 2. Section 4 of the joint resolution of September 2, 1958 (72 Stat. 1707; 42 U.S.C. 1958 (d), is hereby amended to read:

"'The authority of the Secretary of the Interior under this joint resolution to construct, operate, and maintain demonstration plants shall terminate upon the expiration of twelve years after the date on which this joint resolution is approved. Upon the expiration of a period deemed adequate for demonstration purposes for each plant, but not to exceed such twelve-year period, the Secretary shall proceed as promptly as practicable to dispose of any plants so constructed by sale to the highest bidder, or as may otherwise be directed by Act of Congress. Upon such sale, there shall be returned to any State or public agency which has contributed financial assistance under section 3 of this joint resolution a proper share of the net proceeds of the sale.'"

And the Senate agree to the same.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7916) to expand and extend the saline water conversion program being conducted by the Secretary of the Interior, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report:

The conference committee accepted for the most part the language of the House-passed bill.

The conference committee agreed with the House position that Federal construction and operation of demonstration plants or participation in the construction and operation of demonstration plants should be authorized in separate legislation as the need develops and upon a determination of justification by the Secretary of the Interior and recommendation to the Congress. On the basis of this agreement the House language providing for this procedure was adopted in lieu of titles II and III in the Senate-passed bill.

With respect to the scope and life of an expanded research and development program the conference committee agreed upon a ceiling on expenditures of $75 million for the 6-year period fiscal year 1962 through fiscal year 1967. This compares with a ceiling of $50 million for a 5-year program in the House-passed bill and $100 million for a 10-year program in the Senate-passed bill. The conference committee reaffirmed the position taken by both the House and Senate committees that the Department should have flexibility in the use of these funds and that no year-by-year limitation is intended.

The conference committee adopted language in the Senate-passed bill relating to patents. The provision requires that all information, patents, processes, and other developments resulting from Federal expenditures under this program be available to the general public. An exception is made in those cases where the Secretary determines that the imposition of this requirement would not be in the interest of national defense.

The type of program needed was a matter discussed by the conference committee. There was general agreement by the conferees that the most pressing need at this time, in order to attain our goal of truly low-cost desalination, is a program of broad basic research to supply new ideas and basic data necessary for the development of new processes. While the legislation does not break down the amount authorized to be appropriated between basic research and applied research the conference committee agreed that emphasis should be placed upon basic or fundamental research and that there should be allocated to this phase of the program all the funds that can be efficiently and effectively used.

In connection with the question of how far a process could be carried forward under the language adopted in the conference report the conference committee discussed the definition of a pilot plant. In this legislation the committee is thinking of a pilot plant as the device or facility necessary to prove out on a process—to determine whether it will work and the problems involved. It is not intended to be a finished product and is subjected to various tests and further experimentation in order to improve the workability or solve problems that develop. In addition to determining and improving workability, its purpose is to produce technical knowledge and provide the necessary data and information for demonstration plant designs.

With respect to demonstration plant proposals to be submitted to the Congress pursuant to the language adopted in the conference report the House conferees want to again direct the attention of the Secretary of the Interior to the general guidelines which were suggested by the House committee for use in examining such proposals.

WAYNE N. ASPINALL,
LEO W. O'BRIEN,
WALTER ROGERS,
JOHN P. SAYLOR,
CRAIG HOSMER,
Managers on the Part of the House.

Mr. DADDARIO. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. DADDARIO. Mr. Speaker, the House should be aware that certain efforts are tending to undermine our Federal patent system—a system which has been one of the keystones of the free enterprise system for 170 years.

This is being done by a legislative clause with which the Senate has been amending research and development legislation during the past 2 years. It was passed in the Coal Research Act of last year. This year it has been placed in the Marine Sciences and Research Act, now pending before the House committee, and it has been added to the Saline Water Conversion Act, the conference version of which is before us.

The clause is not the result of recommendations on the part of the Judiciary Committees of the two Houses. It stems rather from the activities of the Senate Antimonopoly Subcommittee. Here is the way the clause reads:

All research within the United States contracted for, sponsored, cosponsored, or authorized under authority of this act, shall be provided for in such manner that all information, uses, products, processes, patents, and other developments resulting from such research developed by Government expenditure will (with such exceptions and limitations, if any, as the Secretary may find to be necessary in the interest of national defense) be available to the general public. This subsection shall not be construed as to deprive the owner of any background patent relating thereto of such rights as he may have thereunder.

Slight variations exist, depending on the purpose of the bill.

That language is being insisted upon by the chairman of the Senate subcommittee, because it has a worthwhile objective and appears to be relatively noncontroversial, it has been slipping through in the legislation mentioned.

To my mind, however, it represents a chipping away at a system which has been extremely valuable to America for a good many years. I do not make this statement lightly. I have been a member of, and presently chair, the Patent Subcommittee of the Committee on Science and Astronautics which for 2 years has been investigating the merits of Government or public ownership of inventions produced under Federal space research contracts. It is a very complex problem, and the solution to it certainly does not lie in a piecemeal effort to make all inventions produced in connection with Federal research free to the public at large.

We are deluding ourselves if we go on such an assumption, for the net result is that of a boomerang—we only hamper the research we are trying to buy. At the proper time, our committee will make a thorough report on this matter to the House.

I want to emphasize, however, that the clause under discussion is unnecessary, unwise, inadequately drawn, and impractical. Its net effect will be quite opposite what is intended.

It is unnecessary because in all its research contracts with private industry

the Federal Government retains a right to use, make or have made any invention or discovery arising therefrom—whether patented or not. This right is irrevocable and royalty-free. It is all the Federal Government, as such, can use. The commercial application of the invention, if any, cannot be exploited by the Government—so, except in rare cases where the national welfare or security is involved, or where the Government has initiated and paid for the technology involved from the very beginning, there is no need for this type of legislation so far as the National Government is concerned.

It is unwise because its effect, whether by design or otherwise, is to negate the philosophy and methods developed by the U.S. Constitution for the purpose of stimulating scientific invention and the advancement of the arts. That philosophy is based upon the proposition that a limited monopoly can be a useful thing. It recognizes certain truths of human nature. And so, in exchange for full public disclosure of the details of the invention, it gives the inventor the right to market his invention exclusively for a limited time. The legislation I am discussing, however, demands the contrary. It makes the invented concept not only free to the Government—which is as it should be when the Government helps pay for the development—but free to the general public as well. Yet so far as the constitutional concept is concerned, the fact that the Government may have contributed to the development of a good scientific idea by supporting it with research funds, does not at all justify taking commercial rights away from the inventor.

The clause is further unwise, in my judgment, because it sets precedents which are applicable not only to patents but to copyrights as well. Most of our finest writings, scientific and otherwise, would never see the light of day if it were not for the copyright. Are we prepared to accept the notion that all knowledge or thoughts developed in part through Government service or sponsorship cannot be copyrighted? I doubt it very much. Yet if we set such a precedent in regard to patents, the day may not be far away when the same thing will be inflexibly required from copyrights.

The clause is inadequately drawn for several reasons. It permits the Secretary of the Department involved to make exceptions to the general rule of free public availability in the interests of national defense. Such matters are already handled by statute—by the Inventions Secrecy Act in regard to patent application cases—by the National Security Act in regard to information, processes, and so forth, which are highly classified. The use of the phrase thus appears, at best, to be redundant. More important is the inclusion of the word "products" as one of the items which, if developed under the research contract, must be made available to the public. Now, under the terms of a Government research contract any prototypes or products developed are the property of the United States. How to make such products fully and freely available to the general public is a mystery. It would appear to be physically impossible. More than that, making products available to the general public is not and never has been a function of the Federal Government. If the intent is to assure that commercial products are made available to all manufacturers without royalty payments, then we are imposing a system of patent dedication or compulsory licensing—and I submit that this should not be done in any legislation without full debate by the House.

The clause is impractical since it will not have the effect which is intended. It will not result in more, better, and cheaper products being made available to the general public.

The research done by our subcommittee proves this beyond doubt. But, worse than that, it is very likely to hamstring or at least retard the very research it is designed to promote. This seems particularly true in regard to the Saline Water Act. I should like to call attention to the fact that the National Saline Water Conference held in July at Woods Hole, Mass., brought out very clearly the urgent need for more basic research in this area. Recommendations have been made by the experts for $5 million a year to be used solely for basic research as distinguished from applied research and development. Real scientific breakthroughs are essential. Is it likely that any segment of private enterprise will devote its best efforts to evolve such breakthroughs when, first, the potential commercial market is so great; second, it cannot depend on background patents to sustain its position in the marketplace; and third, it must make its findings free for its competitors to use? I think not.

Let me repeat that what we are asked to do is far too serious a matter to be legislated lightly. This body has never had the opportunity to examine the proposed legislation or debate it. It should not take the risk of damaging our tested patent system with its eyes closed, which is what we will be doing if we continue to permit these amendments to be tacked onto otherwise needed legislation.

It should be emphasized that this patent clause has, in no case that I am aware of, been requested by the administration. Certainly it was not requested in regard to the Saline Water Conversion Act this year. It has simply been tacked on and, apparently, with very little discussion. I note, for example, that the Senate report merely identifies the amendment but does not undertake to explain it or attempt to justify the need for it.

I am convinced, however, that, insofar as the purpose of this clause is to disseminate scientific information with the greatest possible speed, it has genuine merit. To this end I have drawn an amendment patterned after the clause in question, which I believe is far more appropriate than the existing legislation:

All research within the United States contracted for, sponsored, cosponsored, or authorized under the authority of this act shall be provided for in such manner that all information as to uses, products, processes, patents, and other developments resulting from that activity will (with such exceptions and limitations, if any, as the Secretary may find to be necessary to protect the equitable interests of the Government and the contractor) be available to the general public at the earliest possible time. This subsection is not to be so construed as to deprive the owner of any background patent relating thereto of such rights as he may have thereunder.

Taking into consideration the nature of the conference report, this language justifiably deserves your examination with respect to the principles at stake.

The SPEAKER pro tempore. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

AMENDING THE LAW ESTABLISHING THE INDIAN REVOLVING LOAN FUND

Mr. HALEY. Mr. Speaker, I call up the conference report on the bill (S. 1540) to amend the law establishing the Indian revolving loan fund, and ask unanimous consent that the statement of the managers on the part of the House be read in lieu of the report.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT (H. REPT. NO. 1162)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1540) to amend the law establishing the Indian revolving loan fund, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its disagreement to the amendment of the House and concur in the same with an amendment as follows: In lieu of the matter inserted by the House amendment insert the following: "That the appropriation authorization in section 10 of the Act of June 18, 1934 (48 Stat. 986), is hereby amended by increasing it from $10,000,000 to $20,000,000."

And the House agree to the same.

JAMES A. HALEY,
ED EDMONDSON,
THOMAS G. MORRIS,
E. Y. BERRY,
HJALMAR C. NYGAARD,
Managers on the Part of the House.

FRANK CHURCH,
ERNEST GRUENING,
QUENTIN N. BURDICK,
BARRY GOLDWATER,
GORDON ALLOTT,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 1540) to amend the law establishing the Indian revolving loan fund, submit the following statement in explanation of the effect of the action

agreed upon and recommended in the accompanying conference report:

As it passed the Senate, S. 1540 called for a $25,000,000 increase in the amount authorized to be appropriated for the general Indian revolving loan fund established by the Act of June 18, 1934. It also called, in effect, for a merger of this fund with two other such funds which have been established for the Navajo-Hopi Tribes and for the Indians of Oklahoma.

The bill was amended in the House to reduce the increase in the amount authorized to be appropriated to $5,000,000 and to delete all other provisions of the bill.

The conferees are agreed that in lieu of the $5,000,000 increase proposed by the House and the $25,000,000 increase proposed by the Senate, a $10,000,000 increase should be allowed. This will make the total amount authorized for the general loan fund $20,000,000. The conferees are also agreed that questions concerning a further increase and concerning the proposed merger, as well as such questions as arise concerning interest rates to be charged and the like, can be better handled at some later date. The need for such consideration will probably arise when bills dealing with fractionated heirship problems are taken up, as they probably will be in the near future.

JAMES A. HALEY,
ED EDMONDSON,
THOMAS G. MORRIS,
E. Y. BERRY,
HJALMAR C. NYGAARD,
Managers on the Part of the House.

The SPEAKER pro tempore. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

CLARIFYING THE REEMPLOYMENT RIGHTS OF CERTAIN PERSONS ENTERING THE ARMED FORCES

Mr. KILDAY. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 8765) to amend and clarify the reemployment provisions of the Universal Military Training and Service Act, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

Mr. GROSS. Mr. Speaker, reserving the right to object, I assume the gentleman will take a minute or two to explain this bill.

Mr. KILDAY. Mr. Speaker, I will be glad to explain the bill.

The purpose of this bill is to amend the existing reemployment provisions of the Universal Military Training and Service Act to clarify and remove any doubts that might arise with regard to the reemployment protection to be accorded certain persons who leave their jobs to enter the Armed Forces in the interest of national defense.

In the month of August this year the Congress passed a law giving the President the power to extend the period of service of persons on active duty and the power to call individuals and Reserve organizations to active duty without their consent. The purpose of this bill is to extend the reemployment rights for the same period of time it is possible to extend involuntarily the period of service or to extend those reemployment rights for the same period that a person volunteers for active service, provided that additional service is no greater than that to which he could have been involuntarily called.

Mr. SHORT. Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts [Mr. BATES] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

Mr. BATES. Mr. Speaker, the purpose of H.R. 8765 as stated in the report is to clarify certain existing rights and to remove any doubts that might otherwise arise with regard to reemployment protection to certain persons who enter the armed services.

There is ample protection in existing law for the inductee, or the enlistee; and there is ample protection in existing law for the individual serving on active duty who has his enlistment involuntarily extended so that he serves beyond 4 years.

But some doubt does exist with regard to reservists being ordered to active duty who have previously served on active duty and were discharged and returned to their former jobs. Likewise, some doubt may arise with regard to individuals who voluntarily extend their enlistments in lieu of having their enlistments involuntarily extended. This is particularly true for the individual whose 4 years of service may expire sometime after September 1 and who wishes to voluntarily extend his enlistment.

Enactment of H.R. 8765 would assure reemployment rights for individuals who are involuntarily recalled to active duty for a period of 1 year, or who voluntarily extend their enlistments for a period of 1 year, or whose enlistments are involuntarily extended for a period of 1 year, or for whatever period the Congress may authorize enlistments or calls to active duty beyond the 1-year period contained in the resolution recently enacted which authorized the President to order reservists to active duty.

The other features of the proposed legislation are technical, and merely clarify existing rights.

QUESTION

This legislation appears to contradict the statement made by Chairman VINSON when the House acted on House Resolution 505—Public Law 87–117—which authorized the President to order members of the Ready Reserve to active duty.

At that time, the chairman in a colloquy on the floor assured the Members of the House that the reemployment rights of the reservists would be protected.

ANSWER

Chairman VINSON was absolutely correct in his statement. Ready Reservists now being called to active duty do have reemployment right protection under the law. However, the law clearly does not apply in those instances in which a military member who is presently on active duty elects voluntarily to extend his enlistment during the period of the present crises. In such a case, this member who is motivated by patriotic reasons would be denied reemployment rights since his extension of enlistment was voluntary and not the result of operation of law.

There also may be some doubt as to whether reservists with substantial periods of active duty service who were discharged and who are being ordered to active duty under the resolution are protected. To remove any doubt about this individual, the proposed amendment will grant him protection for the period of time involuntarily ordered to active duty under the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There being no objection, the Clerk read the bill, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 9 of the Universal Military Training and Service Act, as amended (50 U.S.C. App. 459) is amended as follows:

(1) By amending paragraph (1) of subsection (g) to read as follows:

"(1) Any person who, after entering the employment to which he claims restoration, enlists in the Armed Forces of the United States (other than in a reserve component) and who between June 24, 1948, and August 1, 1961, serves for not more than four years, or who on and after August 1, 1961, serves any period additional or otherwise, not exceeding four years (plus in each case any period of additional service imposed pursuant to law) shall be entitled upon release from service under honorable conditions to all the reemployment rights and other benefits provided for by this section in the case of persons inducted under the provisions of this title."

(2) By amending paragraph (2) of subsection (g) to read as follows:

"(2) Any person who, after entering the employment to which he claims restoration, enters upon active duty (other than for the purpose of determining his physical fitness and other than for training), whether or not voluntarily, in the Armed Forces of the United States or the Public Health Service in response to an order or call to active duty shall, upon his relief from active duty under honorable conditions, be entitled to all of the reemployment rights and benefits provided by this section in the case of persons inducted under the provisions of this title, if the total of such active duty performed between June 24, 1948, and August 1, 1961, did not exceed four years, and the total of any such active duty, additional or otherwise, performed after August 1, 1961, does not exceed four years (plus in each case any additional period in which he was unable to obtain orders relieving him from active duty)."

(3) By amending paragraph (4) of subsection (g) to read as follows:

"(4) Any employee not covered by paragraph (3) of this subsection who holds a position described in paragraph (A) or (B) of subsection (b) of this section shall upon request be granted a leave of absence by his employer for the period required to perform active duty for training or inactive duty training in the Armed Forces of the United States. Upon his release from a period of such active duty for training or inactive duty training, or upon his discharge from hospitalization incident to that training, such

employee shall be permitted to return to his position with such seniority, status, pay, and vacation as he would have had if he had not been absent for such purposes. He shall report for work at the beginning of his next regularly scheduled working period after expiration of the last calendar day necessary to travel from the place of training to the place of employment following his release, or within a reasonable time thereafter if delayed return is due to factors beyond the employee's control. Failure to report for work at such next regularly scheduled working period shall make the employee subject to the conduct rules of the employer pertaining to explanations and discipline with respect to absence from scheduled work. If that employee is hospitalized incident to active duty for training or inactive duty training, he shall be required to report for work at the beginning of his next regularly scheduled work period after expiration of the time necessary to travel from the place of discharge from hospitalization to the place of employment, or within a reasonable time thereafter if delayed return is due to factors beyond the employee's control, or within one year after his release from active duty for training or inactive duty training, whichever is earlier. If an employee covered by this paragraph is not qualified to perform the duties of his position by reason of disability sustained during active duty for training or inactive duty training, but is qualified to perform the duties of any other position in the employ of the employer or his successor in interest, he shall be restored by that employer or his successor in interest to such other position the duties of which he is qualified to perform as will provide him like seniority, status, and pay, or the nearest approximation thereof consistent with the circumstances in his case."

(4) By renumbering paragraph (5) of subsection (g) as paragraph (6), and by inserting a new paragraph (5) as follows:

"(5) Any employee not covered by paragraph (3) of this subsection who holds a position described in paragraph (A) or (B) of subsection (b) of this section shall be considered as having been on leave of absence during the period required to report for the purpose of being inducted into, entering or determining by a preinduction or other examination his physical fitness to enter the Armed Forces of the United States. Upon his rejection, upon completion of his preinduction or other examination, or upon his discharge from hospitalization incident to that rejection or examination, such employee shall be permitted to return to his position in accordance with the provisions of paragraph (4) of this subsection."

With the following committee amendments:

On page 2, strike out lines 1 through 5, inclusive, and insert in lieu thereof the following: "and who serves for not more than four years, or who on and after August 1, 1961, serves any additional period not exceeding the maximum period for which he might be called into or retained in service involuntarily (plus in each case any period of additional service imposed pursuant to law) shall be entitled".

On page 2, strike out lines 22 through 25, inclusive, and insert in lieu thereof the following: "total of such active duty performed did not exceed four years, and the total of any such additional active duty performed after August 1, 1961, does not exceed the maximum period for which he might be called into or retained in service involuntarily".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

COMMITTEE ON BANKING AND CURRENCY

Mr. MULTER. Mr. Speaker, I ask unanimous consent that the Committee on Banking and Currency have until midnight tonight to file conference reports on the bills S. 902 and H.R. 8762.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

PERSONAL EXPLANATION

Mr. CELLER. Mr. Speaker, in the colloquy yesterday between the gentleman from Virginia [Mr. SMITH] and the gentleman from Florida [Mr. CRAMER], there was an implication that when the Judiciary Committee approved the bill to extend the life of the Civil Rights Commission I did not ask for a rule on that bill. I did ask for a rule, and I ask unanimous consent to include in the RECORD a letter which I addressed to the distinguished chairman of the Rules Committee, together with his response thereto, which indicates that I did apply for a rule and that the chairman of the Rules Committee would endeavor to schedule hearings on this matter at an early date.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

(The matter referred to follows:)

AUGUST 21, 1961.

Hon. HOWARD W. SMITH,
Chairman, Committee on Rules,
House of Representatives,
Washington, D.C.

DEAR MR. CHAIRMAN: The Committee on the Judiciary has reported favorably, amended, to the House, H.R. 6496, to make the Commission on Civil Rights a permanent agency in the executive branch of the Government.

Three copies of this reported bill are enclosed and three copies of the accompanying committee report, House Report No. 995.

Pursuant to authorization of the Committee on the Judiciary, I am writing to request the Rules Committee to grant a rule for the consideration of this bill on the floor of the House. We would appreciate being given a hearing before your committee at the earliest convenient date.

Sincerely yours,

EMANUEL CELLER, *Chairman.*

HOUSE OF REPRESENTATIVES,
COMMITTEE ON RULES,
Washington, D.C. August 22, 1961.

Hon. EMANUEL CELLER,
Chairman, Committee on the Judiciary,
House Office Building,
Washington, D.C.

DEAR MR. CHAIRMAN: This will acknowledge your letter of August 21 requesting that the Committee on Rules hold a hearing on H.R. 6496, a bill to make the Commission on Civil Rights a permanent agency in the executive branch of the Government.

I shall endeavor to schedule hearings on this matter at an early date and shall be glad to advise you of the time set.

Sincerely,

HOWARD W. SMITH, *Chairman.*

AMENDMENT OF THE SHIP MORTGAGE ACT, 1920

Mr. BONNER. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill—H.R. 2308—to amend the Ship Mortgage Act, 1920, with respect to its applicability to certain vessels, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 2, after line 13, insert:

"SEC. 3. The proviso at the end of section 511(h) of the Merchant Marine Act, 1936, as amended, is amended to read as follows: '*Provided*, That until January 1, 1962, in addition to the extensions hereinbefore permitted, further extensions may be granted ending not later than December 31, 1962'."

Page 2, after line 13, insert:

"SEC. 4. The amendment made by the first section of this Act shall take effect December 31, 1961, or on the date of enactment of this Act, whichever date first occurs."

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

EXPORT INSURANCE AND GUARANTEES

Mr. MULTER. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill S. 2325, to amend the Export-Import Bank Act of 1945, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. WIDNALL. Mr. Speaker, reserving the right to object, will the gentleman from New York explain what has happened to this bill?

Mr. MULTER. If the gentleman will yield, I will be happy to.

Mr. Speaker, this bill was considered by the House Banking and Currency Subcommittee No. 3, together with four other bills intended to improve the export condition and position of American exporters. The idea is to improve their competitive position insofar as exporting American products and services are concerned. Today many foreign countries are extending not only guarantees against political risks, but also guarantees against credit risks. This is putting the American exporters in an unfair competitive position. Under this bill we will permit the Export-Import Bank to issue guarantees and insurance where private enterprise will not issue them, not only for the political risks that they are presently guaranteeing, but also for credit risks.

Mr. Speaker, the bill does not call for any additional authorization, moneywise. As a matter of fact, it imposes a limitation on the use of the authorization of the Export-Import Bank to the extent that it will be required to set up a reserve

of 25 percent of the total amount of liability that it may guarantee under this program. In no event will it be permitted to extend guarantees for an aggregate of more than $1 billion. The reserves therefor will come out of the present $7 billion authorization under which the Bank presently is operating.

Mr. Speaker, the committee has assured the Congress in its report that we will further study this matter and have further hearings in January, at which time we will take up for further consideration the four other bills that were before the committee at the same time we had this bill before us.

Mr. Speaker, this bill is intended merely to get the program off the ground and to get it started. We will review the entire operation next January and then, if necessary or desirable, come before the Congress with further legislation.

Mr. WIDNALL. Will the gentleman tell us how this bill as amended differs from the original Senate version?

Mr. MULTER. The original Senate version had no limitation as to the amount. It gave the Bank the right to issue this kind of insurance in any manner and to any extent it saw fit. We require them to set up reserves and the reserves we do set up, I understand, are much beyond any possible potential loss that may be incurred. In addition to that we write into the bill as reported by our committee a provision requiring it to charge fees and premiums commensurate with the risk that it will undertake. In addition to that we strike out of the Senate version of the bill the extension of the life of the Bank from 1963 to 1968, which means that we must review the entire program next year in order to determine what, if anything, we shall do with the Export-Import Bank. We limit the insurance program to Americans and those foreigners doing business here.

Mr. WIDNALL. Mr. Speaker, I withdraw my reservation of objection.

Mr. GROSS. Mr. Speaker, further reserving the right to object, is this strictly a credit guarantee or does this go into the same program that the ICA has with respect to guaranteeing investments as to expropriation, convertibility, war risk; and in the latest foreign give-away bill, revolution and insurrection were also brought in? Is this bill limited to credits only?

Mr. MULTER. Mr. Speaker, if the gentleman will yield to me I will say to the House that this bill is strictly limited to the Export-Import Bank operations which are for the benefit of Americans; and we so say in the bill. This is for the benefit of American enterprise. It is in line with the program that has been conducted by this Bank since 1934 when it was first brought into being. It has nothing to do with other programs to which the gentleman referred. It covers political risks, as heretofore authorized, and also commercial credit risks.

Mr. GROSS. What does the gentleman mean by political risks?

Mr. MULTER. That is a guarantee of currency convertibility and a guarantee against nationalization and confiscation by any foreign power.

Mr. GROSS. Then you have embarked upon approximately the same program with respect to exporters as the ICA furnishes to American investors in foreign lands; is that correct?

Mr. MULTER. May I say to the gentleman that we are doing nothing further with respect to the political risk guarantee program than has been in the law since 1934. We are not extending that program one iota. What we are doing now is clarifying the law so as to indicate to the Export-Import Bank that it may also guarantee or insure commercial credit risks, and with this injunction, that to the extent private insurance companies will underwrite that risk they shall do so first and the Export-Import Bank to that extent will only be a reinsurer or a coinsurer.

Mr. GROSS. Mr. Speaker, I will say to the gentleman from New York and the Members of the House that this is simply further proof—and I am not going to object to the consideration of this bill—this is further proof that with all of the billions that we have expended all over the world we still have not established by virtue of that spending a climate favorable to American investment in foreign countries or export trade to foreign countries. This is further proof that what this Government has been doing through the foreign give-away program has resulted only in failure.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the bill as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (c) of section 2 of the Export-Import Bank Act of 1945 is amended to read as follows:

"(c)(1) The Export-Import Bank of Washington, in furtherance of its objects and purposes under this Act, is authorized and empowered to guarantee, insure, coinsure, and reinsure against risks of loss arising in connection with export transactions; and to establish and maintain fractional reserves in connection therewith. The reserves maintained by the Bank for the guarantees, insurance, coinsurance or reinsurance issued pursuant to this section shall be not less than 25 per centum of the related contractual liability of the Bank. Insofar as contracts of guarantee, insurance, coinsurance, and reinsurance are concerned, only that part of the Bank's liabilities represented by reserves provided for above shall be taken into account for the purposes of applying the limitations imposed by section 7 of this Act.

"(2) The Bank may issue such guarantees, insurance, coinsurance, and reinsurance to or with exporters, insurance companies, financial institutions, or others, or groups thereof, and where appropriate may employ any of the same to act as its agent in the issuance and servicing of such guarantees, insurance, coinsurance, and reinsurance, and the adjustment of claims arising thereunder."

SEC. 2. Section 8 of the Export-Import Bank Act of 1945 is amended by striking out "June 30, 1963" and inserting in lieu thereof "June 30, 1968."

The SPEAKER pro tempore. The Clerk will report the committee amendments.

The Clerk read as follows:

1. On page 1, lines 8 and 9, strike out "reinsure against risks of loss arising in connection with export transactions" and insert in lieu thereof "reinsure United States exporters and foreign exporters doing business in the United States in an aggregate amount not in excess of $1,000,000,000 outstanding at any one time against political and credit risks of loss arising in connection with United States exports".

2. On page 2, after the period in line 7, insert the following new sentence: "Fees and premiums shall be charged in connection with such contracts commensuate, in the judgment of the Bank, with the risks covered."

3. On page 2, strike out section 2.

The committee amendments were agreed to.

Mr. MULTER. Mr. Speaker, this bill authorizes the Export-Import Bank to take the first step toward meeting a longstanding need for a comprehensive export guarantee program. Dramatic events on the gold market last year focused public attention on the need to provide American businesses with a wider range of tools in selling American goods and services abroad. The Members of this House are fully aware, of course, of the fact that we must do all we can to stimulate our exports, not only to maintain a sound economy and provide more jobs here at home, but also to keep the dollar strong in international markets. One of the needs has been for a complete system of guarantees and insurance, covering both political risks and credit risks, for our exports. Private insurance companies have hesitated to enter this field, without some form of coinsurance or reinsurance.

Other countries have scored "firsts" in this field in providing export guarantees. No less than 19 entities have been established for this purpose in other countries, including France, Germany, Japan, the United Kingdom, and other major industrialized nations who are competing with us in world markets. President Kennedy's message to the Congress on our balance-of-payments situation in February of this year recognized the need for a better export guarantee program for American exporters, and reported that he had directed the Export-Import Bank to prepare a new program "to place our exporters on a basis of full equality with their competitors in other countries." Acting under the President's directive, the Bank has met with insurance companies and others in the field to formulate such a program. This bill is needed to put the program into operation.

S. 2325 authorizes the Bank to provide guarantees, insurance, coinsurance, and reinsurance, covering U.S. exports against political and credit risks to the extent this coverage is not available on reasonable terms from private industry. The bill limits the Bank to $1 billion of contracts outstanding at any one time under this program. The program will be established on a self-supporting basis, with fees and premiums being charged

commensurate with the risks covered. The bill also requires the Bank to set up reserves to cover its potential liabilities under the new program on the basis of 25 cents for each dollar of potential liability. This is an extremely conservative reserve formula; testimony before our committee indicated that even in a bad year losses would not run more than a small fraction of this 25-percent figure.

This bill was introduced by the distinguished chairman of the Banking and Currency Committee, the gentleman from Kentucky [Mr. SPENCE]. It was ordered favorably reported to the House by unanimous vote of the committee, following hearings held on this and related bills by Subcommittee No. 3, of which I have the honor to serve as chairman. As I indicated before, this is not the only solution to the problem of how best to provide an effective export guarantee system, and it is certainly not the only solution to the many related problems of how to stimulate American exports. An alternative solution to the export guarantee problem is embodied in H.R. 7102 and H.R. 7103, companion bills introduced by my able colleague on the Banking and Currency Committee, the gentleman from New Jersey [Mr. WIDNALL], and myself. Other provisions to stimulate exports are included in H.R. 7266 and H.R. 8249, introduced by another valued member of our committee, the gentleman from Ohio [Mr. ASHLEY], and by the gentleman from California [Mr. ROOSEVELT]. After our hearings were set, the other body passed another similar bill, S. 1729, introduced by Senator ENGLE, who has worked diligently on this problem. Unfortunately, time did not permit a complete exploration by our subcommittee of the many questions raised by these bills. Hearings for that purpose on all of these bills will be held early next year. There was unanimous agreement, however, that a start should be made this year on establishing an export guarantee program, and that S. 2325 offered an appropriate vehicle for doing so.

Accordingly, our subcommittee agreed to certain amendments to S. 2325 and reported the bill favorably to the full committee with these amendments. The full committee agreed unanimously with our recommendations. The first amendment, limiting liability under the new program to $1 billion, I have already mentioned. Our second amendment requires the payment of premiums commensurate with the risks involved. Our third amendment eliminated the provision of the introduced bill extending the statutory life of the Bank, now due to expire June 30, 1963. We feel there is ample time to consider this extension next year, in connection with the complete hearings we plan to hold on this subject.

A fourth amendment provides that contracts under the bill shall be written for the benefit of U.S. exporters and foreign exporters doing business in the United States. This amendment is designed to make sure the program will not be used to benefit tax-haven corporations, either directly as beneficiaries of guarantee or insurance contracts, or indirectly through guarantees or insurance of sales to tax-haven corporations.

These are the principal changes recommended by your committee. One final comment should be made. As indicated by the committee report, the committee and the Export-Import Bank are in complete agreement that this bill will be used to stimulate a private-enterprise solution to the problem of export guarantees and insurance. The Bank will act under this bill only to fill a gap which thus far private enterprise has not filled. It will actively seek to encourage private companies to enter this field, and they will be given every opportunity to do so. The Bank's powers under this bill will be used to help private companies write this insurance to the fullest practicable extent, rather than to supplant private insurance with Government insurance.

This is a good bill. I know of no opposition to it, and I urge its adoption by the House.

The bill was ordered to be read a third time, was read the third time and passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. MULTER. Mr. Speaker, I ask unanimous consent that all Members have permission to extend their remarks in the RECORD immediately prior to the passage of the bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

THE PEACE CORPS

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 454 and ask for its immediate consideration.

The Clerk read the resolution as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7500) to provide for a Peace Corps to help the peoples of interested countries and areas in meeting their needs for skilled manpower. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs, the bill shall be read for amendment under the five-minute rule. It shall be in order to consider without the intervention of any point of order the amendments recommended by the Committee on Foreign Affairs now printed in the bill, and the committee amendment beginning on page 45 of the bill and continuing through page 50 (proposed as title II of the bill) shall not be subject to amendment. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. BOLLING. Mr. Speaker, I yield 30 minutes to the gentleman from Kansas [Mr. AVERY] and pending that I yield myself such time as I may consume.

Mr. Speaker, the reading of the rule makes clear its purpose. It makes in order with 2 hours of general debate the consideration of the bill, H.R. 7500, to establish on a permanent basis the Peace Corps. The rule is an open rule except for title II, which deals with taxes, on which points of order are also waived.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. BOLLING. I yield to the gentleman from Iowa.

Mr. GROSS. That is one of the most important provisions in this bill, the preferential treatment in regard to taxes.

Mr. BOLLING. A closed rule is customary in connection with the consideration of all provisions with regard to the Internal Revenue Code. This is standard procedure.

Mr. GROSS. I do not like this standard procedure.

Mr. HOFFMAN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. BOLLING. I yield.

Mr. HOFFMAN of Michigan. This is a closed rule from page 45 on to the end of the bill?

Mr. BOLLING. That is correct. That includes title II, and only title II.

Mr. HOFFMAN of Michigan. That is the title that gives the benefits.

Mr. BOLLING. This is the section that deals with amendments to the Internal Revenue and the Social Security Act, and only that.

Mr. HOFFMAN of Michigan. It gives to the Peace Corps members practically the same benefits as are given to veterans.

Mr. BOLLING. I am not sure as to that, but it does give them benefits.

Mr. HOFFMAN of Michigan. I mean the Peace Corps members and their relatives on down to the third and fourth generations.

Mr. BOLLING. Merely the members of the Peace Corps.

Mr. AVERY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I think the provisions of the bill, H.R. 7500, either have been or will be explained under general debate. I would rather direct my remarks to the entire theory behind the concept of a Peace Corps and the status we find it in today.

As is the case frequently when we come to the floor we find two conflicting points of view affecting a piece of legislation. We find that true today more than we do in most cases. The proponents of the Peace Corps would like to convert the Peace Corps into more of an evangelistic mission. The opponents of the Peace Corps, on the other hand, maintain that the Peace Corps has not yet developed to the point where it can be established or not established that it is in the national interest, and second, that it is overburdened, perhaps, with administrative and personal costs.

I think an objective analysis of the proposal would probably indicate that the true position, the unbiased conclusion from such an analysis, would lie somewhere between those two extremes.

I think it should be made abundantly clear, and I think the principal issue may revolve around this point, that if this bill is not passed today it will do no violence, it will not in any way affect the operation of the Peace Corps as we know it today.

I think the Members of the House are well aware of the fact that the Peace Corps today is operating under an Executive order. The funds to finance whatever missions may be undertaken and the funds to defray the cost of training of so-called volunteers are taken from the President's contingency fund. In the mutual security appropriation bill, which passed the House last week, we added $175 million to the President's contingency fund from which the President is drawing to operate the Peace Corps under Executive order. If the usual pattern of things develops the contingency fund will probably be even larger when the bill comes back from the other body. So there is no financial problem before us on the Peace Corps.

I submit, Mr. Speaker, that the Corps should continue under Executive order until there is tangible evidence that it is justified and it is in the national interest and that it is performing the task it is alleged it can perform in the field of improving our international relations.

Mrs. BLITCH. Mr. Speaker, will the gentleman yield?

Mr. AVERY. I yield to the gentlewoman from Georgia.

Mrs. BLITCH. Mr. Speaker, I want to associate myself with the remarks of the gentleman from Kansas. The gentleman has well stated the position that I take on this bill.

Mr. AVERY. I appreciate the support of the gentlewoman from Georgia, and I trust that her point of view may be shared by many Members on her side of the aisle.

Mr. KEARNS. Mr. Speaker, will the gentleman yield?

Mr. AVERY. I yield to the gentleman from Pennsylvania.

Mr. KEARNS. Mr. Speaker, I think this is the most atrocious bill that has ever been brought before the Congress in the 15 years that I have been here.

Mr. AVERY. I do not think I would entirely agree with the gentleman that it is the most atrocious bill that has been brought before the Congress. But, certainly, there have been much more desirable pieces of legislation presented to the House. I hope the House will act in its wisdom this afternoon and not approve the so-called Peace Corps bill.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. AVERY. I yield to the gentleman from Iowa.

Mr. GROSS. Does the gentleman suggest that we vote against the rule?

Mr. AVERY. I will come to that, if the gentleman will permit. I would like to come to that point as quickly as I am able to do so.

Mr. Speaker, let us take a quick look at the Peace Corps as it is operating under Executive order. Mr. Speaker, we have now under Executive Order 131 administrators plus a certain number of advisers, and we have trained in the 6 months in which it has been in operation 158 volunteers and there are approximately 300 more volunteers who are in training at some eight universities and colleges across the land. I do not know what the total cost of the Peace Corps has been up until now. The salary range for these 131 employees is from $20,000 down to $3,000 per year. I do not know just where the mean or average would fall.

Mr. Speaker, I would like to point out too that I question whether the House can act in wisdom on this bill in the short time that we have to consider it. There are 38 pages in the bill. The bill was made available to the Committee on Rules late one afternoon. The committee report was not available until the hearing in the Committee on Rules was underway when, lo and behold, when we got the committee report there were 54 amendments to the bill which we received just the night before. I submit, Mr. Speaker, it is extremely difficult for the Committee on Rules or for the Members of the House to act with any degree of wisdom or any degree of understanding under that kind of procedure. I am not in any way, Mr. Speaker, indicting my colleagues nor do I mean to infer anything unfavorable so far as the chairman of the Committee on Foreign Affairs is concerned. Certainly, the gentleman from Pennsylvania has probably had one of the greatest legislative loads to carry that any Member of the House has ever had to carry. But that is the way this did work out. Therefore, I think favorable action on this measure, if ever, could certainly be deferred until next year.

I would like to discuss for just a minute and examine some of the operations we presently have in foreign countries which are at least comparable to the operation of the Peace Corps.

From non-Government sources we have foundations. I think you are all familiar with those. Probably, the Ford Foundation is the best known. We also have the 4–H Clubs exchange. That is known as the International Youth Foundation Exchange.

Mr. Speaker, over the past 12 years there have been 1,325 youth exchanges under that program. We also have missionaries. We have 34,000 American missionaries already in foreign countries that are attempting to do certainly about the same kind of work that is proposed by the Peace Corps. Of the 34,000, 27,000 are Protestant missionaries, 7,000 are Catholic. The Jewish organizations send certain advisers, medical doctors, and technicians abroad, also.

Now, let us see what the Government is doing. Please understand we are considering to superimpose on top of a rather burdensome organization already yet another Federal bureau, another Federal agency, another operation in the field of foreign affairs.

Now, we have a diplomatic corps, of course. I do not know as the House has ever been advised as to how many people we have overseas in the diplomatic corps. Under the ICA program, that is now to be under the aid for international development, we have 9,000 technicians abroad already. Then we have the USIA, and this may come as a surprise to some of you. I am sure you are all familiar with the USIA; that is the U.S. Information Agency under the direction, of course, of the well-known television personality Edward R. Murrow. There is no question, of course, that Mr. Murrow is qualified to disseminate good will about the United States. He established that qualification, of course, when he produced this now famous film "Harvest of Shame." Mr. Murrow, under the USIA, has 149 schoolteachers working for him in various foreign assignments.

Please let me impose upon you to repeat this: The U.S. Information Agency has about 149 positions available. These are primarily schoolteachers to teach English in various foreign countries. By yesterday morning they could not even fill these 149 positions they have, because there is a reluctance of applicants to go overseas, and they also have some reservations about the applicants that they do get. So, it seems to me it is a little farfetched to believe that we are going to be able to send a strong mission abroad under the Peace Corps to perform as schoolteachers.

Incidentally, it seems that the Peace Corps up to now may be developing for just that, a recruiting agency to send teachers abroad. Mr. Shriver advised me by letter this week that he has had requests for several schoolteachers to go to the Philippines. There are also schoolteachers in Ghana and several other countries.

I submit, Mr. Speaker, that it is not necessary to establish another Federal agency that will merely serve as a recruiting agency to send schoolteachers abroad. Certainly we should wait and see how the Peace Corps develops under the administrative order before we decide that it should become a permanent bureau of the Government.

Now, we sit here in the House and read the Washington newspapers and get imbued with the idea that this Peace Corps has really caught fire overseas and that if we do not establish it as a permanent agency, perhaps we are not keeping faith with some of the other countries.

I tried to find out as much as I could about the Peace Corps and its reception in other countries, and I took advantage of every bit of information I could find. I thought you might be interested in a short article that appeared in the U.S. News & World Report under the title "Truth About the Peace Corps." Now, you understand this would not be a summary made by a Government bureau; it was not a report made by anybody representing the administration or any other department of the Government. This was a newsman's summary of what he found in other countries. Hear this:

Good will is a fine thing, but a Boy Scout approach is not enough.

It would not do much good to send the sons of good families, fresh from Harvard, to underdeveloped countries.

That is a direct quote.

From Latin America:

What we need is professional and technical help, not idealistic amateurs.

Yet, the Latin Americans "would rather not be put on the spot of rejecting the awkward but humanitarian offer of the American President."

From southeast Asia: "The early flush of enthusiasm is beginning to wear off, even before the first American gets into the field." Asiatics want solid industrial help, not community projects, and "are losing interest in the idea of Americans working on a village level."

I called the editor of the U.S. News & World Report to see if those statements could be documented. He assured me they could. In view of that, Mr. Speaker, I submit that this bill should be defeated and not acted on at least until some of the present volunteers get to their assignments and have performed. That should take place before we take action here setting up another bureau which will cost $40 million a year if the request the administration has sent us is granted.

I would also like to suggest—perhaps many Members read this—in February there appeared in a letters-to-the-editor section of the Washington Post—it surprised me greatly that the Post printed the letter in view of its editorial policy—but this letter was written by a Mr. Vohra, the Washington correspondent for the Times of India. He wrote this:

In the garden of Mr. Kennedy's new ideas, a weed is growing. It needs to be eradicated before it takes deep roots.

And in closing:

I am honestly skeptical. I would suggest: spare them the ordeal.

He is referring to the volunteers.

That brought down a good deal of criticism on Mr. Vohra, so he wrote another letter to the editor under date of March 12, in which he said that even though some of his original apprehension had been appeased, he still was—

puzzled by the estimated expense on each Corps member—$5,000 annually. This is about 100 times higher than India's per capita income. If I am not mistaken, this is about the salary of an India Cabinet Minister. I don't quite follow how this amount is to be squared with the ideal of living like the native.

I would take those summaries as some indication at least of the attitude in the recipient countries themselves.

So, Mr. Speaker, let me close by saying nobody can question the motives of the Peace Corps or the objects for which it was intended. They are idealistic, and certainly they are to be given serious consideration. All I am saying, Mr. Speaker, is that the House should not act at this time to make a permanent bureau, a permanent agency, out of a project that is in the experimental stage. Not even one of the volunteers has reached his destination and is performing the duty for which he was trained.

To take responsible action I think we should at least wait until the trainees are on duty and their service can be evaluated.

The SPEAKER pro tempore. The question is on the resolution.

The resolution was agreed to.

Mr. MORGAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 7500) to provide for a Peace Corps to help the peoples of interested countries and areas in meeting their needs for skilled manpower.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 7500 with Mr. NATCHER in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Pennsylvania [Mr. MORGAN] will be recognized for 1 hour and the gentleman from New Hampshire [Mr. MERROW] for 1 hour.

Mr. KEARNS. Mr. Chairman, at the conclusion of the debate I shall offer a motion to recommit this bill to the Committee on Education and Labor.

The CHAIRMAN. The Chair will entertain that motion at the proper time.

Mr. MORGAN. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, H.R. 7500 is a bill to provide for a Peace Corps to help peoples of interested countries and areas in meeting their needs for skilled manpower. The purpose of the bill is to provide congressional backing for and the necessary implementation of a simple idea.

The basic objective of the Peace Corps is to make use of several thousand of our finest and most dedicated people who are able and willing to serve overseas in order to help the people of the less developed countries to live better and to promote world peace. The availability of dedicated people, many of them young but including mature and experienced persons as well, for such service provides us with an important means for improving the conduct of our foreign policy.

Most of us would agree, I believe, that the most difficult problem in the field of international relations is the failure of the people of the various nations of the world to understand each other. There can be no question but that if the people of Asia, Latin America, and Africa can become acquainted as friends, neighbors, and coworkers with a carefully selected group of our young people and with older people who are sufficiently dedicated to sacrifice personal gain in order to serve, there will be a better understanding between the United States and the countries where the Peace Corps operates.

It is also one of the major purposes of our foreign policy to assist economically underdeveloped countries to develop. These countries need skilled manpower. They need people who can serve as teachers in their schools. They need trained surveyors, not merely to teach them to survey but actually to go out and survey the routes for their highways and assist with other development projects. They need people who are experienced in farming to go to rural villages and work with the villages in improving their agricultural methods. They need people who can work with their villagers in improving health and sanitation.

The purpose of the Peace Corps is to make it possible to improve the effectiveness of our foreign policy by utilizing the services of several thousand Americans who possess the skills needed by the less developed countries and who are ready to go to these countries and serve without receiving the compensation and allowances normally available to those engaged in Government service abroad.

Let me urge you not to lose sight of the fact that the volunteers are the Peace Corps. The whole purpose of this bill is to make it possible for us to select, train, and maintain overseas a corps of volunteers. I urge you not to lose sight of this fact because many pages of the bill do not deal directly with the volunteers. It is necessary to provide various administrative authorities as well as a small permanent organization of civil servants to carry on the Peace Corps program. Much of the bill is devoted to such matters, but the fact remains that the program is a program for maintaining a force of volunteers abroad, and the funds authorized by the bill will be used primarily for that purpose.

There are some who apparently have gotten the impression that the length of the bill and the technical language which it contains in some sections means that the Peace Corps volunteers are going to have a lot done for them. Let me begin my discussion of what a Peace Corps volunteer gets by saying a word about what he does not get.

First, he does not receive a salary for his services. While he is in training in the United States and during the 21 months he serves overseas, he gets his room and board with a limited allowance of spending money for such items as toothpaste and razor blades. He gets his travel—tourist class—and he gets medical service. At the end of his service, he gets a termination payment of $75 per month of satisfactory service on which he pays income tax, the same as does everyone else.

The volunteer does not get a diplomatic or special passport; he travels with the same passport as any other private citizen. He is allowed to take not to exceed 300 pounds of unaccompanied baggage, and he cannot be accompanied by any dependents. The only way a married couple can serve in the volunteer corps is for both to be accepted as qualified volunteers and available for service.

The volunteer derives no advantage under the Selective Service Act. His draft obligations are the same as anyone else. The bill specifically provides that there shall be no draft exemption resulting from Peace Corps service. The question of deferment is entirely in the

hands of the local draft board, the same as everyone else.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Iowa.

Mr. GROSS. What has happened in the case of that character by the name of Kamen, of Miami, Fla., who I understand disrupted a Rotary meeting in Miami where an anti-Communist film was being shown?

Mr. MORGAN. I am sure the gentleman is aware that his draft board has met and has issued a statement to the effect that he will not be deferred.

Mr. GROSS. If the gentleman will yield further, the national draft director then stated that he was going to conduct an investigation. Does the gentleman know whether anything has transpired in that respect at national draft headquarters?

Mr. MORGAN. The bill specifically spells out that any Peace Corps volunteer will receive no exemption under the Selective Service Act.

Mr. GROSS. If the gentleman will yield further, that is what Shriver told us some time ago. But this character is still in training, based upon the last word I had.

Mr. MORGAN. I understand this boy is 21 years old. They are taking only those who are 23 years old.

Mr. GROSS. That has nothing to do with the fact that he can be drafted at 21.

Mr. MORGAN. They are taking only 23-year-olds. As I understand it the boy will be subject to the draft when his name comes up.

Mr. GROSS. But apparently he is still in training at Pennsylvania State College.

Mr. MORGAN. I think he is in training yet at Pennsylvania State College.

Mr. GROSS. Does the gentleman think a character of that kind ought to be in training?

Mr. MORGAN. I do not feel that I am qualified to judge this case. I have never seen the boy nor heard all of the facts. He has not yet been approved by the final selection board. He has not yet been enrolled as a Peace Corps volunteer, and I am sure when he comes up for final approval by the selection board everything will be taken into consideration.

Mr. GROSS. Is the gentleman saying that the funds of the taxpayers of this country should be spent to train an individual of that character, simply to throw him out later?

Mr. MORGAN. This is a free country, and everybody, has a right to a full hearing and a fair trial. I think the boy is just receiving very fair treatment. When he goes before the selection board the final decision will be made.

Mr. GROSS. What selection board? Is the gentleman speaking now of the so-called Peace Corps selection board?

Mr. MORGAN. It is not composed of Peace Corps volunteers; it includes senior Peace Corps officials as well as people from the Universities. There are phsychiatric and medical examinations and a lot of other considerations that are considered before the final selection of these volunteers.

Mr. GROSS. But, this is the Peace Corps selection board that the gentleman is talking about?

Mr. MORGAN. Yes.

Mr. GALLAGHER. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from New Jersey.

Mr. GALLAGHER. I might say in answer to the question of the gentleman a few words about the Charles Kamen case.

The presence of Charles Kamen in the Peace Corps training program has provoked discussion and some controversy. It is important, I believe, for the Members of Congress to know why Mr. Kamen was invited to training and further selection, why he has not been summarily dismissed as some people have demanded, and what the Peace Corps selection process is like.

Charles Kamen was invited to training on the basis of an outstanding record as a student. He was the president of the student council at Brandeis University. He has strong letters of recommendation from several professors at Brandeis, from his Rabbi, and from businessmen in Miami. He did well on the Peace Corps entrance test. On the basis of this favorable evidence, Mr. Kamen was invited to train for a teaching project in the Philippines. It should be pointed out that this training period is part of the selection process and that Mr. Kamen had not been made a Peace Corps volunteer in fact.

Subsequent to that invitation, it was learned that Mr. Kamen had been involved in an incident in Miami, Fla., at a Rotary Club meeting. I hope Members of this House are informed of the fact that Mr. Kamen was invited to attend that meeting and did not force himself in, as some has suggested. The letters received by the Peace Corps about the incident call for the dismissal of Mr. Kamen on the grounds that he is either emotionally unstable or a Communist. Both of these are very grave charges. A third interpretation is possible: That he is a young man of good character who made an error which has been highly publicized and for which he has publicly apologized. The Peace Corps has been trying to find out which of these is true.

Mr. Kamen has not yet been selected for Peace Corps service. During his 2 months at Pennsylvania State University, where the training project is being held, Mr. Kamen has been undergoing further psychological testing, psychiatric interviews, interviews of faculty members, and so forth. He—like every volunteer in training—will have been the subject of a full field check by the Federal Bureau of Investigation. In addition, he will be under the supervision, as will every volunteer, of the Peace Corps training staff during the intensive training program which runs 60 hours each week. On the basis of all of the evidence, and not a fragment of it, a final selection board will determine whether or not Mr. Kamen can bear the responsibility of representing his country in the Peace Corps.

What the Peace Corps Director has insisted on—and I applaud him for it—is the adherence to an orderly process in the determination of Mr. Kamen's fitness. In fairness to every individual volunteer and with deep concern for its public trust, the Peace Corps must be guided by the concept of due process. If an orderly inquiry reveals that Mr. Kamen is lacking either in emotional maturity or in loyalty to his country, Mr. Shriver has assured us that he will not be assigned to oversea service. But Mr. Kamen, along with all of the other young men and women of America who are and will be volunteering for Peace Corps service, must be assured that they will be judged on the basis of all the evidence, after due deliberation by responsible officials—and this is what the Peace Corps is trying to do.

Mr. BECKER. Will the gentleman yield very briefly for a question?

Mr. MORGAN. I yield briefly for a question.

Mr. BECKER. The gentleman from Kansas [Mr. AVERY] a few moments ago stated that this is an experimental program. My question is this: Does the gentleman from Pennsylvania agree with that statement? Why should we rush into making this a permanent agency before we get through a period of experience and find out whether or not it is really worth while? I hope it will be worth while. Many of these matters come up as a matter of experiment, and this could be handled by the executive branch of the Government, because there are plenty of funds in the contingency fund, and in other areas.

Mr. MORGAN. I do not think there are plenty of funds available. Of course, the gentleman knows that the contingency fund was cut from the $500 million requested by the Executive and the $300 million authorized to $175 million in the appropriation bill as it passed the House.

The Peace Corps was set up under an Executive order but the President wants to know how the Congress stands. If permanent legislation is not passed by the Congress I assume the program will be closed out. This is a going concern. We already have 182 of these Peace Corps volunteers overseas. Fifty of them will start work in Africa in the next week or so. As I said, this is a going concern. I do not believe we should wait until January to pass this authorization bill. This bill has already passed the other body and I am in favor of providing the necessary authority for the program to get into high gear.

Mr. BECKER. It is already operating.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Massachusetts.

Mr. BOLAND. Mr. Chairman, I want to commend the chairman of the Committee on Foreign Affairs as well as the

members of his committee for bringing this bill to the floor. As to the question propounded by the gentleman from New York [Mr. BECKER], where an agency is established that has to come to the Congress each year for money with which to operate that agency, I do not believe we can say it is a permanent agency, particularly in an area of this kind. This bill provides an authorization of $40 million. That is the amount requested to run the Peace Corps for the fiscal year 1962. They have got to come back here again, and if the Congress does not like the way in which it is operating, the most effective way to terminate any agency is to kill the funds which it needs for operation. So in a sense it is not a permanent agency. It has to come in again and get its money with which to operate.

Mr. MORGAN. This bill authorizes funds for only 1 year. There has to be an authorization and an appropriation each year.

Mr. TABER. Mr. Chairman, will the gentleman yield for a question?

Mr. MORGAN. I yield to the gentleman from New York.

Mr. TABER. How much is it going to cost the Government for each member of the so-called Peace Corps?

Mr. MORGAN. Approximately $9,000 per volunteer per year.

Mr. TABER. For each volunteer per year.

Mr. MORGAN. That includes transportation, subsistence, training—a complete breakdown.

Mr. TABER. That includes their clothing and food and all matters of that kinds?

Mr. MORGAN. Transportation, training, clothing, salary, termination pay, leave allowance; everything is supposed to be included.

Mr. TABER. $9,000 is the figure that it will cost for one volunteer for 1 year?

Mr. MORGAN. For 1 year, yes.

Mr. TABER. And how many is it proposed to take into this outfit the first year?

Mr. MORGAN. For the fiscal year 1962, 2,500.

Mr. TABER. Are there any other emoluments beyond the $9,000?

Mr. MORGAN. No, that is all.

Mr. TABER. That covers it?

Mr. MORGAN. That covers it.

Mr. TABER. It does not include health insurance and that sort of thing, I suppose.

Mr. MORGAN. As I understand it, everything has been figured in.

Mr. Chairman, the Peace Corps volunteer gets no PX privileges and will not be located in any major city. The entire Peace Corps program is directed toward assisting people living in rural areas. The volunteer is expected to live in the villages among the people he works with. His scale of living will be adjusted to that of the local people with whom he works. If he serves as a teacher, his living allowance will be the same as that of a local teacher. If he works as a surveyor, he will live as surveyors do in the locality where he is located.

The Peace Corps volunteer does derive a number of benefits under this bill. He receives, in addition to the living and traveling allowances and the $75 per month which I have mentioned, the regular protection given Federal employees for disability if injured or disabled by disease while serving overseas. He also is given the benefit of counting his Peace Corps service toward civil service retirement and civil service seniority if he becomes a Government employee subsequent to his work with the Peace Corps.

There is also the possibility that he may be exempted from the civil service general entrance examination by the Civil Service Commission if he has satisfactorily completed his Peace Corps service.

Peace Corps volunteers are able to count their Peace Corps service for purposes of social security coverage, and their payment of income tax is deferred under the same conditions as that of enlisted personnel serving in the Armed Forces.

Volunteers also have the benefit of a moratorium on payments of principal and interest on student loans provided under the National Defense Education Act, under the same conditions as enlisted personnel in the Armed Forces.

Consideration of the benefits which I have just enumerated indicates, it seems to me, that most of them are the result not so much of a desire to make things attractive to members of the Peace Corps as foresight and anticipation of problems before they arise. The legislation could ignore all these matters with the result that we would have a short and simple bill which would not raise a number of controversial issues. On the other hand, I believe we are all realistic enough to know that we will not be able to disregard such matters as payments for disability incurred overseas, counting Peace Corps service toward civil service retirement or social security, and the relation of Peace Corps expense allowances and termination payments to income taxes. All these problems have to be faced and, in my judgment, it is better to face them now and deal with them positively and directly than to postpone them with the resulting necessity of rushing through legislation to meet situations that arise.

In considering whether or not we are doing too much for the Peace Corps volunteers, we should not forget that most of these people are not likely to choose missionary-type service as a career. They cannot make a career with the Peace Corps, and most of them presumably after their Peace Corps service will try to find jobs in business, Government, agriculture, or teaching at the normal rates of pay and with the normal interest in providing for their families and themselves as well as possible.

This is one reason why it is necessary to give consideration to such matters as social security and civil service retirement rights.

If the Peace Corps volunteers were all planning to devote their lives to serving humanity without regard to material rewards, we could disregard several of the points included in the bill; but, since we are trying to make it possible for young people to fit service in the Peace Corps into a more conventional career, we have to make certain provisions for this purpose.

Let me say just a word about volunteer leaders. Volunteer leaders are older people with greater experience who are to be assigned to work with volunteers. The bill provides that there cannot be more than 1 volunteer leader to 25 volunteers. The volunteer leaders are to get termination payments of not to exceed $150 per month, and will receive living and travel allowances on the same basis as the volunteers.

The bill provides that "under exceptional circumstances volunteer leaders may be accompanied by their spouses and minor children and that living, travel, and other allowances will be provided for such spouses and minor children."

There have been only 12 volunteer leaders selected so far, and none of them are married. The motivation of the volunteer leaders will be the same as that of the volunteers, and I am sure that when you consider the extreme austerity of the provisions made for them, there need be no fear that mature people will be seeking jobs as volunteer leaders in order to enjoy overseas vacations.

Section 7 of the bill deals with Peace Corps employees. These are the people who will constitute the permanent Civil Service staff that administers the Peace Corps. These people will be hired under the Classification Act of 1949 or the Foreign Service Act and will be subject to the normal provisions governing Federal employment.

The bill authorizes 30 supergrades, of whom 2 may receive salaries up to $19,000 per year. I realize that the House is very conservative in its attitude toward creating additional supergrades, but let me point out that this is a new agency and that if it is to function, it will need competent people. During its operations under the Executive order, it has been utilizing the services of a number of outstanding people who have been serving as consultants on a per diem basis. It will be impossible to continue arrangements of this type on a permanent basis.

Let me conclude with a word about the selection of Peace Corps volunteers. All volunteers, as well as all other Peace Corps personnel, are subject to investigation as to their loyalty or the possibility that they may become a security risk. Any investigation which develops any data indicating any question as to the loyalty or security status of the individual is required to be referred to the Federal Bureau of Investigation for a full-field investigation. The result of such field investigation is then referred to the agency for appropriate action.

Peace Corps volunteers are given a rigid examination before selection for training, and the selection process continues during the training period. No one is enrolled as a volunteer until his

3-month training period has been completed and he has been completely screened for oversea service.

The bill authorizes an appropriation of $40 million. Let me make the point that most of this money goes to support volunteers. It is estimated that it will cost $9,000 per year for each volunteer in service. This includes his training in the United States, transportation, living allowances, and termination pay at the end of his service. It is planned to fund the training and maintenance of a force of about 2,500 volunteers. You cannot divide the total authorization by $9,000 per volunteer to determine how many volunteers can be supported since over half the volunteers currently planned for will be serving under contracts with U.S. universities or private organizations such as CARE, which are funded on a 2-year basis, that is, when the Peace Corps enter into a 2-year contract with an organization, the funds for the 2-year period will be obligated.

The fact remains that only about $5 million of the $40 million requested is required for administration. The rest is to support volunteers.

The Peace Corps has 12,000 applicants for volunteer service. They plan to put 2,500 overseas by the end of fiscal 1962 if $40 million is available. If the amount is cut, the number will have to be reduced.

Considering the very modest allowances and termination payment the volunteers receive, there is not much possibility of economizing on the expenditures for this purpose. The general administrative overhead is a relatively small portion of the total budget so that curtailing this type of expenditure is not going to save a large sum of money. There is no alternative but to reduce the number of volunteers if funds are not provided to maintain them.

I urge that the House approve this bill. The Peace Corps is a going thing. There are 182 volunteers overseas at the present time and there are 318 more in training in the United States. Foreign nations have demonstrated their interest in the Peace Corps and the desire for assistance from our people. The President feels, however, that the Peace Corps should not be continued on its present basis. Congress should give careful consideration to the Peace Corps and give official approval to its existence. The Peace Corps shows great promise of becoming a major element in our foreign policy. It would be a great mistake to bring it to an end.

Mr. MERROW. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, H.R. 7500, the measure we are considering today, provides for a Peace Corps to help the peoples of interested countries and areas in meeting their needs for skilled manpower. The Peace Corps was started on March 1, 1961, when President Kennedy issued an Executive order establishing the Corps on a temporary basis. The order was based upon a comprehensive report prepared by Robert Sargent Shriver, Jr., former president of the Chicago Board of Education, who had undertaken a study of the Peace Corps proposal at the request of the President.

H.R. 7500 places the Peace Corps on a permanent basis and it is a pleasure to support this legislation. The Peace Corps will, I am certain, be most useful in helping various countries meet their needs for skilled manpower, and it will make a great contribution to the establishment of permanent peace.

PROPOSED BUDGET FOR THE PEACE CORPS

The proposed budget for the current fiscal year is as follows: Private agency and university programs, $26,100,000; administrative programs, $11,400,000; and direct administrative programs training for fiscal year 1963, $2,500,000, making a total of $40 million.

As is stated in the report:

> This $40 million will enable the Peace Corps to have 2,700 men and women in service overseas or in training by the end of fiscal year 1962, and will enable the Peace Corps to enter into training contracts with universities to train additional volunteers during the summer of 1962.
>
> The estimated average annual cost per volunteer is $9,000. This includes all overhead items, training costs, oversea support, and all other cost elements.

INSPIRING PROGRAM

The Peace Corps is, to my mind, an inspiring program. It is designed to promote world peace through assistance to countries which need and want the help of trained manpower. It aims to help others to help themselves which is fundamental and exceedingly important.

The Peace Corps will consist of volunteers who are skilled as teachers, agricultural extension workers, medical assistants, sanitation engineers, construction foremen, mechanics, civil administrators, social workers, and a variety of other occupations. They will be sent to countries which have expressed a desire and a need for their help in the specified field of their endeavor. They will receive brief, intensive training in the language, customs, traditions, and economy of the countries to which they will be sent. Already 50 or more countries have expressed an interest in Peace Corps volunteers and, at the present time, the Peace Corps has announced 10 projects which will operate in 9 different countries. Volunteers have already reached three of these countries. Another 15 projects are currently being evaluated and nearing the stage of completion.

People who enroll in the Peace Corps will work not just for, but they will work with the people whom they are endeavoring to assist. They will live on a scale geared to the level of those people, fraternizing with them, and learning from them while they teach. They will be dispersed throughout the country and not concentrated in urban areas. Thus there will be an opportunity to have close contacts with the population.

COMPENSATION

The financial compensation which members of the Peace Corps will receive while they are abroad will be based on the scale of living in the host country. There will, however, be provision for supplementary pay at home to assure that they will not have served at a great sacrifice or a jeopardization of their future occupations.

Other compensations of Peace Corps service will not only be the personal value of the experience with its numerous facets but there will be the satisfaction of having contributed to the national value of the Peace Corps. This is an investment in the future. The program, while presenting opportunity for individual service in educational, social, and economic fields, will help tremendously in developing mutual understanding.

It will strengthen the cords of mutual interest and comprehension which are necessary to bind together peacefully a world which can no longer afford to—or indeed find it possible to—exist in separate compartments. Those who serve in this project will return qualified to render better service in the field of foreign affairs of the United States. Both by precept and osmosis they will broaden, stimulate, and spread more widely at home an interest in American foreign relations. The very nature of the program underwrites its success. The interest on the investment will be cumulative.

COUNTRY RESPONDS FAVORABLY TO PEACE CORPS

The response of the country to the idea of a Peace Corps is indicative of its value. It appeals to the best motives of mankind. It offers an opportunity to put into practice the idealism, the desire for service and the sense of dedication which is so often frustrated in the ordinary lives of men. It has an aura of adventure and of hopefulness. It has been gratifying to see the enthusiasm throughout our country for a project of such high purpose.

Section 2 of this measure sets forth the declaration of purpose in these words:

> It is the policy of the United States and the purpose of this act to promote world peace and friendship through a Peace Corps, which shall make available to interested countries and areas men and women of the United States qualified for service abroad and willing to serve, under conditions of hardship if necessary, to help the peoples of such countries and areas in meeting their needs for trained manpower, and to help promote a better understanding of the American people on the part of the peoples served and a better understanding of other peoples on the part of the American people.

PROGRAM NOT VISIONARY

The program is, however, not a visionary one. It has been carefully and sagaciously planned. It is the product of consultation among numerous authorities on foreign affairs, educators, and private agencies engaged in similar activities. Great care will be taken in the selection of volunteers who will be sent abroad. There is no requirement that a volunteer must have a college education. Those skilled in crafts and trades may be much needed. Selection standards will, however, be high. Not only will written tests, physical examinations, and interviews be given with a view to determining technical competence and physical

condition, much emphasis will be placed upon suitability, maturity, adaptability, and also motivation. Procedures have been devised for screening those who might wish to use the Peace Corps for subversive purposes. Nor will it be allowed to serve as a platform for proselyting.

OPERATION THROUGH SEVERAL CHANNELS

Peace Corps projects, after approval by the host country as well as the Corps itself, will operate through several channels: First, through contracts or grants to private agencies engaged in similar activities; second, through contracts or grants with colleges, universities, or other educational institutions; third, through programs of other U.S. Government agencies. Skilled or semiskilled workers might supplement the work of existing technical and economic cooperation projects; fourth, through programs of the United Nations. The services of Peace Corps volunteers will be offered to the United Nations for work in technical assistance and development programs; and fifth, through programs administered directly by the Peace Corps. The Peace Corps will supplement our foreign economic aid program but it will not be a substitute for any part of it.

The projects of the Peace Corps will differ from other programs in various ways. There is at present in many of the less developed countries a gap in what may be called middle manpower. As a rule, unskilled labor is plentiful. Expert advisers and capital funds may be furnished by existing programs. But there is, and is likely to be for another generation in many countries, a dearth of college and professionally trained people with various skills, with teaching, and leadership ability as well as operational capabilities. Peace Corps volunteers will work side by side with the native population and sometimes in a subordinate capacity.

PEACE CORPS MADE UP OF VOLUNTEERS

Another primary difference between the Peace Corps and other programs will be its composition. It will be made up of volunteers. Those who serve in it will know that their living standards will not be the same as those of the United States or those of other oversea programs. Another differing feature will be the working of the Peace Corps directly with universities and other private agencies.

PEACE CORPS SHOULD BE A SEPARATE AGENCY

It is because of the fundamental differences between the Peace Corps and other programs that it does not fit into any of the agencies now in operation or contemplated. For this reason, it should be organized under separate administration. In comparison with the cost of other programs, its budget will be modest. As I have already stated, the expenditure for the first year is not to exceed $40 million. This is in sharp contrast with the amounts required to finance other programs. If the Peace Corps is to be incorporated into a much larger program it would not only lose its identity, it would doubtless receive less attention than will be needed to make the new project successful.

An important reason for setting the Peace Corps up as a separate agency is the fact of the enthusiastic response with which it has met in its formative stages.

The country will support a program in which it has exhibited such great interest. That enthusiasm must be maintained. In stirring the imagination of the people the Peace Corps will serve as a vital instrument in the successful operation of our foreign relations.

The program has immediate value, but its long-range value is even more significant. In a world that is rapidly shrinking with the development of the various methods of communication, and from the threat of military inventions, it is essential that means be found to promote congenial living. Operating both for the good of the country it serves and for its sponsor, the Peace Corps is a double-edged instrument with which we hope to wage the peace.

A special study mission to Asia, western Pacific, Middle East, southern Europe, and north Africa—made up of members of the Foreign Affairs Committee, of which Congressman PILCHER was the chairman—stated in its report that it "is convinced that there is a significant number of young Americans trained in agriculture, home economics, and other practical fields of activity who recognize the importance of world problems, particularly those of the less developed countries. It would be of great value not only in creating a favorable impression of the United States but also in promoting sound and basic improvements in economic development if more places for such young people were found in oversea operations. The committee believes that the United States is failing to utilize one of its important assets by not developing a program for using such services. If young Americans with farm background and adequate technical training, who are willing to live in the villages and share in the daily work of the people and who would serve with only a minimum salary and subsistence allowance, could be carefully selected and sent to the less developed countries, they could be unusually effective representatives of the United States." These statements are also included in the report accompanying this bill.

EFFECTIVE AGENCY IN REPRESENTING THE UNITED STATES

The Peace Corps can serve as a most effective agency in representing the United States. Not only will this organization help in solving the needs for skilled manpower in the underdeveloped countries but the members of the Peace Corps living with the population will be able to convey to these people the value of a free society and they will have the opportunity to help in explaining the ideas and the ideals which have made us what we are today—a great free Republic. It seems to me that the Peace Corps can be most effective in the ideological conflict in which we find ourselves.

At the time Robert Sargent Shriver, Jr., appeared before the Committee on Foreign Affairs, I asked him, "Would you address yourself for a moment to just how these people are going to be helpful in this ideological struggle in convincing the people in the underdeveloped areas, that the free system is better than this Communist ideology?"

Mr. Shriver replied:

> In the first place, we share with you the desire that these people be good representatives of the United States along the lines you have just described. For that reason in the training program at each training center an important part of the training is devoted to a study of American principles of government, democratic life, and also to tactics of Communist agitators. We think in the first place we are trying to send overseas people who are well qualified in our own Government vis-a-vis the Communist form of government.

I stated to Mr. Shriver, "I think from what you have said and the way you envision the program is going to be, we can conclude that the Peace Corps will be an important factor in the ideological struggle. You would say that, I assume?"

Mr. Shriver replied:

> Yes; without it having that as its sole objective. This is a byproduct, you might say. Service is the first thing. When the service is well done, the recipient looks to who the servant is, who is providing this, and wants to know more about the society that produced such an individual.

Mr. Shriver is one of the ablest and most effective public officials in the Government today and I am sure that, under his leadership, the Peace Corps will be a powerful instrument in helping others help themselves and, at the same time, a most effective means of making clear to the people with whom they come in contact the value of the free society which they represent.

I have been a supporter of the Peace Corps from the very beginning, and it is my hope that this House will approve H.R. 7500 with an overwhelming majority and that subsequently the funds will be appropriated to put a permanent Peace Corps into operation. This new endeavor in the field of international relations is, I am certain, destined to become one of the most effective programs in foreign policy and is, I am sure, destined to make a monumental contribution to world peace.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

Mr. MERROW. I yield to the gentleman from West Virginia.

Mr. BAILEY. May I ask the distinguished gentleman from New Hampshire if he does not think that we should have a stronger statement of policy on the part of the Congress emphasizing carrying the idea of Americanism abroad and selling the idea of our way of life? I think we have weakened the statement by overlooking that particular point.

Mr. MERROW. I think the gentleman has made an important contribution to the consideration of this bill. I take it from what he has said that he is thinking about the ideological struggle in which we find ourselves. The people in the Peace Corps as representing our society, I think, can be very helpful in that respect.

I am glad the gentleman made the point.

Mr. BAILEY. Mr. Chairman, will the gentleman yield further?

Mr. MERROW. I yield to the gentleman from West Virginia.

Mr. BAILEY. My idea is that they should not go over there as representatives of American business to step up business for American firms that are selling abroad, but that they ought to be selling something far more important than American products, and that is American ideas and American ideals.

Mr. MERROW. Personally, I think they should represent the entire country, represent the ideas and the ideals that have made us what we are at the present time.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. MERROW. I yield to the gentleman from Iowa.

Mr. GROSS. Would the gentleman think it would be a good idea to send some coal miners over there to teach them how to mine coal in these foreign countries?

Mr. MERROW. I think the gentleman addressed that question to the gentleman from West Virginia who is perfectly capable of answering, if he wishes.

Mr. AVERY. Mr. Chairman, will the gentleman yield?

Mr. MERROW. I yield to the gentleman from Kansas.

Mr. AVERY. If I may reply to the gentleman from Iowa, I might point out that before the Committee on Rules, the chairman of the Committee on Foreign Affairs advised us that there was no limitation on age and that they had one corpsman who was 67 years old, and they even offered to enroll the chairman of the Committee on Rules himself.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. MERROW. I yield to the gentleman from Ohio.

Mr. ASHBROOK. I think the point that has just been brought out is very interesting because in all the statements that have been made, it is indicated that they do not want to sell Americanism abroad. I refer specifically to page 5 of the committee hearings where Mr. Shriver himself said:

> Mr. Chairman, there would be no religious proselytizing or political propagandizing. I would say they would be advised to keep their comments of that nature to a minimum, perhaps not to make them at all.

Mr. MERROW. I assume that there would not be such in any specific area.

Mr. HAYS. Mr. Chairman, will the gentleman yield?

Mr. MERROW. I yield to the gentleman from Ohio.

Mr. HAYS. Of course, if the gentleman can understand what he just read, and I am sure he can, that has nothing to do with Americanism. Mr. Shriver was talking about political proselytizing. We do not want them to go over peddling Republicanism or anything like that or selling the Democratic Party. There is a big difference between selling Americanism and selling a political party.

Mr. JOHANSEN. Mr. Chairman, will the gentleman yield?

Mr. MERROW. I yield to the gentleman from Michigan.

Mr. JOHANSEN. I notice in the report that was submitted and this is to be found in the record during debate in the other body, a memorandum prepared by the agency itself and it was suggested that a significant number of these volunteers should be completely turned over to some international agency so that they would have entry into those countries that would find it repugnant to have them, if they came over there under American sponsorship. I am sure there is not going to be any promotion of the United States on the part of these corpsmen.

Mr. MERROW. The Peace Corps will certainly not be turned over to an international agency.

Mr. ASHBROOK. Mr. Chairman, will the gentleman yield?

Mr. MERROW. I yield to the gentleman from Ohio.

Mr. ASHBROOK. I would like to make one statement inasmuch as the gentleman from Ohio did take me to task for what I said. Very specifically, so far as the hearings are concerned, they would seem to indicate talking about the free enterprise system of our way of life, would be political. On page 95, Mr. Shriver again says:

> One of our virtues, I hope, in the Peace Corps, is instead of going over there as agents, say, of the U.S. Government, we go over there and become part of the operating machinery of a foreign government.

I wonder what that means, if it does not mean to not sell Americanism. But, to go on, Mr. Shriver further said:

> We are not Americans over there working for our country, but we are working for the Philippines or working for the Thais.

Mr. HOFFMAN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. MERROW. I yield to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. Do we have a Peace Corps now?

Mr. MERROW. Yes, on a temporary basis.

Mr. HOFFMAN of Michigan. How temporary?

Mr. MERROW. This would make it permanent.

Mr. HOFFMAN of Michigan. How temporary is it? Just as long as the President wants it, he can have it; can he not?

Mr. MERROW. This legislation would make it permanent.

Mr. HOFFMAN of Michigan. Yes, I know. You say, we have it now and it was established under Executive order. Is there any reason why the President must rescind that order?

Mr. MERROW. I presume he could continue it, but I think it would be a fine thing if the Congress would make it permanent.

Those who serve in the Peace Corps will return qualified to render better service in the United States particularly in the field of foreign affairs because they would know more about the countries in which they have lived.

Mr. MORGAN. Mr. Chairman, I yield 5 minutes to the gentleman from South Carolina [Mr. RILEY].

Mr. RILEY. Mr. Chairman, I understand that most of the people who participate or are to participate in this program are young people. On the whole, I have great confidence in the youth of America, in the young people of this Nation. I know there are a few exceptions in any large group, it makes no difference whether they are young or old. Let us consider the proposition which is before us objectively. We draft the youth of this Nation and send them to risk their lives on the field of battle in wars in which they have no part in the making. I believe, then, they should have an opportunity to work as volunteers, as under this program, to establish better relations with other nations, and thus help to promote peace in a troubled world.

We older folks have not made any howling success in establishing peace during the last 50 years, to my knowledge. During that time we have fought three bloody wars and have existed in an uneasy emergency during the rest of the period. Not only that, but we have put a mortgage on every person in this country, even to the third generation of babes yet unborn. Most of this debt is the result of war.

I believe our youth should have an opportunity, then, to work for better relations between our country and the rest of the world, to work by example and precept, by living among them and not altogether by trying to persuade. There has been a lot of persuasion attempted in the past. They will, by living austerely among the people with whom they are to live, show them that Americans can live with and help them. This will mean more in my opinion than anything we can do at this time.

In the work of our so-called foreign aid programs we properly have to work through the local governments. Oftentimes the masses of the people do not understand and do not know all the help we are giving them. Certainly these young people living among the masses can acquaint them with what we are trying to do and the sacrifices we are making to try to help them.

As was brought out by the gentleman from New Hampshire who proceeded me, these young folks will be living and associating with the average people of the country to which they are assigned. They can create a much needed better image of America, I am afraid that our image is not too good in some respects in some of the countries at the present time.

I call your attention to the fact that these young folks are going to live in this old world of ours a whole lot longer than those of us here on the floor this afternoon. They have more at stake than we have. I believe they have a right to try to make the world in which they are to live a place where they would like to live.

In spite of careful screening, of educational and training programs, the Corps is bound to get some misfits. We have some disappointments in the personnel of our own offices, yet I am sure each one of us feels himself competent to select his personnel and is careful in so doing.

I think the experiment is worth a try, Mr. Chairman; certainly, nothing ventured, nothing gained, nothing accomplished. The present efforts have not been successful. I hope this new approach will be approved and that the young people who will have to bear the burden of wars and debts of wars will have an opportunity to try to improve that situation by the passage of this bill.

Mr. MORGAN. Mr. Chairman, I yield 1 minute to the gentleman from Ohio [Mr. HAYS].

Mr. HAYS. Mr. Chairman, I think it is in order to congratulate the gentleman from South Carolina, [Mr. RILEY], on the speech he has just made. He has probably put this debate on the high plane on which it should be kept. I think he made some very cogent points which are in keeping with the kind of dedicated service he has rendered since he has been a Member of the House.

I was glad to note that Members on the floor applauded him. His speech was worthy of applause, and it was the kind of speech you would expect from the distinguished and able gentleman from South Carolina.

Mr. MERROW. Mr. Chairman, I yield 5 minutes to the gentleman from Indiana [Mr. WILSON].

Mr. WILSON of Indiana. Mr. Chairman, I am awfully happy that there is room for a difference of opinion in this august body, because I am going to have to take the other side of this issue, even though it may be unpopular. I have been opposed to this program since its inception, and I want to point out a few reasons.

In my opinion, the Peace Corps bill we are considering at this time is the greatest foreign aid boondoggle ever perpetrated upon the American taxpayer, and perhaps the greatest insult to foreign countries that will be subjected to their gems of wisdom.

I have several reasons for my opposition to this program.

First, for Uncle Sap, as our Government is known to those abroad, to send a group of youthful people, if not juveniles, to do a job in which they are wholly inexperienced and even inadequately trained, is unthinkable. Our seasoned diplomats have done and are doing the world's worst job in diplomacy. Pray tell me, how can we expect inadequately trained and unseasoned kids to do as well? The old saying, "Never send a kid to do a man's job" is certainly apropos in dealing with our most delicate problem of all, international relations.

Another reason: these youngsters should be digging in, so to speak, and getting some experience to top off their formal education. Formal education without experience, proven experience, is questionably and risky.

Another reason: I feel these youngsters may become a part of the problem instead of a part of the answer.

I well remember traveling abroad at various times where we were giving foreign aid and where we had our boys and our diplomats. I have seen the signs spread all over, "Americans, go home."

In spite of all the aid we were giving them in various ways, in spite of the fact we were participating in the defense of their homeland, they were carrying signs that said "Americans, go home."

I well remember near the close of the war when I traveled in some of these countries. In fact in many of them I was asked: "Do you know what is wrong with you Americans?" I said, "No. What?"

I was told, "There are three things. You are overpaid, you are oversexed, and you are over here."

Now, that is the way they felt about us near the close of the war. You people have heard those remarks too. It is nothing new to us.

Mr. Chairman, I would like to be a part of the answer to our international problems, even to the point of supporting a Peace Corps which would have a fair chance of success; a Peace Corps, if you please, built of able-bodied, retired citizens, skilled through the experience that is so necessary to compete successfully in this complex world. I would support a program made up of highly skilled people of proven ability and experience. It would not only be of value to those countries to which they go, but it would solve an important problem at home, namely, the utilization of the time of highly skilled and ambitious people now in retirement.

Mr. Chairman, I am extremely dubious of the cost per person of this project and the money we will have to spend in the future. I am concerned not just with the initial cost, but with the cost of such benefits as are certain to follow, such as medical benefits, pensions, and so forth. This program will eventually run into hundreds of millions of dollars.

Mr. Chairman, I simply cannot be a party to this. It is the greatest boondoggle of all time, cloaked in a mantle of childlike gold.

Mr. Chairman, we have heard talk about $9,000 per year. I have the figures and the facts which show the initial cost is nearer $10,000 a year per person right now. It is going to be much more. There are already proposals by the AFL–CIO that we increase the Peace Corps number to 100,000. Some people are even suggesting that it should be increased to 1 million.

Mr. Chairman, we have heard talk about the ages of these people. I got the facts no later than yesterday from the Peace Corps on Ghana, Tanganyika, and Colombia. The oldest person in these three Peace Corps projects is 32 years of age.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield on that point?

Mr. WILSON of Indiana. I will yield on that point, but I want to complete this.

Out of the 156 who have completed their training for these three projects and been assigned—and this comes directly from the Peace Corps headquarters—the oldest is 32, the average age is approximately 23, and the youngest is 19.

Mr. SMITH of Iowa. I personally interviewed the 17 that trained at Iowa State College that went down to St. Lucia last week, and one of them is 55 years old and had taken a 2-year leave of absence, and had been a schoolteacher in the public schools of Detroit for 2 years.

Mr. WILSON of Indiana. The gentleman had better correct the Peace Corps headquarters' figures, because this data on these three projects came out of their office yesterday. The oldest one of the 156 assigned in these projects is 32 years of age, the youngest is 19 years of age, and the average age is 23. That information came out of the Peace Corps headquarters.

Mr. SMITH of Iowa. I have personal knowledge of this.

Mr. WILSON of Indiana. The gentleman also spoke of experience, but I recall our department of education turned down a teacher's application to go to Alaska and teach. She had taught 42 years, and was on retirement, but they turned her down because they said she had not had teacher training.

Mr. MORGAN. Mr. Chairman, I yield 5 minutes to the gentleman from Georgia [Mr. PILCHER].

Mr. PILCHER. Mr. Chairman, I rise in support of H.R. 7500. Most of you know my stand on foreign aid for the past 8 years. I have based practically all of my criticism on the grounds that we were not reaching the small people around the world; that we were not getting next to the small people.

Mr. Chairman, this is a gamble. This is a game of chance. I do not know whether it is going to work out or not. But we older people and our diplomats have not done so well in our foreign affairs, and in our foreign relations in the past 10 years. Certainly there is much room for improvement.

Mr. Chairman, in Vietnam where there has been more waste and extravagance, and I think even corruption in our foreign aid program, than in any other country in the world, there is a little program like this going on. I think it is one of the finest programs I have ever seen anywhere in any country. This is a program where they bring in the North Vietnamese refugees from the hills. They have an experiment station, manned by young college graduates—agricultural graduates—of this country living in quonset huts, working with the Vietnamese people. This is in the same area where they are giving these refugees 10 acres of land. These young graduates have shown these people how to plant their crops in rows. They are plowing with water buffalo. They are the happiest people I have found anywhere around the world.

Mr. Chairman, I want to assure this: As a member of the Foreign Affairs Committee, if this program does not work, I am going to make a trip—and I think there are several on our committee who are going into the field next year where these volunteers are working—and we are going to bring back a fair report where and when we think it is working. Where we think it is doing a good job, we are going to tell the Congress. Where they have made a failure, or if I think they are not doing a good job, I am going to make a statement to the Congress giving the details of that failure.

But with world conditions as they are now, this entire program will not cost as much as one rocket; it will not cost as much as a big bomber. Is it not worth trying? If you are in a business and going broke you will try anything honorable that comes along if you think it will save your business. Certainly our world affairs are in such shape that we need to try something. I have lots of faith in these young people. I know we are going to get misfits. You will get misfits in any organization. But I believe the majority of these young people are going to be dedicated, hard-working people. The only thing I would suggest is, that in selecting these volunteers, we select people who we think are dedicated and have their heart in it.

For instance, I have seen a school teacher with only a little certificate that was more dedicated and did a better job teaching school than some of the Ph. D.'s.

Mr. HAYS. Mr. Chairman, will the gentleman yield?

Mr. PILCHER. I yield to the gentleman from Ohio.

Mr. HAYS. Does not the gentleman think, for example, that the people we sent to Ghana who have had 4 years of college and all of whom have a teacher's training certificate in English, even though the gentleman from Indiana [Mr. WILSON] would condemn them for being inexperienced, are going to have to get experience somewhere; and I wonder how many thousands of inexperienced teachers are going to be teaching in America this coming year. The fact that they have trained for 4 years would indicate that we are not sending out inexperienced, immature, untrained people. They have trained for exactly what they are going to do.

Mr. PILCHER. The gentleman is correct.

Mr. BRADEMAS. Mr. Chairman, will the gentleman yield?

Mr. PILCHER. I yield to the gentleman.

Mr. BRADEMAS. Mr. Chairman, I would like to say in response to what was said by my colleague from Indiana that some years ago when I was a student in college I went on a Peace Corps-type expedition, working with Aztec Indians in the mountains of rural Mexico. We were college students. Some of us were premedical students who were able to go out and vaccinate some of the Indians against various tropical diseases. Others were students of agriculture who were able to show the Indians how to raise better crops. Other students were able—and I include myself among that group—simply to work with our hands and help them build a playground and show them little things like calisthenics, which was a great, new invention to them in rural Mexico. We were not people of profound experience in the world, and yet I can assure you that later observations have shown that our group and successive groups left a significant impact for good upon the people of that rural community in the mountains of Mexico.

So I want to disagree with the gentleman from Indiana.

Mr. BOLAND. Mr. Chairman, will the gentleman yield?

Mr. PILCHER. I yield to the gentleman.

Mr. BOLAND. Mr. Chairman, I am delighted to find the gentleman from Georgia espousing this particular bill. As the membership of this House well knows he is one of the best traveled members of the Committee on Foreign Affairs in the remote areas of this world, to find out precisely how our foreign aid program has worked. I think perhaps some of the best reports that have been filed in the Congress have been filed by the gentleman from Georgia. As has been suggested, when he is in an area, he looks at more than just the trees. He looks at the program. I think he has been disappointed in a great many areas with this program and the way it has worked.

I think that, finding himself as he does now in agreement with this kind of legislation, I am sure he recognizes better than most of us the importance that this particular program will have in the free world and in those areas where we have got to build up, develop friendships. I want to compliment the gentleman on a very solid discussion of this measure.

Mr. PILCHER. I thank the gentleman.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. PILCHER. I yield to the gentleman from Iowa.

Mr. GROSS. Does the gentleman have any idea how much we are now spending on these 9,000 so-called technical experts all over the world? Is the gentleman saying in his statement that these are not dedicated people?

Mr. PILCHER. I do not care if we spend $10 billion if this group can help bring on world peace and can contribute to saving the life of one American boy, or if it can help us create a better understanding with people around the world. I am willing to give the program a try. I do not know whether it will succeed and neither does the gentleman. It could succeed, or it may not, but I think at this time, that we are going to have to try and do something. We have tried everything else and it has not worked too well.

Mr. GROSS. We have tried everything else. We have tried everything without telling these people to lift themselves with their own bootstraps; but I do not know how you are going to lead them around by the hand.

Mr. PILCHER. Nobody is going to try to lead them.

Mr. GROSS. But this has no other function.

Mr. PILCHER. We are going to try and create a better understanding and sell America to the people around the world and help them in their schools and clinics and agriculture, and in other ways. If we can but create a better climate and atmosphere with and for the other free peoples of the world, then with this added friendship, perhaps our solid front presented to our common enemy will make him think twice before he leaps.

Mr. MORGAN. Mr. Chairman, I yield such time as he may desire to the gentleman from Wisconsin [Mr. ZABLOCKI].

Mr. ZABLOCKI. Mr. Chairman, I rise in support of the proposed Peace Corps Act. I believe that this is an important and constructive piece of legislation, and I hope that it will receive prompt approval of the House.

I know that it is not necessary for me to review the history of the proposal embodied in the bill before us, nor the many things which have been said and written about it. The Peace Corps is an imaginative proposal, and it has received active support of many responsible people throughout our Nation. The Peace Corps, if properly managed, can make an important contribution to the attainment of the objectives of our foreign policy. It can assist in the economic development of the less developed countries. It can provide aid at the grassroots level to peoples who wish to remain free and to attain a decent standard of living. It can promote better understanding abroad of the United States, of our willingness to help those who help themselves, and of our dedication to the cause of peace, justice, and freedom in the world.

These are important considerations. If the Peace Corps can live up to its expectations, and at the same time provide valuable training and experience to Americans serving in it, it will have done its job well. It will be worth every penny of the $40 million that the legislation authorizes for this project.

Mr. Chairman, the Committee on Foreign Affairs has given careful and thorough study to the Peace Corps bill. As reported to the House, the bill contains a number of amendments adopted by the committee, strengthening and improving this legislation. Every effort has been made to prevent any unnecessary expenditure of the taxpayer's dollars, and to start this project on a sound and manageable basis.

I believe that the bill before us is a sound bill, and that it should be enacted. I urge the membership of the House to vote for it.

Mr. ZABLOCKI. Mr. Chairman, I ask unanimous consent that the gentleman from New York [Mr. CELLER] may extend his remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. CELLER. Mr. Chairman, it has been rightfully said that the Peace Corps deserves an opportunity to prove itself. One of the obligations that a shrinking world has thrust upon us is the need to learn how other people live and to inform them how we live. The Peace Corps can help us achieve these purposes.

I support this program. It is person-to-person diplomacy. I think we can approve the Peace Corps with our eyes wide open. We should neither overestimate nor underestimate its potential value. We should give it a fair opportunity to prove itself by voting the full authorization for 1 year.

At the outset, $40 million should be considered adequate. This will enable the Peace Corps to put approximately 3,000 men and women in training or overseas by the end of fiscal year 1962. If that amount is reduced, it means that fewer qualified people would be enlisted—and in terms of total effectiveness, this would mean that what is already a modest program would be reduced to such a point that its impact would be largely lost.

I am glad to note, Mr. Chairman, that the Peace Corps has instituted a thorough screening and training program for volunteers. This includes personal interviews, references, tough examinations, physical and psychiatric examinations, and a full field investigation by the Federal Bureau of Investigation. We shall know that persons who go overseas as Peace Corps volunteers will have been carefully selected and prepared for the arduous jobs they must do and the hardships they will face.

It should be understood, Mr. Chairman, that Peace Corps groups will not go rushing into a nation uninvited. They will work in that country at the express request of the host Government and on projects which will further the development of the people among whom they work. If there be any doubt about the practicality of the tasks they will be doing, let me describe briefly the projects that have already been announced:

In Colombia, Peace Corps volunteers will work side by side with 64 Colombians on community development work in small communities as a part of that Government's community action program. They will construct feeder roads, assist in improving cooperative farms, work in community schools, and help build adequate health facilities.

In Tanganyika, Peace Corps volunteers will survey feeder roads and help in their construction. They will oversee and help in the maintenance, grading, and supervising of main roads. They will conduct basic geological mapping. I might point out that one of the volunteers going to Tanganyika is a young engineer from a major New York firm who has been granted a 2-year leave of absence without pay in order to serve in the Peace Corps.

In India, volunteers will work with rural housing teams, in industrial training institutes, and in agricultural implements workshops.

In Nigeria, Peace Corps volunteers will serve as secondary school teachers of biology, chemistry, math, English, and history. In Ghana—where, as in Nigeria, there are serious shortages of teachers—volunteers will be teaching various secondary school subjects.

The cost of a Peace Corps volunteer, Mr. Chairman, is very reasonable. Sargent Shriver, Director of the Corps, estimates it to be $9,000 a year—and that includes everything; administrative costs, transportation, living expenses, medical services, and the $75 for every month of service successfully completed in the Corps.

I might point out that the average cost per year of a grade 4 technician sent overseas under the existing aid program is $18,200—and the division of world missions of the Methodist Church estimates the cost of a missionary to be $6,850 for 1 year plus the cost of selection and training.

Peace Corps volunteers, Mr. Chairman, will have to be prepared to sacrifice what most of them consider elementary comforts. They must be physically fit. They must be men and women of good will and must have the zeal of hardy missionaries. By example, they must win friends for America and be living symbols of our way of life.

I believe they will do this.

Mr. MERROW. Mr. Chairman, I yield 5 minutes to the gentleman from Massachusetts [Mr. CURTIS].

Mr. CURTIS of Massachusetts. Mr. Chairman, I rise in support of the bill, and should like first to answer those who seem to regard the Peace Corps as an idealistic boondoggle. On the contrary, it is a very practical and patriotic program which will help the United States to meet one of the great challenges of the cold war. The Soviet bloc nations have been outdoing us in their efforts to propagandize and infiltrate developing and uncommitted countries. Our country must make a greater effort.

It has been said that we need a better worldwide campaign of public education, and surely the presence of dedicated young Americans, working shoulder to shoulder with people of other countries in an effort to improve their lot, will help show those people what the United States stands for, and the kind of young men which it produces. It is expected that Peace Corps volunteers will work with a missionary zeal and a spirit of dedication. I have confidence enough in the youth of America to believe that that ideal can be realized. The actions of these young men in the Peace Corps will speak louder than words.

The need for the United States to do more in matching the actions of the Soviet bloc nations in sending large numbers of technicians and agents to other countries was brought home to me by the experience of a man I know who was sent as a teacher to Ghana under the auspices of the State Department.

He was engaged in teaching athletics in Ghana, and he made pretty good progress for a while. Then he found he was being undercut. He found that people were going to his students and telling them not to pay any attention to him, that he was just an emissary of a capitalistic country. I have here a letter of last December in which his wife described these happenings. It bears the postmark of Accra, Ghana, and says:

> There is great anti-American feeling here in Ghana now. This has been building up since July. It wasn't like this our first year here. I don't know how it will end, but we see more and more Russians and Chinese. The U.S. flag is really trailing.

Mr. Chairman, our country has not done as well in the cold war as we should. We are being outmatched. The other side is spending 10 times more on propaganda than we are. They are sending many time as many agents around the world, like these Chinese and Russians mentioned in the above letter, than we are.

As a member of the Committee on Foreign Affairs, I know that we have a point 4 program. It is doing good work. But we must do more. This program enables American youths who are idealistic and willing to work under hard conditions, to show the people in these developing and uncommitted countries what our fine, devoted, and dedicated American youth look like. Their work will surely be a fine influence for our country.

This program must not be confused with something that I have heard called blank cartridge diplomacy. It is a very practical way to influence the peoples of the world in the way we want to see them influenced.

Mr. Chairman, I was glad to hear the gentleman from Georgia, [Mr. PILCHER] address the committee a few moments ago. I was with the gentleman on the trip to Vietnam. I saw those American boys, recent graduates of agricultural colleges, living there under conditions of hardship and working shoulder to shoulder with their Vietnamese counterparts, at th's agricultural experimental station. That is the kind of program that goes to the grassroots, and is the sort of thing we can expect from the Peace Corps.

I felt some trepidation when the gentleman from Georgia rose to address the committee, because I know how influential he can be. I recalled with what effect he spoke in opposition to the foreign aid bill a few weeks ago. So it was all the more pleasing to hear his remarks at this time.

One member of the Committee on Foreign Affairs told us that she had sent out a questionnaire to the people in her district in rather large numbers and that 62 percent were in favor of the Peace Corps.

Finally, Mr. Chairman, let us think of what this program may do for some of our own youth. The Director of the program, Hon. Robert Sargent Shriver, Jr., told us about some of the training programs. His remarks from page 13 of the hearings, are as follows:

> Let me take a typical case of a typical training program. This would be just like the

others in general. Perhaps it would help to answer some of your questions. One of them, let's say, is the training program for Tanganyika. That is where we first started. It is at El Paso, Tex. The curriculum there is a 66-hours-a-week training program, Monday through Saturday night.

It consists of six large components. First, there is a large amount of training in the history, customs, et cetera, of the country they are going to. Second, there is a large component of American history, Government politics, and so on. In that area we also give instructions in what they might expect in the way of anti-American activity in the specific country. Third, there is a course given by the Public Health Service in health practices that should be followed when living in that particular country, tropical living, for example. Fourth, there is a large component of physical fitness, which would be health exercises and toughening. And, fifth, there is a big component of language.

Sixth, there is additional training in the specific skill that these people will be expected to carry out in the country to which they are going. To show you how the detail—how we attempt to get down to detail—we have geologists in training to go to Tanganyika. We have six or seven down there so it is possible for us to drop off two and still have four. We have them working under the direction of geologists from the University of Texas. They are doing fieldwork in geology.

We then invited the head of the geology department from the Government of Tanganyika to come to this country and go there and see if the kind of training our people were getting was the kind they wanted. He said the training was fine, the faculty was good, but the actual rocks on which they were working were not the kind of rock they would be working on in Tanganyika. We asked him to tell us what they needed. The people at the university said, "We have rocks like that 100 miles from here." These geologists were transported to that location and the man from Tanganyika said that is the right kind and they have been working on that rock.

This training program at Texas Western was conducted there, first, because this used to be the Texas College of Mines. Therefore, they had good geology, civil engineering, and surveying. They had field camps where fieldwork could be done. Second, the temperature and even the terrain at El Paso were similar to the temperature and terrain in Tanganyika.

Third, it just happened by good fortune that they had a man on their faculty there this summer who was qualified to give instruction in Swahili, which they will be speaking in Tanganyika.

After that training program is completed in Texas this particular group will go to Puerto Rico. In Puerto Rico, up in the mountainous jungles of Puerto Rico, we have a former CCC forestry camp where these people will be given an additional type of experience and training. First they will be living in tents, not houses. They will not be utilizing modern sanitary plumbing facilities. They will be taking long hikes, 20, 25 miles. They will be doing swimming under the training of expert swimmers.

They will be getting the experience of working in villages in Puerto Rico which are somewhat like the villages they will be encountering in underdeveloped countries. Their houses are built on stilts and have thatched roofs. People in this particular part of Puerto Rico are not so well educated. They don't have a high economic level. Some of our volunteers will get the experience of seeing what it is like to live in the tropics, working with people in underdeveloped areas before they get to Tanganyika.

The Government of Tanganyika has established a training camp there near Mount Kilimanjaro, where for 2 additional months our volunteers will get additional training in Swahili, in civil engineering and geology, preparing them for the work they will do there. Then they will go into the field.

We think a variety of things will be accomplished. No. 1, we will have gotten rid of anybody who hasn't got what it takes. It is a tough course intellectually, physically, and morally. And, second, we believe that every volunteer will have a degree of proficiency in Swahili. They will not be embarrassed to start talking. They will be speaking it before they run into the native people. They will have good instruction in health out of a book, and then in practice in Puerto Rico.

In addition, I might say, since you asked about it, that there will be a U.S. Public Health Service doctor detailed to go with our mission to Tanganyika. He will be stationed in the hospital there, where most of the time, if not all the time, he will be working as part of the medical program in this hospital helping Tanganyikans—doing medical work for them. In addition to what he does for them he will have the responsibility for the medical safety, if you will, of our own people. So he will be like a circuit court judge. He will go from place to place where our volunteers are working, seeing to it that they are following proper medical practices, and so on.

We think they will arrive in the field well equipped in language, in spirit, medically, well equipped in their skill, well equipped emotionally for the work they are going to do.

Such a statement encourages us to believe that these young men will be capable of worthwhile accomplishment, and that their experience will be of great value to them.

Mr. HOFFMAN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. CURTIS of Massachusetts. I yield to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. I do listen with a great deal of pleasure to the gentleman from Georgia and to the gentleman from Massachusetts who is now addressing us. Will the gentleman tell me, what is the difference between the objective of these people who are going abroad and the freedom riders who went south?

Mr. CURTIS of Massachusetts. I cannot see any similarity.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MORGAN. Mr. Chairman, I yield such time as he may desire to the gentleman from California [Mr. COHELAN].

Mr. COHELAN. Mr. Chairman, the question has been raised, "Exactly what will Peace Corps volunteers be doing in the countries where they serve?" I think the best answer to that question is to look at the projects that have already been announced by the Peace Corps.

In Colombia, 64 volunteers will be working side by side with 64 Colombians on community development projects in small Colombian communities as part of that Government's rural action program. They will assist in activities such as construction of access roads, building small farm buildings, raising small farm animals, cooperative farm improvement, and the development of programs for community recreation.

In Tanganyika, 4 civil engineers, 6 geologists, and 20 road surveyors have been requested by that Government to survey feeder roads and to help in their construction; to oversee and help in the maintenance, grading, and supervising of main roads; to help construct small bridges and culverts; and to conduct basic geological mapping. These volunteers will be performing operational functions under the supervision of the Government of Tanganyika.

In India, 10 volunteers will supplement the work of agricultural extension advisers, 8 will help fill the gap caused at village-level training centers by a shortage of Indian training specialists. Two volunteers will work in an industrial training institute for small industry, and another two will be stationed at a small agricultural implements workshop. Additional volunteers will work with a rural housing team, demonstrating the better utilization of existing building materials and developing new construction materials which can be used by the villagers.

In Chile, 51 men and women will work with the Chilean Institute of Rural Education, a nonsectarian, private organization, in family education, hygiene, organized recreation, home economics, and small farming methods and demonstrations.

In Ghana, 70 volunteers will teach math, English, biology, general science, and French in that country's secondary schools. The Government of Ghana, faced with a severe teacher shortage, Mr. Chairman, is providing the volunteers with living quarters and an allowance of $165 per month, allowing them to live on a scale comparable to that of Ghana's secondary school teachers.

In the Philippines, 150 volunteers will serve as teachers' aids in elementary schools scattered throughout the most rural areas of the Republic.

In Nigeria approximately 100 volunteers will be teaching biology, chemistry, math, English, and history in secondary schools.

Seventeen volunteers have been assigned to projects in the Federation of West Indies. They will be working on the island of St. Lucia, in projects designed to increase livestock production, to develop irrigation systems for small farms, to introduce soil conservation techniques, and to improve vocational and health education. Programs of rural development are urgently needed on this island where people subsist on diets inadequate for basic health, and the work of Peace Corps volunteers—in animal care, horticulture, extension work, home economics, and teaching—will help to implement a program of development that may well become the pattern for future improvement of the Federation's people.

I submit, Mr. Chairman, that these projects already announced by the Peace Corps are practical, down-to-earth, people-to-people programs, which can make a very substantial contribution to human development and better relations between other countries and our own.

Mr. MORGAN. Mr. Chairman, I yield 5 minutes to the gentleman from Georgia [Mr. JAMES C. DAVIS].

Mr. MERROW. Mr. Chairman, I also yield 5 minutes to the gentleman from Georgia [Mr. JAMES C. DAVIS].

Mr. JAMES C. DAVIS. Mr. Chairman, almost without exception, everyone wants peace. Just about everyone is willing to take every possible step to preserve peace and avoid war.

That desire does not justify impractical, needless, extravagant moves at a time when our resources are being strained to maintain military strength in this time of crisis.

The establishment of the so-called Peace Corps would extravagantly and needlessly duplicate the work of no less than nine international organizations that are already being supported by American taxpayers.

These overlapping organizations are the World Health Organization; the Pan American Health Organization; the Organization of American States; the Inter-American Children's Institute; the Caribbean Commission; the Food and Agriculture Organization; the Inter-American Institute of Agricultural Sciences; the Colombo Plan Council for Technical Cooperation, and the newly named Agency for International Development.

Last year, we contributed about $19 million to the first eight organizations I have just named. This year we are being asked to contribute $23.6 million to them. Of course, we plan to hand out some $158 million to all the international organizations that are now in existence. But, I am concerned here only with those agencies that are already performing the task that would be duplicated by the Peace Corps.

The last named and by far the most expensive of these nine organizations is the Agency for International Development. It is the successor to the International Cooperation Administration, which has been allowed to collapse, finally, under the weight of its own ineffectiveness.

The International Cooperation Administration, and its predecessor organizations, have helped distribute $95.075 billion in the last 16 years to foreign countries in an effort to build up their economies and make them self-sustaining.

This represents the most expensive relief program in the history of the world. Yet, even the most ardent supporters of foreign aid concede that the program has failed to accomplish its task.

And, now, it is proposed that we create yet another high-priced agency, a hastily planned, hurriedly organized agency—the Peace Corps—to enter the same field. Most of its activities would duplicate work that already is being carried on.

If these nine organizations are doing their jobs—and they claim to be—then I do not see the logic, the commonsense, of shackling the taxpayers with another agency that, no matter how humanitarian in intent, would be entirely superfluous.

If the present international organizations are not doing their jobs, then we should discontinue financial assistance to them and reexamine our entire concept of what needs to be done in our visionary attempt to make over the world in our own image.

It has been said that the Peace Corps would win friends for us in foreign lands. That implies that we lack friends abroad, notwithstanding the expenditure of $95 billion in foreign aid.

If this implication is true, and the evidence indicates that it is, I do not believe that the creation of a Peace Corps would have any perceptible influence on world opinion. Indeed, the Communists already are telling the underdeveloped countries of the world that the Peace Corps is a capitalistic plot to plant spies within their midst.

We are told that members of the Peace Corps would serve also as teachers and as technician helpers in the fields of education, public health, agriculture, urban renewal, and public administration.

One American agency alone, the International Cooperation Administration, is performing all these tasks at the present time. This organization, of course, is now designated as the Agency for International Development. But only the name has been changed. It is still in the money-lending and money-giving business. This organization has an estimated 9,000 trained technicians scattered around the globe. It is costing us an average of almost $15,000 to send each of these 9,000 technicians into the field.

The Agency for International Development is supposed to help underdeveloped countries build roads. The Peace Corps also would engage in that work.

The old International Cooperation Administration's record in the roadbuilding field left much to be desired.

For example, on June 24, 1961, our Ambassador to Cambodia, the Honorable William Trimble, warned the Department of State that American prestige in that southeast Asian country was deteriorating.

Ambassador Trimble explained that the so-called Cambodian-American Friendship Highway in Cambodia was falling apart and, as a result, we were losing face.

This 130-mile highway was built only 2 years ago under our foreign aid program. We sent alleged experts over to Cambodia to engineer the project. The road was supposed to represent the best in American roadbuilding know-how.

The initial cost of Friendship Highway was put at $15 million. Then it was doubled to $30 million after construction had started. It is said that rain has now all but washed away this supposed tribute to American knowledge.

The road is full of cracks and crevices. It is practically impassable. Ambassador Trimble reported that Prince Sihanouk recently started out to traverse the road by automobile; that it was in such poor condition that he was forced to turn back.

The Cambodian press has held up the road as an example of bad workmanship by Americans. The Communists point to it with scorn. And, President Kennedy has asked Congress for another $2.7 million for emergency repair work on the road.

This road was designed to cost $15 million. The investment has grown to $32.7 million. It may go higher. But even worse, the poor workmanship has caused us to lose face in Cambodia. If our highly paid experts have made this miserable record, is it likely that a group of hastily assembled amateurs can improve upon it?

The Agency for International Development, as it is now known, is supposed to help underdeveloped countries improve their agricultural methods. The Peace Corps would also be engaged in that work. Our record in this field also leaves much to be desired.

Before beginning a new program, the existing program should be improved and perfected.

We have sent millions of dollars worth of expensive tractors, reapers, mowers, and other mechanized equipment to underdeveloped countries.

But these illiterate and primitive farmers want no part of this equipment. They are content to go on farming with the same primitive implements that their forefathers used. Meanwhile, the tractors, reapers, and mowers stand abandoned in the hot sun—or are used as chicken roosts.

These farmers did not seek our help—they did not accept our help.

By no means are these isolated examples of the ineffectiveness of our campaign to improve the lot of less fortunate countries.

I take no pleasure from the glaring weaknesses in our foreign aid programs. Certainly, we all would like to see the eradication of poverty, hunger, disease, and illiteracy.

But we cannot let humanitarian intent blind us to the facts. And the fact is that in 16 short years we have taken almost $100 billion from our own economy and handed it over to foreign governments with little result.

Some of this money has been wasted; some has gone into the pockets of dictators and strong men, who have less compassion for their own people than we do; some of this money has been misspent. I trust that some actually has filtered down to the people.

I think the time is long past when we must come to our senses, do an about face and begin practicing rigid economy.

Now, the Peace Corps proposes to get into the malaria eradication business. This field is being amply served at the present time.

The Agency for International Development is carrying out bilateral malaria eradication programs in 24 countries. The World Health Organization and the Pan American Health Organization also are engaged in stamping out malaria. We are contributing a total of $9 million to these two health organizations this year. Of that total, $5.5 million is earmarked specifically for malaria eradication programs.

The Pan American Health Organization reported earlier this year that it

had been successful in eradicating malaria in Martinique, Puerto Rico, Chile, and Barbados. The organization reported significant progress toward eliminating malaria in a number of other countries, including Panama, Argentina, French Guiana, Venezuela, and Guadaloupe.

The Pan American Health Organization said it has trained some 200 workers from 40 countries to lead the fight against malaria in their home areas.

The larger World Health Organization reports similarly that last year it assisted in more than 600 health projects in 126 countries and territories. More than 250 of these projects were concerned with the eradication of communicable diseases, such as malaria and tuberculosis. The World Health Organization is concentrating heavily on developing rural health services and training public health workers.

Dr. H. van Zile Hyde, who is assistant to the Surgeon General for International Health, the U.S. Public Health Service, testified on August 21, 1961, that the ancient problem of malaria is rapidly being solved.

Dr. Hyde told a House subcommittee of the Committee on Appropriations that 5 years ago 1.3 billion people lived in malarious areas. Today, 300 million of these people are living in areas where malaria has been totally eradicated; 55 million live in areas that are almost free of malaria.

Dr. Hyde testified further that a total of 526 million people are now being protected against malaria by systematic attack programs. This means that 68 percent of the original 1.3 billion people who just 5 years ago were imperiled by malaria are now protected.

The United Nations Health Organization is asking for $2.5 million this year to continue its malaria eradication program; the Agency for International Development seeks $30 million for bilateral programs against malaria.

Existing organizations are waging and winning this fight. Why should another agency be created to duplicate this work at great expense?

Now, the Peace Corps proposes to send schoolteachers to foreign countries.

The Agency for International Development will continue education programs that were being financed and carried out by the old International Cooperation Administration.

We are directly supporting schools in Turkey, Lebanon, Egypt, Greece, and Honduras at an overall cost of $12.6 million a year. We are financing the construction of a college in Ethiopia. We are conducting 214 separate educational projects in 41 countries of the world.

This program is costing us $45.5 million in Africa; $7 million in the Near East; $12.9 million in the Far East; $15.7 million in Asia, and $2 million in Europe. This adds up to $83.2 million.

The United Nations Educational, Scientific, and Cultural Organization has been engaged in the education field for a number of years.

UNESCO, as this agency is commonly known, supplies textbooks and other classroom equipment to underdeveloped areas. UNESCO promoted teaching and research; it helps member states—and there are 98 of them—improve and broaden their school systems. We are contributing more than $4.6 million to UNESCO this year.

Still other international organizations that are concerned with education are the Inter-American Children's Institute and the Caribbean Commission.

The Inter-American Children's Institute, as the name suggests, serves the Latin American countries. It concerns itself with training native schoolteachers. It also develops social services and formulates plans for basic nutrition surveys. We are contributing $32,000 this year to the Institute.

The Caribbean Commission administers training programs and cooperative education. It also offers regular services in such fields as plant and animal disease reporting. Our contribution to the Caribbean Commission this year amounts to about $83,000.

Now, the Peace Corps proposes to teach agricultural methods in countries which it would serve. There is hardly enough room now for all the organizations that are teaching farm techniques in underdeveloped countries.

The Agency for International Development is active in the agriculture field. So are the Caribbean Commission, the Organization of American States, the Food and Agriculture Organization and the Inter-American Institute of Agricultural Sciences.

The Food and Agriculture Organization is a specialized agency that is concerned, in the main, with land and water development, animal breeding and crop production. It conducts agricultural extension programs, home economic classes, and forestry. It even has a branch dealing with the uses of atomic energy in agriculture.

This Food and Agriculture Organization is an agency of the United Nations. Eighty-one countries of the world—from Afghanistan to Yugoslavia—are members. We contribute about $3 million a year to the organization.

The Inter-American Institute of Agricultural Sciences serves Latin America. Its activities include research in the breeding of dairy and beef cattle, crop experiments and the training of native farmers.

The Institute last year reports that it trained 252 farmers, the highest number in its history—53 of these farmers are candidates for degrees as masters of agriculture. The Institute also is making progress in securing higher yields from corn, coffee and rice crops. Our share of the cost of this organization is $227,000 this year.

The Organization of American States is training and assigning native experts to assist member nations in solving specific problems related to the entire spectrum of economic and social development.

Thus, individual countries in Latin America are being afforded the opportunity to improve their status through the assistance and knowledge of their own people. Can the Peace Corps do more of this, or do it better? I think not.

The Peace Corps also would duplicate the work of the Colombo Plan Council for Technical Cooperation. Membership of this organization is made up of 18 nations in south and southeast Asia.

The Colombo plan was set up to combat poverty and to stimulate economic growth among its member nations. The organization reported "very heartening progress" last year.

During last year, external aid valued at more than $1.7 billion was made available to member states by the Colombo Plan. The organization made some 4,300 training awards, and the services of 500 experts and a large number of consultants to member states requesting them.

It is heartening that the people of these emerging nations are striving to help themselves.

The Peace Corps in one way or another would duplicate and overlap the activities of almost every service that already is being offered these people. The truth of the matter is that these nine organizations in many cases are already duplicating the work of each other.

Now, just the other day, Secretary of the Army Stahr endorsed a recommendation that the military establish its own version of the Peace Corps. Tentative plans for a military Peace Corps call for dispatching specially tailored military units with men having skills in civil engineering, public health, transportation and communications to underdeveloped countries requesting assistance.

This is precisely the duties that are contemplated for the civilian Peace Corps and they are precisely the duties that are already being performed for good or bad by the nine American and international organizations that I have been discussing.

But the duplication does not end even there.

Private organizations—such as Protestant and Catholic churches—have an estimated 40,000 skilled missionaries in foreign countries. They are spending in excess of $200 million a year to build hospitals, train native workers, combat disease and poverty, and to teach the illiterate to read and write.

Taking a realistic view of the Peace Corps, I do not see how inexperienced youth can succeed in elevating the living standards of much of the world when mature knowledge—backed up by billions of dollars from both public and private sources—have not succeeded.

President Kennedy issued an Executive order last March setting up a so-called pilot Peace Corps for the purpose of determining if the idea was feasible. He appointed his brother-in-law, R. Sargent Shriver, Jr., to direct the project.

Mr. Shriver says that Peace Corps members will receive no salary. But he concedes that each member would receive $75 a month plus allowances and benefits. The $75 a month stipend would be held in escrow for payment to the Peace Corps man upon completion of his or her tour of duty.

Each Peace Corps man would receive a living allowance—the exact amount to be determined by the economy of the country to which he is assigned. This allowance, for example, would amount to $224 a month for those stationed in Tanganyika, which is one of the first countries to which Peace Corps members have been assigned.

This would be a very favored group. Each member of the Peace Corps would receive a travel allowance, plus medical care, plus a $10,000 life insurance policy while he is in service which would be paid for from Peace Corps funds. We do not do this for classified civil service employees. Members of Congress pay part of the premiums on their policies.

When all the costs of supporting and training each Peace Corps man is added up, the total averages out at $9,180 a year. Although this figure in itself represents a considerable sum of money, it applies only to the lower echelon.

The upper echelon would be rewarded much more handsomely for participating in a program that is supposedly based on self-dedication and personal sacrifice.

Mr. Shriver appeared before the House Subcommittee on Manpower Utilization, of which I am chairman, to appeal for the creation of 30 so-called supergrade positions for the administrative staff of the Peace Corps. These supergrade positions range up to $19,000 a year.

The Peace Corps wants one supergrade executive for each nine employees who would be stationed in Washington. By contrast, the Department of Defense has only one supergrade position for each 1,290 employees.

In addition, 10 other administrative personnel of the Peace Corps would be paid up to $15,000 a year. So, 40 people in the Peace Corps will be receiving salaries in the $15,000 to $19,000 bracket.

The initial cost of the Peace Corps is only a "foot in the door" to a much more expensive program. Already some of the more vigorous supporters of the Peace Corps are envisioning vast increases in the size of the proposed 2,700-member organization.

I have no doubt that once we vote this Peace Corps into being, it will be with us for many years—regardless of its effectiveness. I have no doubt that it will be constantly expanding, as is always the case with these governmental agencies and bureaus.

Now, the youth of America have a tremendous opportunity to serve their country in these critical times. We are being told in somewhat alarming tones that the United States is suffering acutely from a shortage of qualified teachers, scientists, engineers, missile experts—that we actually are lagging behind Soviet Russia in these vital fields.

The Peace Corps threatens to siphon off a lot of young people, and send them off on a 2-year experiment that appears doomed to failure.

I believe that the Peace Corps applicants could better serve America and humanity by studying for the professions, such as law, teaching, science, medicine, and the ministry.

We cannot strengthen the weak by weakening the strong.

And that is one of the results of the proposal we are considering today.

Mr. MERROW. Mr. Chairman, I yield to the gentleman from Massachusetts [Mr. CONTE] for a unanimous-consent request.

Mr. CONTE. Mr. Chairman, increasing numbers of the world's underprivileged people are seeking a greater participation in their own self-advancement. Whether or not peace is secured for all time depends to a large extent on the efforts made by the more fortunate nations in associating themselves with the hopes and ambitions of the less fortunate, not only through the sharing of wealth, but through humanitarian service which is neither condescending charity nor self-seeking.

In the sharing of wealth, the people of this Nation have indeed made a generous contribution with the outpouring of material aid. The problems we are confronted with today, however, call for a more profound and dramatic expression of this attitude and it is because I believe the Peace Corps can become that expression of American democracy in its most practical form that I support this bill and the appropriation necessary to carry out the program.

I look upon this program and what we are attempting to achieve rather as I would view an economic equation of supply and demand. We have in this country, thousands of young people, newly graduated from college, motivated by a force to do good work on behalf of the United States in areas of the world where people are living in dire, primitive conditions. Here is the supply of manpower we have to lay out roads, develop villages, modernize agriculture and teach school.

On the other hand, the demand arises in areas of the world where technical and academic skills are in short supply and where the very conditions of life present a challenge to the devotion and vigor of young people educated in a healthy, free society. This is the supply and demand of which I speak. When our people put their hands and their skills to work in the development of this two-thirds of the world which is striving to advance, they are going to make a real contribution to world peace, for the economic advance of these nations—as we all recognize—is one of the conditions of peace.

In case any of my colleagues should think that I have become a pie-in-the-sky idealist, I want to assure them that I am not without misgivings about the program. While I am hopeful that the mistakes that will surely accompany a new program of this type will be small, we can anticipate, even with the best administration, that they will occur.

There is also a danger inherent in us all that we might expect too much in a short space of time. We have all had experiences related to us by people who have spent some time living in primitive and unsanitary conditions. Some of those I have talked to have emphasized that the parent sponsoring body did not expect any real return during the first year of operation. It is estimated that almost a year elapses before a person can become fully assimilated and adjusted to life under these conditions and able to make a practical contribution. The feeling of apprehension that has exorcised me most is that the program may fail because we expect too much too soon. Therefore we have to guard against the dangers of overoptimism at home as well as among those people whom we are attempting to assist overseas.

The Peace Corps will also come under fire from local Communist groups who will brand it as an instrument of American imperialism and as an organization whose aim it is to indoctrinate the local people. In such an atmosphere, one slip, one mistake on the part of our personnel could erase the good will built up over a period of time.

So far as the $40 million authorization is concerned, this is higher than many of us anticipated when the project was first mooted. It had been my hope that the program might have commenced on a more modest budget than has been the case, thereby enabling the administrators of the Corps to learn as the program got underway. However, it can be fully appreciated, that if the budget is reduced this would mean a comparable reduction in the estimated 2,700 volunteers we proposed to have overseas by the end of fiscal year 1962. It would mean, in terms of effectiveness, that the program would be reduced to the extent that its impact could be largely lost. The success of the operation depends in large measure on the person-to-person contact—it depends on reaching people who are unexposed to modern ideas and modern methods. Clearly we stand to lose much if we have to reduce the number of volunteers we are able to send abroad and it follows also that the countries in which the Peace Corps could have an effect must accordingly be reduced.

In addition to the response from more than 12,000 American men and women who have applied to serve in the Peace Corps, the need and desire for volunteers abroad has been clearly expressed in many quarters and its purpose and potential in assisting the problems of development have been warmly endorsed by heads of state in many of the emergent nations, and now, in our desire for economy if we should scale down the authorization, the Peace Corps will be unable to respond to the high expectations which surround it, and this could seriously weaken American prestige abroad. I ask my colleagues to think carefully before attempting to cut the proposed $40 million authorization because I believe it would seriously reduce the momentum gained both at home and abroad and would represent a failure on the part of this Government to meet its responsibilities to those who have turned to it from overseas and to the thousands of American citizens who have responded so enthusiastically to its call.

There is also the point to consider that some of the countries we anticipate helping do not want this assistance without being able to bear some of the cost themselves. These nations feel a moral obligation to pay for at least part of the cost of the volunteers in their country and it is right that we should not reject their willingness to do so, but in fact, encourage them to make some contribution. On the credit side, we have an agency of people who are ready, willing, and able to fill the gaps in a newly emerging society by transferring their skills to the people of these nations. I emphasize the transfer of skills because I visualize the program as being one where our people will not merely perform tasks for the benefit of the recipient communities, but will, in fact, transfer their knowledge so that the recipients will be in the position of eventually becoming self-reliant and sufficiently competent to pass on to their own community the knowledge they have acquired.

I can understand the request that has come from the Philippine Government for the Peace Corps to supply teachers in order to improve the quality of English usage and expression in the Philippine Republic. In fact, I am very proud that a constituent of mine from the First District of Massachusetts, David Pierson, of Greenfield, will be working with this project in the Philippines. At the same time, while the teaching of the three R's and general science is important, the program must be well balanced so that in our enthusiasm to improve upon standards and eradicate illiteracy, we do not lose sight of the need to assist some of the more primitive nations in the development of their own artisan societies.

The teaching of technical skills is essential to a newly emergent nation so that they can construct their own roads, develop villages, and modernize their agriculture. There is no worse sight in a small village in southeast Asia than a valuable piece of agricultural equipment lying idle because the local people, once having exhausted the machinery, have cast it aside because they cannot perform a simple repair job. It is at this level in a community that the Peace Corps can be of great value and I have no reason to believe that the administrators of the program are unaware of this.

I believe that the Director of the Peace Corps, Sargent Shriver, and his staff have shown a high degree of enthusiasm and ability in starting the program under the Executive order of the President. I have read the hearings with considerable interest and to my mind, Sargent Shriver has shown the clarity and confidence of a captain who recognizes his goal and the means of achieving it successfully. From the evidence I have, it would seem that flowing from this enthusiasm and ability, instilled into each volunteer is the understanding of what is expected of them and what they, in turn, must expect on working in a territory tormented by hunger, disease, and illiteracy; but yet a country whose peoples have nevertheless a consciousness of their own dignity; their great traditions and spiritual values.

Still on the credit side are our young people who, in full knowledge of the difficulties and dangers of the situation can successfully meet the challenge they face with true compassion and a sincere respect for their cultures and aspirations.

If we are to conceive the value of the Peace Corps in numerical terms alone, it would be fair to estimate the influence it could have on the thoughts and actions of millions of people in the underdeveloped areas of the world. This realistic goal of reaching the mass should not make us lose sight of the potential of each volunteer and the influence they will have on key people in the recipient countries. It follows, therefore, that the potential of each single volunteer is limitless.

But in aiming to reach the maximum number of persons at the level of the tribe, and the village, the volunteers must seek the medium through which they will be best able to impart knowledge of their technical and agricultural skills as well as their enthuiasms for the values of free institutions.

The overriding question is, Will it work? Is it possible for these relatively young, inexperienced people to bring genuine assistance and understanding to people of vastly different backgrounds and cultures in remote corners of the earth and at the same time, maintain their equilibrium and their deep-rooted dedication to the principles of American democracy which are essential for the success of their mission? This question is more important than the precise amount of finance we are authorizing for the program.

We are asking a great deal of these volunteers. But then we have always asked a great deal of our young people. It seems that governments have always given them the most difficult tasks to perform—the hideous task of waging war is theirs—now the arduous task of winning the battle of men's minds for peace is theirs. It is because I have faith in the courage and determination of young America to win this battle that I support the measure and respectfully commend it to you.

Mr. MERROW. Mr. Chairman, I yield 6 minutes to the gentleman from Ohio [Mr. ASHBROOK].

Mr. ASHBROOK. Mr. Chairman, I rise in opposition to this bill. What we are dealing with here is a pure and simple political misnomer. This bill is a hodgepodge of contradictions and confusion. It is at the same time a very broad delegation of power which in the end will undoubtedly set up one more bureaucratic monstrosity.

In the so-called Peace Corps, we are telling the world that these men and women are volunteers but our every action belies this statement. The U.S. Government is recruiting the corpsmen, paying well over $9,000 to train them and it cannot be denied this is a Government program. It is an attempt to glamorize and imitate the serious, dedicated work that our missionaries have been doing for many years, an unfortunate attempt I fear.

On page 5, line 15 of the bill, H.R. 7500, it states:

> Except as provided in this act, volunteers shall not be deemed officers of the United States for any purpose.

We state exactly the opposite on page 6, line 22:

> Volunteers shall be deemed to be employees of the U.S. Government for the purposes of the Federal Employees Compensation Act.

And on page 10, line 9, in further subterfuge the bill says:

> Volunteers shall be deemed employees of the U.S. Government for the purposes of the Federal Tort Claims Act and any other Federal tort liability statute.

These are but a few of the deceptions as to the description of the Peace Corps man. When it comes to securing the protection of the U.S. Government, the corpsman of course reverts back to a volunteer status. A government which allows harassment of its nationals abroad, the expropriation of their property, and the desecration of its flag would not want to get involved in protecting citizens who are supposedly sent abroad as ambassadors of good will. They have the full backing of the Government at least until that time.

R. Sargent Shriver, Director of the Peace Corps, stated at the National Conference on Youth Services Abroad, held in Washington last March 29, as reported by the Washington Star, that service might be more dangerous than military service in an outpost like Berlin or Fort Dix, N.J. He stated, and I quote:

> You might be captured—I told you it was dangerous.

At the meeting cited, Director Shriver delivered a message from President Kennedy who said in part:

> This conference must be a milestone on the way to a new era of American pioneering.

On this I agree. Indeed, it will be a new era of American pioneering but it is an era I want nothing to do with. Peace Corps men will be encouraged, in this new era, not to speak out on our way of life. Please do not defend capitalism or our free enterprise system as a way of life. That would be political. Do not dare speak about religion or religious freedom. I suppose even the late President Roosevelt's Four Freedoms should not be discussed. In his testimony before the House Committee on Foreign Affairs noted on page 5 of the committee hearings, Director Shriver said:

> We have said in our factbook on the Peace Corps and all our statements about the Peace Corps, Mr. Chairman, there would be no religious proselytizing or political propagandizing. I would say they would be advised to keep their comments of that nature to a minimum, perhaps not to make them at all. It is obvious on the other hand that after their workday is over they will be there as citizens of the United States and that

there will be many questions about the Peace Corps, about the United States.

One cannot help but wonder under this environment and approach, Mr. Speaker, how they will answer these questions. Mr. Shriver said that they need a "missionary zeal" but further reiterated in his testimony on page 29:

They are not to do any religious proselytizing or table thumping on religious issues.

Equally confusing is whether or not they will be an instrument of the State Department. I must confess that I would be more impressed with the prospective chances of the Peace Corps if it had little or nothing to do with the State Department; yet on page 3 of the hearings, Mr. Shriver testified:

The Peace Corps is planned to be organized as an agency within the Department of State, specifically designed to recruit, select, train, and administer volunteers and to develop programs for the maximum utilization of their skills and idealisms.

Note again that Peace Corps men are "volunteers" and yet are to be "recruited, selected, and administered" at the same time. Further complicating this program is Director Shriver's explanation on page 55 of the hearings:

We have, generally speaking, adopted the words of the Secretary of State, who at a meeting of the National Advisory Council said that he felt that the Peace Corps could make its greatest contribution to foreign policy by not being a part of it.

That can be interpreted many ways, Mr. Chairman. I am inclined to take a charitable outlook at what he meant but it does illustrate one more facet of the political incomprehensibility of this bill.

The hand of the State Department can be seen in Mr. Shriver's reference to the Battle Act, as witnessed by the testimony on page 30 of the committee hearings:

Mr. BARRY. Why do you want to be excepted from the Battle Act?

Mr. SHRIVER. In a large part of the world that we are dealing with, political situations are in a great state of flux. You have these nations wavering between the East and the West. Personally, I think it would be a great mistake if arbitrarily it was stated that the Peace Corps could not go into any country where there was this situation. I think that if the Peace Corps can possibly make a contribution, it would be of great help to the country. I think it would be of great help if the President was given the privilege of determining—as he has the privilege with other aspects of oversea operations—the privilege of determining whether it is in the best interests of the United States to permit the Peace Corps to go to a particular country.

We have had requests for Peace Corps volunteers from countries just of the type you are talking about. I think it would be a shame to say "No, we can't do business with you."

Mr. Shriver further states on page 95 of the committee hearings:

One of the virtues, I hope, in the Peace Corps, is instead of going over there as agents, say of the U.S. Government, we would go over there and become part of the operating machinery of a foreign government * * *. We are not Americans over there working for our country, but we are working for the Philippines or working for the Thai.

Would we be working for the Communists in Poland? In Yugoslavia? This would certainly seem to be the import of his statement regarding the Battle Act should the President decide to send corpsmen to what he might consider the not-so-to-be not-so-communistic members of the Communist bloc. Director Shriver refers to the Peace Corps thusly: "This is a service operation. It is serving the foreign country." Another indication of the type of "new era of American pioneering."

Mr. Shriver states on page 21:

If possible, if the Congress approves, we have a request in our legislation for specific permission to supply Peace Corps volunteers to the constituent agencies of the United Nations.

Which side would they be promoting in the Congo, for example?

Others have gone even further in their ideas about the Peace Corps. The New York Herald Tribune on February 20, 1961 carried an article under a by-line of John Molleson entitled "Peace Corps Plan Lauded by Toynbee. Hopes Young People Will Wed Foreigners." The article quotes:

Arnold J. Toynbee, British historian, yesterday applauded President Kennedy's plan for a Peace Corps of young people to serve in foreign lands.

He said it was important that they should live the life of the people among whom they work "eating the same food, wearing the same clothes and sharing the same living conditions."

I hope that some of the young people will even marry the local people, especially if they are of a different race, because that wins their hearts," Mr. Toynbee said. Ambassador Adlai E. Stevenson, appearing on the same panel, described this as procreative diplomacy.

Again quoting from Director Shriver's address to the National Conference on Youth Services Abroad, the Washington Star article of March 30, 1961, reports:

A hesitant brunette was assured she need not worry about "controls over fraternization" with inhabitants abroad. Mr. Shriver said the Peace Corps needs "mature people" who know how to fraternize. "In general, we are not opposed to what you are worried about," he told his somewhat embarrassed questioner.

Mr. Chairman, I cite but a few examples of the contradictions and confusions in this legislation. A whole speech could be devoted to the bill's broad delegation of power. What will be the result of such confusion and contradiction? Once more I say that the Peace Corps is a misnomer and a political sleight-of-hand trick. I am not urging that our young people should go abroad to evangelize or act patronizing. I do, however, think it is wrong for them to deemphasize their own country. With such an outlook this organized confusion might well turn into organized embodiment of the Ugly American.

Mr. MORGAN. Mr. Chairman, I yield 5 minutes to the gentleman from Maryland [Mr. JOHNSON].

Mr. JOHNSON of Maryland. Mr. Chairman, prior to World War I, we in America lived by George Washington's admonition to stay away from foreign entanglements. With our Atlantic Ocean on one side and the Pacific on the other, and a strong Navy, we could be complacent at home. But, with the advent of the fast plane, the splitting of the atom, and the development of the deadly war missile, all this changed. What now goes on in the Far East and the Middle East is just as important to us in America as what takes place in our neighboring State. And with this change, a life and death struggle has developed between two great forces— our democratic way of life and communism. There are two opposite roads open to us. The one is to tell the rest of the world to take care of their own problems and run the risk of seeing communism spread to every nation on earth, hoping it will not reach our own. Following this road, we do not need our military bases abroad, nor to continue with our economic foreign assistance. If this is the way we want to live, let us make our position clear to the world and stop talking about brotherly love, understanding, and the enlightened age we live in. If we do not want to live that way, then we have to make our intentions equally clear. There is, unfortunately, no middle road. In my opinion and I am confident all thinking Americans share the same view, we must meet the challenge by exerting whatever means necessary to protect our way of life.

Certainly, the continuing of the Peace Corps is and should be an important part in furthering better understanding between those nations of the free world. Under the Mutual Security Act, Congress authorized the expenditure of $10,000 to defray the costs for the study of a youth corps program. As a result of the findings, the President issued an Executive order as of March 1, 1961, establishing the Peace Corps on a pilot basis. Since that time, a new agency has been under the capable, efficient, and aggressive directorship of Sargent Shriver. Few public servants have given so freely of their time, energy, and personal sacrifice. Through his personal calls, and those of his staff, Members of Congress have been afforded an opportunity to thoroughly discuss this meritorious legislation. Today, the Peace Corps is a working agency within the Department of State, with some $3 million having been spent to date. Some 450 volunteers are in the process of intense training, with projects agreed upon in Tanganyika, Colombia, Ghana, and elsewhere. And what is so encouraging is the favorable public response of the program. This is evidenced by the some 12,000 applicants eagerly applying as volunteers, who want to share in a major international effort to increase the welfare of all men and improve understanding among nations. With the Peace Corps, a new direction in foreign policy technique provides what has been called middleman power to underdeveloped countries. Its purpose is to provide person-to-person help in the development of nations where the need is greatest. No skyscrapers will

rise, no dams will be built, but a significant bridge of understanding between our people and those of other nations should make the world a better place in which to live. I strongly urge that the House support, wholeheartedly, H.R. 7500.

Mr. GALLAGHER. Mr. Chairman, I ask unanimous consent that the gentleman from California [Mr. ROOSEVELT] may extend his remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. ROOSEVELT. Mr. Chairman, of the numerous constructive proposals presented to the Congress by the administration of President Kennedy, that of the Peace Corps has struck a most responsive chord in the hearts and minds of our people. This grand and novel concept has induced a large, and continuing, favorable response from the moment that it was announced by then candidate-for-President, John F. Kennedy. Included in the widespread, laudatory reaction to this new proposal were numerous immediate applications to participate in the Corps. These applications, which soon numbered into the thousands, came from a broad base of individuals of all ages and with a large variety of valuable attributes. This tremendously encouraging response was startling to even the most avid proponents of the Peace Corps concept. Interest and encouragement, now that the proposal has been more concretely formulated, is higher than ever.

It is not very difficult to understand why this proposal has gained this great dimension of support. The idea of the Peace Corps touches deep springs in our American heritage. As a people we would far rather construct than destroy. The Corps provides a positive, constructive approach to the alleviation of the world's problems. It is as William James suggested of a similar concept, "the moral equivalent to war." The proposal to send qualified Americans abroad to assist and hasten the desirable progress of the developing nations that are striving to enter into the mainstream of the 20th century, appeals to both the idealistic and pragmatic qualities of the indomitable American spirit. The Peace Corps supporters and applicants combine the characteristics of altruism and realism in their understanding of the complexities and difficulties of the world situation and their desire that something constructive be done.

President Kennedy accurately sensed the great desire of Americans to make necessary sacrifices for the national good. Our citizens have awaited just such a call to positive action. In a situation of great tensions, the most difficult and trying role belongs to those who must remain inactive. It is in this role that most of our citizens have found themselves. For the total period of the cold war most of our people have had to restrain the natural impulse to act to alleviate tensions. Nothing in the way of a positive and active program was offered in which individual citizens could participate. Of course, the desire to help in the cause of freedom and progress must necessarily be restricted by the nature of the adversities. During the time of war everyone has a task to accomplish. But in the cold war situation only limited numbers can perform the necessary functions.

We are now offered for our consideration a proposal which will have the effect of expanding the numbers of our citizens who can actively participate on the frontlines of the cold war. And, if the endeavor is successful, as I am quite optimistic that it will be, a still greater number of our countrymen can serve in this noble cause. Even those who are unable to participate directly will now be enabled to identify themselves with this adventuresome, hopeful, constructive effort. All Americans can know that we will be engaging the enemies—tyranny, poverty, disease, and illiteracy—directly and personally. We will be working with the peoples of the developing nations on the much talked about, but little practiced, person-to-person basis. The Peace Corps represents an opportunity to provide economic, social, and educational assistance and to further the cause of peace through personal relationships and the development of mutual understanding.

The Peace Corps is presently functioning on a temporary pilot basis. It is operating under an Executive order as an independent agency within the State Department, financed from mutual security funds allocated for the present fiscal year.

The administration is now requesting a minimal appropriation for the next fiscal year in order that the Peace Corps may continue its operations on an expanded, but still experimental, basis. The appropriation of such funds will enable the Congress, as well as the American people, to observe the Corps as it functions. We will then be capable of assessing the degree of success of this new operation and determining the advisability of its continuance based upon practical experience. There are, of course, risks involved in carrying out this venture. However, I firmly beleve that the potential rewards of this endeavor substantially outweigh the inherent risks. I strongly believe that this would be a valuable and worthwhile undertaking, particularly in view of the 1-year appropriation which would allow for cautious congressional scrutiny.

The provisions, and their effect, of the Peace Corps bill have already been well explicated to us. The dedicated and able Mr. Robert Sargent Schriver, Jr., has done an outstanding job in establishing and organizing the Peace Corps and in proselytizing for it. Indeed, he deserves our approbation and commendation for his fine performance.

Desiring not to be repetitious, I shall refrain from discussing the various merits of the several provisions of the bill. However, I do wish to enlarge upon two points which have caused some concern.

First, the Peace Corps selection process. The procedure established by the Corps for selecting recruits is as stringent and rigorous as any that I have encountered. Candidates will be screened for technical competence, maturity, physical condition, and motivation. This screening process will be effectuated by the administration of written tests, physical examinations, interviews, and observation during the entire period from the initial acceptance until, and through, the time the recruits are sent into the field. The administrators of the program are particularly alert to prevent the entrance of persons into the program who might seek to use the Peace Corps for subversive purposes. These procedures are presently, and will continue to be, arduously and assiduously administered.

Second, the Peace Corps will go only where it is needed and wanted. The projects of the Corps will be developed jointly by our administrators and the foreign nation involved, or in some cases with the help of voluntary agencies or universities. In every instance, the foreign nation must favor the project, and volunteers will be sent to no country where they are unwelcome. Furthermore, diligent efforts will be made to match a volunteer's special background, knowledge and experience to the geographical areas where he could function most effectively.

Mr. Chairman, the Peace Corps can add a new dimension to America's foreign policy, a positive and constructive one, for which people here and abroad have long waited.

Mr. MORGAN. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly, the Committee rose; and the Speaker pro tempore having resumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 7500) to provide for a Peace Corps to help the peoples of interested countries and areas in meeting their needs for skilled manpower, had come to no resolution thereon.

VETERANS' ADMINISTRATION REVOLVING SUPPLY FUND

The SPEAKER pro tempore. The Chair lays before the House the following request from the Senate.

The Clerk read as follows:

IN THE SENATE OF THE UNITED STATES,
September 7, 1961.

Ordered, That the House of Representatives be requested to return to the Senate the bill (H.R. 8414) entitled "An act to amend section 5011 of title 38, United States Code, to clarify the authority of the Veterans' Administration to use its revolving supply fund for the repair and reclamation of personal property."

FELTON M. JOHNSTON,
Secretary.

The SPEAKER pro tempore. Without objection, the request of the Senate will be granted.

There was no objection.

HURRICANE CARLA

Mr. THOMPSON of Texas. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. THOMPSON of Texas. Mr. Speaker, in the past few days, I have been very much touched by the expressions of interest and concern of my colleagues regarding the Hurricane Carla, which struck the Ninth Congressional District.

I am happy to report that while damage is extremely serious, it is not as bad as has been from time to time reported. Agriculture has suffered perhaps the most of all. Many coast communities sustained severe wind and wave damage. However, when I think of the great hurricane of 1900 which killed from 6,000 to 8,000 people and compare it with Carla which had almost no loss of life, I am thankful.

I have thought many times of what a superb job was done by the Weather Bureau and all of the facilities—aviation, radar, radio, television—all working together to warn the people of the imminent dangers of the approaching storm and to urge them to vacate unprotected areas. The mass evacuation, without doubt, saved countless lives.

As the full story is known, I shall make a suitable expression to Dr. Francis W. Reichelderfer, Chief of the Weather Bureau, and to his able and courageous men including those of the supporting agencies.

I take this opportunity, also, to express my appreciation and that of the people whom I have the honor to represent, to my thoughtful and helpful colleagues.

ANCIENT ORDER OF HIBERNIANS HONORS THE FATHER OF THE AMERICAN NAVY ON COMMODORE JOHN BARRY DAY

Mr. LANE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. LANE. Mr. Speaker, history records that Commodore John Barry, a native of County Wexford, Ireland, was one of the bravest naval officers of the young country fighting for its independence that became the United States of America.

Time and again, though outmanned and outgunned, Captain Barry and his crew attacked individual ships of the most powerful navy in the world. Sometimes he won, sometimes he lost; but the daring leadership of Barry inspired the colonists to fight on against great odds. It was this indomitable quality of the man that strengthened morale of our seamen, and harassed the British. For every vessel in the small American Navy that went down before the superior firepower of British men-of-war, the spirit of the rebels became all the more "unsinkable."

In the *Lexington*, Capt. John Barry captured, in April 1776, the British sloop *Edward*. Barry was later promoted to the *Effingham*, but the vessel was destroyed in the Delaware. In the *Raleigh*, 32, Captain Barry then fell in with the 50-gun ship *Experiment* and the frigate *Unicorn*, in September 1778. He kept up a running fight for 2 days, and, when the wind died out, he finally beached his ship on the coast of Maine and escaped with his men. Previous to this, he and 27 of his men boarded the armed schooner *Alert* in the Delaware, capturing 116 men and officers, and sinking the schooner and 2 transports.

Captain Barry, in the *Alliance*, made a successful cruise and captured several prizes. On March 10, 1783, he fought the last sea fight of the Revolution but had to give up his prey, when two British frigates hove into view. No one had to ask Barry to fight for the independence of his adopted country. As an Irishman, the need to be free was one of the most important things in life. And when the colonists rose up against the oppressor who also held his native Ireland in bondage, Barry fought with the skill and the valor that could never be vanquished. His personal example became a tradition that has inspired Navy men from his day to the present.

He was the "Father of the American Navy," a Navy that has since grown up to become the most powerful force afloat, ranging from the Mediterranean to the Formosa Straits to protect the free world of today from aggression. Millions of Americans who are proud of their Irish origin, honor the memory of the lad from Wexford who became one of the naval heroes of the Revolution, and contributed much to the winning of the War for Independence.

The Ancient Order of Hibernians has designated Wednesday, September 13, as "Commodore John Barry Day" and as an AOH holiday that will be observed by appropriate exercises in all local divisions of the order.

As a member of the AOH, it is my privilege to bring this occasion to your attention so that the U.S. House of Representatives may speak up in tribute to the memory of Commodore John Barry who led the way toward the establishment of that alert, efficient, and gallant arm of our security—the U.S. Navy.

OUR TRUE FRIENDS

Mr. DORN. Mr. Speaker, I ask unanimous consent to extend my remarks at this point and to include an article.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. DORN. Mr. Speaker, during these days of double standard international morality, when we witness so-called neutrals failing to assert what would otherwise have been an effective moral leadership if they had condemned Soviet Russia's starting nuclear tests as the world rightly expected them to, it is good to remember that there are committed nations who are not afraid to speak out for what is right and decent in the world.

President Carlos P. Garcia, the leader of the Philippine people, had the courage to invite the U.S. Government to establish our missile bases in the Philippines in the face of megaton-rattling threats by Nikita Khrushchev and vociferous intimidations by Mao Tse-tung. He also had the statesmanship and the moral valor to sign into law a bill passed by the Philippine Congress outlawing the Communist Party from the Philippines. He is a true friend of the American people and we have confidence in his leadership. He is entitled to our undivided support.

It is to be regretted therefore that this session of Congress has been unable to act on the Philippine war damage claims bill which we owe the Philippine people and which has been pending settlement since 1950. We must make it clear that it is only because of the press of other major administration measures and the inevitable accumulation of last minute urgent domestic bills before adjournment that prevented us from taking up the Philippine bill.

I ask unanimous consent to make as part of my remarks an editorial of the Washington News that appeared yesterday which should show to our Filipino friends what an important vehicle of American public opinion thinks of our failure to act on a matter vital to the Philippines:

AN HONEST DEBT

Ninety billion dollars is the latest official figure on our foreign aid spending over a 15-year period ending June 30, 1960.

Foreign aid is one thing—basically a gamble on keeping the recipients from joining the Communist bloc. A bona fide debt is quite another thing—no gamble about it, no lofty sentiment, just a simple obligation.

In this latter category falls the $73 million we owe the Philippines in unpaid compensation for damages done to their country by our having to fight a war there. The Congress of 1946 decided such claims were justified and passed the Philippine Rehabilitation Act.

But the appropriation then approved was $73 million short of meeting the total amount of damages. Despite repeated polite reminders from the Philippines, the sum has been dangling ever since. A measure introduced this session by Representative CLEMENT ZABLOCKI of Wisconsin authorizes payment, but it is still in the freezer of the House Rules Committe.

This is inexcusable, especially in the light of the Philippines' own prompt repayment to us of the final $20 million installment on funds we lent for their military buildup. It's no way to treat a demonstrated friend, while pouring out billions we don't owe to such dubious states as, say, Communist Yugoslavia. Even in the few days remaining of this session, the House with a little resoluteness still can act on this measure and underscore our ties of more than a half century with the Philippines.

TAX DEDUCTION FOR RETRAINING

Mr. SHORT. Mr. Speaker, I ask unanimous consent that the gentleman

from Missouri [Mr. CURTIS] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, one of the recommendations reached by the Republican Policy Committee's Operation Employment deals with the effects of taxation on retraining and seeks to encourage a tax climate in which the learning of new skills would be fostered. I quote from the final report of "Operation Employment, Employment in the Dynamic American Economy," CONGRESSIONAL RECORD pages 15765–15791, August 14, 1961:

3. In the area of taxation, our legislation and administration of tax laws has not kept up with the times. No personal incentive is contained in our tax laws for those individuals contemplating retraining. The Federal Government is thus actually hindering rather than fostering retraining by these and other outmoded practices. We recommend tax revisions providing tax deductions or credits for workers undergoing retraining for new skills.

I have today introduced legislation to amend the Internal Revenue Code to carry into effect this recommendation of the Republican Policy Committee's study group. This legislation would make amounts paid by a taxpayer for his education or training deductible as a trade or business expense.

At present, we find that our tax laws and regulations very narrowly circumscribe the areas in which educational expenses can be considered deductible business or trade expenses. The only basis which is recognized for such deductions is job preservation; only those expenses may be deducted which are undertaken to prevent one from losing a job, from being fired for not taking a particular course of study. Certainly this is a correct ruling and these are business expenses. However, it is too narrow. The acquisition of new skills and the improvement of old, without the threat of dismissal, are also trade and business expenses, and should be recognized as such.

In one field, through concerted action in which I had a part, the Internal Revenue Service was induced to make a ruling consistent with the philosophy which underlies the bill I have introduced. This was the continuing education of teachers. Summer education of teachers to heighten their teaching skills is now an allowable deduction. The improvement of all vocational skills should be the subject of such deductions as should the gaining of new skills. It is my hope that this new philosophy will be adopted.

BILL TO PERMIT DIVISION OF CORPORATIONS

Mr. SHORT. Mr. Speaker, I ask unanimous consent that the gentleman from Missouri [Mr. CURTIS] may extend his remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Dakota?

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, I have today introduced a bill which would amend the Internal Revenue Code to permit the division of a corporation into two corporations on a fully non pro rata basis.

It is the purpose of this bill to permit a corporation to be divided into two corporations of comparable size in a tax-free transaction but only if the distribution is fully non pro rata so that after it each former shareholder owns stock in one and only one of the survivor corporations. While such a division is sometimes now permissible under section 355, that section now requires that the corporation divided be engaged in the active conduct of two separate businesses for the 5 years preceding the distribution. It is believed that the requirement of "the active conduct of a trade or business" is not necessary in the case of fully non pro rata distributions.

DETAILED EXPLANATION OF BILL

Subparagraphs (A), (B), and (C) of paragraph (1) of section 355(c), which the bill would add to the code, are practically self-explanatory and state the mechanical and arithmetical limits of the transactions which will be permitted to occur tax free. The two survivor corporations must be of comparable size and must not have any common shareholders.

Subparagraph (D) provides that 90 percent of the stock of the distributing corporation must have been acquired more than 5 years before the distribution or received as a gift, devise, or bequest from a person who acquired it more than 5 years before the distribution. It should be observed that for purposes of this section a tax-free acquisition of stock is considered an acquisition at the time of the tax-free exchange or distribution, so that the requirement of the subparagraph is not satisfied if stock was acquired in a reorganization or in a section 351 transaction less than 5 years before the distribution.

Subparagraph (E) is intended to prevent stockholders from achieving a taxable exchange or purchase through the use of contributions to capital. Thus, for example, if stockholder A—owning 50 percent of the stock—contributes an apartment house to the corporation while stockholder B—owning 50 percent of the stock—contributes investment securities to the corporation before the distribution, and after the distribution each shareholder owns stock of a corporation which owns the property contributed by the other shareholder, the transaction will not qualify under subsection (c)(1)(E). Such a transaction will be treated as a total liquidation, even if the distributing corporation is not formally liquidated, but retained by one of the shareholders.

Subparagraph (F) is intended to guard against the use of the subsection for tax avoidance purposes. While the courts would probably read this requirement into the statute in any case, a clear statement is believed desirable in view of the fact that the bill brings a new concept into the code.

Proposed section 355(c)(2) makes it clear that section 356 does not apply to any transaction which fails to meet the requirements of subsection (c)(1) because some or all of the shareholders own stock of more than one corporation—directly or constructively by application of section 318—after the transaction. In such a case, the transaction is treated as a partial or total liquidation immediately preceded by a distribution to which section 301 applies. This may be illustrated by a simple example: A and B each own 50 percent in value of the stock of corporation Z. One-half—in value—of the assets of corporation Z are transferred to corporation X and the other one-half—in value—are transferred to corporation Y. Immediately thereafter all of the stock of X and Y is distributed to A and B and Z is liquidated. In the distribution A receives 90 percent of the stock of corporation X and 10 percent of the stock of corporation Y, while B receives 90 percent of the stock of corporation Y and 10 percent of the stock of corporation X. The transaction fails to meet the requirements of subsection (c)(1) and under subsection (c)(2) it is taxed as follows: A is treated as having received a dividend of 10 percent of the stock of corporation Y and B is treated as having received a dividend of 10 percent of the stock of corporation X immediately before the distribution of all the other stock distributed. A is also treated as having received 90 percent of the stock of corporation X in a total liquidation and B is similarly treated as having received 90 percent of the stock of corporation Y in a total liquidation.

It should be observed that the Commissioner's authority under existing section 312(i) to allocate earnings in section 355 transactions will, of course, extend to transactions permitted by the new subsection which the bill will add to section 355.

THE KHRUSHCHEV THREATS—A PATTERN OF BLACKMAIL

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Indiana [Mr. BRAY] is recognized for 30 minutes.

Mr. BRAY. Mr. Speaker, there is talk again of negotiation with Khrushchev. But we must ask ourselves, "What will we negotiate about? What will we talk about?"

FREE ELECTIONS—ONLY SOLUTION TO BERLIN PROBLEM

For all too long we have allowed the Soviets to take the initiative, to keep on the offensive. For all too long we have tried merely to answer their false charges, to repair the damage made by the blasts that the Soviets have made against the dikes of freedom.

We have a weapon that will throw the Soviets on the defensive if we have the courage, vigor and tenacity to use that weapon to its fullest. That weapon is the demand that Russia give to her satellite countries freedom of choice—to allow these peoples to vote for the kind of government they want and to elect the officials they want.

This demand should not be repeated just once; it must be repeated a million

times—in the legislative forums of the free world, from the rostrum of the United Nations, by press, radio and television throughout the world. It should be beamed hourly to these captive nations. If we will publicize the truth with the same vigor as Russia does her lies, truth will win.

The demand for free elections is one that Russia cannot openly refuse and yet one which she knows she can never accept and keep the people under her dictatorship. This demand on our part will put Russia on the defensive as nothing else will. The right of the free ballot box is inherent in the Atlantic Charter and in the Yalta declarations, which Russia accepted and cannot repudiate.

Let us lead from our strength to Russia's weakness. Our greatest strength, the strength that has made America what it is today, is the recognition of the freedom and dignity of man. It is the recognition of freedom and human dignity that has made America so strong economically that our problems are those of surplus while the Communist problem is that of a continuing scarcity.

The denial of the freedom and dignity of man is Russia's greatest weakness. As those behind the Iron Curtain become more aware of the advantages of freedom that have been denied them by Russian autocracy, that weakness will become catastrophic.

It is true that America, through diplomatic channels and with all the dignity of State Department verbiage, requested Russia to recognize her commitments and give these satellite peoples the right to determine their status by secret ballots. Of course, Russia has ignored this request, but we have done nothing to push and publicize our actions, so nothing came of the demands for free elections among the satellite peoples. Our demands were so feeble that the Soviets did not even need to attempt to answer them.

We have to do more than write a polite diplomatic note suggesting that the peoples who were liberated from Nazi tyranny by the aid of American materiel, men and money should be allowed to form their own government, live their own lives, elect their officials as they see fit. We must seize the offensive by demanding the right of all peoples to the free ballot. When we do that, Russia will be on the defensive.

LET'S NEGOTIATE WITH RUSSIA AS TO WHEN FREE ELECTIONS WILL BE HELD IN SATELLITE COUNTRIES

Russia always wants to negotiate with the free world. To the Russians negotiate means but one thing—they intend to keep what they have and negotiate for what we have. That was the pattern at Yalta, Teheran, and Potsdam. Our failure at these conferences was not because of a lack of loyalty on the part of our American leadership. Nevertheless we allowed millions to be caught behind the Iron Curtain by these conferences because we did not understand the Russian pattern of gradual encroachment.

The United States has not been the only country that has been misled and betrayed by a confidence in Russia. Through the centuries Russia has taken over untold millions in the same manner. Russia seldom intentionally goes to war, especially against a strong, determined foe. In fact, her pattern of conquest for centuries has been a gradual series of moves so slight as to remain almost unrecorded in history. Today world opinion, if properly informed, could throw back the Soviet aggression. Our constant demands that Russia grant her satellite peoples the right of a secret ballot to allow them to chart their own lives will not be granted, of course, for a long time and only after great turmoil and repercussions in Russia. However, our demands that Russia grant her people the freedom enjoyed in other nations will focus world attention, the attention of the satellite peoples and the attention of the Russian people themselves on Russia's great weakness.

THERE IS ONLY ONE THING TO NEGOTIATE REGARDING BERLIN

When Russia wants to negotiate on Berlin we should tell her, in effect, if we are to negotiate we want to do so on the only real question at issue. When that question is settled all other questions regarding Berlin can be settled. Then negotiation should be as to when and how free elections will be held in East Germany. Yes, and if Russia wants, in West Berlin and West Germany too, for they already have free elections. Let us negotiate as to when and how people in all of Germany will be allowed to vote for the kind of government they want and the officials they want to serve them. After all, that is only what Russia agreed to do under the Atlantic Charter and the Yalta declarations. Why should she be afraid to allow the people in her satellite countries to be free, to vote for a government and officials of their own choosing?

The Soviets have allowed free elections only twice. Forty-three years ago when the Bolsheviks overthrew by violence the true revolutionaries, the Kerensky regime—November 22, 1918—they allowed an election and in that election they were defeated 4 to 1. They then liquidated the election commission and the elected non-Bolsheviks.

In November 1945, while the Allied forces—including the Russian Army—were in control of Austria, an election was held. Despite Russian efforts, the Communist Party was defeated in that election 40 to 1. After such an overwhelming defeat at the ballot box, the Communists unsuccessfully tried to overthrow the legal government of Austria by force in May 1947 and again in October 1950. Fortunately their designs were thwarted by the courageous stand taken by the Austrian leaders, strongly supported by the Western Powers. Finally in October 1955, all occupying troops were withdrawn from Austria. When the Russian flag was lowered, a terrific cheer rose in Vienna that shocked the Russians, who apparently had not realized the bitterness against them.

Since that time the Soviet Union has refused to permit free elections in her satellite countries. During the last election in West—free—Berlin, December 7, 1958, the East Germans made a terrific effort by news stories, radio, television and personal efforts to persuade the West Germans to vote for communism. In that free election the residents of West Berlin, who knew both freedom and communism, voted more than 50 to 1 against communism.

IT IS RUSSIA WHICH IS A COLONIAL POWER

There is a false charge that Russia has launched against the West which I regret to admit has gained some strength among the uncommitted people of the world. Russia says that she is against colonialism—that the West is for colonialism.

Both of these statements are false but we have not adequately refuted these lies. Great Britain has released all claim on Burma, India, Nigeria, Ghana, Pakistan, Ceylon and many other countries. Britain had exerted only nominal control on these countries for years but now their only connection with Britain is that if they believe that it is to their advantage to be a member of the British Commonwealth they may do so.

The United States gave the Philippines their absolute freedom and we have helped them to the extent of billions of dollars.

France has allowed the countries of Morocco, Tunis, Niger, Mauritania, Mali, Chad, Senegal, Dahomey, Upper Volta, Guinea, the French Congo, and other countries to choose the kind of government they want.

During the same period that the Western nations have been giving the maximum of freedom to their people, Russia was placing manacles on Poland, East Germany, Hungary, Latvia, Estonia, Lithuania, Rumania, Bulgaria, Georgia, Armenia, and a score of other peoples alien to Russia. It is the U.S.S.R. that is guilty of the evils of colonialism, yet the West has been listening to the Russian lie and saying little. In our demands that Russia allow her satellite people the freedom of choice as to government, we should in the same breath forcibly point out and prove through all the forums available to us—United Nations committees, radio, newspapers—that it is Russia who is guilty of the evils of colonialism.

RUSSIAN ELECTIONS A TRAGIC JOKE

The Russian commissars at times have argued feebly that the people of the satellite countries can vote. This answer, however, cannot stand up. They do have elections in the satellite countries but they are a farce. For example, in East Germany the people have to vote or there will be reprisals against them. They have no choice as to their form of government; they can only vote "ja" ("yes"). In Russia they can only vote "da"; in Hungary "ingen"; in Poland "tak." Each man on the ticket is handpicked by the bosses in the Kremlin. The people have never had the opportunity to choose their form of government nor their officials.

To freedom-loving peoples, this is worse than no election, for it adds hypocrisy to the tyranny of the dictator.

The people in East Germany, however, found another way to vote—with their feet. Two million had already escaped from Communist East Germany through West Berlin—the hole in the barbed wire curtain of Russia—before this hole was closed and a ring of Russian bayonets set up to guard the border. More than one-seventh of the people of East Germany—the youth, the farmers, the workmen, the technicians, the teachers, the scientists, the cream of East Germany—left their meager belongings and fled from their homes toward the light of freedom that they could see in West Berlin. This mass exodus of the people of East Germany proved that Russian communism is not the Utopian paradise claimed by Khrushchev.

Let us tell this story to the uncommitted nations of the world, many of whom are toying with the idea of believing Communist lies. Truth is the strongest force in the world if we will give it the same opportunity to work as the Russians give to lies. Let us affirm and reaffirm our faith in the ballot box as the protection of freemen. Let us demand of those who are responsible for carrying the banner of America, whether they be military, State Department, or information officers that they courageously, honestly and vigorously carry the story of the greatness of America. Let us be finished with apologies for America—let us make it plain that they are not needed and are no longer popular.

THE TRAGIC ERRORS OF OUR FAILURE TO UNDERSTAND RUSSIA

The great error that the West has made is that we do not understand Russian history. A brief study of five centuries of Russian history makes it clear that her actions today follow the same pattern that has guided her every maneuver since the small principality of Muscovy—the area surrounding Moscow—launched its march of expansion in approximately A.D. 1462 under the rule of Ivan III, the Great, hungrily devouring nation after nation and race after race. It has been very difficult for the Western mind to comprehend the Russian philosophy of making constant aggression against her neighbors into a way of life. In America too often we see the Russian conquests as a result of communism. The Russian ambition for conquest is constant and began centuries before Marx, Lenin, or Stalin were born.

During the last 5 centuries Russian aggression had devoured 46 distinct races speaking 61 different languages and hungers for more. Earlier Russian conquests were at times made under the guise of furthering or protecting Christianity through acting as the head of the Orthodox Church. Many other of her conquests were under the guise of pan-Slavism.

Since the Communists seized control of Russia their conquests have been made in the name of world communism, but the result to the unfortunate victims is the same—the loss of freedom. Communism has been an even better vehicle to carry Russian imperialism than was the church or pan-Slavism.

THE COMMISSARS "OUTCZARS" THE CZARS IN DENYING FREEDOM TO THEIR SUBJECTS

The czars were adept at denying freedom of action to their subjects, but under them the Russian peasant still owned his pig and his cow. Under communism he owns nothing, not even his home, his farm, his cow, or his children. So the commissars "outczared" the czars in enslaving the people.

It has been said that Stalin performed the role of the Russian ruler exactly like the historical czars. Under communism the Soviets have been able to expand Russian boundaries at a greater tempo than had been accomplished under the czars. Russian communism, by holding out the alleged altruistic goals of world communism to the downtrodden, the underprivileged and the depressed peoples of the world, has promised a better, happier way of life. The Communists have used the promise of sharing the wealth to lure the poor into the Russian orbit. The Soviets have never made good on that promise.

Communism has, on the other hand, imposed upon its people a form of economics and government which the West abandoned at the end of feudal days. Under the Soviet system the privileged few dispense the necessities of life to the serfs who work for them and who must rely upon them for protection, leadership, and a way of life. Russia has cast a halo of love and light over the manacles of slavery to lure the victims into Russia's orbit.

Russia, by the experience and training of centuries, has become most adept at using military force, subversion, treason, and lies to bring about the conquest and enslavement of peoples. She has now added to that capability the false but alluring promise of a happier, more abundant way of life under communism. This combination adds persuasion to force and has proven a most formidable enemy of freedom.

No revolution in history has so deviated from its originally announced aim as has the Russian revolution of 1917. Instead of producing a classless utopia as originally planned by Marx and perhaps as originally planned by Lenin, Russia has become a society of great class distinction with an enormous chasm in wealth and standard of living between the faceless masses and the Communist bosses.

Why do we not, through every media available to us, tell this story to the world?

THE FREEDOM AND DIGNITY OF MAN IS JUST DAWNING THROUGH THE IRON CURTAIN

For several centuries the Western World generally has accepted the principle that government should exist only by the consent of the governed. That philosophy must have begun by now to given no evidence of having penetrated enter into the Russian mind, but it has the thinking of the Russian rulers. It is worthy of note that Russia is the last conglomerate empire in the world; that is, the last empire that is held together by force without having any economic or racial reason for its existence. Such empires can continue to exist only where the government operates for the benefit, glory, and power of the rulers, and where the rights of the individual are ignored.

The great empires of the past, such as the Persian Empire under Cyrus, the Roman Empire under the Caesars, the Arab Empire under the Abbassides, ceased to exist centuries ago. The Turkish Ottoman Empire and the Austrian-Hungarian Empire of the Hapsburgs ceased to exist after the days of World War I. Every other empire in the world has ceased to exist except the Russian empire, which is today one of the largest of all times and holds within its confines possibly the largest number of races of any empire in history.

Russia is the successor and carries the heritage of the Mongol Empire, perhaps the greatest empire of all time. Unquestionably the Mongol Empire, founded by Genghis Khan on the principle of unquestioned submission of the individual to the state, has contributed greatly to the Russian philosophy of today.

To compare the West with Russia of a few years ago it is necessary to go back to the West of several centuries ago. The Renaissance, the Reformation and various other social, political, and economic revolutions swept over the West, bringing with them the realization of the freedom and dignity of the individual.

These same revolutions did not enter Russia. And so the free ballot, the only guarantee of the freedom of man, did not enter Russia. First the strength and iron control of the Mongol Empire and later Russia's autocratic rulers kept intact that same Iron Curtain that had kept enlightened philosophy from entering the great Russian Empire.

The first thought of reform that entered Russia occurred when her armies entered Germany and France toward the end of the Napoleonic Wars, and for the first time the Russians saw the greatness of the West. Young Russian officers attempted to free the serfs and to get a constitution modeled after the American Constitution, but these officers were purged by the czars.

After their defeat in the Crimean War—1853–56—and the Russo-Japanese War of 1904, the Russians again saw the great advantages of freedom that were denied them. Many revolts of limited nature took place in Russia. While the Russians had not yet comprehended the dignity of the individual, they at least wanted a kinder and better czar.

REAL REVOLUTION IN RUSSIA THWARTED BY COMMUNISTS

In 1917 the revolt against Russian autocracy was led by men of unquestioned integrity, such as Kerensky, Milkov, and Prince Luov, who definitely were interested in the well-being of the people. During the brief period that they were in power, plans were being made for a government similar to that of the United States. But all the plans for constitutional government and a free ballot for the people were thrown out by the Lenin-Trotsky-Stalin Bolsheviks and the country was fashioned into a dictatorship more ruthless even than

that of the czars. The massacres, the mass deportations, the political purges, the enslavement of the minds and bodies of men to bring all under the absolute dictatorship during those bloody years of the 1920's and the 1930's are still fresh on the pages of history.

It was after World War II when the Soviet Army had been successful, with American and British materiel and military aid, that great numbers of Russians became really acquainted with the better, happier way of life in the West. Dick Johnson, correspondent for the New York Times, well expressed Russia's dilemma shortly after the close of the war when he said that the Soviets made two great mistakes—showing the Russians to Europe and Europe to the Russians.

COMMUNISM'S FAILURE EXPOSED TO THE RUSSIANS AND HER SATELLITES

A typical example of the realization of the poorer way of life that communism had given occurred when the Russian troops entered Budapest. The Russian soldiers, finding apartments with modern plumbing, in Communist frenzy tore out the plumbing, thinking these were the homes of the wealthy. When they found that these apartments were occupied by laboring people such as they themselves, they were shocked to discover the success of a free economy compared with that of a Communist police state. Russia is now unquestionably going through a soul searching far greater than during those instances of the past when just a slight breath of freedom fanned the Russian mind.

It is impossible to keep an educated, thinking people under the rigid thought control of Communist dictatorship. Yet, to compete with the modern world, as Stalin and Khrushchev were aware, it is necessary to bring education into Russia, for uneducated men cannot build an ICBM or a nuclear bomb.

What Stalin found and what Khrushchev is rapidly discovering in a more forceful manner is that education is a two-way road. When people become educated they demand more freedom, more choice of action, and the better things of life. The slight glimpses through the Iron Curtain following the Napoleonic Wars, the Crimean War, and the Russo-Japanese War caused unrest, but today exposing the Russians to the broader view has brought to the Soviets the realization of the differences between the want and scarcity that is communism and the abundance that freedom is giving to the West.

The recognition of the freedom and dignity of the individual that swept Europe in those centuries during and after the Renaissance and the Reformation is just now carrying that appreciation throughout the Russian Empire. A glimpse beyond that wall has occurred in Berlin where one-seventh of the people in East Germany have escaped to the West. This is only a token of the flood of people who will leave the satellite countries and Russia itself unless the Soviets keep in repair those walls and make them more impenetrable by more barbed wire and more bayonets to keep in all those who would escape to freedom.

Russia is confronted today with a very serious problem. They are aware that if people within their Empire were granted the government of their choice and leaders of their choice, chosen through free secret elections, several countries would emerge from what is now under solitary Russian rule. Rumania, Bulgaria, Hungary, Poland, East Germany, Estonia, Latvia, Lithuania, and many others would demand freedom. To grant them freedom would be to destroy the Russian Empire, the last of the conglomerate empires that has escaped the demands for freedom.

How much do the uncommitted nations of the world know of how those nations lost their freedom? Why are we not telling them of the dangers of playing "footsie" with the Russians?

KHRUSHCHEV FACED WITH UNSOLUBLE PROBLEMS

As long as Russia was annexing Asiatic tribes inferior economically and industrially to her and whose people, as her own, had been denied the realization of freedom, the problem of keeping these people suppressed was not too great. However, when Russia holds captive those who have known freedom, who have known the free ballot, who have known a cultural, economic, and industrial accomplishment far superior to Russia's, then her difficulties multiply. Such countries, among others, are East Germany, Poland, Hungary, Czechoslovakia, Estonia, Latvia, Lithuania. These countries must be dreaming of the day when they again can go to free elections and vote as free men.

While this problem is real to Russia, it is even greater to Khrushchev. Khrushchev, a most ambitious dictator, sees his popularity on the wane; and as ambitious rulers through the ages have attempted to destroy the image of their predecessors who climbed to greater heights than they, so it is with Khrushchev when he sparks the anti-Stalin movement. Khrushchev is faced with the dilemma that has faced tyrants through the ages. He must impress his subjects and he must show them his power through making territorial gains.

Stalin, leading from weakness, gained more territory in World War II than any other country in history as a result of one war. Yet, Khrushchev, leading from strength, has made no gains. Instead he has seen China, Yugoslavia, Albania, all of which at the death of Stalin appeared well within the Soviet orbit, today demonstrating to the world the heresy that a nation can be Communist without being Russian Communist. The Russians are becoming increasingly aware that China may well become a most difficult problem to the Soviets in the near future.

Khrushchev has also been faced with the sad plight of seeing these captive peoples, the ones that he has been telling the world are so in love with Russia, breaking for freedom through the iron wall at the Brandenburg gate in Berlin. The plight was so sad to him that he had to close the gate. It demonstrated that great Russia is to its people a prison instead of a modern utopia.

Khrushchev is faced with the ever-mounting difficulty of explaining to his people why the countries within the Russian orbit are the only countries in the world around which walls must be built and manned by soldiers with bayonets to keep the people in. He must explain to the people just awakening to the cry of freedom and dignity why the Soviets' problems are those of scarcity while ours are those of surplus. Khrushchev cannot explain the truth. So why are not we giving the true explanation by every available media—the right of man to be free?

Khrushchev's failure, frustration, and bitterness should not fill us with optimism, for a dictator that is desperate is dangerous, and he is desperate.

RUSSIA DOES NOT INTEND TO START A WAR

Russia has no intention of becoming involved in a war with the United States. Many facts attest to this. Russia's use of rockets and missiles has been gaged to the spectacular rather than toward military usage or scientific achievement. Russia's entire space program has been toward showmanship and the spectacular and gaged solely for two purposes.

First, Russia wants to impress her own people and those in her satellite countries by giving them what is apparently another great Russian accomplishment as a substitute for the rising demands among these peoples for the freedom and dignity of the individual and for more consumer goods. Russia's second purpose is to awe and frighten the people of the world, a type of blackmail, saying in effect that the world will be destroyed unless we yield to her demands. Khrushchev is playing Russian roulette with his country's future.

The United States is far ahead of Russia in the use of satellites that may be of scientific or military value such as the Samos, the "spy" or reconnaissance satellite which will carry optical cameras and send pictures back by television. The Midas, while in orbit, detects heat such as that which would be made by a missile firing, by means of infrared rays. That evidence is then transmitted electronically to our missile stations.

The United States also has communications, weather and navigation satellites aloft. Russia has not developed such satellites which are of great scientific and military value. Her developments in space have been toward the spectacular, to impress or frighten people. Russia could develop satellites of scientific and military value. The Russian mind is scientifically as capable as the American mind. But the fact is that Khrushchev demands all available energy and know-how in Russia is to be utilized for the spectacular. Khrushchev's attempted appeasement of his subjects by the spectacular is comparable to the circus of ancient Rome.

UNITED STATES SECOND TO NONE MILITARILY

During the last election campaign we heard a great deal about the supposed missile gap, but when President Kennedy recently sent a message to the Congress to "beef up" our conventional weapons and equipment such as tanks and guns, he did not request additional ICBM's or an accelerated bomber or fighter program.

The reason for this is that the President believes that the United States is well ahead of Russia in these fields. While I believe that the United States should have proceeded with the B–70 bomber program at the accelerated rate as planned by President Eisenhower to prepare for conditions that may exist 4 or 5 years from now, I am certain that President Kennedy is right today as to our superiority in the field of military air and military missile power.

I have been especially interested and keep myself informed as to our military strength and buildup, as I have been on the House Armed Services Committee for more than 8 years and a commissioned officer in the Active or Inactive Reserve since 1925. For several years I have addressed this body toward the end of Congress and pointed out in some detail our military strength and the progress that we have been making through the years.

It is true that we did make an error regarding our missile program and that was when the President, on July 1, 1947, canceled our NX–774 program, the forerunner of our ICBM Atlas missile program. We did allow Russia to gain an advantage in long-distance missiles and rockets during the next 6 years.

In 1953, however, we started our missile program full speed ahead and today, except for the rockets capable of lifting heavy loads into orbit, we are well ahead of Russia, especially in the military missile field. Besides many Army and Navy atomic missiles of short or intermediate range we have atomic missiles which can be fired from planes at ground targets many hundreds of miles away with great accuracy.

Russia knows of our superiority in missiles. The United States now has Atlas and Titan missile squadrons operational and in increasing numbers that can go 6,500 miles—9,000 miles if necessary—and strike any target in Russia with pinpoint accuracy, each carrying an atomic warhead 100 times more powerful than the one that destroyed Hiroshima. The recent missile squadrons that we are constructing can fire the missiles from underground "silos" where they have almost absolute protection from enemy attack. The Minuteman, a much cheaper, solid-propellant missile, is coming into operation.

While the number of atomic bombs the United States has is classified, it is a well-known fact that we have many times the number of such weapons that Russia has. The United States has a couple of thousand bombers, each capable of dropping an atomic bomb on Russia. We also have a couple of thousand fighter bombers with atomic capabilities. We are far ahead of Russia in the field of the atomic-powered Polaris submarine. Chapters could be written on our rapidly improving and expanding military strength in many fields, in the air, on the ground and on and under the sea. The recent U–2 incident showed the world that the United States could fly over Russia at will, something that she cannot do to us. I am, however, well aware of Russia's strength, and know that we should not be complacent. However, we should not have an inferiority complex and certainly we do not need to yield to Russian blackmail because of any supposed inferior military strength on our part.

AMERICAN ECONOMIC STRENGTH FAR GREATER THAN RUSSIAN

America's economic strength is many times greater than that of Russia—so great that our problems are those of surplus while Russia's are those of scarcity.

A startling example of this is that in Russia today it takes a workingman more hours of labor to earn the money to purchase the seven essential foods than it took him in 1928. In the United States the workingman can earn the money to purchase the same seven essential foods in one-half the time it took in 1928. In Russia one-half the people work on farms and cannot produce food enough to adequately support the population. In the United States one-eighth of the people live on farms and produce a superabundance of food to supply America and a substantial part of the world. The same pattern is true throughout Russian industry. Russia has centered all her interest on the spectacular to impress the people to the point of forgetting that they are not receiving the sacred right of freedom.

RUSSIA'S MISSILE ACCOMPLISHMENTS DIRECTED TO INSPIRE FEAR INSTEAD OF MILITARY USEFULNESS

Despite Russia's threats of her great missile accomplishments, we know that she has only fired three of these long-distance, surface-to-surface missiles more than 4,000 miles. We know this because her missile range across Siberia is only 4,000 miles long and only three missiles have gone beyond Siberia to land in the Pacific Ocean.

The United States has fired scores of missiles from 5,000 to 9,000 miles with remarkable accuracy, a fact of which all the world is aware, for most of our test shots have been down range from Cape Canaveral across the Caribbean and the Atlantic and the others out over the Pacific. With the few tests that Russia has made, she could not possibly have made missile advances such as those made by the United States.

Russia does have ICBM's. We do not know their accuracy nor the effectiveness of their warheads. We do know the efficiency of these missiles is inferior to ours; they could not have made the advances that we have made with their lack of testing. They could improve the capabilities of their weapons but Russia, in this as in many other fields, has relied upon the spectacular to impress her own and satellite subjects and to inspire the world with fear to gain her ends.

No leader in the world has ever worked more tenaciously and dramatically to impress the world with fear than has Khrushchev. The Mongol leaders of the 12th to the 15th centuries have never been exceeded in their ability to gain selfish territorial ends by inspiring the peoples of that day with fear and the Russian leaders of today are worthy successors to the Mongols in that art.

It is impossible to rationalize by our standards the frowns and smiles—the wild threats and friendly promises—the rapid contradictions—the startling inconsistencies—the insane ravings—the puerile bragging—the obvious brazen falsehoods of the Kremlin. It is part of the cold war, of which Russia has been most adept and in which Khrushchev has become a past master.

Khrushchev's wrecking of the summit conference last year—his beating on the desk at the United Nations with his shoe—his praise of the looting and murder in the Congo—his encouraging the murderous butchering in Laos—his support of uprisings throughout the world—Russia's 95 vetos in the United Nations—her inspired demonstrations of the "pinko" students in the United States and abroad—the encouragement of the ravings of "chicken pickin' " Castro and the alternating promises of peace and threats of war—all are a part of the cold war.

Khrushchev's firing seven atomic bombs in rapid succession within the last few days could not have been made as much for research purposes as to blackmail the free world by fear. If these explosions were for scientific reasons there would have been periods of study between each shot. Every atomic blast in the past by the United States has been for testing purposes; as a result of these explosions we are far ahead of Russia in the efficiency of our bombs. Russia is now frightening the world by threatening to fire a 100-megaton bomb, probably in the sky. This could be possible and dangerous but of no great research value. The United States already has made great studies, without testing, of the feasibility of an antimissile missile with an atomic projector which would be fired and exploded many miles in the sky to intercept incoming atomic missiles.

It might be thought that a 100-megaton bomb would be 10 times as destructive as a 10-megaton bomb. This is not the case. Ten 10-megaton bombs would place 10 craters with a combined radius of 2.5 miles and a total area of destruction of 20 square miles. But if instead a 100-megaton bomb were used it would only exceed the coverage of a 10-megaton bomb on the earth's surface by the multiple of the cube root of 10 which means it would blast a crater of slightly more than one-half-mile radius covering an area of 1 square mile. While the 100-megaton bomb would be but little more destructive on the earth's surface, it might instill the people of the world with 100 times more fear and that is the Russian goal of today.

So what Russia will do in the end no one knows, but even today they are planning to scare the world and to blackmail us into yielding to Russian slavery.

IF KHRUSHCHEV INTENDED TO ATTACK HE WOULD NOT BE MAKING SUCH VIOLENT THREATS

No nation in history has been as violent in threats against the peace of the world as has Russia. She has done everything possible to instill fear in the world to make it aware of her threat.

But that fact more than all else demonstrates that she does not mean to start a war. If Russia intended an attack instead of threats she would promise peace and kindness in order to get us off guard so she could more readily launch an attack.

Russia has followed for centuries the philosophy of Sun Tsu, the famous Chinese military leader and writer of the fifth century before Christ, who said:

All warfare is based on deception. Hence, when able to attack we must seem unable; when using our forces, we must seem inactive; when we are near, we must make the enemy believe that we are away; when far away, we must make him believe that we are near.

Russia's history for 500 years has shown her never to give a warning of an attack. Russia's first great military conquest when Ivan III started expanding the principality of Muscovy was the conquest of Novgorod when he sent a small army under the guise of friendship to assist that city. The Russian army is still there.

Russia was the protector of Poland when she first participated in the partitioning of that country in 1772. Russia was also the protector of the Crimea, the Circassians and Caucasian tribes before she took them over. In the invasion of Poland during 1939 Russia was claiming friendship and love of Poland on the very day—September 17—that 100 Russian divisions swept over the Polish eastern border, while Germany had attacked from the west 17 days earlier.

In 1877, Russia asked Rumania to allow her forces to go into that country to assist her in the war against Turkey, saying:

The Emperor of all Russias, pledges himself to maintain and to make respected the political rights of the Rumanian state to maintain and defend the present integrity of Rumania.

While there she took over Bessarabia from Rumania.

In the Russian conquest of Estonia, Latvia, and Lithuania, pursuant to her secret agreement with Germany in 1939, Russia was promising friendship, loyalty, and assistance to each of these countries as her armies were moving in. In February 1921, as the Russian Army was massing on the borders of Georgia, Lord Curzon, Foreign Secretary of Great Britain, protested to Russia over what appeared to be an impending attack. Russia's reply was:

Soviet Russia has not committed and will not commit in the future any hostile act against the Republic of Georgia.

Within hours, four Russian Army corps overran Georgia, massacring thousands.

BEWARE OF RUSSIA WHEN SHE PROMISES PEACE

The story of five centuries of Russian aggression shows a monotonous pattern of promising peace, obtaining the confidence and good will of the country that is about to be made a prey, and then violating that confidence. If Russia intended an attack on the West it would be against every Russian principle to give the warning that she has today, for that warning is making us aware of the threat, and I assure you that the United States is ready for such an attack.

Russia intends to gain victory by instilling the West with fear. Most of Russia's conquests have been by a series of subtle moves ranging from outright blackmail to a pretense of protection, from open threats to treaties of friendship. For example, when Russia marched into Poland and the Baltic countries in accordance with her secret conspiracy with Hitler in 1939, she was breaking 36 treaties of friendship and nonaggression which had been openly arrived at since World War I. When the object of Russian aggression resists her, she backs away and directs her aggression elsewhere. She does not return to direct her aggression against that same country until it has become either friendly to Russia or has become unprepared.

As history is filled with Russian aggression toward other people, there are also examples of her backing away when confronted with determined resistance.

It will be recalled that American forces landed in Lebanon on July 14, 1958, following violent threats by Russia against practically the whole free world. When Russia saw that the United States was able and willing to resist Soviet aggression, her violent threats abated. On July 24 the Polish Embassy in Moscow had a party where Khrushchev sat at the table of our Ambassador Llewellyn Thompson and was most cordial and friendly for an hour and a half. This again demonstrated that there are two things that Russia respects—strength and determination.

The fact that Russia does not intend to spark a war does not mean that war will not come. Khrushchev is desperate. He knows that the United States has economic and military power greater than his, but does he know that the United States has a spiritual will to resist Russia in her continuing goal of stifling freedom and the dignity of free people?

If Khrushchev knows that we have such spiritual determination there will be no war, but does Khrushchev know this? Khrushchev sees that the world is laughing at him because his failure is evidenced by the escaping millions in Berlin. He is attempting to blackmail us into surrendering freedom but we must remember that the blackmailer is never appeased. If we yield in Berlin, tomorrow the demands will be the Rhine.

The increasing demands of the people behind the Iron Curtain for freedom and dignity, such as the West has enjoyed for centuries but which is just penetrating through the Iron Curtain, will intrigue them more and more. They will want freedom and the spectacular alone will not appease them.

But Khrushchev will not intentionally start a war unless he is a madman and if he is that, then our yielding to him will not bring peace. Every vacillation, every yielding to Russia by surrendering the freedom of man encourages her to think that we will give in. The most certain way we have of getting into war is by compromise, vacillation, by yielding to her bluffs and by encouraging Russia to make the fatal plunge believing that we would yield again as we have so often in the past.

And so it is up to us to keep that path brilliantly lighted and crystal clear with a firm, fair, well-defined policy so that Russia will not stumble into a war of miscalculation. So that Russia will know just how far she can go—and that that step is definitely just short of West Berlin.

Again I repeat, every American leader who gives the impression that the United States will yield in Berlin is encouraging Russian aggression that may lead to war. The right is on our side. We should continue to demand that Russia abandon her colonialism of which she falsely accuses us. We must demand that she give her satellite peoples the secret ballot; we must demand that she grant them freedom and dignity denied by Russian leaders but accepted as a way of life in the West. Again we must push truth with the same vigor as Russia pushes lies. We must lead from our strength to Russia's weakness.

I realize that there are those in the world who do not treasure freedom, those to whom the freedom and dignity of man means but little. I am certain, however, that the overwhelming majority of Americans prize that freedom more than life itself. There are but two philosophies of government in the world. One is that God created man and that all government is for the benefit of man. This is the belief of the free. The other theory is that the state is supreme and that man was created to serve as a slave to that State. This is the belief of communism. So our contest with Russia today is not just a struggle for lands and power—it is a struggle for the souls of men. It is as fundamental as life itself.

Freedom is a gift from God to man, but it can only be maintained by the strong and the brave. There are those who say that it is better to be a live jackal than a dead lion. That may be true for lions and jackals, but we are talking about men.

WILL THE U.S. DELEGATION TO THE INTERPARLIAMENTARY UNION CONFERENCE MEET THE CHALLENGE OF SELF-DETERMINATION?

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Ohio [Mr. FEIGHAN] is recognized for 30 minutes.

Mr. FEIGHAN. Mr. Speaker, the Interparliamentary Union will convene in Brussels, Belgium, tomorrow for its 50th conference. This conference is important to the future representative, self-government because its tradition has been to provide a common meeting ground for parliamentarians of the world. The parliamentary form of government is the key to self-government. Nations may differ as to the precise parliamentary form best suited to their needs, but the function of all parliamentary bodies worthy of the name is to provide a voice for the governed in the affairs of their government.

I was a delegate to the 47th conference of the Union held at Rio de Janeiro in 1958. On that occasion I addressed the conference on the question of development of Representative Assemblies in Non-Self-Governing Territories. This question was before the Conference in the form of a resolution authorizing steps to encourage representative self-government in non-self-governing territories.

On behalf of the United States I offered an amendment to the pending resolution—the amendment read as follows:

And since it is a matter of equal concern that many once free and independent nations during the past 40 years have been reduced to the status of non-self-governing nations, deprived of their free political institutions and representative parliamentary bodies, thus creating a situation causing widespread strife within such nations, leading to international tensions which might give rise to war;

Considers that such non-self-governing nations should be given consideration equal to that accorded non-self-governing territories in all proceedings of the conference.

The basic point I strongly urged was that for the Conference to limit its interest to what we have come to call non-self-governing territories while neglecting the pressing problems of non-self-governing nations, would be an act of unprecedented hypocrisy. My plea principally was that at least equal consideration be given to the need for reestablishing representative self-government in the captive, non-Russian nations of the vastly expanded Russian Empire.

At that Conference the representatives of the Russian Communist empire posed as enthusiastic supporters of self-government for the colonial and dependent areas of the free world. They were anxious to cause as much embarrassment for the free world as possible. The forum of the Conference was seized upon by the Russians as a world platform to inflame world opinion against Great Britain, France, Spain, and Portugal in particular, and the Western World in general.

The U.S. amendment and my speech infuriated the Russians. I will include my speech in the extension of my remarks. This U.S. amendment was referred by the proper committee to which it had been assigned, to the Juridical Committee, to be considered at a later meeting of the Union.

At the spring, interim meeting of the Interparliamentary Union, held in Naples during 1959, the pending resolution and the U.S. amendment were considered. The same objections expressed at the Rio Conference were raised against the U.S. amendment, particularly by the Russians, who recognized in this amendment a threat to their Russian colonial empire. The matter was held over for further study.

The 48th Conference of the Interparliamentary Union was held at Warsaw, Poland in 1959. No action was taken on the pending resolution concerning non-self-governing territories which could have afforded the U.S. delegates an opportunity to express their support for the U.S. amendment to give equal concern to non-self-governing nations.

I was not a delegate to the 1959 Conference.

The issue of self-government rests at the core of the Berlin crisis. President Kennedy has proposed the only reasonable peaceful solution to the crisis of Berlin and East Germany, that is, exercise of the right of self-determination by the people directly concerned. All the peoples of Europe, on both sides of the Russian Iron Curtain, are anxiously awaiting steps to effectuate the peaceful proposals put forth by President Kennedy. The U.S. delegation to the Interparliamentary Union Conference in Brussels can further the peaceful solution to the Berlin crisis proposed by President Kennedy by calling for consideration of means by which representative self-government can be restored to the peoples of the non-self-governing nations within the present-day Russian Communist empire.

The agenda, 3(c), of the Brussels Conference, calls for consideration of the political development of non-self-governing territories. The British and the French delegates at the spring meeting urged this consideration. The U.S. delegation must insist upon equal consideration to non-self-governing nations.

The Russians should be made to answer why they claim to favor self-government for nations and territories outside the Russian Communist empire and why they refuse to discuss self-government for peoples and nations held subjugated by Russian terrorism and force of arms. This Russian duplicity is their usual tactic of a double standard used to suit their aims and ambitions.

The peace of the world demands that men be free. Therefore it is imperative that the vital question of self-determination of nations, as well as territories, be considered by the Conference.

The U.S. delegates have the obligation to take a firm and decisive stand on this issue. They must initiate and support the U.S. amendment to accord equal time and consideration to the problem of the non-self-governing nations of the Russian empire.

I have urged delegates to the Conference at Brussels to insist that the U.S. amendment of 1958 in Rio de Janeiro be presented and brought to a vote. I will be awaiting a reply from Brussels on the action that the delegation takes. I hope I can report to the Members of the House before adjournment.

My speech at the 47th Conference in support of the amendment offered in behalf of the United States reads as follows:

The quest for peace engages the attention and efforts of men of good will in all parts of the world. All humanity is today beset by strife and tensions which, if allowed to persist, will plunge the world into the disaster of another war. This is the overriding challenge of our times. The question before all of us is: How can we remove the strife and tensions which give rise to war?

One of the outstanding causes of strife and tension is injustice. That is, injustice against people and nations.

In our times it is injustices against entire nations which cause unrest on a scale unparalleled in the history of mankind and thereby retard the winning of a lasting peace. The demand for genuine, representative self-government is heard from the people of all nations who are today the victims of colonialism or imperialism in any form.

The old colonialism is giving way to the rising tide of nationalism as the empires of the past are becoming reconciled to the need for a new world order in which all nations shall govern their own affairs and live at peace with their neighbors. This reconciliation carries with it the high responsibility for assisting the people of the old colonial territories in the task of building free political institutions which will assure representative parliamentary bodies. Only through the exercise of a universal vote, free and secret ballots, the right of multiple political parties which take their case to the electorate at fixed intervals, and parliamentary bodies which adhere to the right of the opposition to dissent, can such free political institutions be built and preserved. In turn this requires responsible local leadership which is responsive to the will of the electorate.

This, then, is the challenge which confronts both the statesmen of the administering power of the non-self-governing territories and the people of such territories. It is a common task in which both interests must assume equal responsibility. There is sufficient good will on all sides to assure success once the objectives are clearly defined and a time set for the accomplishment of the task.

Significant and praiseworthy steps have already been taken by the administering powers in many of the non-self-governing territories. In some, democratic and representative parliamentary bodies are in the process of forming, others are undergoing adjustments to make direct representation of the people a reality. In some the tempo of constructive change is not keeping pace with the popular demands of the politically awakened people. But in practically all these territories the need for a change is recognized and the reconciliation which accompanies it provides the necessary basis for a bright and orderly future.

Turning to the new colonialism, one immediately sees under the yoke of this new imperialism a long array of politically mature and well established nations which today are non-self-governing, which have been deprived of their free political institutions and whose representative parliamentary bodies have been destroyed. These ancient and proud nations, surely no less than the newly awakened nations of Asia and Africa, are worthy of the considerate and continuing interest of this conference.

During the past 40 years this new colonialism, this new imperialism has

forcibly incorporated once free, democratic and independent nations into its empire. This new imperialism seeks to accommodate the rising tide of nationalism by spuriously proclaiming that these nations are independent. However, by its own definition the new imperialism limits this independence to hollow form while the substance of the state, that is the very life of the state and its people, is completely controlled by an alien, unwanted and predatory power. Clearly, no nation or territory can be self-governing unless the people therein exercise complete control over the internal affairs of the nation and are undisturbed masters of their destiny. The record of the past 40 years demonstrates that the people of these non-self-governing nations will never be satisfied with "national independence" which is limited to meaningless forms. So long as they are deprived of the essential substance of national independence, which is the right to govern their own affairs free from alien control or direction, they will continue to exercise the only opportunities open to them to dissent, that is, by internal revolts and freedom revolutions.

Within the past 5 years we have witnessed three outstanding expressions of violent dissent by the people within the orbit of Russian influence. In 1953 there was the mass uprising in East Germany in which the workers and peasants sought to throw off alien rule. This was followed in 1956 by the popular revolts in Poland in which all the people of Poland were in sympathy. Then in October of 1956 the entire Hungarian nation, workers, peasants, soldiers, intellectuals and even some of the new ruling class rose up in a bloody revolution which resulted in the restoration for 5 historic days of national independence in substance as well as in form. All the people of the world know that it took a major military campaign by the Red Army to return Hungary to the status of a non-self-governing nation. Time does not permit a full recount of the many popular uprisings which have taken place over a period of many years in Ukraine, Georgia, Turkestan, the Baltic States, and in other non-Russian nations. However, the implicit warning carried by these events urges us to find an honorable remedy to end the human strife and dangerous international tensions which they create.

To that end I propose that the draft resolution now before this conference be amended to reflect the urgent need for developing procedures whereby the people of once free and independent nations which have been reduced to the status of non-self-governing territories shall be accorded the opportunity, under the United Nations supervision, to freely determine the substance as well as the form of their government. Such steps would be in accordance with the spirit and the letter of the United Nations Charter.

Allow me to make one point clear, beyond any doubt. I do not include in my proposal the Russian nation itself which, as is well known, is only one of many nations which make up the Soviet Union, of which its population constitutes a minority. It is strictly an internal matter for the Russian people to determine whether their nation is to be self-governing. This is not a concern of this conference nor should it be a concern of the United Nations.

It has always appeared to me to be grossly unjust that in any consideration of the colonial or dependent territory problem that the burden is placed only upon the old colonialism, which as I have said has largely reconciled itself to the inevitable changes taking place in the world. The new colonialism, the new imperialism carries with it a far greater threat to the winning of the peace. Surely the non-Communist world, in and of itself, cannot expect to eliminate the dangerous international tensions which give rise to war. These tensions can be eliminated only by an equal amount of good will and desire for changes on the part of the ruling class of the new colonialism. That is, changes which accord with the freely expressed will of the people. The cause of peace and amity among nations requires that this burden be borne by all forms of colonialism and imperialism.

To that end I urge this conference now and in the future to give equal consideration and attention to the problems of non-self-governing nations as that given to non-self-governing territories.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. SLACK (at the request of Mr. BAILEY), for the remainder of this week, on account of illness.

Mr. ROBISON (at the request of Mr. HALLECK), for Wednesday, September 13, on account of business in the 37th District of New York.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. PATMAN, for 30 minutes, on Monday, September 18, 1961, and for 30 minutes, on Tuesday, September 19, 1961.

Mr. BAILEY, for 30 minutes, on Monday, September 18, 1961.

Mr. SCHWENGEL (at the request of Mr. SHORT), for 30 minutes, on September 18.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. CURTIS of Massachusetts, his remarks in Committee and to include extraneous matter.

Mr. HOFFMAN of Michigan.

Mr. FEIGHAN (at the request of Mr. GALLAGHER) to revise and extend his remarks under special order today and include extraneous matter.

(The following Members (at the request of Mr. SHORT) and to include extraneous matter:)

Mr. CUNNINGHAM.

Mr. KEARNS.

Mr. BEERMANN.

Mrs. MAY.

(The following Members (at the request of Mr. GALLAGHER) and to include extraneous matter:)

Mr. CAREY.

Mr. BAILEY.

ENROLLED BILLS SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker pro tempore:

H.R. 6141. An act to amend the act of September 1, 1954, in order to limit to cases involving the national security the prohibition on payment of annuities and retired pay to officers and employees of the United States, to clarify the application and operation of such act, and for other purposes; and

H.R. 7035. An act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1962, and for other purposes.

SENATE ENROLLED BILL SIGNED

The SPEAKER pro tempore announced his signature to an enrolled bill of the Senate of the following title:

S. 1317. An act to change the designation of that portion of the Hawaii National Park on the island of Hawaii, in the State of Hawaii, to the Hawaii Volcanoes National Park, and for other purposes.

BILLS AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills and joint resolutions of the House of the following titles:

H.R. 176. An act to amend section 331 of title 28 of the United States Code so as to provide for representation on the Judicial Conference of the United States;

H.R. 2816. An act for the relief of CWO James M. Cook;

H.R. 2863. An act to amend title 28, entitled "Judiciary and Judicial Procedure," of the United States Code to provide for the defense of suits against Federal employees arising out of their operation of motor vehicles in the scope of their employment, and for other purposes;

H.R. 3606. An act for the relief of William C. Winter, Jr., lieutenant colonel, U.S. Air Force (Medical Corps);

H.R. 3863. An act for the relief of Woody W. Hackney of Fort Worth, Tex.;

H.R. 4369. An act for the relief of Henry James Taylor;

H.R. 4458. An act to authorize the Secretary of the Interior to replace lateral pipelines, line discharge pipelines, and to do other work he determines to be required for the Avondale, Dalton Gardens, and Hayden Lake irrigation districts in the State of Idaho;

H.R. 4669. An act to amend the law relating to gambling in the District of Columbia;

H.R. 5182. An act for the relief of Charles P. Redick;

H.R. 5559. An act for the relief of Ralph E. Swift and his wife, Sally Swift;

H.R. 6667. An act to amend the act of August 16, 1957, relating to microfilming of papers of Presidents of the United States, to remove certain liabilities of the United States with respect to such activities;

H.R. 6996. An act for the relief of Harry Weinstein;

H.R. 7035. An act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1962, and for other purposes;

H.R. 7264. An act for the relief of M. C. Pitts;

H.R. 7447. An act to amend the Strategic and Critical Materials Stock Piling Act to provide for the immediate disposition of certain waterfowl feathers and down;

H.J. Res. 109. Joint resolution designating the 17th day of December 1961 as "Wright Brothers Day"; and

H.J. Res. 499. Joint resolution authorizing a celebration of the American patent system.

ADJOURNMENT

Mr. GALLAGHER. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 19 minutes p.m.) the House adjourned until tomorrow, Thursday, September 14, 1961, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1306. A letter from the Under Secretary of Commerce, transmitting a draft of a proposed bill entitled "A bill to amend the provisions of title 35 of the United States Code relating to the oath of applicant for patent, and the provisions of the Trademark Act of July 5, 1946, relating to verification by the applicant of application for trademark registration, and for other purposes"; to the Committee on the Judiciary.

1307. A letter from the Under Secretary of Commerce, transmitting a draft of a proposed bill entitled "A bill to authorize the Secretary of Commerce, in cooperation with the State of Alaska, to undertake studies and surveys relative to a highway construction program for Alaska, and for other purposes"; to the Committee on Public Works.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. SISK: Committee on Rules. House Resolution 455. Resolution taking H.R. 2010 from the Speaker's table and agreeing to the conference; without amendment (Rept. No. 1176). Referred to the House Calendar.

Mr. HARRIS: Committee on Interstate and Foreign Commerce. H.R. 7318. A bill to amend the Federal Aviation Act of 1958, as amended, to provide for a class of supplemental air carriers, and for other purposes; with amendment (Rept. No. 1177). Referred to the Committee of the Whole House on the State of the Union.

Mr. TOLL: Committee on the Judiciary. H.R. 9096. A bill to amend the antitrust laws to authorize leagues of professional football, baseball, basketball, and hockey teams to enter into certain television contracts, and for other purposes; with amendment (Rept. No. 1178). Referred to the House Calendar.

Mr. SPENCE: Committee of conference. S. 902. A bill to amend the Small Business Investment Act of 1958, and for other purposes (Rept. No. 1179). Ordered to be printed.

Mr. SPENCE: Committee of conference. H.R. 8762. A bill to amend the Small Business Act to increase the amount available for regular business loans thereunder (Rept. No. 1180). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MILLS:

H.R. 9189. A bill to amend the Tariff Act of 1930 and certain related laws to provide for the restatement of the tariff classification provisions, and for other purposes; to the Committee on Ways and Means.

By Mr. CAHILL:

H.R. 9190. A bill to amend the act of July 13, 1946, to authorize the construction, maintenance, and operation of certain additional toll bridges over or across the Delaware River and Bay; to the Committee on Public Works.

By Mr. CELLER:

H.R. 9191. A bill to amend section 64(a)(2) of the Bankruptcy Act; to the Committee on the Judiciary.

H.R. 9192. A bill to amend the Immigration and Nationality Act so as to remove limitations on the authority of the Attorney General to prescribe the fees to be charged for services rendered to individuals and to authorize the Attorney General to prescribe such fees administratively on a basis commensurate with the services rendered; to the Committee on the Judiciary.

By Mr. CURTIS of Missouri:

H.R. 9193. A bill to amend the Internal Revenue Code so as to permit the division of a corporation into two corporations on a fully non pro rata basis; to the Committee on Ways and Means.

H.R. 9194. A bill to amend the Internal Revenue Code of 1954 to provide that the costs of education or training shall be deductible as trade or business expenses when incurred in order to obtain a new or better job, as well as when incurred in order to maintain existing skills, status, salary, or employment; to the Committee on Ways and Means.

By Mr. HALPERN:

H.R. 9195. A bill to authorize Federal mutual savings banks; to the Committee on Banking and Currency.

By Mrs. KEE:

H.R. 9196. A bill to amend chapter 73 of title 38, United States Code, with respect to the annual rate of compensation of certain medical personnel, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. RAINS:

H.R. 9197. A bill to authorize Federal mutual savings banks; to the Committee on Banking and Currency.

By Mr. CELLER:

H.R. 9198. A bill requiring announcement of the fact that music broadcast in connection with certain programs was recorded or otherwise reproduced in a foreign country; to the Committee on Interstate and Foreign Commerce.

By Mr. CAREY:

H.R. 9199. A bill for the relief of certain officers and enlisted personnel of the 1202d Civil Affairs Group (Reinf Tng), Fort Hamilton, Brooklyn, N.Y.; to the Committee on the Judiciary.

By Mr. ROUSH:

H.R. 9200. A bill to amend the Federal Property and Administrative Services Act of 1949 to authorize the disposal of surplus property to certain welfare agencies; to the Committee on Government Operations.

By Mr. WEAVER:

H.R. 9201. A bill to amend the Agricultural Adjustment Act of 1938, as amended, to establish a marketing program for wheat; to the Committee on Agriculture.

By Mr. HALPERN:

H.R. 9202. A bill to amend the National Housing Act to provide specific authority for the insurance by the Federal Housing Administration, under its home improvement loan programs, of loans for the construction of civil defense shelters; to the Committee on Banking and Currency.

H.R. 9203. A bill to amend the Internal Revenue Code of 1954 to allow a taxpayer a deduction from gross income for expenses incurred by him in the construction of a civil defense shelter of approved type and design; to the Committee on Ways and Means.

By Mr. ADDABBO:

H.R. 9204. A bill to assist the several States in establishing hospital facilities and programs of posthospital aftercare for the care, treatment, and rehabilitation of narcotic addicts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. CAHILL:

H.J. Res. 570. Joint resolution granting consent of Congress to the State of Delaware and the State of New Jersey to enter into a compact to establish the Delaware River and Bay Authority for the development of the area in both States bordering the Delaware River and Bay; to the Committee on the Judiciary.

By Mr. FOGARTY:

H.J. Res. 571. Joint resolution proposing an amendment to the Constitution relating to eligibility to the office of President; to the Committee on the Judiciary.

By Mr. RIVERS of Alaska:

H.J. Res. 572. Joint resolution to authorize the Secretary of Commerce, in cooperation with the State of Alaska, to undertake studies and surveys relative to a highway construction program for Alaska, and for other purposes; to the Committee on Public Works.

By Mr. FULTON:

H. Res. 456. Resolution expressing the sense of the House of Representatives that Kuwait should become a member of the United Nations; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANFUSO:

H.R. 9205. A bill for the relief of Pui Yuk Cheng; to the Committee on the Judiciary.

H.R. 9206. A bill for the relief of Bartolomeo Ventimiglia; to the Committee on the Judiciary.

By Mr. DINGELL:

H.R. 9207. A bill for the relief of Mrs. Marjanna Szlikowicz; to the Committee on the Judiciary.

By Mr. FASCELL:

H.R. 9208. A bill for the relief of Alvaro Rodriguez Jimenez; to the Committee on the Judiciary.

By Mr. HALPERN:

H.R. 9209. A bill for the relief of Giuseppina Leonardis Caruso; to the Committee on the Judiciary.

H.R. 9210. A bill for the relief of Estela Colobong; to the Committee on the Judiciary.

By Mr. JOELSON:

H.R. 9211. A bill for the relief of Marie Kopoochian; to the Committee on the Judiciary.

By Mr. LANKFORD:

H.R. 9212. A bill for the relief of Mrs. Irene Kakaviatos; to the Committee on the Judiciary.

By Mr. MOSHER:

H.R. 9213. A bill for the relief of Rafael Bosch and his wife, Angeles Bosch; to the Committee on the Judiciary.

By Mr. MURPHY:

H.R. 9214. A bill for the relief of Ki Eun Chung; to the Committee on the Judiciary.

By Mr. RIEHLMAN:

H.R. 9215. A bill for the relief of Marija Lulic; to the Committee on the Judiciary.

By Mr. ZELENKO:

H.R. 9216. A bill for the relief of Evangelos Stephanides; to the Committee on the Judiciary.

REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308(b), which provides as follows:

(b) All information required to be filed under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

QUARTERLY REPORTS

The following reports for the first calendar quarter of 1961 were received too late to be included in the published reports for that quarter:

A. Active-Retired Lighthouse Service Employees Association, Post Office Box 2169, South Portland, Maine.
D. (6) $326.50. E. (9) $388.90.

A. Aetna Casualty & Surety Co., 151 Farmington Avenue, Hartford, Conn.
E. (9) $66.

A. Aetna Insurance Co., for itself and as successor to Piedmont Fire Ins. Co. and World Fire & Marine Ins. Co., 670 Main Street, Hartford, Conn.
E. (9) $106.32.

A. Agricultural Insurance Co., et al., 111 John Street, New York, N.Y.
E. (9) $198.33.

A. American Civil Liberties Union, Inc., 156 5th Avenue, New York, N.Y.
D. (6) $1,989.25. E. (9) $1,989.25.

A. American Dental Association, 222 East Superior Street, Chicago, Ill.
D. (6) $11,490.20. E. (9) $11,490.20.

A. American Eagle Insurance Co., et al., 123 William Street, New York, N.Y.
E. (9) $301.73.

A. American Home Assurance Co., 59 John Street, New York, N.Y.
E. (9) $60.35.

A. American Life Convention, 230 North Michigan Avenue, Chicago, Ill.
D. (6) $516. E. (9) $8.

A. American Merchant Marine Institute, Inc., 11 Broadway, New York, N.Y.
E. (9) $1,862.29.

A. American Nurses' Association, Inc., 10 Columbus Circle, New York, N.Y.
D. (6) $5,299.11. E. (9) $5,299.11.

A. American Re-Insurance Co., 99 John Street, New York, N.Y.
E. (9) $11.32.

A. American Thrift Assembly, 1025 Connecticut Avenue NW., Washington, D.C.
D. (6) $1,136. E. (9) $9,615.38.

A. American Tramp Shipowners Association, Inc., 11 Broadway, New York, N.Y.
D. (6) $23,500. E. (9) $15,894.37.

A. American Trucking Associations, Inc., 1616 P Street NW., Washington, D.C.
D. (6) $10,290.06. E. (9) $23,008.36.

A. AMVETS (American Veterans of World War II), 1710 Rhode Island Avenue, Washington, D.C.
E. (9) $1,831.25.

A. American Yugoslav Claims Committee, 61 West 87th Street, New York, N.Y.
D. (6) $180. E. (9) $289.04.

A. Robert E. Ansheles, 1025 Connecticut Avenue NW., Washington, D.C.
B. American Thrift Assembly, 1025 Connecticut Avenue NW., Washington 6, D.C.
D. (6) $1,500.

A. Apache Tribe of the Mescalero Reservation, Mescalero, N. Mex.

A. Arnold, Fortas & Porter, 1229 19th Street NW., Washington, D.C.
B. Apache Tribe of the Mescalero Reservation, Mescalero, N. Mex.

A. Arnold, Fortas & Porter, 1229 19th Street, Washington, D.C.
B. Commissioner of Baseball, 30 Rockefeller Plaza, New York, N.Y.
E. (9) $703.56.

A. Arnold, Fortas & Porter, 1229 19th Street NW., Washington, D.C.
B. National Retail Merchants Association, 100 West 31st Street, New York, N.Y.
D. (6) $3,335. E. (9) $138.81.

A. Edward Atkins, 51 East 42d Street, New York, N.Y.
B. National Association of Shoe Chain Stores, Inc., 51 East 42d Street, New York, N.Y.

QUARTERLY REPORTS

The following quarterly reports were submitted for the second calendar quarter 1961:

(NOTE.—The form used for reports is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE TWO COPIES WITH THE SECRETARY OF THE SENATE AND FILE THREE COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19------

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names or agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, place an "X" in the box at the left, so that this Office will no longer expect to receive Reports. ☐

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $_____Dues and assessments
2. $_____Gifts of money or anything of value
3. $_____Printed or duplicated matter received as a gift
4. $_____Receipts from sale of printed or duplicated matter

5. $_____Received for services (e.g., salary, fee, etc.)
6. $_____TOTAL for this Quarter (Add items "1" through "5")

7. $_____Received during previous Quarters of calendar year
8. $_____TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $_____TOTAL now owed to others on account of loans
10. $_____Borrowed from others during this Quarter
11. $_____Repaid to others during this Quarter

12. $_____"Expense money" and Reimbursements received this Quarter

Contributors of $500 or more (from Jan. 1 through this Quarter)

13. Have there been such contributors?

Please answer "yes" or "no": _____

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and Address of Contributor*
	(*"Period"* from Jan. 1 through _____, 19____)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $_____Public relations and advertising services
2. $_____Wages, salaries, fees, commissions (other than item "1")
3. $_____Gifts or contributions made during Quarter
4. $_____Printed or duplicated matter, including distribution cost
5. $_____Office overhead (rent, supplies, utilities, etc.)
6. $_____Telephone and telegraph
7. $_____Travel, food, lodging, and entertainment
8. $_____All other expenditures

9. $_____TOTAL for this Quarter (Add "1" through "8")
10. $_____Expended during previous Quarters of calendar year

11. $_____TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $_____TOTAL now owed to person filing
13. $_____Lent to others during this Quarter
14. $_____Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More

In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." REGISTRATIONS

The following registrations were submitted for the second calendar quarter 1961:

(NOTE.—The form used for registration is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE TWO COPIES WITH THE SECRETARY OF THE SENATE AND FILE THREE COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

	QUARTER			
P	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names or agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

SENATE

WEDNESDAY, SEPTEMBER 13, 1961

The Senate met at 11 o'clock a.m., and was called to order by Hon. LEE METCALF, a Senator from the State of Montana.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

Our Father, God, in the morning hour at this wayside altar of prayer, may the consciousness of Thy overshadowing presence grip our spirits with the possibilities which rise for each of us in every new dawn, wait for us upon the threshold of each day, which challenge us in every duty, and which open for us on golden hinges every door of opportunity.

In all the hurried pace we go, help us this day not to forget in our contacts with others the things we ought to remember, especially in the case of those whose skies take light and color from what we give or withhold, comrades whose gaiety our frown may quench, children whose gleam or gloom so largely reflects our tempers, the aged whose dreams are all back of them and who are dependent upon our courtesy and consideration.

Before turning now to waiting tasks we pause for Thy benediction. We are grateful for a heritage worth living for and dying for, and for a deathless cause that no weapon that has been formed can ever defeat.

In the Redeemer's name. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., September 13, 1961.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. LEE METCALF, a Senator from the State of Montana, to perform the duties of the Chair during my absence.

CARL HAYDEN,
President pro tempore.

Mr. METCALF thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. ENGLE, and by unanimous consent, the reading of the Journal of the proceedings of Tuesday, September 12, 1961, was dispensed with.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that on September 13, 1961, the President had approved and signed the following acts:

S. 1653. An act to amend title 18, United States Code, to prohibit travel or transportation in commerce in aid of racketeering enterprises;

S. 1656. An act to amend chapter 50 of title 18, United States Code, with respect to the transmission of bets, wagers, and related information; and

S. 1657. An act to provide means for the Federal Government to combat interstate crime and to assist the States in the enforcement of their criminal laws by prohibiting the interstate transportation of wagering paraphernalia.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The ACTING PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting several nominations, which were referred to the Committee on the Judiciary.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 8302) making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1962, and for other purposes; that the House receded from its disagreement to the amendment of the Senate numbered 2 to the bill, and concurred therein with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had passed the following bills, in which it requested the concurrence of the Senate:

H.R. 8520. An act to amend the Soil Conservation and Domestic Allotment Act, as amended, to add a new subsection to section 16 to limit financial and technical assistance for drainage of certain wet lands;

H.R. 8871. An act to amend the Federal Employees' Compensation Act of 1960; and

H.R. 9030. An act to amend the act to promote the education of the blind, approved March 3, 1879, as amended, so as to authorize wider distribution of books and other special instruction materials for the blind, and to increase the appropriations authorized for this purpose, and to otherwise improve such act.

HOUSE BILLS REFERRED

The following bills were severally read twice by their titles and referred as indicated:

H.R. 8520. An act to amend the Soil Conservation and Domestic Allotment Act, as amended, to add a new subsection to section 16 to limit financial and technical assistance for drainage of certain wetlands; to the Committee on Agriculture and Forestry;

H.R. 8871. An act to amend the Federal Employees' Compensation Act of 1960; and

H.R. 9030. An act to amend the act to promote the education of the blind, approved March 3, 1879, as amended, so as to authorize wider distribution of books and other special instruction materials for the blind, and to increase the appropriations authorized for this purpose, and to otherwise improve such act; to the Committee on Labor and Public Welfare.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. ENGLE. Mr. President, under the rule, there will be the usual morning hour. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LEAVE OF ABSENCE

Mr. KUCHEL. Mr. President, I ask unanimous consent that the distinguished junior Senator from Texas [Mr. TOWER] be permitted to be absent from the sessions of the Senate this week, by reason of official business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

AMENDMENT OF TITLE 35, UNITED STATES CODE, RELATING TO OATH OF APPLICANT FOR PATENT

A letter from the Under Secretary of Commerce, transmitting a draft of proposed legislation to amend the provisions of title 35 of the United States Code relating to the oath of applicant for patent, and the provisions of the Trademark Act of July 5, 1946, relating to verification by the applicant of application for trademark registration, and for other purposes (with accompanying papers); to the Committee on the Judiciary.

STUDIES AND SURVEYS RELATING TO A HIGHWAY CONSTRUCTION PROGRAM FOR ALASKA

A letter from the Under Secretary of Commerce, transmitting a draft of proposed legislation to authorize the Secretary of Commerce, in cooperation with the State of Alaska, to undertake studies and surveys relative to a highway construction program for Alaska, and for other purposes (with an accompanying paper); to the Committee on Public Works.

RESOLUTION OF AIR POLLUTION CONTROL ASSOCIATION

Mr. JAVITS. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution adopted by the Air Pollution Control Association favoring the convening of another National Conference on Air Pollution during the year 1961 or 1962.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

AIR POLLUTION CONTROL

Whereas the contamination of our Nation's community air supplies have become an important national problem; and

Whereas many public and private groups and associations are conducting activities directed toward the solution of this problem; and

Whereas a better common understanding of the goals, requirements, and problems of these many groups and communities would facilitate a more rapid solution to the basic problem; and

Whereas the Air Pollution Control Association has long supported all constructive efforts to further understanding of the causes and dimensions of the air pollution problem, and to provide an effective exchange of views and opinions relevant to its solution; and

Whereas these purposes were served in an outstanding fashion by the 1958 National Conference on Air Pollution, convened by the U.S. Department of Health, Education, and Welfare: Now, therefore, be it

Resolved—

1. That the Air Pollution Control Association does hereby urge the President of the United States, the Secretary of Health, Education, and Welfare, and the U.S. Surgeon General to convene another National Conference on Air Pollution during the year 1961 or 1962.

2. That the Air Pollution Control Association extend its cooperation to the Department of Health, Education, and Welfare in the development of a suitable program.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HAYDEN, from the Committee on Appropriations, with amendments:

H.R. 9033. An act making appropriations for foreign assistance and related agencies for the fiscal year ending June 30, 1962, and for other purposes (Rept. No. 991).

By Mr. SMATHERS, from the Committee on Finance, with an amendment:

H.R. 10. An act to encourage the establishment of voluntary pension plans by self-employed individuals (Rept. No. 992).

Mr. MANSFIELD subsequently said: Mr. President, on behalf of the Senator from Florida [Mr. SMATHERS], I ask unanimous consent that the minority views of Senators DOUGLAS and GORE on H.R. 10 be printed with the committee report submitted thereon.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

By Mr. BYRD of West Virginia, from the Committee on Appropriations, with amendments:

H.R. 8072. An act making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending June 30, 1962, and for other purposes (Rept. No. 993).

REPORT ENTITLED "MILITARY SEA TRANSPORTATION SERVICE, BROOKLYN, N.Y."—REPORT OF A COMMITTEE (S. REPT. NO. 990)

Mr. McCLELLAN. Mr. President, on behalf of the Committee on Government Operations, I submit the report made to it by the Senate Permanent Subcommittee on Investigations entitled "Military Sea Transportation Service, Brooklyn, N.Y.," and ask that it be printed.

The Military Sea Transportation Service, a unit of the U.S. Navy, is charged with providing sea transportation for cargo and personnel of the U.S. military forces. It also has the duty to plan for and be capable of expansion in time of war and it necessarily arranges for the replacement and maintenance of vessels essential to accomplish this function.

Eight days of public hearings were held concerning this agency. Testimony revealed that improper gratuities were given by certain contractors to some employees of the Military Sea Transportation Service; that bribery of certain Government employees existed; and that certain Government employees were involved in conflict of interest matters with various contractors. Four of the witnesses invoked the fifth amendment, one of whom was George P. Cross, who held the top civilian position with the Military Sea Transportation Service and who refused to answer all questions pertaining to the source of $99,993.22 over and above his Government salary which he expended during the period 1955 to 1960. Following this exposure Cross resigned his position. Another Military Sea Transportation Service employee, John A. Berg, who was assistant port engineer, has been advised by the Navy of his removal on a charge of conduct unbecoming to a Government inspector. This matter is under appeal.

One of the contractors doing business with this agency, Sigmund J. Pehel, Pehel Industries, Inc., Brooklyn, N.Y., invoked the fifth amendment concerning a $3,000 corporation check which was given to the firm's accountant, Leonard A. Harris. This check was purportedly issued to bribe an agent of the Internal Revenue Service who had audited the corporation's Federal income tax returns. Leonard A. Harris, a certified public accountant, also invoked the fifth amendment on all questions pertaining to this check. We are advised by the Treasury Department that an Internal Revenue agent, while under investigation by the Internal Revenue Service in connection with this matter, has resigned. Another Internal Revenue Service agent, who audited the books of another ship repair contractor doing business with the Military Sea Transportation Service, Monti-Marine Corp., Brooklyn, N.Y., also resigned while under investigation by the Internal Revenue Service. Leonard A. Harris, the accountant, has submitted his resignation as an agent enrolled to practice before the Treasury Department and has filed an amended 1957 income tax return reporting additional income.

Testimony also revealed that an officer of the Monti-Marine Corp. deliberately attempted to prevent the subcommittee from getting the true facts as to Monti-Marine's purchases from Bloomfield Theater Ticket Service, Inc., New York City, for Broadway shows and other places of amusement as gifts to Military Sea Transportation Service personnel. As a result of this officer's dishonorable and deceitful acts, spurious records were furnished to the subcommittee by the Bloomfield Theater Ticket Service, Inc., pursuant to a subcommittee subpena.

The subcommittee has recommended criminal prosecution by the Attorney General of the United States against individuals whose activities indicate criminal offenses. It has also recommended that the Bureau of Internal Revenue make certain investigations.

As reprehensible as the above facts may be, this investigation spotlighted a situation of even greater importance and gravity. As our hearings concluded, the Berlin situation came to a head and, as you will recall, the President of the United States, in his speech to the country on this matter, ordered many vessels in the Navy's mothball fleet to be reactivated so as to be ready for any sealift emergency. It is felt, therefore, that this investigation was particularly timely, and it is the hope of this subcommittee that the correction of the derelictions shown to exist will enable the Military Sea Transportation Service to fulfill its important task with vitality, honesty, and integrity.

The ACTING PRESIDENT pro tempore. The report will be received and printed, as requested by the Senator from Arkansas.

REPORT ENTITLED "FREEDOM OF COMMUNICATIONS"—REPORT OF A COMMITTEE—AUTHORITY FOR COMMITTEE ON COMMERCE TO SUBMIT REPORTS DURING SINE DIE ADJOURNMENT (S. REPT. NO. 994—PART I)

Mr. MAGNUSON. Mr. President, pursuant to Senate Resolution 305 of the 2d session of the 86th Congress, from the Committee on Commerce, I submit a report entitled "Freedom of Communications," prepared by its Subcommittee on Freedom of Communications, a subcommittee of the Subcommittee on Communications. The report is submitted in six parts. I submit at this time part I of the report and ask unanimous consent that the Committee on Commerce on behalf of its Subcommittee on Freedom of Communications be authorized to file parts II through VI with the Secretary of the Senate during the adjournment sine die of the 87th Congress, 1st session. I ask the report be printed with illustrations.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MAGNUSON. I brought along for Senators who may be interested and who want to know what we are doing, a jacket design of the proposed publication. Of course, the demand for this has been terrific all over the country, from universities and schools. In its original committee print form 1,500 copies were printed.

EXECUTIVE REPORTS OF A COMMITTEE

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. BIBLE, from the Committee on the District of Columbia:

Mary C. Barlow, of the District of Columbia, to be associate judge of the municipal court for the District of Columbia; and

James A. Washington, Jr., of the District of Columbia, to be a member of the Public Utilities Commission of the District of Columbia.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. GRUENING:

S. 2540. A bill to increase from $75 to $85 per month the amount of benefits payable to widows of certain former employees of the Lighthouse Service, and to eliminate the requirement that certain of such widows must have married the employee before his retirement; to the Committee on Commerce.

By Mr. KEATING:

S. 2541. A bill for the relief of Katherine Cunningham; to the Committee on the Judiciary.

By Mr. DOUGLAS:

S. 2542. A bill for the relief of Remo Santilli; to the Committee on the Judiciary.

By Mr. PROXMIRE:

S. 2543. A bill to donate to the Stockbridge-Munsee community some submarginal lands of the United States, and to make such lands parts of the reservation involved; to the Committee on Interior and Insular Affairs.

S. 2544. A bill for the relief of Artine Yessayan and Socie Hayotsian Yessayan; to the Committee on the Judiciary.

(See the remarks of Mr. PROXMIRE when he introduced the first above-mentioned bill, which appear under a separate heading.)

By Mr. BENNETT:

S. 2545. A bill to authorize regulated public hunting in certain national parks and monuments and recreation areas for the purpose of controlling surplus big game animal populations; to the Committee on Interior and Insular Affairs.

By Mr. LONG of Louisiana:

S. 2546. A bill to authorize the naming of the Old River, La., structures in honor of the late Capt. A. A. Humphreys and Lt. H. L. Abbott; to the Committee on Public Works.

By Mr. JOHNSTON:

S. 2547. A bill for the relief of Jagat Kumar Kaul; to the Committee on the Judiciary.

By Mr. BUTLER:

S. 2548. A bill for the relief of Key Sun Ryang; to the Committee on the Judiciary.

By Mr. GRUENING (for himself, Mr. CHAVEZ, Mr. RANDOLPH, Mr. YOUNG of Ohio, and Mr. LONG of Hawaii):

S.J. Res. 137. Joint resolution to authorize the Secretary of Commerce, in cooperation with the State of Alaska, to undertake studies and surveys relative to a highway construction program for Alaska, and for other purposes; to the Committee on Public Works.

(See the remarks of Mr. GRUENING when he introduced the above joint resolution, which appear under a separate heading.)

CONCURRENT RESOLUTION

PRINTING OF ADDITIONAL COPIES OF REPORT ENTITLED "FREEDOM OF COMMUNICATIONS"

Mr. MAGNUSON submitted a concurrent resolution—Senate Concurrent Resolution 47—to print additional copies of report entitled "Freedom of Communications," which was referred to the Committee on Rules and Administration.

(See the above concurrent resolution printed in full when submitted by Mr. MAGNUSON, which appears under a separate heading.)

RESOLUTION

PRINTING OF ADDITIONAL COPIES OF A COMMITTEE PRINT OF THE JUDICIARY SUBCOMMITTEE ON INTERNAL SECURITY ENTITLED "THE PUGWASH CONFERENCES"

Mr. DODD submitted the following resolution (S. Res. 208), which was referred to the Committee on Rules and Administration:

Resolved, That there be printed for the use of the Senate Committee on the Judiciary six thousand additional copies of its committee print, entitled "The Pugwash Conferences", issued by its Internal Security Subcommittee during the Eighty-seventh Congress.

RETURN OF CERTAIN LANDS TO THE STOCKBRIDGE-MUNSEE INDIAN COMMUNITY, SHAWANO COUNTY, WIS.

Mr. PROXMIRE. Mr. President, I introduce, for appropriate reference, a bill to return to the Stockbridge-Munsee Indian community in Shawano County, Wis., lands adjacent to their reservation which were taken over by the Federal Government in the 1930's. This bill will return lands which rightfully belong to the Stockbridge-Munsee community.

The lands are considered submarginal. They were taken over by the Federal Government during the depression under the national industrial recovery program and the Farm Security Administration.

The Department of Agriculture had jurisdiction over the lands for many years. Recently they were turned over to the Department of the Interior to be administered for the benefit of the Stockbridge-Munsee community.

But many members of the tribe who live on the lands can get title only on a year-to-year basis. This uncertain tenure makes it very difficult to establish decent homes and farms, and to secure satisfactory mortgage financing.

The bill would remedy this by donating the lands to the tribe and making them part of the reservation. Such action has been recommended by the Secretary of the Interior in both this administration and the previous one. This means it has bipartisan support.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 2543) to donate to the Stockbridge-Munsee community some submarginal lands of the United States, and to make such lands part of the reservation involved, introduced by Mr. PROXMIRE, was received, read twice by its title, and referred to the Committee on Interior and Insular Affairs.

PRESENTING THE ADMINISTRATION'S HIGHWAY PROGRAM FOR ALASKA

Mr. GRUENING. Mr. President, I am most gratified that the Secretary of Commerce has today sent to the President of the Senate and to the Speaker of the House a legislative proposal to make a long-needed start in enabling the State of Alaska to catch up on its road-building program.

I ask unanimous consent that the message from the Secretary of Commerce be printed in the CONGRESSIONAL RECORD at the conclusion of my remarks.

(See exhibit 1.)

Mr. GRUENING. Ever since my service in the Senate, all during the 86th Congress, I urged the previous administration to support a program of highways for Alaska, but to no avail. It was impossible to make the previous administration comprehend that Alaska entered the Union in a unique position after many years of discrimination and neglect. It had been deprived of Federal aid highways funds during the first 40 years of that legislation—from 1916 to 1956—although paying all Federal taxes, and hence when it became a State only two of its major cities were connected by roads. The majority of its cities were not, a situation unthinkable in the other 49 States.

In simple justice I proposed that the Federal Government had a duty to make

up for the years of discrimination so as to place Alaska in the same position as the other States with respect to its highway program.

I set out a full explanation of the situation in which Alaska finds itself at the time I introduced a bill to rectify this situation. I ask unanimous consent that excerpts from my comments on that occasion be printed at the conclusion of my remarks.

(See exhibit 2.)

Mr. GRUENING. President Kennedy—then Senator Kennedy—was fully aware of this situation when, on June 24, 1960, on the floor of the Senate, he stated:

We must expand and modernize Alaska's highway system—a system is an essential condition of Alaska's future development—by greatly increasing our highway program so that Alaska's highways will be the equal of those in other States, which have been receiving Federal help over a long period of time.

The proposal which President Kennedy has now sent over through the Secretary of Commerce is the first step in the fulfillment of Alaska's great and long overdue road needs. It is my hope that the Department of Commerce will be able to complete the needed surveys and studies well before the May 15, 1963, deadline and in any event will be in a position even before that time to make initial recommendations to the Congress for the construction of specific roads in and to Alaska.

It is with great pleasure that I introduce, on behalf of myself and the distinguished senior Senator from New Mexico, the able chairman of the Senate Committee on Public Works, [Mr. CHAVEZ], the senior Senator from West Virginia [Mr. RANDOLPH], the junior Senator from Ohio [Mr. YOUNG], and the junior Senator from Hawaii [Mr. LONG], the joint resolution recommended by the President through the Department of Commerce and ask for its appropriate reference. I ask unanimous consent that the joint resolution be printed at the conclusion of my remarks.

EXHIBIT 1

THE SECRETARY OF COMMERCE,
Washington, D.C., September 12, 1961.

Hon. LYNDON B. JOHNSON,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: There is submitted herewith a proposed joint resolution entitled "To authorize the Secretary of Commerce, in cooperation with the State of Alaska, to undertake studies and surveys relative to a highway construction program for Alaska and for other purposes."

This Department has recently given intensive and careful consideration to the special problems of the State of Alaska in relation to its highway needs. Alaska's situation is unique both in terms of its location—separated from the rest of continental United States by another country—and its other unusual geographic and economic characteristics necessitating special treatment. There is need, in particular, for extraordinary local and long-development-type roads, and roads to interconnect centers of population which are accessible only by water or air transportation, or through Canadian territory. Federal-aid and State highway funds are, however, adequate only to meet highway needs in the populated areas of Alaska and are not at all available for highway use in Canada. We believe the actions contemplated by this proposed legislation would provide a reasonable and effective approach to these problems.

The proposed joint resolution would authorize the Secretary of Commerce, in cooperation with the State of Alaska, to undertake engineering studies and estimates and planning surveys relative to highway construction in Alaska and, in accordance with agreements to be negotiated with Canada by the Secretary of State, relative to roads in Canada to connect with Alaska. A report of such studies and surveys would be submitted to the Congress not later than May 15, 1963. An appropriation of $800,000 for financing the studies and reports referred to above would be authorized.

The Department of Commerce recommends the enactment by the Congress of the proposed joint resolution.

The Bureau of the Budget advises that there is no objection to the submission of this joint resolution from the standpoint of the administration's program.

Sincerely yours,

EDWARD GUDEMAN,
Under Secretary of Commerce.

EXHIBIT 2

STATEMENT OF SENATOR GRUENING

Alaska enters the Union under conditions which are unique in many fields. This is a result, in the main, of the fact that the 49th State lags 47 years after the last of her predecessors in being admitted; and these were years in which the relationship between the States and the Federal Government changed as never before in our history. Alaska has a lot of "catching up" to do to be on a basis of real, in addition to merely technical, equality with her sister States.

In no respect is the contrast between Alaska and all the other States more marked than in surface transportation. Alaska enters the Union unique in that not merely a few but a majority of her communities are unconnected with any others by highway or railroad. By the same token, these isolated Alaska communities are unconnected with the continental highway system.

Perhaps nowhere in the other 49 States does there exist a community, no matter how small, to which it is not possible to drive in an automobile or ride in a train. The whole economy and civilization of 20th century America is based on this free and ready access for goods and people. The very character of the American citizen is undoubtedly conditioned in an important way by the circumstance that, no matter where he lives, he can get in the family automobile and drive somewhere—to the nearest large city, to the capital of his State or Nation.

In Alaska, five of the seven largest cities, including Juneau, the capital, have no road system which leads to any other place. A dozen cities with population of 1,000 or more have neither road nor rail connection with any other city. In terms of surface transportation, Alaska in 1959 is in about the same situation as other States found themselves in 1850 before the construction of transcontinental railroads or a nationwide road network.

The reason for this state of affairs in the 49th State is not far to seek. It is owing to longstanding and almost totally unrelieved discrimination in the manner in which Federal highway programs have been enacted. Until 1956, Alaska was totally excluded from Federal-aid highway legislation. Since 1956, Alaska has been included, but on a sharply reduced basis. The State is still totally excluded from the interstate or throughway part of Federal programs—except that Alaska is included in the collection of the excise taxes which support the interstate program.

According to figures provided by the Bureau of Public Roads, there are today 5,356 miles of roads in Alaska. Of this total, 1,249 miles are classified as unconstructed. In other words, these roads exist only on paper. Of the remainder, only 2,515 miles are of such quality and in such locations that travel over them is possible throughout the year.

As far as surface is concerned, 1,113 miles are surfaced or paved, 38 miles surface treated, 2,720 miles gravel, and 246 miles unimproved. The total of existing and unconstructed rural roads is 5,320 miles, of such urban roads 23 miles.

This is a meager network indeed for an area one-fifth the size of the other 49 States combined. It seems obvious that the first thing which must be done to enable Alaska to progress is to provide a means to construct roads in the new State.

The BPR statistics show that 1,653 miles comprise a connecting primary system that serves the cities of Anchorage, Palmer, Fairbanks, Valdez, Seward, and Homer. Some 2,454 miles in a secondary system connect with the primary system. Much of Alaska's road mileage consists of isolated stubs of road that lead a short distance from population centers and then end abruptly.

"Why roads?" is a question which hardly needs asking in modern-day America. Roads are the arteries of transportation, commerce, and industry. "Why roads in Alaska?" can be answered in exactly the same terms as if the question related to Michigan, New Mexico, California, or New York.

Providing roads will enhance the economy not only of the 49th State but also of the Nation. There is, for residents and visitors alike, the obvious pleasure of travel in the largest and most beautiful of the States, on adequately constructed and maintained routes which will allow the Nation's citizens to observe the majestic scenic wonders of Alaska. From the grandeur of her sweeping mountainous panorama that includes the continent's highest peak (20,300-foot-high Mount McKinley) to her many mirror lakes and colorful streams, Alaska provides for tourists—and Alaskans, too—scenery that has no equal elsewhere in the world. Too, the avid sportsman will find Alaska a fisherman's glory, a hunter's paradise, for big game and fish abound. Alaska is the only State where every species of North American bear is found, for example. Tourism is already a major industry and growing rapidly. It may well be Alaska's greatest single economic potential.

Then the natural resources waiting to be developed include practically all the known minerals in the world today. These range from gold and silver, lead, zinc, and copper to mercury and antimony, platinum, chromium, nickel, iron, molybdenum and tungsten. Deposits are known to exist of fluorspar, petroleum and natural gas, to say nothing of vast storehouses of coal. In timber, approximately 350 billion board feet—including spruce, hemlock, cedar, cottonwood, and birch—grow in Alaska forests which are of vital importance to a lumber-hungry Nation. The States hydroelectric power potential should be mentioned in passing, for Alaska's many rivers and hanging lakes contain millions of potential kilowatts for industrial and domestic use.

All this wealth that is Alaska cries out to be developed, and a major program of Alaska throughways is urgently needed to serve as taplines to the vast resources that have been out of reach of potential capital investors throughout Alaska's history.

In the matter of roadbuilding all the other States have been assisted to a large extent by aid from the U.S. Government programs. The Federal Aid Road Act of 1916 provided the country's first major, national highway program. Alaska was totally excluded. In 1921 the Federal Highway Act substantially amended the previous law, but again Alaska

was left out. When Alaska finally was included in 1956, the ingredient of total land area in the formula for computing the amount of funds due the State was cut down, in Alaska's case, by two-thirds, leaving only one-third of Alaska's area counted. The cut was made over strenuous protests of Delegate—now Senator—E. L. (BOB) BARTLETT.

Statistics prove that if Alaska had shared on an equal basis with the other States in roadbuilding programs, her share by now would have reached the $575 million figure. Instead, Alaska has received only $94.7 million since 1916. Alaska is still totally eliminated from the interstate throughway trust fund program (as distinguished from the 1956 act's ABC funds for primary, secondary, and urban roads, in which Alaska does participate, although on a one-third basis).

Alaska has been subject to all the Federal taxes over the years that all the other States have paid. As a matter of fact, through taxation, Alaska has helped support the Federal-aid highway program since 1916, even though not receiving one penny in return. (The funds Alaska did receive in the form of appropriations to the Alaska Road Commission and the Bureau of Public Roads were drastically reduced, as compared with other States' participation, or, during some years, curtailed—eliminated—altogether.)

In addition, Alaskans were and are now paying, since 1956, the special tax on tires, tubes, gasoline, oil, new automobiles, trucks, buses, and trailers through which the interstate throughway system is supported. Yet Alaskans are deprived of all the benefits from this fund.

In recent years the U.S. Government has given outright grants to many foreign countries for various road programs. In the past decade, for example, $127 million has been granted to five Central American countries for use in completion of the Inter-American Highway. Surely no area is more vitally in need of roads to connect with an inter-American roadway system than is this country's largest State, with its strategic military importance as a defense outpost and outer perimeter in the defense warning system.

Even if Alaska should be included on a basis of equality in all the now-existing Federal aid to roadbuilding programs, it would be impossible ever to catch up with the rest of the States and put Alaska's road network on a par with that of the other 49 States. This situation poses the problem of how to achieve for Alaska a just parity or equality with the other States. What is the best method of obtaining the end result of equality? Alaska, in its pioneer stage of development, does not need superhighways of four- or six-lane construction at this time. It does need many miles of less elaborate highways, to put the 49th State on a basis of parity with the others, at least to end the isolation of communities one from another.

The ACTING PRESIDENT pro tempore. The joint resolution will be received and appropriately referred; and, without objection, the joint resolution will be printed in the RECORD.

The joint resolution (S.J. Res. 137) to authorize the Secretary of Commerce, in cooperation with the State of Alaska, to undertake studies and surveys relative to a highway construction program for Alaska, and for other purposes, introduced by Mr. GRUENING (for himself and other Senators), was received, read twice by its title, referred to the Committee on Public Works, and ordered to be printed in the RECORD, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Commerce, in cooperation with the State of Alaska, is hereby authorized to make engineering studies and estimates and planning surveys relative to a highway construction program for the State of Alaska, and, in accordance with treaties or other agreements to be negotiated with Canada by the Secretary of State in consultation with the Secretary of Commerce, engineering studies, estimates, and planning surveys relative to roads in Canada to connect with Alaska.

SEC. 2. On or before May 15, 1963, the Secretary of Commerce shall submit a report to the Congress which shall include—

(1) An analysis of the adequacy of the Federal-aid highway program to provide for a satisfactory program in both the populated and the undeveloped areas in Alaska;

(2) Specific recommendations as to the construction of roads through undeveloped areas of Alaska and to connect them with roads in Canada; and

(3) A feasible program for implementing such specific recommendations, including cost estimates, recommendations as to the sharing of cost responsibilities, and other pertinent matters.

SEC. 3. From time to time, either before or after submission of the report provided for in section 2 of this Act, the Secretary of Commerce may submit recommendations to the Congress with respect to the construction of particular highways to carry out the purposes of this Act.

SEC. 4. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, to be available until expended, the sum of $800,000 for the purpose of making the studies, surveys and report authorized by sections 1 and 2 hereof.

PRINTING OF ADDITIONAL COPIES OF REPORT ENTITLED "FREEDOM OF COMMUNICATIONS"

Mr. MAGNUSON. Mr. President, I submit, for appropriate reference, a concurrent resolution, section 1 of which provides that the report of the Committee on Commerce entitled "Freedom of Communications," prepared by the subcommittee of the Subcommittee on Communications, pursuant to Senate Resolution 305, which was agreed to on June 4, 1960, in six parts, be printed as a Senate report, each part to be printed as a separate volume with an appropriate title and illustrations which can be provided by the Printing Office; also that 15,000 copies of part I and part II be printed, of which 5,000 copies shall be for use of the committee, 5,000 copies for the Members of the House, and 5,000 copies for Members of the Senate; as well as other matters that needed to be done by the concurrent resolution.

On September 12, 1959, the Committee on Commerce appointed the Subcommittee on Freedom of Communications, as an oversight committee, to follow the operations of Government-licensed media under the 1959 amendment of the equal-time provision of the Communications Act. This provision allowed what are now known as the great presidential debates of 1960. The subcommittee was charged with the duty and function of receiving information and complaints concerning the treatment of news by media operating under Government license, in order to insure freedom, fairness, and impartiality in such news presentations.

On February 24, 1960, in the 2d session of the 86th Congress, this subcommittee was reappointed as a subcommittee of the Subcommittee on Communications.

On June 14, 1960, the Senate adopted Senate Resolution 305, authorizing this subcommittee to examine, investigate, and make a complete study of any and all matters pertaining to first, Federal policy on uses of Government licensed media for the dissemination of political opinions, news, and advertising, and the presentation of political candidates; and second, a review and examination of information and complaints concerning the dissemination of news by such media.

The congressional suspension of section 315, the equal-time provision, so far as the presidential and vice presidential candidates were concerned, for the presidential campaign of 1960 was facilitated by the existence of this subcommittee. The Senate was encouraged to try the 1960 experiment, so long as a "watchdog" committee was available as a safeguard in the event of abuse of the discretion granted.

The subcommittee report has been presented in six parts as follows:

Part I, "The Speeches, Remarks, Press Conferences, and Statements of Senator John F. Kennedy, August 1 through November 7, 1960."

Part II, "The Speeches, Remarks, Press Conferences, and Study Papers of Vice President Richard M. Nixon, August 17 through November 7, 1960."

I might say at this point that both Mr. Nixon and Mr. Kennedy cooperated very thoroughly and presented to the committee a great deal of historical information, of great value, not only to students, but to all Americans.

Part III, "The Joint Appearances of Senator John F. Kennedy and Vice President Richard M. Nixon and Other 1960 Campaign Presentations."

Part IV. "The 15-Minute Radio and Television Network Newscasts for the Period September 26 through November 7, 1960."

Part V, "Hearings Before the Freedom of Communications Subcommittee, March 27, 28, and 29, 1961."

Part VI, "Recommendations."

Parts I, II, and III constitute a unique record in American political history. For the first time, we have the complete press conferences, speeches, remarks, and statements of the two major candidates for the Presidency throughout the presidential campaign period. Here, then, is the presidential campaign of 1960. I am confident the Senate and the public will find these volumes of continuing interest and use as a general reference work.

The ACTING PRESIDENT pro tempore. The concurrent resolution will be received and appropriately referred.

The concurrent resolution (S. Con. Res. 47) was referred to the Committee on Rules and Administration, as follows:

Resolved by the Senate (the House of Representatives concurring, That the report of the Committee on Commerce entitled "Freedom of Communications" (prepared by a subcommittee of the Subcommittee on

Communications pursuant to S. Res. 305 agreed to June 14, 1960) in six parts be printed as a Senate report, each part to be printed as a separate volume with an appropriate title, illustrations, and an index in such form and style as may be directed by the Joint Committee on Printing.

SEC. 2. That there be printed fifteen thousand additional copies of each volume of parts I, II, and III, of which five thousand copies shall be for the use of the Committee on Commerce and the Subcommittee on Freedom of Communications, five thousand copies shall be prorated to the Members of the House of Representatives, and five thousand copies be prorated to the Members of the Senate.

SEC. 3. That there be printed five thousand additional copies of each volume of parts IV, V, and VI which shall be for the use of the Committee on Commerce and the Subcommittee on Freedom of Communications.

AMENDMENT OF CONSTITUTION, RELATING TO ELECTION OF PRESIDENT AND VICE PRESIDENT—AMENDMENT

Mr. MUNDT (for himself, Mr. THURMOND, Mr. MORTON, Mr. FONG, Mr. HRUSKA, Mr. GOLDWATER, and Mr. MCCLELLAN) submitted an amendment, in the nature of a substitute, intended to be proposed by them, jointly, to the joint resolution (S.J. Res. 12) proposing an amendment to the Constitution of the United States providing for the election of President and Vice President, which was referred to the Committee on the Judiciary and ordered to be printed.

NOTICE OF MOTION TO SUSPEND THE RULE—AMENDMENT TO FOREIGN ASSISTANCE APPROPRIATION BILL

Mr. HAYDEN submitted the following notice in writing:

In accordance with rule XL, of the Standing Rules of the Senate, I hereby give notice in writing that it is my intention to move to suspend paragraph 4 of rule XVI for the purpose of proposing to the bill (H.R. 9033) making appropriations for foreign assistance and related agencies for the fiscal year ending June 30, 1962, and for other purposes, the following amendment, namely:

Page 11, after line 9, insert the following: "SEC. 603. Public Law 87-195, approved September 4, 1961, is amended by inserting the following after the enacting clause: 'That this Act may be cited as "The Foreign Assistance Act of 1961."'"

Mr. HAYDEN also submitted an amendment, intended to be proposed by him to House bill 9033, making appropriations for foreign assistance and related agencies for the fiscal year ending June 30, 1962, and for other purposes, which was ordered to lie on the table and to be printed.

(For text of amendment referred to, see the foregoing notice.)

REPEAL OF LEGISLATION RELATING TO PURCHASE OF SILVER—ADDITIONAL COSPONSOR OF BILL

Mr. CLARK. Mr. President, I ask unanimous consent that I may be added as a cosponsor of S. 2420, to repeal certain legislation relating to the purchase of silver, and for other purposes, introduced by the distinguished senior Senator from Rhode Island [Mr. PASTORE], for himself and other Senators, and that my name may be listed with theirs on any future printings of the bill.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, September 13, 1961, he presented to the President of the United States the following enrolled bills:

S. 200. An act to amend the act entitled "An act relative to employment of certain adult Indians on or near Indian reservations," approved August 3, 1956;

S. 279. An act to provide Federal assistance for projects which will demonstrate or develop techniques and practices leading to a solution of the Nation's juvenile delinquency control problems;

S. 1317. An act to change the designation of that portion of the Hawaii National Park on the island of Hawaii, in the State of Hawaii, to the Hawaii Volcanoes National Park, and for other purposes;

S. 1528. An act to increase the relief or retirement compensation of certain former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force, and the U.S. Secret Service; and of widows and children of certain deceased former officers of such forces, department, or service;

S. 1529. An act to amend the act entitled "An act to regulate the height of buildings in the District of Columbia," approved June 1, 1910, as amended;

S. 1719. An act to amend title 23 of the United States Code with respect to Indian reservation roads;

S. 1762. An act to regulate the practice of physical therapy in the District of Columbia;

S. 1768. An act to provide for the restoration to Indian tribes of unclaimed per capita and other individual payments of tribal trust funds;

S. 1807. An act to authorize the disposition of land no longer needed for the Chilocco Indian Industrial School at Chilocco, Oklahoma; and

S. 2241. An act to donate to the Jicarilla Apache Tribe of the Jicarilla Reservation, N. Mex., approximately 391.43 acres of federally owned land.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. CLARK:

Address delivered by Senator HARRISON A. WILLIAMS, of New Jersey, to the annual conference of the American Municipal Association, Seattle, Wash., August 28, 1961.

By Mr. BARTLETT:

Introductory remarks by Senator AIKEN at Senate luncheon in honor of David Sarnoff, chairman of the board of the Radio Corp. of America, in Washington, D.C., on August 30, 1961.

THE WILDERNESS BILL AND CONSERVATION OF CONGRESSIONAL AUTHORITY

Mr. DODD. Mr. President, last week the Senate passed the so-called wilderness bill, which set aside certain parts of federally owned lands as permanent wilderness areas to be preserved entirely in the state of nature. Though this bill has passed the Senate, the House will not take action upon it until next year, and no one can tell at this point what the outcome will be. Therefore, discussion of this measure is very much in order, and I wish to speak briefly about it now.

Since I have been a Member of Congress, and long before, I have been greatly interested in the issue of conservation of our natural resources. I have spoken on the floor of the Senate on this question, and have always supported conservationist measures. Some of my friends expressed surprise, therefore, when on last Wednesday, September 6, I voted against the wilderness bill.

Though I support the objective of this bill, I opposed its passage because it delegated to the executive branch a traditional power of the Congress, that of disposing of Federal territory. The Constitution gives to the Congress exclusive power to dispose of territory of the United States. This calls for affirmative action by the Congress on any such proposal, and has been so interpreted by the courts. This may appear to be a small matter, but it is a part of one of the great constitutional questions of our time.

The proponents of the wilderness bill successfully obscured this basic constitutional issue, by providing that Congress could veto future Executive proposals for permanently allocating public lands as wilderness areas. This procedure, if extended to other fields, would reverse the role of Congress from that of writing the laws of this Nation, subject to veto by the President, to that of merely having the veto power over laws written by the President. There is a world of difference between these two approaches, and that difference spells the disintegration of congressional power and of our traditional system of checks and balances.

All who have studied the decline and fall of representative governments, all who have observed the process by which parliaments are transformed from bodies which initiate action and make laws to bodies which subserviently ratify the actions of an all-powerful executive, will share my apprehension over the fact that the Congress of the United States has traveled some distance down this road.

During the period in which I have served in Congress, I have seen proposals to delegate congressional power to the executive branch recur with increasing frequency. I regret to say that I have sometimes voted for such proposals. Each time this issue is before us, a plausible argument can be made for turning over this or that particular congressional power to the Executive, on the ground that such action will make the program in question more effective, better administered, and more coherently planned. And if one regards each of these proposed delegations of power as an isolated issue, he is tempted to support these delegations.

Yet, we must ask ourselves what will happen to the status of the Congress if

it does not soon turn its face rigidly against any further delegations of legislative power to the executive branch, however small or apparently meaningless? Each of us must answer that question himself, and many will have differing estimates as to what constitutes the danger point.

I believe the danger point has been reached, and I have made a personal decision to resist all future proposals which call for the delegation of one scrap of congressional power or responsibility or prerogative. This issue determined my position on the wilderness bill.

There was offered to the bill an amendment which would have restored the affirmative power of Congress to dispose of the lands in question. If that amendment had been adopted, I would have supported the wilderness bill. Since it was defeated, I voted against the bill.

Much as I wish to support conservation measures, the greatest conservation issue before us is the question of conserving the Constitution of the United States. In the interest of that kind of conservation, I opposed the wilderness bill, in the form in which it passed the Senate. I hope the Members of the House of Representatives will give the most careful attention to this constitutional question and will pass a bill which will preserve both the wilderness areas and the traditional role of the Congress.

The ACTING PRESIDENT pro tempore. Is there further morning business? If there is no further morning business, morning business is closed.

MOSCOW CLAIMS VICTORY IN THE CONGO

Mr. DODD. Mr. President, last Friday, I rose in the Senate to warn that United Nations policy in the Congo, if it were not quickly reversed, would inevitably lead to a complete Communist takeover in that country.

On Monday, I submitted in the Senate a resolution calling for the establishment of a select committee of the Senate to investigate the Congo situation. Simultaneously, I sent to Ambassador Stevenson a telegram urging him to insist that the U.N. suspend all action against the government of President Tshombe, of Katanga, and against white officers and white advisers serving under that government.

Only hours after I had submitted my resolution on Monday, there came to my attention an article, in the official Soviet periodical New Times, which claims a complete victory for the pro-Soviet side in the Congo, and paints a far blacker picture than I, myself, did on the basis of the information available to me Monday morning.

The article to which I refer appeared in the Russian language edition of the Moscow New Times, for September 8, which arrived in this country only Monday morning. The English language version of New Times should reach this country within the next week. Meanwhile, because I consider the article of such critical importance, I wish to present a translation of the text at the conclusion of my remarks. To the best of my knowledge, this will be the first translation available in the English language.

The article on the Congo in the Moscow New Times points out that the members of political parties of the national bloc, which was headed by Patrice Lumumba, have 23 seats in this government, or an absolute majority; that "the decision of the Parliament permits the new government tc carry out all decisions made earlier by the Lumumba government"; that Prime Minister Cyrille Adoula has accepted the request of Vice Premier Gizenga to appoint Gen. Victor Lundula as Chief of the United Congolese Army, and to fill the position of Minister of Defense and representative to the United Nations with Gizenga followers; that Adoula has further agreed to take certain unspecified measures against Colonel Mobutu, and that Gizenga is now demanding the removal from the army of all soldiers and officers who are against the unity of the country; and that Gizenga, in a telegram to Adoula, had called for an end to the separatist activity in Katanga, to preserve the territorial unity of the Republic within the framework of the policy of Patrice Lumumba, our adherence to which we have declared.

The article boasted that "the decision of the Parliament commits the new government to carry out all decisions made earlier by the Lumumba government, and factually cancels as illegal the decisions of the so-called Ileo government."

Mr. President, in the light of this information, I believe the situation in the Congo is even graver than I have previously described it. I believe that unless the United States can use its influence to reverse United Nations policy, or else to bring about a stay in the execution of this policy until there has been time for a reappraisal of the entire situation, the Congo, within a matter of months, will be irrevocably lost to the free world and to the Congolese people.

If there is anyone who still cherishes illusions about the possibility of achieving a middle-of-the-road solution through the coalition government which the U.N. has fostered and to which it is now giving all-out support, I would urge them to read the article in the Moscow New Times.

There is no talk in this article about any middle-of-the-road solution or of compromise with the non-Communists. The language of the article, on the contrary, is completely uncompromising. It speaks of nothing less than total victory and of the elimination of all those who oppose the institution of a Khrushchev-Gizenga new order in the Congo.

Because I considered this article in the Moscow New Times to be of such grave significance, I forwarded a translation to President Kennedy, as soon as it became available to me Monday afternoon.

The press has hinted in the past that the Administration was not altogether happy about United Nations policy in the Congo. In my wire to Ambassador Stevenson, I expressed the hope that present U.N. policy in that unhappy country did not enjoy the sanction and approval of the United States. For my own part, I simply cannot believe that President Kennedy has been provided with all the facts on this tortured situation.

Mr. President, the situation in the Congo can be redeemed. If the Kremlin had to act in its own right and with its own resources in the Congo, it would be completely helpless because of the thousands of miles that separate it from the African heartland. Geographically and logistically the Congo belongs to our sphere of operations, not the Soviet sphere.

There is no reason why the Congo should go Communist. There is every reason why it should remain free. But the dismal fact, nevertheless, is that the Congo is rapidly slipping under complete Communist control. If the Congo does go Communist, it will not be because of Soviet strength or because the Congolese people want communism: it will be because of U.N. policy in the Congo and because of the perverse folly that induces us to support this policy with our prestige and our money.

The words "perverse folly" are strong words, but I have used them with all deliberation. We are paying more than half of the $100 million that the United Nations has already budgeted or spent in the Congo. Could there be any folly greater or more perverse than financing the destruction of our friends and the victory of our enemies?

Mr. President, I ask unanimous consent to insert into the RECORD at the conclusion of my remarks the translation of the article entitled "The Development of the Events in Congo," by E. Primakov, which appeared in New Times, No. 37, September 8, 1961. I also ask unanimous consent to have inserted the text of my letter transmitting this translation to President Kennedy.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. (See exhibits 1 and 2.)

Mr. DODD. In the light of this article in New Times, Mr. President, I again express the hope that it will be possible for the Senate, before Congress adjourns, to pass on the resolution I presented Monday calling for the establishment of a select committee on the Congo.

I think this matter is so urgent that, unless some action of this kind is taken, the Congo will inevitably become another part of the world Communist bloc.

This would be a great tragedy. It would be another in the list of tragedies that have been occurring and recurring with a frequency that is difficult to explain or even to understand.

We have been pouring out of our substance billions of dollars to give comfort and aid to our sworn enemy. If there is any objective historian left to write about our times, and if his writings are preserved for posterity, I am confident that, when he reviews what we have been doing over the last 8 or 9 years, he will have to say we were, indeed, strange people and that we were guilty of the greatest folly.

I have told my colleagues in the Senate within the last few weeks of the fact that the World Bank, in which we have membership, only a few weeks before the election in British Guiana, loaned the Communist, Cheddi Jagan, $1,250,000. Jagan came to Washington and personally negotiated that loan. He went back to British Guiana figuratively waving the check in the face of the people of British Guiana.

Jagan is a Communist. But he was able to say to these people, who had to make a decision with respect to him and the other two candidates, "Now you see what the United States thinks. I went to Washington and came back with $1,250,000." He won the election by only three seats. But our representative on the World Bank approved that loan. I say this is worse than folly—it is scandalous.

During the last 5 or 6 months the United Nations has made a loan to Castro's Cuba of $1,650,000, and the United States representative in the United Nations made no objection and joined in approval.

Here we have a record, in a period of 6 months, of approving a loan of $1,250,000 to the Communist Jagan in British Guiana and a record of our representative in the United Nations approving a loan of $1,650,000 to Castro.

Now we are paying the bill, to the extent of $50 million, to permit the United Nations to impose a Communist regime in the Congo.

I say to my colleagues and to the people of this country, it is high time they stood up and demanded an end to such procedures.

We are being besieged by the most ruthless, vicious, and relentless of enemies, who has publicly announced his will and determination to destroy us. We may have differences as to how we should meet this threat. But I do not believe there is a person in this land who wants us to lend and give money to our enemies, so that they may more quickly and effectively destroy us.

That is what is happening. I remember hearing in this body not long ago about the wonders we had accomplished in the Congo. There were some almost boastful statements made in this body about the wonderful things we had done. We find at this hour that the wonderful thing we have done is to push the Congo right to the brink of falling into the Communist orbit. And that is what is going to happen unless we do something about it. We have very little time to do it.

I, for one, like many of my colleagues, am tired of talking about it and issuing warnings when nobody seems interested in it. With the exception of a few newspapers, I have not heard anything about what is going on in the Congo. The people do not know what is going on in that country or, for that matter, around the world, because they are not being told the facts. Our duty is to tell the people the facts and the truth.

This raises another question. A way must be found to get these facts to our people.

I hope that other Members of this body will help in publicly underscoring the grave seriousness of this situation in the Congo. I believe we ought to send a Senate factfinding committee there, to find out what is going on and how it happens that we are spending $50 million of the money of the people of the United States to further a pro-Communist regime in the Congo. I say it is not only a scandal, it is one of the most disgraceful scandals in all history.

EXHIBIT 1

(Excerpts from the article by E. Primakov, "The Development of the Events in Congo," Moscow New Times, No. 37, Sept. 8, 1961)

"On August 2, a new government was formed in the Congo composed of 27 ministers and 17 state secretaries. Cyrille Adoula was appointed Prime Minister. According to the Stanleyville newspaper, Uhuru, the members of political parties of the national bloc which was headed by Patrice Lumumba have 23 seats in this government, or an absolute majority. The composition of this new Cabinet proves that the adventurous effort to liquidate the government of Lumumba completely failed.

The decision of the Parliament commits the new government to carry out all decisions made earlier by the Lumumba government, and factually cancels as illegal the decisions of the so-called Ileo government. In accordance with this decision, Adoula invited all the countries recognizing the legal government of Lumumba-Gizenga who had their diplomatic missions in Stanleyville, to transfer their missions to Leopoldville.

On August 16–19, Cyrille Adoula carried out in Stanleyville negotiations with Antoine Gizenga on different questions of internal and international character. Valentin Lubuma, chief of Antoine Gizenga's Chancery, announced:

"In the course of negotiations, Gizenga and Adoula expressed mutual desire to liquidate the crisis and help to pacify the country, continuing the work of the Congolese Parliament in this direction."

In accordance with this, Prime Minister Adoula and First Vice Premier Gizenga made important decisions which are indicated in the telegram from Gizenga to Cyrille Adoula, released by Valentin Lubuma at his press conference on August 28. Gizenga is asking Adoula to inform him how the decisions about the appointment of Gen. Victor Lundula as commander in chief of the United Congolese Army, and about appointments of Gizenga followers to the posts of Minister of Defense and representative in the United Nations, have been carried out. Gizenga in his telegram emphasized immediate necessity of transfer of the post of commander in chief of Congolese Army to Lundula "in order to stop mass murders of civilian population in different areas of the country, to end the separatist activity in Katanga, to preserve the territorial unity of the Republic within the framework of the policy of Patrice Lumumba, our adherence to which we have declared."

Lubuma released to the journalists the text of another telegram sent by Gizenga to Adoula. Here is the text:

"Simultaneously with taking the necessary measures in relation to Mobutu as we agreed in Stanleyville, it is necessary to remove from the army all soldiers and officers who are against the unity of the country. The complete restoration of security in the country is impossible without solution of the army problem."

Antoine Gizenga at the meeting on August 18 declared:

"The genuine nationalists realize that certain persons who played very negative roles in the fate of our country had entered into the new government."

The participation of such elements in the government became possible as a result of direct intervention of imperialist forces. The Secretariat of the United Nations has broken its promises to guarantee the complete freedom of self-expression to the members of the Congolese Parliament during the formation of the government and discussion of the candidacy for the ministerial posts.

EXHIBIT 2

(Copy of letter from Senator THOMAS J. DODD to President John F. Kennedy)

SEPTEMBER 11, 1961.

THE PRESIDENT,
The White House, Washington, D.C.

DEAR MR. PRESIDENT: This morning I introduced a Senate resolution calling for the establishment of a select committee of the Senate to investigate the situation in the Congo. I did so because, as I stated in a Senate speech last Friday, September 8, I was alarmed by the increasing evidence that U.N. policy in the Congo, as it is currently being applied, is systematically undermining and destroying the anti-Communist elements and systematically strengthening Communist influence. The only result of such a policy must be a complete Communist takeover in the Congo.

Within the last hour there has come to my attention an article in the most recent issue of the official Soviet periodical, New Times (New Times, No. 37, Sept. 8, 1961), which completely bears out the interpretation I have placed on events. If anything, it paints a blacker picture than I did, on the basis of my previous information.

The article claims a complete victory for the pro-Soviet side in the Congo, and it adds details about the extent of this victory which have not yet appeared in the American press. Among other things, the article points out that the members of political parties of the national bloc which was headed by Patrice Lumumba have 23 seats in this government, or an absolute majority; that the decision of the Parliament permits the new government to carry out all decisions made earlier by the Lumumba government; that Adoula has accepted Gizenga's request to appoint Gen. Victor Lundula as chief of the United Congolese Army, and to fill the positions of Minister of Defense and representative to the United Nations with Gizenga followers; that Adoula has further agreed to take certain unspecified measures against Colonel Mobutu, and that Gizenga is now demanding the removal from the army of all soldiers and officers who are against the unity of the country.

I consider this article, which claims so sweeping a victory for the Soviet side, to be so significant that I enclose herewith a translation of the most relevant portions.

On the basis of this information and of information that has reached me privately from Stanleyville, I now believe that the situation is even graver than I had indicated in my statement of last Friday or in my statement this morning, on submitting my resolution calling for the establishment of a select committee on the Congo situation.

Unless the present trend of U.N. policy in the Congo is immediately reversed, there is no doubt in my mind that the Congo, within a matter of months, will be under complete Communist control. If this should happen, it will not be because of the indigenous strength of the Communist movement or because of Soviet intervention in the manner of Laos. If the Congo goes Communist under the circumstances to which I have referred, it will be thanks above all to the misbegotten policies of the U.N. and the actions of a U.N. army that is largely paid for by American funds.

This morning I sent a telegram to Ambassador Stevenson urging him to insist within the U.N. that, until there has been an opportunity for a reappraisal of the entire situation, the U.N. command in the Congo take no further action against white officers or white advisers in Katanga province; that it release those officers and advisers now in custody and permit them to resume their positions; and that it take no further measures to force the submission of President Tshombe to the coalition government in Leopoldville, in which the Vice-Premier and the Minister of the Interior are both Prague-trained Communists, and which will, in addition, shortly be saddled with a pro-Communist minister of defense.

I bring these details to your attention, Mr. President, in the earnest hope that you will be able to take the necessary action before the situation deteriorates beyond the point of no return.

Sincerely yours,

THOMAS J. DODD.

Mr. DODD subsequently said: Mr. President, earlier today I spoke on the situation which is developing in the Congo.

The statement I made to the Senate immediately after the morning hour was prepared only yesterday. I felt at the time I prepared this statement that we had only days or weeks in which to act. But events in the Congo have moved even more rapidly than I had anticipated.

The morning teletype brought ominous news. At 4 a.m. this morning, a United Nations force made up of Ghurka and Swedish soldiers attempted to take over the Post and Telegraph Building in Elizabethville, which was guarded by Katanga Army units. The Katanga Army units refused a demand that they surrender, and heavy fighting broke out. After 1 hour, the United Nations was able to claim victory.

At 6:59 a.m. this morning, the teletype reported that the Tshombe government had fallen, that President Tshombe has gone into hiding, and that two of his Cabinet Ministers had been arrested by the U.N.

The same teletype report quoted Prime Minister Adoula, head of the heavily weighted coalition government in Leopoldville, as saying that he had sent an administrator to Katanga to take over control of the province, and that meanwhile he had asked the U.N. to take over essential services. He told newsmen that he planned immediate measures to bring the Katanga Army under the control of the Central Government.

Mr. President, what has been done in the Congo in the name of the United Nations is a scandal of the first magnitude. It is a scandal that cries out for immediate and energetic counteraction.

It is not the business of the United Nations army, financed largely by U.S. money, to go about overthrowing anti-Communist governments and installing pro-Communist coalition governments. There is absolutely nothing in the Charter of the United Nations or in the resolutions of the Security Council which authorizes the actions taken by the U.N. command in the Congo over the past several weeks.

There is no authorization for it whatever. To put a pro-Communist government in the Congo with our money is nothing short of a highhanded, scandalous activity.

These actions are entirely arbitrary. They are so fraught with evil political consequences that it is difficult for me to believe that they have been taken in simple innocence or muddleheadedness by so-called international civil servants, who owe loyalty neither to one side or the other side in the cold war.

With all the earnestness at my command, I warn the leaders of the United Nations and the U.N. representatives in the Congo that, if the Congo goes Communist, the American people and free world opinion will hold them responsible and will demand an accounting.

I say that the United Nations is now before the bar of world opinion, and the American people will demand an accounting. If the Congo is turned over to the Communists by the use of United Nations bayonets—if that is what this organization is doing in the world—then we had better start doing something pretty fast about it.

With all the earnestness at my command, too, I again appeal to the Administration and to the Department of State to intervene immediately with the U.N. authorities.

The U.N. army must be ordered to desist from its illegal and arbitrary actions, or else we should immediately withdraw all financial and logistic support from it. It must be ordered to reinstate the government of President Tshombe, who has been guilty of nothing more than being a friend of the free world and the United States, and a firm enemy of communism. Apparently that is why the U.N. forces, with their bullets and bayonets, are driving him out.

I say to the Senate that there is no time for delay. This is a dark hour in history. The continent of Africa will fall into Communist hands unless we do something, and we are the only people in the world who can and want to do something. But we are being hamstrung, straitjacketed, and deprived of the means of doing something.

This is a situation which calls for immediate action. It calls for action within hours. It will not do any good a few weeks hence to say there is nothing we can do, that terrible blunder was made. We have heard this song for so long that I should suppose every person in the land would be tired of it.

Earlier today I said that we saw $1,250,000 given to the Communist Jagan by the World Bank while our representative on the Board of Directors voiced no objection. We saw the U.N. give $1,650,000 to that Communist rascal Castro, and our man on the U.N. committee made no objection. We are pouring out $50 million to support this outrageous U.N. action in the Congo.

When, where, and how will it be stopped? If we are to save this situation, we have very little time in which to do it.

TRIBUTE TO MOTION PICTURE PERMANENT CHARITIES

Mr. KUCHEL. Mr. President, charity has long been characteristic of the American people. Those of us among the fortunate have always been willing to unselfishly share our benefits with others not so fortunate as ourselves. As evidence of this, each year, thousands of us open our hearts and our pocketbooks to a multitude of humanitarian causes that provide help for the deprived members of society.

One of the most truly remarkable fund-raising organizations is embarking on its 20th aniversary campaign, and I invite the attention of my colleagues to it.

The organization to which I am referring is the Motion Picture Permanent Charities. Its record in industry federated fund raising is unparalleled. During the past 19 years, this organization has raised in excess of $24 million which it has distributed to both national and local charities conducting appeals in the Los Angeles area. For its 20th anniversary this year, it has set a goal of $1¼ million. If reached, it will mean that a united film industry drive will have contributed more than $25 million to the unfortunate. This, I might add, is over and above the year-round benefit and public appeal work donated by film stars.

The Motion Picture Permanent Charities had its start in 1942 under the leadership of a distinguished film producer, Samuel Goldwyn, and other prominent film industry figures. It was, as a matter of fact, the pioneer organization created by those in the picture business to consolidate all charity fund raising within their farflung motion picture labor.

Because of their excellent and unselfish labors, I commend the 25,000 film industry workers who have contributed so generously in past years. The Motion Picture Permanent Charities has been, and, I have no doubt, will continue to be, a glowing tribute to the generosity of the motion picture industry, and to the unselfish men and women who work in it. I take great pride in their devotion to the cause of those in need.

POSTAL SERVICE OF THE CONFEDERACY

Mr. ROBERTSON. Mr. President, considering annual deficits approaching a billion dollars a year in the operation of the Post Office Department, plus the current unwillingness of the Congress to require the users of second-class mail to pay more than 23 percent of the cost of handling it, there appeared in the Memphis Commercial Appeal an editorial concerning the operation of the Post Office Department of the Confederacy which should be of interest to all Members of the Congress. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

POST OFFICE MARVEL

Recently we called attention to the Constitution of the Confederate States of America because it required that the postal service support itself. We thought it was interesting at a time when Congress is all choked up on a plan to lower part of the cost in income taxes for running the Post Office.

It was more interesting than we knew. It brought a letter from T. W. Crigler, Jr., of Macon, Miss., president of the Confederate Stamp Alliance.

The Confederates made it work. The Post Office paid its own way and actually turned in a profit for each of the 4 years it was in operation, even though they were the first years of a new organization and they were disturbed by war conditions.

The stamp price went from 3 cents to 10, and it was double west of the Mississippi River. Payments to the railroads were reduced. So was the number of postal workers.

And, on the point that sticks in the throats of present-day Congressmen, the CSA Post Office increased the price of postal service for magazines and newspapers.

This marvel in business management was accomplished by John H. Regan, who went from Tennessee to Texas and from Texas to Congress. He was the only Postmaster General in the Cabinet of Jefferson Davis.

But there is a sad chapter in his later life. After the war Texas sent Mr. Regan back to Congress and he became chairman of the Committee on Post Offices and Post Roads. As Mr. Crigler writes, "He tried in vain to do the same thing for the U.S. Post Office Department that he did in such a fine way for the Confederacy."

NATIONAL SHRINE TO UNION VETERANS OF THE CIVIL WAR—RESOLUTION OF LADIES OF THE GAR

Mr. HICKEY. Mr. President, I ask unanimous consent to have printed in the RECORD a resolution adopted by the Ladies of the Grand Army of the Republic in their recent convention in Indianapolis, Ind.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

DESCENDANTS OF UNION VETERANS OF THE CIVIL WAR

(Memorializing the 87th Congress relative to legislation for the erection of a National Memorial Building in the Capital of the United States of America for which those patriots laid down their lives 100 years ago in the greatest battle ever fought)

Whereas the descendants of the veterans of the Civil War desire to call particular attention to our elected Members of Congress; to the fact that today they would not be seated in this 87th Congress of the United States of America, had not our boys in blue laid down their lives in the greatest battle ever fought to save this land of ours and our liberties; and

Whereas we have noted that within the last few years many national memorials to distinguished men, and memorials to Presidents Franklin D. and Theodore Roosevelt, Wilson, Madison, and others have been approved, while our permanent resolution adopted unanimously at our annual convention in Rochester, N.Y., in 1934 has been overlooked; and

Whereas 100 years have already passed and year after year, for the last 27 years our legislation has been before Congress begging for this long-delayed honor: Now, therefore

Attention is directed to the debt all citizens of this country owe to our dead heroes and particular request is made to all Members of Congress to whom we have delegated the power to use in behalf of our national shrine resolution now under consideration in both Senate and House that early action be taken on this important legislation.

INTERNATIONAL PAYMENTS IMBALANCES

Mr. BUSH. Mr. President, I ask unanimous consent to have printed in the RECORD following my brief remarks an editorial from the Washington Post of this morning, September 13, entitled "Toward Stronger Currencies."

The editorial throws some bouquets toward the report of a subcommittee of the Joint Economic Committee, of which I am a member. It discusses the report of the Reuss subcommittee on the matter of our balance-of-payments deficit.

Toward the end of the article the following language appears:

The report might have been more explicit about measures needed to correct the American balance of payments, as a minority statement observes. No international credit mechanism can be a substitute for such measures, and without them none can hope to succeed.

The minority statement referred to in the language I have just read is contained in the report under the heading "Views of Senators PRESCOTT BUSH and JOHN MARSHALL BUTLER," and is found on pages 23 and 24. I ask unanimous consent that those minority views be printed in the RECORD following the printing of the editorial which I have just mentioned.

There being no objection, the editorial and individual views were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Sept. 13, 1961]

TOWARD STRONGER CURRENCIES

Means to improve the international monetary mechanism and thereby strengthen the dollar and other currencies are the subject of an interesting and constructive report of a committee headed by Congressman HENRY REUSS. Basically, the Reuss report points out, the international financial system is caught in a dilemma. As world trade expands, the need for gold and currency reserves to meet temporary imbalances goes up too. In the recent past, a good part of new reserves has been provided by the dollars that other countries have earned from surpluses with the United States. The U.S. balance-of-payments deficit, in other words, has enabled other countries to strengthen their financial position. But the position of the dollar has become more vulnerable owing to the rise in these foreign-held balances, which foreign official holders could convert into gold. To protect the dollar, the United States has been trying to put its balance of payments into equilibrium. But to the extent that this effort succeeds, the rest of the world will lose its principal source of new reserves. Inadequate reserves would invite deflationary policies, restrictive trade practices, and even currency instability.

International currency reserves do not, of course, need to grow in exact proportion to the rise in world trade. These reserves are not working balances, but serve to give protection against a rainy day. If increasing stability of trade reduces the prospect of rainy days, the need for reserves diminishes. Recent large payments deficits of the United States have greatly increased world reserves, and the Reuss report's statement that as long as any one country is short of reserves, the whole world is, goes too far. But for the long run there is little doubt that larger reserves will be needed.

In its recommendations for methods of strengthening international resources, the report argues for new borrowing powers for the International Monetary Fund. They should be for fixed amounts and definite periods. Countries pursuing inflationary policies would have access to these resources only if they agreed to take remedial action. These suggestions appear to be in line with the thinking of the IMF, which will probably be firmed up at the Fund's Vienna meeting on September 18.

The very strong stand taken by the report against any change in the gold value of the dollar or other currencies ought to contribute to international confidence. So should the recommendation that the Federal Reserve's 25-percent reserve requirement be dropped and all the Nation's gold clearly earmarked, as backing for its international obligations. The report might have been more explicit about measures needed to correct the American balance of payments, as a minority statement observes. No international credit mechanism can be a substitute for such measures, and without them none can hope to succeed. These measures, however, aimed mainly at the expansion of exports, are expected to be dealt with in a separate report by another committee under chairmanship of Congressman HALE BOGGS. Given the none too reassuring trend in the balance of payments, the Boggs committee report should read as interestingly as the Reuss report does.

VIEWS OF SENATORS PRESCOTT BUSH AND JOHN MARSHALL BUTLER

Because the subcommittee has not taken time to digest the testimony before it, or to debate and discuss the issues, conclusions, or recommendations, we are not willing to join in or approve this report.

The difficult economic problems inherent in international trade imbalances and settlement arrangements are now greatly complicated by the cold war which has added heavy overtones of an international political and dipiomatic order. Conflicting East-West ideologies, emerging national ambitions, together with the constraints which world ferment imposes upon our domestic economy, have thus made pronouncements such as those in this report extremely sensitive and delicate.

Certainly the expert witnesses who appeared before the subcommittee have made substantial, thought-provoking, and helpful contributions to the understanding of these issues. These contributions and the report prepared by the subcommittee staff, deserve serious and mature consideration, however, before a hasty set of findings and formal recommendations are put forward.

1. Foremost among the recommendations of the report, for example, is one proposing unilateral actions to be taken "to maintain confidence in the dollar as a principal reserve currency." Laudable as this objective is, there are, we believe, more formidable problems than the subcommittee report seems to recognize in arriving at precisely what actions will best foster and maintain that confidence. This is so because "confidence" is a state of mind—an elusive, sometimes emotional, and always a fragile thing which must be built up and nurtured over time.

The persons who do business and take risks in international trade and finance are likely to place very great emphasis on evidences of a nation's financial responsibility. Thus, it may well be that a congressional report such as this, which suggests that the first thing this country should do unilaterally is to "pursue vigorously our national economic goals of maximum employment, production, and purchasing power," may easily be misinterpreted.

Does this imply that these objectives are to be placed above reasonable price stability? Would it not be more reassuring to international confidence to show by our actions a

determination to work for a cyclically balanced Federal budget? Would not confidence be better inspired by demonstrating our ability to control domestic costs by adopting policies and practices necessary to increased economic productivity, while relying to the largest extent possible upon the free market, as opposed to the control and manipulation of selected segments?

2. An example of an attempt to impose Government manipulation as a substitute for market forces is the subcommittee recommendation that the Federal Reserve System pursue a policy of purchasing all maturities of Federal securities in the open market. The report shows a disregard for the traditional American market system by thus brushing aside the judgments of the market in this important area.

3. Perhaps the present 25-percent gold cover against Federal Reserve notes and deposits is no longer a necessary requirement. We fail to see, however, how removal—or even a subcommittee recommendation for removal—at this time can be conducive to international confidence in the stability of the dollar.

Any contribution to confidence which action to remove the statutory cover might have would certainly be greater if taken from a position of strength and a demonstrated capacity for solving our long-run balance-of-trade problems, rather than at a time when it risks interpretation as an expediency and palliative turned to from a position of weakness. This report itself stresses the current weaknesses and inadequacies of reserves, the evils of "hot" money, the need for negotiating a reallocation of mutual defense costs, and the seeming persistence of our balance-of-trade problem.

The fact, largely glossed over in the subcommittee report, is that the trend in our long-run balance of payments appears to be worsening despite modest efforts to right it. We would want, incidentally, to examine much more closely than I believe the subcommittee has, the thesis of the report that overall world reserves should be deemed deficient "so long as there is any deficiency of reserves in any country."

4. While we agree that every possible effort should be made to encourage the liberalizing of international trade by our own action and in cooperation with other countries, we think it presumptuous and diplomatically inexpedient for the United States, as a national policy, to accept the subcommittee's recommendation that we seek to influence other developed countries to rely, as an internal matter, on taxation rather than on higher interest rates for anti-inflationary action.

5. Finally, our concern with the subcommittee's conclusions and recommendations springs from a seeming emphasis on urgency in setting up a supplemental credit agreement to be rushed through diplomatic negotiation and legislative action. Needless to say, every problem that we can put behind us is so much to the good. The real need for urgency, however, lies in correcting the difficult root causes of the persistently adverse trend in our payments position, rather than in grasping at institutional changes or a new set of monetary mechanisms and settlement arrangements rushed through Congress in the expectation that these will assure long-term equilibrium.

On the present evidence, we go along with the recommendations of the report (1) that we reaffirm our opposition to an increase in the price of gold and to further devaluations or revaluations in the exchange rates of the principal currencies, and (2) that greater subscriptions to the existing IMF might be desirable for countries with plentiful present reserves. We would agree also in emphasizing that American export expansion will depend on efforts of American business to offer attractive products at competitive prices in markets which have many other sources of supply.

LEAVE OF ABSENCE FOR SENATORS WHO ARE DELEGATES TO THE INTERPARLIAMENTARY UNION CONFERENCE IN BRUSSELS

Mr. MANSFIELD. Mr. President, the following Senators must leave tonight for the Interparliamentary Union Conference which opens tomorrow in Brussels: The Senator from Tennessee [Mr. GORE], the president of the joint-American group; the Senator from Alaska [Mr. GRUENING]; the Senator from Wyoming [Mr. HICKEY]; and the Senator from Colorado [Mr. ALLOTT].

I have discussed this matter with the distinguished minority leader. Because of the significance of this meeting and the need for American representation, I now ask unanimous consent, on behalf of the minority leader and myself, that these Members of the Senate be given official leave of absence, in order to attend this most important Conference, and to do so at the request and the urging of the Senate.

The Interparliamentary Union plays a vital role in the strengthening of democratic institutions. Meetings of the Union enable legislators from the Parliaments and Congresses of the free world to share views and exchange knowledge about common problems and concerns. This has a very beneficial effect in developing closer ties between the legislative assemblies of democratic nations, and in fostering democratic government throughout the world.

It is clearly in the national interest for the Congress of the United States to be fully represented at these deliberations.

The ACTING PRESIDENT pro tempore. Is there objection? Without objection, it is so ordered.

Mr. ENGLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. DODD in the chair). The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. ENGLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT TO SHIPPING ACT OF 1916

Mr. ENGLE. Mr. President, I ask unanimous consent that the unfinished business be laid before the Senate.

The PRESIDING OFFICER. If there is no objection, the Chair lays before the Senate the unfinished business.

The Senate resumed the consideration of the bill (H.R. 6775) to amend the Shipping Act of 1916, as amended, to provide for the operation of steamship conferences.

The PRESIDING OFFICER. With respect to the pending business, the committee amendment strikes out all after the enacting clause and inserts a substitute, which, under Senate precedents, is considered as original text for purpose of amendment. Any amendment should be proposed to the committee amendment.

The committee amendment, if agreed to, is not open to further amendment.

Mr. ENGLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ENGLE. Mr. President, I ask unanimous consent that the order for the quroum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ENGLE. Mr. President, on June 12, 1961, the House passed on the Consent Calendar H.R. 6775, with amendments. The bill was referred to our Committee on Commerce the following day.

Examination of the House report (H. Rept. No. 498) and the hearing revealed the following matters, well worth noting:

First. The bill was designed to authorize the Federal Maritime Board—now the Federal Maritime Commission—under certain specified conditions to permit ocean common carriers serving U.S. foreign commerce, and conferences of such carriers, to enter into exclusive patronage, dual-rate contracts with shippers. Steamship conferences were defined as "associations of steamship lines serving particular trade routes in world commerce intended under our law as a means of providing stability for both carriers and shippers through supervised self-regulation among competing carriers on particular routes."

Of dual rate contracts the report said, page 2:

> One of the principle devices employed by steamship conferences in American foreign commerce is the so-called dual rate system, pursuant to which conference rates are set at two levels. The lower rate is charged to shippers who sign contracts agreeing to ship exclusively on vessels of members of the conference. The higher rate is charged to shippers who do not so agree.

Mr. President, I would observe at this time that the first conference agreement was entered into almost 100 years ago, in 1877. These conference arrangements have been traditional in the maritime industry ever since that time.

Second. The bill was the result of more than 2½ years of intensive study and hearings by a special subcommittee of the House Merchant Marine and Fisheries Committee, working in close cooperation with the staff of the Antitrust Subcommittee of the House Judiciary Committee which itself had been conducting related investigations of steamship conference activities.

Third. As to whether shippers and carriers favored steamship conferences and dual-rate contracts, the House report said, page 12:

> The conference system, with an appropriate tying device, have proven to be the most effective method, both from the point of view of the carrier and shipper (to assure

continuity of service on a particular route with a degree of stability of rates). In the course of the hearings before the committee, virtually all of the witnesses, both carrier and shipper, testified that they desired the continuance of the dual-rate contract system and that some such system was virtually a necessity for their continued successful operation.

In its conclusion the House report stated (p. 13):

Witnesses before the committee have been practically unanimous in their support of the conference system. A majority of witnesses have support[ed] the dual-rate system. The shippers on the one hand look to this system to provide stability of rates, and for assurances that their transportation costs are identical with those of their competitors shipping within the same conference. On the other hand, the owners and operators of oceangoing vessels flying the flag of the United States find that the conferences and the dual-rate system offer the only means by which the American lines can be assured of continued patronage in our foreign trade.

Fourth. In view of the fact that the bill passed the House on the Consent Calendar, with the chairman of the House Judiciary Committee present, we were somewhat surprised to find the following statements at pages 12–13 of the report:

The Department of Justice testimony on the legislation was generally unfavorable. While its position is consistent with the antitrust policy of the United States, it fails to take into account the peculiar nature of the particular business involved.

* * * * *

The hearings of the committee have made it quite clear that our traditional antitrust concepts cannot be fully applied to this aspect of international commerce. Your committee has concluded that any attempt to effect regulation of this commerce in a measure comparable to that applied to our domestic commerce would be highly detrimental to our essential American-flag merchant marine. Accordingly the committee has decided that it should encourage the continued maintenance of effective conferences and that, within safeguards, it should authorize and direct the Federal Maritime Board to approve exclusive patronage arrangements without which conferences might well become ineffective.

The question immediately presented to our committee was whether H.R. 6775, as it passed the House, was so obviously sound that to study it further would serve no worthwhile purpose. Had such been the case, no further extension of the interim dual rate law, which was due to expire on June 30, 1961, would have been necessary. Indeed, enactment of the bill under those circumstances would have brought to an appropriate conclusion a legislative endeavor which began in 1958 with the Supreme Court's decision of *Federal Maritime Board* v. *Isbrandtsen Co.* (356 U.S. 481 (1958)).

On June 16, our Merchant Marine and Fisheries Subcommittee held a hearing on the bill. Despite the brief notice it turned out to be a standing-room-only affair. Congressman THOR TOLLEFSON, ranking minority member of the House Merchant Marine and Fisheries Committee, testified forcefully and urged us to make a number of major amendments to the bill. His testimony brought sharply to our attention the fact that he and Congressman JOHN RAY, who is a member of both the Merchant Marine and Fisheries and the Judiciary Committees of the House, joined by Congressman MAILLIARD, had filed additional views appended to the House report.

By then it was beginning to dawn on us that the Consent Calendar passage of H.R. 6775 was more nearly the result of an unwritten truce than it was proof of a generally acceptable, noncontroversial, measure. Before the end of that 1 day's hearing this suspicion had become an absolute certainty. We were convinced then, and we are positive now that the June 30 expiration date of the interim dual rate law, plus certain deadlocks and compromises reached on the House side, caused the House to quietly pass the bill to us.

Our June 16 hearing established that each of the three agencies of our Government most intimately concerned with the bill—the Department of Commerce, including the Federal Maritime Board; the Department of State; and the Department of Justice—wanted various amendments, many of which were highly controversial and a number of which seriously conflicted with each other. While the shipper representatives who testified generally favored the bill, most of them, too, urged us to make major amendments to it. All ocean common carriers which testified opposed enactment of H.R. 6775 as it passed the House. Indeed, the spokesman for all but one of the American-flag ocean common carriers said that his lines would rather have no dual rate legislation at all than have us pass the House bill, unless we made major amendments to it.

Finally, that one day hearing brought forth, through the Department of State, the vigorous opposition of 12 friendly maritime nations to H.R. 6775 as it passed the House. Belgium, Denmark, Finland, France, Federal Republic of Germany, Italy, Japan, the Netherlands, Norway, the Philippines, Sweden, and the United Kingdom protested the extraterritorial scope of H.R. 6775 and its undertaking to regulate various phases of international shipping which they consider outside our jurisdiction and within theirs as sovereign states.

It took us no time at all to decide that what we needed was an extension of the interim dual rate law which would enable us to hear and consider carefully the views and recommendations of all interested parties. Therefore, we reported S. 2154, extending until June 30, 1962, the moratorium bill. The House cut the extension back to September 15, 1961; we acceded to the House amendment; and from July 17 through August 3 we held 6 more days of hearings, took an additional 573 pages of printed testimony, and finally, on August 29, our full committee unanimously reported H.R. 6775 with further amendments.

I stress that the bill now before the Senate was approved unanimously by the full committee on August 29.

I have no intention of consuming the time of the Senate by reviewing in detail matters which we feel are adequately covered by our report, Senate Report No. 860. However, I do want to touch on a few matters I would urge all Senators to keep in mind as they consider our bill and the various amendments which are offered to it. First and foremost, although we have sought and encouraged all interested parties to share with us their views and recommendations as to how we could make the House-passed bill a better measure in the public interest, it is unquestionably true that we have given the greatest weight to the views and recommendations of the Department of State and the Department of Commerce through the Federal Maritime Board, now the Commission. Drafting sessions of considerable length and intensity have been held with representatives of those Departments. Although the Antitrust Division of the Department of Justice has objected to certain amendments we have made to the House-passed bill, I can safely say that every change of any consequence which we have made, and to which the Department of Justice has objected, we made at the request of, or in keeping with, the recommendations of either, and in most cases both, the Department of State or the Department of Commerce, Federal Maritime Board.

Our committee found itself caught, just as did the House Merchant Marine and Fisheries Committee, in the crossfire of conflicting advice given by the Department of State and the Department of Commerce, Federal Maritime Board, on the one hand and the Department of Justice, Antitrust Division, on the other. Generally speaking, we followed the recommendations which we found were premised upon considerations of great importance to our foreign policy, our foreign trade, and our American flag merchant marine.

While we rejected certain proposals made by the Department of Justice, we did so with the conviction that their rejection worked no harm whatever to important principles of sound antitrust doctrine. What we appreciate, but what certain domestic-oriented antitrust personnel in the Department seem incapable of understanding, or unwilling to accept, is this:

International ocean common carriage, as an industry, inevitably tends toward monopoly unless industry self-regulation or Government regulation, or both, control rate competition. Otherwise, the lines involved engage in open rate warfare among themselves. Unless reasonable and effective industry self-regulation through steamship conferences is encouraged, subject to reasonable Government supervision, only the strong will survive. Said another way, the Antitrust Division's dedication to the principle of encouraging lines, eligible but unwilling to join Commission-approved and regulated conferences, to stay outside and cut the conference rates, cannot help but lead to the destruction of the conference system, with the inevitably monopolistic result of ocean rate wars which shippers dread as much as do the carriers.

In amending the House-passed bill, as we did, our committee gave considerable weight to a fact I urge Senators to keep uppermost in mind as they consider the bill, and especially as they consider the

proposed amendments of the distinguished Senator from Tennessee [Mr. KEFAUVER]. That fact is simply this:

The only nonconference lines today which desire to operate regularly on the basis of cutting conference rates are foreign-flag lines. Every American flag ocean common carrier offering regular liner service, including Isbrandtsen, desires to operate within Commission-approved and regulated conferences.

American-flag lines' solid preference for operating within the steamship conference structure is undoubtedly due to a number of factors. In the first place, although our American lines are among the best in the world, there is no denying that they are the highest cost operators. In an international ocean rate war, our American-flag lines, even if subsidized, could not survive for long. This is so because operating differential subsidy does not cover all items of operating costs. For example, none of the administrative or overhead expenses of American-flag subsidized lines are covered by operating differential subsidy payments, even though the administrative and overhead functions of our subsidized lines are carried out by personnel and through procedures which are much more expensive than those employed by competitive foreign-flag lines. And so it is, that our American lines, including all of our subsidized lines, have the most to lose if Commission approved—and I stress that—and regulated conferences are forced to dissolve.

There are three other matters concerning exclusive patronage dual rate contracts as used by Commission-approved conferences which I have found it helpful to keep in mind as I have deliberated about this bill:

First, with the exception of the United States, dual rate contracts and the more coercive exclusive patronage device known as the deferred rebate system—which is expressly prohibited by section 14, First, Shipping Act of 1916—are lawful and used extensively, without Government regulation or supervision, throughout the rest of the maritime world. Second, all carriers and conferences using dual rate contracts in the foreign commerce of the United States must offer them to all shippers on a nondiscriminatory basis. In practice they have apparently done so. Furthermore, it would clearly violate the present Shipping Act of 1916, and that act, as it would be amended by our bill, if they did not do so. And third, all conferences serving U.S. ports must admit to membership and to participation in their dual rate contracts, all other ocean common carriers desiring to join on the same reasonable terms as the other conference lines.

All Senators should note carefully the public interest safeguards which we have written into our amended version of the House-passed bill.

In the first place, no conference may institute a dual rate contract until it has been approved by the Commission. The Commission may not approve any such contract if it finds it detrimental to the commerce of the United States, or contrary to the public interest, or unjustly discriminatory or unfair as between shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors.

In addition, no dual-rate contract may be approved by the Commission unless the contract expressly permits prompt release of the contract shipper with respect to any shipment for which contract carriers or conference thereof cannot provide the space he needs on reasonable notice; provides that rates shall not be increased for a reasonable period, in no case less than 90 days, except in the event of war or other force majeure; covers only those goods as to which he has the legal right at the time of shipment to select the carrier; limits liquidated damages to what would be due at the contract rate on the particular shipment, less the cost of handling; permits the contract shipper to terminate on 90 days' notice; provides for a reasonable spread between contract and noncontract rates, in no event more than 15 percent of the noncontract rate; excludes from the coverage of the contract cargo loaded in bulk without mark or count; and contains other appropriate provisions as required by the Commission.

With all of these protective restraints written into the statute the public interest is, we feel, protected to the maximum extent possible. Indeed, there is some question whether such restricted contracts will assure the carriers the reasonable guarantee they need in order to furnish regular, dependable, and nondiscriminatory service. However, our committee believes they will; and accordingly it unanimously recommends enactment of the bill which we have reported, with a few minor technical amendments.

Mr. President, in summary, when the bill as passed by the House came to the Senate Commerce Committee, I asked whether there was any opposition to the bill. Almost unanimously the carriers said they would rather have no bill at all, than to have the bill as passed by the House. The State Department and the foreign-flag lines appeared before our committee and said:

We cannot go into a conference arrangement under legislation of this kind; we cannot do it, because this measure has the effect of applying on an extraterritorial basis the regulatory laws of the United States of America. And even if we wanted to participate in such conferences, we could not do so if we had to subject ourselves to American law, because our governments will not permit us to do so.

The next question was whether these shipping lines actually want a conference system. I asked them that question. All of them said they want a conference system. A conference system has been in operation throughout the maritime world for almost 100 years. But the only way we can get the foreign lines to participate—and the participation must be on an international basis—is to get them to participate on a voluntary basis, for we cannot force them to go into the conferences; we cannot mandate them into the conferences; and we cannot apply American law to foreign-flag lines. As a consequence, unless the foreign-flag lines are willing to come in on a voluntary basis, there is no way to have a conference system.

Therefore, we tried to write a measure which would provide for a system in which the foreign-flag lines would be willing to participate.

The lines accept lower rates from shippers which agree to give them exclusive contracts. But in order to prevent either the American-flag lines or the foreign lines which participate in the conferences from imposing upon American shippers rates and arrangements discriminatory against the American shippers and adverse to the American shippers and the American foreign trade, we have included a provision that unless the conferences meet certain specifications—namely, unless they are not discriminatory against American lines or American shippers or American courts or the American public interest—the Maritime Commission can step in and can order the American-flag lines out of the conference, thereby dissolving the conference.

The only hold we have over the foreign-flag lines is their desire to participate in these conferences. By empowering the U.S. Maritime Commission—as we do in this measure—to pull out the American-flag lines when and if the conferences are discriminatory against American shippers or adverse to the American public interest or injurious to the foreign trade of the United States, we give all the control that it is possible for us to give and at the same time maintain a conference system at all.

That is the kind of measure we today present to the Senate. It provides for a system which permits the conferences to operate; but it gives the Maritime Commission authority to see to it that the conferences do not operate adversely to the public interest; and if the conferences do operate adversely to the public interest, the only action available to us is to take out the American-flag lines. Under the provisions of the bill, the Maritime Commission is ordered to do so under such circumstances. The conferences must be affirmatively approved by the Commission.

Mr. President, I believe we have written the most practical bill we can possibly write; and it will make it possible to continue in existence and in operation these conference systems, which have stabilized world commerce and have been a part of the commerce on the seas for almost 100 years—since 1877; and at the same time we undertake, insofar as it is practical and possible to do so, to prevent the conferences from operating in a discriminatory manner against the shippers, the public interest, or the foreign trade of the United States of America.

Mr. BARTLETT. Mr. President, will the Senator from California yield?

Mr. ENGLE. I yield to the distinguished Senator from Alaska.

Mr. BARTLETT. Mr. President, the Senator from California is entitled to credit for bringing this bill to the floor. In fact, in my opinion, he is entitled to

much credit. Really, he was handed quite a package, because it was only 3 months ago this very day that the House passed the bill, after, as I understand, 2½ years of hearings; and the Senate Commerce Committee then had the task of either accepting that bill as it was or working out an amended bill.

It was the junior Senator from California [Mr. ENGLE] who headed the subcommittee on this subject. From my own knowledge, I know he spent endless hours on this complicated, highly technical, and very important subject.

I wish to pay him tribute now for what he has done in this area of such consequence to our trade and to the U.S. merchant marine, because, although the bill is not perfect—for no legislation ever is, it represent an arrangement with which, in my judgment, all can live.

The simple fact is that the testimony taken before the subcommittee of the Commerce Committee demonstrated beyond a shadow of doubt that if the conference system failed or went to pieces or broke down, there would be several evil results. One of them—an important one—would be that the American merchant marine, already so battered and beaten in recent years, would be further hurt, almost to the point of entire destruction.

Our flag carriers, as the Senator from California has said, benefit from the conference system, because—as he has also said—it is obvious that foreign ships operate more cheaply than our own.

Nevertheless, the foreign-flag ships have been willing to abide by the terms, agreements, and conditions of the conference system; and it has worked fairly well, all things considered.

Mr. President, for the United States and our Government now to tell these foreign-line operators that they must submit their confidential business data and all their records to the Department of Justice or any other agency of our Government is not workable. The problem—as has been stated by the Senator from California—is one which is international and extraterritorial; and our committee has been informed that if any effort is made to require foreign-line operators to submit their confidential records to an agency of our Government, that fact in itself may cause a collapse of the conference system.

It is my understanding—and I ask the Senator from California whether I am correct—that several foreign governments already have instructed their shipping operators not to abide by any such request from the U.S. Government.

Mr. ENGLE. I am glad to have that inquiry, and to state again that the State Department protested the bill the House passed; and 12 friendly nations—Belgium, Denmark, Finland, France, the Federal Republic of Germany, Italy, Japan, the Netherlands, Norway, the Philippines, Sweden, and the United Kingdom—all protested, and said that not only did they not want their flag lines to submit themselves to such jurisdiction, but they would prohibit it and they would protest it; and they did protest it, through the State Department.

We have had these conference systems for almost 100 years. We have conferences on a basis that makes it possible for foreign-flag lines to participate on a voluntary basis. We cannot mandamus them, and bring them in.

Mr. BARTLETT. We are equal partners. We are not the boss.

Mr. ENGLE. That is correct. If we do not do it that way, we are not going to have a conference system. The basic question is whether or not we want these conference systems. They have operated since 1877. They were considered proper and legal until 1958, in the Isbrandtsen case, in which it was held that a U.S. line could not violate the antitrust laws. Congress, because of the importance of maintaining the conference system, has validated the system notwithstanding the Supreme Court decision. Now we are trying to get a piece of legislation that makes it possible for conference systems to go forward with international trade, which everybody agrees is necessary to the permanence and stability of the U.S. maritime system.

We have undertaken to write legislation to make it possible to continue these 100-year-old conference systems and at the same time put them under regulation of American law so far as that is possible. The only way that is possible is through the grip we have upon our own lines to pull them out of the conferences if they are unfair and discriminatory, and break the conference. That is the only way we have. That is the way the legislation is written.

Mr. BARTLETT. Mr. President, will the Senator yield further?

Mr. ENGLE. I am delighted to yield.

Mr. BARTLETT. Is it not true that the whole situation has been under review many times over the years? The hope was that another, and perhaps better, arrangement might be made; but, unfailingly, and always, this conference arrangement, which has been in effect, as the Senator has said, almost 100 years, is the only logical way for this operation to be conducted. Is it not the case that this subject had voluminous study before enactment of the 1916 Shipping Act?

Mr. ENGLE. That is correct. Studies of this whole problem have been made over the years. That matter is dealt with on page 6 of the committee report. It refers, first, to the study made by the British Government. The King of England in 1906 ordered a royal commission investigation of conferences to determine whether their operations had caused injury to British or colonial trade and, if so, what remedial action should be taken. In 1909 the royal commission reported:

> The advantages conferred by shipping conferences are substantially dependent upon the system of deferred rebates or some system equally effective as a "tie" upon the shippers and equally uniform in its application.

In our own country, in the 62d Congress, in 1912, Congress authorized a study of the same subject matter by the House Merchant Marine and Fisheries Committee, the chairman of whom was J. W. Alexander. The report was thereafter known as the Alexander report. The committee studied the proposition and also arrived at the conclusion that the conference systems were absolutely necessary.

We have had hearings going on in the House committees, both in the Merchant Marine and Fisheries and the judiciary, comprising some 13,000 pages of testimony which have been taken in the last 2 years.

I read previously, in the statement I made, the conclusion drawn by the House Committee on Merchant Marine and Fisheries, namely, that the conference systems were necessary to the stability of international trade.

We have been up and down this subject and have studied it since 1909, when the royal commission studied it, and since the Alexander committee study made in 1912. Since then we have passed the Shipping Act of 1916. We have passed the Shipping Act of 1936. The subject has been under constant review. We arrived at the same conclusion reached by the royal commission in 1909 and the Alexander report in 1912, namely, that these conferences are absolutely necessary to the stability and permanence of the merchant marine system.

The answer to the question, "Do we want conferences?" has been given time and time again for over half a century. The problem is how these conferences can be continued and at the same time, because they have a tendency toward monopolistic practices, how those practices can be restricted in the public interest. That is what the bill undertakes to do.

Mr. BARTLETT. Mr. President, will the Senator yield further?

Mr. ENGLE. I am delighted to yield.

Mr. BARTLETT. In that connection, the Senator has previously pointed out that the public interest, which is hedged about in the legislative offering before us, is safeguarded because of what the Federal Maritime Commission is required to do under certain circumstances. It is also true that there is no Government regulation whatever and that members of the conference may operate without any regulation whatsoever from their national governments. The suggestion that there be Government intervention in the manner here proposed apparently has never been seriously offered.

The Senator from California a while ago made what I consider to be an important, and even a vital, point when he said these conferences are not exclusive clubs. We do not get in them and then blackball any other person who desires to enter and join them.

On the contrary, the law now specifically states—and it will be restated under the bill before the Senate—that the maritime company which is not in the conference and which wants in must be permitted to join if it proves ability and intention to operate a regular service in the trade.

I think we ought to dwell a bit more on that point. What will happen if

there is not a conference? There was abundant testimony before the Committee on Commerce that regularity of service is one thing which is likely to disappear. Rate wars will be instituted without a doubt, and without delay. Everyone would be delighted if that should occur, for a little while, but not for long, because companies would be forced out of business and the stronger would take over. If anyone thinks for a moment that the rates would stay at depressed levels, he is incorrect.

Mr. ENGLE. Mr. President, will the Senator permit me to interject at that point?

Mr. BARTLETT. Certainly.

Mr. ENGLE. We received a statement from one of our colleagues at the time the bill was under consideration that in respect to the business enterprises in which he was concerned—and they were substantial business enterprises—in the absence of a conference arrangement the business enterprise could never tell what would be the freight rate, because there would be one rate one day and another the next. As a consequence, it was not possible to bid or to do business upon the basis of stability. The rates would stay firm and solid for awhile, when there was an agreement, and then when a rate war went on and half of the companies went broke the rates would go sky high. As a consequence, if an enterprise made a contract for the delivery of goods in other parts of the United States by ship, to last over a period of years, there was no assurance that the freight rate would not be changed in the interim, to make the contract not worth having and, in fact, a solid detriment. That is why we need the kind of stability proposed.

Mr. BARTLETT. That is correct. The committee was informed that such occurs too frequently in respect to some of the nonconference operators. One might offer a shipper a very attractive rate, and the shipper might accept, only to discover that the rate for the next voyage would differ radically and would be much higher. Also, no regularity of service was assured. In fact, in too many cases regularity simply did not exist.

That brings me to my next point. Not only the shipping companies but also, to a great degree, the shippers, desired passage of the bill now before the Senate. These are the people who pay the bills. They know, as a result of sad experience, that unless they can operate upon a stable basis, they will be in trouble.

As the Senator from California said, and as I repeated, these people have been in trouble when they have gone hunting to seek more attractive rates.

The shippers came before the committee. They are not only content with a conference system, but they insisted before us that it was the only practical way and the only sensible way to do the job.

I do not suppose any of us is delighted or altogether happy because of confirming into law an arrangement which is admittedly monopolistic in certain respects, surrounded by safeguards though it may be.

Mr. ENGLE. Mr. President, will the Senator yield for another interjection?

Mr. BARTLETT. I yield.

Mr. ENGLE. The Senator refers to this as a monopolistic practice. A monopoly excludes everyone. The bill specifically provides that the conferences may be set up, when approved by the Maritime Administration, with certain restrictions, and that any common carrier who wishes in can get in on equal terms.

Mr. BARTLETT. That is basic, and that is vital. If we could get away from any grouping of people not smiled upon by law, I am sure we all would be glad to do so. No practical alternative has ever been offered, and the attempts in this direction date back over 10 decades. Probably the time will not come when a better alternative will be offered.

This is why we bring the bill before the Senate now, in the hope that it will be agreed to, because it provides a sensible arrangement to accommodate the needs of the Nation. I am confident it will have the effect of maintaining vigor in the American merchant marine and of promoting trade, both foreign and domestic.

The bill is all the better, in my opinion, because there is a further safeguard of the public interest, thanks to the willingness of the Senator from California to accept an amendment offered by my colleague [Mr. GRUENING] and myself to provide that when the Governor of a State feels his political area is being harmed by any rate structure within the conference he may make an appeal to the Federal Commission and the Commission must inquire promptly into the merits of the appeal and make a determination.

Mr. ENGLE. Will the Senator permit me to interject further at that point?

Mr. BARTLETT. Assuredly.

Mr. ENGLE. The Senator from Alaska and his colleague [Mr. GRUENING] are entitled to great credit for presenting the problem to the committee. The burden of their complaint was that the ports of Alaska have been discriminated against in a conference arrangement. In the trans-Pacific freight conference of Japan, Alaskan ports were charged 30 percent more for hauls than, for instance, was charged for the hauls from Japan to the port of San Francisco or some of the other ports on the west coast.

It was claimed that the conference arrangement was discriminatory and unfair to Alaska, and the Senators wished to have it corrected, and wished to have a fast way of getting the situation corrected. The bill provides that the Commission can take immediate cognizance of arrangements within the conference, not only those which are discriminatory as against shippers but also those which are discriminatory as among ports. There will be a hearing and a decision within 120 days.

The senior Senator from Alaska and his colleague have performed an excellent service for their State, as they always do. They have succeeded in having written into the bill the kind of protection to which their people are entitled, establishing procedures which will make it possible for the State of Alaska to redress any wrong which might occur through any discriminatory conference system which may be set up in the Pacific area.

Mr. BARTLETT. Or for any other State to do likewise, should the need arise.

In conclusion, Mr. President, I reiterate my praise for the junior Senator from California, whose dedication to this tough assignment has been most considerable. The Senator has worked hard and usefully, and has brought to the Senate a bill which I believe is a good bill and which should be passed.

Mr. ENGLE. Mr. President, I am very grateful to the Senator from Alaska for his comments and for the kind words he has stated with respect not only to the junior Senator from California but also with respect to the proposed legislation.

Mr. BARTLETT. Mr. President, will the Senator yield for one more comment?

Mr. ENGLE. I am very glad to yield.

Mr. BARTLETT. I also wish to pay tribute to my friend from Maryland [Mr. BUTLER] who is in the Chamber and about to speak, I judge, because of his attentiveness and helpfulness, as is true of his colleagues on the other side of the aisle.

Mr. BUTLER. I thank the Senator from Alaska. He is very kind.

Mr. ENGLE. Mr. President, I yield the floor.

Mr. BUTLER. Mr. President, I intend to vote for H.R. 6775 as amended and reported unanimously by our Committee on Commerce.

I intend to vote against all but a few of the amendments offered by the distinguished senior Senator from Tennessee.

My reasons for both courses are the same, and may be stated briefly:

First, I believe that in order to furnish a regular and dependable international ocean common carrier service to and from the United States, the carriers concerned must be allowed, as they are throughout the rest of the maritime world, to form steamship conferences within which they can agree upon their rates and other competitive practices. Otherwise, history proves that open-rate competition in the international ocean common carrier industry leads to a much more monopolistic situation. This is a fact which domestic-oriented antitrust authorities, having little interest in our merchant marine, would like to ignore.

As the Alexander committee pointed out in its report of 1914, which 2 years later served as the foundation of the Shipping Act, 1916—4 Alexander Committee Report, pages 416–417:

> To terminate existing (conference) agreements would necessarily bring about one of two results: The lines would either engage in rate wars which would mean the elimination of the weak and the survival of the strong or, to avoid a costly struggle, they would consolidate through common ownership. Neither result can be prevented by legislation and either would mean a monop-

oly fully as effective, and it is believed more so, than can exist by virtue of an agreement.

Second, I believe that under many circumstances such steamship conferences must be allowed, as they are throughout the rest of the maritime world, to enter into fair but effective exclusive patronage contracts with shippers. Otherwise, these conferences will not be able to protect themselves and the shippers they serve from the relatively unregulated rate competition of tramp carriers and nonconference lines eligible but unwilling to join the conference. History proves that unless conferences are permitted to enter into such exclusive patronage contracts with shippers, the conferences in many cases will disintegrate because they will be unable to defend themselves against nonconference rate competition.

Third, I note that the bill, as reported unanimously by our Committee on Commerce, conforms closely to the recommendations of the two Government agencies whose interest I deem clearly paramount here; the Department of State and the Department of Commerce/Federal Maritime Board—now Commission.

In addition, prompt enactment of our bill is urged by the great majority of American importers and exporters, and all American and foreign flag conference lines. Indeed, the only people who urge our bill's defeat or the equivalent—that is, acceptance of the chief amendments offered by the senior Senator from Tennessee—are people who are opposed to steamship conferences, or to their use of dual-rate exclusive patronage contracts, or both.

In this connection it should be noted that the House committee's report on the bill—House Report No. 498, page 12—states:

> In the course of the hearings before the committee, virtually all of the witnesses, both carrier and shipper, testified that they desired the continuance of the dual rate contract system and that some such system was virtually a necessity for their continued successful operation.

Our committee made similar findings. I mention this to emphasize that anyone who favors any course which would prevent steamship conferences from entering into fair but effective dual-rate contracts with shippers is opposing the overwhelming majority of American shippers.

To put it more specifically, the only American importers or exporters who would favor amending our bill, as the senior Senator from Tennessee would in his amendments C, D, and E, to encourage nonconference lines which are able but unwilling to join Commission-approved conferences, to stay outside and cut conference rates, are among the small minority of American importers and exporters who oppose legalizing dual rate contracts.

Fourth, I am confident that our bill provides ample safeguards of the public interest. As we said at page 11 of our report:

> 3. The amended bill contains ample safeguards of the public interest: Under your committee's amendments a conference could not institute a dual-rate contract until it had been approved by the Federal Maritime Commission. The Commission could not approve if it found the contract—
>
> (a) detrimental to the commerce of the United States; or
>
> (b) contrary to the public interest; or
>
> (c) unjustly discriminatory or unfair as between shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors.
>
> In addition, no contract could be approved unless it expressly—
>
> (a) Permitted prompt release of the contract shipper with respect to any shipment for which the contract carrier or conference could not provide the space he needs on reasonable notice,
>
> (b) provided that rates shall not be increased for a reasonable period, in no case less than 90 days except in case of war or other force majeure,
>
> (c) covered only those goods of the contract shipper as to which he has the legal right at the time of shipment to select the carrier,
>
> (d) limited liquidated damages to what would be due at the contract rate on the particular shipment, less cost of handling,
>
> (e) permitted the shipper to terminate on 90 days' notice,
>
> (f) provided for a reasonable spread between contract and noncontract rates, in no event more than 15 percent of the noncontract rate,
>
> (g) excluded from the coverage of the contract, cargo loaded in bulk without mark or count, and
>
> (h) contained other appropriate provisions required by the Commission.
>
> With all these protective restraints written into the statute, shippers' interests would, we feel, be protected to the maximum extent possible.

Incidentally, I wish to note that the senior Senator from Tennessee's amendments K are quite acceptable. They merely serve to underscore what we considered quite clear, that is, that it shall be unlawful to use any new dual-rate contracts until permission to use them has been given by the Commission.

It would be a major mistake to conclude that the above-mentioned public interest safeguards are the only protections which will be afforded by the Shipping Act, 1916, as amended by this act. We tend to forget the large number of restraints and controls which are already imposed by that statute upon the competitive practices of ocean common carriers serving U.S. ports. Therefore, permit me to review what I consider that statute's most important regulatory provisions (46 U.S.C. 80 et seq., 39 Stat. 728):

Section 1: By defining here the term "common carrier by water in foreign commerce," the statute's regulatory reach covers ocean common carriers, "whether in the import or export trade." This equating of inbound to outbound movements becomes quite significant when it is realized that Congress has thus given the regulatory agency the well-nigh impossible task of policing certain proscribed activities, regardless of whether they occur in New York or Bombay.

By providing that "a cargo boat commonly called an ocean tramp shall not be deemed such 'common carrier by water in foreign commerce,'" section 1 specifically exempts from regulation all ocean tramps engaged in the foreign trade of this country.

Section 14 of the Shipping Act, 1916, provides that certain practices by common carriers by water in foreign commerce are forbidden; namely, the use of deferred rebates, the use of fighting ships, retaliation against shippers by refusing space because a shipper has patronized another carrier or has complained to the Board, the making of unfair or unjustly discriminatory contracts with shippers based on the volume of freight offered or unjust discriminations in the matter of cargo space accommodations and settlement of claims. A fine of not more than $25,000 is prescribed by this section for any carrier which violates any provision of this section.

Section 15 provides that every common carrier by water or other person subject to the Shipping Act, 1916, must file with the Board a true copy of every agreement with another such carrier or other person subject to the act, "fixing or regulating transportation rates or fares; giving or receiving special rates, accommodations, or other special privileges or advantages; controlling, regulating, preventing, or destroying competition; pooling or apportioning earnings, losses or traffic, alloting ports or restricting or otherwise regulating the number and character of sailings between ports; limiting or regulating in any way the volume or character of freight or passenger traffic to be carried; or in any manner providing for an exclusive, preferential, or cooperative working arrangement."

I have emphasized the "preventing or destroying competition" language to show that those who drew the Shipping Act, 1916, were well aware of the fact that in certain circumstances agreements which "prevent or destroy competition" are not detrimental to the commerce of the United States. This is a feature of the Shipping Act which the Antitrust Division at the Department of Justice would like us to forget. But we cannot. To do so, would ignore the fact that international shipping is a tough business; a business which we can hardly expect to remake in our own domestic regulatory image.

The Board—now the "Commission"—is empowered, but not required, by this section to disapprove, cancel or modify any agreement, whether or not previously approved by it, which it finds unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or to operate to the detriment of the commerce of the United States, or to be in violation of this act, and shall approve all other agreements.

Only those agreements requiring Board approval, and approved by the Board, shall be lawful. Before Board approval, or after disapproval, it is unlawful to carry out any such agreement.

Every agreement lawful under this section is by this section excepted from the antitrust laws.

A penalty of $1,000 a day for each day a violation of this section continues, to

be recovered by the United States in a civil action, is prescribed by this section.

By section 16, Shipping Act, 1916, common carriers by water in foreign commerce, individually and in conjunction with others, are forbidden, upon pain of a fine of not more than $5,000 for each offense, to grant undue preference or advantage to any person, locality or description of traffic, or to subject any person, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever. They are also forbidden to allow a person to obtain transportation at less than the established rate by the use of false billing or other unfair device, or to influence insurance companies to discriminate against competing water carriers.

Section 17: This section prohibits all common carriers by water in foreign commerce from charging any rate which is unjustly discriminatory between shippers or ports, or is unjustly prejudicial to U.S. exporters as compared with their foreign competitors. It also requires that every carrier and every other person subject to the act shall establish just and reasonable regulations and practices relating to the receiving, handling, storing, or delivering of property.

Section 20: This section of the Shipping Act, 1916, prohibits the disclosure of certain information by a common carrier or other person subject to the act to any unauthorized person if such information may be used to the detriment or prejudice of the shipper, consignee, or carrier.

Section 21: This section empowers the Board to require any common carrier by water, or other person subject to this act, to file with the Board "any periodical or special report, or any account, record, rate, or charge, or any memorandum of any facts and transactions appertaining to the business of such carrier or other person subject to this act."

Two U.S. circuit courts of appeal have recently upheld the Board's power, under this section, to call for the production of documents—copies of section 15 agreements and other related documents—located abroad. (*Kerr Steamship Co.* v. *United States*, 284 F. 2d 61 (2d Cir. 1960), *Montship Lines, Ltd.* v. *Federal Maritime Board*, decided June 30, 1961 (D.C. Cir.).) Both courts carefully avoided passing on the question of the extent to which the documents sought could be forcibly elicited. In Montship, the court said that prior to any determination of whether foreign laws which forbid the production of documents excuse compliance with the Board's order, the petitioners—mostly foreign lines—would have to prove to the Board that they had tried in good faith to obtain a waiver of such restrictions from their local governments.

One hundred dollars for each day of default shall be forfeited to the United States by anyone who fails to file any documents as required by section 21; and for anyone convicted of destroying, mutilating or falsifying such documents, a fine or not more than $1,000, or imprisonment for not more than 1 year or both, is provided.

Section 27: This section of the Shipping Act, 1916, allows the Board by subpena to compel the attendance of witnesses and the "production of books, papers, documents, and other evidence from any place in the United States."

Returning now to our bill, I believe that while the Shipping Act, 1916, as amended by our bill, will go much further to regulate international shipping than any other nation has ever before gone, it can and must be enacted—and enacted now—in order to make it clear beyond doubt that steamship conferences have the right to enter into fair but effective dual rate contracts.

I subscribe wholeheartedly to the advice of the Under Secretary of State, George W. Ball, to our subcommittee on August 3, 1961. After urging enactment of a bill such as that which is today before the Senate, Mr. Ball said:

> We must ascertain the extent to which national, unilateral regulatory authority can, and should, extend into international shipping activities. Although the primary problem before this subcommittee is its work on H.R. 6775, I believe that a study should be begun in the near future to examine in detail this vexing problem of conflicting jurisdictions and the regulation of international commerce by sea.

In an appendix to his statement, Under Secretary Ball reported the responses which the Department of State had received to a questionnaire it had submitted in July 1961, to the embassies of the 12 maritime nations—Belgium, Denmark, Federal Republic of Germany, Finland, France, Italy, Japan, Netherlands, Norway, Philippines, Sweden, and the United Kingdom, nations which previously had commented on H.R. 6775. A fair summary of his report follows:

First. In answer to the questions of how much they regulated the competitive practices of carriers or conferences engaged in their foreign, waterborne commerce, the nations replied, "no regulation," or "no effective regulation."

Second. As to the limitations those nations would place on the production of documents or information by their nationals for use in legal proceedings abroad, five nations—Belgium, Italy, Japan, the Netherlands, and the United Kingdom—said they would not permit their nationals to comply; most of the others said they reserved the right to restrict document production.

Third. As to whether those nations regulated ocean freight rates in their foreign commerce, or, if not, how they were assured of the reasonableness of rates, all replied that they attempted no such regulation. Instead, they said they left this matter to the forces—as they called them—of "free competition." Since they had previously said they did not regulate steamship conferences, their use of the term "free competition" differs markedly from that of the Antitrust Division, Department of Justice. Clearly these nations leave the reasonableness of their ocean freight rates to the unregulated steamship conferences and other carriers serving their ports, subject, as they are, to many economic forces which affect the rates they charge.

Fourth. As to whether these nations permit shippers to bargain collectively for ocean freight rates, practically all do.

I urge all Senators to bear in mind that we are the only nation which requires steamship conferences to keep their membership doors open to all common carriers making a reasonable showing of willingness and ability to serve the trade regularly. Our conferences are thus "open shop" affairs; every applicant must be admitted on the same reasonable and equal terms and conditions available to all other members. And once admitted, they are eligible to participate with the other members in the conference's dual-rate contracts.

Another point to bear in mind is that Commission-approved dual-rate contracts must be offered to all shippers or consignees on the same terms and conditions. There cannot be any unjust favoring or preferred shippers or ports.

In closing, I want to express a sincere word of tribute and commendation to my friend and distinguished colleague, the junior Senator from California [Mr. ENGLE], who served as acting chairman of our Merchant Marine and Fisheries Subcommittee throughout its consideration of this bill, and to the chairman of our full committee, the distinguished senior Senator from Washington [Mr. MAGNUSON]. Both have devoted a great deal of time and thought to this complex problem. Largely as a result of their efforts, our committee was able, unanimously, to report this bill, which should now be enacted without any amendments other than those of a perfecting or technical sort. Mr. President, I hope the Senate will do just that.

Mr. ENGLE. Mr. President, will the Senator yield?

Mr. BUTLER. I yield.

Mr. ENGLE. I desire to express my appreciation for the kind remarks of the Senator from Maryland and the statement he made with respect to the work on the bill. The Senator from Maryland takes an active, vigorous, and intelligent interest in the maritime affairs of this Nation, and has worked constructively with us on this side of the aisle in trying to bring forth a bill that will be fair to the shipping industry and the American public. The fact that the Senator from Maryland is so active and so well informed in this field is largely the reason for the bill being reported unanimously by the Senate Committee on Commerce.

Mr. BUTLER. I thank the Senator from California. I reciprocate very deeply the considerate remarks he has made.

I yield the floor.

HURRICANE CARLA

Mr. YARBOROUGH. Mr. President, on Tuesday of this week, September 12, the Houston Post published a very interesting editorial, entitled "Warning System Enabled All in Exposed Areas To Escape Carla." The editorial, while paying tribute to the use of modern

scientific devices in tracking this amazing tropical storm, which resulted in warning the people along the coast, also reviews what happened in the great hurricane that struck Galveston, Tex., on September 8, 1900, when 7,000 persons lost their lives in Galveston and on the mainland. The editorial points out that warnings were given as far back as the 4th of September that the storm was headed that way, but without the scientific knowledge now available, they did not know with what force the hurricane would strike, and out of a population of 15,000 at that time only one-third had left the beach areas, with the result that a great toll was taken.

The editorial pays tribute to the persons and agencies who the writer thinks are entitled to the greatest credit in the evacuation. The editorial points out that the Red Cross, civil defense, and other groups made an excellent record in taking care of the refugees from Carla throughout the threatened region, and states they have earned the highest praise.

I ask unanimous consent to have printed in the RECORD at this point the editorial from the Houston Post of September 12

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

WARNING SYSTEM ENABLED ALL IN EXPOSED AREAS TO ESCAPE CARLA

South Texas' experience with Hurricane Carla was a dramatic demonstration of the blessings of modern science, and of public education. Radar finding and tracking facilities "tailed" this amazing tropical storm in its wanderings almost hourly for 4 days and nights, and no previous Texas-bound hurricane ever had such complete radio and television coverage. Anyone with access to a radio or TV set could learn the position, progress and condition of the storm at any time from Saturday morning to Monday night.

Such blow-by-blow reports on hurricanes in recent years, made possible by those modern devices, have made people in exposed areas more alert to the dangers than formerly, and thereby may well have saved countless lives. A measure of this boon may be taken by a comparison of the preliminaries of Carla with those of the great Galveston storm of 1900. It killed more people than all other known Texas hurricanes combined, and had more of the characteristics of Carla than any other. It struck on Saturday, September 8—3 days earlier in the month than Carla.

On the 4th, 5th, 6th, and 7th, the Washington weather office warned that a hurricane was raging in the gulf, and cautioned mariners against going to sea. With their 19th century facilities, however, the meteorologists of 1900 could not give the position or direction of the storm. The barometer at Galveston began falling on the 6th, and on the 7th the local weather bureau forecast high winds from the north that night. They began blowing hard early in the morning of the 8th, and gained velocity all day, while the tide mounted to 6 feet by 2 p.m. The last train to cross the bay before the tracks on the wooden bridge were submerged, arrived early in the afternoon.

Wind and tide rose all afternoon, approaching hurricane force. Yet, in the face of all these weather warnings, with the certain prospect of a full-fledged hurricane, only about one-third of the 15,000 residents of the area near the beaches where the greatest destruction occurred had the prudence to seek refuge on the highest ground and in the safest buildings. As the winds reached the velocity of 120 miles per hour and the mountainous tide swept over the island, many others would have left but it was too late. In that district, 2,636 houses were smashed into piles of debris, and 3,000 bodies were found in them next day. The total death toll, on the island and across on the mainland, was estimated at 7,000 or more.

Had the Galvestonians and mainland lowlanders of 1900 enjoyed the advantage of such insistent warnings as the entire population of the gulf coast received Saturday and Sunday, they would have evacuated, as hundreds of thousands did to escape the ravages of Carla, and thereby thousands of lives would have been saved.

The Red Cross, civil defense, and other groups have done a splendid job taking care of the refugees from Carla throughout the threatened region. They have earned the highest praise. All south Texas should give thanks for their services, and for the warnings on the air that enabled those in danger to batten down or retreat to safety.

Mr. YARBOROUGH. Mr. President, this morning the Washington Post has a very informative editorial on the same subject, entitled "The Great Storm." It states that the first heroes of the gulf coast's hurricane disaster were the Weather Bureau, its radar operators, and the Navy pilots who fly storm reconnaissance, and states that they performed magnificently.

I ask unanimous consent that the editorial from this morning's Washington Post be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE GREAT STORM

The first heroes of the gulf coast's hurricane disaster were the Weather Bureau, its radar operators and the Navy pilots who fly storm reconnaissance. Because they performed magnificently, there was sufficient warning to make possible an orderly and effective evacuation of nearly half a million people. The storm was one of the worst of a century that opened with the Galveston flood, in which 6,000 people died. And yet in this hurricane there have been only a handful of fatalities reported: an infant caught in a tornado at Kaplan, La., a man who stepped on a live power cable in Houston, half a dozen people trapped by another tornado in Galveston.

The Weather Bureau warnings over the 10-day life of the storm piled up in a dramatic sequence. Hurricane Carla was first reported to the Weather Bureau early on September 4 by ships in the lower Caribbean. At the Bureau's request, radar-equipped Navy patrol planes took off from Jacksonville to mark its progress hour by hour. An automatic station anchored in the Gulf of Mexico transmitted a steady stream of data. Storm warnings were issued the next day for the Honduras coast.

The storm moved slowly and erratically. Thursday morning it swept into the gulf and warnings were posted for west Florida. By 10 a.m. Friday the hurricane watch was extended westward across the Texas coast, and the Bureau warned residents to prepare to move. Later that day the evacuation began in Louisiana. Weather Bureau radar stations at Brownsville, Galveston, and Lake Charles, the end of a chain that runs up to Maine, were able to give civil authorities a steady and highly accurate flow of intelligence on the storm's movements.

Police, national guardsmen, civil defense units, and citizen volunteers carried out the massive relocation with remarkable success. By the time the storm hit land on Sunday, the most dangerously exposed towns were virtually deserted. On higher ground, discomfort and inconvenience was the refugee's lot, as always. But he was not in danger. For a heavily populated coast to undergo a storm of this disastrous proportion with so low a loss of life is a modern miracle.

Mr. YARBOROUGH. Some of these pilots who fly into the eyes of the storms describe those flights as routine. I heard one on a broadcast the other night describe it as a routine flight. He described how they fly at a height of 10,000 or 12,000 feet at night, but in the daytime, when they fly into the eye of the storm, they drop down to 1,000 or 1,200 feet. The pilots on these flights said they were shaken up and buffeted about, but that was part of the work.

The amazing courage of the pilots who fly into the eyes of hurricanes with winds up to 150 miles an hour is something for which every American should be thankful. I pay tribute to the pilots who fly reconnaisance flights into the eyes of storms. They normally fly at 10,000 to 12,000 feet high, but, in order to see the swells and the waves, as they go through the eye of the storm they drop down to 1,000 or 1,200 feet, and sometimes are forced lower by air pressures.

NATIONAL PARKS FOR THE FUTURE

Mr. YARBOROUGH. Mr. President, in the Atlantic Monthly of June 1961, there is an article warning of the necessity for preserving our national parks, under the title "National Parks for the Future," written by the Honorable Stewart Udall, Secretary of the Interior.

The article gives a brief review of the danger to our parks and the damage being done to them without adequate legislation for their preservation, especially in view of the millions of people who visit the parks. Last year some 72 million persons visited the national parks of the United States. This year the figure already is more than 79 million, and it will be 80 million, by all estimates, by the end of the year.

In calling for new national parks, Secretary of the Interior Udall mentioned seashore recreation areas and called for the acquisition of the three greatest needed areas: Cape Code, Padre Island, and Point Reyes, Calif.

Cape Code National Park has already been created. The bill relating to Padre Island is out of the subcommittee and pending before the full Committee on Interior and Insular Affairs.

The upper end of Padre Island was in the path of the storm. The recent storm illustrates the fact that Padre Island is more suitable for a national seashore recreation area than any other use because of the sandy shore and the high swells that can inundate the whole island during hurricanes. With appropriate warnings, the people can leave the island, just as they left the threatened areas in

the recent storm. It would not be wise to make investments of houses along the beach, but the wise thing to do would be to establish a national seashore recreation area.

I feel the great calamity which has struck that area strengthens the need for the establishment of a recreation area as embodied in S. 4. I hope both Houses of Congress will pass the bill and write it into law before the close of this session.

I commend the reading of the article to which I have referred, and ask unanimous consent to have the article, entitled "National Parks for the Future," printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NATIONAL PARKS FOR THE FUTURE

(By Stewart Udall)

In the summer of 1953, Bernard De Voto, the Cambridge conservationist and chronicler of the West, made his way through some 15 of our great national parks. With him traveled, figuratively speaking, some 17 million Americans who sought, with De Voto, to renew their spirits in the wild and scenic places of our land. On his return De Voto pronounced a verdict on what he had seen, and a disturbing verdict it was to all who knew his deep affection for our national parks. "Let's close the national parks," De Voto wrote caustically. "Let us, as a beginning, close Yellowstone, Yosemite, Rocky Mountain, and Grand Canyon National Parks—close them and seal them, assign the Army to patrol them, and so hold them secure for a more enlightened future."

De Voto's anger was directed at the rot, decay, and neglect he had encountered everywhere. Sewage was seeping into Yellowstone Lake, and the campgrounds of the park looked like outdoor slums because, as De Voto put it, "they are slums." On the breathtaking rim of Black Canyon of the Gunnison, the guardrails had rotted away; not one ranger was assigned to the area; and even the visitor's register had been stolen. Fire, health, and safety hazards were prevalent at every turn.

At about the same time, the Reader's Digest warned prospective visitors that "your trip is likely to be fraught with discomfort, disappointment, even danger," and Conrad Wirth, then as now the Director of the National Park Service, had to agree that "We actually get scared when we think of the bad health conditions." The Saturday Evening Post took its turn at bat and editorialized that the "great canyons, pristine lakes and the endless beauties of nature of our national parks" were being displaced by "traffic jams on beat-up highways, beer cans in the geysers, honky-tonk commercialism * * * outdoor slums."

America's glory has been its natural wonders; how, then, did we allow our national parks to suffer such disfigurement?

The answer is that up until 1941 the resources of the National Park Service, the custodian of our parks and monuments, were reasonably adequate. But with the onset of World War II, money and manpower were cut to the bone, and when millions of Americans turned to the parks in the postwar period, the rangers were overwhelmed.

In 1940 some 7 million people visited the parks. By 1953, the year of De Voto's trek, the figure had more than doubled, and the Park Service, with a smaller ranger force, had to administer 18 new areas as well.

Today few in Washington would dispute the proposition that the esprit and dedication of the men who run the National Park Service are unexcelled in our Government. Yet the postwar years found some rangers and their families living in rat-infested shacks and paying the Government a painful percentage of their modest salaries for the privilege. Not only the parks but the morale of the men charged to conserve them had become eroded to the danger point. These were the conditions which in 1956 called into being the restorative work of Mission 66.

RESTORATION

Mission 66 was designed as a 10-year rehabilitation program to accommodate the floodtide of visitors without compromising basic conservation values. A series of master plans was developed for each of the 181 areas administered by the Park Service, and sizable appropriations were obtained from a responsive Congress to enhance maintenance and underwrite new capital improvements. Thus, a frontal attack was made on the conditions that aroused De Voto's ire and caused misgivings in his fellow Americans.

Mission 66 is now at the halfway mark; a new administration has come to power; and it is an opportune moment to review the scope of the program and assess its work.

The Park Service takes justifiable pride in maintenance systems that now protect the health and safety of park visitors. And, unquestionably, the main new capital development projects—roads, trails, campsites, interpretive exhibits—have made the parks more hospitable and have quickened appreciation of their wonders. But problems of delicate judgment have been created also.

For example, take the problem of roads. In 1924, Stephen Mather, the first director of the Park Service, enunciated the basic guidelines: "It is not intended to have the parks gridironed with roads, but in each it is desired to make a good sensible road system so that visitors may have a chance to enjoy them. At the same time, large sections of each park will be kept in a natural wilderness state without feeder roads, and will be accessible only by trails for the horseback rider and the hiker."

CAMPSITES

In the late forties, the road systems in the parks were miserably inadequate and unsafe. However, 653 miles of existing roads have now been improved under Mission 66, while nearly 144 miles of new roads provide scenic vistas and access to new campground areas.

Camping is one of the more intimate park experiences. To encourage it, 7,000 new campsites have been created, and an additional 4,000 sites renovated. For access both to the spectacular and the humbler sites of natural beauty, 300 miles of trails have been built or improved. For many visitors, the most meaningful moments in the parks come when they join together around the fire in the evening to learn from ranger naturalists more of the natural history that surrounds them. There are now campfire circles for more than 25,000 persons, and 54 new interpretive centers to encourage the vital educational work of the Park Service.

Yet Mission 66 has inevitably evoked both praise and blame from those who love and use our parks. The truth of the matter is that in 1916 the Interior Department was pitched onto the horns of a dilemma by Congress' directive "to conserve the scenery * * * and the wildlife therein and to provide for the enjoyment of the same in such a manner and by such means as will leave them unimpaired for the enjoyment of future generations."

Examining this singular congressional mandate, Wallace Stegner, the well-known novelist and conservationist, once wrote perplexedly: "Provide for use, but leave unimpaired. Use, but protect. Keep the parks primitive, but open them to millions. Make the scenery accessible with roads, trails, lookouts, but don't scar it up. Provide—invisibly—campsites for millions, lodge and motel accommodations for hundreds of thousands, and the facilities of whole towns to take care of them. * * * Protect and restore wildlife, even wolves and mountain lion, in order to keep the balance of nature, but do it in a show window where millions can thrill to see it."

Over the years, some of the wisest men in the Interior Department have wrestled with this dilemma, and it is not surprising that many policy directives have touched off controversy. There have been mistakes; I would cite Tioga Road in Yosemite and the tower on Clingman's Dome in the Great Smokies as two. But when you view the many Mission 66 projects in perspective, it is amazing that so few egregious errors have been committed.

TO USE AND YET PRESERVE

During the Kennedy administration, special care will be taken that in the planning of roads, buildings, and village developments, nature will take precedence over the needs of modern man. The Park Service cannot be too zealous in its work to maintain, and raise, the standards of the facilities and the services it provides. No road or lodging is an end in itself, but exists to enhance the value of the park it serves.

But too often critics have failed to concede that many of the "wrong" decisions have actually been dictated by conditions and compromises which preceded the establishment of the parks. For example, Floridians stipulated a developed area outside its heartland when they donated the land and money which led to the establishment of the Everglades National Park. And the Santa Fe Railroad and others owned land on the rim of the Grand Canyon long before it became a national park.

In my view, wise park administrators must steer judiciously between those who would ignore the park standards and those who construe each alternative according to their personal tastes. In any event, the pressure of tens of millions of people on a limited and often fragile landmass will surely grow more intense. Can our parks be both used and preserved at the same time?

The answer is, they must be if we are to keep faith with future generations and serve the men and women of today.

One concept long respected by the Park Service in its approach to the inherent dilemma has been the development within the wilderness of "zones of civilization" linked by roads. The result is that today 99 percent of our national park land still enjoys wilderness status, and a visitor need only wander 200 yards off any road to enter primitive and untouched country.

In Yellowstone, our oldest and most intensively used national park, the road system has been improved to carry the hundreds of thousands of cars that use it annually, but the natural wilderness has not been penetrated 1 foot farther than when the first motorcar was admitted 45 years ago. And here it should be borne in mind that Yellowstone is nearly three times the size of Rhode Island. All too few of the millions of visitors venture beyond these paved corridors, yet the opportunity is there for anyone who wants to seize it.

Looking at the vast panorama of our parks, one is impressed by the wisdom with which the Park Service has resolved the conflict between use and conservation. There are no more zealous guardians of our places of extraordinary beauty than those who cherish the purity of our wild lands. Fortunately for all of us, each noble stand of trees, each solitary mountain promontory, each desert canyon has its devoted band of friends. And this is as it should be, because wilderness land, paradoxically, is a fragile asset.

PARKS ARE FOR PEOPLE

However, it is also plain that parks are for people, and not people for parks. And these people are entitled to what De Voto has called amiable diversions in keeping with the purpose of their visit and the character of the park. The test of whether to allow such diversions as winter sports, for example, should be whether participants scar the terrain. Furthermore, we must consistently ask ourselves whether a particular organized activity adds a worthwhile dimension to the purpose for which our parks were established.

This brings into focus the central domestic crisis which confronts America today, the fact that population tends to outrun space, and that the very spaciousness which has formed the face and character of our people is now threatened. The most noticeable scarcity in this society of abundance is land. The pressures on our land—especially land suitable for parks and outdoor recreation—are relentless. Another four million Americans will be born into this country this year. Given fair weather each day, another 300,000 acres of countryside will fall to bulldozers, cement mixers, and logging crews.

If we want to save some of this land for parks and for the enjoyment of the outdoors, we must act now. The enemy is time, not people. And time has run out for piecemeal action. The day is long past when a stroke of the pen could create new national parks out of the public domain. The time is now past when we could hoard a few more acres of park land in the West, where it is still relatively plentiful, and hope that some philanthropist would give us a little more elsewhere.

NEW NATIONAL PARKS NOW

What is needed today, and needed urgently, is a truly national and wisely balanced program of land acquisition and park development. Last February, within a month of assuming office, President Kennedy spelled out in a message to Congress the broad goals of a national land-conservation program.

We have already come to the second phase of Mission 66. From 1956 to date, we rescued the national parks from rot and erosion; now, quickly, we must round out our park system by the inclusion of the remaining areas of exceptional scenic beauty. But new national parks are only a part of the answer to the exploding demand for outdoor recreation in all parts of the country. Our great national parks represent one of the few remaining opportunities for vacationing families to enjoy the "early morning" experience of the wilderness. We did not set aside our parks for casual inspection. These unique areas were meant to provide what Laurance Rockefeller has called the cathedral experience of nature.

Furthermore, most of our finest parks are located in the Western part of the United States, a considerable distance from centers of population. Yet America's families should have opportunities for outdoor recreation within easy reach of their homes. And, properly, they should rely for such recreation on their State and local governments. State and local action to set aside land for outdoor recreation would take pressure off the national parks, but more important would be the benefits which carefully developed open land would bring to the communities themselves and to their residents.

In most areas of our country, enough land is still available if we act now. But in the heavily industrialized parts of America, the only hope of salvaging what remains lies in inspired, and inspiring, leadership from our governors and mayors.

The challenge is a double one: to preserve the face of our country for ourselves and our children, and at the same time to provide plentiful and varied opportunities for people to enjoy the outdoors.

I should like to see new national parks to protect such unique areas, for example, as the deep, sandstone canyons that surround Rainbow Bridge in southern Utah; the last remaining prairie lands in Kansas; Santa Cruz Island, Calif.; and the proposed Great Basin Park in Nevada. We must also move quickly to add the Great Beach and adjoining land of Cape Cod; Padre Island, Tex.; and Point Reyes to the national seashore system.

Nowhere are the opportunities for outdoor recreation more limited than in or near our cities. What little open country separates the sprawling urban complexes on the east and west coasts is being preempted by various "developments." Only bold action can save what remains. For example, at the Delaware Water Gap a magnificently varied recreation area could be created surrounding the proposed Tocks Island Reservoir. This would give nearly one third of the Nation's population 75 miles of shore front for outdoor sports and recreation.

America's land and water are on the block. The highest bidder is seldom the wisest user. Short-term developments and short-term gains will be debited a thousandfold against the assets of future generations, whose claim on America is as valid as ours.

Some of us in Washington sense an ever-increasing interest in the land and in man's relationship to it. President Kennedy has already struck the keynote. If we seize the opportunity and act to save the spaciousness and grandeur of our land, later generations may record this period as one of the most significant in the American conservation movement.

ADOLFO LOPEZ MATEOS, PRESIDENT OF MEXICO

Mr. MANSFIELD. Mr. President, in the Christian Science Monitor of September 9, 1961, there appears an excellent article by Marion Wilhelm entitled "Mexico's No. 1 Revolutionary." The article deals with the properly elected and constituted President of the Republic of Mexico, Adolfo López Mateos. Despite the legitimate source of his authority, however, this outstanding leader of the Americas is a revolutionary in the sense that he has led in carrying forward Mexico's enormous economic and social transition. The article gives an indication of the rapidity of the progress in the great Republic to the south and the understanding and the perception of Senor Lopez Mateos in guiding this progress, progress which is uniquely Mexican as was, and is, the revolution in that country which has been in progress on a sane and orderly basis for over 50 years.

Mr. President, this is the kind of indigenous effort which can provide the basis for even more rapid progress when it is dovetailed with the concepts of the Alianza para Progresso.

I ask unanimous consent that the article to which I have referred be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MEXICO'S NO. 1 REVOLUTIONARY

(By Marion Wilhelm)

MEXICO CITY.—If the United States is looking for revolutionary advisers in Latin America, one of the most experienced is Mexico's Adolfo López Mateos.

The leader of Latin America's oldest and, in many ways, most successful revolution put out his hand in guidance recently in a frank warning to hurry up the economic and social programs of the Alliance for Progress. "Delay or inefficiency in the action agreed upon will produce a bitterness of total despair," he said in a State of the Nation report marking the halfway point in his term of office.

President López Mateos has spanned the same period as the Mexican revolution, which began in 1910, but he looked even more experienced and politically mature as he told how his government is battling the extremists who plague all of Latin America.

GROWTH TALLIED

His review of national progress in the last 3 years shows Mexico ahead of other Latin American countries in annual industrial growth. Industrial production is up in that period from $6,500 million to $8,250 million. Electrical capacity rose in the same period from 2,500,000 to 3,100,000 kilowatts. Steel output grew from 1,100,000 to 1,700,000 tons. The country is building highways at an annual rate of 1,400 miles, handing out more than 5 million acres of land to campesinos every year, and spending nearly half a million dollars daily on public education.

But it is progress under constant political pressures, as the President went on to explain.

"I believe it is indispensable," he said, "to stress that this work has been carried out in spite of the anxieties and fears aroused by those who wish to frustrate and hinder it.

"The magnitude of the effort Mexicans are carrying out to free themselves from poverty, ignorance, lack of communications, and unsanitary conditions makes patriotic our refusal to adopt extremist sectarian attitudes which, retrogressively or demagogically, are attempting to hinder these tasks and create confusion.

"We Mexicans of good faith must not hold up nor detract from the national work and we must unite decisively in undertaking creative, productive, and positive activities if we wish to attain the stages of fecund stability that are in view."

POSITIVE BALANCE

"The balance of the first 50 years of the revolution is highly positive. * * * To undervalue that balance only because there are goals not yet reached would be to deny our history and encourage a dangerous deformation of our perspectives. * * * Without confidence and faith in what we are and in what we have been we could expose and lose ourselves to questionable experiments lacking roots in our own idiosyncracy.

"A tenacious propaganda * * * systematics and clever * * * with a borrowed ideology and pretended revolutionary aspirations * * * is trying to defect the government from the political and social doctrine that emanated from our people.

"Confronting this phenomenon there have arisen obscure social forces from the past which seek to regress and to stagnate, to perpetuate injustice, extend ignorance, arouse fanaticism, prejudice, and misery * * * a system of life Mexicans do not want.

"Under the protection of free expression both currents seek to propagate their ideas in social restlessness leading to public disorder, and the government is responding prudently but energetically, determined to keep the nation in order, tranquillity, and harmony. * * * Those who take up extreme positions have tried to qualify the Mexican revolutionary movement in a colorless center position. Nothing is more false. Within our constitution and within our ideals we are acting radically. We are realistic revolutionaries and not utopian dreamers."

COLLEGE NEWS CONFERENCE

Mr. MANSFIELD. Mr. President, it has come to my attention that the TV program "College News Conference," which was discontinued last November, will resume telecasts late next month on the new National Educational Television Network. I had the privilege of participating in a number of the presentations in this series over the years and was most chagrined by its termination.

I know that other Members of the Senate share my view that "College News Conference" was an outstanding public educational undertaking and will be happy to learn of its revival. Its manager, Ruth Hagy, who now heads her own producing firm, and the National Educational Television Network are to be commended for bringing this program once again to TV audiences throughout the Nation.

NEW YORK WORLD'S FAIR

Mr. KEATING. Mr. President, it is imperative that the World's Fair study bill pass the Senate this year. Sufficient lead time is absolutely vital if our Government is to make an effective and persuasive showing at the New York Fair.

The distinguished senior Senator from Ohio [Mr. LAUSCHE] has indicated opposition to our bill. I respect his views as we all do. I have discussed this matter with him and have endeavored to point out the important distinction between participation and support. We do expect the Federal Government to participate in the 1964–65 New York World's Fair. At the same time, we emphatically do not expect Federal support of the operations and planning of the fair.

This distinction between participation and support is an important one. We should participate in New York in the same way we participated in Moscow, Brussels, London, and World's Fairs and similar exhibitions throughout the world. The Soviets will be in New York with their buttons popping. This kind of an event is an important part of the overall propaganda and cultural battle between East and West.

Mr. President, when a World's Fair bill was being discussed last year at the end of the 1st session of the 86th Congress, I made it absolutely clear in my remarks that I hoped the Government of the United States would participate in the New York Fair in much the same fashion as we did in 1939. In 1939, the U.S. Government did not support the fair financially. But it did build a U.S. pavilion at the fair. I quote two sentences from my remarks at that time:

> I call attention to the fact that when New York held the 1939 fair, the only Federal participation in the way of appropriations was for the financing of the Federal building at the fair. In all other respects it was completely financed either by private interests or by the State of New York.

That statement was made by me on September 14, 1959, and is to be found in the CONGRESSIONAL RECORD, volume 105, part 15, page 19575.

The bill, which my distinguished colleague [Mr. JAVITS] and I have introduced, is the administration measure which was sent to the Congress by the Secretary of Commerce on behalf of the President.

The preceding administration, under Secretary of Commerce Mueller, had this to say about participation in the fair:

> For reasons which I shall set forth, it is now my view, fully concurred in by all agencies concerned, that the Federal Government should participate in the New York World's Fair. We believe further that such participation should be on a scale and in a manner commensurate and appropriate to the fair as a whole, calculated to assure widespread participation and attendance, and to achieve the best possible effect in terms of promoting international good will—the underlying purpose of a World's Fair.

In other words, the bill before us has the support both of the preceding administration and of the present administration. It has also been unanimously endorsed by the Governors at their conference recently held in Hawaii, in a resolution in which the Governors said in part:

> *Resolved,* That the Governors of the Nation give their support and endorsement to the 1964–65 New York World's Fair as an international project to further the cause of peace and understanding among peoples of the world.

Although I have never been personally engaged in the actual running of this kind of an activity, I can well recognize the necessity for sufficient leadtime. It is imperative that Congress act at this session, rather than to put off action until next year, which would cut down on the planning time which is needed so badly. I hope it will be possible to get action shortly.

KHRUSHCHEV'S LARGER AIM

Mr. KEATING. Mr. President, I invite attention to a perceptive article by Roscoe Drummond which appears today concerning long-term Soviet motives for Berlin and Germany. Mr. Drummond warns that Khrushchev's ambitions do not stop at West Berlin even, which he is now trying to strangle into an acceptance of Soviet domination, but extend to all of West Germany, which he ultimately hopes to intimidate into a position of neutrality.

Mr. President, the implication behind Mr. Drummond's point, I believe, is that we are in some danger right now of losing sight of the forest because of our concentration on the trees. The question of air access routes, of military or civilian flights, of foreigners going in and out of East Berlin, are, of course, important legal points on which we must not yield. But it may well be that the Soviets are deliberately raising these questions to distract us from the main issue. That is: Are we going to let the Communists eliminate Western influence and freedom in West Berlin and indeed throughout West Germany by their continued aggressive tactics?

True, we have spoken severely and sent notes of protest, but while we have done this the Soviets have acted—and closed off half a city from freedom and hope. Let us by all means insist on our legal position. But let us also not lose sight of what Mr. Drummond points out as the main objective, and let us take vigorous measures to demonstrate that we are not going to be distracted by minor points from the major issue of the Western presence in Berlin, the right of the German people to self-determination, and to the ultimate reunification of Germany.

Mr. President, I ask unanimous consent to have the article by Roscoe Drummond printed in the RECORD following my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

K.'s LARGER AIM: NEUTRALIZED WEST GERMANY

(By Roscoe Drummond)

BONN.—As has happened so often in the past, Nikita Khrushchev is looking further ahead than the Western allies.

While we have our eyes and our hopes on West Berlin, Khrushchev has his eyes and his plans fixed on West Germany. We see the coming negotiations as a means of saving what is left of Berlin.

To Mr. K. the Berlin negotiations are not the end, they are just the waymark on the road to a much larger and—to us—calamitous objective. It is increasingly evident his purpose is to use gradual detachment of West Berlin from Western protection and influence as the means of detaching the whole of West Germany from the Western alliance.

West Berlin is not the main prize that the Soviet Union is after. An unarmed, intimidated, neutralized West Germany is the prize.

This is really the stake in the Berlin negotiations and if we see the stake as anything else, we will find ourselves helping Khrushchev to win his own game—to our undoing.

What is the prospect and what are the means by which the Soviets can reach this shattering objective?

Obviously it is not sure for Mr. K. by any means, but such a result could well come about unless we are totally aware that this is what he is after. What makes it a serious possibility is that the events in East Germany and Berlin in the past 3 weeks have thrust new and powerful political weapons in his hands.

Most of the preliminary steps to beginning the long-range drive to unhinge West Germany from its Western alliance have already been taken.

East Berlin has been annexed to East Germany, locked body and soul behind the Khrushchev wall.

The Soviets have swallowed up East Germany and are now in the process of rapidly digesting it into their Eastern European satellite empire.

West Berlin has been snuffed out as a free world showwindow behind the Iron Curtain and has become little more than a geographical location—no longer symbolizing the hope of a united Germany.

The prospect of German unification has now completely vanished before the very eyes of the German people who, though knowing in their hearts it had become a dream, can now no longer cherish even the dream.

What we have to realize is that the openly visible, permanently decisive division of Germany, which the Soviets will seal with a separate peace treaty soon, can have far-reaching political consequences in West Germany which can be only faintly foreseen.

What would the American reaction be if we had lost the war and the Japanese had occupied a third of the United States for 16 years and established an iron-heeled, iron-willed regime run from Tokyo with a puppet capital in Denver?

We would yearn and hope and strive to reunite the Nation—and would rely on our friends to help do so. But what would our feelings be if, in the end, the Japanese signed a treaty with its obedient Japanese regime in Western America and annexed it formally?

That is what the Soviets have done to a third of Germany and right now inevitably there will be many German people and not a few German leaders asking: "Have we misplaced our trust in the Western alliance? If only the Russians can give us a united nation, even if it has to be a totally disarmed and neutralized Germany, may not this be better than to live permanently divided?"

The Adenauer government believes no such thing. But what of the next German Government, and the next? Mr. K. is not thinking of next month or next year; he can wait—and work—in the hope that the Germans can be tempted to take his bait.

This is Khrushchev's aim in the coming Berlin negotiations—to begin to neutralize West Berlin in order to begin to neutralize West Germany.

THE CURRENT WAGE-PRICE ISSUE

Mr. CLARK. Mr. President, the dangers of another round of inflation arising from current developments in the auto and steel industries have been sharply and briefly analyzed in a statement issued by five economists representing four institutions of higher learning. They are Frank C. Pierson and Clair Wilcox of Swarthmore, Paul N. Guthrie of North Carolina, George H. Hildebrand of Cornell, and Fritz Machlup of Princeton.

These economists conclude that three critical tests are ahead—first, the negotiations in the auto industry; second, the question of a steel price increase on or after October 1; third, next year's negotiations in the steel industry. They argue that unless the line is held on these three occasions, an inflationary spiral could begin which, in their words, "can only result in the imposition of direct controls by the Federal Government."

Since their paper was dated, on August 28, a settlement in the auto industry has been reached which in my judgment, will not prove to be seriously inflationary. The second critical test, as these economists see it, will come in the steel industry next month.

I ask unanimous consent that the statement of the five economists may be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE CURRENT WAGE-PRICE ISSUE: STATEMENT BY FIVE ECONOMISTS WORKING IN THIS GENERAL AREA

A critical element in any period of business expansion such as the economy is now experiencing is the way in which wages and prices respond to an improvement in business conditions. During the past 3 years wholesale and consumer prices have remained relatively stable. Over the next 12 months, however, the price line may be breached by a series of wage and price increases in the automobile and steel industries. It is difficult to speak with much assurance about the justification for adjustments in particular industries, but the national interest clearly demands that the price line be held in these two fields if at all possible. Consequently, the burden of proof will fall squarely on the parties involved if this is not done.

The first test will come early this fall in the negotiations between the automobile workers and the major automobile manufacturers. If the union limits its demand for improvements in existing contracts to the most urgent aspects of job security, the pressure on the companies to raise prices on new models should not be excessive. Profits of automobile companies are already up sharply and, with increasing sales in prospect, are due to go higher. A sustained expansion in sales volume, which is almost sure to yield more jobs and higher profits, can best be assured if car prices are maintained or even reduced. There is, therefore, reason to hope that neither group will find any serious conflict between its own objectives and the country's welfare.

The second critical test will come in the steel industry when the 8½ cents per hour increase provided under the 1960 labor contract goes into effect October 1. As in the case of automobiles, steel output has recently been on the rise and is expected to go higher. With fuller utilization of capacity, important cost advantages are already beginning to be realized. Technological improvements are also yielding significant cost savings. As a consequence, profits are starting to improve and almost surely will increase further. In view of the competitive position of steel both in domestic and international markets, it can at least be argued that the industry's own interests would not be served by a price increase at this time. This suggests that the industry would not sacrifice much, if anything, if it kept its policies within a framework dictated by national requirements.

The third and perhaps most critical test will come in mid-1962 when the Steel Workers Union and the steel manufacturers enter negotiations for another contract. It is, of course, impossible to anticipate all the developments that may intervene to affect the outcome of these negotiations, but it is not too early to review possible approaches now. As in the case of the automobile industry, the principal problems lie in the area of job security and job expansion. With the increase to be put into effect October 1, average earnings in basic steel will be about $3.25 an hour, and earnings plus benefits will be well above $4 an hour. The question that will confront the union next year is whether a further substantial rise would contribute to the welfare of the bulk of its members. By concentrating on job expansion and employment security, the union might well do more for the workers in this industry than by pushing wages and related costs still higher. If this were done any direct conflict between the union's interest and the national interest could be avoided.

These three sets of decisions are closely related. Failure to hold the line on prices in automobiles and steel this fall will lay the basis for exorbitant wage demands by the steel union next year. A substantial rise in wages in steel at that time will lead to a further rise in the price of steel and to additional increases inw ages and prices in other industries. This sequence of events, especially in light of mounting tensions abroad, can only result in the imposition of direct controls by the Federal Government. This latter eventuality is almost a certainty if the major union and employer groups cannot find ways of reconciling their own needs with those of the country as a whole. The time to stop this chain of events is before it gets underway. We think that time is now.

THE MANPOWER DEVELOPMENT AND TRAINING ACT

Mr. CLARK. Mr. President, according to newspaper accounts, hope has now been abandoned for passage this year by the House of Representatives of the Manpower Development and Training Act, which was passed by the Senate on August 23 and of which I had the honor to be in charge on the Senate floor. If this report is true, it is very disappointing news indeed.

This is one measure on which there is extraordinarily wide agreement in principle. The bill was approved unanimously by the Senate Committee on Labor and Public Welfare. It was passed by the Senate by a large majority, 60 to 31, and some of those who opposed it were, I believe, prepared to support a program somewhat scaled down in size. The administration is strongly behind the bill. So was every witness who testified on it at the Senate hearings.

No matter how much informed persons may disagree on fiscal and monetary policies in dealing with unemployment, they do not disagree that men and women whose skills are obsolete must be retrained if they are to obtain jobs and make their contribution to the growth and strengthening of the economy.

I hope that the reports are inaccurate and that the House of Representatives will still find time to act on this important measure.

As one more indication of the widespread public support for this bill, I ask unanimous consent to have printed in the RECORD at this point an editorial from the Harrisburg Patriot of August 29 entitled, "Jobless Training Program Could Salvage 'Lost' Men." I also ask permission to include the first of a series of reports by the Bureau of Labor Statistics summarizing European programs for retraining the unemployed, written by Phyllis P. Groom and printed in the August issue of the Monthly Labor Review.

There being no objection, the editorial and report were ordered to be printed in the RECORD, as follows:

JOBLESS TRAINING PROGRAM COULD SALVAGE "LOST" MEN

When the Senate's special Labor and Public Welfare Subcommittee went out into the various States last year to look into the problem of unemployment, testimony turned up a broad range of disagreement on what should be done.

But, the committee's final report noted, all sides—labor, management, Government—supported proposals for a program of training idle workers. Not a single witness opposed it.

Now the Senate has passed the Kennedy administration's proposal for a 4-year, $655 million job training program, and a counterpart bill has been approved by the House Education and Labor Committee and awaits only Rules Committee clearance for floor consideration and action.

The program is designed to help States and areas which have a burden of chronic unemployment. It is a measure of Pennsylvania's acute problem of long-term joblessness that leading advocates in the Congress of the Manpower Development and Training Act are from our State. Senator CLARK, who introduced one of the first proposals on this front, sponsored the administration's bill in

the Senate and was floor manager in the debate which led to its approval, 60 to 31. In the House, Pittsburgh's Representative ELMER J. HOLLAND, a former State senator introduced the legislation and led the fight in committee to get the bill cleared without change.

The plan is simply designed to set up courses of training for unemployed workers to learn new skills after surveys show the needs of industry. It will avail nothing if workers are trained in new skills only to find themselves where they were before with no jobs available for which they are qualified. Jobless workers taking the special courses would be paid allowances equal to unemployment compensation benefits.

Although the Federal Government will pay all the costs when the program begins, the States would be required to match the Federal spending 50–50 after the second year. This requirement, it seems to us, is all-important. Without it the States would continue to do little or nothing on their own.

Our own Commonwealth is probably typical. Despite the demonstrated and documented need and strong recommendations of such groups as the Lane Committee on Unemployment, our State continues to do far too little to help the jobless acquire new skills and new employment. The failure to move ahead also is marked in the field of vocational education, so badly overlooked in the current proposals before the legislature.

A job training program to help workers who have lost out through automation and other industrial changes cannot bring about, as Senator Clark has emphasized, a new state of Utopia. Nor can the proposed new Federal program solve unemployment, but it will make it possible to salvage the manpower of some chronically jobless in the national interest. At the same time, it will establish a responsibility to open up new opportunities to make a living for American workers who are idle through no fault of their own in a surging economy.

RETRAINING THE UNEMPLOYED

I. EUROPEAN GOVERNMENT PROGRAMS

(Phyllis P. Groom [1])

Retraining programs for unemployed workers are receiving growing attention in the United States as one means of reducing the number of the long-term unemployed and encouraging the growth of the economy. Shifts in the geographic centers of some industries, technological change, the decline of consumer demand for the products of certain industries, and resistance to hiring members of some segments of the labor force, are among the forces responsible for the increase in long-term unemployment [2] Illustrating one of these factors in recent testimony before the House Subcommittee on Unemployment and Impact of Automation, Secretary of Labor Arthur J. Goldberg said, "During the postwar period, productivity in the soft-coal industry nearly doubled, rising from 6.4 tons per man-day in 1947 to 12.2 tons in 1959. During this same period, the number of coal miners fell by 262,000. Productivity in the Nation's railroads during this period rose by 65 percent in physical terms. Freight-ton miles (including their equivalent passenger miles) rose from 530,300 per employee in 1947 to 719,900 in 1959. The number of workers employed by the railroads fell enormously, by 540,000."

The Secretary was testifying in support of administration bills S. 1991 and H.R. 7373, sent to the Congress on May 29, 1961. These bills are designed to provide unemployed workers whose skills have become obsolete the opportunity for retraining in skills which are, or will be, in demand and to encourage those now employed to adapt their skills to the changing technology. As submitted to the Congress, the proposed legislation authorizes the Secretary of Health, Education, and Welfare to enter into agreements with the States, under which State vocational education agencies would provide vocational training or retraining. It also authorizes the Secretary of Labor to promote, develop, and provide on-the-job training programs. The Federal Government would finance retraining allowances not exceeding the average unemployment compensation [3] in a State for periods up to 52 weeks for those not receiving unemployment compensation. On-the-job trainees who are compensated by their employer could also receive up to 50 percent of the retraining allowance payable in the State, but the allowance and the employer payment combined could not exceed $46 a week. In addition, workers in retraining courses could receive transportation and subsistence expenses when retraining facilities are not within commuting distance. Finally, the Secretary of Labor could pay 50 percent of the transportation expenses of families, as well as their household effects, if the breadwinner had been unemployed 6 months or more, when he determines that such persons (a) cannot reasonably be expected to find employment in their present location, (b) have bona fide offers of permanent employment, and (c) are qualified for the job. By early July, the bills had been reported favorably, but with substantial modifications, by House and Senate subcommittees.

A law of more limited scope in the field of training, the Area Redevelopment Act,[4] was enacted by the Congress on May 1, 1961. It includes authorization for the Federal Government to spend $4.5 million a year to help finance State and local programs to retrain persons unemployed or underemployed in areas of substantial and persistent unemployment and $10 million a year for States to make subsistence payments for as long as 16 weeks to those undergoing such training.

In Canada, which recently has been troubled with unemployment problems similar to those for which the United States is seeking solutions, the Parliament passed the Technical and Vocational Training Assistance Act in December 1960. This law authorizes the Federal Government to pay 75 percent of the cost of constructing vocational schools and training unemployed workers and vocational instructors, and 50 percent of the cost of vocational training of other persons.

As retraining programs are being developed under the Area Redevelopment Act and additional training legislation is considered, it is relevant to look at the policies of other governments on retraining of the unemployed. To a large extent, the structure and scope of a program is determined by provisions of its legislation and regulations, funds available, the primary functions of the government agencies involved, i.e., education or manpower agencies, and the criteria used to ascertain training needs and select candidates for training. Therefore, these will be the major points examined in a brief review of retraining in Western Europe, followed by a more detailed description of retraining programs in Sweden and France.

RETRAINING IN WESTERN EUROPE

In a number of countries of Western Europe, retraining programs for unemployed workers began either immediately after World War I or during the economic crises which followed. However, this article is based on reports of recent programs taking place in a period of relatively high employment when retraining by the government has been an integral part of assistance to areas of substantial unemployment or planning for full employment throughout the Nation, or both.[5] In addition to the national programs, both the Organization for European Economic Cooperation and the European Coal and Steel Community encourage retraining within their member countries by making funds available for this purpose and by holding conferences and making studies on the subject.

In Europe, retraining is generally part of broad governmental programs to provide assistance to unemployed workers. "Readaptation" is the term which has come into common use to describe such activity; it may include unemployment benefits, training allowances, travel and moving expenses, and a family allowance while the worker is separated from his family. Such assistance may be provided during both the retraining and reallocation period if the worker must move to another area to take up new employment. Unemployed workers who refuse training are disqualified from receiving unemployment benefits in France, Belgium, West Germany, the Netherlands, Switzerland, and the United Kingdom.

The structure of a retraining program naturally differs according to the needs of a country's economy, the initial vocational training (whether undertaken by the schools, employers, trade unions, or various combinations of these groups), and the governmental agencies responsible for the retraining. In the United Kingdom, for example, there is very little vocational retraining by the Government except for ex-servicemen and the handicapped. The primary responsibility for vocation training rests with the trades and industries concerned.

The necessity for retraining and the type of retraining presented varies somewhat according to the breadth of the initial vocational education. In Belgium, Germany, Norway, Sweden, and Switzerland, basic training is as broad as possible to provide maximum occupational mobility. In the Netherlands and in Denmark, the underlying principle appears to be to plan education in the technical schools on a broad base in preparation for specialized training as part of the training-within-industry system. In Austria, Ireland, and the United Kingdom, apprenticeships, generally quite lengthy, qualify for a specific occupation.

---

[1] Of the Office of Publications, Bureau of Labor Statistics.

[2] In June 1961, 900,000 members of the labor force had been out of work over half a year, 500,000 more than a year earlier.

[3] The highest maximum weekly basic unemployment benefits, $55, are now being paid in California and Hawaii. The average weekly benefit paid in all States in March 1961, was $34.37.

[4] Public Law 87–27.

[5] The material for this article was obtained from Foreign Service reports and information from other U.S. and foreign sources. Among the most useful were:

"Dispositions pour faciliter la Création d' Activites Nouvelles," Communauté Européenne du Charbon et de l'Acier, 1959 ("Methods to Facilitate the Creation of New Activities, European Coal and Steel Community, 1959").

"Accelerated Vocational Training for Unskilled and Semiskilled Manpower" (European Productivity Agency, Organization for European Economic Cooperation, August 1960). This volume discusses not only the governmental structure for retraining in OEEC countries but also gives details on the operation of specific courses, i.e., budget, syllabus, and instruction methods.

The following sections of this article describe the structure of the governmental programs in Sweden and France, whose retraining programs vary considerably in organization and administration. In Sweden, for example, responsibility for retraining is held by the Board of Vocational Training, which operates the courses, and the Royal Labor Market Board, which assesses the training needs of the workers, and the manpower demands of the economy. In France, retraining is administered by a tripartite board under the control of the Ministry of Labor and Social Security. In both countries, the scope of authority at the national level is very broad—extending to teaching methods, supply of equipment and tools, and preparation of training programs.

SWEDEN

A program of training unemployed workers has been in effect in Sweden for many years. Training courses arranged by the Government were started originally to prevent unemployment, particularly among youth. However, until the late 1950's, skilled labor was generally in short supply. The policy of the Government has been therefore to train and retrain workers not only to alleviate unemployment and prepare workers displaced by technological change for new jobs but also to meet industrial requirements for skilled labor.

Functions of government agencies

The Royal Labor Market Board (Arbetsmarknadsstyrelsen) performs all the labor functions of the Government except factory inspection and mediation. It holds responsibility for the training and retraining of workers jointly with the Central Board of Vocational Training (Överstyrelsen för Yrkesutbildning).

The Royal Board and the county labor market boards ascertain immediate training needs from current and estimated future skilled manpower requirements furnished by the employers and from employment agency data on the number and the geographic distribution of the unemployed. The Labor Market Board also assesses the longrun need for skilled workers, through continuous study, to determine whether the number in training is proportionate to the occupational manpower requirements.

New training courses may be proposed by the Royal Board, a county board, or a municipality. The Central Board of Vocational Training, after consulting the Royal Board, makes the final decision. A vocational training committee consisting of manpower experts (named by the county labor board) and representatives of the employers and the unions within the occupation is appointed for each Board of Vocational Training course. The committee determines whether each employee has gained the requisite skills by the end of the course, thus guaranteeing that a trainee with a certificate has proved his suitability and has the necessary vocational skill for employment in the occupation.

In the fiscal year 1960–61, the Royal Board paid training allowances to 14,000 workers, 9,000 of whom attended courses under the auspices of the Central Board of Vocational Training. The Royal Board is preparing for a maximum of 20,000 to 25,000 in 1961–62. The Swedish Parliament approved a 105 million kronor ($20,296,500 [6]) appropriation for training and retraining workers under the auspices of the Labor Market Board in fiscal 1961–62. Almost 70 percent will go to the Board of Vocational Training to cover the costs of conducting the courses and the rest to the Royal Board for trainee living allowances.

[6] 1 krona=US$0.1933.

Most of the retraining courses are conducted under the supervision of the Central Board of Vocational Training. However, in 1958, the Royal Labor Market Board was authorized to extend trainee benefits to unemployed persons attending regular vocational schools or undergoing training in private firms. A county labor market board may now conclude an agreement with an employer for training in the employer's plant, subject to approval by the labor organizations concerned of the raining schedule and pay to the trainee for work performed.

Training programs

The Royal Labor Market Board selects the trainees and assigns them to courses or assists them in making a choice. To be selected for training, a person must meet the following general conditions: (1) Be registered for work at the employment exchange; (2) be capable of following the training, according to the local vocational training board; and (3) be physically fit for the occupation in question. To determine whether an applicant has the necessary qualifications for a specific occupation, the employment office investigates his previous occupations and schooling and administers vocational guidance tests when necessary.

The most numerous courses sponsored by the Board of Vocational Training are the retraining classes for persons between the ages of 16 and 40 with some work experience. There are also beginners' courses for those between 15 and 25 years with no training or work experience, which are meant to fill the gap between school and work for those who, because of lack of facilities, cannot attend regular vocational schools. In addition, there are some advanced training courses, mainly in construction trades, which permit workers to improve their skills or to acquire new skills in their own trade. Courses are started, canceled, or moved according to need. They may be set up in factories, regular vocational education institutions, empty premises of trade schools or provisional locations such as a vacant garage. Training on a permanent basis exists only in Stockholm and Gothenburg, where courses, chiefly in the metalworking industries, have been carried on since the 1930's.

During the past several years, the Swedish program has expanded rapidly, both owing to an increase in unemployment in some sectors of the economy and to a greater need for skilled workers in other sectors. In March 1961, 9,200 persons, of whom 1,700 were women, were registered as undergoing training. During the same month, there were 20,700 persons registered for unemployment compensation. Instruction was being given in some 60 trades. There are customarily 12 to 16 students in each of the industrial training classes and between 15 and 30 students in the commercial and domestic classes. Courses run from 4 to 22 months; 1 year is the most common length. Courses most frequently given in 1959 were those for automotive repairmen; welders; radio, television, and radar technicians; machinists; and building trades (advanced courses).

The Labor Market Board has also arranged for vocational training for farmworkers in areas where there is a demand for skilled industrial workers. As a result of improvements in agricultural methods, the percent of farmworkers receiving assistance from the unemployment fund rose from 7.6 percent in 1953 to 12.6 percent in 1958. The duration of assistance has also increased markedly. A total of 1,500 students were registered during the winters of 1953–59.

Training allowances

Living allowances are available for trainees and their families, subject to a means test. The maximum basic allowance for the trainee himself is 410 kronor a month. Trainees also receive rental allowances and certain other family supplements, as well as reimbursement for travel expenses. A trainee may be eligible to receive full rent for the family dwelling plus 70–100 kronor for his rent if away from home. The family supplement maximum is 55 kronor a month if the trainee lives at home, 140 kronor if away from home, plus 45 kronor per child under the age of 16 years. An unemployed trainee covered by unemployment insurance may choose between the insurance benefits and the Labor Market Board allowances. If he chooses the insurance benefits, he receives in addition an hourly "wage" of 1 krona (about 200 kronor a month) which is otherwise included in the living allowance. If assigned a job by the employment office during his training, a trainee must agree to interrupt the course. However, members of beginners' and retraining courses usually complete their courses without a break. At the end of his training, a worker can be granted a loan equivalent to 1 month's training allowance to tide him over until he is employed.

FRANCE

The objectives of vocational training for adult workers in France, as in other countries, are both economic and social. Retraining was originally planned as a means of meeting emergencies—either severe unemployment or an urgent need for manpower. The law of November 9, 1946, provided for the establishment of occupational training centers to furnish accelerated training in a trade, retraining in a new occupation, or a higher level of proficiency in the same trade. Government-approved and subsidized centers may be of two types: (1) community centers run by associations, trade unions, employers, or public corporations and open to all candidates presented by the manpower services; and (2) special centers designed to meet only the needs of a particular industrial establishment.

Regional development legislation enacted on August 14, 1954, included provision for a fund for retraining those whose employment has been affected by the closing or partial shutdown of a plant, conversion of a plant to another activity, or the decentralization of a firm or expansion of its activities.

Functions of Government agencies

To maintain a picture of the current employment situation, the Labor and Manpower Division of the Ministry of Labor and Social Security (Ministre du Travail et de la Sécurité Sociale) analyzes monthly statistics on the number of those receiving unemployment benefits, the number of unfilled jobs, and placements by the employment service. Medium- and long-term employment forecasts are made by the Ministry and the General Commission for Planning.

The retraining program is administered, under the control of the Ministry of Labor and Social Security, by a managing board (Association Nationale Interprofessionelle pour la Formation Rationnelle de la Main d'Oeuvre) composed of six members from the Ministry, six employer members appointed by the National Council of French Employers, and six worker members appointed by the "most representative" trade unions. As well as supervising the operation of the training centers, the Ministry controls such matters as contracts for supplies over a certain amount and the appointment of directors of centers. Community centers are completely financed from the funds of the Ministry; all of the costs of equipment and administration of the special centers in individual firms are met by those firms, but the Ministry provides allowances for the trainees and contributes part of the cost of instructors' salaries.

Training programs under the 1946 law

The minimum age for admission to a training course is 17 and the maximum, with some exceptions, is 35. Applicants undergo physical examinations, aptitude tests, and personal interviews to determine their suitability for training. Courses normally last 23 weeks, although some in the metal trades and clothing industries are as long as 36 weeks and that for an electronic technician lasts 45 weeks.

It was estimated in 1960 that at least 200,000 persons had been trained since 1945. (Average unemployment during the year 1957 was 80,700.[7])

In November 1957, there were 130 Government centers teaching about 60 different trades. Eighty-nine of these centers were teaching construction trades, but 21 also taught courses in the metal trades or other occupations. There were nine centers devoted to the metal trades, and the others taught various subjects. Building trades courses reportedly will continue to predominate because of high labor turnover and because the apprenticeship system alone cannot keep pace with the demand. No information is available on a national basis on how many of the trainees remain in the trade they were taught. However, spot checks in the building trades revealed that among persons leaving the centers in one region between January 1951 and August 1956, 88 percent of the bricklayers, 80 percent of those who had been trained in reinforced concrete and plastering, and 72 percent of these in plumbing and heating were working in these respective occupations at the end of 1956. In another area, 92 percent of the building trades workers were working in the occupation which they had been taught.

Training allowances

Trainees commonly receive an allowance (1.22 to 1.49 francs per hour[8]) based on the number of hours spent in training and are reimbursed for daily traveling expenses (up to a maximum of 20 kilometers) or, if boarding at the center, for one round trip (if married, a round trip every 2 months). Trainees who live at a center receive free lodging; they eat at a canteen which is partially subsidized.

Training under the regional development law

The law of August 14, 1954, authorizing the Government to develop regional programs to promote "financial stability, economic expansion, and social progress" was implemented by a decree issued on September 14, 1954, which, among other things, created a manpower retraining fund administered by the Ministry of Labor and Social Security. Aid is available to firms which underwrite the training of their own personnel and to firms which train, in addition to their own workers, individuals who have been promised employment by other establishments. The Government pays the wages, totally or partially, including the social insurance charges, of trainees and instructors during the training period, as well as the costs of material and training equipment.

Enterprises requesting training funds must develop (1) a program which is distinguished by its breadth or content from the regular plant training programs and which constitutes a special financial burden and (2) a procedure of training under the supervision of the technical services of the Ministry. The amount of financial assistance to a firm is determined by the training taught, the trainee's level of proficiency at the beginning of the course, the level which the course attempts to attain, the extent to which the learner works on the job, and the local labor market situation.

Between January 1, 1955 (when the decree became effective), and the end of 1959, nearly 200 enterprises received aid from the Government. About 13,000 workers underwent retraining at an average cost per worker of 600 francs. Workers were most commonly retrained in mechanical skills and for occupations in the electrical, textile, chemical, and paper and cardboard box industries.

TRENDS

The limited amount of information available at the time this article was prepared did not permit a detailed evaluation of retraining programs in European countries nor of their potential applicability to the United States. However, the report of the European Productivity Agency on accelerated vocational training,[9] which summarizes the types of problems encountered in administering retraining programs and the directions that these programs are taking in Europe, may give some guidance to those occupied with retraining problems in the United States. In general, it appears that these countries are veering toward broader training for greater occupational mobility. Advanced training for skilled workers, courses in new occupations for which apprenticeship programs have not been set up, construction trades courses, and training of technicians in fields such as electronics and nuclear chemistry are all receiving heavy emphasis. All countries report the difficulties in obtaining up-to-date high quality equipment for training purposes and recruiting competent instructors for training centers, particularly those that are used only seasonally. As in this country, much thought is being given to such problems as the retraining and placing of elderly and disabled workers, the methods of adapting training and retraining to changes in the employment structure, and the coordination of programs of the training and the employment services.

TRIBUTE TO THE SATURDAY EVENING POST

Mr. CLARK. Mr. President, today marks an important milestone in the life of an old friend, an observer of the American scene for nearly 2½ centuries, the Saturday Evening Post, which today appears in a new design. Like the city of Philadelphia, where it is published, an honored aspect of our American heritage is being refurbished.

The changes which appear in the magazine today are not the first to have been made nor, in all likelihood, will they be the last. As the cover painting of today's issue by Norman Rockwell shows, the Post has gone through many changes as it sought to keep pace with—or slightly ahead of—the times. It has been this ability to change, to take on the problems of the times without sacrificing the experiences of the past that has made the Post into the hearty, durable publishing landmark that it is.

It has been a long time between 1729, when Benjamin Franklin brought forth the first issue of the Pennsylvania Gazette, and today, when the current editors of the Post unveiled their new design, but the Post wears its years gracefully. To the present editors, the historical greatness of the Saturday Evening Post is inspiring but incidental. What interests them most, as creative craftsmen and artists, is that the magazine has so often dominated the field during an existence of unparalleled length. It has established precedent after precedent in keeping pace with the electrifying expansion of America.

When Ben Hibbs took over the editorship of the Saturday Evening Post he wrote:

I believe firmly in the American system—freedom of living—freedom of enterprise.

On January 1 next year, Ben Hibbs will be succeeded as editor of the Saturday Evening Post by Robert Fuoss. Already the new editor has told us we need have no fear that the magazine will abandon any of the great principles established for it by his predecessors. But he has added a promise of his own and it seems to me that the excitement of the new Post may be found in that statement:

I think the people of this Nation, and especially the young people, are embarked on what I would call the greatest pilgrimage in history. What they are seeking is a simple thing: It's something better. It sends them to churches and night schools and to the arts. It makes them impatient with the trite and the banal. It makes them wonder if this Nation has not made a basic mistake in putting its emphasis on size and numbers instead of on quality and excellence.

The intellectual level of word and pictures in the big magazines is a level set by editors, not readers. There is no lid on the reader's head except the one that we have put there.

And we're taking that lid off at the Saturday Evening Post.

They are courageous words, and it is in that spirit of courage and hope that we salute the new Saturday Evening Post. All of us wish Mr. Fuoss the greatest success in upholding the high new standards he is setting for this splendid magazine.

TRIBUTE TO THE LATE SENATOR THOMAS C. HENNINGS, JR.

Mr. KEFAUVER. Mr. President, I make note of the fact that the late beloved Senator Tom Hennings passed away 1 year ago today.

I know that all Senators still appreciate, perhaps even more vividly than ever, the leadership and inspiration he gave us during his long and useful service as a Member of the U.S. Senate.

INFLATION

Mr. MILLER. Mr. President, in the September 13, 1961, issue of the Wall Street Journal appears an editorial entitled "Optimism Out of Place." The editorial points out very well that inflation danger is very great and very imminent. It also supports what I have been saying, particularly in connection with the proposed steel price increase, that neither the steel companies nor the wage earners should be blamed if they are being squeezed by inflation; that the responsibility rests with the Congress and the administration, particularly for promoting Federal spending programs which promote inflation, and which we know will surely follow from deficit spending. We have already seen such deficits for the past fiscal year and we shall see even more for the current fiscal year. I ask unanimous consent

that the editorial be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

OPTIMISM OUT OF PLACE

Since the Secretary of the Treasury is the man most directly concerned with the people's money, you might suppose he would be especially alert to the threats to that money. Secretary Dillon, however, goes to considerable lengths to pooh-pooh any danger of inflation—and in the process leaves some doubt as to how well that subject is presently understood in Washington.

In the Dillon view, the prospective $6 billion budget deficit this fiscal year, coming on top of a hefty deficit in the last period, is not inflationary. Why not? He explains: "In view of our high rate of unemployment and the unused plant capacity in nearly every industry, I see no present danger of inflation in the classic pattern of too many dollars chasing too few goods."

This strikes us as a somewhat strange assessment. Of course an inflation can be spurred by an excessive money supply coupled with a shortage of goods. But the essence of an inflation is the first part of the equation: Too much money. And that is what the policies of the Kennedy administration are calculated to create.

The kind of deficit financing being practiced has the effect of creating money where none existed before. The administration's bias toward artificially cheap money aggravates that effect. The fact that these policies have not yet been reflected in general price rises means nothing at all; inflation customarily takes some time to produce its evil results.

The important thing is that inflation is being created now, a pool of excessive money from which can flow, almost regardless of supply conditions, the wage-price spiral the administration professes to fear. As a harmful side effect, there is also being created an inflation psychology which can lead to speculative excesses in the stock and other markets.

All that adds up to a situation that is far from healthy, and no amount of official optimism will make it healthier. The responsibility for protecting the value of the dollar is the Government's and the Government's alone. The last thing the Nation needs to hear about inflation are Pollyanna words from Washington.

CIVIL RIGHTS

Mr. MILLER. Mr. President, in the September 13 issue of the Chicago Tribune appeared two excellent editorials which I believe should be brought to the attention of readers of the CONGRESSIONAL RECORD. The first relates to the programs set forth in the Democratic Party's platform regarding civil rights legislation. To accomplish those goals the platform would require executive orders and legal action brought by the Attorney General, legislation, and improved congressional procedures to safeguard majority rule. Above all, it would require "the strong, active, persuasive, and inventive leadership of the President of the United States."

We know that that leadership on legislation and proposed legislation has not been forthcoming in this session of the Congress.

I ask unanimous consent that the editorial be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE CIVIL RIGHTS BETRAYAL

The Senate's vote to continue the Civil Rights Commission without enlarging its powers provides another lesson in the dishonesty of political platforms and the men who pledge themselves to carry out the platform promises.

The Democrats last fall promised Negro citizens to do a great deal more than merely continue the Civil Rights Commission. The big hurrah at the end of the platform was wholly devoted to civil rights; more than three pages of the platform booklet were devoted to this vote-catching subject. Here are just a few of the promises that the Democratic Senate has now betrayed:

"The Attorney General should be empowered and directed to file civil injunction suits in Federal courts to prevent the denial of any civil rights on grounds of race, creed, or color. * * *

"The new Democratic administration will broaden the scope and strengthen the powers of the present (civil rights) Commission and make it permanent. Its functions will be to provide assistance to communities, industries, or individuals in the implementation of constitutional rights in education, housing, employment, transportation, and the administration of justice.

"To accomplish these goals will require Executive orders, legal action brought by the Attorney General, legislation, and improved congressional procedures to safeguard majority rule. Above all, it will require the strong, active, persuasive, and inventive leadership of the President of the United States."

These fine sentiments have now been forgotten. The Senate buried them, and others like them, one by one, when they were proposed in a series of amendments.

As for President Kennedy, he has been ruthless in exerting political pressure on Congress to do his bidding in other matters. He eagerly traded patronage and other favors for votes from reluctant Members for his foreign aid program and got what he regarded as a fairly satisfactory compromise, but he doesn't seem to have shown the promised strong, active, persuasive, and inventive leadership in the struggle for extending civil rights.

The Negroes and members of other minorities who voted for him in the belief that he was going to go all out in their behalf have a right to their resentment. He couldn't have won without their votes in some critical States like Illinois, but the action in the Senate shows that the men and women who did so much to elect him last November were the victims of a confidence game.

We aren't overlooking the parallel betrayal by some Republicans. All that can be said in their defense is that their platform was a good deal less florid and all-embracing in its promises and that the failure to enact the promised legislation is primarily a Democratic betrayal because the Democrats command large majorities in both Houses.

AGRICULTURAL SURPLUSES

Mr. MILLER. Mr. President, the second editorial in the Chicago Tribune is entitled "Here We Go Again." It points out, among other things in connection with agricultural surpluses, that there was 29 percent more surplus of dairy products on July 31 of this year than as of 1 year ago.

I ask unanimous consent that the editorial from the Chicago Tribune be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

HERE WE GO AGAIN

To conform with Federal Food and Drug Administration standards, the State department of agriculture has lowered the required minimum butterfat content of ice cream sold in Illinois from 12 to 10 percent, although there is nothing to prevent manufacturers from keeping the butterfat content higher than the minimum. In announcing the change, Ralph S. Bradley, State agriculture director, said he was clearly against it because it will result in an estimated additional 3 million pounds of butter on the already congested State market.

Mr. Bradley's concern about a butter surplus is commendable, for there is little doubt that a surplus of dairy products is building up again, reversing the downward trend of the last 2 years. However, Mr. Bradley, a Democrat who had a prominent role in President Kennedy's election campaign, should direct his protest not to the Food and Drug Administration, whose action will have a relatively negligible effect on the surplus, but to Orville L. Freeman, Secretary of Agriculture.

Milk production this year probably will rise more than 1 percent above the 122.9 billion pounds produced last year when there was certainly no shortage. In terms of milk equivalent, manufacturers' stocks of dairy products increased 2.4 billion pounds between January 1 and June 30, compared with an accumulation of 1.7 billion pounds in the same period a year ago. In addition to the sharp upturn in commericial inventories this year, Government purchases of dairy products under the price support program in the first 7 months have been equivalent to 5.3 billion pounds of milk, or 2.3 billion pounds above a year ago.

Volume of Government-owned stocks of surplus dairy products on July 31, not including those designated for sale or donation, was 29 percent above those of a year ago. On that date the surplus totaled 133 million pounds of butter, 34 million pounds of cheese, and 247 million pounds of nonfat dry milk. A year ago Government surplus stocks included only 34 million pounds of butter, no cheese, and 287 million pounds of nonfat dry milk.

Government purchases of surplus dairy products declined after price supports were lowered in 1958, and it is more than coincidence that the upturn in the surplus in the last year accompanied three increases in price supports. The first occurred a year ago this month. At that time, Congress, with the forthcoming election in mind, enacted a bill boosting price supports on butter, cheese, and nonfat dry milk, which President Eisenhower reluctantly signed into law.

This year Mr. Freeman has used his administrative powers to grant two additional price support increases on cheese and nonfat dry milk.

The present Federal program to support prices of manufacturing milk and cream has been in operation about 12 years. Net losses to the Government have amounted to well over $1 billion. In addition, more than $1 billion has been spent for dairy products used in foreign and domestic donations, transfer to the armed services and veterans' hospitals, and consumption under the special milk program for schools.

It is economic folly to raise price supports to levels that stimulate excessive production of commodities for which there is no real consumer demand at the higher price. Mr. Freeman could halt the surplus buildup by lowering supports, but he has demonstrated that taxpayers can expect no relief from him. Instead, they will be expected to provide

many more millions of dollars to buy and store the surpluses, and then to dispose of them through subsidized sales and giveaway programs, so that the Kennedy administration can further its scheme to control the economic destiny of American agriculture.

CORN PRODUCTION

Mr. MILLER. Mr. President, yesterday the Senator from New York [Mr. KEATING] pointed out that there have been sharp cutbacks in the estimates of savings to taxpayers as a result of Department of Agriculture estimates on corn production. In July we had one estimate of corn production; in August we had another, which was even greater; and in September we have an even greater one, so that the estimates that the taxpayers of the United States will be saved approximately $700 million as the result of reduced storage costs because of a decrease of 700 million bushels of corn have now been about cut in half.

The reason for this result has been the serious underestimates of corn production coming from the Department of Agriculture. For example, in Iowa it is now estimated that there will be a yield of 73 bushels an acre—an alltime high. While this yield is attributable considerably to excellent weather conditions, the fact is that estimates of how much this agricultural program will save taxpayers should be recognized for what they are. They are nothing but hopeful estimates and they are quickly diminishing in their scope.

I ask unanimous consent that an article from the Des Moines Register of September 12 relating to the corn yield be printed in the RECORD at this point.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

SEE CORN HIGH OF 73 BUSHELS

(By Don Muhm)

Iowa farmers are going to topple a trio of significant corn and soybean marks this fall.

An alltime State average of 73 bushels of corn per acre has been predicted.

Then, there is the prospect of another alltime per-acre yield seen for soybeans (29 bushels), plus the greatest (102,022,000 bushels) crop in the State's history.

ADDED LUSTER

The already bright crop prospects took on added luster Monday as Iowa Crop and Livestock Reporting Service officials once again raised estimates.

An Iowa corn crop of 737,154,000 bushels was predicted, as the per-acre average was raised from last month's estimate of 69 bushels per acre to the new record high of 73 bushels.

Iowa farmers' progress in corn growing is illustrated by the fact the State average yield back in 1924 was a mere 28 bushels per acre. Not until 1942 did Iowans top the 60-bushel mark. The previous record average yield was 66 bushels per acre in 1958.

This is the State's third greatest corn crop, and a whopper considering Iowa farmers retired nearly 3 million feed-grain acres from production this season.

One of the best summers for farmers in history thwarted chances for a big reduction in Iowa corn production under the new emergency feed grain program.

FIVE-PERCENT DROP

So the 1961 corn crop is estimated to be only 5 percent less than that of a year ago, and 7 percent smaller than the alltime record (789,035,000 bushels) of 1959.

But there is little question that the fact 108,000 Iowa farmers retired land from production reduced the State's crop by about 200 million bushels.

Nationally, the estimates indicate about 372 million fewer bushels of corn this fall compared to a year ago with U.S. production predicated at 3,519 million bushels.

Only Illinois (76 bushels) and Indiana (74 bushels) lead Iowa in the average per-acre yield columns.

But Iowa, of course, is the national leader in total production—outranking second-place Illinois by more than a million bushels.

TOPPED ON SOYBEANS

Those same two States also top Iowa in the soybean yield category, with Illinois' estimate of a 30-bushel crop and 165 million bushels best in the Nation.

Iowa will rank second in soybean production, with its new record average yield of 29 bushels per acre and a crop of 102,022,000 bushels.

The previous Iowa high was in 1958 when nearly 80 million bushels were harvested. The former average yield record came in 1957 when the per-acre mark was 27 bushels.

The soybean crop for the United States is estimated at 720,356,000 bushels, about 30 million bushels short of being twice as large as the 10-year average for this crop.

The Iowa soybean production is 51 percent greater than last year's crop, and 96 percent above the State's 1950–59 average.

PRICE PROPS UP

This increase can be traced in part to the 1961 boost in soybean support prices by 45 cents a bushel up to $2.30.

No change was indicated in the size of Iowa's 1961 oats crop (143 million bushels), nor the State's estimate of hay production.

WELFARE AND GROWTH

Mr. MILLER. Mr. President, in the Washington Post of Sunday, September 10, the lead editorial entitled "Welfare Outruns Growth" points out that we cannot have all types of welfare programs while our economic growth is not increasing rapidly enough to sustain them.

As I have pointed out many times on the floor of the Senate, it is about time that we faced the fact that we must sacrifice something. The reaction to suggestions that some of the Federal spending programs that have been presented to us be cut back or eliminated has been that we cannot afford to sacrifice those programs.

Mr. President, this lead editorial from the Washington Post well points up that we cannot do everything all at once. I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

WELFARE OUTRUNS GROWTH

The administration has promised more rapid economic growth. At the same time it has argued the case for higher welfare expenditures. When the President presented his program last winter, proposals for growth and for welfare seemed to be fairly evenly balanced. What has become of this balance at the hands of Congress?

It is sadly apparent that growth has fared a lot worse than has welfare. Not all programs and laws, to be sure, fit neatly into this classification. But it is remarkable how many of them do, and the count is not cheering. The President's program contained two major growth proposals. One was the tax reform, centering upon an investment credit. This would have encouraged an increase in plant and equipment expenditures for modernization and expansion. The Congress first reduced the size of this credit, and eventually put the entire legislation over until next year. The other was the series of bills to aid education. Investment in education has been ranked as probably the most important longrun stimulus to growth by the Eckstein report prepared in 1959 for the Joint Economic Committee. Aid to education largely if not totally failed of enactment. This is particularly deplorable because investment in human beings takes a long time to mature. Even if something substantial is enacted next year, some young people will have suffered an irretrievable loss. The vocational training bill meanwhile has also been defeated.

Other new proposals involving growth fortunately have done better. The depressed areas program, as well as modest increases in the highway program and in national resources development, will help growth. Legislation on water pollution will improve community facilities, as will airport grants, assuming the bill passes. Expenditures for space exploration should provide some spillover of research into the earthbound sector of the economy. Most of these items, however, are quantitatively not very important.

In terms of money, the enlarged housing program is probably much the largest of the new growth expenditures. But housing generates less GNP, per dollar of capital invested, than almost any other investment expenditure. Housing expenditures are growth oriented, but less effectively so than most others.

The list of welfare measures is more impressive. Some of these were made necessary by the recession, such as temporary unemployment compensation and aid to dependent children. Others were unrelated to the recession, such as enhanced social security benefits, aid to agriculture, and the minimum wage law. Of major welfare proposals, only enlarged medical aid to the aged has failed of enactment.

It is clear that the Nation cannot do everything at once. Particularly at a time of sharply rising military expenditures, some other desirable items can and should be postponed. But this year's legislative experience suggests that welfare programs may have greater political appeal and smoother political sailing than growth programs. If that is the case, the administration may find it advisable to weigh next year's proposals more decisively in favor of growth, in the expectation that they will suffer attrition as they go through the political process.

NITZE ADDRESS ON BERLIN

Mr. MILLER. Mr. President, in the New York Times, issue of September 8, appeared an excerpt from a very excellent speech by Mr. Paul Nitze, special adviser to the President, regarding our position and strategies with respect to the cold war against the Communist world. I agree with practically everything that Mr. Nitze has expressed in his excellent statement except for the emphasis given to conventional warfare. But there are many other points in Mr. Nitze's speech which are sound and with which I agree.

I ask unanimous consent that the excerpts from the speech as contained in an article in the New York Times be printed at this point in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

EXCERPTS FROM NITZE SPEECH ON BERLIN

WASHINGTON, September 7.—Following are excerpts from a speech today by Paul H. Nitze, Assistant Secretary of Defense for International Security Affairs, to the Association of the U.S. Army, on military policy in the Berlin crisis:

"Berlin is the focus of a larger problem. Our capacities to meet the Berlin situation extend beyond the confines of the city and its access routes. I was reminded of this during the recent negotiations at Geneva over the problem of Laos. To emphasize his argument, Mr. Andrei A. Gromyko, the Soviet Foreign Minister, repeatedly pointed at a map of Laos marked to show territories said to be held by the different forces, saying, 'Just look at the map.'

"The question was not what one would see on that map, but whether that map was the right one. Was it big enough? Mr. Gromyko wished us to center attention on a map restricted to an area of preponderant advantage to the Communists—not on a bigger map showing our respective strengths on a global scale.

"The point is that we can offset a local preponderance of Communist strength by a determination to apply Western strength on terms other than those selected by the Soviet. Soviet tanks across the Autobahn to Berlin would interpose at only one of the many points throughout the world where the important or vital interests of the Soviet Empire are vulnerable.

"In meeting the Berlin or other Communist challenges, general nuclear war should not be our only recourse. But let me be very clear: we must first have nuclear striking power before our other capacities to meet these challenges can be effective.

"DETERRENT POWER INCREASED

"Thus, one of the first tasks to which this administration addressed itself was the strengthening of our nuclear deterrent capabilities both for the immediate future and the longer range future.

"To achieve this the United States took a series of measures. First, we moved to improve our missile deterrent by emphasizing hidden, moving, or invulnerable delivery systems. We accelerated the program for building of the Polaris submarine force. We expanded the development of the solid-fuel Minuteman. We are developing improved air-to-ground missiles, such as the Skybolt.

"Second, to protect our existing bomber forces for their nuclear deterrent role, we have increased our ground and airborne alert capacities and are working to install bomb alarm detectors and signals at key warning and communications points and all SAC (Strategic Air Command) bases.

"Third, we are constructing and improving our continental defense and warning systems, such as BMEWS (ballistic missile early warning system) and the satellite-borne Midas system to add precious additional minutes to our warning of an attack.

"Fourth, we are examining with care the problem—organizational and technical—of command and control of nuclear weapons to assure that the decision to use such weapons can be responsibly exercised under the authority of the President and to minimize the risks of triggering war by accident or miscalculation.

"Fifth, as an insurance policy to mitigate devastation of our population should there be a nuclear war, we are seriously undertaking a program of civilian defense.

"Finally, in spite of the Soviet resumption of nuclear tests, we shall still strongly support sensible proposals for achievement of responsible arms control.

"If a strong nuclear force were all we had to meet Communist challenges, a situation of superior local Communist strength might force on us the alternatives of either national humiliation or all-out war. For this reason, the second goal of the administration is to strengthen and expand the intermediate options in terms of military force.

"ARMY'S ROLE STRESSED

"In these intermediate options the U.S. Army plays a vital role. Our ability to respond to challenges with increased levels of force short of all-out war has been neglected in the past. We are doing our best to make the necessary adjustments.

"The increases in conventional capability will strengthen, and not weaken, our policy of deterring war. For the ability to commit forces in the intermediate range makes more credible to the U.S.S.R. the certain prospect that we will back our nonnuclear forces by the use of our strategic capabilities should that be necessary.

"In summary, first, we have great nuclear capabilities. We are not particularly impressed with the Soviet threat to develop nuclear weapons in the 100-megaton range. We are not interested in arms of a terroristic nature, but rather our nuclear capability is tailored to specific tasks.

"We have a tremendous variety of warheads which gives us the flexibility we require to conduct nuclear actions from the level of large-scale destruction down to mere demolition work. I could not, of course, give specific numbers, but I can say that the number of nuclear delivery vehicles of all types which the United States possesses provides the flexibility for virtually all modes and levels of warfare.

"Second, at the same time, we have a growing nonnuclear capability with a large growth potential. The economic base represented by the United States and our Western European allies far outdistances that of the Communist bloc.

"But to apply it to the development of enough conventional military power to offset fully the Communist conventional power will require determination, will, and sacrifice. I can only assure you that as these are called for by developments, the administration will ask for them in the full confidence that the American people will respond as they always have when their leaders lay great issues before them, and that our Allies will do their share."

MASSACHUSETTS COLLEGE RECORD

Mr. SALTONSTALL. Mr. President, all across the Nation young people are packing their bags this week and are leaving their homes for another year at college.

This is a significant thing in the life of our Nation. We may stand or fall in the future on the basis of the educational level of our people. Young people leaving their homes to acquire knowledge are rendering just as vital a service to their country as the young men and women leaving their homes for duty in the Armed Forces.

I am particularly proud, Mr. President, to note the record of the young people of Massachusetts in the colleges of the country.

According to a New York Times survey, 31.3 percent of the young people of Massachusetts between the ages of 18 and 24 are enrolled in a college. This is a remarkable record. It is surpassed only by the young people of the States of Utah and California. This percentage is substantially higher than the national average, which appears to be less than 25 percent.

Some of the finest colleges and universities in the world are located in Massachusetts, Mr. President. I am particularly pleased to note that our young people are taking full advantage of the wonderful facilities which are so close at hand.

NORTH CAROLINA'S FIRST INTERNATIONAL TRADE FAIR

Mr. JORDAN. Mr. President, at a time when our position is so critical in world affairs, I would like to call to the attention of the Congress an event which will take place soon in North Carolina.

On October 12, President Kennedy is scheduled to open North Carolina's first international trade fair. This is a first for North Carolina. It is also a first for the United States, because it is the first such event to be sponsored by a State government.

As part of Governor Sanford's program to keep North Carolina "on the go," the trade fair will bring together buyers and sellers from all over the world to see firsthand the products and technology of North Carolina's industry, research, and education.

The trade fair will take place in the vast facilities of the new coliseum and merchandise mart in Charlotte. As Governor Sanford has stated, the North Carolina Trade Fair will be a mammoth showcase for our State's products. The hundreds of exhibits will include a complete cross section of our productivity, all the way from rockets to rocking chairs.

We in North Carolina are proud of the progress we are making, and we want people from not only other areas of the United States but also from all over the world to come and see for themselves what we are doing and what we have the potential to do.

A great deal of work has been done in making plans for this very important event in our State. Teams of North Carolina businessmen, at their own expense, have traveled to many areas of the world and extended invitations to government officials, business leaders, and industrial leaders. And this week, Governor Sanford is in Mexico extending to the President of the Republic of Mexico a personal invitation to attend the North Carolina trade fair.

At the trade fair, the thousands of visitors from out of State and from foreign nations will get excellent samplings of our expanding economy's products. But we want them to see more, too. Special teams of interpreters will be on hand for foreign visitors, and a pool of privately owned airplanes will be on the spot to take visitors to the plants where the products on exhibit are actually manufactured.

Mr. President, I would like to say to my colleagues in the Senate, and to the world, that North Carolina is "on the go," and I know that those who visit the trade fair in October will agree.

Mr. ERVIN. Mr. President, will the Senator yield?

Mr. JORDAN. I yield.

Mr. ERVIN. I wish to commend my colleague for calling this trade fair to the attention of the Senate, and to associate myself with the remarks which he has made on the subject.

Mr. JORDAN. I appreciate very much the Senator's remarks, because he is thoroughly familiar with the situation. It will be a great event.

TRIBUTE TO SENATOR RUSSELL—CREATION OF NATIONAL PEANUT RESEARCH CENTER

Mr. TALMADGE. Mr. President, perhaps no single action taken by this 1st session of the 87th Congress will be of more eventual benefit to the farmers and consumers of America than its creation of a National Peanut Research Center to be located at Dawson, Ga.

The major credit for this long-needed facility belongs to my beloved and respected senior colleague [Mr. RUSSELL] and appropriate tribute to his role in the matter was paid to him in the September issue of the Peanut Journal of Suffolk, Va. An article by Hon. S. R. Baxley, chairman of the board of directors of the National Peanut Council, quotes in full an eloquent statement by Hon. Stephen Pace, Sr., of Americus, Ga., who himself—as a private citizen, as Congressman from the Third District of Georgia and as a member of the House Agriculture Committee—has made many invaluable contributions to the advancement of American agriculture.

The junior Senator from Georgia is pleased to associate himself with the statements of Messrs. Baxley and Pace. I ask unanimous consent, Mr. President, that the text of Mr. Baxley's article, entitled "Congress and President Authorize National Peanut Research Center," be printed herewith in the body of the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CONGRESS AND PRESIDENT AUTHORIZE NATIONAL PEANUT RESEARCH CENTER

(By S. R. Baxley, chairman, board of directors, National Peanut Council)

To convey the message contained in this article I asked the general counsel of the Southeastern Peanut Association, Stephen Pace, for his assistance. Not only in his tribute to Senator RUSSELL, but in his appeal to continue our united approval and support of the National Peanut Research Center, his remarks are important to all of us.

The research center has been authorized by Congress and by President Kennedy. That is a great bit of progress. And yet, there is much vital work to be done. I, too, want to appeal to the peanut industry to stand solidly behind our leaders who are working to make this project a reality.

The day that the doors of this great laboratory are opened will be the time for acclamations. It is for us now to discourage any attempt to place selfish purposes ahead of our one great goal. There must be no contention within our ranks. We must have persistent unity. That has brought the project this far and it will bring it to final realization. We must stand together to insure success.

It is my hope that the following statement by Mr. Pace will be as enjoyable and inspiring to you as it has been to me:

"In a certain epistle you will find this question:

" 'By different methods different men excel;

" 'But where is he who can do all things well?'

"He's in Washington. He went there—as a young man—as the junior U.S. Senator from Georgia. He has served continuously since, and is there today as senior Senator. As the representative of a great agricultural State he has, throughout the years, sought and served the best interest of the farm people of the Nation. For them, for their welfare, and for that great segment of American industry which buys, handles, and processes the products of the farm, he has done 'all things' and 'all things well.'

"He is Senator RICHARD B. RUSSELL.

"To him there goes today 'such thanks as fits a king's remembrance' from every segment of the peanut industry. From the men and women who work in the fields in the sun to produce an average of 800,000 tons of peanuts each year. From the warehousemen who store them. From the shellers who buy, shell, sell, and ship them. From the manufacturers who process them into the finest, most delectable and health-giving food items on the American market.

"For to him must go the full credit for securing from the Congress, and the approval of the President, the authority for the establishment of a National Peanut Research Center.

"In this effort, Senator RUSSELL had the unanimous approval and support of the peanut industry. That may be rare, but 'where they do agree their unanimity is wonderful.' Let us hope that this concert of action, this harmony of views, this demonstration of success through general accord, will be followed throughout the industry by a great bringing together of all segments, of more sympathetic consideration and treatment by each of the positions and problems of the others, and the development of a policy and program of peace, progress, and prosperity.

"At the last convention of the National Peanut Council it was said that 'the establishment of this National Peanut Research Center will mean the dawn of a new day for the entire peanut industry; will result in the great improvement of the peanut from the field to the factory; will make the peanut and its products more attractive in taste, flavor, and quality; and will lead to great expansion of their use and markets.'

"That is common ground on which we can all stand. That is the road up the mountainside which we can all walk together, hand in hand. That is the summit we all seek. That is the pinnacle toward which we should now turn our eyes, our thoughts, our combined efforts.

"Shall we try?

" 'The fortunate is he whose earnest purpose never swerves;
Whose slightest action or inaction serves the one great aim.
Why, even death stands still, and waits an hour sometimes for such a will.' "

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7371) making appropriations for the Departments of State and Justice, the Judiciary, and related agencies for the fiscal year ending June 30, 1962, and for other purposes; that the House receded from its disagreement to the amendments of the Senate numbered 20, 21, 24, and 26 to the bill and concurred therein, and that the House receded from its disagreement to the amendment of the Senate numbered 25 to the bill and concurred therein with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had passed a bill (H.R. 9076) making appropriations for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority and certain study commissions, for the fiscal year ending June 30, 1962, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED

The message further announced that the Speaker pro tempore had affixed his signature to the following enrolled bills, and they were signed by the Acting President pro tempore:

S. 1317. An act to change the designation of that portion of the Hawaii National Park on the island of Hawaii, in the State of Hawaii, to the Hawaii Volcanoes National Park, and for other purposes; and

H.R. 7035. An act making appropriations for the Departments of Labor, and Health, Education, and Welfare, and related agencies, for the fiscal year ending June 30, 1962, and for other purposes.

HOUSE BILL REFERRED

The bill (H.R. 9076) making appropriations for civil functions administered by the Department of the Army, certain agencies of the Department of the Interior, the Atomic Energy Commission, the Tennessee Valley Authority, and certain study commissions, for the fiscal year ending June 30, 1962, and for other purposes, was read twice by its title, and referred to the Committee on Appropriations.

AMENDMENT OF LAW RELATING TO INDECENT PUBLICATIONS IN DISTRICT OF COLUMBIA

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its disagreement to the amendment of the Senate to the bill (H.R. 4670) to amend the law relating to indecent publications in the District of Columbia, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. BIBLE. I move that the Senate insist upon its amendment and agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. HARTKE, Mr. SMITH of Massachusetts, and Mr. MILLER conferees on the part of the Senate.

OUR NATION'S FINANCIAL POSITION

Mr. BYRD of Virginia. Mr. President, military preparedness by the United States—efficient and invincible—today is vital to freedom in the world. This cannot be denied.

The force of our military might, the strength of our international relations, as well as our domestic stability, depend upon the solvency of our fiscal policy.

As we stand:

There have been 25 Federal deficits in the past 31 years; and there will be another deficit this year.

The Federal debt is approaching $300 billion; it is already beyond the World War II peak.

The purchasing power of the dollar is now 46.6 cents as compared with 100-cent dollars in 1939; and there is imminent danger of increasing inflation.

The deficit in our balance of payments with foreign countries continues; our gold supply is now less than it was at the beginning of World War II.

Our fiscal position is vulnerable, and Khrushchev knows it. This is a prime target in the strategy and tactics of the cold war he is waging against us.

The Federal fiscal policy urgently needs constant and critical review—no less than our military status, our foreign policy, and the Government's participation in domestic-civilian programs.

For this reason, with assistance of my staff, I have made an intensive study of current and recent trends in the ever-increasing programs and cost of the Federal Government.

This study emphasizes three significant facts:

First. Federal spending programs grow and grow; they are seldom if ever curtailed, and are rarely allowed to expire even when the need has passed;

Second. The public generally thinks of Federal spending in terms of the regular budget; nearly 25 percent of Federal expenditures this year will be through so-called Federal trust funds outside of the regular budget; and

Third. The big increases in Federal spending in the recent past, the present, and the future, have been, are and—short of war—will be in domestic-civilian programs; not defense or foreign aid. These programs are financed through both the regular budget and trust funds.

In this study I have confined myself almost exclusively to actual figures, official budget estimates and projections, and administration recommendations and actions.

FEDERAL EXPENDITURES, FISCAL YEAR 1965

From the study, without evaluating the need or desirability of the expenditures at this time, I have attempted to project the level of Federal spending 4 years hence in fiscal year 1965.

Assuming substantial adoption of current spending proposals, I do not hesitate to predict Federal expenditures—through both regular and trust fund budgets—in fiscal year 1965 totaling approximately $137 billion, as a minimum.

This total would include approximately $106 billion in expenditures through the regular budget, and approximately $31 billion through trust fund budgets.

I ask unanimous consent to have inserted in the RECORD at this point in my remarks three tables showing projected expenditures for fiscal year 1965 in more detail, and compared with actual figures for the past fiscal year 1961 and latest estimates for the present fiscal year 1962.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

Federal expenditures, regular budget, fiscal years 1961, 1962, and 1965

[In billions of dollars]

Category	Actual, 1961	Official budget estimate, 1962	Byrd projection, 1965 [1]
National security	45.9	49.2	53.0
Foreign aid and international affairs	3.7	4.6	5.5
Total, other than domestic-civilian	49.7	53.8	58.5
Domestic-civilian:			
Veterans services and benefits	5.3	5.3	5.5
Labor and welfare	4.9	6.1	12.2
Agriculture and agricultural resources	5.5	5.7	6.0
Natural resources	2.0	2.2	2.9
Commerce, housing, and space technology	3.9	4.4	7.5
General government	1.9	2.1	2.3
Interest	9.1	8.7	9.5
Allowance for contingencies	----	.1	1.6
Total, domestic-civilian	32.5	34.6	47.5
Grand total	82.2	88.4	106.0
Deduct interfund transactions	−.6	−.7	----
Total (exclusive of trust fund expenditures)	81.5	87.7	106.0

[1] Assuming conditions short of war.

Federal expenditures, trust fund budgets, fiscal years 1961, 1962, and 1965

[In billions of dollars]

Trust fund	Actual, 1961	Official budget estimate, 1962	Byrd projection, 1965 [1]
Social security:			
OASI and disability	12.5	14.8	17.0
Unemployment	4.7	4.2	6.0
Highways	2.6	3.2	3.5
FNMA secondary market operations (net)	----	.7	.7
Other	3.4	3.8	4.0
Total, trust fund expenditures	23.2	26.7	31.2

[1] Assuming conditions short of war.

The projected expenditures for fiscal year 1965 through both the regular budget and trust funds are combined, and summarized in major categories (with 1961 and 1962 comparisons), as follows:

Total Federal expenditures, fiscal years 1961, 1962, and 1965

[In billions of dollars]

Category	Actual, 1961	Official budget estimate, 1962	Byrd projection, 1965 [1]
National security:			
Regular budget	45.9	49.2	53.0
Trust fund budgets	(2)	(2)	(2)
Subtotal	45.9	49.2	53.0

[1] Assuming conditions short of war.
[2] Less than $50,000,000.

Total Federal expenditures, fiscal years 1961, 1962, and 1965—Continued

[In billions of dollars]

Category	Actual, 1961	Official budget estimate, 1962	Byrd projection, 1965 [1]
Foreign aid and international affairs:			
Regular budget	3.7	4.6	5.5
Trust fund budgets	.2	.4	.4
Subtotal	3.9	5.0	5.9
Domestic-civilian:			
Regular budget [3]	31.9	33.9	47.5
Trust fund budgets	23.0	26.3	30.8
Subtotal	54.9	60.2	78.3
Total:			
Regular budget [3]	81.5	87.7	106.0
Trust fund budgets	23.2	26.7	31.2
Total	104.7	114.4	137.2

[3] Interfund transactions deducted: $600,000,000 in fiscal year 1961, and $700,000,000 in fiscal year 1962.

Mr. BYRD of Virginia. These figures show sharp expenditure increases in domestic-civilian programs; they have increased every year since the Korean war; they have already doubled since fiscal year 1954.

Critical reassessment of Federal participation in domestic-civilian programs is urgent if we are to maintain a solvent fiscal policy as the basis of our strength to meet existing world tensions.

REGULAR BUDGET DEFICIT FOR 1961

The 1961 figures as cited are actual for the year which ended last June 30, as officially published jointly by the Treasury Department and the Bureau of the Budget.

The opening estimate for that fiscal year showed a surplus of $4.2 billion; the year closed with a deficit of $3.9 billion. This was a deterioration of $8.1 billion for the year.

REGULAR BUDGET DEFICIT FOR 1962

The figures for the current fiscal year, 1962, are the latest estimates by the Bureau of the Budget. The 1962 deficit is now estimated by the Budget Director at $5.3 billion.

This is an early estimate for the current fiscal year. I predict the 1962 deficit will be $8 to $10 billion, and I suspect it will be closer to $10 billion.

PROJECTION FOR 1965

The combined deficits for fiscal years 1961 and 1962 may reach $12 to $14 billion. The rise in expenditures in these 2 years—especially in domestic-civilian categories—demonstrates the trend.

The 1965 calculations are my own, but they are sustained by a Budget Bureau projection as of January 18, 1961, which is higher. They represent experience and careful study of 25 messages and communications by the President to Congress between January 20 and July 26, 1961.

These 25 messages and communications contain at least 175 reports of actions already taken, recommendations, and promises, which involve increased Federal spending or use of Federal credit.

The cost of some of the actions, proposals, and promises was indicated, but many of the references were vague and open end as to their ultimate magnitude, duration, and expense.

However, there is no doubt that, by fiscal year 1965, each of the instances used in the calculations certainly or probably would increase Federal expenditures or use of Federal credit.

The 175 actions reported as taken, recommendations submitted, and promises made in the 25 messages and communications are summarized as follows: 129 for regular budget expenditure increases in domestic-civilian programs and activities; 16 for trust fund expenditure increases in domestic-civilian programs and activities—outside of the regular budget; 9 for regular budget expenditure increases in foreign aid and international relations programs and activities; and 21 for regular budget expenditure increases in military programs and activities.

These actions, recommendations, and promises are listed and documented in annex 1, which I ask to have published in the RECORD at the end of these remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See annex 1.)

Mr. BYRD of Virginia. Mr. President, tremendous expansion of Federal participation and spending in domestic-civilian programs was the order of the day in Presidential messages and communications prior to the Berlin crisis.

Fiscal stability is a vital element of military preparedness, but the administration has suggested no curtailment of domestic-civilian activities before or since the military buildup was accelerated.

Pressure continues on increasing Federal expenditures for housing, urban renewal, public assistance, public education, health, water resources, river basin development, and so forth.

Huge spending is contemplated in such new programs as space, moon and ocean exploration, depressed area redevelopment, retraining the jobless, and so forth.

More Federal spending programs are being formed in current studies on surface and mass transportation, acquisition and development of open spaces, and so forth.

New programs for grants to States and payments to individuals and institutions would be added for public assistance, health, agriculture, higher education, and so forth.

Orders were issued for speedup in public works already underway; and accelerated planning for public works projects of the future was directed.

There would be vast increases in trust fund expenditures, outside of the regular budget, for unemployment and aged health insurance, social security recipients, and continuing increases for highways—for both Interstate and ABC Systems.

Virtually no area of domestic-civilian activity by the Federal Government has been overlooked in Presidential message proposals for increased spending.

Expansion of foreign aid programs, including the new Peace Corps; and the military buildup, with renewed emphasis on civil defense, are in addition.

Assuming substantial enactment of the administration's proposals to date, I have been told that my projections for both regular budget and trust fund expenditures in 1965 are conservative.

Perhaps I have underestimated the 1965 level. Under present policy and attitudes, other competent forecasts and predictions tend to indicate even higher Federal expenditures within 4 years.

Representative CLARENCE CANNON, chairman of the House Appropriations Committee, says regular budget expenditures will reach $100 billion "in a couple of years." His statement may be found on page 16070 of the CONGRESSIONAL RECORD for August 16, 1961.

The Bureau of the Budget, on January 18, 1961, officially projected regular Federal budget spending into fiscal years 1965 and 1970. The projections were at three levels—low, medium, and high.

Each of the levels assumed a different set of Washington policies and public attitudes with respect to Federal programs and spending. The Bureau's high level projection for 1965 was $109.2 billion.

Policy and attitudes in Washington today, with respect to domestic-civilian spending, are remarkably similar to the assumptions used by the Bureau of the Budget in its high level projection.

I ask unanimous consent to insert in the RECORD at this point in my remarks a categorical breakdown comparing my regular Federal budget projection for fiscal year 1965 with the Budget Bureau's January 18 high level projection for the same year.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Regular Federal budget expenditure projections, fiscal year 1965

[In billions of dollars]

Category	Budget Bureau high projection, 1965	Byrd calculation, 1965
National security	46.8	53.0
Foreign aid and international affairs	5.4	5.5
Total, other than domestic-civilian	52.2	58.5
Domestic-civilian:		
Veterans' services and benefits	7.6	5.5
Labor and welfare	15.8	12.2
Agriculture and agricultural resources	6.0	6.0
Natural resources	2.9	2.9
Commerce, housing, and space technology	9.6	7.5
General government	2.4	2.3
Interest	9.8	9.5
Allowance for contingencies	3.0	1.6
Total, domestic-civilian	57.1	47.5
Grand total	109.2	106.0

FISCAL POLICY

Mr. BYRD of Virginia. Mr. President, indefinite deficit financing of vast increases in both nondefense and defense expenditures at the same time will create uncontrollable inflation and reopen the run on our gold. These are elements of weakness.

To date the administration appears to rely heavily on a high rise in so-called gross national product to produce the increase in Federal receipts needed to meet its increase in Federal expenditures.

While waiting for revenue from increased gross national product to catch up with Federal expenditures, the administration holds that the budget need be balanced only "over the years of a business cycle."

The validity of such a fiscal policy would be little better than an academic pipedream, and it could be used to justify dangerous fiscal irresponsibility.

BUSINESS CYCLE BALANCE

The President, in his message of March 24 on "Budget and Fiscal Policy"—page 1—said in part:

> The Federal budget should, apart from any threat to national security, be in balance over the years of a business cycle—running a deficit in years of recession when revenues decline and the economy needs the stimulus of additional expenditures—and running a surplus in years of prosperity, thus curbing inflation, reducing the debt, and freeing funds for private investment.

This does not work in practice. Since the Korean war ended, the Federal budget has been balanced three times with combined surpluses of $4.4 billion; and there have been five deficits totaling $26.4 billion.

In the 8 fiscal years since the Korean war, the net Federal deficit was some $22 billion; and the Federal debt—round figures—was increased $23 billion, from $266 billion to $289 billion.

Perhaps the 8 years since the Korean war do not constitute the period of a business cycle; the term is difficult to fix, and the President did not attempt to do it.

Whatever the duration of a "business cycle" may be, it is difficult to find periods of 3 to 10 years in recent history over which the Federal budget was balanced, or the Federal debt reduced.

Using periods of 3 to 10 years, there could be 52 cycles in 12 years. In 52 such cycles over 1950 to 1961, inclusive, a net surplus is found in only one 3-year period, and Federal debt was reduced in only one.

There was a 3-year-cycle surplus of $400 million in the 1956–58 period, and there was a net reduction of $600 million in the Federal debt during the 1955–57 cycle.

The actual Federal fiscal situations by cycles of 3 to 10 years over the 12-year period 1950 to 1961, inclusive, are shown in annex 2, which I ask unanimous consent to have printed in the RECORD at the end of these remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See annex 2.)

GROSS NATIONAL PRODUCT

Mr. BYRD of Virginia. The so-called gross national product has been moving continually upward, but generally it has not produced revenue sufficient to keep pace with the rising level of Federal expenditures.

Over the calendar year period 1954–60, inclusive, the so-called gross national

product increased $141.3 billion—from $363.1 billion to $504.4 billion.

Federal tax rates applicable over the period were changed very little. Regular budget Federal revenue rose to a high of $77.8 billion; but Federal expenditures were increased to a post-World War II peak of $81.5 billion.

Over the period 1954 to 1961, inclusive, in response to administration requests, the statutory limit on the Federal debt was raised eight times. Three of these increases were within one 16-month period.

The latest request was made in June of this year. The administration requested that the debt limit be raised to $298 billion. The debt, as of the most recent Treasury report, stands at approximately $293.5 billion.

Short of war, the debt will continue its rise in the current fiscal year, and when the year ends next June 30 the Nation's debt will be at its highest year-end peak in history.

CONCLUSION

Rising gross national product notwithstanding, continued Federal deficits, debt, inflation, and loss of gold in the United States do not stimulate the confidence of our allies or neutral nations.

I doubt that the Federal budget will be balanced in the foreseeable future unless the rate of increase in expenditures indicated by present proposals is prudently and effectively curtailed.

As chairman of the Senate Finance Committee, I do not see how Federal tax rates can be increased substantially. The point of diminishing returns has already been reached in some areas.

Our ability to pay for invincible military power required for the crucial period which is here and ahead depends upon the action we are willing to take to maintain fiscal solvency.

If we are unwilling to forego nonessential and postponable Federal expenditures to meet the situation which confronts us, it is appropriate that we should ask ourselves these questions:

First. How long can the Federal Government continue to spend, tax, and borrow at the present rate?

Second. Are we on a permanent deficit basis?

Third. When will the breaking point come?

Deficit spending increases public debt. This, accompanied by increasing wages without commensurate increase in productivity, means more and more inflation. We now have both.

In 20 years we have lost more than 50 percent of the purchasing power of the dollar. Let us, in all seriousness, ask ourselves:

How disastrous will it be if we continue inflation-breeding policies—which appear to be on the increase—when our concern should be for return to fiscal responsibility?

ANNEX 1

FEDERAL EXPENDITURE INCREASES

Actions announced, recommendations submitted, and promises made in 25 Presidential messages and communications—between January 20 and July 26, 1961—which certainly or probably would increase Federal expenditures or use of Federal credit in fiscal year 1961, in subsequent fiscal years—or both—are paraphrased and listed as follows:

DOMESTIC-CIVILIAN—REGULAR BUDGET

February 2 message—Program to restore momentum to American economy

1. Page 5: Reduction in interest rates on new loans to local public bodies for construction of community facilities—directed.

2. Page 5: Expansion of community facilities loan program—promised.

3. Page 5: Speedup in Housing and Home Finance Agency programs, including college housing—directed.

4. Page 5: Acceleration of urban renewal projects—promised and urged.

5. Page 6: Temporary program for extension of unemployment compensation benefits—recommended.

6. Page 6: Better services for unemployed insurance claimants and job applicants through U.S. Employment Service—directed.

7. Page 7: Enactment of interim aid to children of needy unemployed—recommended.

8. Page 7: Permanent aid program to needy children and certain other groups now excluded from public assistance programs—recommended.

9. Page 7: Immediate enactment of area redevelopment—distressed area—legislation, urged.

10. Page 7: Expansion of Federal program for distributing surplus food to needy families—directed.

11. Page 8: Establishment of pilot food-stamp programs in distressed areas—directed.

12. Page 8: Recommendations by Secretary of Agriculture to improve and strengthen school lunch program—ordered.

13. Page 10: Speedup in all procurement and construction plans, including public works, by all Federal departments and agencies—directed.

14. Page 12: Development of natural resources—minerals, water, forests, etc., and hydroelectric and thermal power resources generally—recommended.

February 6 message—U.S. balance of payments and outflow of gold

15. Page 6: Increase in foreign commercial representation, facilities, missions, and centers—directed.

16. Page 7: Submission of a new and expanded program of Export-Import Bank activities—directed.

17. Page 7: Submission of a plan for promotion of foreign travel in the United States—directed.

18. Page 8: Submission of a plan for expansion of agricultural exports—directed.

February 9 message—Health program

19. Page 3: Legislation to double present $10 million authorization for matching grants for construction of nursing homes—recommended.

20. Page 4: "Stimulatory" grants through States to communities, in initial amount of $10 million, to improve quality of services in nursing homes—recommended.

21. Page 4: Legislation establishing a new Bureau of Community Health in U.S. Public Health Service—recommended.

22. Page 4: Authorization for Surgeon General to make project grants for construction of experimental or demonstration hospitals and other facilities—recommended.

"Decisive Federal action" to stimulate and assist in establishment and expansion of medical and dental schools, and to help more talented and needy students—recommended (items 23-26).

23. Page 5: Planning grants to help academic institutions plan new facilities for medical and dental schools, and explore new ways of improving educational process.

24. Page 5: A 10-year program of matching grants to assist in construction, expansion, and restoration of medical and dental schools ($25 million first year and $75 million annually thereafter).

25. Page 6: Federal scholarships for medical and dental students (4-year scholarships, averaging $1,500 per student, for one-fourth of newly entering students).

26. Page 6: Additional Federal grant of $1,000 to medical institution for each $1,500 student scholarship.

27. Page 6: Program for Federal assistance to meet nursing needs and training requirement—recommended.

28. Page 6: Establishment of new National Institute of Child Health and Human Development—recommended.

29. Page 6: Increased appropriations for maternal and child health, crippled children, and child welfare programs—recommended.

30. Page 6: Study of adequacy of existing school health programs by Secretary of HEW—ordered.

31. Page 7: Expansion and increase in Federal matching funds for vocational rehabilitation programs—recommended.

32. Page 7: Expansion of grants for construction of medical research facilities—recommended.

33. Page 7: Removal of current limitation on Federal payment of "indirect" costs of medical research projects—asked.

34. Page 7: Increase in original budget requests for medical research—recommended.

February 20 message—American education

35. Page 3: Three-year program of Federal assistance for public elementary and secondary classroom construction and teachers pay (at least $15 per student in average daily attendance—$666 million first year, $866 million a year thereafter)—recommended.

36. Page 4: Extension of college housing loan program with a 5-year $250 million a year plan (in addition to 1961 speed-up)—recommended.

37. Page 4: Establishment of new long-term, low-interest loan program for academic facilities, at $300 million a year for 5 years—recommended.

38. Page 5: Extension and expansion of Defense Education Act—recommended, proposals to follow.

39. Page 5: Establishment of 5-year program of State-administered scholarships, with initial authorization of $26,250,000 to supplement but not supplant present student assistance program (funds would be allocated in the first year for 25,000 scholarships averaging $700 each; there would be 37,500 scholarships in the second year and 50,000 in each succeeding year; and scholarships could range up to a maximum of $1,000)—recommended.

40. Page 5: Payments to colleges and universities accepting Federal scholarship students—recommended.

February 23 message—Natural resources

41. Page 3: Comprehensive river basin plans and legislation permitting reservation of known future reservoir sites by operating agencies—recommended.

42. Page 4: Strengthening and speeding up flood control programs—promised.

43. Page 4: Small watershed projects—promoted.

44. Page 4: Legislation extending and increasing Federal financial assistance to municipalities for construction of water treatment facilities—recommended.

45. Page 4: Legislation extending and increasing Federal financial assistance for operation of State and interstate water pollution control agencies—proposed.

46. Page 5: Strengthening enforcement procedures to abate pollution situations of national significance—proposed.

47. Page 5: Intensive and broadened research to determine specific sources of water pollution, adverse effects, etc.—proposed.

48. Page 5: Establishment of a special unit in the Public Health Service for development of control measures to prevent and limit water pollution—proposed.

49. Page 5: Establishment of Federal air pollution control program—proposed.

50. Page 5: "Redoubled" efforts to select the most promising approaches to economic desalinization of ocean and brackish water—ordered.

51. Page 5: Legislation extending current saline water conversion research program, with increased funds—recommended.

52. Page 6: "Hydroelectric sites remaining in this country will be utilized and hydroelectric power will be incorporated in all multipurpose river projects" where optimum use of the water justifies it—promised.

53. Page 6: "Our efforts to achieve economically competitive nuclear power in areas where fossil fuel costs are high will be encouraged through basic research engineering developments, and construction of various prototype and full scale reactors by the Atomic Energy Commission in cooperation with industry"—promised.

54. Page 6: Development of plans for interconnection of areas served by Interior Department's marketing agencies with adequate common carrier transmission; development of plans for further national cooperative pooling of electric power, public and private, and development of plans to enlarge such pooling as now exists—ordered.

55. Page 7: Legislation to accelerate forest development on Federal public lands as a measure to relieve unemployment—recommended.

56. Page 7: Acceleration of public forest access roads—ordered.

57. Page 7: Development of a program to help small independent timber growers and processors attain better forest management standards, and more efficient production and utilization of forest crops—directed.

58. Page 7: Inventory and evaluation of public domain holdings as a basis for "improved resources management"—directed.

59. Page 7: Development of a public lands program of balanced usage of grazing, forestry, recreation, wildlife, urban development, and minerals—directed.

60. Page 7: Accelerated installation of soil conservation and water-saving works and practices to reduce erosion and improve forage capacities of public domain and revegetation of range lands where forage capacity has been depleted or destroyed—directed.

61. Page 8: A national program for oceanography, including construction of ship and shore facilities for research and survey, development of new instruments for charting seas and gathering data, and training new scientific manpower—promised.

62. Page 8: Enactment of wildlife protection legislation—recommended.

63. Page 8: Enactment of legislation leading to establishment of seashore areas for use and enjoyment of the public—recommended.

64. Page 8: Formulation of comprehensive Federal recreational lands program—directed.

65. Page 8: Survey to determine locations for additional national parks, forests, and seashore areas—directed.

66. Page 8: Action to insure that land acquired for the construction of federally financed reservoirs is sufficient to permit future development for recreational purposes—directed.

67. Page 8: Establishment of long-range program for planning and providing adequate open spaces for recreational facilities in urban areas—directed.

68. Page 9: Acceleration of the acquisition of upper Midwest wetlands through sale of Federal duck stamps—directed.

March 9 message—American housing

69. Page 3: No downpayment, 40-year FHA mortgages, to be made attractive to private investors—recommended.

70. Page 3: New program of long-term, low-interest loans for rental and cooperative housing financed from the special assistance fund of FNMA, to be processed and supervised by FHA—recommended.

71. Page 4: Removal of limitation on public housing, allowing construction of approximately 100,000 additional low rent units—recommended.

72. Page 4: Program of demonstration grants for experiments in housing for low-income families—suggested.

73. Page 4: Legislation to increase direct loan authorization for housing for elderly from $50 million to $100 million—recommended.

74. Page 4: Designation of 50,000 low-rent public housing units for elderly persons and families—directed.

75. Page 4: Legislation increasing by $500 per room the cost limitation for public housing for elderly—recommended.

76. Page 4: Additional subsidy of up to $10 per month for each housing unit occupied by elderly persons—recommended.

77. Page 5: Cooperation with local officials for development of individual projects within overall urban renewal areas—directed.

78. Page 5: New authorizations totaling $2.5 billion, over 4 years for urban renewal programs—recommended.

79. Page 5: Legislation liberalizing Federal allowances for relocation payments to displaced businessmen when localities share—recommended.

80. Page 6: Expansion of FHA authority to insure home improvement loans—recommended.

81. Page 6: Legislation permitting resale of existing housing in urban renewal areas at a realistic price for rehabilitation—recommended.

82. Page 6: Legislation for extended and expanded program of Federal aid to urban and metropolitan planning—recommended.

83. Page 7: Development of a long-range program and policy for dealing with open space and development of urban land—directed.

84. Page 7: Legislation providing $100 million to initiate a program of 20-percent grants to help public bodies finance reservation of land as permanent open space in urban areas, in the form of parks and other facilities—recommended.

85. Page 7: Legislation for urban renewal loans to help local agencies finance acquisition of open space for future public or private development—recommended.

86. Page 7: Legislation authorizing an additional $50 million for public facilities loans—recommended.

87. Page 7: Study of urban transportation problems and the proper role of the Federal Government in their solution—ordered.

88. Page 8: Extension of unused balance in farm housing loan authority, due to expire June 30, 1961, for 5 years—recommended.

89. Page 8: Procedures to assure adequate credit for farm and other housing in rural areas—ordered.

90. Page 8: Legislation permitting farm home improvement loans to be secured by either mortgages or other acceptable forms of security—recommended.

91. Page 8: Legislation to extend the veterans' housing loan program—both direct and guaranteed—and increase the direct loan authority above the present $150 million limit—recommended.

92. Page 9: Appropriations for market analysis, statistics, and research into housing and urban problems—requested.

93. Page 9: Enactment of special FHA insurance authorization to help finance tests and demonstrations of new approaches to home design and construction—recommended.

94. Page 9: Cabinet rank Department of Housing and Urban Affairs—recommended.

March 16 message—American agriculture

95. Page 4: Agriculture producer income support in the form of authorization for compensatory payments, commodity loans, commodity purchases, diversion programs, incentive payments, and export payments—recommended.

96. Page 5: Establishment of paid national farmer advisory committees for each commodity—recommended.

97. Page 5: Increase in quantity and quality of surplus food distribution to needy—directed.

98. Page 5: Pilot food stamp programs in eight areas—directed.

99. Page 6: Expansion of school lunch program—recommended.

100. Page 6: Extension and improvement of special school milk program—recommended.

101. Page 6: Authorization of additional $2 billion for calendar year 1961 under title I of the Agricultural Trade Development and Assistance Act of 1954 (Public Law 480), permitting sale for local currencies of U.S. surplus agricultural products—requested.

102. Page 6: Extension and expansion of Agricultural Trade Development and Assistance Act of 1954 for 5 years—requested.

103. Page 6: Expansion of agricultural research into marketing, nutrition, and utilization—recommended, and surveys started.

104. Page 8: Liberalization and extension of Farm Home Administration lending operations for operating capital—directed.

105. Page 8: Modification of farm credit regulations to permit borrowing up to 95 percent (instead of 80 percent) of the cost of materials for building farm storage facilities and equipment—directed.

106. Page 8: Action guaranteeing that farmers will be able to earn 2 full years' storage payments for continuing to store 1960 crop wheat, corn, and grain sorghum and at least 1 year's storage payments for continuing to store other 1960 crops—directed.

April 13 message—Regulatory agencies

107. Page 4: Programs "in the field of aviation to frame the goals we should set for ourselves"—initiated.

108. Page 4: Efforts to work out positions that the administration as a whole should take toward the many remedial measures that have been, and are being, suggested with respect to the "ills" of surface transportation—announced.

109. Page 9: Organization of an administrative conference to consider questions of administrative procedure in Federal regulatory agencies—ordered.

110. Page 10: Revision of standards and pay of regulatory agency examiners—recommended.

April 20 message—Federal tax system

111. Page 13: Full cooperation of Federal law enforcement agencies, including Internal Revenue Service, with the Attorney General in a drive against organized crime—ordered.

112. Page 14: Additional funds and personnel for Internal Revenue Service—requested.

April 27 message—Ethical conduct in Government

113. Page 9: Designation of an officer in the Executive Office of the President charged with responsibility for coordination of ethics administration, prepare general regulations, develop methods of informing personnel about ethical standards, conduct studies, etc.—promised.

April 27 message—Reorganization Plan No. 1, Securities and Exchange Commission

114. Page 1: Provisions for final settlement of adjudicatory and regulatory matters before SEC by individual Commissioners, hearing examiners, etc.—proposed.

April 27 message—Reorganization Plan No. 2, Federal Communications Commission

115. Page 1: Provisions for final settlement of adjudicatory and regulatory matters, before FCC, by individual members of Commission, hearing examiners and other employees—proposed.

May 3 message—Reorganization Plan No. 3, Civil Aeronautics Board

116. Page 1: Provisions for final settlement of adjudicatory and regulatory matters, before the CAB, by individual members, hearing examiners and other employees—proposed.

May 9 message—Reorganization Plan No. 4, Federal Trade Commission

117. Page 1: Provisions for final settlement of adjudicatory and regulatory matters, before FTC, by individual Commissioners, hearing examiners, and other employees—proposed.

May 24 message—Reorganization Plan No. 5, National Labor Relations Board

118. Page 1: Provisions for final settlement of adjudicatory and regulatory matters, before NLRB, by individual Board members, hearing examiners, and other employees—proposed.

May 25 address—Urgent national needs

119. Page 3: A new manpower development and training program to train or retrain several hundred thousand workers in new occupational skills over a 4-year period, with subsistence and relocation allowances—recommended.

120. Page 4: Increase lending capacity of Small Business Administration—recommended.

121. Page 4: Further Federal action to "help reduce the cost of the home-buyer's mortgage"—recommended.

122. Page 9: Institution of "whatever new organization, policies, and controls that are necessary to insure maximum coordination and use all political, economic, and psychological resources in the attainment of our objectives"—promised.[1]

123. Page 9: Nationwide, long-range, civilian defense program identifying present fallout shelter capacity, providing for additional shelters and providing for warning, training, radiological monitoring, and stockpiling of food and medicines—recommended.

124. Page 11: Action calculated to land man on the moon, and return him to earth by 1970—recommended.

125. Page 12: Additional $23 million (together with $7 million already available) to accelerate development of Rover rocket and exploration of space to end of solar system—recommended.

126. Page 12: Additional $50 million to accelerate use of space satellites for worldwide communications—recommended.

127. Page 12: Additional funds for development of a satellite system for worldwide weather observation—recommended.

June 12 message—Reorganization Plan No. 6, Federal Home Loan Bank Board

128. Page 1: To allow Board to "deal more effectively with regulatory and policy matters"—proposed.

June 12 message—Reorganization Plan No. 7, maritime functions

129. Page 1: Creation of separate Maritime Commission charged with regulatory functions with respect to merchant marine, and transfer of subsidy and promotional functions to Secretary of Commerce—proposed.

DOMESTIC-CIVILIAN—TRUST-FUND

February 2 message—Program to restore momentum to American economy

1. Page 6: Permanent system of unemployment compensation—recommended.

2. Page 8: Increase in minimum monthly social security benefits for retired workers from $33 to $43, with increased benefits for more than 2.2 million people in the first 12 months—recommended.

3. Page 8: Payment of actuarily reduced social security benefits to men beginning age 62—recommended.

4. Page 9: Liberalization of the insured status requirement to provide social security benefits for 170,000 additional people—recommended.

5. Page 9: Increased aged widows social security benefit from 75 to 85 percent of husband's benefit, raising benefits for 1,550,000 widows—recommended.

6. Page 9: Expanded disability insurance protection under social security to make it payable after total disability for 6 months—recommended.

7. Page 9: Advance in date for payment by Veterans' Administration of $258 million in dividends on national service and U.S. Government life insurance policies—directed.

8. Page 9: Payment of additional dividends on national service and U.S. Government life insurance policies, if they can be justified within sound insurance practices—promised.

9. Page 10: Accelerated allocation of $724 million balance in Federal-aid-highway trust fund—directed.

February 9 message—Health program

Enactment, with tax increase, of health insurance program under social security for persons 65 years of age and over—recommended (items 10–13).

10. Page 2: Inpatient hospital service up to 90 days in a single spell of illness, for all in excess of $10 a day for 9 days (with minimum of $20) and full costs for the remaining 81 days.

11. Page 3: Skilled nursing home services up to 180 days after discharge from hospital.

12. Page 3: Hospital outpatient clinic diagnostic services for all costs in excess of $20.

13. Page 3: Community visiting nurse services, and related home health services "for a limited period of time."

February 28 message—Federal pay-as-you-go highway program

14. Page 7: Increases in the $925 million annual authorization for ABC system at the rate of $25 million every 2 years, beginning in 1964, until the $1 billion level is reached—recommended.

15. Page 7: Legislation to provide for assistance in finding housing for persons displaced by future Federal-aid-highway projects—urged.

16. Page 8: Extension of billboard control section of Highway Act for 4 years with incentive bonus doubled from one-half of 1 percent to 1 percent—recommended.

FOREIGN AID AND INTERNATIONAL RELATIONS—REGULAR BUDGET

January 30 address—State of the Union

1. Page 8: Full appropriation of $500 million pledged by Act of Bogotá for use as first step in development program for Americas—recommended.

March 1 message—Establishment of Peace Corps

2. Page 1: Peace Corps, on temporary pilot basis, established by Executive order.

March 14 communication—Chilean reconstruction and rehabilitation

3. Page 1: Appropriation of $100 million for Chilean reconstruction and rehabilitation—requested.

March 22 message—Foreign aid

4. Page 5: Consolidation into a new single administration the Washington and field activities of the ICA (including point 4), Development Loan Fund, food-for-peace program (Public Law 480) in its relations with other countries, local currency lending activities of Export-Import Bank, Peace Corps, donation of nonagricultural surpluses from other stockpiles, and related staff and services provided by the Department of State—proposed.

5. Page 8: Long-term foreign development loans (financed by creation of U.S. debt) with low or no interest, for periods of up to 50 years—recommended.

6. Page 8: Continuation of appropriations for foreign aid grant programs—recommended.

May 25 address—Urgent national needs

7. Page 6: Increased funds for U.S. Information Agency—requested.

8. Page 7: Increased emphasis on NATO conventional strength—endorsed.

9. Page 11: Establishment of strengthened and enlarged disarmament administration—proposed.

MILITARY—REGULAR BUDGET

January 30 address—State of the Union

1. Page 7: Prompt action to increase airlift capacity—directed.

2. Page 7: Prompt action to step up Polaris submarine program, using unobligated funds for earlier contracting—directed.

3. Page 7: Prompt action to accelerate entire missile program—directed.

March 28 message—National defense budget recommendations

4. Page 5: Continued acceleration and expansion of Polaris submarine and Polaris missile programs—recommended.

5. Page 6: Expansion and acceleration of Minuteman and Skybolt missile programs—recommended.

6. Page 7: Provisions for expansion in "bomber deterrent" protection—recommended.

7. Page 7: Additional authorization for improving continental defense and warning systems—recommended.

8. Page 8: Additional obligational authority for improving command and control of "our strategic deterrent"—recommended.

9. Page 8: Additional support for "a number of other space and research programs related to strategic and continental air defense forces"—recommended.

10. Page 9: Spending authority for speedup in limited warfare research programs, and for initiation of new programs—recommended.

11. Page 9: Additional appropriations for "increased flexibility of conventional forces"—recommended.

12. Page 9: Additional appropriations for "increased nonnuclear capacities of fighter aircraft"—recommended.

13. Page 10: Increased military personnel, training, and readiness for conventional forces—recommended.

May 25 address—Urgent national needs

14. Page 8: Complete reorganization and modernization of the Army's divisional structure to increase nonnuclear firepower, improve tactical mobility in any environment, insure flexibility, facilitate coordination with major allies, and provide modern mechanized divisions in Europe and new airborne brigades in both Pacific and Europe—ordered.

---

[1] Language is sufficiently broad to include expenditures under military, foreign, and domestic-civilian categories.

15. Page 8: Additional appropriation of $100 million to reequip Army—requested.

16. Page 8: Rapid expansion in the orientation of existing forces for conduct of nonnuclear war, paramilitary operations, and sublimited or unconventional wars—directed.

17. Page 8: Increase and reorientation in special forces and unconventional warfare units—announced.

18. Page 8: New emphasis, throughout military services, on special skills and languages required in social, economic, psychological, governmental, and other efforts that are short of open conflict to counter Communist-sponsored outbreaks—proposed.

19. Page 8: Development of plans by Army to make possible rapid deployment of a major portion of its highly trained Reserve forces—announced.

20. Page 9: Additional $60 million in funds to increase the strength of Marine Corps—requested.

July 26 communication—Amendments to the budget for military functions

21. Page 1: Additional appropriations totaling $3,454,600,000 for military functions of the Department of Defense—requested.

ANNEX 2

Actual Federal fiscal experience, by cycles, fiscal years 1960 to 1961, inclusive, showing receipts, expenditures, deficits, and increase in debt

[In billions of dollars]

	3-year cycles	4-year cycles	5-year cycles	6-year cycles	7-year cycles	8-year cycles	9-year cycles	10-year cycles
Beginning fiscal year 1950:								
Receipts	145.2	209.9	274.3	334.5	402.3	472.9	541.4	609.3
Expenditures	148.8	222.9	290.4	354.8	421.0	490.0	561.4	641.7
Deficit	−3.6	−13.0	−16.1	−20.3	−18.7	−17.1	−19.9	−32.3
Increase in debt	+6.5	+13.5	+18.8	+21.9	+20.4	+18.2	+24.0	+32.4
Beginning fiscal year 1951:								
Receipts	173.5	237.9	298.1	365.9	436.5	505.0	572.9	650.7
Expenditures	183.4	250.9	315.3	381.5	450.5	521.9	602.2	678.7
Deficit	−9.9	−13.0	−17.2	−15.6	−14.0	−16.8	−29.2	−28.0

Deficit	−14.0	−17.9						
Increase in debt	+15.9	+18.7						
Beginning fiscal year 1959:								
Receipts	223.3							
Expenditures	238.3							
Deficit	−15.1							
Increase in debt	+12.9							

Mr. BUSH. Mr. President, will the Senator yield for a question?

Mr. BYRD of Virginia. I yield.

Mr. BUSH. I wish to compliment the distinguished Senator from Virginia upon his very splendid analysis of our financial position as a nation. As usual, he is again the one to remind us of our responsibilities in this connection. I wish that every Senator were in his seat to hear and study the material that has been given to the Senate today by the able chairman of our Committee on Finance. He has pointed up a situation which is dangerous. It is getting more serious all the time. The unhappy fact is that, rather than a growing awareness of the nature of the problem and of the seriousness of the difficulty that we face, there seems to be a sense of indifference toward it and an assumption that we are a nation with unlimited resources, that our credit cannot be strained, and that there is no limit to the amount of spending that we can afford if it seems to be politically desirable.

The Senator's speech should be a reminder to all of us, in both Houses of Congress, that there are limits which we must recognize. One of them is imposed by the national credit which is controlled by the budget. The Senator's forecast of an $8 billion to a $10 billion deficit in the current fiscal year is reasonable. I join him in his prediction that it will exceed $8 billion.

Next week I shall attend the Conference of the International Fund and World Bank. At this point I ask unanimous consent that I may be absent next week for that purpose.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUSH. I shall attend the Conference as a representative of the Joint Economic Committee. The principal reason for my going is to try to study the problems which the Senator from Virginia is dealing with in his magnificent address, to find out what the other countries, which are so heavily dependent on us for their freedom and security think about the fiscal policies of the United States today.

Among those who will attend the Conference will be the heads of the central banks of 68 countries and the heads of finance ministries of various countries, and members of the financial communities and private banks, as well as representatives of other financial institutions of a great many nations. The U.S. delegation will be headed by Secretary of the Treasury Douglas Dillon and will include William McC. Martin, Jr., of the Federal Reserve Board, and Under Secretary of State Ball.

Some of these representatives of other countries have expressed privately to me on their visits to the United States this year their growing concern regarding the fiscal policies of this Government. I am anxious to learn at first hand and in private conversations—where these views are more likely to come out—how they are feeling today about us as a result of the last 8 months of this Government's operations.

Therefore, I thank the Senator for giving me an opportunity to make these remarks. I again compliment him very highly upon his analysis of the situation. I join him in the warning that it is time for us to wake up and to be realistic about what we can afford to do and what we cannot afford to do.

Mr. BYRD of Virginia. I am grateful to the Senator for his comments. I am glad the Senator is going to the International Monetary Conference. He is one of the best informed students of fiscal policies in the Senate. I hope when he returns he will make a report to the Senate on the conditions that he finds abroad.

Mr. BUSH. I thank the Senator. I cannot say that I hope the Senate will be in session when I return. If it is, I expect to have something to say on the subject.

Mr. ERVIN. Mr. President, will the Senator yield?

Mr. BYRD of Virginia. I yield.

Mr. ERVIN. The Senator referred to the gross national product. Very frequently I see statements by what I call theoretical economists referring to our gross national product. I wonder if I am correct in assuming that the gross national product is the total value of all of our product plus the total value of all compensation.

Mr. BYRD of Virginia. That generally is correct.

Mr. ERVIN. If that is true, I should like to illustrate the unreliability of references to the gross national product by a hypothetical illustration. We will say that A has a business which has a gross product valued at $30,000 a year. A pays B $20,000 a year to operate the business. That $20,000 is paid out of the $30,000. B furnishes the brains for the work. However, B employs C to do the actual work in producing the product, and pays C $10,000 for his services.

We then add up all of these figures, and we see that there is a total of $60,000. That amount is a part of what we call the gross national product. We

see, however, that everything involved could not possibly exceed $30,000, which was the product that was sold. Therefore, it is very deceiving to talk about the gross national product, is it not?

Mr. BYRD of Virginia. The Senator is entirely correct; gross national product figures can be deceptive, indeed.

Mr. ERVIN. What we are doing is adding the money time and time again. Every time the money changes hands from one person to another, we have exactly the same amount of money, but we count the same money time and time again.

Mr. BYRD of Virginia. I thank the Senator. We have been depending entirely too much on possible increase in the gross national product as a basis for increasing expenditures of the Government.

Mr. KEFAUVER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KEFAUVER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DISTRICT OF COLUMBIA LIFE INSURANCE ACT

Mr. ROBERTSON. Mr. President, I ask unanimous consent that the unfinished business be temporarily laid aside and that the Senate proceed to the consideration of H.R. 7482, Calendar No. 823.

The PRESIDING OFFICER. The bill will be stated by title for the information of the Senate.

The LEGISLATIVE CLERK. A bill (H.R. 7482) to amend the Life Insurance Act of the District of Columbia approved June 19, 1934, as amended.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Virginia?

There being no objection, the Senate proceeded to consider the bill.

Mr. ROBERTSON. Mr. President, I ask unanimous consent to have printed in the RECORD a letter I received from Chairman William L. Cary of the Securities and Exchange Commission, dated September 7, 1961.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SECURITIES AND EXCHANGE COMMISSION,
Washington, D.C., September 7, 1961.

The Honorable A. WILLIS ROBERTSON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR ROBERTSON: I am writing this letter to express the opposition of the Securities and Exchange Commission to H.R. 7482 and our belief that no action on the bill should be taken during this session of Congress.

H.R. 7482, a proposed amendment to the Life Insurance Act of the District of Columbia, would allow life insurance companies sponsoring investment companies which issue variable annuity contracts to establish special voting and management procedures with respect to the owners of these contracts.

The Commission's opposition to H.R. 7482 rests primarily on three grounds:

1. The bill is suggested as a vehicle for action under the Investment Company Act of 1940 which the Commission considers generally unsuitable.

2. The Commission is concerned that, in a bill tailored to meet a particular local problem, Congress might, without full consideration and the participation of all interested parties, establish what could be regarded as a national pattern for resolving an important problem under the 1940 act.

3. Even if this bill were enacted, no District of Columbia insurance company could sell variable annuities without first obtaining exemptions from the Commission. There can, of course, be no assurance as to how the Commission would deal with applications for the necessary exemptions, but it can be readily anticipated that applicants will urge the enactment of H.R. 7482 as evidence of congressional intent which should influence the Commission to rule in their favor.

H.R. 7482 does not give adequate recognition to the basic principle of investor control which is a vital part of the 1940 act and which is manifested by the rights granted to shareholders of a management investment company to control fundamental aspects of the company's operations, such as the election of all members of the board of directors. This principle of investor control would be seriously diluted by H.R. 7482. Any such dilution raises difficult questions of meeting the standards of the 1940 act, which limits exemptions to those "necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of this title."

The fact that the issuance of variable annuities has been sponsored by life insurance companies should not obscure the basic similarity between a variable annuitant and any shareholder of a management investment company. A variable annuitant receives more or less depending upon the efficiency of the management and its skill in selecting and managing portfolio securities. In this vital respect he is in the same position as any stockholder of a management investment company and should have the power to control his company, as contemplated by the 1940 act. He who takes the risk of losses and stands to gain from profits should control the company. This is no peculiar, technical concept brought into existence by the 1940 act; it is a traditional concept of a corporate organization.

Finally, I should like to point out that passage of H.R. 7482, even though applicable only to the District of Columbia, may create an impression of congressional sanction to applications for exemptions from basic requirements of the 1940 act. Such an interpretation might result in actions and reliance by State legislatures and insurance companies, a consequence which I believe will be most regrettable and would in fact seriously prejudice general resolution of the problems involved. I would like to make it clear that, if H.R. 7482 is enacted, the Commission will not regard it as reflecting either express or implied congressional sanction to any exemptive solution to the variable annuity problem.

For the above outlined reasons, the Commission strongly recommends postponement of any action on H.R. 7482.

We recognize that it is appropriate to inquire as to when the Commission can announce its position on the status of the local company which, we understand, is the chief proponent of the bill—i.e., Variable Annuity Life Insurance Co. We expect to be able to resolve problems relating to this company by the time Congress reconvenes. However, resolution of the problems involving the entire industry—by legislation or otherwise—will require longer study.

Sincerely yours,

WILLIAM L. CARY,
Chairman.

Mr. ROBERTSON. Mr. President, the Chairman of the SEC is concerned about the possible effects of the bill on the Investment Company Act of 1940 and the potential impact of the bill as creating a nationwide pattern of treatment for insurance companies engaged in variable annuity activities. May I ask the Senator from Maryland, who submitted the report on behalf of the District of Columbia Committee, if the bill is intended by the committee to have any effect in these areas?

Mr. BEALL. Mr. President, I do not so understand the bill. It is confined to an amendment of the Life Insurance Act of the District of Columbia and applies only to life insurance companies organized under the laws of the District. While it permits District life insurance companies to confer certain rights upon variable contract owners, it is not intended to relax any requirements of compliance with the Investment Company Act or to influence the Securities and Exchange Commission's interpretation of that act. The District of Columbia Committee is neither empowered, nor would it presume, to recommend any amendment to the Investment Company Act or modification of the functions of the Securities and Exchange Commission. Committee consideration of these matters is appropriate only for the Banking and Currency Committee. And, of course, we would not presume to intrude upon matters solely within the province of the several State legislatures by suggesting that they treat their domestic insurance companies in any way other than they see fit.

Mr. ROBERTSON. Perhaps some confusion could arise from the statement in the District of Columbia Committee's report to the effect that the bill might reconcile insurance regulatory and investment company concepts.

Mr. BEALL. Although the District of Columbia Committee believed that the bill might provide a method for reconciling certain insurance regulatory and Investment Company Act concepts, it was aware that it was modifying only the insurance regulatory area as applied to District life insurance companies. The committee clearly recognizes that interpretations of the Investment Company Act rest with the Securities and Exchange Commission and the courts and that recommended amendments of that act are not within its jurisdiction.

Mr. ROBERTSON. I thank the Senator from Maryland. I am in complete accord with his views. I favor this bill only on the understanding that it is not intended to have any effect upon the Investment Company Act and that it would still be necessary for an insurance company acting under this statute to obtain from the SEC an exemption under the Investment Company Act.

Mr. BEALL. Mr. President, the understanding of the Senator from Virginia is entirely correct.

Mr. ROBERTSON. Mr. President, I ask that the bill be passed.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be proposed, the question is on the third reading and passage of the bill.

The bill (H.R. 7482) was ordered to a third reading, was read the third time, and passed.

AMENDMENT OF DISTRICT OF COLUMBIA UNEMPLOYMENT COMPENSATION ACT

Mr. MORSE. Mr. President, will the Senator from Tennessee yield for a special request?

Mr. KEFAUVER. I yield, provided I do not lose the floor.

Mr. MORSE. The Senate has ready for consideration an important District of Columbia bill. While the distinguished senior Senator from Maryland [Mr. BEALL] is in the Chamber, I hope the Senate may consider the District of Columbia unemployment compensation bill. I understand that if it can be passed by the Senate this afternoon, the probabilities are exceedingly good that the House will go to conference with us. The bill can be passed within 2 or 3 minutes.

Mr. KEFAUVER. Mr. President, I yield to the Senator from Oregon, provided I do not lose the floor, and that the proceedings in connection with the consideration of the bill are printed elsewhere in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MORSE. Mr. President, may I have the permission of the majority leader to ask unanimous consent that the pending business be temporarily laid aside, in order that the Senate may proceed to the consideration of S. 2194?

Mr. MANSFIELD. That is satisfactory.

Mr. MORSE. Mr. President, I ask unanimous consent that the Senate temporarily lay aside the pending business, and that the Senate proceed to the consideration of Calendar No. 262, S. 2194.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 2194) to amend the District of Columbia Unemployment Compensation Act of 1935, as amended.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oregon?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on the District of Columbia, with an amendment, to strike out all after the enacting clause and insert:

That section 1(b)(5)(G) of the District of Columbia Unemployment Compensation Act (49 Stat. 946), as amended (D.C. Code, sec. 46–301), is amended to read as follows:

"NONPROFIT ORGANIZATIONS

"(G)(1) service performed by a duly ordained, commissioned, or licensed minister of a church in the exercise of his ministry or by a member of a religious order in the exercise of duties required by such order; (2) service performed in a sheltered workshop owned or operated by an organization described in section 501(c)(3) of the Internal Revenue Code which is exempt from income tax under section 501(a) of such Code other than service performed by instructors, foremen, or other regular staff of the workshop. As used in this subparagraph the term 'sheltered workshop' means a facility conducted for the purpose of (i) carrying out a program of rehabilitation for individuals whose earning capacity is impaired by age or physical or mental deficiency or injury, or (ii) of providing remunerative work for individuals who because of their impaired physical or mental capacity cannot be readily absorbed in the competitive labor market;".

SEC. 2. Section 1 of said Act approved August 28, 1935, as amended (sec. 46–301, D.C. Code, 1951 ed.), is amended by adding at the end thereof the following:

"v. 'Insured work' means employment for employers."

SEC. 3. Section 3(c)(8) of said Act approved August 28, 1935, as amended (sec. 46–303(c)(8), D.C. Code, 1951 ed.), is amended by adding the following:

"iv. Any employer, at any time, may voluntarily pay into the unemployment compensation fund an amount in excess of the contributions required to be paid under the provisions of this Act, and such amount shall be forthwith credited to his reserve account. His rate of contribution shall be computed, or recomputed, as the case may be, with such amount included in the calculation. To affect such employer's rate of contribution for any year, such amount shall be paid not later than thirty days following the mailing of notice of his rate of contribution for such year and not later than one hundred and twenty days after the commencement of such year: *Provided*, That such amount, when paid as aforesaid, shall not be refunded or used as a credit in the payment of contributions in whole or in part."

SEC. 4. Subsections (b), (c), and (d) of section 7 of said Act approved August 28, 1935, as amended (sec. 46–307 (b), (c), and (d), D.C. Code, 1951 ed.), are amended to read as follows:

"(b) An individual's 'weekly benefit amount' shall be an amount equal to one twenty-third (computed to the next higher multiple of $1) of his total wages for insured work paid during that quarter of his base period in which such total wages were highest, with such other following limitations. If an individual's weekly benefit amount is less than $8, it shall be $8. The Director shall determine annually a maximum weekly benefit amount by computing 50 per centum of the average weekly wage paid to employees in insured work, and shall on or before January 1 of the calendar year in which it shall be effective announce by publication in at least one newspaper of general circulation in the District, the maximum weekly benefit amount so determined. Such computation shall be made by determining gross wages reported as paid for insured work by employers in each twelve-month period ending June 30, and dividing said gross wages by a figure resulting from fifty-two times the average of midmonth employment reported by employers for the same period. For the period from the effective date of this Act to December 31, 1961, the maximum weekly benefit amount shall be determined and announced by the Director in accordance with the foregoing formula on the basis of wages and employment in the twelve-month period ending June 30, 1960. The maximum weekly benefit amount so determined and announced for a calendar year shall apply only to those claims filed in that year qualifying for maximum payment under the foregoing formula: *Provided*, That all claims qualifying for payment at the maximum weekly benefit amount shall be paid at the maximum weekly benefit amount in effect when the benefit year to which the claim relates was first established, notwithstanding a change in said amount for a subsequent calendar year: *Provided further*, That if the maximum weekly benefit amount is not a multiple of $1, then said maximum weekly benefit amount shall be computed to the next higher multiple of $1.

"(c) To qualify for benefits an individual must have (1) been paid wages for employment of not less than $130 in one quarter in his base period, (2) been paid wages for employment of not less than $276 in not less than two quarters in such period, and (3) received during such period wages the total amount of which is equal to at least one and one-half times the amount of his wages for the quarter in such period in which his wages were the highest. Notwithstanding the provisions of clause (3), any otherwise qualified individual, the total amount of whose wages during such period is less than the amount required to have been received during such period under such clause, may qualify for benefits if the differences between the amount so required to have been received and the total amount of his wages during such period does not exceed $70, but the amount of his weekly benefit, as computed under section 7(b), shall be reduced by $1 if such difference does not exceed $35 or by $2 if such difference is more than $35.

"An individual voluntarily leaving employment without good cause and who is receiving or has applied for a pension or retirement of any kind, whether under a governmental or private plan or under the Social Security Act, may not have wages used in the computation of a claim for benefits under this Act if—

"(A) earned prior to such voluntary leaving, and

"(B) the employer or employers involved contributed in whole or in part to the pension, retirement, or old-age and survivors insurance.

If such individual has previously established a current benefit year the claim shall be redetermined for the remainder of such benefit year, eliminating all wages coming within the conditions (A) and (B) of this section: *Provided*, That for purposes of this subsection an individual who is separated from employment because of a company rule as to maximum age or pursuant to a union-employer agreement as to maximum age shall not be deemed to have left his employment voluntarily: *Provided further*, That this subsection shall not be applicable to any person who makes application for a pension or retirement compensation and is denied such pension or retirement compensation or is found to be ineligible therefor. The Board is authorized to provide by regulation for determining whether an individual subject to the provisions of this subsection has voluntarily left his employment without good cause."

"(d) Any otherwise eligible individual shall be entitled during any benefit year to a total amount of benefits equal to thirty-four times his weekly benefit amount."

SEC. 5. Section 7(f) of said Act approved August 28, 1935, as amended (sec. 46–307(f), D.C. Code, 1951 ed.), is amended by striking "$30" and inserting in lieu thereof "the established maximum benefit amount".

SEC. 6. Clause (b) of section 9 of said Act approved August 28, 1935, as amended (sec. 46–309, D.C. Code, 1951 ed.), is amended to read as follows:

"(b) that he has during his base period been paid wages for employment by employers equal to those required by subsection (c) of section 7."

SEC. 7. (a) Section 10 of said Act approved August 28, 1935, as amended (sec. 46–310 D.C. Code, 1951 ed.), is amended by striking the second sentence from subsections (a), (b), and (c).

(b) Section 10 of said Act approved August 28, 1935, as amended, is further amended by striking subsections (d) and (e) and inserting in lieu thereof the following:

"CONDITIONS PRECLUDING DENIAL OF BENEFITS

"(d) (1) Benefits shall not be denied to any otherwise eligible individual for refusing to accept new work under any of the following conditions: (A) If the position offered is vacant due directly to a strike, lockout, or other labor dispute; (B) if the wages, earnings, hours, or other conditions of the work offered are less favorable to the individual than those prevailing for similar work in the locality; (C) if as a condition of being employed the individual would be required to join a company union or to resign from or refrain from joining any bona fide labor organization.

"(2) Compensation shall not be denied to any otherwise eligible individual for any week during which he is attending a training or retraining course with the approval of the Board, and such individual shall be deemed to be otherwise eligible for any such week despite the provisions of section 9(d) and subsection (c) of this section.

"FAILURE OF AN INDIVIDUAL TO ATTEND A TRAINING OR RETRAINING COURSE WHEN APPROVED

"(e) If any individual otherwise eligible for benefits fails, without good cause as determined by the Board under regulations prescribed by it, to attend a training or retraining course when recommended by the manager of the employment office or by the Board and such course is available at public expense, he shall not be eligible for benefits with respect to any week in which such failure occurred."

SEC. 8. This Act shall take effect on the first day of the first calendar quarter following its enactment.

Mr. MORSE. Mr. President, the committee has held hearings on the bill. The bill was approved unanimously by the subcommittee and also by the full Committee on the District of Columbia. The chairman of the full committee, the distinguished Senator from Nevada [Mr. BIBLE], is in the Chamber. The bill is noncontroversial.

I may say to the majority leader and the minority leader that the bill is practically identical in form, with no increases, with a bill which passed the Senate in 1958 but did not receive the action of the House.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD a statement I have prepared relating to the bill, and a very fine Washington Post editorial of September 4, 1961, commenting on my bill, S. 2194, as reported and on H.R. 5968 which passed the House.

There being no objection, the statement and editorial were ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR MORSE

The bill (S. 2194) bears the bill number of the measure which I introduced on June 29, 1961, but in the course of hearings held before the Subcommittee on Public Health, Education, Welfare, and Safety of the Senate Committee on the District of Columbia on August 3, 1961, and during the markup of the bill in executive session, modifications were made. I concurred in the modifications. Among the modifications made was the addition of the first section of the bill as it now reads.

This section would extend the provisions of the District of Columbia Unemployment Compensation Act to employees of certain nonprofit religious, charitable, educational, and humane organizations, with certain exclusions which I shall discuss later.

This is not a new departure in the field of social insurance. For several years the executive branch has advocated coverage of employees of such organizations under the Federal law. It was part of a number of amendments to Federal law submitted by the then administration to both Houses of Congress in 1959. The Ways and Means Committee of the House conducted hearings on those proposals in 1959, including the coverage of nonprofit organizations. This particular provision was not, however, included in the Mills bill, which became the Social Security Amendments of 1960, although the act moved in the direction of covering such employees by covering employees of so-called feeder organizations, i.e., business operations owned by nonprofit organizations.

The proposal to cover employees of nonprofit organizations under the Federal law, which would result in their coverage under all State laws, is part of the program of the Kennedy administration, embodied in S. 2084.

The U.S. Department of Labor has for years recommended to the States that they cover such employees. Our two newest States, Alaska and Hawaii, do and have for some time compulsorily covered such employees.

I am informed that employees of virtually all nonprofit organizations are presently covered under old-age and survivors' insurance. In my considered judgment, their need for unemployment insurance is as great as for the protection afforded by the OASI program.

The workers who would be covered include a wide range of occupations, not distinguishable from those performed in presently covered employment. They are printers, typists, elevator operators, cooks, busboys, janitors, scrubwomen, as well as teachers, nurses and professional social workers. Many of them are employed in hospitals and it is estimated that about 40 percent of hospital workers are food, maintenance, and custodial workers. There are also many clerical workers in nonprofit organizations whose work is not essentially different from that of clerical workers in industry. Such evidence as is available indicates that employees of nonprofit organizations have a risk of unemployment as do presently covered workers. While certain professional groups in the nonprofit field may frequently have the protection of tenure and stable employment, with provisions for severance pay, this could be said of many presently covered workers. Other nonprofit organizations' employees, particularly in the nonprofessional occupations, are often low paid and have a high rate of turnover, which generally indicates unemployment.

I am advised that a substantial part of the funds of nonprofit organizations comes from sources other than voluntary contributions. Many such organizations sell goods and services in competition with profit-making organizations. Using hospitals as illustrative, since they employ a large portion of the workers who would be covered by the proposal, according to the U.S. Department of Labor, a study of one group of 85 nonprofit hospitals throughout the country indicated that only 10 percent of their revenue came from gifts and endowments, while about 70 percent represented payments by patients and their insurance carriers.

Making nonprofit organizations liable to pay unemployment compensation contributions would not change the special status they enjoy in regard to taxation generally. The traditional exemption they enjoy from revenue-raising taxes should not be carried over into programs not designed to raise general revenue but specifically designed for the protection of their workers.

The unemployed individual has the same need for income replacement whether his employer is a large industrial concern or a nonprofit organization.

The exclusions which I referred to are ministers, members of religious orders, and the handicapped in sheltered workshops. A sheltered workshop is defined in the bill as "a facility conducted for the purpose (i) of carrying out a program of rehabilitation for individuals whose earning capacity is impaired by age or physical or mental deficiency or injury, or (ii) of providing remunerative work for individuals who because of their impaired physical or mental capacity cannot be readily absorbed in the competitive labor market." The persons excluded are the clients of the workshop who are being rehabilitated or performing remunerative work in the workshop, but not the staff of the workshop, such as instructors, foremen, or clerical help.

In addition, the amendment to which I have just referred would not affect the act's present exclusion of students employed by their educational institutions, student nurses and interns, or individuals earning less than a specified amount.

Section 2 of the bill, as reported, defines insured work.

Section 3 of my bill, as reported, is a decided improvement in the law from the standpoint of the employer, as it safeguards the experience rating of employers who, under it, will be permitted to make voluntary contributions to the fund. In passing, I might add, this feature of the bill received the endorsement of the Washington Board of Trade in testimony before the subcommittee. There was no testimony in opposition to this change presented to the committee.

Section 4 of my bill, as amended, sets the maximum weekly unemployment benefit in the District of Columbia at a level where the great majority of covered workers will be eligible for payments equal to at least one-half of their regular earnings. I should like to point out that the rapid rise in wages since 1954, when the present $30 weekly maximum benefit was enacted for the District of Columbia, makes it imperative that the weekly maximum benefit be increased if we are to provide benefits reasonably related to the present wage levels.

The amendment provides that for each calendar year the maximum weekly benefit amount will be 50 percent of the average wage of covered workers in the District. This means that a new maximum weekly benefit amount would be established annually in accordance with the economic situation without the necessity of legislation. The District of Columbia Unemployment Compensation Board informs me that if this provision were presently effective, the maximum weekly benefit amount would be $46.

I believe I speak for most, if not all, members of the Senate Committee on the District of Columbia, in expressing the very strong feeling that an increase in the maximum benefit in line with rising wages and living standards is imperative not only to assure an adequate benefit to the worker for loss of earnings, but also to assist the whole community, through maintaining the purchasing power of the unemployed.

The next section of the bill raises the number of weeks for which an eligible unemployed benefit claimant may receive payment from the present 26-week maximum to a 34-week maximum. I think it should be pointed out that during the period of unemployment the worker would be required to be able to work, to be available for work and to accept suitable work when offered to him.

While I certainly do not believe that a simple extension of the duration of benefits is the proper answer to all of the problem, I do feel that an additional 8 weeks of

benefit payments, as proposed in the bill, would be of great assistance to many wage earners. The 8-week extension falls short of the 39-week provision contained in my original bill which had the distinguished support from labor representatives and within the committee, but in the considered judgment of the committee, it represents a step in the right direction beyond which it would be difficult to go at this time.

It is appreciated that there may be those who, in all sincerity, view with great caution the extension of benefits for the 34-week period. I personally believe that they are exercised over a scarecrow argument which will be found to have little substance in the actual operation of the program. I am convinced that eventually these men, with whom I have an honest difference on this point, will come to accept the 34-week duration as desirable. I hasten to add, Mr. President, that in reporting this bill to the Senate, the committee unanimously agreed upon this uniform 34-week extension.

The next section of my bill, as amended, eliminates the provisions in existing law which require the cancellation of benefits in those cases where individuals have been disqualified to receive benefits by reason of (1) the voluntary leaving of employment without good cause, (2) discharge for misconduct in connection with the performance of work, or (3) refusal to accept suitable work without good cause. The result of the amendment will be the postponement of the payment of benefits for such period of time as an individual may have been disqualified to receive such benefits. The provision of the present law which calls for variable disqualification periods would be retained.

In testifying before the committee, the Board of Trade representative stated that the Board strongly favors denying benefits completely in the above-mentioned cases. The Board of Trade bill provided that such persons would be ineligible for benefits until they have returned to work and have been paid wages equivalent to at least eight times their weekly benefit amount. In my judgment, the Board of Trade position on this provision is dead wrong, as it perverts the purposes of disqualification from one of protecting the fund to one of penalizing the claimant.

The next section of the amended bill makes modification in the qualification required of a person, insofar as the wages received during his former employment are concerned.

Also, at the present time it is difficult to determine whether elderly individuals who have voluntarily retired are in the labor market and seeking employment. Accordingly, the bill includes a provision to prevent individuals who have voluntarily retired from employment without good cause and who have applied for or are receiving retirement to which the employer has contributed, from using wages paid them by such employer prior to retirement in the computation of a claim for benefits.

The last section of my amended bill contains two amendments designed to encourage unemployed workers to enter appropriate training programs in order to provide them with the skills necessary to prevent them from such frequent unemployment.

The first amendment would provide that unemployment benefits would not be denied to an otherwise eligible individual during any week in which he is attending an approved training course. The second amendment which complements the first would provide that benefits would be denied to individuals who refuse without good cause to accept a referral to an approved training course.

Provisions of this nature have been widely discussed, particularly on the House side, in connection with the considerations by Congress of the administration's manpower and training bill. This latter bill, as Senators know, has already passed the Senate and is awaiting action in the House. It is my understanding that there was considerable discussion on the House side concerning the incorporation of such provisions in the manpower and training bill itself. It was pointed out that Federal legislation in this area involves amendments to the Federal Unemployment Tax Act which falls within the jurisdiction of the Ways and Means Committee. That committee had before it the administration's proposal for such a provision in connection with improving the unemployment insurance system. It was, therefore, agreed that such a provision should not be incorporated in the manpower and training bill.

As I have stated, however, there is wide bipartisan support for such a provision. The supporters recognize that training programs for unemployed individuals are designed to improve their opportunities for employment so that they will be far less subject to unemployment. Such a result would have many beneficial effects. It would reduce the ultimate load on the unemployment compensation programs in the States. It would also be of the greatest economic benefit both to the community and the Nation in that workers would become more productive members of society. They would not only produce more and better goods and services, but they themselves would have greater earnings which would put more money into circulation.

It seems obvious that it is far more desirable to place properly selected individuals in a training program when they are unemployed and eligible for unemployment compensation than to leave them idle.

There is a tremendous growing awareness in the States of the desirability of such a practice. Thirteen States and the District of Columbia already have laws which furnish assurance to unemployment compensation claimants that they will not be denied unemployment benefits if they undertake occupational training to which they have been referred by the unemployment service. It is an indication of the growing awareness of the importance of such training that eight of these States enacted such laws at their recent 1961 legislative sessions.

There seems little doubt to me that more and more employers in this country will recognize that proper training of unemployed workers is one of the best methods for keeping them off the unemployment insurance rolls.

In concluding my statement on S. 2194, I urge that the Senate pass the proposed legislation. It is for the most part the bill proposed by the District Commission. It comes to the Senate with the unanimous recommendation of the Senate Committee on the District of Columbia. It is not new legislation or theoretical legislation. Rather, in the best sense of the word, it is conservative legislation. It seeks to conserve, through renovation, sound principles of unemployment compensation, adopted over two decades ago, which are part of the American tradition of social legislation.

[From the Washington Post, Sept. 4, 1961]

FOR THE UNEMPLOYED

Congress has recognized that the District's unemployment laws are badly out of date, and revisions are underway. Characteristically, the House District Committee drew up a bill reflecting accurately the views of the Washington Board of Trade while the Senate committee's version is based upon the District Commissioners' requests. They agree only that the District's maximum benefit of $30 a week is too low.

The Senate committee has done the better job. When the whole standard of living in the city rises, then unemployment benefits ought to rise with it. The Senators propose a floating maximum, set each year at half the average wage of the District's covered workers. Currently, that would be about $47 a week. The House bill merely sets a flat $38, an unhappy compromise. If the House meant it merely to keep step with inflation, their figure is too high. And if it is to keep step with the rise in the average wage here, which has gone from $68 in 1954 to about $94 today, then it is too low.

Between these two bills, the difference in cost is not sufficient to justify any vast anxiety among the employers whose payroll taxes will support the future compensation program. The Senate committee's bill would add another $1.7 million to the $5.2 million that the present program costs, where the House bill would add about $1.3 million.

The Senate District Committee has also made two valuable additions to the Commissioners' draft. Its language would now make nonprofit institutions' employees eligible. And it would remove the absurd rule that prohibits unemployment payments to a person undergoing training in order to qualify himself for a job. The Senators went even further, authorizing the Compensation Board to cut off benefits to a person refusing to take an appropriate training course. At a time when old skills more swiftly become obsolescent and new skills are increasingly in demand, this reversal of old policy is no more than commonsense.

The PRESIDING OFFICER. The committee amendment in the nature of a substitute is open to amendment. If there be no amendment to be proposed, the question is on agreeing to the committee amendment in the nature of a substitute.

The amendment was agreed to.

The PRESIDING OFFICER. The question now is on the engrossment and third reading of the bill.

The bill (S. 2194) was ordered to be engrossed for a third reading, was read the third time, and passed.

AMENDMENT OF SHIPPING ACT OF 1916

The Senate resumed the consideration of the bill (H.R. 6775) to amend the Shipping Act of 1916, as amended, to provide for the operation of steamship conferences.

Mr. KEFAUVER. I yield to the Senator from California for the purpose of the Senator from Wisconsin asking some questions of him.

Mr. WILEY. Mr. President, will the Senator from California yield?

Mr. ENGLE. I yield.

Mr. WILEY. I desire to ask the distinguished Senator from California a few questions relating to the opinion of the Department of Justice found at pages 30 to 37 of the committee report on H.R. 6775. I read the third paragraph on page 31:

Sections 3 and 4 of the subcommittee print depart radically from the version of H.R. 6775 which was unanimously enacted by the House of Representatives on June 12, 1961. The House legislation contained provisions in sections 1 and 2 (to which secs. 3 and 4 of the subcommittee print are roughly comparable) designed to protect competing carriers, shippers, and the general public from untoward effects of the use of dual-rate contracts by ocean shipping conferences. These competitive safeguards—the very heart of this legislation, in our opinion—have been eliminated, either directly or in effect, from the subcommittee print.

What is the answer of the distinguished Senator to that criticism?

Mr. ENGLE. The Department of Justice wanted in the bill the language which is proposed in an amendment to be offered by the distinguished Senator from Tennessee, which would replace certain House language. The language which the Senator from Tennessee wishes to reinsert in the bill reads: "is intended or will be reasonably likely to cause the exclusion of another carrier from the trade."

That is what the Justice Department is referring to in this paragraph. We struck out that language because the Maritime Board said to us that they could not authorize any conference with that language in the bill. It would exclude the conference system, because the conference system, when set up, may tend to cause an exclusion of some people from the trade. That is the purpose of it. We make no bones about it. We simply say, "If you want the conference system, you have to leave that kind of language out. If you put that language back in, you might as well throw the bill in the wastepaper basket, because all you have done is march up the hill, authorize the conference system, and then marched back down the hill and deauthorized the conference system."

The Maritime Board came before us and said: "If you leave this language in the bill, you are not going to have any conference. The question is whether you want a conference system."

The answer to that question is plain to everyone. They all said they want the conference system. The shippers want it. The ship operators want it. The Maritime Board wants it. The foreign-flag lines want it. The State Department wants it. Everybody wants the conference system. If we put that language I have read back in the bill it will in effect deauthorize the conference system; it will negate the purpose of the bill. That is why we took the language out of the bill. That is the basis on which we will oppose the amendment of the Senator from Tennessee, to add the language to the bill. If we put that language in the bill we might as well throw the bill in the wastepaper basket.

Mr. WILEY. I thank the Senator. I now ask him to refer to page 33 of the committee report. I read from the top of the page:

> The Department of Justice considers indispensable to any reasonable enactment on dual-rate and steamship conference agreements the inclusion of language unequivocally barring the approval of such agreements where they are intended or will be reasonably likely to cause the exclusion of another carrier from the trade. Assistant Attorney General Loevinger indicated in his testimony before the Merchant Marine and Fisheries Subcommittee on August 3, 1961, how important are the actual and potential benefits of this legislative protection to American carriers, shippers and the general public. Judge Loevinger noted that, even though at a given moment there may be no American carrier operating independently of the conferences, the ability of an American carrier to withdraw without fear of conference retaliation provides it with leverage within the conference which may be exerted to avert action which may be adverse to its interests or to the foreign commerce of the United States. This is of extreme significance to American carriers which account for only a small vote in virtually every important conference serving our foreign trade.

Does the Senator agree or does he disagree with that conclusion?

Mr. ENGLE. The first part of the paragraph refers to the barring of approval of such agreements where they are intended or will be reasonably likely to cause the exclusion of another carrier from the trade. That is precisely the language that I read in the amendment that is to be offered by the Senator from Tennessee. The remarks I made with reference to that language would apply in answer to that particular portion of what the Attorney General had to say.

The Justice Department does not support conference arrangements. It is against conference arrangements. The language proposed by the Justice Department would defeat conference arrangements and would make it impossible to have conference arrangements. That is the reason I said in my opening remarks, as well as in the remarks that I made to our committee: We must decide whether or not we want a conference system. If we want the conference system, we must not do things which will deauthorize the conference system and destroy it.

The Justice Department's attitude is that if they cannot stop the bill they want to write into it a provision which will make it impossible for the conference system to work. What I said with respect to the language proposed in the amendment suggested by the Senator from Tennessee applies specifically to this paragraph.

They talk about the common carrier not being able to get out of the conference. The common carrier can get out of it. All it need do is to serve notice within the framework of the bill. They can get out of it if they want to. A common carrier can get out of it if it wants to do so.

Let me emphasize this point. There is not one American-flag line common carrier today who does not want to get into these conferences. The Isbrandtsen Line brought the suit in the Supreme Court, in which it was decided that the conference arrangement—and I said that conference arrangements have been in operation for almost 100 years—violated the antitrust laws. That decision has been held in suspension by repeated enactments by Congress since 1958. The Isbrandtsen Co. appeared before our committee and said that they wanted to get into the conference system and was ready to go along with it. No American-flag line common carrier today has indicated that it did not want to be a part of the conference system. All of the common carriers under the American flag want to get in. This bill applies only to common carriers.

Mr. KEFAUVER. Isbrandtsen is practically forced to get in. The statement that there are no American-flag carriers who do not want to work independently is not borne out by the record.

In my presentation I will show that there are 28 carriers who want to operate independently in at least one trade. Of course, some of these who want to operate independently may be in some conferences. I have a list here dated September 1 of this year which shows that at least one of the lines operates outside 28 conferences. I will be glad to show it to the Senator, if he wishes to see it.

Mr. ENGLE. I do not know of any flag line common carrier that objects to this proposed legislation.

Mr. KEFAUVER. I will show the Senator a list of 28 conferences in which at least one U.S. company wishes to operate independently.

Mr. ENGLE. If they wanted to operate independently, they should have come before the committee and opposed the bill. They have not done so. The record is replete with the support of American flag lines for such legislation.

To reply to the Senator from Wisconsin, I answer in two parts. The first part applies specifically to matters just referred to with respect to the exclusion or possible exclusion of other lines. What I said about that was that that language simply deauthorizes the conference, because the Maritime Board has said that with that language in the bill, they cannot approve them.

With reference to the second point, if a line wants to get out, it can get out after giving 90 days notice.

Mr. WILEY. May I continue? I have a few more questions I wish to ask. I refer the Senator to the following paragraph on page 33. It is a part of the opinion of the Department of Justice.

> It is important also to bear in mind that in the ocean trades competition is the only practical restraint on unduly high freight rates.

Then, beginning in the fourth paragraph on page 33, we read:

> For the reasons outlined above, we urge the committee to delete the provision appearing in the subcommittee print beginning at line 22 on page 5, which completely nullifies the protection for nonconference carriers contained in the House-passed version.

What is the Senator's comment on those statements?

Mr. ENGLE. My comment on the first sentence is that competition is not the only restraint; that in the bill we provide that if any conference establishes a system of rates which is discriminatory, unfair, against the public interest, or detrimental to the foreign commerce of the United States, the Federal Maritime Commission will disapprove of that conference. So the conference must work within the framework of reasonable rates and reasonable procedures. If it does not, then the Maritime Commission is authorized to break up the conference by demanding that the American-flag lines pull out.

It must be remembered that the United States has no power to export the regulatory procedures of our Government. For instance, we cannot apply a rate structure procedure to foreign lines; they simply would not submit to it. I read earlier a list of 12 nations which have made it very plain that they will

not put up with the United States establishing a rate procedure such as we have for the railroads, which are all domestic, or for bus lines or for any of the other several types of domestic carriers. But we have gone as far as we can go in saying that when a conference establishes a rate structure which is discriminatory or unfair to shippers or as between ports or is adverse to the trade of the United States—for instance, the conference might provide for a higher rate going out than the rate coming in—the Commission can stop it.

We have provided a limited or qualified monopoly system. There is no question about it. I call it a qualified monopoly, because ordinarily a monopoly excludes everybody. The bill provides that every shipping line that wishes to do so may enter the conference. It is open-ended. Anybody can get into it on the same basis as those already in it; but even after they get in, if the conference does not establish fair rates, if it establishes rates which are discriminatory or against the public interest, the Commission has the power to pull the American-flag lines out. That would break the conference. That is my answer to what we have provided.

The latter part of the Senator's comment refers to some language in the bill which I would have to locate in order to comment on it specifically. Apparently the Attorney General was referring to a committee print different from the one which finally came from the committee. It is difficult for me to identify the particular language to which reference was made. However, I shall be glad to look it up and answer the Senator subsequently, after I have had time to find the language.

Mr. WILEY. I suppose the Senator does not agree with the conclusion set forth of the opinion, as appears on page 34 of the report:

> We believe that the House approach is the more reasonable. It places the burden where it belongs, that is, upon the proponent and expected beneficiary of the proposed dual-rate contract.

I assume the Senator does not agree with that statement.

Mr. ENGLE. No, I do not. Let me say why. The House version approached the problem backwards. Instead of directly authorizing a conference system and providing conditions, it said that conferences were not authorized except "as follows," and so forth.

We turned it around and put the case in the affirmative; we authorize the conference system and set up the conditions.

Mr. WILEY. Another paragraph in the Attorney General's opinion, on page 34 of the report, reads:

> Another provision deleted from the House enactment which should be reinstated is that precluding any requirement that shippers divert their shipments from natural routings. The purpose of this provision was to insure shippers freedom to choose the ports from which and to which to ship their goods. It is one thing for Congress to permit a system of contracts under which shippers must promise that when they ship from a particular port they will use conference vessels, but it is a wholly different thing to permit conferences to compel shippers to ship from a particular port when it may be more economical for them to ship from other ports which the conferences may not happen to serve. The Department of Justice recommends that the House provision on this point be reinstated in H.R. 6775.

What about that statement?

Mr. ENGLE. We simply require the shippers to use the conference lines routes when the conference lines have the capacity and the space available. If the space is not available, then the shippers do not have to use those routes, and they may be freed immediately from that requirement. The Senator will find that reference on page 11 of the report:

> In addition, no contract could be approved unless it expressly—
>
> (a) permitted prompt relief of the contract shipper with respect to any shipment for which the contract carrier or conference could not provide the space he needs on reasonable notice.

In other words, if a conference agreement were established in which the shipper said he would ship his goods with the conference, at conference rates, and he examined the schedules with reference to what the conference provided with respect to cargo and tonnages, if the conference could not provide the shipper with the service, he would have a right under this provision to get out. I think the committee took care of the Attorney General's complaint in that respect.

Mr. WILEY. The fourth paragraph of the Attorney General's opinion, on page 35 of the report, reads:

> Clause 5 of section 3 of the subcommittee print permits the approval of dual-rate systems where the maximum spread between contract and noncontract rates is 15 percent. We view any spread in excess of 10 percent as unwarranted. In this connection, it should be noted that the House report indicated a problem in determining a maximum spread figure which would not penalize a shipper who does not choose to limit his shipments to conference vessels and which at the same time would provide a reasonable inducement to execute such agreements.

Why was the 5 percent added?

Mr. ENGLE. The 5 percent was not added. The Attorney General favored a 10-percent spread. Let me describe exactly what happened. A dual-rate system is provided for. Dual rate means that a lower rate is provided for shippers who agree to ship all, or substantially all, of their commodities within the conference.

The other rate is a higher one. So, actually, the shipper gets a lower rate if he commits himself to ship with the conference. That leaves two rates—the rate paid if there is no agreement to ship a substantial part of the goods, and the rate if there is such an agreement. What is the spread between them? The spread provided by this measure is 15 percent. Some may argue that it should be 10 percent; some may argue that it should be 20 percent. But the committee examined the entire situation, and arrived at the 15-percent figure on the basis of the information which appears on page 14 of the report, as follows:

> Of the 62 dual-rate conferences serving U.S. ports in 1959, 21 expressed their spread between contract and noncontract rates in percentage figures (showing the percentage above the contract rate of the noncontract rate). Of the 21, 18 were using a 20-percent spread; 1, 15 percent; and 2, 10 percent. [See Hearings Before Antitrust Subcommittee of Committee on the Judiciary, House of Representatives, on Monopoly Problems in Regulated Industries; Ocean Freight Industry, 86th Cong., 2d sess., pt. 1, vol. 1, at 740–741 (1959).]

In short, one group had 20 percent; one group had 10 percent. We provide for 15 percent.

Mr. WILEY. The Department of Justice is convinced that it is not in the public interest to have agreements which may create a monopoly in connection with such shipments. Does the bill as reported create a monopoly?

Mr. ENGLE. It creates what I call a semimonopoly or a qualified monopoly. Such semimonopolies, in one form or another, have been in existence since 1877. Every study made of this subject—and there have been numbers of them; the first was in 1909, by a royal commission of the British Government, which investigated all this conference business; and in 1912 there was the so-called Alexander committee hearings; and there were the hearings with reference to the 1916 Shipping Act; and there were hearings with reference to the 1936 Shipping Act—every one of them arrived at precisely the same answer; namely, that in the area of common carriers in the international maritime business, there cannot be stability within the industry without having a conference system; and the alternative is to go into a rate war, which ends with the big ones swallowing the little ones, and then there is a worse monopoly situation than ever.

In other words, every study made of this subject, over a period of more than 50 years, has arrived at precisely the same answer, which is exactly opposite to what the Attorney General has stated.

So we disagree with the Attorney General; let there be no question about that. That is the issue before the Congress in connection with this legislation. The State Department, the Department of Commerce, and the Maritime Commission all support this legislation. The Department of Justice does not like it, because it proceeds to authorize a quasi-type monopoly operation.

We assert that history and 50 years of study have shown there is no other sensible way to proceed. We think it important not to let these people run hog wild and set rates any way they want to. That is why we have provided for control of this situation by the U.S. Maritime Commission, a public agency which is charged with acting in the public interest; and under our bill, it will have the responsibility of pulling out the American flag lines whenever any of the things listed on page 11 of the report are

done. A contract cannot be approved if the Commission finds the contract—

(a) Detrimental to the commerce of the United States; or

(b) Contrary to the public interest; or

(c) Unjustly discriminatory or unfair as between shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors.

In addition, no contract could be approved unless it expressly—

(a) Permitted prompt release of the contract shipper with respect to any shipment for which the contract carrier or conference could not provide the space he needs on reasonable notice,

(b) Provided that rates shall not be increased for a reasonable period, in no case less than 90 days, except in case of war or other force majeure,

(c) Covered only those goods of the contract shipper as to which he has the legal right at the time of shipment to select the carrier,

(d) Limited liquidated damages to what would be due at the contract rate on the particular shipment, less cost of handling,

(e) Permitted the shipper to terminate on 90 days' notice,

(f) Provided for a reasonable spread between contract and noncontract rates, in no event more than 15 percent of the noncontract rate,

(g) Excluded from the coverage of the contract, cargo loaded in bulk without mark or count, and

(h) Contained other appropriate provisions required by the Commission.

So the Maritime Commission will have power to impose even more regulations.

I am saying that although by means of this measure there will be established and specifically authorized a conference system with quasi-monopolistic features—quasi, because any common carrier can get in on the same basis with any other common carrier—nevertheless, in order to protect the public interest and keep the concerns in the conference from robbing the shippers or discriminating between ports, and so forth, we have provided that the U.S. Maritime Commission, a public agency, shall have the direct responsibility of seeing to it that the actions listed are not taken.

What is the difference between such an arrangement and the arrangements made in connection with the railroads and the airlines and the buslines in the United States today? Such arrangements must be made. The railroads have a monopoly, and there are monopolies in a great many other fields. And the railroads and the other groups are subject to regulation.

The problem of dealing with international shipping is that we cannot force the foreign-flag lines to accept American law. All we can do is provide "If you get out of line, and start robbing the public, we will require our Maritime Commission to pull out the American lines and break up the conference." That is the only power we have.

Mr. KEFAUVER. But there is a great deal of difference between that and the right of the Interstate Commerce Commission to regulate the railroads and the right of the Civil Aeronautics Board to regulate the airline transportation. The main thing they do is set the rates. But under this measure, the Maritime Commission would not have any power to set the rates.

Mr. ENGLE. How could our Government do that? Let the Senator from Tennessee explain how our Government could do that.

Mr. KEFAUVER. I shall explain.

As a matter of fact, at no time in the history of the Maritime Commission has any agreement ever been knocked out because of excessive rates, although there is ample clear proof to the effect that there have been many cases of excessive rates and complaints about the rates.

What can be done is adopt the language voted by the House, to the effect that no conference shall set a rate unreasonably high or unreasonably law. But the Senate committee deleted such language.

The main power of regulatory agencies is the power to set rates. But such a provision is completely absent from the Senate committee's version of the bill; and thus the American shipper would have no protection whatever, ratewise.

Mr. ENGLE. Mr. President, will the Senator yield so I may comment on that last remark?

Mr. KEFAUVER. Yes.

Mr. ENGLE. I wish to comment on the matter of setting rates. We can set the rates for concerns doing business in this country. We have jurisdiction to do that. We can set fares for air lines operating in this country, but we cannot set fares on international lines. We cannot do it; that is all there is to it. The other countries are not going to subject their flag lines to that kind of regulation. I gave a list of the countries that have stated they will not do it.

Mr. KEFAUVER. Mr. President, if the Senator will yield, he will find that the CAB sets the fares on international airlines landing in this country.

Mr. ENGLE. They cannot do it.

Mr. KEFAUVER. Whether they can or not, they do it. I will give the Senator the places and references where they do it.

Mr. ENGLE. We have statements from the State Department and representatives from the flag lines themselves. They simply will not accept the idea of American boards setting these rates. We are dealing with an international business. We are not dealing only with our own lines exclusively. As a consequence, we must enter into an arrangement which makes it possible for the conferences to operate on a voluntary basis, and include foreign nations.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. ENGLE. I yield.

Mr. WILEY. One particular point which has been discussed concerns me very much. For instance, if we want to ship some cheese to Genoa, we pay $6.38 per hundredweight, and they pay back to America $6.84 per hundredweight. My whole thought is that in a bill such as is under consideration we are trying to get at a situation which is very unhealthy at the present time. Our exports are dwindling. We find the charges we have to pay for exports are sometimes twice what are paid for imports. I presume this question has been examined by the distinguished Senator. If the Senator will refer to page 37——

Mr. ENGLE. Let me comment on that particular matter. We have included that authority in the power of the Commission. As I have said, we cannot put American regulatory bodies in the business of setting international shipping rates, because foreign countries will not accept it; but where they are unfair, discriminatory, or adverse to the foreign commerce of this country, the Commission has the authority and is directed not to approve the conference, but to disapprove it.

Mr. WILEY. I refer to page 37 of the report:

The Department of Justice also recommends the deletion of section 7 of the subcommittee print. This section would permit serious inroads to be made upon the confidential relationship between shippers and carriers established by section 20 of the 1916 Shipping Act.

I wonder what, if any, action was taken with reference to that recommendation.

Mr. ENGLE. Let me say this while we are getting section 7, so the specific language will be before me. As a result of the reprinting of the bill, there is a different alinement than that which was referred to in the Attorney General's letter.

Here is the problem with reference to the matter of asking shippers to supply data.

The House bill provided that foreign ship lines would be required to designate an agent who would be required to supply data with reference to all the contracts and shipping operations of the foreign lines. This is precisely what the State Department and the foreign countries to whom I referred objected. They said they would not permit their citizens to subject themselves to the jurisdiction of the U.S. Federal Maritime Board. As a consequence, they vigorously protested any effort on our part to give extraterritorial force and effect to American law.

What they are saying is that they will not permit their flag lines to supply information to American regulatory agencies.

On page 19 of the report, the last paragraph, at the bottom of the page, relating to section 6—these sections have been changed, as I indicated before—reads as follows:

To this provision we have added two clauses which should make it more acceptable to the Department of Justice. The Department pointed out that as passed by the House this provision would allow conference carriers to solicit and receive the specified information from freight forwarders, terminal operators, and other persons subject to the act, but that such "other persons" would not be immunized from the proscription of those portions of section 20, Shipping Act, 1916, which are not amended by this act. Accordingly, your committee added the phrase "or by any other person subject to this act," to the pertinent portion of the section. In addition, we added a

special protective provision that "the use of such information for any other purpose prohibited by this act or any other act shall be unlawful.

That is the end of the quotation of the section.

Mr. WILEY. Is it the opinion of the Senator that the bill as the committee reported it makes for competition or eliminates competition?

Mr. ENGLE. In my opinion, the bill would have a tendency to limit and restrict destructive competition. There is no question about that. The kind of competition we are trying to eliminate is the cutthroat competition in oceanborne trade which would make it impossible for shipping lines to maintain regular rates and routes, and would cause the big lines to swallow the little ones and result in a worse monopolistic situation. As a matter of fact, when the Royal Commission reported on this problem in 1909, that is exactly what it said.

I am not in favor of monopolies. I usually side with the distinguished Senator from Tennessee on the question. However, I do not know of any other way to handle international shipping than by following the procedure which has been in effect for nearly 100 years.

We are trying to put a regulatory force on top of these conferences to the extent we can execute American law. In my opinion, we have gone as far as we can go and have a conference system at all. The question is raised again, "Do we want a conference or not?" Every agency that has studied the problem for over 50 years has said we should have one.

I assure the Senate the legislation goes just as far as we can go in maintaining regulatory power over the conference system.

Mr. KEFAUVER. Mr. President, will the Senator yield?

Mr. ENGLE. The Senator from Tennessee has been very kind in yielding to me, and I am glad to yield back to him.

Mr. KEFAUVER. The House sent to the Senate a workable bill, with a minimum amount of protection.

Mr. ENGLE. Mr. President, will the Senator yield on that point?

Mr. KEFAUVER. I will yield in a moment. There was a minimum amount of protection provided for the shippers. All that protection has been removed from the Senate bill.

Mr. ENGLE. Mr. President, will the Senator please yield?

Mr. KEFAUVER. The Senator said that the Senate bill went as far as it could in trying to regulate and to treat fairly American shippers. I think the Senator is badly mistaken about that. Never in the history of the Maritime Administration has any conference been set aside because of excessive rates.

The Senator talked about aviation. I shall have the citation in a little while, but I merely say the IATA suggests rates, and then our law provides that the Civil Aeronautics Board must specifically approve or disapprove of the rates. The CAB has the right to disapprove, if the rates are unreasonable. The Senator even took out the little provision that the Maritime Board would have the right to disapprove any rates if it found them to be unreasonable. Even that small protection was taken out.

In connection with international shipping, we should certainly protect the independent carriers and the American shippers, in my opinion. Substantially all the protections have been removed.

Does the Senator wish to have me yield for a question?

Mr. ENGLE. Yes. I should like to make a comment. The Senator says that some provisions of the House bill were removed. The reason we removed the provisions which were in the House bill was that we were informed by everybody associated with the proposed legislation that we might as well throw the bill in the ash can if we kept those provisions in the bill.

Mr. KEFAUVER. I have read the hearings.

Mr. ENGLE. Will the Senator yield, to let me go further?

Mr. KEFAUVER. I wish to challenge that statement.

Mr. ENGLE. I hope the Senator will let me finish.

Mr. KEFAUVER. Mr. Grant Arnold, the chairman of the Special Committee on Study of the Shipping Act of 1916, suggested amendments. One of the amendments he suggested referred to the taking out of the antitrust provisions.

Mr. Thomas E. Stakem, the Maritime Administrator, said the House amendments would be difficult to handle, but, if I read his testimony correctly, he did not say the House bill would be worse than no bill.

In the hearings held by Representative BONNER, a great many shippers objected to the dual rate provisions. Even in the hearings held by the Senator from California, the representative of the Pacific Coast Coffee Association was very critical, as the Senator knows. Mr. J. Richard Townsend, counsel for the Pacific Coast Coffee Association, objected to the Senate bill and said that the House bill should be passed because it had some protections for American shippers.

Mr. ENGLE. The Senator's statement is correct about the counsel representing the Pacific Coast Coffee Association, but the great majority of the shippers are in favor of the proposed legislation. The distinguished chairman of the Committee on Commerce has a stack of telegrams he has received from various industry groups throughout the country. I wish to make it clear, if the Senator will be kind enough to yield once more, that we tried to make the bill which came to us from the House acceptable not only to the shipping industry and to the shippers, but also to the State Department, to the Department of Commerce, and to the Maritime Administration. They came in and said, "We cannot live with this bill." That is what they said. I said, "Why can you not live with it?" They said, "Because it is an attempt to give extraterritorial force to the antitrust laws and regulatory procedures of this country, and the foreign flag lines will not take it. The foreign governments will not take it." I said, "What would you do to get a conference? We cannot mandamus the foreign lines to come in."

We had to come up with a proposal which would be accepted voluntarily for participation. That is precisely what we did. We took out the extraterritorial force of the antitrust laws and domestic regulation. Then we provided, in addition to the arrangement under which the conferences would be affirmatively approved and legalized, that nevertheless the Maritime Administration would be required to see that the conferences were run in the public interest and not with discriminatory rates or procedures.

Mr. KEFAUVER. May I answer the Senator?

Mr. ENGLE. That would be true in all respects, I say to the Senator.

Mr. KEFAUVER. Which member of the Maritime Administration said they could not live with this bill? I cannot seem to find that.

Mr. ENGLE. That was the import of the testimony.

Mr. KEFAUVER. Which one said it?

Mr. ENGLE. This was the import of the testimony.

Mr. KEFAUVER. I cannot find where it was said they could not live with the bill.

Mr. ENGLE. I would not say that precise language was used.

Mr. KEFAUVER. What language was used?

Mr. ENGLE. All three of these agencies support the bill now before the Senate, the bill the committee reported. The committee voted unanimously to report the bill to the Senate.

Mr. MAGNUSON. Mr. President, will the Senator yield?

Mr. KEFAUVER. I had agreed earlier to yield to the Senator from Virginia [Mr. BYRD].

Mr. MAGNUSON. I merely wished to have printed in the RECORD at this point, by unanimous consent, the statement of the Honorable Thomas E. Stakem, Maritime Administrator, shown beginning on page 45 of the hearings.

Mr. KEFAUVER. I yield for that purpose, but I ask unanimous consent that, following, there also be printed the statement by J. Richard Townsend, counsel for the Pacific Coast Coffee Association, as shown beginning on page 129 of the hearings.

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

STATEMENT OF THOMAS E. STAKEM, MARITIME ADMINISTRATOR AND CHAIRMAN OF THE FEDERAL MARITIME BOARD

Mr. STAKEM. Thank you, Mr. Chairman.

Mr. Chairman, my statement is short. Knowing the committee has a short time in which to hear a lot of witnesses, I think I can get by within my time allotted.

The Federal Maritime Board appreciates this opportunity to appear before your committee and to testify on H.R. 6775. I understand that the committee has a number of witnesses scheduled to testify today and accordingly shall make this statement as brief as possible and touch on the highlights of the bill.

The first section of H.R. 6775 deals with dual rates. This portion of the bill while designed to legalize dual rates, imposes certain standards in connection with their ap-

proval. Thus H.R. 6775 requires that before any dual rate system may be approved the Board must find with respect to such system:

(a) That the system is not intended to cause the exclusion of any other carrier from the trade (p. 2, lines 10–12).

(b) That the system will not be reasonably likely to cause the exclusion of any other carrier from the trade (p. 2, lines 11–12).

(c) That the system will not be detrimental to the commerce of the United States (p. 2, line 13).

(d) That the system will not be contrary to the public interest (p. 2, line 14).

In addition, it would require the Board to withdraw permission as to any system if it finds—

(e) That the system tends to cause the elimination from the trade of any carrier (p. 3, lines 21–22).

(f) That the system prevents the entry into the trade of any carrier (p. 3, lines 21–22).

These general standards obviously overlap to a great extent, and yet the inclusion of each by specific mention in a legislative enactment creates the presumption that each has a separate and distinct meaning. The multiplicity of these standards and limitations and the difficulty of allocating separate significance to each one will make for confusion and much litigation.

In addition to these general standards, the bill requires that every dual-rate system shall conform to the seven specific requirements enumerated from page 2, line 15, through page 3, line 15.

These specific requirements are effective curbs upon the competitive impact of the dual-rate system. In addition, the Board is authorized by clause (8) (p. 3, lines 15–17) to require other provisions, not inconsistent with the rest of the section, to be inserted in any dual-rate system.

We believe that these seven specific requirements, together with such other limitations as may be required by the Board under the authority of clause (8), sufficiently insure against the use of any unfair or coercive system.

We believe that it is unnecessary in addition to prohibit expressly any system which is intended to cause the exclusion of any other carrier, or which will be reasonably likely to cause the exclusion of any other carrier, or which will be detrimental to the commerce of the United States, or which will be contrary to the public interest, or which will tend to cause the elimination from, or prevent the entry into, the trade of any carrier.

The accumulation of all of these separately articulated standards would present a difficult problem to the officials responsible for administering the statute.

We favor legalization of the dual-rate system because we have found it to be necessary at times to prevent instability and chaotic rate competition between conference and independent.

We believe that the hearings of the House Merchant Marine and Fisheries Committee over the past 2 years prove that such legalization is favored as well by shippers and receivers of cargo, and by the steamship industry.

Given this general consensus of opinion, we feel that there is a clear call for legislation effecting a legalization of dual rates. The multiplicity of standards established in the bill, however, may mire down applications for permission to use the system into such lengthy litigation as to make the stabilizing effects of the system available, if available at all, only after long delay.

And, finally, even after a system is ultimately permitted, it might be so watered down as to lose its effectiveness as a control over destructive rate competition.

The balance of H.R. 6775 makes certain amendments and additions to the Shipping Act, 1916, generally designed to strengthen the act and make it more effective. Two points therein merit comment at this time.

At page 6, lines 14 through 19, H.R. 6775 appears to establish a mandatory requirement that every conference agreement shall contain effective provisions for policing the obligations under it. It is not clear whether such provisions provide for policing by the members themselves, by the Federal Maritime Board, or by some other body. Presumably, however, this means some form of self-policing. Clarification of this point would be desirable. Assuming that it refers to a system of self-policing, it is suggested that some discretion should be allowed the Board as to the form of system to be used.

Section 7(c) of H.R. 6775 authorizes the Board to make such rules and regulations as may be necessary to carry out sections 14, first (b), 15, 18(b), 19(b), 20, and 21 of this act. The limitation of the Board's rulemaking authority in aid of these specifically named sections may imply an absence of such authority in aid of other sections of the act.

The Board believes that it has such general rulemaking authority, although the Shipping Act does not contain an express grant thereof. We believe that an express grant of such general authority is desirable.

Finally, we should like the record to show that the Federal Maritime Board and the Secretary of Commerce submitted to the House Merchant Marine and Fisheries Committee additional recommendations for the enactment of several largely procedural provisions which we believe to be essential to the adequate and effectual administration of the substantive provisions of the Shipping Act.

These recommended amendments, however, have not been included in H.R. 6775 as it passed the House. The Board will submit to the Congress draft bills covering the points in question so that further consideration can be given on the merits of each recommendation.

The Bureau of the Budget advises there is no objection to the submission of this statement from the standpoint of the administration's program.

Senator ENGLE. How soon, Mr. Stakem, can you have the draft bills available for the committee?

Mr. STAKEM. Yes, we do have them.

Senator ENGLE. Do you have them with you?

Mr. STAKEM. Not with me.

Senator ENGLE. How soon can you have them up here?

Mr. STAKEM. The complete language of the drafts is included in the House hearings. Whether they have been actually put in the form of a bill, I do not know. But it would be a matter of a very short time, Mr. Chairman.

Senator ENGLE. Senator BUTLER.

Senator BUTLER. I have no questions at this time.

Senator ENGLE. Thank you very much for your statement, Mr. Stakem.

If we have a choice between letting this law die and extending it, which do you prefer we do?

Mr. STAKEM. If the choice is between this bill and no bill, which would leave the dual rate systems high and dry, we would say this bill.

If the choice is between this bill and interim legislation for a continued period of study, we would favor the interim legislation.

Senator ENGLE. When you say "interim" you do not mean a long time?

Mr. STAKEM. One year.

Senator ENGLE. Thank you very much.

Thank you for your statement.

Our next witness is Mr. Edwin M. Martin, Assistant Secretary for Economic Affairs, Department of State, Washington, D.C.

Mr. Martin?

STATEMENT OF J. RICHARD TOWNSEND, COUNSEL, PACIFIC COAST COFFEE ASSOCIATION, SAN FRANCISCO, CALIF.

Mr. TOWNSEND. I have a very short statement, Mr. Chairman, that I would like to make. It will take about 10 minutes.

My name is J. Richard Townsend, I am an attorney in San Francisco and am attorney for the Pacific Coast Coffee Association, for which I am appearing today.

The Pacific Coast Coffee Association is a trade organization composed of 70 firms engaged in the importation, sale, or manufacture of coffee on the Pacific coast. Its members constitute practically the entire coffee industry on the Pacific coast.

Coffee is the leading import to the Pacific coast of the United States in dollar value. This coffee is imported principally from Brazil, Colombia, and the west coast of Central America and Mexico.

The Pacific Coast Coffee Association and its members have a very great interest in the dual rate legislation that is under consideration, since the dual rate system applies in three of the four principal trade routes of coffee to the Pacific coast.

Mr. Edward Bransten, chairman of the steamship committee of the association, and I have testified three times at hearings before House committees concerning this legislation, twice before a subcommittee of the House Merchant Marine Committee and once before the Antitrust Subcommittee.

Mr. Bransten is presently in Central America on business and is unable to be here today, so I have been asked to present the views of this association concerning H.R. 6775.

In his earlier testimony, Mr. Bransten pointed out in detail the serious adverse effects of the present dual rate system on the Pacific coast coffee roasters and importers. In the coffee trades to the Pacific coast that employ the dual rate system, the exclusive patronage agreements are signed by the receivers of coffee in this country, and such agreements cover coffee exclusively.

There is absolutely no nonconference competition in the trades which employ the dual rate system on coffee to the Pacific coast. At the present time, therefore, the coffee receivers on the Pacific coast have absolutely no bargaining position concerning the contents of the dual rate agreements, and they have no statutory assistance in that respect under the present law.

They are compelled to enter into any dual rate agreement that the conference places before them because, for competitive reasons, they cannot pay the noncontract rates, which are $3 per ton higher than the contract rates in these trades.

The result of this has been that the dual rate agreements in these trades place very heavy obligations on the receivers of coffee, and practically no obligations on the carriers. Because of this monopolistic situation, the dual rate conferences have been able to disregard the interests of the Pacific coast coffee industry in the matter of rates and steamer service.

The matter of freight rates is discussed in detail in our earlier testimony. Suffice it to say here that the action of these dual rate conferences has placed the Pacific coast coffee industry at a competitive disadvantage with respect to the matter of freight charges.

The effect of the present dual rate system on steamer service is likewise very detrimental to the Pacific coast coffee industry. Although the steamship lines assert that the dual rate system results in improved steamer

service, the experience of our industry has been exactly the opposite, in two respects.

In the first place, the sailings of the different conference lines are not staggered. The lines follow each other into port, apparently for fear that one line will secure more cargo than another. The result is that the steamer sailings are bunched together, and then there is a considerable gap before additional sailings.

In the second place, for their own convenience the conference lines do not adhere to their published schedules, frequently changing announced vessel schedules for as much as 1 or 2 weeks. This creates very serious inventory problems for the coffee industry. Detailed testimony has previously been presented concerning the deficiencies of the steamer service in these dual rate trades.

The steamship conferences have disregarded requests to correct these rate and service situations. In the case of one important dual rate conference, there is not even anyone in authority in the United States with whom problems of the coffee receivers can be discussed. That conference operates from the west coast of Colombia to the Pacific coast of the United States, and its headquarters are in Cristobal, Panama Canal Zone, which is neither a point of origin nor a destination in the trade.

I desire to emphasize that under the present state of the law the Pacific coast coffee receivers are helpless to do anything about this situation. They have no outside steamship competition to which they can resort for assistance. The present statutes afford them no protection of any substance.

It is certainly not in the best interests of the foreign commerce of the United States that a situation such as this be permitted to continue. Two different committees of the House have been investigating the dual rate situation and holding hearings on this subject for more than 2 years last past. All of the interested parties have had a full opportunity to present their views and to suggest language which should be included in a statute that would authorize the use of the dual rate system.

We have taken advantage of this opportunity to offer specific suggestions to those committees, and many others have likewise made suggestions.

On the basis of such extensive investigations and hearings, the House Merchant Marine Committee, in cooperation with representatives of the Antitrust Subcommittee, has devised H.R. 6775, and this bill has been passed by the House.

The position of the Pacific Coast Coffee Association with respect to H.R. 6775 may be summarized briefly as follows: We believe that H.R. 6775 contains the very least protection that shippers and receivers of freight in this country are entitled to have against the tremendous power of a steamship conference which employs the dual rate exclusive patronage system.

In our opinion this is a good bill and it will go far toward eliminating the problems which have herefore existed under the dual-rate system. We believe that the shippers and receivers in this country should not be required to continue to operate any longer under the unregulated dual-rate system that has heretofore existed. Moreover, the continuance of such unregulated dual-rate system is contrary to the best interests of our foreign trade.

We believe that H.R. 6775 should be enacted promptly in its present form. If there are any aspects of this bill, such as the matter of requiring information from foreign steamship lines, which require further consideration, in our opinion these matters should be considered after the bill has been enacted, as possible amendments thereto.

We are strenuously opposed to the postponement of the protective features of this bill for another year or two while other provisions of the bill are being given further consideration.

After all of the investigations and hearings and all of the work that has gone into this matter, we believe that it would be most unfortunate and unfair to the shippers and receivers of freight in this country if they are to be compelled to continue to endure the abuses that are inherent in the existing dual-rate system for another year or two while certain aspects of the bill are reconsidered by the Senate.

The Pacific Coast Coffee Association hopes, and respectfully requests, that H.R. 6775 be enacted promptly, so that it will not be necessary to continue the existing unregulated system in effect and so that the shippers and receivers of cargo will have the protection against the powerful dual-rate conferences to which they have been found by the House committees to be entitled.

Mr. Chairman, with respect to a time schedule may I just add this: We hope that permanent legislation can be enacted by June 30. If this is impossible, we believe that any extension of the interim legislation should be for not more than 60 days, and that permanent legislation should be enacted during this session of Congress.

Our fear is that if all of the conflicting views are reconsidered, another 2 or 3 years will be consumed, and even then probably no one will be any more satisfied than today. And in the meantime the shippers and receivers of cargo will suffer the abuses of the present dual-rate system.

We believe that it is much better to enact H.R. 6775 promptly and then amend the law if experience shows that amendments are necessary.

These are our views in spite of the fact that not all of our suggestions were included in H.R. 6775.

We desire to thank this committee for the opportunity of expressing our views to it.

Senator ENGLE. Thank you, Mr. Townsend. You can be perfectly sure of one thing, that I am not going to sit through 13,000 pages of testimony.

Please express our appreciation to Mr. Bransten, who I know has given this problem very careful consideration over a long period of time.

Mr. TOWNSEND. Thank you, Mr. Chairman.

Senator ENGLE. We appreciate your coming in on such short notice.

Mr. TOWNSEND. Thank you.

Senator ENGLE. The next witness is Mr. T. R. Stetson, director of exports, United States Borax & Chemical Corp., Los Angeles, Calif.

The Chair would like to say that we are trying to get to the witnesses from the faraway places.

Mr. Stetson, can you complete your statement in 5 minutes?

Mr. WILEY. Mr. President, it is imperative that these conferences which have been discussed do not acquire so much power that they injure American industry. That is the purpose of some of my argument today. We must take into account, in making our decision, the question whether these conferences, which are simply a gathering together of various shipping companies, should be granted unfettered authority to set rates by common agreement.

I realize that it is claimed that we cannot interfere with these foreign companies. Why not? They come to our ports. They get the benefit of our merchandise. All we are interested in is to see that we get a fair shake in shipping our merchandise out.

I ask unanimous consent that following my previous remarks there be printed in the RECORD the Attorney General's opinion found at pages 30 through 37 of the committee report.

There being no objection, the opinion was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF JUSTICE,
OFFICE OF THE DEPUTY
ATTORNEY GENERAL,
Washington, D.C., August 16, 1961.

Hon. WARREN G. MAGNUSON,
Chairman, Committee on Commerce,
U.S. Senate, Washington, D.C.

DEAR CHAIRMAN MAGNUSON: We have been furnished by Mr. Webster, counsel for the committee, with the subcommittee print of H.R. 6775, dated August 8, 1961. Mr. Webster informed us on August 3, 1961, that the Department of Justice's comments on this print of the bill would be desired by your committee. Accordingly, we are pleased to submit the following report on the subcommittee print.

H.R. 6775 would amend the Shipping Act, 1916, as amended (46 U.S.C. 801 et seq.), in various respects. The comments which follow are directed to the provisions of the subcommittee print of the bill intended to effect changes in existing law which are of serious concern to this Department.

Section 3 of H.R. 6775 would amend section 14 of the Shipping Act by adding a new section 14b which would require the Federal Maritime Board (hereinafter referred to as "the Board") to permit the use by any common carrier or conference of carriers in foreign commerce of any contract which provides lower rates to shippers or consignees who agree to give all or any fixed portion of their patronage to such carrier or conference, if such contract would not have certain proscribed effects and if it meets requirements enumerated in the bill. The effect of enactment of section 3 would be to sanction the use in the ocean shipping trades of the exclusive patronage contract/noncontract rate system, more frequently referred to as the dual-rate system.

Section 4 of the bill would amend section 15 of the Shipping Act which deals with Board approval of agreements between carriers. The principal changes concern conference agreements.

Sections 3 and 4 of the subcommittee print depart radically from the version of H.R. 6775 which was unanimously enacted by the House of Representatives on June 12, 1961. The House legislation contained provisions in sections 1 and 2 (to which secs. 3 and 4 of the subcommittee print are roughly comparable) designed to protect competing carriers, shippers, and the general public from untoward effects of the use of dual-rate contracts by ocean shipping conferences. These competitive safeguards—the very heart of this legislation, in our opinion—have been eliminated, either directly or in effect, from the subcommittee print. Therefore, were H.R. 6775 to be enacted in its present form, it would give ocean shipping conferences virtually unrestricted license to employ dual-rate contracts, and other conference practices, as deliberate predatory devices to stifle the competition of carriers not affiliated with the conferences.

As the committee is aware, ocean shipping conferences operating in the foreign commerce of the United States are private organizations, somewhat akin to trade associations, organized to further the business interests of the participating steamship lines. While the conferences must file their agreements with the Board and secure approval prior to initiating joint action, because of the international nature of the shipping industry, the supervision which the Board may exercise is quite limited and hardly comparable to the comprehensive regulation exercised with respect to domestic transportation industries by such agencies as the

Civil Aeronautics Board and the Interstate Commerce Commission. For example, the Board has no jurisdiction over the reasonableness of rates charged by steamship lines in American foreign commerce and, except as to subsidized U.S. carriers, has no control over the adequacy, frequency, or regulatory of service provided by steamship lines operating to and from U.S. ports.

The most profound change in H.R. 6775 which would be effected by the subcommittee print deals with the right of nonconference carriers to enter or serve ocean trades with freedom from predatory and anticompetitive onslaughts by the conferences.

The typical shipping conference represents a tremendous concentration of power. On practically every one of the U.S. foreign trade routes the conferences enjoy monopoly control; indeed, there are few, if any, in which the conference does not control at least 80 percent of the liner cargo movement. In most trades the percentage is much higher. Absent the antitrust exemption which Congress provided in the Shipping Act, the joint rate-fixing activity and the other forms of anticompetitive collaboration typical of the conference system would do violence to the antitrust statutes. The history and weight of interpretation of the 1916 act amply demonstrate that while Congress made it possible for steamship lines to cooperate voluntarily in conference arrangements, Congress was equally determined to protect the rights of carriers who choose not to participate in conferences, as well as to insure to shippers the right to patronize nonconference carriers without retaliation from the conferences. Thus, for example, Congress specifically outlawed in section 14, first and second, of the Shipping Act two of the most vicious practices known in 1916 to have been employed by conferences against their competitors; namely, the deferred rebate and the operation of "fighting ships." In section 14, third, Congress similarly prohibited retaliation against shippers who patronize other carriers.

H.R. 6775 as enacted by the House of Representatives took into account the demand for legalization of dual-rate contracts but at the same time provided that such contracts not be used where designed to drive another carrier out of business or where the reasonably likely result of their use would be equally adverse to the public interest in maintenance of free competition. By contrast, the subcommittee print of August 8, 1961, reflects the philosophy that a carrier ought to join a conference or suffer the consequences of predatory conference action. It is this approach to legislation on dual rates which the Department of Justice finds so disturbing.

The changes effected in sections 1 and 2 of H.R. 6775 by the subcommittee print are not fully apparent until study is made of all the provisions of sections 3 and 4 of the subcommittee print, and particularly of section 4. While section 3 appears to retain in substance the language of the House-passed version which would bar approval of any dual-rate contract which is intended or will be reasonably likely to cause the exclusion of any carrier from the trade, section 4 would wholly nullify the purport of this key provision. Section 4 of the subcommittee print provides that "[i]f a common carrier is eligible but unwilling, on reasonable and equal terms and conditions, to join a conference approved by the Board and serving a trade, such carrier may not be deemed excluded from that trade, or prevented from entering it, or eliminated from it, within the meaning of all such terms as used in this section and section 14b of this act." The clear effect of the latter provision would be to deprive the nonconference carrier of the protection against unfair exclusion from a trade whenever the nonconference carrier has chosen to remain independent of the conference. Since almost every conference in the U.S. foreign trade would welcome the membership of the nonconference carrier in order to eliminate the latter's competition, it is impossible to conceive of a situation involving a nonconference carrier in competition with a conference which would not fall within the above-quoted language of the subcommittee print. In sum, therefore, the Committee on Commerce, in considering adoption of the proposed language of the subcommittee print vis-a-vis the language of the House enactment, will be deciding which concept shall henceforth apply to the ocean shipping industry: freedom of opportunity for all steamship lines, whether as conference members or independent operators, according to individual preference, as opposed to compulsory conference membership resulting in elimination of competition and monopolistic freight rates.

The Department of Justice considers indispensable to any reasonable enactment on dual-rate and steamship conference agreements the inclusion of language unequivocally barring the approval of such agreements where they are intended or will be reasonably likely to cause the exclusion of another carrier from the trade. Assistant Attorney General Loevinger indicated in his testimony before the Merchant Marine and Fisheries Subcommittee on August 3, 1961, how important are the actual and potential benefits of this legislative protection to American carriers, shippers, and the general public. Judge Loevinger noted that, even though at a given moment there may be no American carrier operating independently of the conferences, the ability of an American carrier to withdraw without fear of conference retaliation provides it with leverage within the conference which may be exerted to avert action which may be adverse to its interests or to the foreign commerce of the United States. This is of extreme significance to American carriers which account for only a small vote in virtually every important conference serving our foreign trade.

It is important also to bear in mind that in the ocean trades competition is the only practical restraint on unduly high freight rates. In this connection, the Under Secretary of State submitted to the Merchant Marine and Fisheries Committee on August 3, 1961, data obtained from foreign governments in response to the State Department's inquiry of them how reasonableness of rates is assured in waterborne commerce. Eight foreign nations—Belgium, Denmark, Federal Republic of Germany, Finland, Italy, Netherlands, Norway, and Sweden—of the 11 questioned, replied that they rely on free competition to achieve reasonable rates. The subcommittee print, however, would leave the way open for shipping conferences to eliminate the very competition which the United States has historically fostered and which a majority of foreign nations espouse, by withdrawing protection of the rights of the competitor who may choose to offer rate competition.

We would further direct the committee's attention to the example cited in Assistant Attorney General Loevinger's testimony of the unconscionable rate charged on an important commodity moving in American foreign commerce when there was no independent carrier providing competition in the particular trade. The entry of an independent carrier brought about a reduction of the rate from $80 to $40, the latter level being one which, by the admission of one of the American carriers involved, still permitted profitable operations.

For the reasons outlined above, we urge the committee to delete the provision appearing in the subcommittee print beginning at line 22 on page 5, which completely nullifies the protection for nonconference carriers contained in the House-passed version. This important competitive safeguard, but for the language beginning at line 22 on page 5, would be preserved in the subcommittee print. We deem it essential that these protective provisions be retained as they were in the House-enacted version of H.R. 6775.

There are other provisions of the subcommittee print on which comment should also be made. Whereas section 1 of the House enactment would require the proponents of dual-rate systems to establish in Board proceedings that the proposed dual-rate contract would not have the proscribed effects, the subcommittee print would shift the burden to opponents thereof or to the Board. The latter would have to prove by the preponderance of the evidence that a dual-rate contract would contravene the language of the bill. We believe that the House approach is the more reasonable. It places the burden where it belongs, that is, upon the proponent and expected beneficiary of the proposed dual-rate contract.

The subcommittee print also changes the House-enacted provisions dealing with dual-rate contracts by inserting the word "common" before the word "carrier" in several places. The insertion of the word "common" before the word "carrier" on line 17 of page 2 would limit the protection against exclusionary dual-rate systems to common carriers and would appear to permit the use of dual-rate contracts which are designed or are likely to exclude a carrier which is not a common carrier. We are aware of no justification for differentiating between the types of carrier that might be adversely affected by conference use of dual-rate contracts. We therefore recommend that the committee delete the word "common" wherever it has been added to H.R. 6775 by the subcommittee print. This comment would also apply to the addition of the word "common" on line 17 of page 5 of the print.

We turn now to the language of the subcommittee print which relates to provisions which must be expressly incorporated in any dual-rate contract to be lawful under the proposed legislation.

The subcommittee print would strike from H.R. 6775 the provision that prohibits dual-rate contracts from covering shipments of goods where the contract shipper has no legal right to select the carrier. The effect of this deletion will be to create endless controversy as to whether or not certain shipments, notably shipments of goods sold on f.o.b. and f.a.s. terms, are covered by approved dual-rate contracts. Without the provision contained in the House version, the way is left open for conferences to charge contract shippers with breach of their dual-rate contracts when they sell goods to buyers who elect to ship via nonconference carriers. The deletion of this provision could be construed to permit the conferences to forbid contract shippers from doing business with anyone who will not surrender his right to make his own shipping arrangements. We urge that this provision be restored to the bill in order that it be made clear that Congress does not intend to allow the shipping conferences to dictate the terms upon which one merchant must sell to another.

Another provision deleted from the House enactment which should be reinstated is that precluding any requirement that shippers divert their shipments from natural routings. The purpose of this provision was to insure shippers' freedom to choose the ports from which and to which to ship their goods. It is one thing for Congress to permit a system of contracts under which shippers must promise that when they ship from a particular port they will use conference vessels, but it is a wholly different thing to permit conferences to compel shippers to ship from a particular port when it may be more economical for them to ship from other ports which the conferences may not happen to serve. The Department of Justice

recommends that the House provision on this point be reinstated in H.R. 6775.

We are also concerned with clause 3 of section 3 of the subcommittee print. This clause would limit damages recoverable for a shipper's breach of a dual-rate contract to actual damages, but the proviso permits liquidated damages not to exceed the freight charges at the contract rate, less cost of handling.

We reiterate our previous objection to the proviso in this clause. It is our understanding that clause 3 is in the bill for the purpose of barring the past practice of disguising oppressive penalties in the form of liquidated damages. At the same time it was desired to permit liquidated actual damages where desired by the parties so as to avoid possible future uncertainties and controversies in situations where actual damages were difficult to prove.

We are convinced that the present formula will not achieve the objective of eliminating penalties. The proviso assumes that the actual damages for a shipper's breach of a dual rate contract are the same as damages resulting from breach of a space reservation or booking contract. As was made clear in Assistant Attorney General Loevinger's testimony on August 3, 1961, the present proviso, which in effect equates the two types of damage, can only result in damages for a shipper's dual rate contract breach far in excess of actual damages. In its present form, therefore, the bill still leaves the way open for unduly harsh and punitive results.

While we recognize that any effort to specify liquidated damages may not in all cases result in an approximation of the actual damages, we observe that no liquidated damage formula has been advanced which does not also constitute a severe penalty all out of proportion to the actual damages suffered by the conference or its members. Since the demand is for a measure which is certain, is fair to the carrier, but at the same time not oppressively punitive, we respectfully suggest that the committee place a maximum limit on liquidated damages of 1½ times the spread between contract and noncontract rates. This, we believe, is a fair and reasonable approach to the problem. It would deter a shipper from disregarding his dual rate contractual obligations, but would not place him in jeopardy of being required, in the event of breach, to pay the conference an amount clearly having no logical relation to the loss which the conference can be considered to have sustained.

Clause 5 of section 3 of the subcommittee print permits the approval of dual-rate systems where the maximum spread between contract and noncontract rates is 15 percent. We view any spread in excess of 10 percent as unwarranted. In this connection, it should be noted that the House report indicated a problem in determining a maximum spread figure which would not penalize a shipper who does not choose to limit his shipments to conference vessels and which at the same time would provide a reasonable inducement to execute such agreements. It is the considered view of the Department of Justice that the 15-percent maximum spread provided for in clause 5 of section 3 of the subcommittee print does not strike such balance. Rather, it weighs heavily on the side of coercing shippers to limit their cargoes to conference vessels. All would agree that shippers should be provided with a realistic choice in deciding whether to contract to ship exclusively on conference vessels or whether to retain their right to ship on both conference and nonconference vessels as they choose. There is good reason to believe that a spread of 15 percent would foreclose this choice.

While the difference between a 10- and a 15-percent spread may seem to be solely a matter of degree, the fact is that in the highly competitive and price-conscious world of international trade an additional handicap of 5 percentage points in freight rate markedly reduces a shipper's ability to determine whether he would prefer freedom to use both conference and nonconference vessels rather than being limited to the use of one type of service. We recommend that a 10-percent maximum be written into this clause by the committee.

We would next direct the committee's attention to the provision of section 4 of the bill which in effect would permit Board approval of agreements between conferences serving different trades which are competitive, with the proviso that each conference retain what the bill refers to as the right of independent action. We urge the committee to delete the proviso thereby clearly prohibiting any interconference agreements. While the existing language of the bill gives a conference the right to take independent action on matters embraced within the agreement, it nevertheless permits all parties to an agreement to establish a uniform policy on rates and other competitive matters when it serves their purpose to do so. The Department of Justice is convinced that it is not in the public interest to permit agreements which may create a virtual monopoly of ocean transportation to or from this country. Congress should not sanction private rate-fixing schemes or supercartels which could embrace every port through which the foreign commerce of the United States is conducted. Such an arrangement would deny shippers the cost savings resulting from their location on or in proximity to a particular coastal range.

Another amendment to section 15 of the Shipping Act is the provision of section 4 of the subcommittee print requiring conferences to police their agreements. We question the policy requiring conferences to engage in private policing. Congress should neither require nor permit cartels, even the ones in ocean shipping, to use penalties to coerce compliance with their cartel agreements. Nor do we believe Congress should delegate to cartels the responsibility for enforcing our maritime laws, especially in view of the potential harm that could be caused by unwarranted coerced disclosure of confidential business records to competitors and from the assessment by the cartels of harsh or discriminatory penalties.

Section 5 of the subcommittee print provides that agreements filed with the Board after passage of the proposed act are lawful until disapproved by the Board. There is no limit set on the period within which the Board must act on such agreements. The exemption from the antitrust laws of any cartel agreement, and certain cartel tying devices, is a most serious matter and a departure from our free enterprise principle that competition should be the rule of trade. No dual-rate agreement should be permitted to go into effect for an unlimited period.

The Chairman of the Board, in his testimony before the House committee, indicated that a 1-year period would be a realistic one within which to review and dispose of the number of agreements which are likely to be filed after passage of this legislation. If it takes the Board a longer period to review such agreements, at least the unsupervised dual-rate system cannot continue to be employed during any such delay. On the other hand, under the provision in the subcommittee print, any delays experienced by the Board would have the effect of permitting the unsupervised dual-rate system to continue in effect. Clearly, this would encourage dilatory tactics and tend to postpone indefinitely the clarification of status of all fuel-rate contracts which for the past 3 years Congress has been seeking to provide.

The Department of Justice also recommends the deletion of section 7 of the subcommittee print. This section would permit serious inroads to be made upon the confidential relationship between shippers and carriers established by section 20 of the 1916 Shipping Act. It must be appreciated that shippers are required to disclose certain of their private business affairs to carriers to permit the assessment of proper tariff charges. Under section 20 of the Shipping Act the carriers are in return put under the obligation of maintaining such data in secrecy so that the shippers' business transactions are not disclosed to competitors and that such information is not used in any way to the shippers' detriment.

The proposed legislation would depart from the traditional concept of section 20 and would cause a substantial lessening of the protection which shippers now enjoy. Under the instant bill not only could a common carrier furnish data on a shipper's transactions without the shipper's consent but a "conference or any person, firm, corporation, or agency designated by the conference" could solicit information as to a shipper's transactions. Presumably this data could be solicited from freight forwarders, terminal operators, warehousemen, or any other persons subject to the Shipping Act who may have knowledge of the shipper's transactions. This would involve a radical change in public policy and, in our opinion, would open the way for widespread abuses and breaches of confidence in the shipping industry.

In addition to these potential results, the bill creates an apparent paradox. While a conference or its agent would be permitted by the proposed legislation to solicit information without limitation, those other than a conference carrier who might be solicited would still be restrained by the language of section 20 from disclosing the solicited information. Thus section 7 of the instant bill would authorize the solicitation of data from persons whom, were they to divulge it, could be criminally prosecuted for doing so. Any further attempt to deal with this anomalous situation would probably create more problems than it would solve. Even if all persons suoject to the Shipping Act were to be authorized to release data for the purposes stated in the bill, a terminal operator or warehouseman would obviously act at his peril in relying on a representation that confidential data he was solicited to disclose was desired solely for one of the purposes permitted by the bill.

For the reasons indicated in the foregoing analysis, the Department of Justice respectfully urges the Committee on Commerce to amend the subcommittee print of H.R. 6775 in accordance with the recommendations contained herein.

The Budget Bureau has advised that it has no objection to the submission of this report from the standpoint of the administration's program.

Sincerely yours,

BYRON WHITE,
Deputy Attorney General.

Mr. KEFAUVER. Mr. President, I wish to clear up one or two items which the distinguished Senator from Washington [Mr. MAGNUSON], chairman of the Committee on Commerce, placed in the RECORD. He referred to a statement by Mr. Stakem, who was the Maritime Administrator, who testified before the Senate committee. Instead of saying that if he had a choice between the House bill and no bill, he would rather have no bill, I find on page 47 that he said:

> If the choice is between this bill and no bill, which would leave the dual-rate systems high and dry, we would say this bill.

I thought that statement ought to be clarified.

I think also, for the purpose of clarification, it should be stated that the Civil Aeronautics Board, under title 49, section 1373, has the power to reject unreasonable rates. I make this reference so that anyone who is interested may read the provision for the Civil Aeronautics Board in connection with the Senate bill. From a reading of the Civil Aeronautics Board authorization, it is apparent that that Board is given greater power over the fixing of tariffs, passing upon their reasonableness, and also preventing monopoly and unjust discrimination than is provided for in the Senate bill in connection with water carriers.

Mr. ENGLE. Mr. President, will the Senator from Tennessee yield?

Mr. KEFAUVER. I yield.

Mr. ENGLE. I am advised that the international airlines, which have an International Air Transport Association, undertake to agree on rates in the same fashion as we provide for the steamship common carriers in the proposed legislation.

Mr. KEFAUVER. That is correct. The IATA does attempt to agree upon rates. Then the rates must be filed and posted with the Civil Aeronautics Board. The Civil Aeronautics Board has the right in its statute to approve or disapprove any rates.

Mr. ENGLE. That is exactly what this bill provides.

Mr. KEFAUVER. The bill does not refer to rates at all.

Mr. MAGNUSON. The bill in effect provides for the fixing of rates because the agreements themselves must be approved upon by the Maritime Commission.

Mr. KEFAUVER. Find me the section where the bill provides that the Maritime Commission can disapprove rates. I have searched the bill carefully. Such language was contained in the House bill, but it has been removed from the Senate bill. We seek to put it back.

The language which was stricken from the House bill appears on page 7 of the bill:

> The Board shall disapprove any conference rate, fare, or charge which after hearing it, finds it to be so unreasonably high or low as to be detrimental to the commerce of the United States.

That language was stricken out by the Senate Committee on Commerce.

The Civil Aeronautics Board, another regulatory agency, had this to say in contrast with what is being said here about ocean shipping:

> No proper concept of governmental responsibility can justify leaving the ultimate determination of a fair and reasonable international rate structure wholly in the hands of an all-embracing international cartel.

In my opinion, and with all due respect, that is what the Senate bill does, because the rate restriction provision was stricken from the House bill.

Mr. ENGLE. Mr. President, will the Senator from Tennessee yield for an addition to the RECORD?

Mr. KEFAUVER. I yield.

Mr. ENGLE. I should like to have included in the RECORD the remainder of Mr. Stakem's answer.

Mr. KEFAUVER. The whole statement has been placed in the RECORD. The distinguished Senator from Washington has placed it in the RECORD.

Mr. ENGLE. Mr. Stakem said, additionally:

> If the choice is between this bill and interim legislation for a continued period of study, we would favor the interim legislation.

In other words, he says the conference system is so important that he would prefer to have it continue for another year, if necessary, to study it, rather than to take the bill as it came from the House.

Mr. KEFAUVER. That is different from saying that if he had a choice, he would rather have no bill than to take the House bill.

Mr. President, in the course of my remarks, I shall refer to certain letters, tables, and other documents. I ask unanimous consent that they may be printed in the RECORD at the point designated.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ENGLE. Mr. President, I ask unanimous consent that the communications which I have in my hand from various agricultural groups be printed at this point in the RECORD.

There being no objection, the communications were ordered to be printed in the RECORD, as follows:

SAN FRANCISCO, CALIF., *September 7, 1961.*
Hon. CLAIR ENGLE,
Senate Office Building,
Washington, D.C.:

H.R. 6775 my wires August 31 still waiting copies of revised version of August 26 for detailed review my attorneys, Los Angeles, after which can comment more intelligently. Meantime big bugaboo is condition (3) "coverage" of shippers' rate agreement. Legal or actual right to select carrier extremely difficult to determine or establish concisely on each shipment; hence would not only lead to litigation about possible breaches of contract when or if nonconference vessel used, but could cause serious misunderstanding and questions as to whether shippers using conference vessels in good faith were entitled to contract rates, or whether carriers could legally assess contract rates. The most important aspect which should be unequivocally settled by this legislation is f.a.s./f.o.b. question, which unfortunately present language leaves even wider open than before. Earnestly request reconsideration this clause basis language I proposed July 28. Undoubtedly, other parts of bill could be still further improved, but this is the most important issue. While I am supposed be on vacation, am following this closely; and hope comment further and more constructively after more detailed review. Gruening amendment regarding State Governors should be rejected. We do not want international trade complicated by 50 State utility commissions. Any State aggrieved can file complaint before FMC same as any party. Also proposed Kefauver amendments must be rejected. Have seen them only briefly but they contain much of language quite properly stricken from House version by your committee, and it must stay out.

Best regards.

U.S. BORAX,
T. R. STETSON.

NEW ORLEANS, LA.,
September 12, 1961.
Hon. WARREN MAGNUSON,
Chairman, Commerce Committee, U.S. Senate, Senate Office Building, Washington, D.C.:

We commend the action of your Commerce Committee in unanimously reporting to the Senate your revision of H.R. 6775 and consider this legislation very fair and reasonable both from the shippers and carriers standpoint. Particularly is it satisfactory to the members of the association as the bill finally approved by your committee included therein a satisfactory clause covering f.o.b. fast sales which is so essential to the shipper who in order to be competitive must at times sell on this basis. We trust this bill will be promptly passed by the Senate so that the necessary conference can be held with the House of Representatives and out of that conference will come a reasonable and equitable bill at this session of the Congress which is necessary for all concerned. We sincerely trust the Senate leadership will promptly work toward this end.

MISSISSIPPI VALLEY ASSOCIATION,
ROBERT L. SHORTLE.

LITTLE ROCK, ARK.,
September 11, 1961.
Hon. WARREN G. MAGNUSON,
Chairman, Senate Committee on Interstate and Foreign Commerce, Washington, D.C:

The Arkansas-Missouri Cotton Trade Association respectfully asks for your support of H.R. 6775 as reported by Senate Committee on Interstate and Foreign Commerce. We consider legislation fair and reasonable for both shippers and carriers particularly as it contains clause covering f.o.b.-f.a.s. sales which essential to shippers who must sell on that basis to satisfy customers.

ARKANSAS-MISSOURI COTTON TRADE ASSOCIATION,
A. C. MAHAN, Jr., *President.*

OKLAHOMA CITY, OKLA.,
September 12, 1961.
Senator WARREN G. MAGNUSON,
Senate Office Building,
Washington, D.C.:

Urge passage of H.R. 6775 as reported by Senate committee. We consider legislation fair and reasonable for both shippers and carriers.

OKLAHOMA STATE COTTON EXCHANGE,
M. RASCOE,
Secretary-Treasurer.

MEMPHIS, TENN., *September 11, 1961.*
Hon. WARREN G. MAGNUSON,
Chairman, Committee on Interstate and Foreign Commerce, Senate Office Building, Washington, D.C.:

The Southern Cotton Association, composed largely of cotton shippers residing in Tennessee, Mississippi, and Louisiana, want to thank you for your efforts regarding H.R. 6775 and assure you of our support. This legislation needed and particularly clause re f.o.b.-f.a.s. sales. Have today wired Senators from our territory, urging their support.

Best regards.

SOUTHERN COTTON ASSOCIATION,
RICHARD BLOCK, *President.*

MEMPHIS, TENN., *September 11, 1961.*
Senator WARREN G. MAGNUSON,
Chairman, Committee on Interstate and Foreign Commerce, Senate Office Building, Washington, D.C.:

Members American Cotton Shippers Association heartily endorse your committee's report on H.R. 6775 as we consider it reasonable and fair to both cotton shippers and steamship lines especially as bill contains

clause regarding f.o.b.-f.a.s. sales which very essential to shippers who must sell on those terms to satisfy customers thereby making our cotton competitive in world markets. Sincerely hope Senate will act favorably on your committee's report.

M. H. MILLER,
Chairman, Ocean Freight Committee, American Cotton Shippers Association.

WACO, TEX., *September 11, 1961.*
Hon. WARREN G. MAGNUSON,
Chairman, Senate Committee on Interstate and Foreign Commerce, Washington, D.C.:

On behalf of the cotton exporters of Texas we earnestly urge passage of H.R. 6775 as reported by your committee. We consider this legislation fair and reasonable for both exporters and carriers. It will help our exporters meet competition and satisfy our cotton customers. Cotton needs all the help it can get in holding its export markets.

Respectfully,
TEXAS COTTON ASSOCIATION.

CHICAGO, ILL., *September 6, 1961.*
Senator W. G. MAGNUSON,
Senate Office Building,
Washington, D.C.

As a substantial exporter and importer we strongly urge that the Senate pass without amendment H.R. 6775 the dual ocean rate bill as reported by the Senate Commerce Committee. We consider this legislation necessary to protect and foster our foreign commerce.

THE QUAKER OATS CO.,
J. R. STALEY, *Vice President.*

PITTSBURG, CALIF., *September 5, 1961.*
Senator CLAIR ENGLE,
Senate Office Building,
Washington, D.C.:

The Senate Commerce Committee has published a draft of H.R. 6775 dated August 26, 1961, which includes the following exemption on page 16, line 6: Excludes cargo of the contract shipper loaded in bulk without mark or count. This bulk exemption is of vital interest to U.S. shippers and we strongly urge inclusion of this bulk exemption without qualification in the final bill presented and approved by the Senate. We feel any limiting amendments to this bulk exemption would be detrimental to U.S. commerce.

LELAND A. DOAN,
General Manager, the Dow Chemical Co.

NEW ORLEANS, LA., *September 11, 1961.*
Senator WARREN G. MAGNUSON,
Chairman, Senate Interstate and Foreign Commerce Committee, Senate Office Building, Washington, D.C.:

Advised that your committee reported unanimously as favoring passage of H.R. 6775 which we commend. Understand from reliable sources that American steamship lines strongly in favor of this legislation. Also since your committee included their report satisfactory clause f.o.b.-f.a.s. so essential to American shippers to remain competitive legislation highly acceptable to shippers. Urgently request prompt passage of bill so that necessary conference can be held with House committee out of which should come the passage of a reasonable and equitable bill at this session of Congress which is so vital for all concerned.

NEW ORLEANS TRAFFIC & TRANSPORTATION BUREAU,
LOUIS A. SCHWARZ.

MEMPHIS, TENN., *September 11, 1961.*
Senator WARREN G. MAGNUSON,
Chairman, Senate Commerce Committee, Washington, D.C.:

We commend your committee in approval of revision H.R. 6775 as Association of Hardwood Lumber Exporters we believe fair and reasonable. Particularly commend clause covering f.o.b. sales which are often necessary in export, please use best efforts to get Senate to pass bill so Conference Committee can complete legislation this session.

PHILIP D. HOUSTON,
President, National Lumber Exporters Association.

THE NATIONAL LUMBER EXPORTERS ASSOCIATION,
Memphis, Tenn., September 11, 1961.
Senator WARREN G. MAGNUSON,
Chairman, Commerce Committee, Senate Post Office, Washington, D.C.

DEAR SENATOR MAGNUSON: I have wired you and hereby confirm as follows:

"We commend your committee in approval of revision H.R. 6775. As association of hardwood lumber exporters we believe fair and reasonable. Particularly commend clause covering f.o.b. sales, which are often necessary in export. Please use best efforts to get Senate to pass bill so conference committee can complete legislation this session."

As president of the National Lumber Exporters Association I feel that every aid possible should be extended to American exporters to further penetrate the export market and the bill your committee has unanimously approved is fair and equitable to the shipper as well as the steamship companies.

I have thought to wire you as the time is short, and we feel that such legislation would be very helpful if it were completed this session rather than wait over until the next session.

Respectfully yours,
PHILIP D. HOUSTON,
President.

Mr. KEFAUVER. Mr. President, it is a matter of great regret to me that I disagree with the distinguished Senator from California [Mr. ENGLE] and the distinguished Senator from Washington, chairman of the Committee on Commerce [Mr. MAGNUSON], with whom, in so many antitrust matters, we have fought to protect the interests of the people of the United States.

I am impelled to take the position I take today to try to restore some of the protections which were provided in the House bill, for this reason: One of the unique and fine things about the American economy is our free, competitive enterprise system. There is probably no other nation left in the world today where commerce is regulated, as it is in the United States, largely by competition. What is attempted to be done here is substantially to take out of the competitive field, without restraint, or adequate restraint, at least, a great segment of our competitive system, to wit, our steamship transportation.

I favor strengthening the antitrust laws. I favor making it more possible for little fellows to compete. I do not favor the building up of cartels and cartels of cartels, which the proposed legislation seeks to do.

It is obvious, it is plain, in fact it is admitted in the report, that the purpose of the bill is to force everyone into the conferences and to have no competition.

I know the heads of many of the steamship companies. They are fine friends of mine. They are wonderful Americans. They do excellent work. It is not easy to criticize a bill which many of them have expressed themselves as favoring. However, in the long run, unless we provide some protections, so as to assure competition and to prevent monopolies and the formation of cartels in our economy, everyone will suffer.

It has been stated that the Maritime Board, or Commission, as it is now called, expressed preference for the Senate bill. But Mr. Stakem has said that as between the House bill and no bill, he would certainly take the House bill. I do not seek to restore all the language of the House bill, but there are certain features which ought to appeal to the American shipper, the person who wants competition. They ought to appeal to Congress.

The House Committee on Merchant Marine and Fisheries, under the chairmanship of Representative HERBERT BONNER, of North Carolina, has held extensive hearings, lasting over a period of a year or more, comprising many volumes of testimony, taken in all parts of the United States, on this problem. That committee has examined into every phase of the question. It has conducted excellent, splendid hearings on this subject.

The House Subcommittee on Antitrust and Monopoly, under the chairmanship of the able and great Member of Congress, Representative EMANUEL CELLER, has conducted extensive hearings in connection with the maritime problem, ferreting out all the protections there ought to be for shippers, for the independent carriers, for tramp ships, and for the public.

Under the chairmanship of Representative BONNER, and with the advice and suggestions of Representative CELLER, the House Committee on Merchant Marine and Fisheries has worked out a good, practical bill which passed the House unanimously on the Consent Calendar. So far as I know, it was reported unanimously by the House Committee. That bill provided certain protections.

There is more than one group concerned in this matter. The group for which the Senate bill would provide an absolute cartel or monopoly, with perhaps some minor reservations, is comprised of the so-called conference carriers, the conference steamship companies.

There are others who should be considered. The shippers of freight should be considered; the farmers should be considered.

I wish to point out now—as I shall do in more detail later on—that the Department of Agriculture favored the House version of the bill, but does not like the Senate committee's version of the bill, because it does not provide protection.

Furthermore, as has already been stated, the Antitrust Division of the Department of Justice violently opposes the Senate committee's version of the bill, and states that the minimum protection of the public is provided by the House version.

So I hope the House version will be passed, perhaps with some improvements and changes, but at least so that these protections will be continued.

Mr. MAGNUSON. Mr. President, at this point will the Senator from Tennessee yield?

The PRESIDING OFFICER (Mr. BURDICK in the chair). Does the Senator from Tennessee yield to the Senator from Washington?

Mr. KEFAUVER. I am glad to yield.

Mr. MAGNUSON. I must attend a conference in a few minutes. At this time, without discussing the merits of the two versions of the bill, I believe the record should show clearly why we have the bill before us at this time.

Mr. KEFAUVER. Yes.

Mr. MAGNUSON. It was 3 years ago that the Supreme Court of the United States, in its decision in the case of *Federal Maritime Board* v. *Isbrandtsen Company* (356 U.S. 481)—1958, ruled the historic practice of dual rates to be illegal. In effect, in its decision the Supreme Court said the Congress should pass some legislation dealing with the problem of dual rates.

At that time we were faced with an emergency. So, as chairman of the committee, along with Representative BONNER, and the rest, we asked Congress to provide a 1-year extension of this historic practice in the maritime economy, until we could get at this very highly complex matter. That year passed; and because the matter is highly controversial and technical, it was easier to provide for another extension. There now have been three extensions, I believe, of the dual-rate arrangement.

Both the House committee and the Senate committee thought the time had come to have permanent legislation, if possible. The House committee worked hard on this measure, and held long hearings. So did our committee and our subcommittee, headed by the Senator from California [Mr. ENGLE].

So we have covered this field; and from all those studies and all that work have come the House version of the bill and the Senate committee's version.

The present extension expires midnight September 14. So again we are faced with this highly complex matter—and I agree with the Senator from Tennessee that it is complex.

This is why the Senate Committee on Commerce hopes the Senate will pass the bill and send it to conference, so that, after the many extensions, permanent legislation can be had.

I thought it would be well to have the history of this matter placed in the RECORD.

Mr. KEFAUVER. Yes, that is true.

I wish the bill had been taken up earlier, so that there would have been more time for debate and for the conference. Ever since the Senate committee reported the bill, about 2 weeks ago, I have filed some amendments and have been ready to debate the bill. I know that the Senator from California probably has been ready, too. But the consideration of other measures has caused the consideration of this bill to be postponed.

Mr. MAGNUSON. Yes.

The House committee stated that it wished to begin the hearings on the matter of dual rates. So we permitted the House committee to do so; and its hearing took longer than had been expected.

Of course there is always the possibility of providing a further extension; but I hope we can arrive at some conclusion and can get some permanent legislation on the books.

Mr. KEFAUVER. At any rate, the delay has not been my fault.

Mr. MAGNUSON. That is true.

Mr. KEFAUVER. I have been ready to proceed with the consideration of the bill. The Senate committee filed its report on August 31, and we have been ready to proceed to debate the bill. But other measures have prevented that.

Mr. MAGNUSON. Yes, other measures seem to have had priority.

Mr. KEFAUVER. Yes.

Mr. President, the decision to which the chairman of the committee has referred is that of the Supreme Court of the United States in the case of *Federal Maritime Board* v. *Isbrandtsen* (356 U.S. 481. The decision was handed down on May 19, 1958. Since then, there have been three extensions of the present cartel system.

INTRODUCTION

Mr. President, the bill for consideration on the floor today, H.R. 6775, would legalize so-called dual-rate contracts between shippers and conferences of steamship carriers in the foreign commerce of the United States.

What is a dual-rate contract? Essentially, it is an exclusive patronage contract whereby a shipper—or consignee—promises to transport all of the cargo under his control, between ports within the scope of a steamship conference agreement, aboard vessels belonging to that conference. Shippers who do not sign such an agreement are assessed a rate, called the noncontract rate, substantially above the so-called contract rate which is available to signatories. In its most elemental terms, the dual-rate contract is nothing but an exclusive dealing arrangement in which signatory shippers are given preferential treatment while those unwilling to be bound are penalized by higher rates.

It is obvious that the dual-rate system is essentially discriminatory in nature. For the very same transportation services, a steamship line is permitted to assess one rate for contract signatories and a substantially higher one for nonsigners. Indeed, the Federal Maritime Administration has acknowledged the essentially discriminatory features of this form of agreement by referring to the "prima facie discrimination against shippers inherent in the use of dual rates."

Why is it necessary at this time to take congressional action to legalize these essentially discriminatory devices? Back in 1958, the Supreme Court of the United States declared that such contracts, when employed to drive nonconference carriers out of the trade, were in violation of section 14, third of the Shipping Act—*Federal Maritime Board* v. *Isbrandtsen Co.*, 356 U.S. 481 (1958). The bill as it is before the Senate today would overrule most of the implications of this landmark decision and place virtually all of the foreign commerce of the United States at the mercy of foreign dominated steamship conferences with absolutely no residual authority in an American agency to exert any control whatsoever over the rate levels established by these conferences.

Let us examine, for a moment, the nature of these organizations upon which, under the bill as proposed, would devolve almost unrestrained power to set rates for virtually all of the foreign commerce of the United States. A steamship conference is nothing more than an international cartel—in fact, a man named David Marx has written a book about conferences which he has titled "International Shipping Cartels." There are today some 105 of these cartels covering freight traffic in the foreign commerce of the United States and innumerable—but untabulated—other roving international trade routes between foreign nations.

There is no use closing our eyes to the fact that these conferences are wholly dominated by foreign lines. I would like to place in the record at this point a list of the steamship conferences using dual rate systems in the foreign commerce of the United States showing the number of American lines and the number of foreign lines belonging to them.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

List of steamship conferences using the contract/noncontract rate system, showing the number of U.S.- and foreign-flag members as of Nov. 12, 1959

Name and agreement number of conference	Members	
	U.S. flag	Foreign flag
Associated Steamship Lines (Manila) (5600)	8	50
Association of West Coast Steamship Companies (3302)	2	14
Atlantic and Gulf-Indonesia Conference (8080)	3	4
Atlantic and Gulf/Panama Canal Zone, Colon and Panama City Conference (3868)	4	4
Atlantic and Gulf/Straits Settlements, Singapore, Malaya and Thailand Conference (8240)	3	8
Atlantic and Gulf/West Coast of Central America and Mexico Conference (8300)	4	1
Atlantic and Gulf/West Coast of South America Conference (2744)	2	4
Brazil-United States-Canada Freight Conference (5450)	2	13
Calcutta/U.S.A. Conference (6500)	3	5
Camexco Freight Conference (6670)	1	13
Canal, Central America Northbound Conference (6070)	2	11
Capca Freight Conference (6170)	1	8
Colpac Freight Conference (7270)	0	6
Continental-U.S.A. Gulf Westbound Freight Conference (6150)	3	6
Deli/New York Rate Agreement (7190)	3	9
Deli-Pacific Rate Agreement (192)	4	4
East Coast Columbia Conference (7590)	2	2
East Coast South America Reefer Conference (6800)	2	10
Far East Conference (17)	6	17
Gulf/French Atlantic Hamburg Range Freight Conference (140-1)	4	9
Gulf Mediterranean Ports Conference (134)	5	14
Gulf and South Atlantic-Cuban Outports Conference (8150)	1	2
Gulf and South Atlantic Havana Steamship Conference (4188)	4	2
Gulf/United Kingdom Conference (161)	4	4
Havana Steamship Conference (4189)	1	4
Havana/U.S. Atlantic and Gulf Rate Agreement (7550)	2	4

List of steamship conferences using the contract/noncontract rate system, showing the number of U.S.- and foreign-flag members as of Nov. 12, 1959—Continued

Name and agreement number of conference	Members	
	U.S. flag	Foreign flag
The India, Pakistan, Ceylon and Burma Outward Freight Conference (7690)	2	6
Java-New York Rate Agreement (90)	3	8
Java-Pacific Rate Agreement (191)	4	3
Leeward & Windward Islands and Guinas Conference (7540)	2	2
Mid Brazil/United States-Canada Freight Conference (7630)	2	13
New York Freight Bureau (Hong Kong) (5790)	5	16
North Atlantic Baltic Freight Conference (7570)	2	18
North Atlantic French Atlantic Freight Conference (7770)	1	3
North Atlantic Mediterranean Freight Conference (7980)	7	20
North Atlantic United Kingdom Freight Conference (7100)	1	11
North Atlantic Westbound Freight Association (5850)	1	8
North Atlantic Continental Freight Conference (4490)	3	12
North Brazil/United States-Canada Freight Conference (7640)	2	9
Pacific Coast Australasian Tariff Bureau (50-1)	1	7
Pacific Coast/Caribbean Sea Ports Conference (4294)	2	19
Pacific Coast European Conference (5200)	1	23
Pacific Coast/Mexico Freight Conference (7570)	1	11
Pacific Coast/Panama Canal Freight Conference (7170)	2	12
Pacific Coast River Plate Brazil Conference (6400)	1	5
Pacific Indonesian Conference (6060)	3	4
Pacific/Straits Conference (5680)	4	7
Pacific/West Coast of South America Conference (4630)	1	7
Pacific Westbound Conference (57)	7	13
River Plate and Brazil Conferences (59)	2	14
River Plate/United States-Canada Freight Conference (6000)	2	12
Santiago de Cuba Conference (7650)	2	0
South Atlantic Steamship Conference (8310)	1	3
Straits/New York Conference (6010)	3	13
Straits/Pacific Conference (7090)	3	8
Trans-Pacific Freight Conference (Hong Kong) (14-1)	6	17
U.S. Atlantic and Gulf/Australia-New Zealand Conference (6200)	1	3
United States Atlantic and Gulf/Haiti Conference (8120)	3	2
U.S. Atlantic and Gulf Ports-Jamaica (B.W.I.) Steamship Conference (4610)	3	0
United States Atlantic and Gulf/Venezuela and Netherlands Antilles Conference (6190)	3	5
The West Coast of Italy, Sicilian and Adriatic Ports/North Atlantic Range Conference (2846)	4	16
West Coast of South America Northbound Conference (7890)	2	3

Mr. KEFAUVER. Mr. President, out of some 62 conferences having dual rate contracts, in only 5 were American-flag lines in the majority. Some representative conferences in which foreign lines predominated include the mammoth Associated Steamship Lines (Manila), with 50 foreign-flag lines and 8 American; Association of West Coast Steamship Companies, with 14 foreign-flag lines and 2 American; Brazil-United States-Canada Freight Conference with 13 foreign-flag lines and 2 American; Camexco Freight Conference, with 13 foreign-flag lines and 1 American; North Atlantic Baltic Freight Conference with 18 foreign-flag lines and 2 American; North Atlantic United Kingdom Conference with 11 foreign-flag lines and 1 American; and so forth. Thus, it is obvious that any legislation without adequate safeguards permitting the use of dual rate agreements in reality redounds to the interests of foreign lines, any statements to the contrary notwithstanding.

Now, the industry is really aware of the fact that, when all is said and done, it is the foreign lines that will really reap the benefits of the legislation we are considering today. Yet, every effort has been made to obscure this fact by actually representing the movement as sponsored by American lines.

I ask unanimous consent to have printed in the RECORD at this point a "Private and Confidential Memorandum" found in the files of the Gulf Associated Freight Conferences, which covers all of our foreign trade out of gulf ports of Europe.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

[Celler committee hearings, pt. 2, vol. 2, p. 2406]

PRIVATE AND CONFIDENTIAL CONFERENCE AND DUAL RATE SYSTEMS IN THE MARITIME INDUSTRY, NEW ORLEANS, LA., SEPTEMBER 9, 1958

At a joint meeting of the five Conferences within the Gulf Associated Freight Conferences group (Gulf/French Atlantic Hamburg Range Freight Conference, Gulf/Mediterranean Ports Conference, Gulf/Scandinavian and Baltic Sea Ports Conference, Gulf/South and East African Conference, Gulf/United Kingdom Conference) held at New Orleans today (11 a.m., Tuesday, September 9, 1958) the Chairman of the Conferences referred to his private memorandums to the executive representatives of the member lines relative to studies and investigations being conducted by two important committees of the House of Representatives, United States, i.e., the Committee on Merchant Marine and Fisheries, headed by Congressman HERBERT C. BONNER, chairman of that committee, and the Committee on the Judiciary, headed by Congressman EMANUEL CELLER, chairman of that committee, also chairman of the Antitrust Committee of the House of Representatives, United States.

Chairman Carlys then stated that Mr. A. C. Cocke, vice president of Lykes Bros. Steamship Co., Inc., attended an important meeting in New York last week of American steamship interests and he thought it would be highly beneficial to the representatives of all of the member lines (as well as the conference counsel. Mr. Walter Carroll, who was present) to hear, firsthand, from Mr. Cocke what transpired at the meeting, whereupon he called on Mr. Cocke to address the meeting.

Mr. Cocke stated that he attended a meeting in New York last Friday (September 5, 1958) which was held under the auspices of the American Merchant Marine Institute the Committee of American Subsidized Lines and the Pacific American Steamship Association. He said that his company (Lykes Bros. Steamship Co., Inc.) was requested to have a representative at this meeting and he (Mr. Cocke) attended on behalf of Lykes Bros. Steamship Co., Inc. The following gentlemen were present at the New York meeting:

Mr. J. Alexander, vice president, American President Lines.

Mr. Jos. G. Ball, vice president, States Marine Corp.

Mr. Fred Bowers, vice president, Moore-McCormack.

Mr. A. C. Cocke, vice president, Lykes Bros. Steamship Co., Inc.

Mr. Lew Lapham, president, Grace Line.

Mr. W. van Loon, vice president, American Export Line.

Mr. Ralph Casey, president, American Merchant Marine Institute, Inc.

Mr. Ralph Dewey, president, Pacific American Steamship Association.

Mr. Walter Maloney, general counsel, American Merchant Marine Institute.

Mr. Alex Purdon, executive head, committee, American Subsidized Lines.

Mr. Cocke pointed out that lengthy discussions were had and the meeting (which lasted for about 2½ or 3 hours) culminated in a unanimous decision that the fight for the dual rate system and the defense of the conferences should be handled solely (with the exception of conferring with, in an advisory way, from time to time the foreign lines) as an American-flag steamship industry fight, because it was felt that it would be a mistake to, at this time, to bring the foreign lines (as such) into the picture, particularly in view of the existing situation in Congress and the strong attack Mr. CELLER is directing on the antitrust feature of the conferences and, therefore, the fight for the dual rate system and defense of the conferences should be spearheaded by American lines, exclusively.

Mr. KEFAUVER. I read only one paragraph from that memorandum:

Mr. Cocke pointed out that lengthy discussions were had and the meeting (which lasted for about 2½ or 3 hours) culminated in a unanimous decision that the fight for the dual rate system and the defense of the conferences should be handled solely—with the exception of conferring with, in an advisory way, from time to time the foreign lines—as an American-flag steamship industry fight, because it was felt that it would be a mistake to, at this time, to bring the foreign lines—as such—into the picture, particularly in view of the existing situation in Congress and the strong attack Mr. CELLER is directing on the antitrust feature of the conferences and, therefore, the fight for the dual rate system and defense of the conferences should be spearheaded by American lines, exclusively.

The foreign lines are the ones that would gain the most, because, as was pointed out, we know foreign ships are operated more cheaply. So they will reap tremendous benefits out of the conference system. They want to be in the conferences, because they wish to get the highest possible rates. Of course, American-flag ships that operates in the conferences are subsidized to make up the differentials in the wages paid, and those companies make money; but this arrangement will prove to be a particularly big bonanza to the foreign ship lines.

The talk that the only ones who do not want to operate under conferences are foreign ship lines does not hold water. They are the ones who want to, because they can reap the greatest benefits.

This does not mean that foreign lines have not had an active, if concealed, hand in framing this legislation. The document I ask unanimous consent to have printed in the RECORD at this point demonstrates that a huge association of foreign lines was formed in Europe as early as 1959 to do whatever possible to obtain passage of the dual-rate legislation. This association is known as the Committee of European Shipowners and is obviously a lobbying group for the international steamship cartels.

There being no objection, the document was ordered to be printed in the RECORD, as follows:

BREMEN, *December 11, 1958.*

DEAR SIRS: The undermentioned lines; vis: Armement Deppe, Compagnie Générale Transatlantique, Fjell Line, Hamburg America Line, Holland America Line, Johnson Line, North German Lloyd, Fred Olsen, and Oranje Line, have come to the conclusion that it would be advisable to form an association of European conference lines, interested in the trade from the continent including Scandinavia, to U.S. ports and vice versa, for the purpose of watching the development of investigations of the Magnuson, Bonner, and Celler committee, and to cooperate with the American Steamship Committee on Conference Studies in an endeavor to try to achieve the best possible results.

A similar association has already been formed by the British lines in the United Kingdom.

It is not the intention of such an association to interfere with domestic lawmaking, but we feel an adequate organization is necessary to represent the interest of European shipowners.

It would be appreciated to hear from you within a fortnight whether you are interested and prepared to join such an association. If a great majority of the interested lines, which can safely be expected, would be agreeable in principle to the above proposal, a meeting will be arranged to take place on January 14, 2:30 p.m., at the Palace Hotel in Brussels.

The Japanese lines, NYK and OSK are expected to join the intended association as affiliated members.

For and on behalf of the aforementioned lines:

NORDDEUTSCHER LLOYD, BERTRAM.

Mr. KEFAUVER. To show just how effective this high-powered lobby of the international shipping cartel is, and further, to reveal why the Senate Commerce Committee version of the bill is devoid of the salutary safeguards that would protect American shippers, let me read a dispatch from the New York Times, July 31, 1961, reporting on the manner in which foreign interests have attempted to influence the form in which H.R. 6775 now appears before the Senate for consideration:

FOREIGNERS OFFER SENATE SHIP BILL—SUBMIT PLAN TO EASE RULES ON MARITIME CONFERENCES

(By George Horne)

In an action considered to be rare and possibly unique in recent legislative history in this country, representatives of foreign business interests have written a regulatory measure for a committee of Congress.

The bill, dealing with the controversial question of steamship conferences, has not been approved by the foreign interests or by any body or agency here. The chances are that it will not be introduced. And American shipping men who have been working with foreign colleagues on conference legislation hope not. They say it is so liberal, from the conference standpoint, that it will not pass.

A Senate subcommittee on merchant marine, headed by Senator CLAIR ENGLE, Democrat of California, has been considering H.R. 6775, a House bill. It is the product of several years of hearings and staff studies by committees of Congress seeking to overhaul all statutes affecting steamship conferences.

SOME EXEMPTIONS ALLOWED

The conferences make rates and try to maintain stability in their trades. For doing this they receive certain exemptions under antitrust laws. The Congress committees have found many violations in ocean-freight practices.

The House bill has been criticized by the industry generally as a destructive bill that would create "a lawyer's paradise," make the Federal Maritime Board a rate-making body, outlaw dual rates (which give discounts to faithful shippers) and drive foreign lines out of the conferences.

All of the clauses proposed by the foreigners would be highly acceptable to American steamship lines. But spokesmen for these lines said in New York yesterday that such liberal language would never be approved in the House, where sentiment leans strongly to stringent antitrust provisions and tighter regulation.

FOREIGNERS' VIEW SOUGHT

Ten days ago Senator ENGLE told some foreign witnesses at his committee's hearing to come in with some legislative language that they could live with.

Last week these foreigners wrote what amounts to a new bill, retaining little of the original but the title. The Senate panel will consider the language this week. It will hold 2 more days of hearings before it starts writing its own amendments to the House bill.

Observers who have followed the long history of this legislation believe the Senate amendments will adopt many of the foreign suggestions, but not all of them.

Senator ENGLE is eager to get the bill completed in the Senate so it can be returned to the House Committee on Merchant Marine and Fisheries. The action must be finished by September 15, when temporary legislation legalizing the dual-rate system expires.

AFFECTED BY COURT'S RULING

The dual-rate practices, without which shipping men say their conferences would be meaningless, were placed in jeopardy by a decision of the U.S. Supreme Court in 1958. The temporary measure was enacted to maintain the status quo pending the hearings and new legislation.

One prime clause in the House bill objected to by foreigners and Americans alike would, they hold, make dual rates illegal. Exports in and out of the industry agree that such a system is imperative. Another clause would extend the authority of the Federal Maritime Board to demand that foreign lines bring back to this country documents needed to investigate conference practices.

In the light of representations made by foreign nations to the Department of State, it appears likely that the Senate will delete this section before returning it to the House.

The foreign "bill" written at Mr. ENGLE's suggestion had also placed a $5,000 limit on the money penalties that the Maritime Board could impose for certain violations. It changed a $1,000 fine for one type of violation to "up to $1,000." In another section it would authorize the regulatory agency to remit, mitigate or waive fines or civil penalties. It also would eliminate a clause making it mandatory for the Maritime Board to approve dual rates before they were imposed.

In addition it deleted tariff filing requirements and the mandatory filing of any rate reductions 30 days in advance of their effective date.

Mr. President, while the proponents of this version of the bill have urged upon Congress the need for this legislation in order to strengthen international steamship conferences, there has been a general tendency to gloss over the many evils inherent in the cartelized conference system which this version would aid and abet. The Alexander committee which investigated the shipping industry in 1912 and 1913, acknowledged that, with respect to the conferences system, "abuses exist, and the numerous complaints received by the committee show that they must be recognized."

I refer to the Alexander report, House Document No. 805, 63d Congress, 2d session, 1914.

Representative Joshua Alexander, of Missouri, who was chairman of the House Merchant Marine and Fisheries Committee in the 63d Congress, and previous Congresses, carried on one of the most thoughtful, intelligent investigations I have had the opportunity to examine in a long time, in which this whole system was examined into, and a report was made. It was on the basis of this report and his recommendations that the Shipping Act of 1916 was passed by the Congress.

The Alexander committee proposed an elaborate set of controls to restrain the

excesses of the conferences, with numerous restrictions and prohibitions, including bans against the use of fighting ships or the employment of deferred rebates, both of which practices had been employed to drive independent, nonconference carriers from the trades; prohibitions against retaliation against shippers for employing nonconference vessels; and a general condemnation of all forms of discrimination against shippers or competing nonconference carriers. These recommendations of the committee culminated in the landmark Shipping Act of 1916.

It is obvious to anyone who reads the act with care that it was designed to protect shippers and independent carriers against the unlawful practices of giant steamship conferences which were sanctioned under the act. That it has not been entirely successful is due to no fault of those who framed the law but rather to the inherent tendency of the conference cartels to abuse their power, coupled with the lack of adequate supervision on the part of the predecessors of the new Federal Maritime Administration.

That the foreign-dominated conferences have not changed their spots in the almost 50 years since the Alexander committee's investigation is demonstrated in the recent investigations of the House Antitrust Subcommittee, headed by the gentleman from New York, Representative EMANUEL CELLER. In the course of its studies over a 3-year period, the subcommittee uncovered more than 200 apparent violations of Federal laws.

MALPRACTICES AND OTHER ABUSES IN THE OCEAN FREIGHT INDUSTRY

Since the Senate is considering a bill which will radically extend the privileges and powers of the conference system and weakens the Shipping Act of 1916, it is appropriate to call the attention of the Senate the manner in which the steamship industry has abused the privileges already granted to it under the Shipping Act of 1916. During the past 3 years, the House Merchant Marine and Fisheries Committee and the Antitrust Subcommittee of the House Committee on the Judiciary have conducted the most comprehensive investigation of competitive practices in the ocean freight industry since the classic study conducted by the Alexander committee—the House Merchant Marine and Fisheries Committee of the 63d Congress—almost 50 years ago. The hearings before the House Antitrust Subcommittee and the study of the House Merchant Marine and Fisheries Committee under the chairmanship of the Honorable HERBERT C. BONNER, of North Carolina, contain an abundance of valuable material on the subject.

Of course, the distinguished Senator from California [Mr. ENGLE], who is very knowledgeable in this subject, had further hearings on the Senate side, especially during June and August of this year.

What have all these hearings revealed? The President of the United States summarized the matter quite concisely when, in recommending to the Congress the adoption of Reorganization Plan No. 7, he observed:

> Recent findings by committees of the Congress disclose serious violations of maritime laws. (Message from the President of the United States transmitting Reorganization Plan No. 7, H. Doc. No. 187, 87th Cong., 1st sess.)

And the chairman of the House Judiciary Committee and of its Antitrust Subcommittee, EMANUEL CELLER, recently commented:

> I believe I can say without fear of contradiction that they have shown the essential foreign trade routes of the United States to be plagued by many of the same deplorable conditions which prompted the Alexander committee to recommend the sweeping regulatory scheme embodied in the Shipping Act of 1916. These include various types of rebating and malpractices; granting of deferred rebates; employment of many predatory devices designed to drive out independent competitors; overcharges on Government financed shipments of grain; maintenance of freight rates at levels detrimental to the foreign commerce of the United States; granting of preferences to large shippers; falsification of bills of lading; abetting the circumvention of currency regulations of friendly foreign governments; destruction or alteration of documents to hinder Government investigations and so on. (Letter to Hon. ESTES KEFAUVER from Hon. EMANUEL CELLER, Aug. 14, 1961.)

During the debate on the floor of the House with respect to Reorganization Plan No. 7, spokesmen of both parties attested to the widespread abuse and regulatory neglect which characterized the industry—CONGRESSIONAL RECORD, July 20, 1961, at pages 13084–13096.

It may be asked why this discussion of malpractices and other abuses in the ocean freight industry is relevant to a debate on H.R. 6775 as reported by the Senate Committee on Commerce. In the first place, the version of that bill as passed by the House of Representatives contains provisions which would have enhanced the regulatory provisions of the Shipping Act of 1916 and strengthened their enforcement. These provisions have largely been deleted in the bill as reported by the Committee on Commerce. In the second place, H.R. 6775, if enacted as it now stands, will so inflate the power of steamship conferences and steamship conference lines that U.S. shippers and exporters, independent steamship operators and the foreign commerce of the United States will be at the mercy of the conference system. It is therefore highly pertinent to discover that this same conference system has operated as a conduit for the perpetration of practices which run directly counter to the safeguards established by the Congress in 1916 and which are detrimental to the foreign commerce of the United States.

SCOPE OF ABUSES

As a result of the hearings before the House Antitrust Subcommittee, at the direction of its chairman, some 240 matters were referred to various enforcement agencies, principally the Federal Maritime Board—now the Federal Maritime Commission—and the Department of Justice. These matters involved possible violations of Federal laws and/or conference agreements or indicated activities possibly detrimental to the commerce of the United States—letter to Hon. ESTES KEFAUVER from Hon. EMANUEL CELLER, August 14, 1961. A significant number of these items have become the subject of enforcement or rulemaking proceedings before the Federal Maritime Board. In March 1961, the then Chairman of the Federal Maritime Board, Thomas E. Stakem, reported to the House Antitrust Subcommittee that 24 of the matters referred had become the subject of formal administrative proceedings by the Board to enforce the Shipping Act; 29 had become the subject of general rulemaking proceedings aimed at preventing future recurrence of questionable practices; 18 had been referred to the Department of Justice and 45 were then the subject of further study by the Board—Antitrust Subcommittee hearings, part 3, volume II, at 1281–1283.

Only a few of these proceedings have been completed. One has resulted in the Board finding certain lines violated sections 16 and 17 of the Shipping Act in granting free or reduced passage to shippers—"Investigation of Storage Practices at Stockton," FMB Docket No. 871, June 1, 1960. In another proceeding, still pending, a Board hearing examiner has handed down an initial decision finding a violation of law by a carrier and a shipper.

In March 1961, W. Wallace Kirkpatrick,, then Acting Assistant Attorney General in charge of the Antitrust Division of the Department of Justice, testified that a large number of the items which had been referred to the Department had become the subject of a grand jury investigation of the shipping industry—hearings, part 3, volume II, at 1246–1258. Subpenas were issued to some 150 shipping companies—both U.S.-flag and foreign—steamship agents and conferences—see Gardner, "Steamship Conferences and the Shipping Act," 1916, 35 Tulane Law Review, 129,137, 1960. The grand jury investigation involves questions of violation of the antitrust laws and other Federal statutes. According to Mr. Kirkpatrick, the investigation covers, among other areas, secret agreements in the inbound trade from Japan, in the trade between the United States and Africa; the possible use of deferred rebates expressly prohibited by the 1916 act and "fighting rates" in the trade from Mexico and the United States to Europe; and the disclosure of traffic information which could be used to the detriment of shippers and competing carriers in violation of section 20 of the Shipping Act—hearings, part 3, volume II, at 1246–1247. Significantly, with respect to the inbound trade from Japan Mr. Kirkpatrick testified:

> There is evidence that the reason the lines operated under secret agreements, rather than submitting them for Board scrutiny was that the lines wanted to influence the decision of the Supreme Court of the United States in the Isbrandtsen dual-rate case * * * They hoped to do this by appearing to be engaged in chaotic rate competition as a result of having been enjoined from using the dual-rate system. (Id. at 1246–47).

It has been reported that indictments are being drawn by the grand jury in this investigation.

Despite these indicia of the pervasive extent of malpractice in the conference system, some spokesmen for the industry apparently view the record which has been amassed by the congressional investigations with a sense of satisfaction. Mr. Ira Ewers, recently testifying on behalf of the administrative law division, Maritime Law Association of the United States, before the House Merchant Marine and Fisheries Committee, stated:

My recollection is that the foreign commerce of the United States, import and export, is somewhere in the magnitude of $32 billion a year and if you can only find 40, 50, or 200 violations of that volume of transactions, I think it is a record to which you should point with pride. (Hearings before the House Merchant Marine and Fisheries Committee, Reorganization Plan No. 7 of 1961, 87th Cong., 1st sess., 154.)

It is patently clear that this observation misconceives the scope and meaning of the revelations of the congressional investigations. Many of the matters which were referred to the Federal Maritime Board or the Department of Justice by the Antitrust Subcommittee as a single item embraced countless individual transactions involving a possible malpractice; the matters referred to by the Antitrust Subcommittee frequently represented not unique and isolated deviations from law but a course of dealing that permeated an entire trade over a long span of years. Thus, the Antitrust Subcommittee studied the recent history of the so-called WINAC trade between Italy, Sicily and North Atlantic ports of the United States. It found in this trade that it was a common practice to grant fidelity commissions to shippers or freight forwarders. These fidelity commissions were very much like the deferred rebates which were declared illegal by Congress in the Shipping Act of 1916. The use of these commissions, as well as the employment of a complicated hierarchy of secret and discriminatory rebates, stretched over a period of 8 years—hearings, part 2, volume I, at 47–69. Indeed, a responsible official of American President Lines, commenting on the status of this trade, observed:

The prohibition of the Shipping Act of 1916 against deferred rebates has been violated in one way or another almost continuously since the law was passed. (Hearings pt. 2, vol. I, at 138.)

In a similar vein, an official of another steamship line indicated that abuses were the rule rather than the exception in the Far East trade. He states in an interoffice memorandum:

As to malpractices, all the agreements in the world, plus bonds posted, plus conference memberships, will not prevent the Japanese lines from exercising the malpractice policy. (Hearings pt. 1, vol. II, at 1214.)

CONFESSIONS OF LINE OFFICIALS

Other commentators or representatives of the industry have recognized the existence of the widespread abuse which the hearings have demonstrated. Writing in the Tulane Law Review in December 1960, Mr. Warner Gardner, an eminent maritime lawyer, put it quite succinctly, remarking:

The regulatory provisions of the (shipping act have until 1960 largely been ignored. (Gardner, "Steamship Conferences and the Shipping Act," 1916, 35 Tulane L. Rev. 129, 132 (1960).)

During the recent congressional hearings high officials of American steamship lines were frequently heard to express remorse and shame when the malpractice violative of their company principles were disclosed. Thus, it was revealed that United States Lines had granted what were conceded to be immediate rebates on freight charges on eastbound shipments of logs to Swiss importers, by means of secret refunds and corrections of shipping documents. When material dealing with this practice was presented, Mr. W. B. Rand, the vice president of the United States Lines testified:

It is extremely distasteful, and I am personally ashamed of it. It is not within our company principles to behave in this manner. (Hearings pt. 1, vol. II, at 1456.)

Nevertheless, the practice apparently was carried on by Mr. Rand's company from 1954 to 1959—hearings, part 1, volume II, at 1446–1458.

To take another instance, it appears that in 1958 States Marine Lines granted a secret refund on a shipment of cotton to an important shipper of that commodity. (Hearings, pt. 1, vol. III, at 2301–2308). A hearing examiner of the Federal Maritime Board has recently issued an initial decision finding that both the shipper and the carrier thereby violated section 16 of the Shiping Act—"States Marine Lines, Hohenberg Brothers, Violation of section 16," FMB Docket No. 892, January 28, 1960. When this transaction was brought to light at a session of the Antitrust Subcommittee hearings, the president of States Marine Lines conceded that it constituted "a clear-cut violation of our conference agreement" and stated:

I don't want to make any excuse for it, because it was wrong, our people were wrong. Ethically, morally and every other way. (Hearings, pt. 1, vol. III, at 2301.)

Indeed, almost all of the representatives of the industry and of the conferences testified to serious malpractice problems in their trades and conceded the need for a general housecleaning. Such pious statements by top officials after the facts are revealed sound much like those by similar officials in the electrical equipment industry after the antitrust indictments.

DEVICES EMPLOYED TO EFFECT MALPRACTICE

An amazing variety of devices have been utilized on the foreign trade routes of the United States in order to effect rebates and other malpractices. A good number of these were summarized in an illuminating memorandum prepared by a veteran steamship company official for the education of his superiors, who purported to describe the methods which he understood were employed in certain routes to the Orient. The list includes:

1. Cash paid.
2. Issuance of correction notices (with no copies to the Conference), reducing the measurement or the weight of the shipment, or the rate.
3. Free ocean trips for the client, his family or his friends.
4. Financing trips abroad for the client or members of his family.
5. Lavish entertainment.
6. Establishment of credit at a nightclub or bar for the client.
7. Expensive gifts such as a new car, jewels, radios, TV sets, refrigerators, a house, or expensive curios.
8. Establishment of a pension for the client for a given time.
9. Payment for the education of client's child or children at a boarding school or college.
10. Gifts of stocks or bonds, either of the steamship line involved or purchased at an investment house or other corporation.
11. Purchase of land for the client.
12. Establishment of credit at a grocery store, meat store, or provision store.
13. Purchasing of supplies manufactured by the client which can be used aboard ships etc., at prices above those competitive. (Hearings, pt. 1, vol. II, at 1217.)

Mr. President, this list is far from exhaustive in revealing the media through which the art of malpractice is carried on. For example, it was revealed that in the trade between the Philippines and the United States, certain steamship lines participated in a scheme which operated so as to permit shippers to circumvent the exchange regulations of the Philippine Government. The practice involved the issuance of false bills of lading. The company would accept a bill of lading on a shipment from the Philippines which understated the actual amount of the commodity shipped. When the cargo was unloaded in the United States, the shipper would obtain dollars for the entire shipment. However, he needed to account to the Philippine Government only for those dollars which he had received for the shipment as understated in the bill of lading. The remaining dollars would be free of exchange controls and could be sold on the black market. Correction notices issued by the steamship lines showing the actual weight were kept in the United States because, as an official of a steamship line engaged in the practice explained:

Should a copy of these correction notices fall into the wrong hands both (the shipper) and ourselves would be seriously embarrassed with the exchange control authorities there. (Hearings, pt. 2, vol. I, at 328). (The entire document appears, hearings, pt. 2, vol. I, at 429.)

THE EVILS OF MALPRACTICE

It ill behooves the United States to countenance and promote a conference system in which violations, malpractices, and other forms of abuse are the rule rather than the exception and the shipping laws are more honored in their breach than their observance. It is true that Congress has granted limited recognition to the conference system. However, that recognition was based on a clear finding by the Alexander committee that conferences would redound to the benefit of the United States and its foreign commerce only if such conferences were, in the words of the Alexander committee, "honestly and fairly

conducted"—Alexander committee report, House Document No. 805, 63d Congress, 2d session 416, 1914. The committee further stated:

The committee believes that the disadvantages and abuses connected with steamship agreements and conferences as now conducted are inherent, and can only be eliminated by effective Government control; and it is such control that the committee recommends as the means of preserving to American exporters and importers the advantages enumerated, and of preventing the abuses complained of.

The Shipping Act of 1916 embodied the hope that these abuses could be avoided through effective Government control. But history has proven this hope to be vain. The recent congressional investigations disclose that by and large the conferences have not been "honestly and fairly conducted." The Government controls imposed were not sufficient to ward off abuse. Instead, it is frequently said that a Government agency no matter how well staffed cannot police this industry. As Warner Gardner, a practicing maritime lawyer, put it in a recent article:

In the absence of a general tradition of scrupulous adherence to the law, it is extremely doubtful if the regulator job could be done thoroughly with 1,000 investigators (35 Tulane L. Rev., 125, 135).

Yet it is now proposed that; first, the power of this untidy and unruly conference system be immeasurably enhanced by use of dual-rate contracts that would permit the elimination of independent competition; second, that provisions strengthening the powers of the Board to enforce the act be stricken from H.R. 6775 as passed by the House; third, that the Shipping Act be weakened by the dilution of some very essential protective provisions which were established by Congress in 1916; and, fourth, that provisions of the House bill for the protection of competition and shippers be eliminated.

It has also been demonstrated that a conference system in which these abuses persist is detrimental of the foreign commerce and contrary to the public interest. Acts of malpractice, whether technically constituting an infraction of law or merely a breach of a conference agreement, are frequently operated in an invideously discriminatory fashion. Such acts discriminate against small shippers, and favor powerful shippers able to command the routing of large quantities of cargo. Thus, on one occasion a secret refund was granted by a steamship line to a large shipper who "supported" the line whenever possible—hearings, part 1, volume III, at 2301, 2304. On another occasion, by the admission of its president, the same steamship company predated a bill of lading to allow a "large" and "important" cotton shipper to obtain a lower rate—hearings, part 1, volume III, at 2275. In connection with the reorganization of the Continental/North Atlantic Freight Conference, a sliding scale of brokerage payments which, according to a document in the records, "would secure 5-percent brokerage for the most important brokers" was promoted—hearings, part 3, volume I, at 309. In the Spanish trade, a system of discriminatory rebating was in force for a number of years. The details of this system were embodied in a document describing the shippers who were to receive the normal commission and those who were to receive an additional amount. For example, from the port of Alicante, the document reveals that a 5-percent commission was regularly granted to all shippers "except" four named shippers who received 10 percent—hearings, part 1, volume V, at 4842–4845. In granting free or reduced passage to shippers or their families or transporting the property of shippers free or at reduced rates, the lines established criteria based on the amount of business which the shipper had given or could give. Thus, Holland-America Line determined that only those bulb shippers who had paid freight in the amount of $2,000 or more should be considered important enough to be eligible to receive transportation of their automobiles abroad at a reduced rate—hearings, part 2, volume II, at 1613, 1689.

Ports in the United States have also suffered discriminations. In a recent decision, the Federal Maritime Board ruled that certain lines had discriminated against a number of California ports and in favor of the California ports of Stockton and Oakland by granting unlimited free storage to shippers at the latter ports—"Investigation of Certain Storage Practices of Pacific Far East Line, Inc., Trans-Oceanic Agencies, States Steamship Co., and Howard Terminals at the Ports of Stockton and Oakland," FMB Docket No. 871, June 1, 1961. As to certain respondents in the proceeding, the Board concluded that:

PFEL (Pacific Far East Lines) as a common carrier by water in conjunction with another person, and indirectly * * * (a) gave undue preference and advantage to inbound traffic through the port of Stockton and thereby subjected other ports such as San Francisco to undue prejudice and disadvantage (id., slip opinion at p. 11).

Moreover, the widespread incidence of rebating and other malpractice has frequently operated to the detriment of the U.S.-flag merchant marine. It seems to be generally conceded that U.S.-flag steamship lines are at a serious disadvantage in the game of malpractice as it is played in the international ocean freight industry. Foreign-flag lines are generally far less vulnerable to the regulatory provisions of the Shipping Act than their American-flag competitors. The documents of these foreign-flag lines have heretofore been beyond the reach of the Federal Maritime Board, and the malpractices in which they have engaged have frequently been consummated abroad. Thus, these lines are often able to enjoy the fruits of participation in the foreign trade of the United States without the burden of having to comply with U.S. shipping laws. Mr. George Killion, the chief executive of American President Lines, touched on this point in a letter dated March 14, 1960, to Mr. James L. Pimper, then Secretary to the Federal Maritime Board:

We consider that American President Lines is among the group of U.S.-flag lines which has rather consistently been pressing for the elimination of malpractices. Our review of the documents selected by the Celler committee indicates that we have nevertheless been forced on a few occasions into precisely those malpractices to which we are opposed. The only alternative, on each of these occasions, has seemed to be withdrawal from the trade in question. In a much larger group of trades, American President Lines (and other lines as well) has refused to meet the malpractices of some of its competitors and has in consequence been placed under a severe competitive disadvantage.

It is to the heavy interest of American President Lines, and a majority of the U.S.-flag lines as well, that the terms of the conference agreements and of the 1916 act be scrupulously observed. We have ships and service as good as any of our competitors, and expect to come out ahead in any competitive struggle which is waged on fair terms. (Hearings, pt. 2, vol. I, at 307.)

REASONS FOR MALPRACTICE

Some representatives of the steamship industry have tended to attribute the abuses found by the Antitrust Subcommittee to "weak" conferences and the absence of effective tying arrangements. Yet the hearings before the subcommittee demonstrate that flagrant violations and malpractices have taken place prior to 1958—when the Isbrandtsen decision placed in doubt the validity of dual-rate systems—in trades in which tying arrangements were in effect. For many years rebating was practiced on a grand scale in the Italian trade—the so-called WINAC trade—where not only a dual-rate system but also a tying arrangement was known as a fidelity commission system prevailed—hearings, part 1, volume I, at 49 and the following. Rebates were paid to shippers in the Philippine trade in 1954 where the conference—the Associated Steamship Lines—had instituted a dual-rate system which was then in force—hearings, part 2, volume I, at 160; part 1, volume I, at 741. An interoffice memorandum from a steamship line official cognizant with the situation suggests that the continuing malpractice was due not to the absence of a tying arrangement but to the lack of forthright conference action:

The logical place to stop this infraction of conference regulations is in ASSL (Associated Steamship Lines, the conference) but you feel it is hopeless. We are inclined to criticize ASSL for being so spineless. No line has the courage to take the bull by the horns. Evidently discretion is the better part of valor. (Hearings, pt. 2, vol. I, at 200.)

Thus, the notion that discrimination and malpractice can be eliminated if only Congress legalizes the use of an unlimited dual-rate system cannot be accepted as sound. The cause of these abuses are far more complex. The industry suffers from a history of woefully inadequate regulation by the Federal Maritime Board, long-standing disregard of the shipping laws by steamship lines and agents, and conferences, contrary to rudimentary concepts of fairness as laid down in U.S. shipping policy. This was made clear in the two House hearings. Yet, it is under these circumstances and against this background that still more power is to be given to the industry and to the steamship conferences without adequate safeguards to temper this power or to insure that the proliferation

of abuses which have been found will not continue.

Mr. President, this is a very vital and important matter to the shippers and the shipping companies of this Nation. I know there are several Senators who would like to hear the discussion. In order to give them an opportunity of knowing what is going on, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, will the Senator from Tennessee yield to me?

Mr. KEFAUVER. I am happy to yield, provided I do not lose the floor.

Mr. MANSFIELD. Mr. President, in conjunction with the distinguished minority leader, and after touching all bases, I should like to propound a unanimous-consent request. It is my understanding that the Senator from Tennessee wishes to discuss the shipping bill for about 40 minutes more.

Mr. KEFAUVER. I can discuss it for several hours, or I can discuss it for 1 hour.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that at 5 o'clock this afternoon the Senate lay aside the pending business and that at that time the Senate proceed to the consideration of Calendar No. 853, S. 2426, to revise the Federal election laws, to prevent corrupt practices in Federal elections, and for other purposes.

In the meantime, if that request shall be agreed to, I wish to propound, on behalf of the distinguished minority leader and myself, and with the full concurrence of the Senator from Tennessee [Mr. KEFAUVER] and the Senator from California [Mr. ENGLE], a unanimous-consent request that beginning at the conclusion of the morning hour tomorrow the debate on Calendar No. 842, H.R. 6775, be limited to 1 hour on amendments and 1 hour on the bill, the time to be equally divided, the proposal to be reduced to writing in the usual, regular form.

Mr. KEFAUVER. Mr. President, will the Senator yield for an inquiry?

Mr. MANSFIELD. I yield.

Mr. KEFAUVER. Does the Senator mean 1 hour on each amendment, the time to be divided equally?

Mr. MANSFIELD. Yes; 1 hour on each amendment, the time to be divided equally.

Mr. KEFAUVER. That is satisfactory to me.

Mr. RUSSELL. But that reservation does not apply to Calendar No. 853, S. 2426, does it?

Mr. MANSFIELD. Oh, no.

Mr. ENGLE. May I inquire about the time on amendments? Some 13 amendments are at the desk. I thought the distinguished Senator from Tennessee was willing to accept 15 minutes on each side on his major antitrust amendment. May we have that agreement?

Mr. KEFAUVER. I expect to offer three antitrust amendments. That will mean 30 minutes to a side. Some other amendments might take more than 15 minutes on a side, but we will try to be as brief as possible and yield back any time we do not use. I hope the Senator from California will accept about half the amendments.

Mr. JAVITS. Mr. President, will the Senator from Montana yield?

Mr. MANSFIELD. I yield.

Mr. JAVITS. I had in mind asking the Senator a question about Calendar No. 853, S. 2426. Is it intended to try to finish the consideration of S. 2426 tonight?

Mr. MANSFIELD. Not necessarily.

Mr. JAVITS. I am considering offering an amendment which may result in considerable debate.

Mr. MANSFIELD. I think the Senate should not remain in session too long tonight; I simply wished to indicate that S. 2426 would be the next business before the Senate. If Senators wish to make speeches, they may do so, but I assume there will be no votes tonight.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

(The unanimous-consent agreement, reduced to writing, is as follows:)

UNANIMOUS-CONSENT AGREEMENT

Ordered, That, effective on Thursday, September 14, 1961, at the conclusion of routine morning business, during the further consideration of the bill (H.R. 6775) to amend the Shipping Act, 1916, as amended, to provide for the operation of steamship conferences, debate on any amendment, motion, or appeal, except a motion to lay on the table, shall be limited to 1 hour, to be equally divided and controlled by the mover of any such amendment or motion and the majority leader: *Provided,* That in the event the majority leader is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or some Senator designated by him: *Provided further,* That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of the final passage of the said bill debate shall be limited to 1 hour, to be equally divided and controlled, respectively, by the majority and minority leaders: *Provided,* That the said leaders, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, motion, or appeal.

Mr. KEFAUVER. Mr. President, from the viewpoint of protecting the Government of the United States from unreasonable and discriminatory charges which have grown out of the conference system, which protection would be afforded by amendments I shall offer including the language of the House bill, I wish to give Senators an actual example of discrimination which has been practiced on the United States, and is in effect. I could also use other specifics than this one.

MALPRACTICE AGAINST THE UNITED STATES—OVERCHARGES ON SHIPMENTS OF GOVERNMENT-FINANCED GRAIN

There is one aspect of this conference situation which has received little publicity, which has been only partially investigated so far, but which would militate against any undue solicitude on the part of the U.S. Government toward the cartels. I refer to the fact that the conferences have not only widely employed discriminatory practices toward private American exporters and importers but also against the Government itself. The extent of these practices is unknown but their clear existence has been amply demonstrated.

During the course of the hearings before the House Antitrust Subcommittee, its chairman, Representative CELLER, requested the Comptroller General of the United States to report on "(w)hether the U.S. Government is or has been paying in excess of the prevailing market rate, or in excess of charges to private shippers for comparable shipments, for ocean transportation of grain under the foreign aid program"—hearings, part 3, volume II, at 927.

In response to this request, the General Accounting Office conducted a study of certain grain shipments made aboard U.S.-flag vessels for the account of the United States during 1957, 1958, and 1959, and in March of 1961, the Comptroller General of the United States, the Honorable Joseph Campbell, appeared before the Antitrust Subcommittee and reported on the results of this investigation—hearings, part 3, volume II at 926–953. Mr. Campbell told the subcommittee that, according to the findings of the GAO, two U.S.-flag carriers, Lykes Brothers Steamship Co. and Bloomfield Steamship Co., had charged rates on ICA financed grain shipments moving from gulf ports to Germany in excess of the rates charged commercial shippers between the same points. Mr. Campbell's statement summarized the findings of the GAO as follows—hearings, part 3, volume II, at 940–942:

With respect to grain shipments during 1958 and 1959, from U.S. gulf ports to Germany, financed by the International Cooperation Administration, we found instances in which two carriers charged the Government at rates in excess of the rates charged commercial shippers between the same points. Had the Government shipments moved at the rates charged commercial shippers during this period, we estimate that transportation charges to the Government would have been reduced by $305,000.

The estimated reduction is comprised as follows:

	1958	1959	Total
Bloomfield Steamship Co.	$141,003	$129,377	$270,380
Lykes Bros. Steamship Co., Inc.		34,731	34,731
Total	141,003	164,108	305,111

Our review of grain shipments during calendar year 1958 revealed that the Bloomfield Steamship Co. transported grains from U.S. gulf ports to Germany for commercial shippers at rates ranging from a low of $4.50 per ton to a high of $9.25 per ton, whereas, on Government-financed shipments of grain during the same period, Bloomfield Steamship Co. rates to the Government ranged from $10.50 to $13.50 per ton. Had the Government shipments moved at the rates charged commercial shippers during this period, we estimate that

transportation charges to the Government would have been reduced by $141,003.

For instance, in our examination of records covering 1958 shipments, we found that bills of lading were issued by Bloomfield for the transportation of both Government-financed and commercial wheat on the SS *Neva West*, voyage No. 7–S, sailing from Houston, Tex., and Galveston, Tex., to Germany in May 1958. The rate charged to the commercial shipper for wheat on this voyage was $6.75 per ton for 1,655 tons, while the rate paid by the Government was $12.50 per ton for 5,250 tons. The total charge to the Government for wheat aboard this vessel was $65,625. Had the Government been charged the commercial rate of $6.75 per ton, transportation charges to the Government would have been reduced by $30,188.

Our examination of other payments revealed a shipment in August 1958 of 2,000 tons of Government-financed wheat from Galveston, Tex., to Hamburg, Germany, on the Bloomfield vessel SS *Margaret Brown*, voyage No. 9–S, for which Bloomfield charged the Government at a rate of $10.50 per ton. On the same vessel between the same points, a commercial company shipped approximately 4,543 tons of barley for which Bloomfield charged at a rate of $9.25 per ton.

Mr. President, as a result of Justice Department action following these disclosures, it is understood that Lykes Brothers has settled a claim in the amount of $34,731.36 presented by the Government on account of alleged overcharges of freight for the carriage of Government-financed cargoes of grain to Germany—hearings, part 3, volume II, at 960. Lykes explained to the chairman of the Antitrust Subcommittee that this claim was settled in order to avoid litigation with the Government with respect to the meaning and application of the ICA supplier's certificate, which it signed in connection with the shipments which it transported for the ICA—hearings, part 3, volume I, at 955–959.

In a further report, dated August 5, 1961, ICA supplemented its earlier material as follows:

There was not available to ICA at the time of the committee's inquiry information upon which to determine whether any freight charged on 1960 parcel-lot shipments of grain at "open" rates exceeded the limitations of regulation 1. To fill this lack, ICA undertook a thorough search of its records and identified all ICA-financed liner shipments of grain during 1960 at "open" rates, the name of the vessel, port of loading, port of discharge, and the name of the carrier.

Attached hereto as exhibit A is the results of this investigation. I ask unanimous consent to have this exhibit placed in the RECORD at this point.

There being no objection, the exhibit was ordered to be printed in the RECORD, as follows:

EXHIBIT A

ICA-financed parcel lot movements of grain during calendar year 1960

Name of vessel	Voyage No.	Port of loading	Port of discharge
I. AMERICAN PRESIDENT LINES			
President Garfield	9	Stockton	Inchon.
II. BLOOMFIELD STEAMSHIP CO.			
Lucille Bloomfield	21	Galveston	Emden.
Neva West	18	do	Bremen.
Lucille Bloomfield	22	Houston	Hamburg.
Margaret Brown	20	do	Bremen.
Neva West	20	do	Do.
Alice Brown	218	do	Bremen/Rotterdam.
Margaret Brown	218	do	Do.
Do	228	do	Bremen.
Neva West	22	Galveston	Do.
Lucille Bloomfield	26	do	Emden.
Margaret Brown	23	do	Do.
Neva West	23	do	Do.
III. LYKES BROS. & CO., INC.			
Elizabeth Lykes	64	Houston	Bremen.
Aimee Lykes	53	Port Arthur	Piraeus.
Helen Lykes	60	do	Barcelona.
IV. PACIFIC FAR EAST LINES			
China Bear	70	Stockton/Oakland	Inchon/Pusan.
V. STATES MARINE LINES, INC.			
Sooner State	2	Galveston	Bremen.
Robin Mowbray	12	Vancouver/Portland	Hamburg/Weser.
Ines	13	do	Hamburg/Weser/Bremen.
V. STATES MARINE LINES, INC.—con.			
Steel Scientist	16	Portland	Pusan.
Palmetto State	70	do	Bremen/Rotterdam.
Bayou State	3	do	Hamburg.
Steel Surveyor	15	Portland/Longview	Weser.
Ocean Deborah	21	Longview	Do.
Rebecca	19	Houston	Hamburg/Bremen.
VI. STATES STEAMSHIP CO.			
Wyoming	64W	Seattle	Keelung.
VII. UNITED STATES LINES CO.			
American Pilot	48	Baltimore	Hamburg/Bremen.
American Traveler	111	Norfolk	Do.
American Scout	107	do	Bremen.
American Ranger	112	Baltimore	Rotterdam.
American Merchant	113	do	Hamburg/Bremen.
American Reporter	95	Baltimore/Norfolk	Do.
American Shipper	115	Norfolk	Do.
American Gunner	52	Baltimore	Rotterdam.
American Pilot	51	do	Hamburg/Bremen.
American Traveler	114	Norfolk	Bremen.
American Pilot	52	New York	Hamburg/Bremen.
American Scout	109	Baltimore	Do.
VIII. WATERMAN STEAMSHIP CORP.			
Hastings	82	Houston	Bremen.
Morning Light	164	Houston/Galveston	Emden.
Maiden Creek	74	Seattle	Pusan.
Choctaw	62W	Portland	Do.
Fairport	75W	do	Do.
Maiden Creek	75W	do	Inchon.
Warrior	83	Galveston	Bremen.

NOTE.—Inquiries were sent to all carriers reported above and replies have been received with the exception of the United States Lines Co.

Mr. KEFAUVER. Mr. President, I read further from the report:

It will be noted that eight separate steamship lines were involved in ICA-financed grain carriage of the type here being considered. Letters were then sent to these eight companies asking each to identify all grain cargoes carried for private shippers at "open" rates during a 30-day period before and a 30-day period after each carriage of an ICA-financed cargo by the carrier questioned. The carrier was expressly asked to identify any private cargo carried on the same voyage of the vessel on which the ICA-financed cargo was transported. In each case the carrier was asked to supply the rates charged the private shipper.

The purpose of this inquiry was to determine of each carrier whether, during any period 30 days before or after a given ICA-financed shipment by it, that carrier also transported a privately financed cargo at a rate lower than the rate charged ICA. This information would, of course, be the basis for determining whether any carrier had violated its certification that the rate charged ICA did not exceed the rate paid to the supplier for similar services by other customers similarly situated.

To date, ICA has received replies from seven of the eight steamship companies contacted, and further steps are being taken to elicit a reply from the one remaining company. These replies disclose that only on two occasions did the steamship companies questioned carry private cargoes during a 60-day period in which they were also engaged in an ICA-financed carriage. In each case the private cargo was carried on the same voyage of the vessel transporting the ICA-financed cargo, and in each case the private cargo was carried at a lower rate than the ICA-financed cargo.

In these cases a further investigation is being made to determine whether the private carriage was strictly comparable to the ICA carriage and claims will be filed in the event the comparability of these shipments is established. In this connection, the maximum recovery possible is approximately $18,000. In addition, the possibility exists that by a comparison of shipments of one of the steamship lines for a 90-day period rather than a 60-day period, additional recoveries may be possible totaling approximately $73,800.

In addition to the investigation of the charges by the carriers mentioned above, it is necessary to make such additional investigation of the open rate liner market for grain shipments as will determine whether the 1960 ICA-financed shipments in question were in compliance with the prevailing rate requirement of regulation 1. This study, which will involve the collection of a rep-

resentative sample of open rate liner charges for grain in the period of the ICA-financed shipments, will require a canvass of carriers by mail and probably some field investigation following. The result of this study will be forwarded to the committee as soon as available.

I think that this ICA material speaks for itself; the U.S. Government need shed no crocodile tears over the thought of regulating the international cartels.

PREDATORY PRACTICES DIRECTED AGAINST NONCONFERENCE COMPETITION

The record developed by the House Antitrust Subcommittee indicates that the conference lines have waged an almost continuous battle against independent or nonconference competitors, and have engaged in practices which were designed to curtail or eliminate independent competition. To cite one well-known example, the Supreme Court decision in the Isbrandtsen case was based on a finding that the members of a steamship conference—the Japan/Atlantic Gulf Freight Conference—had instituted a dual-rate contract system in order to stifle the independent competition of the Isbrandtsen Co. (356 U.S. at 493). Conferences and conference members have utilized, or considered the utilization of, a plethora of other devices designed to curtail, injure or eliminate the independent. These devices almost invariably involve concerted action against the nonconference competitor with the full power of a conference or grouping of regular lines being applied against a single competitor. Joint action of conference members to secure the boycott of an independent was one approach. For example, in the trade between the United States and South Africa a nonconference service under the name of Baron Line has been operated from time to time. During 1957 and 1958 the regular lines in the trade—which included three American-flag and several foreign-flag lines—were concerned with the Baron Line and made attempts to counter its competition. After consorting together to determine what steps to take in this direction, the regular lines agreed to reduce their rates to such a point that they could approach shippers and demand that Baron Line be boycotted—hearings, part 1, volume IV at 4238–39. Subsequently, a high official of one of the regular lines indicated in an intercompany communication:

As you are aware, Baron Lines are advertising two steamers for the month of June. I have had several talks with our various competitors; namely Moore-McCormack, Safmarine and Lykes regarding this competition.

First of all, we have sold Moore-McCormack on the idea that we should both work closely together to try and kill off the Baron Line and then go back to our own private battle. (Hearings, pt. 1, vol. IV at 4298; full document at 4314.)

While officials of these lines denied that this communication stated the purpose of their activities, the record of the Antitrust Subcommittee hearings on this point contains contradicting statements—hearings, part 1, volume IV, at 4298–4308.

Again certain nonconference competition in the North Atlantic trade, other devices were employed. On one occasion, the nonconference operator secured a shipment of lard at $1 per hundred pounds. The conference members with the exception of one, agreed to reduce the rate to 55 cents per hundred pounds—hearings, part 1, volume II, at 1495–1496. The purpose of this step was to discourage the nonconference competition from becoming established—hearings, part 1, volume II, at 1495.

In the Isbrandtsen case, Mr. Justice Brennan described the fighting ship as the "crudest form of predatory practice" which the Alexander committee brought to light (356 U.S. at 488). The Shipping Act of 1916, of course, outlaws this practice. As defined in the act, a fighting ship is a "vessel used in a particular trade by a carrier or group of carriers for the purpose of excluding, preventing, or reducing competition by driving another carrier out of said trade." As commonly understood, a fighting ship was a vessel of one of the conference lines which the conference would select to sail on the same days and between the same ports as the nonconference vessel. Rates on the fighting ship would be reduced low enough to garner the trade from the nonconference vessel. The expenses and losses from the voyage were shared by the conference members. When the outsider had been driven out the conference would be free to raise its rates to a point where it could make up the loss (356 U.S. 488).

It appears that devices similar in their nature and impact to this most predatory of practices have been used by the conferences. The modern version apparently passes under the name of fighting committee or emergency rate committee. A fighting committee is a committee of steamship line representatives authorized to commit the conference to any rate quotation necessary to preserve for the conference lines shipment of a particular commodity which a nonconference operator is seeking—hearings part 1, volume II, at 1517. In June of 1959 it appears that such a committee, denominated a special ratemaking committee, was formed; its objective was spelled out in succinct terms:

The elimination of Mamenic Line from the North Atlantic trade.

Take away from Meyer Line those commodities which they are carrying in volume and of which the conference lines are handling only small quantities.

The Meyer Line which was the object of this attention is a nonconference operator plying the North Atlantic trade routes. Some steamship conference operators claim that independent lines are irresponsible, do not provide valuable service; and have an advantage over conference lines because they charter rather than own their vessels. A high official of United States Lines, a large conference operator, testified freely that Meyer Line was a respected and valuable member of the shipping fraternity, albeit nonconference. Mr. Rand stated:

The Meyer Line is a very reputable outfit. They charge as far as I can tell you now, almost an even 10 percent under conference rates. They provide a weekly sailing between continental Europe, and the east coast, and they provide in return a weekly sailing from the east coast to continental Europe * * * They put a lot of money in their ships * * * and they have built up a large organization. They are providing an excellent service * * * Meyer will stay with us, and we are perfectly happy to have him, because he is not trying to underquote all our rates * * * As far as I am personally concerned, he can stay there just as long as he wants. We will, of course, try to get him into the conference. We have done so before unsuccessfully, but we will not relinquish our efforts. (Hearings, pt. 1, vol. II, at 1627.)

Despite all these glowing accolades for the Meyer Line and the excellence of its service, documentary material in the printed record of the Antitrust Subcommittee hearings would indicate that certain influential conference lines have been for years conspiring to restrict and stifle the independent competition of this line.

During the period 1953 to 1955, attempts were being made to induce two powerful German steamship lines—the North German Lloyd and the Hamburg-American Line—to join a conference operating between the North Atlantic ports of the United States and the Continent. As a condition to their entry, the German lines wanted the conference to adopt a method to curtail or stifle the independent competition of Meyer. In communications between these lines and their general agents, they appear to have considered the possibility of the conference waging limited warfare against Meyer in order to make things sufficiently difficult for Meyer to force him to restrict his sailings to not more than two per month or taking drastic rate action against Meyer "to convince Meyer of the error of his ways"—hearings, part 3, volume I, at 295. At one point it was suggested that a delegation of German lines and certain conference lines should be sent to "seriously warn Meyer not to increase his sailings" or to overdo his activities—hearings, part 3, volume I, at 297–299.

In the end the German lines took the position that to deal with Meyer the conference must establish a committee which was apparently similar to the fighting committee—referred to above—and a somewhat more sophisticated version of the fighting ship principle. The committee was to be called an emergency rate committee and was described as follows:

The Emergency Rate Committee should consist of three lines only and decide with two-thirds majority (the chairman having no right to vote) and making definite decisions about rates without asking the owners. The committee must have the right to induce fighting rates not only for substantial parcels but must have free hands to fight Meyer and Mitsui (another nonconference operator) the way they feel it effective without unnecessarily cutting the rates. (Hearings, pt. 3, vol. I, at 326.)

It was also proposed that such a committee be established in the corresponding westbound conference on the grounds:

We need a two-edged sword to cut Meyer down. (Hearings, pt. 3, vol. I, at 305.)

It appears that the conference did establish the emergency rate committee

in 1955—hearings, part 3, volume I, at 341–342.

Is this the kind of practices we want to legalize, and are they reconcilable with our basic economic policy?

PROGNOSTICATION

It is obvious, from this sampling of the practices of conferences and the record compiled by the Celler committee, that these steamship conferences authorized under the Shipping Act have been prone to abuse their authority. Their history is replete with instances where they have acted contrary to the public interest and in open violation of law. Yet it is to the not-so-tender mercies of these foreign-dominated cartels, which have repeatedly demonstrated their irresponsibility in the past, that the present bill would leave our thousands of shippers—with wholly inadequate safeguards.

Let us examine the power which these foreign dominated steamship conferences would be able to wield over American shippers if this bill is enacted as presently drawn. In the first place, sanctioning of the dual-rate contract will allow the conferences to obligate thousands of American shippers to employ their vessels exclusively and to abide by all other clauses contained in dual-rate agreements. Exactly how many American shippers will fall into the coils of the conferences, if the system is finally legalized, is unknown, but the number would appear substantial according to figures in a table which at best are an approximation for a representative sampling of conferences only.

Mr. President, I ask unanimous consent that the table be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Dual-rate contracts of selected steamship conferences in the foreign commerce of the United States

Conference:	*Approximate number of contracts*
Pacific Westbound	4,100
Pacific Coast European	3,500
Pacific Coast Latin America [1]	3,500
Pacific Straits / Pacific Indonesian	3,500
Trans-Atlantic [2]	35,000
India, Pakistan & Burma Outward	6,500
River Plate and Brazil [3]	8,000
Associated Latin America [4]	60,000
Atlantic and Gulf Indonesia / Atlantic and Gulf Malaya	5,000
Gulf Associated [5]	6,233

Source: Bonner committee hearings, passim; hearings before the House Committee on Merchant Marine and Fisheries on H.R. 12751, 85th Cong., 2d sess., passim (1958).

[1] Includes the following conferences which employ dual rates: Canal Central America Northbound Conference, Capca Freight Conference, Colpac Freight Conference, Pacific Coast/Caribbean Seaports Conference, Pacific Coast/Mexico Freight Conference, Pacific Coast/Panama Canal Freight Conference, Pacific/West Coast of South America Conference, Pacific Coast River Plate Brazil Conference, West Coast of South America/North Pacific Coast Conference.

[2] Includes the following conferences which employ dual rates: North Atlantic Baltic Freight Conference, North Atlantic Continental Freight Conference, North Atlantic French Atlantic Freight Conference, North Atlantic Mediterranean Freight Conference, North Atlantic United Kingdom Freight Conference.

[3] Includes the following conferences which employ dual rates: River Plate and Brazil Conferences, East Coast South America Reefer Conference, Brazil-United States-Canada Freight Conference, Mid-Brazil/United States-Canada Freight Conference, North Brazil/United States-Canada Freight Conference, River Plate/United States-Canada Freight Conference.

[4] Includes the following conferences which employ dual rates: Havana Steamship Conference, Santiago de Cuba Conference, United States Atlantic and Gulf-Haiti Conference, U.S. Atlantic and Gulf Ports-Jamaica (B.W.I.) Steamship Conference, Leeward & Windward Islands & Guianas Conference, East Coast Colombia Conference, Atlantic and Gulf/Panama Canal Zone, Colon and Panama City Conference, Atlantic & Gulf/West Coast of South American Conference, Havana Northbound Rate Agreement, West Coast South America Northbound Conference, Atlantic and Gulf/West Coast of Central America & Mexico Conference, United States Atlantic & Gulf-Venezuela & Netherlands Antilles Conference.

[5] Includes the following conferences which employ dual rates: Gulf/French Atlantic Hamburg Range Freight Conference, Gulf Mediterranean Ports Conference, Gulf/United Kingdom Conference.

Source: Walden, "The Dual Rate Moratorium—End of the Isbrandtsen Odyssey," 10 J. of Public Law, 78, 85 (1961).

Mr. KEFAUVER. However, if a shipper does sign a dual-rate contract and subsequently breaches it, he may be subject to a heavy penalty for failure to fulfill his agreement in the form of liquidated damages equal to the actual freight rate for the cargo involved. This type of penalty, in the guise of a liquidated damage provision, has long been frowned upon by Anglo-American common law; yet is sanctioned by the bill. The effect of this liquidated-damage provision is not to recompense the carrier for damages suffered through breach—which is the standard measure of contract damages, as any lawyer knows—but to "coerce shippers to refrain from using nonconference carriers"—*Isbrandtsen Co.* v. *United States* (239 F. 2d 933, 940 (D.C. Cir. 1956); affirmed 356 U.S. 481 (1958)).

On the other hand, what remedy does the poor shipper have should the conference, for one reason or another, fail to provide transportation facilities for his goods? Is there any liquidated-damage provision? Any penalty? The answer in both cases is "No." Indeed, there is no obligation whatsoever on the part of conference carriers to transport the cargo of the shipper in most dual-rate contracts, so that failure to haul the shipper's goods does not even constitute a breach. Under such circumstances, it is true that, under the Senate bill, the shipper is released from his contractual obligation and may then seek transportation facilities elsewhere—that is, if he can find them. But the bill as reported would also permit dual-rate contracts to be employed to eliminate independent carriers from the trade and establish a monopoly for conference lines. Thus, the freedom of the shipper to seek outside tonnage granted in the bill is, at best, an empty gesture without some safeguards to assure the existence of other carriers in the trade, should such circumstances arise.

Why have not shippers openly opposed the dual-rate system in view of these restrictions which bind them so irrevocably to conference lines? To begin with, many large shippers have favored dual-rate agreements because they have been able to obtain favorable terms not available to other shippers. The cotton shippers association, for example, which has supported dual-rate contracts, has been able through collective bargaining with the conferences, to obtain special concessions such as the right to cancel on 30 days' notice, and the promise on the part of the lines to provide regular sailings, as well as favorable treatment on rates. Furthermore, a lot of shipper support has been "drummed up" by the conferences and lacks genuine spontaneity, as witness the following telegram dispatched by the Transatlantic Associated Freight Conferences, a group of conferences covering the export trade of the United States from North Atlantic ports to Europe:

> In mutual interest your support respectfully requested on interim legislation just introduced House and Senate to maintain status quo dual-rates systems until June 30, 1960. Urge you or your representative appear personally before House Merchant Marine and Fisheries Committee hearing June 3 through June 5, 1958, by contacting Mr. John Drewery, committee counsel, room 219, Old House Office Building, Washington, D.C. If you unable attend hearing suggest you telegraph your support interim legislation to Hon. HERBERT C. BONNER, chairman, House Merchant Marine and Fisheries Committee and to Hon. WARREN MAGNUSON, chairman, Committee on Interstate and Foreign Commerce.

This telegram was sent to more than 60 major shippers.

Some shippers have obviously opposed dual-rate contracts inasmuch as they have seen fit to violate them and subject themselves to severe penalties, and in some instances, outright cancellation of their agreements. For example, Anderson & Clayton was assessed some $145,000 for shipping cotton aboard nonconference lines from Pacific coast ports to Europe in violation of their dual rate-contract with the Pacific Coast European Conference—hearings on H.R 12751, 85th Congress, 2d session, at page 219, 1958. This is one of the highest penalties ever levied by a conference against a shipper violating a dual-rate contract. But, what is still more surprising is that Anderson & Clayton, the shipper, is 50 percent owner of States Marine, a steamship company belonging to the Pacific Coast European Conference. Thus, despite, for all practical purposes, its controlling interest in a conference line, this company chose to breach rather than adhere to the rigid terms of the agreement. The table I ask unanimous consent to insert in the RECORD at this time reveals the names of other shippers who have become disillusioned with dual-rate agreements and have been penalized by the conferences by virtue of their resort to nonconference lines.

There being no objection, the table was ordered to be printed in the RECORD,

Violations of conference merchants contracts by contract signatories, 1950 to Sept. 1, 1958

Name of conference	Name and address of violator	Approximate date	Cargo	Violation	Penalty and/or damages	Disposition
Gulf/French Atlantic Hamburg Range Freight Conference (No. 140-1).	None

Violations of conference merchants contracts by contract signatories, 1950 to Sept. 1, 1958—Continued

Name of conference	Name and address of violator	Approximate date	Cargo	Violation	Penalty and/or damages	Disposition
The West Coast of Italy, Sicilian, and Adriatic Ports North Atlantic Range Conference (No. 2846).	O.T.I.M., Genoa	Jan 4. 1951	1,338 tons spare parts	Used nonconference vessel *Arnold Maersk.*		No action on account of justification.
	Mario Salvetti, Genoa	Jan. 7, 1951	25 tons magnesium scraps	Used nonconference vessel *Maria C.*		Do.
	do		Several undetailed shipments.	Used nonconference vessel.		Do.
	Cisimar, Genoa		do	do	Denied contract rate benefits Aug. 7, 1953.	Readmitted as of Oct. 18, 1955.
		June 17, 1958	800 bags cocoa and 1 automobile.	Used nonconference vessel *Kohka Maru.*		Continued on docket.
		Aug. 6, 1958	1,200 bags cocoa	Used nonconference vessel *Kochu Maru.*		Warned about future violations.
	Heritrans, Genoa	Nov. 30, 1953	9,777 tons silk waste	Used nonconference vessel *Leise Maersk.*		No action on account of justification.
	Celso Repetto, Genoa	Apr. 30, 1954	Small undetailed parcels	do		On account of pending admission of Maersk Line no action taken.
	Mario Tasso, Genoa	Mar. 30, 1954	19,843 tons jute cloth, used	Used nonconference vessel *Leza Maersk.*		No action on account of justification.
	Textile Transport, Genoa	Apr. 30, 1954	Small undetailed parcels	Used nonconference vessel *Leise Maersk.*		On account of pending admission of Maersk Line no action taken.
	Masini G., Genoa	Oct. 1, 1957	94 tons tractors, crawler type, tracks.	Used nonconference vessel *Hrvatska*		Warned about future violations.
	Angelo Rosaco, Genoa	May 9, 1958	1,755 kos. machinery	Used nonconference vessel *Kokoh Maru.*		Do.
	Francesco Parisi, Genoa	June 17, 1958	45 tons Paradise see is, 2 automobiles.	Used nonconference vessel *Kohka Maru.*	Decisions regarding shipper pending July 1, 1958.	Warned Oct. 2, 1958; no action taken re past violations.
	Oliver D., Genoa	Aug. 6, 1958	33 tons old bagging	Used nonconference vessel *Kochu Maru.*		Denied contract rate benefits as of Sept. 23, 1958.
	Attilio fu A. Galletto, Genoa	do	25 tons cotton waste	Used nonconference vessel *Kochu Maru.*	Denied contract rate benefits as of Sept. 23, 1958.	Readmitted as Galletto Attilio & C. from Mar. 11, 1958.
	Pietro Montanelli, Leghorn	Aug. 31, 1958	240 tons marble chips	Used nonconference vessel *Korai Maru*		Denied contract rate benefits as of Sept. 23, 1958.
	Fischer & Rechsteiner, Genoa.	Oct. 6, 1958	6 tons lamp glass	Used nonconference vessel *Kokoh Maru.*		Warned about future violations.
	Francesco Borzone, Genoa	Aug. 6, 1958	15 tons iron screws	Used nonconference vessel *Kochu Maru.*		Do.
		Oct. 6, 1958	7 tons iron screws	Used nonconference vessel *Kokoh Maru.*	Denied contract rate benefits Oct. 7, 1958.	Readmitted as of Dec. 9, 1958.
	Levrero & Kunz, Genoa	Aug. 6, 1958	5,700 kos. goat skins	Used nonconference vessel *Kochu Maru.*		Warned about future violations.
	Gotelli & C.S.P.A., Genoa	do	30 tons jute rags	do		Do.
	Pierucci & Riccioni, Leghorn	Aug. 31, 1958	75 tons motor vehicle tires	Used nonconference vessel *Korai Maru*		Do.
	Renato Riccio, Naples	Oct. 23, 1958	28 tons macaroni, spaghetti, vermicelli.	Used nonconference vessel *Capt. M. Lyras.*		Do.
South Atlantic Steamship Conference (No. 8310).	Finberg Trading Co., Dallas, Tex.	June 26, 1950	1,731 bales of cotton	Used nonconference vessel *Governor Graves.*	$12,117	Did not pay; contract canceled Sept. 13, 1950.
	Railway Supply & Manufacturing Co.	June 1954	396 bales cotton waste	Used nonconference vessel *Merwede*		Contract canceled Sept. 4, 1954.
U.S. Atlantic and Gulf/Australia-New Zealand Conference (No. 6200).	None					
Colpac Freight Conference (No. 7270)	do					
Calcutta/U.S.A. Conference (No. 6500)	do					
River Plate and Brazil Conferences (No. 59)	Pressed Steel Car Co	Sept. 30, 1953		Used nonconference vessel	None [5]	None.[5]
	Pan American Freight Development Corp.	June–July 1954		do	do	Do.
	Hummell Chemical Co., Inc.	do		do	do	Do.
	International Commodity Corp.	do		do	do	Do.
	Leval & Co., Inc	May 1956		do	do	Do.
	Davidson Chemical Co	1958		do	do	Do.
Straits/Pacific Conference (No. 7090)	Industrial Trading, Ltd	Mar. 13, 1952		Used nonconference vessel *Sir John Franklin.*	do	Do.
The India, Pakistan, Ceylon, and Burma Outward Freight Conference (No. 7690).	None					
Pacific/Indonesian Conference (No. 6060)	do					
Pacific-Straits Conference (No. 5680)	do					
Pacific Coast-Australasian Tariff Bureau (No. 50-1).	do					
Gulf and South Atlantic Havana Steamship Conference (No. 4188).	(6)					
Pacific Westbound Conference (No. 57)	Marsman Co. of California	Sept. 1, 1953		Used nonconference vessel *Muncaster Castle.*	?	Paid $300.
	Leval & Co., Inc.[7]			Used nonconference vessel *Cyclope*		
	Robin Hood Flour Mill, Inc.	October 1957		Used nonconference vessel *Panagiotis D*	?	Paid $1,000.
The West Coast of Italy, Sicilian and Adriatic Ports North Atlantic Range Conference (No. 2846).	I.N.D.A., Genoa	Feb. 3, 1951	500 tons aluminum ware	Used nonconference vessel *Hellen Maersk.*		No action on account of justification by shipper.
	Mario Molinari, Genoa	Feb. 20, 1951	9 tons waste rubber	Used nonconference vessel *Enrico C.*	Denied benefits of contract rates Mar. 30, 1951.	Readmitted Oct. 29, 1952.

	Occhiuto G. & C.S.p.A., Genoa.	July 1, 1950	6,800 tons kidskins	Used nonconference vessel *Maria C.*		No action on account of justification by shipper.
	Carrara, Marson, Seccenti, Genoa.	May 4, 1950	1,000 kos. dried skins	do		Deferred to next rate committee meeting.
		June 6, 1950	11,500 tons coffee	Used nonconference vessel *Luisa C.*		Matter dropped.
	Otto & Rosoni S.r.l., Genoa.	May 15, 1950	23 tons wool	Used nonconference vessel *Enrico C.*		
		July 1, 1950	8.8 tons wool	Used nonconference vessel *Maria C.*		Continued on docket for explanation.
		July 13, 1950	20 tons wool	Used nonconference vessel *Eugenio C.*		Lines agreed no action to be taken.
		Aug. 6, 1958	2 tons wooden and iron works.	Used nonconference vessel *Kochu Maru.*	Denied benefits of contract rates Sept. 23, 1958.	Readmitted Oct. 1, 1958 on account of justification.
	Gastaldi & Co., Genoa	May 15, 1950	23 tons rubber	Used nonconference vessel *Enrico C.*		No action on account of justification by shipper.
	Globe Transport, Genoa	Sept. 26, 1950	11,027 kos. "iron pipes," 700 kos. "rubber pipes," and 69 kos. "faucets."	do		Denied contract rates benefits as of Jan. 15, 1951.
	Luigi Serra, Genoa	June 6, 1950	3,250 kos. machinery	Used nonconference vessel *Luisa C.*		No action on account of justification by shipper.
		Mar. 15, 1951	10 tons machinery	Used nonconference vessel *Hellen Stevenson.*		Do.
	Pelli Cuoi Ed Affini, Milan.	July 22, 1950	18 tons dried rabbitskins	Used nonconference vessel *Enrico C.*		No action taken.
	Sorveglienza S.P.A., Genoa.	July 13, 1950	18,800 tons mercury	Used nonconference vessel *Eugenio C.*		Continued on docket.
		Aug. 1, 1950	100 tons lentils	Used nonconference vessel *Dorothy Stevenson.*	Denied benefits of contract rates Sept. 6, 1950.	Readmitted as of Nov. 15, 1950.
		Sept. 24, 1955	1,425 cases preserves	Used nonconference vessel *Lawak*	Denied benefits of contract rates Nov. 10, 1955.	Readmitted as of Jan. 12, 1955.
	Marengo & C., Genoa	Sept. 26, 1950	3,653 kos. coffee percolators	Used nonconference vessel *Enrico C.*		No action taken on account of justification.
	Giuseppe Buscaglia, Genoa	do	50 tons rags	do	Denied benefits of contract rates Jan. 15, 1951.	Readmitted as of Jan. 29, 1952.
	Andrea Merzario S.A., Genoa.	Aug. 3, 1950	3,665 tons feathers	Used nonconference vessel *Arnold Maersk.*		No action on account of justification by shipper.
	Roberto fu Giuseppe Viggiani, Genoa.	Sept. 20, 1950	30,000 kos. jute bags	Used nonconference vessel *Hellen Stevenson.*		Continued on docket pending further information.
		Sept. 26, 1950	101,360 kos. lithopone; 30,000 kos. jute bags.	Used nonconference vessel *Enrico C.*		
		Oct. 6, 1950	101,360 kos. lithopone	Used nonconference vessel *T. J. Stevenson.*		
		Oct. 19, 1950	"Several parcels"	Used nonconference vessel *Dorothy Stevenson.*		
		Nov. 5, 1950	do	Used nonconference vessel *Maria C.*		Denied benefits of contract rates as of Nov. 15, 1950.
	Giordano Oreste, Genoa	Oct. 11, 1950	2,190 tons textiles, silk and cotton.	Used nonconference vessel *Eugenio C.*		Denied benefits of contract rates Nov. 15, 1950.
		Nov. 5, 1950	Yarns	Used nonconference vessel *Maria C.*		Readmitted as of July 19, 1951.
	Edoardo Consorti & Figli, Prato.	Dec. 7, 1950	Rags	Used nonconference vessel *Enrico C.*		No action on account of justification.
	Alpina Marittima, Genoa	Sept. 20, 1950	176 kos. hats	Used nonconference vessel *Hellen Stevenson.*		Do.
	Salata & Ferrando, Genoa	Oct. 13, 1950	5,092 tons nougat-torrone	Used nonconference vessel *Christian Maersk.*		Do.
	Riomar, Genoa	Oct. 11, 1950	5,279 kos. empty flasks	Used nonconference vessel *Eugenio C.*		Do.
		Jan. 7, 1951	154 tons magnesium scraps	Used nonconference-vessel *Maria C.*		Do.
	Princeps S.A., Genoa	Nov. 5, 1950	45 tons sulfured cherries	do		Do.
	Goldoni & Iodio, Genoa	Oct. 11, 1950	151,600 tons cellulose	Used nonconference vessel *Eugenio C.*	Denied benefits of contract rates Nov. 15, 1950.	Readmitted as of Jan. 8, 1951.
	Odino-Valperga, Genoa	Nov. 5, 1950	45 tons sulfured cherries	Used nonconference vessel *Maria C.*		No action taken on account of justification by shipper.
		Mar. 13, 1951	14 tons bulk aluminum and 37,300 tons magnesium.	do		Do.
	Puliti & Vassallo, Genoa	Nov. 10, 1950	5,637 tons machinery	Used nonconference vessel *Paolian*		No action on account of justification.
The West Coast of Italy, Sicilian and Adriatic Ports North Atlantic Range Conference (No. 2846).	Puliti & Vassallo, Genoa	Aug. 6, 1951	49,950 tons iron nails	Used nonconference vessel *Henry Stevenson.*		No action on account of justification.
		Sept. 22, 1951	50 tons iron nails	Used nonconference vessel *T. J. Stevenson.*		Denied contract rates benefits Oct. 9 1951.
	Benigno Repetto, Genoa	Dec. 6, 1950	1,018 tons washed wool	Used nonconference vessel *Enrico C.*		No action on account of justification.

[1] Includes the following conferences:
(1) Atlantic & Gulf/Panama Canal Zone, Colon, and Panama City Conference (No. 3868).
(2) Atlantic & Gulf/West Coast of Central America and Mexico Conference (No. 8300).
(3) Atlantic & Gulf/West Coast of South America Conference (No. 2744).
(4) East Coast Colombia Conference (No. 7590).
(5) Havana Steamship Conference (No. 4189).
(6) Leeward & Windward Islands and Guianas Conference (No. 7540).
(7) Santiago de Cuba Conference (No. 7620).
(8) U.S. Atlantic & Gulf-Bermuda Freight Conference (No. 7900). (Does not employ dual rate contract.)
(9) U.S. Atlantic & Gulf-Haiti Conference (No. 8120).
(10) U.S. Atlantic & Gulf-Venezuela and Netherlands Antilles Conference (No. 6870).
(11) U.S. Atlantic & Gulf Ports-Jamaica (B.W.I.) S.S. Conference (No. 4610).
(12) West Coast South America Northbound Conference (No. 7890).

[2] Covers period 1950–57. No Merchants' Freighting Agreement in effect as of Oct. 15, 1958.
[3] No active investigation conducted on suspected violations since summer of 1956.
[4] No active investigation conducted on suspected violations since 1955.
[5] Suit filed to recover damages but denied by courts. See *River Plate & Brazil Conferences* v. *Pressed Steel Car Co.*, 227 F. 2d 60, aff'g. 124 F. Supp. 88 S.D.N.Y., 1955.
[6] Conference replied "* * * it is virtually impossible to comply with your request due to fact that, first, we do not have the staff to compile such information * * *."
[7] Violation subject of suit in circuit court of Multonomah County, Oreg. Decided adversely to conference July 16, 1951, and subsequently affirmed by Supreme Court of Oregon.

Mr. KEFAUVER. I honestly believe many shippers are opposed to dual-rate agreements but are fearful of voicing their protests, first, because of the power possessed by the conferences over all of our foreign trade routes, and second, because a number of big companies, who are able to get their own terms, supported the conferences because they have nothing to lose thereby. But, a number of shippers have pointed with concern to the defects in the system, and I ask unanimous consent to place in the RECORD, a summary of these defects, with the comment that these formed an important part of the background for the safeguards ultimately written into the Bonner bill:

The summary was printed by the Steamship Conference Reporter, March 2, 1961, and the references are to pages in the Bonner hearings.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

CRITICISMS RE CONTRACT RATE SYSTEM

(a) Contracts are not uniform (Thorpe, p. 449; Maynard, pp. 483, 485–486; Staley, pp. 561–562; Meredith, (accompanied by Glass), pp. 818–819; Deane, p. 831; Sinclair, p. 1345; Stetson, p. 1394; Bransten, pp. 1424, 1432–1433; Connolly, p. 1473; Gavigan, p. 1540; Falk, pp. 1548–1550).

(b) Contracts are unilateral, give shippers few rights (do not guarantee space, etc.) (O'Connor, pp. 582–583; Spedden, p. 924; Eikel, pp. 1018–1019; Stetson, p. 1395; Bransten, pp. 1413, 1462; Falk, pp. 1548–1550).

(c) Contracts' liquidated damage provisions are unfair (O'Connor, pp. 582–583; Sinclair, p. 1344; Stetson, p. 1395; Gavigan, p. 1540).

(d) Spread or differential between contract and noncontract rates is too great; noncontract rate is unrealistic and a penalty rate (Crinkley, p. 214; O'Connor, pp. 583–584; Stetson, pp. 1395–1396; Connolly, p. 1474; Gavigan, p. 1540).

(e) Contracts unfairly cover 100 percent of contract signer's shipments (French, pp. 1000–1001; Burke, p. 1097; Hinrichs, p. 1187; Bordelon, p. 1202).

(f) Contracts unfairly cover signer's affiliates and subsidiaries (Shields, p. 502; O'Connor, p. 595; Arnold, pp. 1111–1112; Sinclair, p. 1343; Morin, p. 1534).

(g) Contracts unfairly cover practically all of a shipper's cargo including bulk-type cargoes, shipments contract signer moves in vessels it owns or charters, and full-shipload cargoes (Shields, pp. 502, 504–507; O'Connor, p. 595; Finley, pp. 803–805; Arnold, p. 1112; Sinclair, p. 1344).

(h) Contracts unfairly cover cargoes not being carried by nonconference competitors (Classen, p. 494).

(i) Contracts unfairly being construed to cover f.o.b./f.a.s. sales of contract signers (Maynard, pp. 483–486; Coron, p. 523; O'Connor, pp. 639–640; Kneessy, pp. 705, 709, 712–714; Heist, pp. 721–724; Gravely, pp. 794–795; Meredith, pp. 813–814, 818; Deane, pp. 827–829; Ryon, pp. 833–834; Gould, pp. 891–893; Spedden, p. 916; Creekmore, pp. 980, 983; Eikel, p. 1015; Neuert, pp. 1056–1057; Arnold, pp. 1111–1112; Houston, p. 1137; Knight, pp. 1139–1142, 1151–1152; Tolpo, p. 1164; Sinclair, pp. 1342–1343; Tolan, pp. 1489–1525; Quinn, pp. 1524–1525; Morin, pp. 1531, 1534; Gavigan, p. 1541; Falk, pp. 1548–1550; Gray, p. 1025; Lewis, p. 1082).

(j) Contracts unfairly being construed not to cover f.o.b./f.a.s. sales of contract signer (Stetson, pp. 1394–1395; Labagh, p. 1406; Robb, pp. 1481–1482).

(k) Contracts unfairly run indefinitely or are renewed automatically and are difficult for shipper to cancel (Sinclair, p. 1344; Stetson, p. 1395).

(l) Conferences fail to notify contract shipper of proposed changes in the existing contract at least 4 months before effective date of such changes (Radcliffe, p. 475).

(m) Contracts not needed; e.g., other conferences get along without them (Crinkley, pp. 223–224; O'Connor, pp. 589–590; Ryon, p. 834; Bransten, pp. 1421–1422).

(n) Contracts will or might seriously damage or destroy nonconference lines (Crinkley, pp. 198, 208; Triggs, p. 567; O'Connor, pp. 580–581, 632–634, 643–644; Kneessy, p. 706; Peabody, p. 785; Gravely, p. 794; Meredith, pp. 816–817; Williams, pp. 969, 974–975; Wolfle, p. 1082; Lewis, p. 1082; Knight, pp. 1140–1141, 1150; Tolpo, p. 1163; Muzzy, p. 1528).

(o) Contracts' benefits unfairly extended to "associate member" lines (O'Connor, p. 589).

(p) Law authorizing contracts would be unconstitutional (O'Connor, pp. 644–645).

(q) Contracts cause rates to be too high (Kneessy, pp. 705–706; Gravely, p. 794; Bransten, pp. 1413–1417; Gavigan, p. 1540).

(r) Contracts unfairly cover certain ports not served (Sinclair, pp. 1343–1344; Stetson, p. 1395).

(s) Contract rates do not stabilize trade, can be increased on less than 90 days' notice (Stetson, p. 1395; Bransten, pp. 1413, 1417–1418; Morin, p. 1531; Gavigan, p. 1540).

(t) Contracts keep lines from entering trade (Bransten, p. 1470).

Mr. KEFAUVER. Now, why is it today proposed to permit these harsh, stringent contracts to bind every American shipper from coast to coast to the foreign-dominated steamship cartels which have a past record of abuses and disregard of American law second to none? It would seem more reasonable that the committee would report a bill designed to place effective controls on the future actions of conferences, rather than to confer even more power upon them. The Senate report is rather brief in answering this important question. It argues, first, that the conferences need a dual-rate system; second, that it is enforced on all the other trade routes of the world except the United States; and, third, that without them, there will be rate wars.

While one or more of these reasons have been advanced over the years in support of dual-rate agreements, their validity has never been satisfactorily demonstrated. In fact, their falsity can be readily shown.

First, the fact that dual-rate contracts exist in other foreign trade routes is absolutely no argument for legalizing them in the foreign trade of the United States. One might just as well argue that the provisions in the Shipping Act against fighting ships, or deferred rebates, should be repealed because these practices also are permitted, as can be seen from the table which I now ask unanimous consent to have printed in the RECORD, in wholly foreign trades.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Conferences to which American Export Lines belongs, which operate under a deferred rebate system

Conference	Deferred rebate system	Formation	Joined
South French Ports/Levant Conference (from Marseilles and other south French ports to Egypt, Lebanon, Greece, Turkey, Syria, Malta, and Cyprus).	Yes	Apr. 1, 1951	Apr. 1, 1951.
Egypt/Italy Freight Conference	Yes	March 1947	March 1947.
Alexandria/Marseilles Freight Conference	Yes	Apr. 1, 1949	Apr. 1, 1949.
Egypt-India-Pakistan Cotton Conference	Yes	June 24, 1946	Aug. 22, 1946.
Calcutta/Port Said, Eastern Mediterranean and North African Freight Rate Agreement (Calcutta/Nafra).	Yes	Jan. 1, 1951	Jan. 1, 1951.
Calcutta/Aden and Red Sea Freight Rate Agreement (Calcutta/Aredfra).	Yes	Apr. 1, 1958	Apr. 1, 1958.
Chittagong and Pussur River/Port Said, Eastern Mediterranean and North African Freight Rate Agreement (East Pakistan/Nafra).	Yes	Dec. 1, 1953	Dec. 28, 1953.
Karmahom Conference (from Karachi, Bombay, Mormugao, Bedi Bunder, Bhavnagar, Cutch Mandui, Kundla, Navalakhi, Porbandar, Port Okha, and Verawal to Gibraltar, ports in United States and Eire, Greece, Yugoslavia, Italy, France, Spain, Portugal, Belgium, Holland, Germany, Denmark, Norway, Sweden, and Finland).	Yes		Jan. 13, 1949.

Source: Celler committee hearings, pt. 1, vol. V, p. 5097.

Mr. KEFAUVER. The second argument; namely, that rate wars will ensue if there is no dual-rate agreement, is equally faulty. In the first place, there are a large number of conferences which do not have dual-rate systems, and there has been no showing that these conferences have been any more prone to suffer from rate wars than the conferences that have promulgated such agreements. I ask unanimous consent to insert a list of the 47 conferences which did not have dual-rate agreements as of November 28, 1959. I might add further that in the RECORD there is no indication that these conferences have not prospered to the same extent as conferences with dual rates.

There being no objection, the list was ordered to be printed in the RECORD.

APPENDIX B.—*Number of regular member and nonmember operators in each of the 47 non-dual-rate conferences as of Nov. 28, 1958*

Conference number	Member and nonmember operators			Member operators			Nonmember operators

[1] No report.

Source: Federal Maritime Board. [Berman committee hearings, pt. 1, at p. 169.]

Mr. KEFAUVER. I think it should be pointed out at this time that the Isbrandtsen opinion does not rule out dual rates. Under the Isbrandtsen opinion and under the House bill, there is absolutely no prohibition against a conference agreement and there is no prohibition against dual rates, unless they are predatory devices for the purpose of putting somebody else out of business. In the case of the Isbrandtsen decision, it was admitted a dual-rate system was established for a predatory purpose, that of eliminating Isbrandtsen. If any steamship line wants to operate under a conference system or a dual-rate system, it is legal to do so under the Isbrandtsen decision or the House bill, provided it does not operate in a predatory manner for the purpose of putting another steamship line out of business.

The actions which are declared to be predatory under section 14 of the Shipping Act are, first, the use of a fighting ship, which is outlawed and is a per se violation; second, the use of deferred rebates; third, what we had in the Isbrandtsen case, a predatory system for the purpose of eliminating a competitor.

Yet any steamship line that wants to operate under a conference and dual-rate system can do so, legally, right now, or could do so under the House bill, unless it resorted to the predatory actions which were stricken by the Shipping Act of 1916 as unlawful, and which should continue to be unlawful.

The Commerce Committee makes some allusion to the rate war in Japan. What is the real story behind this so-called rate war? Far from the blitzkrieg it has been made out to be, it was really a sitzkrieg. As a matter of fact, the Celler committee record shows that even without the benefit of dual-rate contracts, and with so-called open rates in force where individual lines were supposedly imposing their own rates without conference concurrence, the rates in the Japanese trade were illegally agreed upon. In other words, rates were supposedly open. But, minimum rates had been covertly agreed upon by the lines and they had not been filed with the Federal Maritime Board. Moreover, the Japanese lines had voluntarily limited their sailings and carryings in the trade, again without approval by the Board. All of this tended to mitigate the so-called rate war. And, indeed, when the Japanese lines pressed for a complete end to open rates and a return to full stability, this movement was resisted by American lines because it would impair their argument—the same argument, by the way, which is now advanced in the committee report—before the Supreme Court of the United States. The three letters I ask unanimous consent to place in the RECORD now reveal the extent to which agreement was reached on so-called open rates in Japanese trade, during the rate war and the resistance offered by certain lines to closing the rates, ending the war, and achieving stability because to do so would refute all of the arguments that the conferences had made to the Supreme Court and that the committee now makes to the Senate today.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

JANUARY 30, 1957.

Mr. E. D. FLAHERTY,
American President Lines,
Los Angeles, Calif.:

Attached you will find six copies of agreed minimum rates on open items Japan/Pacific effective April 1, 1957.

Please note that we have made no reference to rates from Otaru on lumber, loose or bundled, nor have we mentioned plywood. We have written Tokyo today (copy attached) suggesting that we maintain the same spread that we have in the past; namely, lumber loose and bundled $11 over base rate and plywood $6 over base rate.

For your confidential information all lines except PFEL will be quoting similar rates as shown on the attached sheet. Although PFEL have announced a 10-percent increase they will still be considerably below us on a great many items. As you know, it has not been possible for us to convince PFEL that they should quote the same rates as the other lines in this trade. However, we are not too much worried as in the past they have been quoting considerably below our rates. Regardless of this we have been maintaining a fair share of the cargo which we expect to maintain and with a little more effort in our solicitation our carryings could be increased particularly in the higher bracket.

E. J. FAGGIANO.

Note for New York and Chicago: For your ready reference we are attaching hereto two copies of the rate list referred to above together with copy of our traffic—28 of even date to Tokyo.

UNITED STATES LINES CO.,
FAR EAST DIVISION,
Manila, October 31, 1957.

Mr. W. B. RAND,
Vice President, United States Lines,
New York, N.Y.

DEAR MR. RAND: Prior to departure from Japan, the matter of my replacement on the Ethics Committee was discussed with Messrs. Ariyoshi and Hove, the other two members and it was agreed that they would propose Mr. Dodd as a replacement in the next joint conference meeting.

It was also proposed that the Ethics Committee be broadened to include other areas in the Far East in which case I would remain in the committee as a sort of roving member. Just how far this proposal will get is indefinite but I think it is a good idea.

Referring to my letter to you of September 9, 1957, Mr. Ariyoshi advised during the final meeting with him that he felt compelled to again request USL-New York to limit space in Japan on the USL mariners. He said that pressure from the Japanese group which he represented as a spokesman was overwhelming.

The day before departing from Japan, I received a draft of a letter from him, copy attached, with a statement that he planned to write you accordingly.

I have no sympathy with the Japanese request for limited space and refer you to the closing paragraph of my letter of September 9, 1957.

Very truly yours,

S. E. WALKER,
Far East Manager.

I find myself in the position of having to write to you again regarding the Japan-United States trade.

As you are probably aware, the stability and promotion of this trade are now in a very precarious condition due to an increasing number of malpractices rumored. The conference is making its utmost efforts in taking countermeasures, by establishing the Committee on Ethics, et cetera. However, coupled with the sharply declining freight market of the world, and ever more poignant competition aggravated among the carriers thereby, the condition is serious enough to remind one of the pre-1953 days and I, for one, am deeply concerned with it.

On this very important trade route the conference itself is on an unstable foundation, the contract/noncontract rate system currently being subjected to the most thoroughgoing scrutiny of the foremost legal brains of the United States. However, there is no denying that there exists somewhat peculiar stability on this trade although it may be regarded as quite anomalous from the point of an orthodox commercial view. While the rates on most staple items are open, all the Japanese lines are quoting these rates nearly the same, and at the same time, non-Japanese lines are voluntarily following suit with slight differences.

Furthermore, the Japanese lines have observed faithfully the self-imposed loading ceiling of 4,500 tons per vessel so far and have endeavored to transfer the excess to non-Japanese lines, whereby the latter could secure their fair share of the trade. During the period of the 3 years from 1954 to 1956, the Japaneses and non-Japanese lines trading on this route had shared the cargo at a fairly stable demarcation line of 60 and 40 respectively.

However, the equilibrium was utterly shaken about a year ago, when your mariner-type vessels made their appearance on the trade and took away a lion's share of the trade by virtue of their superior speed and facilities. From the beginning of this year up to July, the average loading of U.S. Atlantic-bound cargo of a mariner from Japan is 8,331 tons while that of Japanese vessels is 3,171 tons per vessel. You can readily see that now the Japanese lines are not carrying their ceiling of 4,500 tons.

The United States Lines has carried during the first 7 months of this year well over 25 percent of the total cargo moved, and in April the percentage was an alarming 34. In this connection, the Japanese lines are not only the victims of this tendency, but non-Japanese lines have also lost heavily as the United States Lines is now carrying more than a half of all the non-Japanese-flag carryings combined. The vacant space thus unused of both the Japanese and non-Japanese vessels can easily become a hotbed of malpractice.

As I have made it known several times in the past, I have no objection whatsoever to your introducing a new and fast fleet in the trade. On the contrary, I welcome such an improvement inasmuch as it is a betterment of the service on this trade. As long as the rates remain open, it is quite within the right to quote whatever rates one may wish and no unfair competition is constituted thereby.

I only wish to remind you, however, that there existed a practice, however irregular and anomalous it may be, which had worked quite successfully to safeguard the stability of the trade in this part of the world. Naturally, we may again resort to the orthodox method of dual rate system for the equilibrium in the trade in the near future, but until such time as the Supreme Court will render a favorable decision, we most sincerely and earnestly wish to keep the present flimsy but successful stability and safeguard the established balance of the trade.

I described the situation rather minutely in an earnest desire that you will realize the situation and come to share my conclusion that in order to safeguard the stability, there is but one way left and that is that your line, being the strongest, sympathetically give a part of your carryings away to the less fortunate, by the same method as that of the Japanese lines, that is the self-imposed ceiling of loading cargo in Japan ports.

I am fully aware that this is entirely against the orthodox commercial practice but as I pointed out above, in this corner of the world, a modified method though peculiar works good sometimes.

I have to remind you again that this is only the temporary measure with a view to tiding over the hardest the most dangerous time.

Things should be restored to normalcy as soon as the time comes when the orthodox conference rules prevail in this important trade.

Will you kindly give your best consideration to the foregoing and let me hear your conclusion at an earliest date.

With warmest personal regards.

———— ————.

———

MAY 14, 1957.

DEAR SIR: Reference is made to letter from Mr. C. L. Dodd, dated April 24, dealing with correspondence and cables exchanged on lumber rates homebound and rates in general.

We are very much concerned with the rate situation from Japan and the possible effect that the closing of the lumber rate may have on future carryings of this commodity and principally any effect that the closing of an important open-rate item may have on the dual-rate system now before the Supreme Court.

Of greater concern is the statement in the penultimate paragraph of Mr. Dodd's letter reading as follows: "There is, of course, a very definite trend on the part of the Japanese lines, as well as a few foreign lines to close the rates on all commodities; they are using every angle to accomplish this even if it means closing such rates item by item."

If this is the plan of the Japanese lines, then we fear that irreparable harm would come to the dual-rate case now before the Supreme Court. It may be argued that the only issue before the Supreme Court is the legality of the contract—noncontract system but we must be very careful that nothing is done between now and the rendering of the decision by the Supreme Court to hurt our cause.

We are inalterably opposed to the closing of any additional open-rate items between now and the decision date. We must not only oppose such action on our own behalf but do everything we can both in Japan and at this end to enlist sufficient support to prevent the closing of any additional open-rate items until a decision has been rendered by the Supreme Court.

We will very much appreciate receiving prompt cable advices on any proposal put forth by either a Japanese-flag line or any other line to the closing additional open-rate items.

Very truly yours,

S. H. RICHTER.

Mr. KEFAUVER. Finally, I ask unanimous consent to have printed in the RECORD, the profit figures of American lines for Far East trades only, during the period of the so-called rate wars. They show the trade to have been relatively profitable to American lines despite the rate war.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Profits from vessel operations, Far East trade

UNITED STATES LINES

Year	Net profits [1]	Number of voyages	Average net profit per voyage
1958	$6,637,649	36	$184,379
1957	8,037,377	29	277,151
1956	3,931,323	23	170,927
1955	2,143,511	20	107,176
1954	171,988	18	9,555
1953	944,567	21	44,979
1952	2,575,715	22	117,078
1951	2,384,319	18	132,462
1950	2,167,301	21	103,205
1949	4,103,443	26	157,825

[1] Includes profits from nonsubsidized, as well as subsidized operations.

Mr. KEFAUVER. No need whatever has been shown in the brief Senate hearings or in the lengthy hearings before either the Celler committee or the Bonner committee for the dual-rate system and all bonds it imposes on American shippers. The conference lines know this to be the case, but are loath to admit it. Among themselves, however, they are more candid, as witness a letter from the San Francisco manager of a large Japanese line to his principals abroad wherein he declares:

> The Pacific coast members also feel that the committee should not show a weakness at this time, as all of the testimony presented up to this date has not greatly helped the dual-rate situation, and that if legislation was requested at this time, our position would be very weak. (Celler committee hearings, pt. 3, vol. 1, at p. 274.)

INDEPENDENT COMPETITION IS A BRAKE ON MONOPOLISTIC PRACTICES

The preservation of independent competition in the foreign trade of the United States is of consummate importance because it is the only brake on monopolistic practices of steamship conferences. This means that not only must existing independent carriers be allowed to continue independent operation, but in addition, new entrants into the industry must be encouraged and conference members' right to leave the conference and establish themselves as independents must be preserved.

Why is it that independent carriers are the only check on monopolistic practices in ocean shipping? The reason is simply that there is no rate regulation. Shipping conferences are monopolistic cartels and, without the threat of price competition from independents, will have the unrestrained power to raise rates to unreasonably high levels.

As Chairman Morse of the Federal Maritime Board said in his testimony before the Bonner committee:

> The regulation of water carriers in the foreign trade of the United States is substantially different from the regulation of carriers in our domestic trades. The Board has been given no direct control over the reasonableness of rates in the foreign trade. It may not prescribe either maximum or minimum rates in these trades; in fact, it has little to say as to the measure of the rates of common carriers by water serving our foreign trade. There is no requirement for the advance filing of freight rates in the foreign trade, nor any authority to suspend these rates. However, by its General Order 83, the Board requires common carriers by water in the foreign trade to file their export rates within a period of 30 days after they have become effective and it requires a similar filing of all rates established by common carriers by water pursuant to any agreement subject to the Board's jurisdiction.

Lloyd Tibbott, Chief of the Office of Regulation of the Federal Maritime Board, stressed this important point in his testimony before the Bonner committee:

> Mr. TOLLEFSON. Do I understand from what you said, Mr. Tibbott, that you have no control over the rates? People may complain to you about rates being too high. Can you legally do anything about the rates if you think they are too high?
>
> Mr. TIBBOTT. No; the utmost that could be done would be to initiate a proceeding that the rate was so high as to be detrimental to the commerce of the United States.
>
> Mr. TOLLEFSON. Suppose you made a finding that it was detrimental to the commerce of the United States. What could you do?
>
> Mr. TIBBOTT. The Board could withdraw its approval of the agreement at that stage.
>
> Mr. TOLLEFSON. The conference agreement?
>
> Mr. TIBBOTT. The conference agreement; yes, sir. The lines individually could continue to charge the same rate if the agreement was disapproved but they could not act collectively.
>
> Mr. TOLLEFSON. So that they could continue to charge the same rate and you could not stop them?
>
> Mr. TIBBOTT. No; we could not stop them.

Thus, the fundamental problem is brought into sharp relief. On the one hand, monopolistic cartels of ocean shippers in the U.S. foreign commerce are permitted to exist by the act of 1916; the antitrust laws notwithstanding. However, no effective regulation is imposed on their rates. This is, indeed, a unique situation in our American economy. The usual practice, when monopolies are chartered by the Government, is to impose rate regulation upon them.

Mr. President, there is no substantial difference between the problems affecting ocean commerce and those affecting air commerce, yet the Civil Aeronautics Board has substantially more power to give the American shipper a fair deal than is proposed under the Senate bill.

In the case of ocean marine carriers, however, not only are their rates unregulated, but in addition, the conferences are specifically authorized to regulate themselves. The granting of authority to a monopolistic cartel to regulate its own rates seems to me to be unparalleled in our American economic history.

While the Board has no rate regulating authority, it does, however, possess the power to disapprove conference agreements which operate "to the detriment of the commerce of the United States." It would seem that this authority would effectively permit the Board to control rates. Unfortunately, however—and indeed in my view, strangely—this power appears to have been of limited value since it has never actually been exercised to compel a conference to reduce rates—"The American Shipping Industry and the Conference System," 2 Stamford Law Review 136–153, 1958. As former Assistant Attorney General in Charge of Antitrust, Robert A. Bicks, pointed out in his testimony before the Bonner committee:

> In shipping, in the more than 40 years of the 1916 Shipping Act's life, neither the Board nor its predecessor has ever—I repeat, has ever—forced a shipping conference to reduce its rates.

Bicks went on to summarize the importance of independent carriers with greater clarity:

> The upshot is that American shippers, as well as American purchasers of foreign-made goods, are at the mercy of rates jointly set by private groups—the shipping conferences. Moreover, 82 percent of these conferences are dominated by foreign shipowners. And there is absolutely no effective American Government review of rates thus fixed. Against this background, whatever limited rate competition independents may afford takes on added importance. For independents provide the prime effective check on foreign fixed shipping rates. And it is this very check that the dual-rate system seeks to destroy. For these reasons we urge that Congress have the benefit of some years of operating experience before reaching the drastic conclusion that dual-rate systems "designed to stifle outside competition" and "employed as predatory devices" may stand.

There is no doubt that regulation of America's foreign trade cannot be accomplished with anything like the degree that purely domestic economic activities can be regulated. This fact makes even more urgent the encouragement and preservation of independent carriers, if American shippers are to be protected against unreasonably high, monopoly rates. M. S. Crinkley, executive vice president of Isbrandtsen, made this point with great clarity before the Bonner committee:

> Shipping on foreign-trade routes is international in character and it is claimed no effective or complete governmental control of rates is possible. In this country we do allow certain monopolies, such as public utilities, but in all such cases prices and rates are completely controlled by some regulatory agency for the protection of the public. Serious consideration should not be given to a rate device which would enable these international shipping cartels to obtain a monopoly of shipping on American foreign trade routes with no governmental overall control of rates. As a matter of commonsense, where such conference groups are allowed to exist and operate, the public interest can only be protected by the presence of energetic and bona fide independent competition.

Mr. Crinkley prepared two tables which I should like to insert in the RECORD at this time. The first shows the shipping rates on various products from New York and from Hamburg to various Eastern and South American ports.

I ask unanimous consent to have the first table printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

From/to	Karachi, Bombay	Hong Kong	Buenos Aires	Genoa, Piraeus, Istanbul, Alexandria
Cotton textiles:				
New York	55.50	60.00	66.00	63.25
Hamburg	38.64	36.59	54.00	20.84
Machinery:				
New York	52.50	56.00	51.00	38.50
Hamburg	29.14	29.42	24.71	24.69
Hand tools:				
New York	52.50	77.00	66.00	63.25
Hamburg	26.61	29.42	26.75	22.88
Electric motors:				
New York	*52.50*	56.00	*57.00*	38.50
Hamburg	*29.14*	29.42	*24.71*	24.69
Radios:				
New York	55.50	56.00	66.00	63.25
Hamburg	31.67	29.42	24.71	24.69
Typewriters:				
New York	55.50	77.00	66.00	63.25
Hamburg	38.64	36.59	37.96	25.00
Unboxed automobiles:				
New York	39.00	47.25	36.00	33.00
Hamburg	30.09	27.99	14.78	20.84

Mr. KEFAUVER. Mr. President, the figures in this table reveal, in many instances, that the rates from New York

are 100 percent and more higher than those from Hamburg. For example, the rate per ton on electric motors from New York to Hamburg is $52.50. From Hamburg, it is $29.14. To Buenos Aires, the New York rate is $57 and the Hamburg rate is $24.71. Loading costs in New York are only $3.50 or $4 per ton more than in Hamburg.

The second table prepared by Mr. Crinkley shows conference contract rates on leaf tobacco from Virginia and North Carolina ports, and on cotton from U.S. gulf ports to various oversea destinations.

I ask unanimous consent to have the second table printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

To	Leaf tobacco (100 pounds)	Cotton (100 pounds)
London, Liverpool, and Antwerp		
Rotterdam, Hamburg, and Bremen	$1.65	$1.45
Genoa and Alexandria	2.85	1.45
Yokohama and Kobe	4.00	2.00
Hong Kong	4.00	2.25
Manila	3.40	2.00
Buenos Aires	3.75	[1] 2.95
Rio de Janiero and Santos	[1] 5.50	[1] 2.95
La Guaira and Puerto Cabello	[1] 3.00	1.65
Valparaiso and other South American ports	[1] 6.75	1.80
Australian ports	[1] 4.25	2.75

[1] Equivalent.

Mr. KEFAUVER. Mr. President, the table shows, for example, that it cost $1.65 to ship 100 pounds of leaf tobacco to Rotterdam, and $3.75 to ship the same amount of leaf tobacco to Buenos Aires. There is active, independent competition on shipments to Rotterdam. However, shipments to Buenos Aires are effectively tied up by the conference cartels.

The monopoly power of conference cartels, when unrestrained by independent carriers, permits conference members not only to raise rates unreasonably, but in addition to take advantage of American shippers in other ways. Mr. Bransten of the Pacific Coast Coffee Association, brought this to the attention of the Bonner committee in his testimony.

There is absolutely no nonconference competition in the trades which employ the dual-rate system on coffee to the Pacific coast. At the present time, therefore, the coffee receivers on the Pacific coast have absolutely no bargaining position concerning the contents of the dual-rate agreements, and they have no statutory assistance in that respect under the present law.

They are compelled to enter into any dual-rate agreement that the conference places before them because, for competitive reasons, they cannot pay the noncontract rates, which are $3 per ton higher than the contract rates in these trades.

The result of this has been that the dual-rate agreements in these trades place very heavy obligations on the receivers of coffee, and practically no obligations on the carriers. Because of this monopolistic situation, the dual-rate conferences have been able to disregard the interests of the Pacific coast coffee industry in the matter of rates and steamer service.

Suffice it to say here that the action of these dual-rate conferences has placed the Pacific coast coffee industry at a competitive disadvantage with respect to the matter of freight charges.

I desire to emphasize that under the present state of the law the Pacific coast coffee receivers are helpless to do anything about this situation. They have no outside steamship competition to which they can resort for assistance. The present statutes afford them no protection of any substance.

In addition, Mr. President, the Federal Maritime Board has pointed out that the existence of healthy, active, independent competitors insures "conference consideration of shipper needs and desires." Isbrandtsen provides a dramatic example of the impact which independent carriers can have in keeping conference rates within reasonable bounds. Isbrandtsen was able to carry 30 percent of the cargo in the Pacific-Japan trade, with only 12 percent of the sailings. It did this by maintaining its rates at levels substantially below those of the conference cartel. One conference member admitted to the Board that the conference rates were too high, and that Isbrandtsen discovered this conference vulnerability and took advantage of it by hard-hitting competition. As this conference member put it:

> We are simply holding up an umbrella under which Messrs. Isbrandtsen have been thoroughly enjoying themselves (Isbrandtsen at p. 575).

The Board admitted that it could not see that—

> The presence of an independent in the trade does not aid in keeping conference rates at a somewhat reasonable level (Isbrandtsen at p. 762).

The Department of Agriculture has taken the view that the dual-rate system is a tool of monopoly and a device for the elimination of competition to the conference cartels. In a powerful statement before the Bonner committee, George A. Dice, Director of the Special Services Division, Agricultural Marketing Service of the U.S. Department of Agriculture, speaking for the Department, said:

> Our objection to the dual-rate system is quite simple. We believe it to be unduly discriminatory and prejudicial to the interests of agricultural shippers. Under the system two identical shipments from the same port, in the same vessel, stowed side by side in the same hold, moving to the same destination, and receiving exactly the same transportation service, are or may be charged for at different rates. Not only do we believe this practice to be unduly discriminatory and prejudicial against the interests of shippers but we believe it to be a form of retaliation against a shipper who does not desire to tie himself and his business to an exclusive patronage contract.
>
> It is our view that the dual-rate system and its coercive contractual arrangements tend to deprive shippers of agricultural commodities of the freedom of choice of transportation service. If practiced successfully, the system would result in a monopoly for the steamship conference lines. We say "if practiced successfully" because the elimination of competition from independent steamship lines appears to be the objective of the dual-rate system.
>
> The Department is agent for the International Cooperation Administration in the shipment of agricultural commodities. The Department, however, does not become a party to contractual arrangements of the sort followed under the dual-rate system, although, in instances, because of the nature of the programs involved, members of the conferences do extend special rate consideration.
>
> It is our opinion that if a dual-rate system is practiced and if it is successful in eliminating competition from independent lines, it could eliminate this rate consideration on special program shipments.
>
> We believe that if, through the dual-rate system, a steamship conference gains a monopoly, rate increases might very well follow. Certainly the factor of competition would not be present to deter such instances. This would be extremely unfortunate both from the standpoint of agricultural shippers and exporters.

I have received a letter from the Acting Secretary of Agriculture in which he, speaking for the Department, once again reaffirmed the position taken by the Department in its letter of July 26, 1961, supporting the version of H.R. 6775 as it passed in the House of Representatives. I ask unanimous consent that this letter be printed in the RECORD, and I also ask unanimous consent to have printed in the RECORD two letters from the Secretary of Agriculture to the chairmen of the House Committee on Merchant Marine and Fisheries and the Senate Committee on Commerce.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
Washington, D.C., September 7, 1961.

Hon. ESTES KEFAUVER,
Chairman, Subcommittee on Antitrust and Monopoly, Committee on the Judiciary, U.S. Senate, Washington, D.C.

DEAR SENATOR KEFAUVER: This has reference to your request for a statement of our views regarding H.R. 6775 as reported by the Senate Committee on Commerce. This bill would amend the Shipping Act of 1916, as amended, to provide for the operation of steamship conferences.

As originally introduced on February 15, 1961, the bill was H.R. 4299. This Department reported favorably on that bill by letters dated March 17 and April 3, 1961, to the chairman of the Committee on Merchant Marine and Fisheries of the House. After a number of days of public hearings on H.R. 4299 by that committee of the House, H.R. 6775 was introduced as a substitute bill and was passed by the House on June 12, 1961.

On June 15, 1961, we received a request from the chairman of the Senate Committee on Commerce for a report on H.R. 6775 as passed by the House and, in response to that request, we informed the committee on July 26, 1961, that we were agreeable to passage of the bill by the Senate. Our position with respect to this bill remains the same as that stated in the letters to the House committee and in the letter of July 26 to the Senate committee.

The Bureau of the Budget advises that there is no objection to the presentation of this report from the standpoint of the administration's program.

Sincerely yours,

CHARLES S. MURPHY,
Acting Secretary.

DEPARTMENT OF AGRICULTURE,
Washington, D.C., March 17, 1961.

Hon. HERBERT C. BONNER,
Chairman, Committee on Merchant Marine and Fisheries, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN BONNER: This has reference to your letter of February 16, 1961, requesting our comments on H.R. 4299, a bill to amend the Shipping Act, 1916, as

amended, to provide for the operation of steamship conferences.

This bill, among other things, would authorize a carrier or conference of carriers in foreign commerce, under specified conditions, and subject to approval of the Federal Maritime Board, to enter into contracts with shippers at rates lower than published tariff rates and providing for exclusive patronage by the contracting shippers.

The Department believes passage of this bill would promote stability in the steamship industry while protecting the interests of shippers.

For many years, this Department opposed the use of the contract/noncontract or dual system of rates because of the extent to which discrimination, prejudice, and reprisals could be practiced against shippers under such system. At the same time, however, we have recognized that practical limitations on the ability of a regulatory agency to effectively regulate operations of foreign-flag vessels, and the fact that most trades are overtonnaged much of the time, made some form of self-regulation by conferences of carriers necessary.

Much of the testimony submitted to your committee by interested persons during the series of hearings in 1959 was heard by representatives of this Department. In addition, we have given the matter considerable study and submitted to your committee on April 1, 1960, certain suggestions designed to promote stability in the steamship industry and to protect the interests of shippers.

We note that a number of the suggestions (or modifications of them) contained in our submission of April 1, 1960, have been incorporated in H.R. 4299 and that additional safeguards have been added to minimize the possibility of destructive competition, and further to assure a higher degree of rate stability. We believe that, with these safeguards, and with the more intensive supervisory role provided for the Federal Maritime Board, the Department need no longer object to the use of exclusive patronage contracts.

The Bureau of the Budget advises that there is no objection to the presentation of this report from the standpoint of the administration's program.

Sincerely yours,

ORVILLE L. FREEMAN,
Secretary.

DEPARTMENT OF AGRICULTURE,
Washington, D.C., July 26, 1961.

Hon. WARREN G. MAGNUSON,
Chairman, Committee on Commerce,
U.S. Senate.

DEAR SENATOR MAGNUSON: This has reference to your letter of June 15, 1961, requesting our comments on H.R. 6775, an act to amend the Shipping Act, 1916, as amended, to provide for the operation of steamship conferences.

This act would, among other things, authorize carriers or conferences of carriers in foreign commerce, under specified conditions and subject to the approval of the Federal Maritime Board pursuant to stated requirements or safeguards, to enter into contracts with shippers providing for rates lower than published rates upon agreement by such shippers to give all or any part of their patronage to such carriers or conferences of carriers.

The Department has been opposed to the use of the exclusive contract or dual system of rates because of the extent to which discrimination, prejudice, and reprisals can be practiced against shippers under such a system. However, we believe passage of this act, as presently written, will promote stability in the steamship industry and protect the interest of the shippers to a greater extent than at present.

The Department would, therefore, be agreeable to the passage of this act by the Senate.

The Bureau of the Budget advises that there is no objection to the presentation of this report from the standpoint of the administration's program.

Sincerely yours,

ORVILLE L. FREEMAN,
Secretary.

Mr. KEFAUVER. Mr. President, the Department of Justice's concurrence in these views is well known. In urging the Bonner committee to provide effective safeguards against the monopoly power of conference cartels, Assistant Attorney General Loevinger stressed the importance of the preservation and encouragement of independent competitors last month. He said:

Under the conference system, carriers are free to join together to set the level of rates they choose, and to obtain that stability of rates amongst themselves which they deem desirable. Carriers that do not desire to join the conference should be free to engage in business independently. Furthermore, no check on unconscionable rate charges will remain if conference members can, by use of dual-rate contracts or other means, eliminate the nonconference competitor which may serve as the only check upon extortionate rate practices. That it is in the public interest to preserve some rate competition and to preserve the independent who may provide it is illustrated by just one example which our investigation has produced. In a certain trade covered by a Federal Maritime Board-approved agreement, the entry of an independent carrier and the rate competition to which that entry gave rise caused the gradual reduction of the rate on an important commodity from more than $80 per ton to about $40 per ton. There are those who would say that the rate cutting of the independent had caused instability or even a rate war. Yet, documents showed—and, incidentally, these were documents of an American carrier, so that it will be clear that foreign operating costs were not used as the yardstick—that the $40 per ton rate still afforded a reasonable profit on that commodity.

This is what concerns us about the attempts to delete the safeguards from H.R. 6776. The steamship lines understandably favor conditions more conducive to an $80 rate than a $40 rate. Shippers who have testified in favor of a so-called effective tying device, are more interested in so-called stability of rates than in rate levels. This means they are less concerned about the actual rate than they are in making certain that no competitor obtains a lower rate than the one which they are paying. In the final analysis, therefore, if the safeguards are stripped from H.R. 6775, with the result that conference and dual-rate agreements may be approved by the FMB even where they are intended to, or are reasonably likely to exclude other carriers from the trade, the public interest will suffer and the consumer will suffer because in the end he will pay in the form of higher prices for the goods which will have been transported under monopoly conditions. We do not conceive it to be in the public interest to give the conferences a blank check on the pocketbooks of American consumers without knowing what the ultimate costs in the form of high noncompetitive freight rates are likely to be. Moreover, foreign-flag carriers, rather than American lines, will receive the largest proportion of such monopoly profits. For the foregoing reasons, the Department of Justice restates once more its conviction that the overall public interest of the United States will not be advanced by surrender of our traditional principles of freedom of opportunity.

Mr. President, one of my good staff members has handed me a notice as to what the assistant legislative director, the American Farm Bureau Federation, Mr. Matt Triggs, said before the Celler committee of the House:

We believe that it is important to preserve the competitive influence of independent carriers to insure that ocean shipping conferences may not abuse the ratemaking authority granted them by exemption from antitrust statutes. The exclusive dual rate contracts used by many ocean shipping conferences can operate to eliminate the influence of independent carriers in establishing ocean shipping rates. We believe that any legislation to modify the Shipping Act of 1916 would [sic] insure that the competition of independent lines is not impaired (Celler hearings, p. 567).

On August 31, I wrote the Attorney General and asked his views on H.R. 6775 as reported by the Senate Commerce Committee. I read his reply of September 5:

OFFICE OF THE ATTORNEY GENERAL,
Washington, D.C., September 5, 1961.

Hon. ESTES KEFAUVER,
U.S. Senate,
Washington, D.C.

DEAR SENATOR KEFAUVER: This is in response to your letter of August 31, 1961, requesting the views of the Department of Justice on H.R. 6775, as it was reported by the Senate Committee on Commerce.

The Senate committee version of H.R. 6775 differs materially from the bill as passed by the House of Representatives. The bill, as it was passed by the House of Representatives, contained specific safeguards to prevent ocean steamship conferences from using dual-rate systems or other concerted activity as predatory devices to drive nonconference competition out of business. These safeguards have been omitted in the Senate committee bill. In particular the Senate committee bill has deleted: (1) The provision that the dual-rate contracts referred to in the bill shall not be intended or reasonably likely to cause the exclusion of any other carrier from the trade; and (2) the provision that the Board shall not approve agreements whose probable effect will be reasonably likely to exclude any other carrier from the trade.

The deletion of these provisions would have the effect of reversing the rule of the Isbrandtsen case, thereby permitting ocean steamship conferences, which are international cartels, to stifle independent competition by resort to predatory dual-rate systems. In the opinion of the Department of Justice these provisions constitute competitive safeguards which are indispensable to any reasonable enactment on this subject. The public interest would be disregarded were these provisions to be omitted.

It is our opinion that no legislation on this subject should be enacted unless such provisions are included. We urge that these provisions, as they have appeared in the House-enacted bill, be restored.

In addition, for your information I am attaching a copy of a letter from Deputy Attorney General Byron White to Senator WARREN G. MAGNUSON, which expresses in detail the views of the Department of Justice on the Senate Merchant Marine and Fisheries Subcommittee Print, which is substantially similar to the Senate committee version of H.R. 6775.

Sincerely,

ROBERT KENNEDY,
Attorney General.

Mr. President, previously the Senator from Wisconsin [Mr. WILEY] had printed in the RECORD a letter of August

16, 1961, to the Senator from Washington [Mr. MAGNUSON] from the Honorable Byron White, Deputy Attorney General of the United States, which states in some detail the objections of the Department of Justice to the approach taken by the Senate Commerce Committee in its redrafting of H.R. 6775. I should state that subsequent to this letter the committee made a few of the corrections suggested by the Department; however, most of the objections are not met by the bill before us; after I finish my general presentation, I shall offer amendments to remedy these defects.

It seems to me unequivocally clear that the existing ability of independent carriers to compete on a parity with federally subsidized members of shipping conference cartels must be preserved, if American shippers are to be protected against monopolistic abuses.

In my view, Mr. Max Kampelman, counsel for the American-owned independent Sabre Line, has summarized this problem most effectively:

> The protections of the Bonner bill are crucial if Sabre is to survive as an independent line. We believe that the antitrust features of the House bill grant us a vital measure of protection. We further believe that the ratemaking safeguards of the bill are in the public interest. The very fact that the conferences are opposed to the antitrust and ratemaking safeguards is a clear indication of their intent, should the recommendations of the Senate committee become law. We regret that the competition offered by independent lines is today so meager. Meager as it is, however, it is the only effective check against excessive conference rates.

THE U.S. POLICY HAS ALWAYS BEEN TO PRESERVE AND PROTECT INDIVIDUAL COMPETITION

Section 14 of the shipping action of 1916 proscribes certain activities by carriers which were deemed by the Congress to be particularly noxious in their impact on American foreign trade; for example, deferred rebates, fighting ships, and other retaliatory, predatory devices. Thus, section 14 Second prohibits the use of a fighting ship, which is a vessel used in a particular trade by a carrier or a group of carriers, for the purpose of excluding, preventing, or reducing competition by driving another carrier out of said trade. The Alexander report of 1914, on which the 1916 Shipping Act was based, shows clearly that what Congress had in mind when it said driving another carrier out of the trade, was the protection of independent competition. The Alexander report said:

> The use of fighting ships and deferred rebates * * * is * * * prohibited in both the export and import trade of the United States. All carriers should be prohibited from retaliating against any shipper by refusing space accommodations when such are available, or by resorting to other unfair methods of discrimination, because such shipper has patronized an independent line, or has filed a complaint charging unfair treatment, or for any other reason.

The 45-year-old intent of Congress to protect independent carriers was restated with great vigor in the Isbrandtsen case. There, the Court said:

> It must be emphasized that the freedom allowed conference members to agree upon terms of competition subject to Board approval is limited to the freedom to agree upon terms regulating competition among themselves. The Congress in section 14 has flatly prohibited practices of conferences which have the purpose and effect of stifling the competition of independent carriers (p. 492).

The Board agreed with the Court that—

> The continued participation of Isbrandtsen in the trade, as well as the existence of strong shipper organizations, stand as strong deterrents against exorbitant freight rates and other objectionable monopolistic practices. (Japan-Atlantic-Gulf Freight Rate Conference, p. 739.)

Mr. Morse, Chairman of the Federal Maritime Board, stated the law as follows:

> In the trades to and from ports of the United States, the Board's precedent decisions have insured that carriers entering a trade will be entitled without discrimination to admission to full membership in the conference covering such trade. A carrier may nevertheless choose to operate as an independent, that is, to remain outside of the conference. The choice is up to each individual carrier, for a carrier cannot be forced to join a conference.
>
> The use of the dual-rate system has been surrounded by safeguards directed to the prevention of any greater limitation upon competition than is absolutely necessary. Thus, the Board's predecessors have held that the dual-rate system will not be approved when inaugurated by a single line which seeks to exclude all other carriers (*Eden Mining Co.* v. *Bloomfield Fruit & Steamship Co.*, 1 U.S.S.B. 41 (1922)).

The House report on the version of H.R. 6775—House Report No. 498, June 8, 1961—makes clear that it was the intention of the Bonner and Celler committees to preserve this long-lived policy of the Congress of fostering and protecting those lines which desire to compete with the conference cartels on an independent basis. The committee, referring to one of the antitrust safeguards, specifically said that it was "intended to protect the status of nonconference carriers." Moreover, several provisions of the House version of H.R. 6775, retained in the Senate version, make it clear that the continuing existence of independent carriers is assumed.

For an example, the provision of section 2 of the bill, which provides for the prompt release from a contract of a contract shipper as to any shipment for which the contracting carrier or conference cannot provide as much space as the shipper requires on reasonable notice, would be meaningless, if independent alternative carriers were unavailable to the shipper. Also, the provision of the bill which permits contract shippers to terminate at any time without penalty upon 90-day notice, would be meaningless and of no avail to the shipper if he does not have independent carriers to turn to. It seems to me, therefore, that for the Senate to eliminate the antitrust safeguards from H.R. 6775 and thereby so emasculate the bill as to effectively eliminate the ability of individual carriers to compete with conference cartel monopolies, would be a basic contradiction of the underlying assumption of the bill. And, this is true even of the version approved by the Senate Commerce Committee. The American shipper must always have independent carriers to turn to.

The recent Isbrandtsen problem makes dramatically clear the importance of reaffirming the longtime congressional policy of protecting independent carriers. Isbrandtsen sought to obtain Board approval of acquisition by it of the American Export Line, and the obtaining by it of an operating subsidy agreement. Isbrandtsen is the largest independent U.S. line. Admiral Wilson, Chairman of the Federal Maritime Board at that time—that is, 1960—wrote the following to Isbrandtsen:

> After careful consideration of this matter, the Board has determined that, in the event it should award a subsidy agreement to Isbrandtsen Steamship Co., Inc., it will require that such agreement contain a provision to the effect that the operator agrees to maintain conference rates, rules, and regulations effective for the subsidized services contained in such agreement, irrespective of whether the operator is a member of such conference, unless, due to special circumstances, the Board, in its sole discretion, should decide to modify temporarily this requirement as to a particular conference.

In other words Admiral Wilson was telling Isbrandtsen that if it wished to receive a subsidy, it would have to get in line with conference rates and stop competing with conference cartel members.

I find this shocking. It is forcing an independent, competing American company to fall in line with the wishes and best interests of a cartel monopoly which, incidentally was dominated by foreign lines. It is encumbent upon us to insure that this sort of Board action never occurs again.

It may be that the Senate has no choice but to authorize a dual-rate contract system which enhances the monopoly power of cartelized conferences. But, we have no right, either legally or morally, to refrain from strongly voicing our objection, both on the bill we approve and in the legislative history, to abusive practices by both conferences and the Board itself, designed to oppress, discourage and impede independent carriers.

WHY COMPETITION IN OCEAN FREIGHT RATES MUST BE ENCOURAGED

It has been argued that competition in ocean freight rates is bad because it will result in decreased revenues for American carriers, most of which are members of the various conferences in the foreign commerce of the United States. In fact, Senate Report No. 860, 87th Congress, 1st session, at page 23, goes so far as to say that—

> No American-flag line today desires to operate on a regular nonconference rate-cutting basis. Isbrandtsen has announced its intention to become a conference operator, and, according to testimony given by Mr. Crinkley, the Isbrandtsen Co., quite apart from its becoming subsidized, plans to join conferences.

I would like to comment on the first sentence of this quote with respect to American-flag lines today desiring to operate on a regular nonconference rate-cutting basis. It is difficult to surmise whether U.S. lines presently operating

on a nonconference basis will necessarily wish to continue to operate on this basis, or whether they desire to compete openly and actively. But, it is true that there are a large number of U.S. lines who presently do operate outside the conferences in a number of trades. I have checked with the Maritime Administration and I have a list of 28 steamship conferences against which at least one U.S. line competes independently today. Many of these are major conferences and I request that the list be made a part of the RECORD at this point.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

List of steamship conferences serving the foreign commerce of the United States as of Sept. 1, 1961, in which at least 1 U.S. line operates outside the conference

Name of conference	Conference No.	Use dual rates
Trans-Pacific	14-1	Yes.
North Atlantic Spanish	138	No.
Trans-Pacific Freight Conference of Japan.	150	No.
Japan-Atlantic and Gulf	3103	No.
U.S.A./South Africa	3578	No.
South Africa/U.S.A.	3579	No.
Atlantic and Gulf/Panama Canal Zone, Colon and Panama City.	3868	Yes.
North Atlantic Continental	4490	Yes.
Norway/North Atlantic	5300	No.
New York Freight Bureau (Hong Kong).	5700	Yes.
Straits/New York	6010	Yes.
U.S. Atlantic and Gulf-Santo Domingo.	6080	No.
U.S. Atlantic and Gulf-Puerto Rico	6120	No.
The Pacific Coast Puerto Rican	6130	No.
Straits/Pacific	7090	Yes.
Atlantic and Gulf, Red Sea and Gulf of Aden.	7530	No.
Leeward and Windward Islands and Guianas.	7540	Yes.
North Atlantic Portuguese	7560	No.
American West African (Azores only)	7680	No.
The India, Pakistan, Ceylon and Burma Outward.	7690	Yes.
North Atlantic-French Atlantic	7770	Yes.
Middle East Mediterranean Westbound.	7880	No.
U.S. Atlantic and Gulf-Bermuda	7900	No.
North Atlantic Mediterranean	7980	Yes.
West Coast of India and Pakistan/U.S.A.	8040	No.
Japan/Puerto Rico and Virgin Islands	8190	No.
Atlantic and Gulf-Singapore, Malaya and Thailand.	8240	Yes.
Greece, Turkey and Syria Area Westbound Tobacco.	8350	No.

NOTE.—Total number of conferences, 28; total number using dual rates, 11.

Mr. KEFAUVER. Moreover, Mr. President, in addition to Isbrandtsen and American Export, the following lines operate in at least one trade on a nonconference basis: Prudential, Stevenson, United States Lines, Robin Line, Lykes Line, American Union Transport, Moore-Mac, States Marine, and Central Gulf.

In addition to these U.S. lines—which use American-flag ships and American crews—there are other shipping lines which are U.S. owned and which operate independently of conferences. The Sabre Line is a good example. It carries a sizable portion of the Far East tonnage in competition with the conferences.

All of the profits from these competitive U.S.-flag ship lines and U.S.-owned lines redound to the benefit of the United States.

As to Isbrandtsen, the largest U.S. line operating in competition with the conferences, there is considerable doubt whether this line really desires to join the conferences or is being forced into this by the Maritime Administration. In my view, it is peculiar that the U.S. agency which is charged with the duty of regulating conferences should act as their agent in forcing independent U.S. lines to join the conferences by withholding a subsidy. However, in any event, Isbrandtsen is operating on a competitive basis outside the conferences today.

If the Senate Commerce Committee version of H.R. 6775 is adopted, not only will lines such as Isbrandtsen be forced into joining conferences, but also in the future U.S. lines will be economically precluded from dropping out of conferences and continuing on a competitive and independent basis. Likewise, new companies will be foreclosed from entering a trade on a nonconference basis.

In my view, it is also not as important whether independent competitors are U.S. lines or foreign lines, because the primary benefactor of competition is the U.S. shipper. Competition, whether by domestically or foreign-owned carriers, acts to hold down conference rates to a reasonable level, as roughly half of world trade consists of exports from and imports into the United States. The benefits of reasonable and competitive ocean freight rates are not only enormous but redound to the great mass of American businessmen and farmers who import or export innumerable commodities. From their standpoint, it does not make too much difference whether the rates are held down by competition coming from independent U.S. lines or independent foreign lines. Their competitive position in world trade is markedly affected by the reasonableness of ocean freight rates.

FOREIGN CARRIERS WOULD BE THE PRIME BENEFICIARIES OF THE MONOPOLY RATES WHICH THE SENATE VERSION OF H.R. 6775 WOULD PERMIT CONFERENCE CARTELS TO CHARGE

The effect of antitrust safeguards is, of course, to prevent undue monopoly power. But more important, prevention of monopoly power prevents unreasonably high prices. The elimination of the antitrust safeguards from H.R. 6775 would permit conference cartels to set unreasonably high prices.

Who would benefit by such a grant of monopoly in power? The answer is that it is foreign carriers—not American carriers—who would most benefit, because it is the foreign carriers who dominate the conference cartels engaged in U.S. foreign trade.

I do not believe that I can emphasize this important point half as well as Mr. Crinkley did in his testimony before the Bonner committee. Let me quote from Mr. Crinkley's statement:

> In considering the whole question, it should be constantly repeated that the interests which are mostly involved with the conference contract dual rate system, and who would be the chief beneficiaries of any advantages to be gained through its legalization, would be the about 360 foreign-flag lines operating on American foreign trade routes.
>
> It may be thought I am exaggerating the circumstances involved, but if you examine the roster of the 63 conferences now using the conference contract dual rate system, you will see that as to 16 of these conferences there are no American-flag-line members; as to 12 other of these conferences there is only 1 American member. As to these various conferences using the conference contract dual rate system, there is one where there are 23 foreign-flag members and 1 American, another with 16 foreign-flag members and 1 American, another with 14 foreign-flag members and 1 American, another with 11 foreign-flag members and 1 American, another with 9 foreign-flag members and 1 American, another with 7 foreign-flag members and 1 American, another with 15 foreign-flag members and 2 American, another with 14 foreign-flag members and 2 American, another with 13 foreign-flag members and 2 American, another with 12 foreign-flag members and 2 American, another with 9 foreign-flag members and 2 American, another with 18 foreign-flag members and 3 American, another with 20 foreign-flag members and 4 American, and another with 45 foreign-flag members and 7 American.

VALUE OF NONCONFERENCE COMPETITION

It appears to be the belief of some that the foreign commerce of this country should be dependent entirely on carriers who are members of conferences—that there should be no nonconference carriers. This, in my opinion, will be the end result of the Commerce Committee's bill. With the protective provisions of the House bill removed, the conferences will have carte blanche power to destroy independent carriers or force them into the conferences. I cannot be a party to the granting of legislative authority to any cartelized monopoly to force out all independent competition, leaving the public interest to the whims of such cartels. We know too well the results. Why did we break up the German international cartels? Why do we demand Government regulations to fill the gap caused by antitrust exemptions in trades where monopolies have been recognized as in the public interest?

In the interest of American exporters, importers, and consumers, it is essential that independent competition in the ocean freight industry be preserved, and that conferences not be permitted to employ devices intended to, and which would exclude or eliminate nonconference carriers from operation in a trade.

First, independent competition provides the only effective brake upon the level of ocean freight rates which are established through rate-fixing agreements by steamship conferences and unregulated by the Government. Where members of other industries are permitted to set rates, fares, or tariffs through cooperative arrangements, exempt from the antitrust laws, the Government is able to scrutinize the results and adjust them if they are unreasonable and not in the public interest. The point was stressed in testimony before a special subcommittee of the House Committee on Merchant Marine and Fisheries which was studying the conference system, by the then first assistant, Antitrust Division of the Department of Justice, Robert Bicks, who stated:

> It [the shipping industry] is absolutely the only area in our economy where Congress has delegated to a private group the power to set rates without any Government regulation (id. at 184).

Where independent competition has operated in foreign trade routes of the United States, its effectiveness in controlling rate levels has not gone unobserved by shippers and consignees. Thus, when the independent service of the Baron Line was plying the sealanes between the United States and South Africa, an official of Lykes Bros., a regular line engaged in that trade, frankly reported to its New Orleans office:

> There is no question but that various importers feel that Baron Line have been a helpful factor by driving down the freight rates on most of the heavy moving commodities. (Hearings, pt. 1, vol. 4, at 4252.)

American importers have complained of the unlimited power of steamship conferences to set rates in trades where nonconference operators are not available to temper the monopoly of the conference lines. Edward Bransten, chairman of the Steamship Committee of the Pacific Coast Coffee Association, which is an organization embracing 70 firms engaged in the importation of coffee on the Pacific Coast of the United States, testified on behalf of his organization before the House Antitrust Subcommittee in March 1961. Mr. Bransten pointed out that in each of the conferences which serve his group, a dual-rate system is employed and independent competition does not exist—hearings, part 3, volume I, at page 152. He described the impact of this as follows:

> Since there is nothing in the dual rate agreement or in the law to prevent them from doing so, and there is no nonconference competition, the conferences have increased our freight charges from time to time without proper consideration of our interests. These increases have had a very serious effect on the competitive position of the Pacific coast coffee industry. Although we have what the conferences call a rate agreement with them, we have no voice in preventing or controlling rate increases whenever the conferences desire to make them. Because the conference has a complete monopoly in our trades, we have no outside competition to which we can turn for assistance (hearings, pt. 3, vol. I, at 153).

Second, if nonconference operation were rendered impossible, due to the employment of exclusionary dual-rate systems or other predatory practices, a U.S.-flag carrier could not leave—or seriously threaten to leave—a conference, although the conference was taking action detrimental to the U.S.-flag carrier or to the foreign commerce of the United States. It is well known that in most conferences, U.S.-flag lines are outnumbered by foreign-flag lines, who are thus able to dominate the conference.

On occasion, U.S.-flag carriers have utilized their present freedom to leave the conference in order to prevent or preclude activities which they deemed harmful to their interests. For example, American President Lines, a U.S.-flag line, attempted to stem the tide of rebating in a particular trade in which it was engaged by threatening to resign from the conference. On two occasions, American President Lines tendered its resignation but subsequently rescinded its notice of withdrawal because, in the words of one of its high officials, "our resignation prompted the other carriers in the trade to make renewed and a more strenuous effort to clean up some of these things in this particular trade"—hearings, part 2, volume I, at page 340.

It is evident to me that, if we are to have rates at reasonable levels and other advantages to shippers, we must legislate so as to afford the opportunity to survive in fair competition to new carriers, those now in existence and to those who choose to withdraw from a conference. Absent Government review of rates, this is the only protection of rates. It is the only protection left in our foreign commerce. We know too well the history of cartels so far as price competition within the cartel is concerned.

OCEAN FREIGHT RATE LEVELS MAY ADVERSELY AFFECT FOREIGN COMMERCE OF UNITED STATES

Ocean freight rates set by the uncontrolled mechanism of conference rate fixing are potentially harmful to the foreign commerce of the United States. Rates set by this process have wide ramifications, not only with respect to the price the American consumer must ultimately pay for imported products, but also with regard to the volume of commerce exported from this country. If ocean freight rates from the United States to a given export market are too high as compared with rates from a country which is competing for sales to that market, U.S. export commerce will obviously suffer. In an era during which our efforts to sell our goods abroad will meet increasing competition from the Common Market and other sources, it is essential that ocean freight rates not discriminate against this country's waterborne export commerce. Indeed, in establishing a far-reaching promotional policy for the American merchant marine, Congress ought to aid and foster the foreign commerce of this country. It would therefore be anomalous and contrary to the interests of this Nation if the conference system to which our merchant marine generally adheres were to contribute to the atrophy of our trade with other nations. Yet, if steamship conferences are rendered so powerful that they may with safety ignore the interests of American exporters and shippers, there is a great danger that our foreign commerce will be adversely affected. To forestall this danger independent competition must be preserved as a practical check upon the otherwise unlimited power of conferences to fix rates and as an alternative for the shipper who can obtain no relief from the conference.

This is not a mere assumption by me. Testimony and documentary material in the record of the recent House hearings illustrate the dangers to our foreign commerce which may accrue from discriminatory rate levels and indicate that independent competition may provide a safeguard and check against these dangers. The record of the House Antitrust Subcommittee hearings contains vigorous appeals by or on behalf of exporters of major U.S. products. These appeals, directed to conferences and conference lines, stressed the need for reduction of ocean freight rates on the movement of these products to certain export markets in order to meet foreign competition and alleged that U.S. exports had been severely restricted as a result of freight rates set by conferences engaged in the foreign commerce of the United States—see hearings, part 1, volume V, at pages 4962–4967.

Take iron and steel, for example. In a letter, dated May 23, 1958, to Mr. Frank Slater, vice president of American Export Lines, a conference carrier; from Ore Navigation Co. of New York City, stated:

> It is quite generally known in all trades that present iron and steel rates from U.S. ports are unreasonably excessive in view of today's freight market, general cargo rates from Europe and the decline of steel shipments from here.
>
> Of all the problems confronting steel exporters today, the primary obstacle to the recapturing of diminished markets and booking cargo again with the berth operators from our ports is the extreme inequality of berth rates (hearings, pt. 1, vol. V, at 4928; the Senator may desire to read further from this letter).

American Export Line replied to this request, advising Ore Navigation that it was not in a position to reduce its rates so as to establish them on a parity with those quoted from the United Kingdom and the Continent to Portugal on the grounds that a reduction to that level would render the rates "noncompensatory"—hearings, part, 1, volume V, at pages 4930–4931; the letter appears at 4931.

The disparity on rates was apparently quite marked. An American Export Line official told the Antitrust Subcommittee the rate on steel from the United Kingdom to the Mediterranean Basin was $10 a ton while the rate from the United States to the Mediterranean Basin was $30 per ton—hearings, part 1, volume V, at page 4932.

Asked to explain the reasons for this disparity, the official stated:

> I am guessing when I give you the answer on this, because again I do not have the facts. But I would say that they are using continental or United Kingdom vessels which are very cheap to operate. I also know that there is a great deal of nonconference competition operating from that area, from the United Kingdom and Continent into the Mediterranean area. And I believe that competitive factors have driven the rates down to that level (id. at 4932).

The influence of freight rates on U.S. export trade was even more strikingly presented in evidence with respect to ocean freight rates on electrical appliances moving from the United States to Greece—hearings, part 1, volume V, at pages 4936–4953. Distributors of General Electric Co., Westinghouse, and Philco electrical appliances complained that freight rates on these products from U.S. ports to Greece were excessive as compared to rates from Continental ports and that this disparity in freight rates was sharply curtailing U.S. exports of these products to Greece.

In October 1957, a Mr. Riginos, the agent or distributor of International General Electric Co. products in Greece, advised International General Electric Co. concerning the impact of ocean

freights upon the movement from the United States to Greece of electric ranges, electric fans, electric water-heaters, household appliances and fluorescent light fixtures—hearings, part 1, volume V, at page 4937.

As to the rate from the United States on electric ranges, Mr. Reginos made the following observations:

The freight rate on electric ranges to Piraeus is $41 per 40 cubic feet. On the basis of this rate, an apartment size electric range of a value of about $110 pays about $22 ocean freight rate or about 20 percent of the f.a.s. value. A 30-inch range of a value of about $122 pays about $35 ocean freight rate or about 28 percent of the f.a.s. value.

In a subsequent letter, International General Electric Co. was informed that the freight rate on ranges shipped from Europe generally ran to about 8 percent of the free alongside ship value—hearings, part 1, volume V, at page 4948.

Mr. Riginos pointed out, that, partly as a result of these rates, during 1956 the equivalent of only about 150 ranges had been imported into Greece from the United States, while to his understanding, 10,000 ranges had been imported from Europe. He concluded:

By keeping the freight rates on electric ranges at $41 per cubic foot nobody gains anything. A reduction of freight up to $20 would be advisable. This will help to reduce the landed cost by about $37 per range which will help increase the volume of business considerably (id. at 4940).

In a December 1957 letter to the North Atlantic/Mediterranean Conference, which covers the trade between the United States and Greece, the Philco distributor for Greece charged the conference with partial responsibility for loss of the market for U.S. ranges in Greece:

The last 3 years you increased three times your freight from New York to Piraeus with result that one of our articles, the electric range, be so charged, so that allow the German industry to gain the market and all shipments from United States to Greece stop. One glance at the 1957 figures will convince you that this is reality since not even 100 pieces totally came into Greece in this year from America as against the 13,000 pieces which have come from Germany. The high freight rate on electric ranges renders you too somewhat responsible for the result of the disappearance from the Greek market of this very important kind of article (hearings, pt. 1, vol. V, at pp. 4944–4945).

To return to Mr. Riginos, the General Electric distributor also protested that the rate on electric fans—$63.25 per 40 cubic feet to Piraeus—were excessive:

During 1956 the total American shipments of fans to Greece amounted to $16,000. We estimate that shipments of fans from the United States should be at least $50,000 per year. Therefore, by keeping the rates high, nobody gains and particularly the American industry (hearings, pt. 1, vol V, at p. 4940).

A subsequent letter to International General Electric pointed out European fans paid ocean freight rates amounting to about 5 percent on the f.a.s. value, and that "very small quantities of fans are imported from the United States due to high transportation expenses"—hearings, part 1 volume V, at page 4948.

As to household appliances—such as electric irons, vacuum cleaners, et cetera—Mr. Riginos asserted:

The freight of $63.25 is tremendous. It should not be more than $35. In 1956 there have been shipped to Greece from the United States: $2,667 worth of vacuum cleaners only; $4,622 worth of electric irons only; $2,459 worth of mixers only; $2,115 worth of table cooking appliances only (id. at pp. 4940–4941).

The distributors of Westinghouse products as well as the Philco and General Electric agents sought reductions on these items. When the conference delayed action on these requests, the Westinghouse distributor reminded American Export Lines that other alternatives were available—presumably he meant nonconference competition. In a letter dated May 1958, it stated:

We are afraid that the matter is dragged unnecessarily and regret to inform you that, although we have been very loyal to your line so far, we shall be compelled to consider certain attractive propositions from other lines which will help us to be more competitive (hearings, pt. 1, vol. V, at p. 4951).

Ultimately, the conference must have recognized the validity of the charges for on some of these items it reduced the rates. In a letter dated January 19, 1960, American Export Lines informed the Antitrust Subcommittee that the conference had made a reduction on the rate on electric ranges from $41 per ton W/M to $33.20—however, not the $20 reduction sought by Mr. Riginos—and a reduction of the rate on electric fans from $63.25 to $33.25 per ton W/M. However, the rates on household appliances—$63.25—washing machines, air conditioners, radios, and parts remained the same.

Thus, while rate reductions were belatedly made on some of these items, it appears that the reaction of the conference was sluggish and that, based on the correspondence from the Greek distributors, the market in a number of these items was lost before the conference acted. Thus, the need for nonconference competition as an alternative to conference shipment and as a factor working toward more reasonable rates would appear to be clearly demonstrated.

That shippers and exporters have found the availability of nonconference sailings useful in pressing their claims for rate reductions is further illustrated by the following letter addressed to the North Atlantic/Mediterranean Freight Conference from the American Metal Climax Co., of New York City, relating to copper from Genoa, Italy.

A set of letters indicating that a small American importer had lost business as a result of conference freight rates can also be found in the record of the hearings of the Senate Committee on Commerce on H.R. 6775.

The writer of the letter stated: "It was the cost of the ocean freight which rendered us uncompetitive", and continued:

This is called to your attention because here is a clear and concrete example of how the American exporter and in turn the United States, suffers because of unrealistic ocean freight rates—rates based upon what the traffic will bear and not upon competition and a fair and just profit.

These illustrations are sufficient to indicate how conference may discriminate against our foreign commerce and the need for independent carriers as a check on the conference carriers.

THE EFFECT OF THE DUAL RATE SYSTEM ON AMERICAN AGRICULTURE

In 1959 the United States exported, by water, a total of 35,992,660—computed from Department of the Army, Corps of Engineers, "Waterborne Foreign Commerce of the United States," part 5, national summaries (1959)—net tons of agricultural products. This accounted for 32.08 percent of our total export waterborne trade. If coal, lignite, and coke are excluded, agricultural exports amounted to 48.06 percent of our total export waterborne commerce. Wheat waterborne exports alone were 10,727,744 net tons, or 9.56 percent of total waterborne exports.

Other major agricultural waterborne exports were:

	Net tons
Corn	6,068,265
Rice	763,549
Barley and rye	2,846,508
Oats	735,780
Wheat flour and semolina	1,384,101
Grain sorghums	2,877,380
Animal feeds (fodder and feeds)	1,007,272
Edible vegetable oils and fats	349,386
Soybeans	3,646,900
Flaxseed	250,823
Inedible and/or crude vegetable oils, fats, and waxes	418,296
Unmanufactured cotton	1,304,075
Unmanufactured tobacco	271,323

Thus, American agriculture is vitally dependent on ocean shipping and American export trade is vitally dependent on American agriculture.

Agricultural interests are particularly vulnerable to the dual rate system, as was pointed out by the Department of Agriculture, in its brief in the U.S. Court of Appeals for the District of Columbia, attacking a particular dual rate system in the brief, under a heading entitled "Interest of the Secretary of Agriculture," which contains the following:

The Secretary of Agriculture intervened in this case (1) to represent the interests of the agricultural community in obtaining equitable transportation rates and services for shipments of agricultural products, and (2) to represent the Department of Agriculture's direct interest as a large shipper of agricultural commodities.

The issue as to the validity of the dual rate system is of basic and widespread importance with respect to the transportation of agricultural products. For example, approximately 27 million tons of agricultural products were exported by ocean carriers in 1951. It is important to the agricultural industries and to the Department of Agriculture that shipping rates be competitive and reasonable so as to encourage and favor the exportation of American agricultural products. If the conference lines can coerce shippers into discontinuing to patronize the nonconference lines, and economic freedom of bargaining of shippers becomes a nullity—having no place else to go—the shippers must accept conference rates.

With a complete monopoly of the trade, the conference lines would have the economic power to charge much higher rates than would be possible with the check of independent competition. The recourse of

appealing excessively high rates to the Maritime Board, which may disapprove the conference agreements, is not an adequate remedy for shippers. Such recourse would probably involve extended hearings as to the excessiveness of the rates and require the hiring of counsel to present the shipper's case.[1] It could not be as effective in curbing excessive rates as independent competition.

The position of the Secretary is that shippers of agricultural products should be free to bargain with both the conference and nonconference lines and thereby obtain the cheapest rates available—and obtain them without being penalized for patronizing the nonconference lines. Congress, in enacting the Shipping Act, 1916, did not intend to sanction the destruction of free competition in ocean shipping, but sought rather to guarantee to shippers both the economic freedom of bargaining and the right of equal treatment.

It should also be remembered that the Maritime Commission has no power over the reasonableness of rates in foreign commerce. It has sometimes been suggested that the Commission could disband a conference if it charged an excessive rate. However, there is no direct legal authority for such action by the Commission, and this is reflected by the fact that in the entire history of the Shipping Act, since 1916, the Commission and its predecessor agencies have never revoked approval of any conference agreement because of an unreasonably high freight rate.

A further demonstration of the danger to agriculture of the uncontrolled dual rate system is found in the testimony of Mr. George A. Dice, Director, Special Services Division, Agricultural Marketing Service, U.S. Department of Agriculture, before the House Merchant Marine and Fisheries Committee on March 4, 1959—"Steamship Conference Study," pages 118–122. Mr. Dice stated:

Our objection to the dual rate system is quite simple. We believe it to be unduly discriminatory and prejudicial to the interests of agricultural shippers. Under the system two identical shipments from the same port, in the same vessel, stowed side by side in the same hold, moving to the same destination, and receiving exactly the same transportation service, are or may be charged for at different rates. Not only do we believe this practice to be unduly discriminatory and prejudicial against the interests of shippers but we believe it to be a form of retaliation against a shipper who does not desire to tie himself and his business to an exclusive patronage contract.

It is our view that the dual rate system and its coercive contractual arrangements tend to deprive shippers of agricultural commodities of the freedom of choice of transportation service. If practiced successfully, the system would result in a monopoly for the steamship conference lines. We say "if practiced successfully" because the elimination of competition from independent steamship lines appears to be the objective of the dual rate system.

The Department is agent for the International Cooperation Administration in the shipment of agricultural commodities. The Department, however, does not become a party to contractual arrangements of the sort followed under the dual-rate system, although, in instances, because of the nature of the programs involved, members of the conferences do extend special rate consideration.

It is our opinion that if a dual-rate system is practiced and if it is successful in eliminating competition from independent lines, it could eliminate this rate consideration on special program shipments.

We believe that if, through the dual-rate system, a steamship conference gains a monopoly, rate increases might very well follow. Certainly the factor of competition would not be present to deter such instances. This would be extremely unfortunate both from the standpoint of agricultural shippers and exporters.

We believe that anyone who does not choose to bind himself to such a contract and who is thereby required to pay a higher rate than another shipper of the same commodity would be discriminated against.

We believe also that, if competition is eliminated through the operation of the system, that that militates against the best interest of agriculture.

Specifically, the dual-rate system when used as a predatory device affects American agricultural exports by eliminating independent liners from business, and a vast quantity of agricultural products go on liners. This includes so-called general cargo, that is, cargo in containers or handlers in separate units, such as canned fruits, vegetables, tobacco, cotton, and wheat flour in bags.

The following are a few examples which illustrate the size of the shipments of such cargoes on liners. In the first quarter of 1960 alone, under Public Law 480, we shipped, on liners, the following:

	Long tons
To Turkey:	
Wheat	29,850
Soybean oil	14,247
To India:	
Cotton	34,696
Milled rice	39,702
To Korea:	
Wheat flour	50,960
Corn	9,491

There is no rate regulation in our foreign commerce. This leaves American foreign commerce, including the vital interests of American agriculture without Government protection against monopolistic freight rates charged by ocean shipping cartels. Without Government protection, it is doubly important that the protection offered by independent competition be maintained. It is therefore essential that no dual rate legislation which would jeopardize this independent competition be enacted.

APPLICATION OF U.S. ANTITRUST LAWS TO FOREIGN COMMERCE

It is argued that it would be an unheard-of effrontery to try to regulate international commerce and place it under certain U.S. antitrust restrictions.

It is difficult for me to see the reasoning behind this argument in view of the historical application of our antitrust laws to foreign commerce. Going back to the famous case of *U.S.* v. *American Tobacco Company* (221 U.S. 106 (1911)), where the Supreme Court applied the Sherman Act to an agreement "executed in England" between an American company and its British competitor, we find a whole series of cases applying the Sherman Act to foreign companies engaged in international commerce. For example, in 1951 in the *Timken* case (341 U.S. 593), the Court held illegal an arrangement between American Timken and its foreign competitors. In that case, the Court said:

The fact that the cartel arrangements were made on foreign soil does not relieve defendant from responsibility. * * * [For] they had a direct and influencing effect on trade in tapered bearings between the United States and foreign countries. * * * [Clearly] defendant's territory was affected.

The Attorney General's National Committee To Study the Antitrust Laws points out:

Beyond these cases involving arrangements joined by American firms, the Sherman Act may cover certain acts by foreign combinations alone.

As an example, they cite *U.S.* v. *Alcoa* (148 F. 2d 416 (1945)). Although I have some reservations with respect to these totally foreign transactions, it is clear with respect to agreements involving Americans and foreigners. At page 76 of the report, the Celler committee states:

We feel that the Sherman Act applies only to those arrangements between Americans alone, or in concert with foreign firms, which have such substantial anticompetitive effects on this country's "trade or commerce with foreign nations" as to constitute unreasonable restraints. Where a U.S. court holds a contract between an American and foreign company illegal under our antitrust laws, and the foreign party attempts to enforce that contract under foreign law, U.S. agencies, including the State Department, should endeavor to protect the U.S. party.

I certainly am in accord with the conclusion of this eminent committee. Further, there is regulatory control of international air traffic by an American agency, the Civil Aeronautics Board. In fact, the CAB has the power to disapprove any rates involving the United States which it believes are unreasonable.

Certainly there are differences between international air traffic and international sea traffic. However, these differences do not go to the heart of the question of whether or not the United States should preclude itself from any sort of effective regulation of anticompetitive arrangements simply because they involve foreign companies. I see no reason whatever that foreign shipping companies should be any more exempt from some U.S. antitrust control, when they engage in the foreign commerce of the United States, than any other foreign corporation, be it a manufacturer, a shipping concern, or an airline.

SUBSIDIES

There may be some confusion among my colleagues as to the impact of Federal subsidies to American carriers on

[1] The Alexander committee recognized, on p. 306 of its report (House Doc. No. 805, 63d Cong., 2d sess., 1941), that: conference lines, through their monopolistic powers, so completely dominate the shippers with whom they deal that these shippers cannot afford, for fear of retaliation, to place themselves in a position of active antagonism to the lines by openly giving particulars of their grievances.

Shippers, on the contrary, live far apart and because of their different and frequently antagonistic interests can only combine for mutual protection with the greatest difficulty.

the matters we are discussing today. Let me attempt to clarify the subsidy question.

There are two types of subsidies given to carriers: operating and construction. It is the operating subsidy with which we are concerned. This subsidy, briefly stated, puts an American carrier on a parity, with respect to costs, with its lowest cost competitor. It compensates American carriers for high wage, subsistence, repair, and insurance costs. In other words, a subsidized American carrier is reimbursed by the Federal Government for the difference between his operating costs and those of his lowest cost competitor, for example, Japanese carriers. This means that the American carrier cannot only compete on a parity with his most efficient competitor, but in addition, has a competitive advantage over all his foreign and unsubsidized domestic competitors, whose costs are higher than those of the lowest cost, foreign carrier, to which the subsidy is pegged.

I cannot stress too strongly that the subsidy to a carrier is not determined by his rate or his success as a competitor. It is designed merely to get him started—costwise—on an equal footing with foreign lines, which have the advantage of cheap labor. What he does beyond this, is determined solely on the basis of his skill in his business operations. As one of the witnesses before the Bonner committee testified:

> [T]he operating subsidy is intended to enable the American operator to take care of himself in any situation that develops in foreign trade (Mr. Stakem, at p. 42).

WHY AMENDMENTS ARE ESSENTIAL

Basically, a cartel is a monopoly device. Looking at the shipping industry and weighing things in the balance, there is probably no justification for cartels and their dual rate system when the interests of the conference cartels are weighed in the balance with the impact of such agreements upon American shippers and independent carriers, and the generally restrictive effect of such agreements on the foreign commerce of the United States. But if the Congress of the United States, in its wisdom, views the matter differently, then the least that should be done is to surround these all-embracing cartel systems and dual rate contracts with adequate safeguards. This, I regret to say, the present law, as reported by the Senate Commerce Committee, fails to do.

Let me emphasize that I mean no criticism of the distinguished gentleman in charge of the bill. Indeed, there are some very excellent provisions in the bill for which I wish to commend the committee earnestly. For instance, section 8 of the bill is a landmark provision. It would allow the Governors of the several States to file a protest over discriminatory rates in our foreign commerce with the Maritime Commission. Within 120 days thereafter, the Commission must act on the complaint and either find the rate nondiscriminatory or set it aside. This is indeed a forward-looking section. For the first time in history the Commission would be expressly granted actual supervisory jurisdiction over rates in our foreign commerce. I hope the Senators will insist in conference that this provision remain, as it is the type of safeguard that is absolutely necessary to protect our commerce against the international cartels that are legalized by the Shipping Act. I also hope, in view of the vast authority over rates conferred by this section, that there will be little objection to amendments along the same line that I shall propose.

However, with a few exceptions, which do not relate directly to dual-rate contracts, we find the bill before the Senate as reported by the committee virtually stripped of adequate protections for the foreign commerce of the United States, independent lines, shippers, and ports. I realize this is a rather broad indictment so I should like to outline briefly the respects in which the Senate bill would denude the law of essential protections.

First. The bill rejects the antitrust safeguards of the House bill.

The House bill had three provisions which, if I may summarize, would prevent the Commission from granting permission for any dual-rate contract which is not intended or reasonably likely to exclude any carrier from the trade. The purpose of these safeguards was manifold:

(a) They would keep the sealanes of the United States open to all vessels in conformity with traditional concepts of freedom of the seas.

(b) They would assure that American lines could, with safety, resign from conferences if necessary to protect the foreign commerce of the United States and at the same time have access to cargo.

(c) They would assure that no American line would be forced into a conference without its consent.

(d) They would safeguard the business of tramp vessels which form an essential part of the American merchant marine.

(e) They would protect American shippers against excessive rates charged by steamship conferences having a monopoly in the trade, by assuring the existence of independent competition.

Why were these salutary safeguards eliminated by the Senate Commerce Committee when they appeared in a bill that was unanimously passed by the House after 3 years of study by two congressional committees? The Senate report—No. 860—declares that they were eliminated because every effective dual-rate contract is intended and reasonably likely to exclude independent competition, and therefore no dual-rate contracts could ever be permitted under the law. This simply is not the case.

The committee report relies to a large extent on the statement of former Chairman of the Federal Maritime Board, Clarence B. Morse, that such was the intent and effect of every dual-rate agreement. But as a matter of fact, this opinion of Chairman Morse was a minority opinion, as reflected by decisions of the Board itself. In *Contract Rates-Trans Pacific Freight Conf. of Japan* (4 F.M.B. 744 (1955)), for example, the Board disapproved a dual rate agreement in the Japan-Pacific trade because it found the malpractices in the trade due, not to the carryings of Isbrandtsen, but to overtonnaging. In his dissenting opinion, Chairman Morse declared that the purpose of a dual-rate agreement was "the elimination of nonconference competition, as such, as a significant force in that trade"—4 F.M.B. at 768. He went on to say further:

> To test the validity of a dual-rate system by its effect on independent operators is to permit the tail to wag the dog (4 F.M.B. at 769).

But the Board failed to agree with him in this case and has consistently considered the impact on independents in determining the legality of dual-rate agreements.

Now, the conferences know that the Board has consistently adhered to the position that no dual-rate agreement will be approved if it tends to eliminate an independent from the trade. They were so informed by the Board in 1957, by Mr. Aptaker, of the General Counsel's office in no uncertain terms, according to a conference memorandum on their discussions with him which reads in part as follows:

> Since that decision, the Board has extended these fallacious principles to other conferences. Mr. Aptaker stated that the Board would no longer approve any contract rate system where there was not a firm showing of existing nonconference competition, and further, that such nonconference competition is making undue inroads in the trade. He further advised that the Board would not approve any contract rate system which denies to nonconference operators a fair and equitable share of traffic; nor approve a contract rate system which prevents shippers from exercising a choice between conference and nonconference vessels. These standards stem directly from representations made to the Board by the Japan-Atlantic and Gulf Freight Conference in docket No. 730. Sponsors of the brief amicus curiae copy the same representations (Celler committee hearings, pt. 3, vol. II, at 987).

The committee report also quotes conference leaders in support of the conclusion that no dual-rate agreement would be approved under the bill with the antitrust safeguards of the Bonner bill included because all dual-rate agreements would tend to drive carriers from the trades. I would like to quote, however, from the examination of Mr. J. A. Dennean, chairman of the very important Far East conference—with 23 lines—when he appeared before the Celler committee this spring, which is directly contrary to the Senate Commerce Committee's findings.

> Mr. SINGMAN. Well, just let me put it simply and ask you whether you agree that the purpose of the contract rate syste.n is to prevent shippers from patronizing nonconference lines?
>
> Mr. DENNEAN. No, sir; I do not, and I want to tell you this, that there are a lot of things in that memorandum I disagreed with as you read it to me, but there is one thing that I don't agree with, and that is our system, our contract system, is devised with the idea of preventing the operation of nonconference lines.
>
> Now, bear this in mind, please, that in the Far East trade we have had a contract system for 30 years. I think it is about that length of time.
>
> Now, we have never deprived an outside line from operating. We have always had

outside competition. So I don't think that is the purpose of our system at all.

Mr. SINGMAN. It may be that it doesn't work, but the question is, What is the purpose of it?

Mr. DENNEAN. Well, I don't think that is the purpose of it at all.

Mr. SINGMAN. What is the purpose?

Mr. DENNEAN. I think the purpose of it is to assure as much cargo as possible to the members of the conference, the regular lines operating in the trade.

Now, if that is 100 percent; fine. We would like to get 100 percent. But I want to tell you right now that in my judgment there is no contract system which will ever operate to that extent.

If you get 80 percent of the cargo, you are operating at 100 percent efficiency, because you cannot put everything under contract; shippers will not contract with you, some shippers will not contract with you.

So those are some of my opinions on this subject.

Mr. SINGMAN. Your objective is to, in effect, secure a monopoly—

Mr. DENNEAN. No, sir.

Mr. SINGMAN (continuing). Through the rate system.

Mr. DENNEAN. No, sir. There cannot be a monopoly. Even if we had gotten completely all of the cargo in the trade, I still don't think that is a monopoly. You might think so, but I don't, because we have 23 members in the conference and all are fighting to get cargo.

(At this point in the proceedings, Mr. Donohue is presiding.)

Mr. SINGMAN. Yes. But somebody who is not a member, doesn't join your club, can't operate, though; isn't that correct?

Mr. DENNEAN. Yes, but he can join if he wants to.

Mr. SINGMAN. But if he doesn't want to, he is out of luck?

Mr. DENNEAN. Well, not in our trade. That hasn't been the case at all (Celler committee hearings, pt. 3, vol. II, at pp. 974–975).

I suggest, then, that there is absolutely nothing illusory about the antitrust safeguards prohibiting dual-rate contracts intended to eliminate independent carriers from the trade. Certainly the test is much less rigid than the Supreme Court test in the Isbrandtsen case where the Court found the agreement unlawful merely because it was taken as a competitive measure to offset the competition of Isbrandtsen. And as a matter of fact, in that very case, the Board, which had approved the agreement in question in the Japan-Atlantic trade, expressly found that notwithstanding the dual-rate agreement "the continued existence of Isbrandtsen as an effective competitor and the existence of strong shipper groups insure conference consideration of shipper needs and desires—contract rates, *Japan-Atlantic-Gulf Freight Conf.* (4 F.M.B. 706, 741 (1955)). All those in support of the antitrust safeguards are asking is assurance that the standards laid down by the Commission prior to the Isbrandtsen decision will be adhered to in the future notwithstanding the fact that dual-rate agreements generally will be legislatively authorized.

The committee suggests that by advocating these amendments we are supporting only foreign lines. They refer to the fact that Isbrandtsen, the only American nonconference line, will soon join the conferences. In the first place, the illustration is inapt because, if anything, Isbrandtsen is being forced into the conference by the Maritime Administration which refused to give a subsidy to Isbrandtsen unless it promised to abide by the conference tariffs, rules, and regulations. This is documented, chapter and verse, by the following correspondence:

DECEMBER 30, 1960.

Rear Adm. RALPH E. WILSON,
Chairman, Federal Maritime Board,
Washington, D.C.

DEAR ADMIRAL WILSON: We acknowledge receipt of your letter of December 23, 1960, replying to our letter of December 13, 1960, relating to maintenance of conference rates. In the light of your letter we have reviewed our position and submit the following which we believe to be in accordance with your requirements.

We hereby agree, if subsidized, to participate in conferences on the same basis as other subsidized operators in all the areas in which we will operate subsidized services. Naturally we will, on our part, comply with the rates, rules, and regulations of all conferences of which we are members, and we shall make every effort to see that the conferences in which we participate operate effectively and to see that those conferences provide adequate machinery to enforce compliance by all conference members with conference rates, rules, and regulations.

There is no reservation whatsoever as to our commitment on this matter. We do believe that we should have the same right as other subsidized operators now have to withdraw from a conference where special circumstances warrant, or where such special circumstances exist, to refuse to join a conference that does not cover a substantial portion of the trade or is otherwise ineffective. We wish to assure you, however, that even those actions would be taken only after this matter had been discussed with the Maritime Board.

In any areas where conferences do not exist we will use our best efforts to work toward stabilization of rates and conditions.

We are advised that American Export intends to continue to follow the policy on conference matters that it has followed in the past and that it concurs in the position that we have now taken, as set forth above.

As we feel that the position which we present here is in harmony with the policies and practices of the other 14 American-flag subsidized lines, we hope that you will agree that there is no need to impose exceptional conditions or restrictions on the two lines here involved.

Sincerely yours,

ISBRANDTSEN CO., INC.,
JAKOB ISBRANDTSEN,
President.

FEDERAL MARITIME BOARD,
Washington, D.C., December 23, 1960.

Mr. JAKOB ISBRANDTSEN,
President, Isbrandtsen Co., Inc.,
New York, N.Y.

DEAR SIR: This will acknowledge the receipt of your letter of December 13, 1960, in which you set forth your position with respect to the maintenance of conference rates by American Export Lines, Inc., as well as Isbrandtsen Steamship Co., Inc. The position expressed in your letter is not acceptable.

The views expressed are substantially reiterations of statements made by officials of your company for many years prior to the time that you became affiliated with a subsidized operator. They convey nothing whatever of which the Board is not already aware, nor do they serve any useful purpose insofar as the problem at hand is concerned; viz, the award of an operating differential subsidy agreement to Isbrandtsen Steamship Co., Inc., and to the future operation of American Export Lines, Inc.

After careful consideration of this matter, the Board has determined that, in the event it should award a subsidy agreement to Isbrandtsen Steamship Co., Inc., it will require that such agreement contain a provision to the effect that the operator agrees to maintain conference rates, rules, and regulations effective for the subsidized services contained in such agreement, irrespective of whether the operator is a member of such conference, unless, due to special circumstances, the Board, in its sole discretion, should decide to modify temporarily this requirement as to a particular conference. Furthermore, the Board will require that an addendum to American Export Lines' subsidy agreement be executed which will contain this provision.

We shall appreciate your early reply and acceptance of the above condition in order that we may proceed with the processing of the subsidy application.

Very truly yours,

RALPH E. WILSON,
Chairman.

But Isbrandtsen aside, what about the trade routes where American conference operators have, for one reason or another, failed to join a conference, such as those shown in the following list, which are simply illustrative:

LIST OF TRADE ROUTES IN WHICH STATES MARINE LINES OPERATE WHERE THEY ARE NOT MEMBERS OF THE CONFERENCE ON THAT ROUTE

U.S. ports—Outbound: U.S. Atlantic ports to United Kingdom/European Atlantic ports.

U.S. ports—Inbound: United Kingdom and European Atlantic ports to U.S. Atlantic-Gulf-Pacific ports.

Mediterranean ports to U.S. North Atlantic ports (Celler committee hearings, pt. 1, vol. III, at 2777).

The trades in which American President Lines carries cargo where there are conferences of which American President Lines is not a member are as follows:

1. Pacific Coast/European.
2. Japan/Saigon.
3. Mediterranean/Orient.

(Celler committee hearings, pt. 2, vol. I, at 821).

Would the committee have dual-rate systems employed to drive them out of business? Or suppose an American line wishes to withdraw from a conference. Would the committee have the dual-rate contract employed to eliminate it from the trade? Moreover, what about the American tramp vessels which, latest studies show, compete in large measure for a good deal of cargo with conference lines, including liner type cargo. Would the committee want these essential elements of the American merchant marine driven out of business to appease the foreign dominated conferences employing dual rate contracts? I would hope the answer to all of these questions would be "No."

I am inserting in the RECORD at this point, a table showing these American operators and their vessels:

U.S. shipping companies owning tramp vessels operating in foreign trade—Number of freighters owned as of Jan. 1, 1959

Aeolian Steamship Corp	1
American Coal Shipping Co	1
American Union Transport Co	3
Arrow Steamship Co	1
American Waterways Corp	1
Atlantic Carriers, Inc	1
Atlantic Ocean Transport Co	1
Aspin Steamship Co	1
Blidberg Rothschild Co	1

U.S. shipping companies owning tramp vessels operating in foreign trade—Number of freighters owned as of Jan. 1, 1959—Continued

Bulk Carriers Corp	1
Burbank, A. L. & Co	1
Cargo Ships & Tankers	2
Compass Steamship Corp	1
Effort Steamship Corp	1
Eastern Maritime Corp	1
DeLappe, W. A., Co	1
Dolphin Steamship Corp	1
Doric Shipping & Trading Co	1
Edison Steamship Corp	1
Elam Shipping Corp	1
Epiphany Tankers Corp	1
Falmouth Steamship Co	1
Grainfleet, Inc	1
Intercontinental Transport Co	2
Intercontinental Liberty, Inc	2
Liberty Navigation & Trading Co	2
Inter Ocean Steamship Co	1
Long, Quinn & Boylan, Inc	5
Marine Bulk Carriers	1
Herald Steamship Corp	1
Martis Steamship Corp	1
New England Industries, Inc	1
Ocean Transport Co	4
Ocean Freight & Brokerage Corp	1
Ocean Shipping, Inc	1
Ocean Clippers	2
Pacific Waterways Corp	1
Panagopule, Eugene	1
Pan Cargo Shipping Co	1
Pegor Steamship Co	1
Peninsular Navigation Co	2
Penntrans Co	3
Pacific Navigation Corp	1
Pier Shipping Co., Inc	1
Ocean Tramp, Inc	1
Pacific Wind Corp	1
Rockland Steamship Corp	1
Shepard Steamship Corp	1
Standard Steamship Corp	2
Harry Sperling	1
Tak Shipping Co	1
Terrace Navigation Corp	1
Traders Steamship Corp	2
Trans Pacific Co	4
Transfuel Corp	1
Transport Utilities Co	2
Veritas Steamship Co., Inc	1
Victory Carriers	7
West Coast Steamship Co	3
Whitehead Steamship Corp	1
World Carriers, Inc	1
Total	92

(NOTE.—These 61 companies compose the nucleus of the tramp fleet. However, a number of these companies frequently charter their ships to liner companies, on extended charter hire, for operation in liner service.)

(Celler committee hearings, pt. 1, vol. I at p. 759.)

Mr. KEFAUVER. Second. The bill would overrule *Isbrandtsen Co.* v. *United States* (211 F. 2d 51 (D.C. Cir. 1954, certiorari denied 347 U.S. 990 (1954)) by allowing dual-rate agreements to go into effect without a hearing by the Commission.

In *Isbrandtsen* v. *United States* (211 F. 2d 51, certiorari denied 347 U.S. 990 (1954)), the Court of Appeals for the District of Columbia held that a dual-rate agreement could not be lawful until it had received the express approval of the Federal Maritime Commission—Board—after hearing. Under the bill as reported, approval of dual-rate systems is no longer required on the part of the Commission. Instead, the Commission is to confer its "permission" on such agreements. It is not clear to what extent "permission" under new section 14b—applicable to dual-rate contracts—differs from "approval" under section 15—formerly applicable both to dual-rate contracts and to all other agreements. However, it is clear that "permission" "shall" be given after "notice" under section 14b, whereas "approval" may be given only after "notice and hearing" under section 15. Thus a safeguard formerly applicable to dual-rate agreements—namely, a formal hearing—is now stricken from the law and dual-rate contracts are not only made lawful but are the beneficiaries of special and preferred procedures which differ from that accorded every type of other agreement under the Shipping Act.

Third. The bill does not make unlawful execution and enforcement of an unpermitted dual rate agreement, contrary to the holding of *Isbrandtsen Co.* v. *United States* (211 F. 2d 51 (D.C. Cir. 1954), certiorari denied 347 U.S. 990 (1954)).

In Isbrandtsen against United States, supra, the Court of Appeals of the District of Columbia made it explicitly clear that a dual-rate contract put into effect without the express approval of the Federal Maritime Commission—Board—was illegal; the court in that case said:

> In either case, section 15 requires that such agreements or modifications "shall be lawful only when and as long as approved" by the Board. Until such approval is obtained, the Shipping Act makes it illegal to institute the dual-rate system.

The holding in this important decision was cited with approval and followed in a long line of cases including: *Pacific Westbound Conference* v. *Leval & Co.* (201 Ore. 390, 269 P. 2d 541 (1954), certiorari denied, 348 U.S. 897 (1954)); *River Plate & Brazil Conferences* v. *Pressed Steel Car Co.* (124 F. Supp. (S.D.N.Y. 1954), affirmed, 227 F. 2d 60 (2d Cir. 1955)); *Anglo Canadian Shipping Co.* v. *United States* (264 F. 2d 405, 411 (9th Cir. 1959)).

Now the language in quotation marks, supra, relied on by the court in the Isbrandtsen case for requiring Board approval of dual-rate contracts and for making such contracts unlawful until approved has been omitted from section 14b of the bill. In other words, under section 14b, it apparently is not unlawful under the Shipping Act to carry out a dual-rate agreement before permission has been obtained from the Board, or for that matter, even to carry out an unpermitted dual-rate contract. I might ask the gentlemen who sponsor this legislation why all other agreements in our foreign commerce are made unlawful by the act until Board approval is obtained, but dual-rate contracts are not subject to this prohibition. Again, we see another of the safeguards of the law whittled away by the Senate bill.

Fourth. The bill would eliminate all fines and penalties under the Shipping Act for carrying out dual-rate agreements in violation of the act.

As I have pointed out above, under *Isbrandtsen Co.* v. *United States* (211 F. 2d 51 (D.C. Cir. 1954), certiorari denied, 347 U.S. 990 (1954)), it was unlawful under section 15 of the Shipping Act to carry out an unapproved dual-rate agreement. Any conference line employing an unapproved agreement was therefore subject to heavy fines inasmuch as section 15 formerly provided:

> Whoever violates any provision of this section shall be liable to a penalty of $1,000 for each day such violation continues, to be recovered by the United States in a civil action.

However, under section 14b of the Senate version of the dual-rate bill, there is absolutely no penalty provided for employing a dual-rate agreement in violation of the provisions of that section. The $1,000 per day penalty in section 15—which is now amended to provide for not more than $1,000—would no longer appear applicable because it is limited to violations of section 15 only. It is also doubtful whether the penalty contained in section 32 could be invoked. That section states:

> That whoever violates any provision of this Act, except where a different penalty is provided, shall be guilty of a misdemeanor, punishable by a fine not to exceed $5,000.

However, there is no declaration in section 14b that the carrying out of an unpermitted agreement or an agreement in violation of the section is in any way unlawful, and it could therefore well be argued that such action in no way "violates any provision" of the act.

Once again are the safeguards eroded by the Senate bill. Under the old law, a dual-rate agreement carried into effect without the approval of the Board subjected the conference or lines to heavy penalties of $1,000 per day; under the Senate bill, this deterrent, for no reason at all, is wiped out.

Fifth. The bill would permit the use of heretofore unlawful discriminatory practices to injure independent competition.

The very first section of the Senate version of H.R. 6775 would add a new word "unjustly" to the terms of the Shipping Act as they have existed for nearly half a century. The reason given for this novel addition is that it will thereby "conform that section to all other portions of the Shipping Act, 1916"—Senate Report No. 860, 87th Congress, 1st session, page 11. The point is, the framers of the Shipping Act of 1916 made section 14 different from all of the other sections of the act referred to by the committee, and for very good reason. As the Supreme Court of the United States pointed out in the *Isbrandtsen decision* (357 U.S. 481, 494 (1958)):

> The characterizations "unjustly discriminatory" and "unjustly prejudicial" found in other sections imply a congressional intent to allow some latitude in practices dealt with by those sections.

In section 14, however, the intent of Congress has been to eliminate all discriminatory measures against independents.

By making lawful dual-rate contracts, which, because of their rate spreads and tying provisions, are prima facie discriminatory, the bill would remove a single type of discriminatory device from the all-exclusive terms of this section of the law. But this amendment, injected by the committee into the House bill,

would not only remove dual-rate contracts from section 14, third, of the Shipping Act, but every other type of discriminatory arrangement which the conferences and their counsel can contrive, unless such devices are found to be "unjustly" discriminatory, whatever that may mean.

To take a single illustration, on June 27, 1961, in docket No. 908, Japan-Atlantic and Gulf Freight Conference-Fidelity Commission System, the hearing examiner of the Commission approved a proposed Fidelity Commission System—which is a hybrid between a rebate and a deferred rebate—on the grounds that it was not a "discriminatory" measure within the meaning of section 14, third. I hope this determination by the examiner will be reversed by the new Commission. But it will be all but impossible to reverse it if Congress now softens section 14, third of the act by the insertion of the word "unjustly." For if the examiner did not think that this Fidelity Commission System discriminated in the first place, a fortiori, it stands to reason that it would probably not unjustly discriminate, either.

Now, there has been little if any testimony taken regarding the use of Fidelity Commission Systems by the Congress, or of the myriad of other types of tying devices that ingenious counsel for the conferences would contrive to avoid the strictures of the act. But it is clear that inserting the word "unjustly" into the act opens up a Pandora's box of potential evils which the committees, not to mention Congress, have not even considered.

Once again, the Senate version drops the barriers of the Shipping Act in favor of the foreign-dominated conference lines.

Or take as another illustration, the provision in dual-rate agreements requiring nonnatural routing of cargo through nontributary ports. The Bonner bill endeavored to prevent this discriminatory practice by requiring that all dual rate contracts contain a provision that they do not require the contract shipper "to divert shipment of goods from natural routings not served by the conference. This was eliminated from the Senate version of the bill on the ground that the Commission already has ample power to prevent dual-rate carriers and conferences from doing that sort of thing, citing Gulf and South Atlantic Havana Conference, docket Nos. 849, 851, and 854, decided February 2, 1961.

Now, one of the grounds of the Commission's decision in that case was section 14, third, prohibiting all—not merely unjustly discriminatory—measures against independents. The Commission cited with approval the following language of the Supreme Court in the Isbrandtsen decision:

> The Congress in section 14 has flatly prohibited practices of conferences which have the purpose and effect of stifling the competition of independent carriers (356 U.S. at 491).

But, if the committee strikes the safeguard in the Bonner bill against unnatural routings and at the same time removes perhaps the most important elements of the Board's authority to declare unlawful unnatural routings by inserting the word "unjustly" into section 14, third, our commerce may well be at the mercy of the routing restrictions of conference carriers despite the good intentions of the committee.

Once more, it is obvious that in deference to the conference carriers, the Shipping Act has been significantly weakened by the Senate version of the bill.

Mr. President, I have spoken at some length; this is a complicated subject. I hope that I have demonstrated the evils of an unregulated dual-rate conference system. The malpractices of the past are certainly blatant enough to justify restoration of the competitive safeguards built into the House version of H.R. 6775. I have introduced and shall call up amendments to accomplish this purpose. I hope the managers of the bill will find some of these printed amendments acceptable to them.

Mr. WILEY. Mr. President, the Senate has before it today H.R. 6775 as amended by the Senate Commerce Committee. The senior Senator from Tennessee has already called attention to several antitrust and monopoly matters involved in this bill and in the dual rate which it recognizes. I would like to deal with another aspect of this legislation—its impact on American exports.

Probably the most important international economic problem confronting our country today, is the relative decline of American exports, coupled with rapidly dwindling gold reserves and an unfavorable balance of payments. I have long stressed the need to continuously promote our exports—I have called for studies of the world markets; I have requested studies of our tariff structure; I have asked our industries to be more keen to the needs of world trade.

However, in assessing our ability to compete with other countries we must take into account many factors which cannot be easily modified, among which the most prominent is the high cost of labor in this country. Yet, in recent days there has come to my attention one factor which I am unable to fully explain—and this is the extremely heavy burden put on our exports by the international shipping rates.

We, in this country, are accustomed to the idea that each part of a round-trip ticket costs the same. But this apparently is not the case in ocean shipping. There one gets as much as the traffic will bear.

I am deeply concerned about this disparity in shipping rates between what is charged to American exporters, on the one hand, and what is charged to foreign exporters of the same products, on the other hand.

I have discovered, for example, that American cheese producers must pay twice as much to ship their cheeses to Genoa, as the Genoese shipper has to pay to send his cheese to this country. The dairy industry is, needless to say, a source of great interest and concern to me. I am at a loss to understand what possible justification can be made for this unwarranted discrimination against American farmers, producers, and shippers.

The international shipping rates are established by various shipping conferences, to which this bill, H.R. 6775, relates. These conferences file their rates with our Maritime Commission. Ship lines have been long permitted to band together and agree on rates because it has been thought that unrestrained competition would be disastrous to ocean carriers. Shipping conferences, as pointed out by the Senate Commerce Committee, are obviously organized "for the purpose of reducing the rigors of competition which otherwise would exist."

I am no expert on the ocean-shipping industry, but I am afraid that in this case the shipping conferences have taken advantage of the American manufacturer and shipper. I have always felt that a little fair, honest competition never hurt anyone.

Certainly, I agree it is important to protect the American shipping industry. But, at the same time, it is clearly equally important to protect the interest of all other American industries. Among other things, this means assuring that American farmers and manufacturers are able to ship their produce in international trade on a parity with foreign competition.

But this is not the case. Why is it, Mr. President, that a Wisconsin exporter, shipping his cheese products from Milwaukee to Marseille has to pay $6.38 per hundredweight, while the French shipper of the same product to Milwaukee has to pay $3.84? As my appendix reveals, this discrimination is not directed against the dairy farmers only. It is shown that similar injustices are worked against other American industries which vitally touch and concern the economic welfare of nearly every State in the Union. Among these industries are electrical products, steel, glass, and ceramic tile.

The second of my appendixes, containing excerpts from a memorandum prepared by the U.S. Department of Commerce in November 1960, shows the further impact of shipping rates on other industries. It reveals this same sort of discrimination against American producers attempting to compete with foreign manufacturers in such articles as automobiles, farm machinery, industrial chemicals, rubber, fertilizer, and many other crucial products.

We certainly want to protect American shipping. Yet, at the same time, it is important that we make certain that these shipping conferences do not let their power go to their heads. It is important also to note that many of these shipping conferences, which establish these shipping rates, are largely dominated by foreign lines. It is imperative that we do not give these shipping conferences so much power that they are completely protected in their efforts to enforce this handicap on American industry.

I understand full well, Mr. President, that there may be perfectly good reasons

for protecting steamship conferences from destructive competition in every way possible; but, in balancing the needs of our national economy, we must observe that the past record of these conferences shows that exorbitant and uncompetitive shipping rates have been charged by these conferences to American shippers. This we must take into account in making our decision as to whether or not these conferences ought to be granted unfettered authority to set their own rates by common agreement.

The version of H.R. 6775 approved by the Senate Commerce Committee gives great power to shipping conferences. The decisions of these conferences, reached under this power, will have far-reaching impact on America's exports, gold reserves and balance of payments. Have these shipping conferences—most of which are controlled by foreign carriers—earned this trust by virtue of their past performance? In view of the facts which I have put before you, I have grave doubts whether the power of these conferences should be strengthened. I must, therefore, go along with the amendments to H.R. 6775 prepared by the senior Senator from Tennessee, which will restore this bill to the language which it had when it was voted upon in the House.

I must stress that this is not sufficient action, in my own mind. I feel it is important that further action be taken by the Government of this country to remedy the situation as it now exists. We must make certain that our farmers, manufacturers and exporters are given an equal opportunity in the quest for world markets.

I ask unanimous consent to have printed in the RECORD the appendixes to which I have referred.

There being no objection, the appendixes were ordered to be printed in the RECORD, as follows:

APPENDIX A

(Statement by Senator WILEY on the impact of shipping conference cartels on American exports)

The following materials are self-explanatory. You will note that there is a gross discrimination against American exports, in that freight rates for the same item over the same distance are much higher with respect to exports than imports. It is suggested that the impact of the situation revealed by these statistics on American exports, American industry, and America's gold balance be kept in mind in considering the dual-rate shipping bill, H.R. 6775.

Current shipping rates in the North Atlantic (United States-Japan trade)

	Outbound [1]	Inbound [2]
Electric motors	$54 per short ton (lower rate)	$39.50 per short ton.
Stainless steel (bars, billets, pipe, plates, rods, shapes, sheets, slabs, ships, tubes, wire).	$61.25 per long ton (lower rate)	$33 per long ton.
Glass plate and plate glass	$42.25 per short ton (lower rate)	$28 per short ton.
Ceramic tile	$65.25 per short ton (lower rate)	$27.75 per short ton.
Electric bulbs and photo flashbulbs	$63.50 per short ton (lower rate)	$32.50 per short ton.

[1] Far East Conference; has dual-rate contracts.
[2] Japan-Atlantic and Gulf Freight Conference; has no dual-rate contracts.

Source: Tariffs filed by respective conferences with Federal Maritime Board.

CURRENT SHIPPING RATES ON ELECTRIC MOTORS IN THE GREAT LAKES-BORDEAUX-HAMBURG RANGE TRADE

Outbound (U.S. Great Lakes-Bordeaux-Hamburg Range Eastbound Conference):

Chicago, Milwaukee, Detroit, Toledo, and Cleveland to Bremen and Hamburg (per long ton) ---------- $74.25

Inbound (U.S. Great Lakes-Bordeaux-Hamburg Range Westbound Conference):

	Per 1,000 kilos [1]
Bremen and Hamburg to Detroit	$48.50
Bremen and Hamburg to Chicago	49.00
Bremen and Hamburg to Toledo and Cleveland	48.00

[1] 1,000 kilos=2204.6 pounds. Long tons=2240 pounds. Therefore, the inbound figures should be increased, by approximately 1.5 percent to make them precisely comparable to the outbound figures.

Source: Tariffs filed by respective conferences with Federal Maritime Board.

COMPARISON OF CONFERENCE FREIGHT RATES ON CHEESE MOVING FROM UNITED STATES WITH RATES ON CHEESE MOVING TO UNITED STATES

Great Lakes ports of Chicago and Milwaukee-Mediterranean ports of Marseille, Genoa, Leghorn:

Per hundredweight on American exports ---------- $6.38
Per hundredweight on imports ---------- 3.84

Source: Tariffs of American Great Lakes Mediterranean Eastbound Freight Conference and Mediterranean-U.S.A. Great Lakes Westbound Freight Conference on file with Federal Maritime Commission, September 8, 1961.

Great Lakes ports of Chicago and Milwaukee-Scandinavian ports:

Per hundredweight on American exports ---------- $5.45
Per hundredweight on imports ---------- 2.74

Source: Tariffs of U.S. Great Lakes, Scandinavian and Baltic Eastbound Freight Conference and Scandinavia Baltic-Great Lakes Westbound Freight Conference on file with Federal Maritime Commission, September 8, 1961.

Great Lakes ports of Chicago and Milwaukee-ports of Bordeaux, Antwerp, Rotterdam, Amsterdam:

Per long ton on American exports (minimum [1]) ---------- $110
Per long ton on imports (flat rate) ---------- 110

[1] Depending on density of cheese and manner of packing rate may be as much as almost twice this minimum rate.

Source: Tariffs of U.S. Great Lakes-Bordeaux-Hamburg Range Eastbound Conference and U.S. Great Lakes-Bordeaux/Hamburg Westbound Conference on file with Federal Maritime Commission, September 8, 1961.

(NOTE.—All rates cited above are for refrigerated space.)

APPENDIX B

(Statement by Senator WILEY on the impact of shipping conference cartels on American exports)

The following is an excerpt from a memorandum, dated November 3, 1960, prepared by the U.S. Department of Commerce, Bureau of Foreign Commerce, Office of Economic Affairs, Transportation and Utilities Division staff.

OCEAN FREIGHT RATES AS A DETERRENT TO THE EXPANSION OF U.S. EXPORT SALES

Since the early part of this year (1960), the Department of Commerce has been holding weekly meetings with representatives of various industries to discuss ways and means of increasing export sales in connection with our current export sales expansion program.

During several of these meetings industry spokesmen have pointed out that one of the principal deterrents to increased export sales is the high level of outbound ocean freight rates as compared with the inbound rates for the same commodity on the same trade route. Complaints have also been registered regarding the discrepancy between rates from U.S. ports to foreign destinations and from foreign ports to these same foreign destinations for the same commodity. Specifically, the following industries have provided the Department with statements regarding this matter: automotive equipment, industrial chemicals, major appliances, jewelry industry, electronics, rubber and rubber products, farm machinery, textile machinery, fertilizers, air conditioners, and refrigeration equipment.

Following is a synopsis of the statements presented by these industries:

AUTOMOTIVE INDUSTRY

The eastbound automobile rate level particularly to the continental-United Kingdom ports has been higher than the inward or westbound rate to U.S. ports, since 1945. After extended discussion with the AMA Ocean Rate Committee, the conference lines made a rate reduction in 1958 and another in 1959.

The impression exists that these concessions were prompted, however, by the then impending congressional investigation. Concern exists that as soon as the conference lines decide to boost the eastbound rates once again, this will be done, regardless of protest.

United Kingdom trade

	Boxed	Unboxed
Present eastbound conference rate,[1] per 40-cubic-foot ton	$23.00	$26.00
Reported westbound rate,[2] per 40 cubic feet	11.55	[3] 16.45

[1] Rate applies to 8,960 pounds.
[2] Rate applies to 4,481 pounds.
[3] 240 cubic feet or greater; $12.60 per 40-cubic-foot units under 240 cubic feet.

Continental trade

	Present eastbound conference rate [1]		Reported westbound rate [2] from Antwerp (per cubic meter, 35 feet)
	French-Belgium-Dutch ports (per 40-cubic-foot ton)	German ports (per 40-cubic-foot ton)	
Boxed	$15	$16.50	[3] $22.00
Unboxed	18	20.00	1a.30

[1] Rate applies to 8,960 pounds.
[2] Rate applies to 3,000 kilos (6,615 pounds).
[3] To a value of $2,000; $33 per cubic meter if value over $2,000.

INDUSTRIAL CHEMICALS

There is such great disparity between eastbound and westbound transatlantic freight

costs as to make it impossible, in many cases, to effect eastward sales at all. A typical chemical commodity, which is sufficiently universal in application to make it worth using as an example, is sodium cyanide. To the best of our knowledge, this material comes to the United States from Germany, France, and the United Kingdom to the extent of some 18 million pounds, valued at about $3 million per year. Movement eastward is, to all intents and purposes, nil, despite the fact the published going prices in the home market in all producing countries are roughly the same.

This one-way movement is explained more by the discrepancy in freights than by tariff differentials:

	Per hundredweight
Hamburg to New York	$0.82
Rotterdam to New York	.82
Liverpool to New York	.873
New York to Hamburg	6.61
New York to Rotterdam/Antwerp	5.85
New York to Liverpool	(1)
New Orleans to Antwerp	6.44

[1] Not yet available.

MAJOR APPLIANCES

At the August 17, 1960, meeting of the ocean rate committee, consumer products division, various members reported that they had been informed of your interest in the level of ocean rates of freight insofar as they affect unfavorably the exports of American products to world markets.

This committee holds that the disparity between American and European—and in some instances, Asian—ocean rates of freight is one of various important factors which have an adverse influence on the flow of a considerable number of American products to foreign markets. Electrical household appliances such as refrigerators, freezers, ranges, washing machines, dryers, and others are in this category.

The objectives of this ocean rate committee include continued negotiations with steamship conferences concerning rate levels which are detrimental to U.S. exports and, incidentally, harmful to the lines themselves, in the firm conviction that thereby a contribution will be made toward a rising volume of exports.

RUBBER

In many cases, ocean freight rates are the deciding factor as to whether U.S. producers can obtain the business. An industry representative stated that both United States and West German producers quoted prices on a substantial order for surgeons' gloves in Ecuador. U.S. prices were lower but ocean freight rates were so much higher that the landed cost from Germany was less than that for U.S. products, so that the business was placed with a German company.

FARM MACHINERY

Ocean freight rates handicap American exports. Some rates from the United States to Europe are considerably higher than rates from Europe to the United States. Some rates from Europe to a third country are lower than rates for the same distances on voyages originating in the United States.

TEXTILE MACHINERY

Marine freight rates are higher from U.S. ports to Europe than rates from Europe to the United States.

FERTILIZERS

Whereas ocean freight costs on potash to the Far East or Oceania are approximately the same from the United States as they are from Western Europe, it is a well known fact that it costs twice as much to ship potash across the ocean from the United States to Europe as it costs to ship the same product and quality in the opposite direction. For this reason European potash producers have long been able to secure a substantial part of our domestic market in the costal strip from Maine to Florida. The opening of the St. Lawrence Seaway may for the first time give European potash suppliers access to the important Midwest market. In general, a rail haul may add $10 to $15 per ton and an ocean freight another $10 to $15 per ton on U.S. potash exports. The significance of a freight advantage to a European supplier of, say $5 per ton is obviously very important for a product which sells for $20 per ton free on board plant (Southwest Potash Corp.).

AIR CONDITIONING AND REFRIGERATION

A general statement was made by several industry representatives that ocean freight rates on shipments from the United States to foreign destinations are not competitive with similar rates for shipments to these same destinations from foreign points of origin.

The PRESIDING OFFICER. The bill is open to amendment.

Mr. ENGLE. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENTS OF STATE AND JUSTICE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATION BILL, 1962—CONFERENCE REPORT

Mr. McCLELLAN. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7371) making appropriations for the Departments of State and Justice, the judiciary, and related agencies for the fiscal year ending June 30, 1962, and for other purposes. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of September 12, 1961, pp. 19116–19117, CONGRESSIONAL RECORD.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. McCLELLAN. Mr. President, as unanimously agreed to by the conferees, the bill provides a total appropriation of $756,422,550. This sum is $39,468,652 under the estimates, $20,047,560 over the 1961 appropriations, $5,122,500 above the House allowances, and $5,616,000 below the Senate recommendations for fiscal 1962. In my judgment the bill provides adequate sums to carry on the important activities of the departments and agencies. Unless Senators desire to ask about the bill, I do not propose to discuss any items in detail.

Mr. President, I ask unanimous consent to have summary tables on the bill printed at this point in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

SUMMARY OF BILL

Activity	1961 appropriation	1962 estimate	1962 House bill	1962 Senate bill	Conference action
State	$254,745,754	$289,675,000	$267,478,000	$272,695,000	$269,717,000
Justice	296,600,180	298,384,000	294,239,900	294,489,900	294,489,900
Judiciary	52,445,488	56,050,202	54,497,650	55,064,650	54,777,650

Mr. JAVITS. Mr. President, will the Senator yield for a question?

Mr. McCLELLAN. I yield.

Mr. JAVITS. Is this the bill upon which the Senate suspended its rule so as to provide for the extension of the life of the Civil Rights Commission?

Mr. McCLELLAN. The Senator is correct.

Mr. JAVITS. Is that amendment retained in the conference report?

Mr. McCLELLAN. It is.

Mr. JAVITS. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its action on certain amendments of the Senate to House bill 7371, which was read as follows:

Resolved, That the House recede from its disagreement to the amendments of the Senate numbered 24 and 26 to the bill (H.R. 7371) entitled "An Act making appropriations for the Departments of State and Justice, the Judiciary, and related agencies for the fiscal year ending June 30, 1962, and for other purposes", and concur therein;

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 25, to aforesaid bill and concur therein with an amendment as follows: In lieu of the date of "September 9, 1963" in said amendment, insert "September 30, 1963."

Mr. McCLELLAN. Mr. President, I move that the Senate agree to the amendment of the House to the amendment of the Senate numbered 25.

The motion was agreed to.

Mr. McCLELLAN. Mr. President, I believe that is the amendment about which the Senator from New York inquired. The House made a slight amendment, changing the date of the expiration of the Commission.

Mr. JAVITS. May we know the change?

Mr. McCLELLAN. From September 9 to September 30, 1963. I believe the House desired to have the term of the Commission expire at the end of a month. That is the amendment just referred to.

Mr. JAVITS. I thank the Senator from Arkansas.

ORDER FOR ADJOURNMENT UNTIL 9 A.M. TOMORROW

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate concludes its deliberations tonight, it stand in adjournment until 9 o'clock a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR COMMITTEE ON ARMED SERVICES TO MEET DURING SENATE SESSION TOMORROW

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Committee on Armed Services may meet during the session of the Senate tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

DISTRICT OF COLUMBIA APPROPRIATIONS, 1962

Mr. MANSFIELD. Mr. President, the hour of 5 o'clock having almost arrived, I ask unanimous consent that the previous order be vitiated, and that at 5 o'clock the pending business be made H.R. 8072, the District of Columbia appropriations bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of H.R. 8072, the District of Columbia appropriations bill.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 8072) making appropriations for the Government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending June 30, 1962, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Appropriations with amendments.

HELP FROM KANSAS TO VICTIMS OF HURRICANE CARLA

Mr. SCHOEPPEL. Mr. President, within the last several days, we have been reading about the terrible devastation which has been inflicted upon certain sections of our great country by Hurricane Carla.

I have just received information today that through the efforts of radio station KIRL of Wichita, Kans., my hometown, there has been effected what is called Operation Helping Hand. I am informed that five planeloads of bed-

ding, supplies, and clothing have been sent out of Wichita, Kans., as the first shipment.

The first shipment of supplies was sent to Dallas, Tex., and will be distributed there by the Salvation Army and other agencies which are taking care of some of the stranded individuals. I understand that additional supplies from all over the State of Kansas are still pouring into Wichita in response to the appeal for aid and help.

Many Kansans know full well the horrors and suffering of such disasters, having experienced the destructive force of tornadoes and floods in years past, and have demonstrated their deep understanding of the urgent needs of the unfortunate victims of this disaster.

It is commendable that people all over the country have a desire to help those in trouble cases like this.

THE GOVERNMENT AND THE ARTS

Mr. JAVITS. Mr. President, I call the attention of the Senate to a very interesting editorial in the Musical Courier of September 1961, entitled "Government and the Arts." I ask unanimous consent that it may be made a part of my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

GOVERNMENT AND THE ARTS

The Federal Government has been subsidizing certain industries like shipping and agriculture for a hundred years or more. But the arts—possibly the most financially unstable of all industries—remain outside the scope of Washington.

Most municipal and State governments also consider this industry outside their spheres of obligation. Thus, the arts are left to shift for themselves. Composers and writers are forced to take on added jobs to pay for their keep. Opera companies, symphony orchestras, and theatrical enterprises are obliged to live on financial breadcrumbs from year to year.

The United States is the only major nation in the world which does not directly subsidize the performing arts at least to some extent.

Every country in Europe—East and West—Australia, Japan, Argentina, Brazil, Mexico, virtually any country you can name accepts certain responsibilities toward its arts and artists.

We concern ourselves at this juncture not with government support of the arts in Russia and her satellites for there support has become control. The arts—as all activities—are dominated and run by the state. Art flourishes, but it is controlled art.

We must concern ourselves with the free nations which accept government responsibility in the arts. In most of these countries the theater, opera, symphony orchestras, citizens in the form of authors and composers remain private, individual, nongovernmental. They are aided by government funds and policies, not controlled.

Ironically, although our Government does not subsidize music for its own people, it does support music and the allied performing arts for others. Through the American National Theater and Academy and the State Department's cultural exchange program our Government has supported tours of American artists overseas. Through foreign aid we helped build new opera houses in Vienna, Milan, Istanbul, Berlin, and a host of other German cities. Our Voice of America beams music to other lands, and our information centers abroad offer musical scores and recordings—all at Government expense.

When, however, it comes to support—direct support—for theater, opera, ballet, symphonic music on our own shores—Congress says no. Perhaps more accurately—Congress says nothing. Numerous bills have gone before our legislators, but little has been approved, save for the cultural exchange program and the setting aside of nine acres of land along the Potomac for the construction of a National Cultural Center. That center would be built, however, with money received from voluntary contributions.

Thus, earlier this summer we found ourselves in the unusual, untenable position of accepting a $2.5 million gift from the West German Government for the new Metropolitan Opera House at Lincoln Center in New York. The wealthiest nation accepted a gift from a foreign government which has accepted much of our economic aid during the postwar years. Remarkable.

Is it enough these days for a President and his Labor Secretary to offer their good offices to help solve a financial crisis which threatened to close down the Metropolitan Opera for a season?

Is it enough to vocally support a National Cultural Center or to have poet Robert Frost read at the inauguration or to promote a series of concerts for young people and by young people on the White House lawn, as Mrs. Kennedy graciously has done?

These are sincere gestures, but are they serious enough?

Russia has promoted the arts to cold war status, using these expressions of the mind of man to promote its own theories. As Paul Henry Lang of the New York Herald Tribune, put it recently: "The Russians decorate a distinguished artist, giving him the title 'People's Honored Artist,' the title carrying very substantial emoluments. In these United States only Miss America can hope for such national accolade and financial rewards; we have no 38-22-36 composers."

The problem, as Lang would suggest, goes deeper. We accept the arts as part of the cold war struggle. Our artists are sent overseas to show others that the materialism which Russians claim has engulfed us actually has produced great musical and theatrical and scholastic talent. Our money is sent overseas in the form of foreign aid, to be used in the rebuilding of theaters and the support of European opera companies and symphony orchestras.

But we have not accepted the arts as something beyond that, as a most vital food for our minds, as a necessity to improve our society, as a means of deepening our own faith in the greatness and importance of man as a free individual.

The Education and Labor Committee of the House of Representatives recently passed legislation to create a Federal Advisory Council on the Arts; a meager but important start toward Government recognition of its cultural responsibilities. We hope that bill will pass the entire House and Senate and that other measures of support will follow.

A section of this issue of Musical Courier is devoted to the relationship of the arts to government: the arts in general, music in particular. Perhaps we can help shed some light on a most important topic.

Mr. JAVITS. Mr. President, the whole issue of Government and the arts is dealt with in this publication, and I hope that Members of the Senate will find the whole edition of great interest.

I am convinced that one of the critical aspects of this whole struggle for freedom in which we are far behind the times and very far behind our competition is the matter of some governmental program both for what we send abroad in the way of the artistic expression of our country and its appropriate development at home.

I am convinced that this can be done without interfering with that part of our artistic endeavor which is self-supporting through the box office and through philanthropists and foundations, and that governmental intercession is vital in order to realize anywhere near the full potential of giving as many of our people as possible the benefit of participation in the cultural and artistic development of the country.

I believe Congress is getting very close to acting on this matter, certainly in its aspects of competition with the Communist bloc. It is absolutely critical, and about as critical as anything we have done in our whole national establishment.

I hope very much that we may bring that about sooner than those of us, like myself and the distinguished occupant of the chair [Mr. PELL] and others who are sponsoring bills for the establishment of a proper role for a governmental role in the arts, dare hope it will be done.

I trust very much that reading this edition of the Musical Courier, the leading publication in this field, may encourage Members of the Senate to do some hard thinking about making their selection of legislative measures which are available, including my own, for a U.S. Arts Foundation.

FORCED RESIGNATION OF FOREST RANGER DON CARON

Mr. THURMOND. Mr. President, an article in the latest edition of the Wanderer, a National Catholic Weekly published in St. Paul, Minn., has brought to my attention one of the most deplorable situations it has been my misfortune to run into lately. The article relates the forced resignation of Mr. Don Caron from the U.S. Forest Service, after having served there for 15 years. Mr. Caron, who was a ranger in the Conconully district in the State of Washington, was directed by his superiors to discontinue writing educational articles unfavorable to communism which had been appearing in a local publication. In the directive which ordered Mr. Caron to discontinue these activities, the Regional Forester said that Caron was writing on a controversial matter that could cause alienation of groups or individuals. Rather than give up his anti-Communist activities, Mr. Caron has chosen to resign his position with the Forest Service.

Mr. President, it is incomprehensible to me why this man must be faced with the choice of either discontinuing his anti-Communist activities or giving up a Government job which he has held for 15 years. Why can he not continue both?

The directive which forced Mr. Caron's resignation states:

> The editorials reflect a zealous and almost fanatical patriotism, and an active effort to awake the public to the danger of communism.

How this could be the basis for terminating the employment of a person whose performance as district ranger was termed by his immediate superior "very good," remains a mystery. It seems to

me that Mr. Caron can justifiably be accused only of being a patriotic American, dedicated to fighting the menace of communism, who is willing, as the article relates, to devote his off-time hours to preparing articles in an effort to awaken his fellow citizens to the menace of communism. If this action is tolerated, the jobs and the livelihood of many other patriotic Americans are in jeopardy also.

Mr. President, I ask unanimous consent that the article from the September 7 edition of the Wanderer, entitled "Communism Fighter Refuses 'Gag'; Quits Forest Service," be printed in the RECORD at this point in my remarks. I have contacted the Forest Service, and have been informed that the article is substantially correct.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

COMMUNISM FIGHTER REFUSES "GAG"; QUITS FOREST SERVICE

In Okanogan, Wash., a professional forester who once was told he had "a bright future" with the Forest Service, resigned from the Service late last week rather than be muzzled in his fight against communism.

Don Caron, Conconully District Ranger who has spent 15 years with the Forest Service in the Okanogan District, submitted his resignation after the Portland regional office, supported by the local administration of the Okanogan Forest, directed him to discontinue writing educational articles against communism which appear weekly in the Okanogan Independent. (See editorial, "Citizen Principles.")

In being directed to stop his articles on communism, by Regional Forester J. Herbert Stone, Caron was told he was writing on a controversial matter that could cause alienation of groups or individuals. The directive to Caron added: "The editorials reflect a zealous and almost fanatical patriotism, and an active effort to awake the public to the danger of communism. The opinions, views and attitudes expressed have much in common with those, as reported by the press, held by the currently controversial John Birch Society."

Caron, one of the founders of the Okanogan County Anti-Communist League, denied an affiliation with the John Birch Society, or using any of that group's material for his writing. He said he had been studying communism for 2 years, and uses material for his weekly discussion of communism from the House Un-American Activities Committee, the Senate Judiciary Committee, the Senate Internal Security Subcommittee, and the Federal Bureau of Investigation. "Other sources include the American Legion, the American Bar Association, and the CONGRESSIONAL RECORD," Caron added.

Caron denied any violation of the Hatch Act forbidding political activities by Government employees, saying: "A recent decision by the Supreme Court has specifically placed communism outside the realm of politics."

His resignation, dated August 24th, is effective September 1, and was tendered after his request for permission to continue writing his educational column was denied by the regional office.

One of the prime reasons given in denying Caron's request for permission to continue his column is the demand upon an employee's time by the Forest Service. "We do not feel you can do justice to both causes," the letter stated.

The denial was recommended by Okanogan Forest Supervisor F. J. Moisio because Caron's writings were controversial. His performance as District Ranger was termed as "very good" by Moisio, who said the deposed ranger had not been doing his anti-Communist work on Government time "that I know of."

In his letter of resignation Caron stated: "I do feel that your decision is an infringement upon my rights as a citizen in that it will not allow me freedom of speech during my nonworking hours. The fact that I am a Government employee should in no way change my status as a full citizen."

Mr. THURMOND. Mr. President, I ask unanimous consent that the editorial concerning this matter, which first appeared in the August 31, 1961, edition of the Okanogan Independent, of Okanogan, Wash., and was reprinted in the September 7, 1961, edition of the Wanderer, and a copy of a letter which I have written to the Chief of the Forest Service, asking for a full explanation of the matter, be printed in the RECORD also.

There being no objection, the editorial and the letter were ordered to be printed in the RECORD, as follows:

[From the Wanderer, Sept. 7, 1961]

U.S. FORESTER MUZZLED—WHY?

(Reprinted from the Okanogan Independent, Okanogan, Wash., Aug. 31, 1961)

An Okanogan man pounded 15 years' public service down the drain and hammered the stopper over it last week—all because of principle and his devotion as a first-rate citizen of his country.

Elsewhere in this issue [p. 1, "Communism Fighter Resigns Forest Service"] is a story of the resignation of Don Caron from the Forest Service, a sad and deplorable ending to the years he has devoted to this work, all on the Okanogan forest. He started with seasonal work at Chelan while going to college at a time when that area was included as a part of this forest, and since becoming a full-time professional forester, has continued on here in various capacities. Most recently he has been ranger on the Conconully district.

Caron resigned. He was not fired. Why then the tears?

Readers of the Okanogan Independent are aware that he had been contributing a weekly column to the paper discussing communism. This column has not been political in nature, but educational in concept, prepared from information by Government agencies, investigating committees of Congress, the FBI, and like groups. All of his background material is a matter of public record. But recently his superiors in the Forest Service sought to clamp a muzzle on Caron and a directive from the Portland regional office told him in effect to cease and desist his columns. Why?

A variety of reasons were given—all of which leak like a sieve—especially in the light of documented proof of the Communist threat to the United States.

First Caron was told he was in violation of the Hatch Act forbidding political activity by Federal employees. He was no such thing. Next he was told that the subject of communism is controversial and he shouldn't be mixed up in it.

The final reason given in asking him to stop his fight against communism was the demands which the Forest Service places upon its employees, and the fear that it might take too much of his time. This is preposterous nonsense aimed at a forester whose annual report cards have been highly complimentive of the devotion and skill with which he has handled his assignments.

What are the real reasons, then, for directing Caron to stop writing his articles? We wish we knew. It is difficult to think that Forest Service objectives for our country could differ greatly from those of any sincere and dedicated citizen. The esteem in which many hold the Forest Service may suffer because an employee is refused the right of free speech on his own time in performing a service to his country and its people, and reduce his status to less than that of a full citizen.

For 2 years Caron has been reading about, and studying communism. As an upshot of the knowledge he has gained, he was among many prominent people here who formed the Okanogan County Anti-Communist League. From this educational organization has grown many study groups of people who wish to learn more of the methods and evils of communism that they might more effectively fight this cancerous philosophy. We cannot think they are all ignorant peasants.

Caron is not asking for his job back. We are not asking that his resignation be refused. As his letter of resignation said, "If the columns were stopped tomorrow for other reasons, my decision would be the same * * * they are only one phase of the total activity."

We wonder who pulled the strings.

SEPTEMBER 13, 1961.

Hon. RICHARD E. MCARDLE,
Chief, U.S. Forest Service,
Department of Agriculture,
Washington, D.C.

DEAR MR. MCARDLE: An article in the September 7 edition of the Wanderer has brought to my attention the forced resignation of Mr. Don Caron, who formerly served as the Conconully District Ranger in the Okanogan Forest in the State of Washington. According to the article, Mr. Caron resigned as the result of a directive issued to him by the Portland office ordering him to discontinue his controversial activities in writing an anti-Communist column in a local newspaper. I am enclosing a copy of the article for your further information.

I would like to know by what authority the regional forester has demanded that Mr. Caron discontinue this activity. From the information furnished in the article, which, according to your office is substantially correct, it seems to me that Mr. Caron is a patriotic American dedicated to informing himself and the public as to the menace of communism. I cannot conceive of how this can in any light be termed controversial, and I would therefore like to have a full explanation of the matter.

With best wishes,

Sincerely,

STROM THURMOND.

ADJOURNMENT UNTIL 9 A.M. TOMORROW

Mr. MANSFIELD. Mr. President, if there is no further business to come before the Senate at this time, I move that the Senate now adjourn until tomorrow at 9 o'clock a.m.

The motion was agreed to; and (at 5 o'clock and 3 minutes p.m.) the Senate adjourned, under the order previously entered, until tomorrow, Thursday, September 14, 1961, at 9 o'clock a.m.

NOMINATIONS

Executive nominations received by the Senate September 13, 1961:

U.S. ATTORNEYS

John W. Bonner, of Nevada, to be U.S. attorney for the district of Nevada for the term of 4 years, vice Howard W. Babcock.

Harry G. Camper, Jr., of West Virginia, to be U.S. attorney for the southern district of West Virginia for the term of 4 years, vice Duncan W. Daugherty.

EXTENSIONS OF REMARKS

The Right To Know

EXTENSION OF REMARKS
OF
HON. CLARE E. HOFFMAN
OF MICHIGAN
IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 13, 1961

Mr. HOFFMAN of Michigan. Mr. Speaker, for more than 5 years a subcommittee of the Committee on Government Operations, of which the gentleman from California [Mr. Moss] is chairman, has been holding hearings and issuing reports in an endeavor to establish the practice of requiring the executive departments to disclose to congressional committees, and perhaps Congressmen, information which is necessary to determine whether new legislation is needed, and, if needed, the type of legislation which will best serve the public interest, and also to learn the effect which existing legislation had, or is having, upon the general welfare.

This issue is as old as the Government itself.

In my humble judgment, the Congress, through its committees, and perhaps individual Congressmen, is entitled to be informed by the executive departments of all information needed to enable the Congress to adequately serve the people.

Several times, as the only Republican on the special subcommittee, it has been suggested by me that the subcommittee or its counsel frame a series of questions calling for information vitally needed to enable the Congress to properly execute its legislative functions.

Those questions should be submitted to the Department and, if refusal is made, then the subcommittee should report to the full committee, which should in turn call the situation to the attention of the House, and if, in the judgment of the House, the questions were proper, the refusal to answer not justified, the issue should be referred to the Attorney General for contempt proceedings, or the House, itself, should cite those responsible for the denial of information to appear before the House and make defense to a contempt charge, or submit to whatever procedure the House might determine to be necessary.

The matter could then be brought before the U.S. Supreme Court, whose function it is to determine disputes between the legislative and the executive departments.

The special subcommittee has been highly critical of the past administration. When a new administration came into power, the same position as to the disclosure of information by the executive departments which was established when the issue was first presented to our first President was adhered to.

In fact, the Kennedy administration went further in its refusal than perhaps did the previous administration.

Still more recently, the Secretary of Defense has taken a firm position that certain information on which the disciplining of General Walker was based would not be disclosed.

In my judgment, the limitation or the extent of the right of the legislative branch to information in the hands of the executive departments will never be determined until the Supreme Court has made a decision.

Commodore John Barry

EXTENSION OF REMARKS
OF
HON. HUGH L. CAREY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 13, 1961

Mr. CAREY. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

COMMODORE JOHN BARRY

I beg the indulgence of the House for a few moments in order to pay tribute to one of the great heroes of American history, and one of the stoutest sailors who ever bestrode a quarterdeck. John Barry, "the fighting commodore," was born in the tiny village of Tacumshane, County Wexford, Ireland, in the year 1745, the exact date of his birth being unknown. Those were the days when all Ireland groaned under the oppressor's heel and the lot of the genuine sons of the soil was foredoomed from birth. There was but one hope for the enterprising: to quit their native land and seek their fortunes under more clement skies, under kindlier governments. More than half a million Irish are said to have emigrated during the first half of the 18th century alone, the greater part to take service as foreign mercenaries. There was plenty of fighting going on in those days, and battle is a milieu in which an Irishman always feels quite at home.

To young Barry the sea, lapping at his door on Wexford Harbor, sent an imperative call; the lad heard and answered, and thenceforth, to the end of his long life, the sea remained his first, last, and enduring love. At the age of 10 he shipped as cabin boy on a merchantman, carrying with him, his biographer tells us, "hatred of the oppressors and recollections of the misery and want of his childhood years, which stayed with him throughout his life." And to the end of his days his purse was ever open to his poverty-stricken kindred from the old country.

By the year 1770 he had settled in Philadelphia, discovering in America, we are told, "the land of his desire." The outbreak of the Revolution found him with the certificate of master mariner, married to an American wife and a well-known and respected figure in the city of his adoption. He hastened to offer his services to the State and country which had taken him in and whose hospitality he was so richly to repay. Placed by the Continental Congress in command of the brig, *Lexington*, one of the first ships of the infant American Navy, Barry captured, on April 17, 1776, the small auxiliary ship *Edward*—the first capture, in actual battle, of a British naval vessel by a regularly commissioned American warship. On August 10 following, Barry was placed by resolution of Congress seventh in order of commission on the list of captains. Incidentally, it might be pointed out that, contrary to popular belief, Barry never attained the rank of commodore save by courtesy. By the end of his active career, however, he had become the senior captain in the U.S. Navy and bore, by common consent, the courtesy title of "Commodore" until his death. Whenever, in the years following the establishment of independence, the word "commodore" was heard in American naval circles it could mean but one man. Again, as his able biographer, the naval historian, William Bell Clark, observes, "John Barry was not 'the first officer appointed to the first vessel purchased' by the Continental Congress. His initial service was far more important—he outfitted the first Continental Fleet. He was never the senior officer of the Continental Navy, but his record through the Revolution was consistently finer than any of his naval contemporaries save John Paul Jones. And he can be classed on a par with Jones." "He was not," writes Mr. Clark, "'the Father of the American Navy' in the sense of being its founder, but his devotion to that navy, whose first ship he launched and equipped, coupled with the fact that he trained many of the lads who later added glory to its history, entitles him to the appellation in the modified form it was first bestowed upon him in 1813."

I cannot, of course, in this brief talk enter into a discussion of the brilliant engagements which starred Barry's brilliant career in the Revolution and the two unofficial wars against the Algerine pirates and the French which followed. Suffice to say that his ships, notably the *Raleigh*, the *Alliance* and the *United States*, shine forever luminous in the pages of American naval history.

He died full of years and honor on the 13th day of September, 1803. He sleeps in old St. Mary's Churchyard in the city and country of his adoption, which he so faithfully and nobly served. A contemporary poet wrote of him:

"There are gallant hearts whose glory
Columbia loves to name,
Whose deeds shall live in story
And everlasting fame.

But never yet one braver
Our starry banner bore
Than saucy old Jack Barry
The Irish commodore."

Death Takes Distinguished West Virginian

EXTENSION OF REMARKS
OF
HON. CLEVELAND M. BAILEY
OF WEST VIRGINIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 13, 1961

Mr. BAILEY. Mr. Speaker, it is with sadness that I advise the House of the death of the Honorable Clarence W. Meadows, a former Governor of West Virginia, who died at the young age of 57 of a heart attack in Clifton Forge, Va.

I extend my sincere and heartfelt sympathy to his grieving widow and children.

Governor Meadows served as the chief executive of our State from January 1945 until January of 1949.

His career as a lawyer and a public servant was distinguished.

"Improving the Urban Environment"—Address by Senator Williams of New Jersey

EXTENSION OF REMARKS
OF
HON. JOSEPH S. CLARK
OF PENNSYLVANIA
IN THE SENATE OF THE UNITED STATES
Wednesday, September 13, 1961

Mr. CLARK. Mr. President, no member of this body has contributed more to legislative progress on urban matters than the junior Senator from New Jersey [Mr. WILLIAMS]. He is the author of two outstanding legislative breakthroughs written into this year's housing bill—one launching a new program of aid to mass transportation, the other a new program of assistance to local communities in the preservation of open space.

At the recent conference of the American Municipal Association in Seattle, the Senator from New Jersey [Mr. WILLIAMS] delivered an address which is a cogent and penetrating analysis of some of the current dilemmas facing urban America. I ask unanimous consent that the text of this address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

IMPROVING THE URBAN ENVIRONMENT

(Address by Senator HARRISON A. WILLIAMS, Democrat, of New Jersey, to the annual conference of the American Municipal Association, Seattle, Wash., August 28, 1961)

I regard my task today as rather formidable, as a layman charged with the task of telling this assemblage of the Nation's foremost body of expert practitioners how to improve the urban environment.

But if I may, I'd like to plunge ahead and say that if there is one characteristic that stands out about our cities and towns it is our general complacency toward them.

I think we would agree that most of our cities do not fulfill our conception of our own private Brazilia. In fact, when you get right down to it, they leave much to be desired. Slums, traffic congestion, city crime, minority group ghettos, suburban sprawl, polluted air, roadside slum towns, neon nightmares—most of our cities are scarred with them.

Yet so few people ever seem to complain about the ever-present eyesores in the urban environment. As a nation of mostly urban people, we seem to have become almost insensate to the staggering ugliness and squalor surrounding us.

A commentary on our times can be seen in the scholarly books that are being written, jam-packed with statistics on urban living, that project the statistics into future and usually disturbing trends. But notice how often you see a statement in the preface of the book that says: "The conclusions or projections made in the succeeding chapters are based on the assumption that no significant public policy changes will occur from those public policies of the present."

At the other end of the scale from the disinterested chronicles of our urban perdition are the urbane critics.

For example, Frank Lloyd Wright, who when asked to come to Pittsburgh and look at its problems, is said to have replied to the city fathers: "Gentlemen, there is only one solution. Abandon it."

I think, however, that we wouldn't be here today if we didn't have hope for the urban future of America. Certainly the task presents the greatest challenge that any of us could ask for. I think that in a very real sense the mayors and officials charged with the development of our urban and metropolitan areas are on the frontlines of the cold war battlefield.

When you stop to think that the metropolitan areas account for 75 percent of the Nation's economic productivity, it becomes apparent that the decisions affecting the growth of development of these areas have a major impact on our ability to meet the grave international challenges of the sixties.

I would like to talk today about several important but more or less random problem areas that loom large in our efforts to improve the urban environment.

HOUSING AND URBAN RENEWAL

The first is housing and urban renewal. A decade ago we made a national commitment to eliminate our slums, to replace them with new housing and a better environment. It was a great and inspiring idea, and after a slow start, we are now ready for full-scale action, with the new authorization of the Housing Act and with a new and determined administration.

For this reason, I think it is appropriate for us to stop a moment to review our past accomplishments. We have produced a great deal that has had good and lasting value, but at the same time, we have all seen mammoth public housing projects that look more like penal institutions than homes for people. We have seen months and years of enormous effort result in a vapid, almost sterile civic centers and urban renewal projects.

I think the moral we can draw from our past experience is that money isn't everything.

Now that we have $2 billion to work with, thanks to the Housing Act, I think it is of greatest importance to redouble and reemphasize our concern for the esthetic and human values involved in any program to rebuild our cities.

For a long time I think it is fair to say that we scarcely even recognized that there even was a problem in reconciling the old and the new. But the storms of protest over the destruction of treasured buildings that had a flavor of charm or history have made us more conscious of this problem.

Perhaps some of you saw the dramatic photograph not too long ago of the group of Greenwich Villagers who painted the white crosses of demolition in their eyeglasses. It was a haunting sight.

Fortunately, under the able new leadership of Dr. Weaver and as a result of the 1961 Housing Act, I think we will begin to see a much more vigorous exploration of the potentialities of rehabilitation and restoration. The dividends—both financial and esthetic—can be considerable, as you can see from a walk in Georgetown, in the Nation's Capital.

However, there is no getting around the inherent conflicts involved in reconciling the old and the new. In some cases, good sound buildings may have to give way for the sake of the overall design of the urban renewal project.

As Dr. Weaver said in a speech not too long ago in New York, "Where there is an occasional sound structure in a sea of hopeless ones, it is not feasible—or in my opinion desirable—to destroy a redevelopment plan by an inflexible application of sound principle."

And then there is the problem that arises when we do try to preserve and restore existing structures in an urban renewal project.

This is the design problem of making the new harmonize with the old. Sometimes the contrasts of old and new are quite effective. Other times they strike a jarring and discordant note.

The other day I saw a photograph of a new high-rise apartment that was developed privately on Beacon Street in Boston. While I haven't seen it in person, the picture struck me as one of the best reconciliations of old and new that I have seen in some time. The staid four-story townhouses on the street feature prominent bay windows, and the apartment building, rising next to them on the street carried out this bay window effect by constructing the front walls and windows of each apartment on prow-shaped angles, thereby giving a bay window motif to the whole face of the apartment building.

Philadelphia has also been giving great attention to the design problem of blending old and new. Its Washington Square East renewal project, which includes the very historic area of Society Hill, put five developers into competition not only on the inherent merit of the architectural designs, but also on the extent to which they fit into and enhance the surrounding environment. The competition was taken so seriously that the five developers spent some $260,000 on their own on the site and architectural plans.

Similar kinds of problems can be seen in the area of public housing.

I was struck, for example, by the renewal program for southwest Washington. In one of the blocks that has been completed, there is a high-rise apartment separated by a mall from a series of rather high-priced townhouses, painted in various pastel colors. Directly across the street from these townhouses is a similar series of attached public housing units, with a uniform and rather drab brick facade. And of course wire fences around each small backyard.

What pains me about this above-average-looking public housing project is that for only slightly more money, the appearance of this project could have been made every bit as attractive—and as much of an asset to the whole area—as the luxury townhouses right across the street.

I have been disturbed by the legislative restrictions written into the public housing law requiring maximum economy-type construction. In other words, keep the housing bone bare, no matter how much of a community eyesore is produced.

Added to this are regulations that have accumulated like barnacles over the years. They are enough to sap the initiative and imaginative energy of the most dedicated housing official. I knew that the new Public Housing Commissioner, Mrs. McGuire, is determined to breathe new life and imagination into this program, and I am confident that we are going to see wholehearted encouragement of better public housing from now on.

The Housing Act also provides $5 million for demonstrations in low-income housing, which could be of great help in putting a better face on a very important program.

Not too long ago the New York Times carried a front page article reporting on a recommendation made by Elizabeth Wood of Chicago that we start building English-style

pubs in our public housing projects, the way they do in England and the Scandinavian countries.

Of course I can hear someone asking whether the tenants of public housing in this country would care for darts and warm beer. But the principle behind this proposal is an important one—to provide a convivial meeting place where people can gather to enjoy themselves, rather than feed in isolation on their miseries or frustrations.

Obviously this is but one of many possibilities of dealing with the social as well as the physical aspects of public housing.

OPEN SPACE

Closely related to housing and urban renewal is the problem of open space, both in the cities and at the suburban fringe.

As a part of the Housing Act, Congress passed the major provisions of the open space bill I had introduced earlier this year, providing up to 30 percent in grants to State and local governments for the acquisition and preservation of open space. We now have a program of $50 million for this purpose.

I think it goes without saying that we need much more open space in our cities, and we need open space of all kinds—parks, playgrounds, recreation areas, intimate islands of green, stately malls, shop-lined plazas, wooded pathways, and cloisters—to meet the multitude of human needs in a city.

I recognize that providing open space in cities means a loss of tax ratables. But I am convinced that open space in our cities can be not only esthetically rewarding, but good business too.

For one thing, if well placed, open space can materially enhance adjacent property values, and curb the spread of deterioration and decay. As my good friend from East Orange, Mayor Kelly, is fond of saying: "When the amenities go, blight moves in."

Business and community leaders are also beginning to realize that commercial attractions alone will not lure many suburban housewives, if they must continue to endure the slings and arrows of outrageous annoyance in the downtown areas. Kalamazoo, Mich. has done it, San Francisco has done it, and I earnestly hope more and more cities will begin to explore the possibility of converting some of their tension-filled thoroughfares into tree-lined malls for exclusive pedestrian use.

Open space at the fringe is equally important, for the onrush of urbanism is gobbling up more than a million acres a year. Thus each year we push nature's horizon farther and farther away from more and more people.

Some people seem to think that this is mostly a problem for the heavily populated eastern seaboard—that megalopolis of 31 million people stretching from New Hampshire to Newport News.

Indeed it is a problem for us in the East. But there is a real opportunity for the many smaller rapidly growing urban areas all over the country to acquire open space out beyond the fringe at reasonable cost so that when the growth and development and expansion does come, the open space will be there as an integral part of the total community.

And we need the open space for a variety of reasons—for recreation needs that cannot be met by the backyard or a weekend drive to the country. We need it to prevent the spread of gray areas, to enhance adjacent property values, to provide relief from the monotony of continuous suburban development, to serve as buffers to keep communities from merging into an indistinguishable blob, to protect stream valleys, forest preserves, flood plains, and prime agricultural land.

We influence land use patterns when we preserve land for open space; we influence it when we decide to subdivide the land for residential development.

One problem that I don't think has received sufficient attention is the nearly total commitment of nearly all our suburban communities to uniformly low-density residential development.

We seem to have given very little thought to the fact that low-density sprawl means greater costs for more schools, more roads, more public facilities of almost every kind, and less open space. Then, of course, there will be the repair bills to pay when all these relatively new facilities begin to wear out.

A very revealing illustration of the comparative costs of different types of land use can be seen in the proposal of a developer to cluster some 250 homes on 6 percent of the 516-acre Whitney estate in Old Westbury, Long Island. The land was zoned 2-acre, which means with conventional development the entire tract would have been taken up by the 250 houses, and the land development costs, for earthwork, street paving, drainage, sewers, utilities, landscaping and so forth, would have been $2.7 million. By clustering the homes on only a small part of the tract in a series of two- or three-family townhouses, each with a private patio, the land development costs for the same facilities would have been $1.1 million—a saving of $1.6 million. And 94 percent of the very lovely land would have remained in its natural state—to the benefit of the residents and to the benefit of the town which would have gained from the enhanced value of the adjacent property.

I am sorry to report that this proposal did not gain the approval of the town fathers, but I think it illustrates the important economic implications that lie behind the zoning ordinance.

I am sure all of you have experienced occasions where prime industrial land needed for the future development of your area has been nibbled away by residential development because funds weren't available for acquisition on the land. Then there is the problem of acquiring land for highways, which could be done in advance at tremendously less cost, but usually isn't because of lack of funds or statutory authority.

Edward Higbee, in his informative book, "The Squeeze," described the costs involved in building a highway through a small community out on Long Island. Just before the suburban development was built in the early 1950's, he writes, the land "might have cost between $2,000 and $4,000 per acre. Once it had been covered with split-levels, the condemnation charges had risen to perhaps $50,000 per acre—and it takes 60 acres per mile to build a modern expressway. To cut a 10-mile swath through settled communities, in order to make roads leading to other newer communities beyond, can cost as much as $30 million."

At $4,000 an acre 10 years ago, the land for the same 10 miles of highway would have cost only $4 million.

I think it is fair to say that the subject of urban land use is overripe for serious study at all levels of Government.

It might interest you to know that I had the pleasure of introducing an administration proposal, in conjunction with my open space bill, which would have provided loans for the acquisition of land for future public or private development. Unfortunately, this proposal received no serious consideration, largely because there were so many other things to talk about during the hearings on the housing bill.

This proposal was directed toward the kinds of problems I have mentioned—the need for land for future industrial development, for future highways, schools, parks and so forth. I think we ought to be giving much more thought to this problem than we have been, and I hope some consideration will be given next year.

URBAN TRANSPORTATION

Finally, I would like to touch on the problem of urban transportation. I don't think I will be saying anything to cause the rocks to fly, but I will say that someday we—all of us—have got to start coming to grips with that wonderful and infernal thing we call the automobile.

It is one of the great paradoxes that the invention that gave more people more physical freedom than anything else in our history is now on the verge of tying almost all of us into paralyzing knots at least two times a day.

Probably no one has ever devised a more cunning device of human torture—in peacetime at least—than the traffic jam.

And its economic implications are staggering. Each year we lose more than $5 billion in traffic jams, through wages lost, lower retail sales, higher costs for moving freight, overly rapid depreciation of vehicles, and so forth. The cost of accidents is even greater, estimated at about $6 billion a year.

This problem of traffic congestion in our larger urban and metropolitan areas manifestly cannot be solved by highways alone, as the President noted in his housing message to Congress.

But even if we were willing to take the tax increases in an effort to meet all our transportation needs with an urban highway program averaging some $10 million or more a mile, there is every possibility that the remedy would only succeed in killing the patient—by replacing valuable tax ratable property with nontaxable concrete and asphalt, by creating huge downtown parking demands which would further remove land for commercial and cultural purposes, and by slowly carving away the very activities that created the demand for access in the first place.

I don't think there is any question that we need limited access highways to meet urban transportation needs that can be met in no other way.

But improvement of inherently more efficient and less space-consuming forms of modern mass transportation is an absolute necessity if our cities are to survive the onslaught of the automobile and continue as viable structures for human existence and enterprise.

The only alternative is a massive decentralization of our metropolitan areas, which, if pursued, could easily cover every square mile of land in the country with developments within a few hundred years, given our present population growth rate.

Even the short-range future gives cause for concern. The urban population today is over 100 million, and 90 percent of our national population growth will occur in and around our urban areas. The number of vehicles on the road today is around 70 million. By 1975, that number is expected to climb to well over 100 million.

At the same time, we have been suffering a serious decline in ridership on all forms of mass transportation. Since 1950, the decline has been 38 percent. More than 300 smaller towns have lost all forms of public transportation completely, despite the fact that half of our population is not able to drive: the young, the old, the infirm, and those too poor to own an automobile.

Because of these trends, there has been a tendency to assume that this is a dying

and unnecessary service, not worth preserving.

But it is important to point out that most of this decline has occurred in off-peak hours and on weekends. The decline in rush hour use has been much smaller, and in many areas is showing an upturn.

But we have tended to overlook the fact that if we allow this service to go under, the alternative costs would be staggering. For example, your own organization has estimated that if the five cities of New York, Chicago, Boston, Philadelphia, and Cleveland were to lose just their rail commuter service, it would cost $31 billion with 30-year, 4 percent financing to build the highways necessary to serve a comparable number of people.

The trouble is that this loss in passenger revenue, combined with rising operating costs, is making it harder and harder for the railroad and bus companies to stay alive, without taking retrenching action, which merely makes the service less desirable.

Despite the almost total lack of imaginative effort in this field, there are some illustrations of the potential for progress if funds are made available.

Several years ago, the Boston and Albany Railroad, down to about 3,000 riders a day on its Highland branch line, was petitioning strenuously to eliminate all its service. The Boston MTA took over the 11-mile line, linked it up with the subway system, turned it into rapid transit-type service, and is now pushing the figure of 30,000 riders a day, despite the fact that it isn't really rapid service operating on an exclusive right of way.

Philadelphia entered into a contract with the Pennsylvania Railroad to provide more frequent service at lower fares on a line running out to Chestnut Hill. The experiment proved so successful, increasing ridership by some 30 percent and reducing by 400 the number of cars coming into the downtown each day, that the program is being expanded to other lines, and now the counties are so interested that they plan to enter into a compact with the city to improve rail transportation for the region as a whole.

Chicago can point to two significant developments. The first being the almost unprecedented phenomenon of a railroad making money on its commuter service. Not much money, to be sure, but in the black. That railroad is the Chicago and Northwestern, under the aggressive, far-sighted leadership of its chairman, Ben Heineman, who is providing modern, clean and courteous service to the commuters.

The second is the rapid transit system operating in the median strip of the Congress Street Expressway. This line is operating at only about 25 percent of its capacity, but it is already carrying more rush-hour traffic than the 8-lane highway, which is operating at full capacity. The value of this transit line is immeasurable, when you think of what would happen if the transit riders were forced to their cars on this already crowded highway.

Many other cities are far advanced in the planning stages, and with the acceptance by the Federal Government of its proper responsibility in this problem of national concern, and with the full efforts of our State and local governments, we should begin to get the creaking wheels turning again.

As I stated in the beginning, I have chosen just some of the problem areas that concern me. There are many others, from water pollution to family relocation.

In discussing these particular problems, I should stress that they are inter-related and, indeed, inseparable problems. It is my hope that the Housing and Home Finance Agency will begin to coordinate its programs more effectively in the future, so that they help to complement one another, rather than conflict with each other as they sometimes do. Creation of a Department of Housing and Urban Affairs should go a long way toward providing that coordination, and I hope that someday we will see all our Federal aid programs geared into comprehensive, area-wide plans for the urban and metropolitan areas—plans for the people, of the people, and by the people whose lives are being affected by them.

If this planning and coordination is achieved, I think we will have a fighting chance of becoming the masters of our urban destiny, rather than the victims of it.

Tribute to David Sarnoff

EXTENSION OF REMARKS

OF

HON. E. L. BARTLETT

OF ALASKA

IN THE SENATE OF THE UNITED STATES

Wednesday, September 13, 1961

Mr. BARTLETT. Mr. President, on Wednesday, August 30 it was my privilege to be a guest of my Senate colleagues Senators AIKEN, MAGNUSON, PASTORE, JAVITS, and KEATING as tribute was paid to Gen. David Sarnoff, chairman of the board of the Radio Corp. of America. The occasion of the tribute was the 55th anniversary of General Sarnoff's participation in the field of electronics.

Mr. President, I ask unanimous consent that the introductory remarks of Senator AIKEN in presenting General Sarnoff to the assembled guests at this luncheon gathering and the text of the general's response be printed in the RECORD.

It has been my pleasure to hear many outstanding speeches by our Nation's leaders and I do not know that I have ever been more moved than I was on this occasion as I listened to David Sarnoff. It is with pride I present his remarks.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

INTRODUCTORY REMARKS BY SENATOR AIKEN

General Sarnoff, Mrs. Smith, gentlemen, we are not proceeding according to plan. Some considerate person has insisted on a live quorum over in the Senate and that necessitates a change in our plans.

Twenty-one years ago, I attended the World's Fair in New York as part of the Governor's Conference of the United States. While we were there we had a demonstration of something new. It was new to all of us—and it was called television. I don't remember what the program was but I think the Governors themselves were part of the program. What I remember best about it is that the receiving set was upstairs and the transmitting equipment was downstairs, with a floor between us. Now that seemed like a whale of a distance in those days to transmit a picture. It isn't so far now. But I didn't know at that time that the man responsible for that new and promising innovation would be honored by the Members of the Senate as their guest here today. But it certainly is appropriate that he should be.

I'm not going into his background, which is known not only to everybody here in the United States, but all over the world as well. At the age of 15 he got into his only good suit and went out and got a job. Twenty-four years later, and several suits later, he became president of the RCA and then chairman of the board. But I do want to call attention to one thing. He was first educated in a public school, but thereafter he attended the Sarnoff school—which is the best in the world, scientifically speaking—and he plans to attend that school for many years to come. Even though his formal education ended with the public schools in New York, he has been honored by receiving 21 degrees from the best colleges in our country.

Now that is a record for men, I guess. But I want to tell you, General, that you're in the presence of a champion here today because our colleague, Senator SMITH from Maine, has 36 degrees, or she did have 36 the last time I counted them. So I'm sure that you are honored by having a world's champion at this luncheon today.

This is the occasion of General Sarnoff's 55th anniversary in communications. He has been honored by scientific, industrial, military, civil, cultural groups, and now I think it's a great privilege that we Members of the U.S. Senate also honor him at this luncheon. We had planned to have my colleague, the chairman of the Commerce Committee of the U.S. Senate, introduce some of the Senators who then would be called upon for brief remarks. However, we know what the Sergeant at Arms does to us when we don't answer rollcalls and, in order to keep us all out of jail, or out of what correspondents to jail in the Senate, I'm going to ask General Sarnoff to speak to us right now instead of later, had we gone through with the program as planned. [Applause.]

REMARKS BY DAVID SARNOFF

Mr. Chairman and distinguished Members of the U.S. Senate. I am unprepared for this sudden projection into the arena, and there are times in one's life when the tongue is a little dry and the mind a little overwhelmed. In the language of my profession, that makes for a poor transmitter—and that describes me at this moment. However, I am comforted by the knowledge that your receivers are unimpaired and in good tune. Therefore I would like, Mr. Chairman, with your permission, to transmit for a few minutes on the frequency that originates in the heart, without interference from that of the mind.

During the years I have spent in the electronics industry, which is worldwide in its scope, I have had to travel widely both at home and abroad. Of all my trips, four stand out in my memory and they will remain with me as long as I live. I would like to say a word or two about each of these four trips—not because I would presume upon your patience to indulge in reminiscence, but because I think that these trips, together, symbolize the spirit, the meaning, the purpose, and the opportunities of America.

My first trip was made in 1900 when I left with my mother and two brothers the country of my birth, Russia. I was then 9 years old and the oldest of the children. We sailed across the Atlantic Ocean in a small and slow ship. We traveled in the steerage and it took us more than a month to arrive in the United States—the wonderful new land of opportunity. When I arrived in New York, I was unable to speak or understand a word of English. I was in a new world, in a new society, a new people. However, it didn't take me very long to reap all the advantages of America's fine and free public school system—nor did anybody interfere with me when I worked as a news-

boy before and after school hours, in order to help support myself and my family.

That was trip No. 1 in my memory.

Trip No. 2 came only 9 years later. As a boy of 18, I sailed on the S.S. *New York* of the American Line, from New York to Southampton, England. This time I traveled as the Marconi wireless operator on the ship. I was the only operator aboard, for it wasn't until the *Titanic* disaster in 1912 that a law was passed by the Congress requiring each passenger ship to carry a complement of wireless operators who could serve around the clock. So there I was, 9 years after arriving in this country, serving as the Marconi wireless operator on a first-class passenger liner, with a first-class cabin all to myself, with a uniform and gold braid, classified as a ship's officer, messing with the captain and the other officers, and entertaining and being entertained by the first-class passengers.

That was another trip for my memory.

My third trip, 20 years later, in 1929, was on the SS *Aquitania*. I left New York for Paris as an assistant to Mr. Owen D. Young, who was Chairman of the U.S. Reparations Commission. In addition to Mr. Young, I accompanied Mr. J. P. Morgan, Mr. Thomas Lamont, and Mr. Nelson Perkins, all members of the Commission. Our mission was to reach final agreement with the Germans on the debts and other problems left by World War I, and to replace what was then the Dawes plan with what later became the Young plan. In the company of these financial and industrial giants, and working as Mr. Young's assistant, I was selected to negotiate on behalf of our allies with Dr. Hjalmar Schacht, who represented the Germans. I carried on these negotiations with Dr. Schacht for some 6 weeks. Of course, we thought then we had solved the pressing problems of that time but we found out very soon thereafter that our plans and our hopes were all dashed to the ground by Adolf Hitler who repudiated the agreement that was signed in Paris.

However, the impressive and human part of that trip to me was not only the companionship of these important men, who were much older and wiser than I, but the fact that I was a member of that group, and that we were met at Cherbourg by high officials of the French Government. This time, no passport problems, no baggage problems, no customs problems. Our reception was conducted with the pomp and protocol that the French are so expert in providing. We were taken from a special tender to a private train supplied by the French Government which whisked us to Paris and the comforts of the Ritz Hotel.

I shall never forget the moment, during this third trip, when I stood on the deck of that tender, reflecting upon this novel experience. The picture that flashed through my mind then was my first crossing of the Atlantic in the steerage. I thought of the contrast between the two trips and the fact that this could happen only in America. For it is as true today as it was then, that no other country in the world provides such vast opportunities to develop and to express whatever talents an individual may possess. On that occasion, I remember saying to myself, "God bless America." Surely I am no exception for there are many, many others in the United States who have also developed, advanced and prospered. I have tried to convey this message to the rising generation of Americans and to point out to them that in my view there are more opportunities in our country today than there were when I arrived in New York in 1900. There are more people in the world, more wants to satisfy, and more resources and tools to employ today than there were then. No American boy or girl needs to weep with Alexander that there are no more worlds to conquer.

Now I come to my fourth trip, and that has occurred only today. From New York, I have come to the Capital of this Nation to be received and honored by the distinguished Members of the U.S. Senate—the greatest deliberative body in the world. I am not sure that any man deserves so great an honor as you are bestowing upon me, but I do want to express to you, Mr. Chairman, and to your distinguished colleagues, how deeply moved and profoundly grateful I am for the friendship you have shown me, for this handsome tribute and this wonderful reception.

I will not presume further upon your time, because I know that you must respond to the Senate rollcall. So I simply say, with all my heart, thank you and God bless you.

CLOSING REMARKS BY SENATOR AIKEN

And now, General Sarnoff, in order that you may have something with which really to remember your visit here today, it is my privilege to present you with this scroll and to read its inscription: "55th anniversary testimonial to David Sarnoff in commemoration of his dedicated service and outstanding contributions to the advancement of communications and electronics in the United States." [Applause.] And so that there may not be any anticlimax to the general's response, we will consider the meeting adjourned.

Emergency Feed Grains Bill, H.R. 4510

EXTENSION OF REMARKS

OF

HON. RALPH F. BEERMANN

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 1961

Mr. BEERMANN. Mr. Speaker, in the support of my continual plea for less Federal interference in agriculture, and the operation of free marketing system, I would like to offer the following feature story from the September 10 issue of the Kansas City Star. To properly digest the point made by the article it is necessary that I roll back the calendar a bit, specifically to Tuesday, February 21, 1961, when the Subcommittee on Livestock and Feed Grains was considering the emergency feed grains bill, H.R. 4510. During that hearing the bill received the complete backing of the U.S. Department of Agriculture. Referring to the published hearings on H.R. 4510, serial A, pages 42 and 43, the following colloquy between the new Secretary of Agriculture, Mr. Orville Freeman, and me took place. Secretary Freeman was supporting the bill:

Mr. BEERMANN?

Mr. BEERMANN. Mr. Secretary, I appreciate your position. I am an operating farmer, with five brothers. You have an operation with someone else.

I would like to ask a question: Are we to understand that the Secretary is establishing the price of soybeans at $2.30.

Secretary FREEMAN. It has not been established as of now. This is at present my intention, to so establish it.

Mr. BEERMANN. Thank you.

Now, corn is $1.06 and it is in trouble. Soybeans are $1.85 and they are not in trouble. I fail to understand how raising the price of soybeans to $2.30 and eventually asking me to grow soybeans, which I do not now, and then eventually asking the Government to buy my soybeans, is going to be a solution of our problem.

Secretary FREEMAN. I would only answer that by saying that although the support price is as you represented it, the market price is now about $2.47, and, as I have tried to indicate before, the best estimates we make are that there will be a stronger demand for soybeans and a greater need for them than there will be for feed grains.

Mr. BEERMANN. Thank you.

The soybean market price is presently strong because of industry promotion and grower ability to produce for a consuming market at a fair price, with a minimum of Government intervention. This is not so with the other feed grains. I do not think that two wrongs make a right. I would not like to see us get soybeans in the same position as feed grains.

I will say here that I do not know how to run your farm; I do not suppose that you know how to run mine, and I do not believe it is within the jurisdiction of this group of people to tell us how to run our farms, which is what is taking place by establishing market prices. I would like to offer for your consideration in all future legislation that when you submit these things, I am asking it simply from a farmer's standpoint, that you do it on the basis of having less Government in farm business instead of more.

I thank you.

Secretary FREEMAN. Thank you.

The point I was attempting to make in the above colloquy was that by raising the support price of soybeans, the Secretary would create the same problem for the soybean growers and soybean industry that Government intervention had created for feed grains.

I believe the following article indicates that my concern about the action of Secretary Freeman is becoming a reality. I recommend the article to my colleagues who may feel Federal interference is the way to solve agricultural problems:

[From the Kansas City Star, Sept. 10, 1961]

SURPLUS THREAT IN SOYBEAN CROP

(By Roderick Turnbull)

Around Kansas City, across the whole of the Corn Belt and in many other parts of the country, the finest soybean crop this Nation has ever seen is heading toward maturity. The acreage is the biggest ever and the estimated average yield is at a new record.

Everything apparently is lovely except for one thing. Many growers and others interested in the soybean industry are wondering if the yield is going to be so big that soybeans will join the category of crops in surplus. Once a crop is in surplus, usually it's in trouble.

A MIRACLE CROP

With all the difficulties we have had in recent years with overproduction in farm crops it shouldn't be too unusual for another to join the list. However, this is a particular case. Soybeans have been the miracle crop in the American scene in the last couple of decades.

The acreage has grown by leaps and bounds—always in response to a growing market demand. Price supports have been kept below market levels and the crops have moved into consumption with no troublesome surpluses developing for Government bins.

This year, Orville L. Freeman, secretary of agriculture, boosted soybean price supports in a deliberate effort to increase the bean acreage to take some pressure off corn. He got a 14-percent increase in acres and with nature providing almost perfect growing weather, the increase in production now is estimated at 22 percent over last year or 683 million bushels. This estimate was made as of August 1. Many authorities are suggesting the final total will be 700 million bushels or more. The harvest last year was 558,771,000 bushels.

Is this too much of a jump in yield for 1 year? Secretary Freeman and his administrators in the Department of Agriculture express confidence that this year's huge crop will find a market.

They point to difficulties with soybeans in China, where exports are down. Other nations have smaller yields both of beans and other oil-producing crops. Japan is taking more U.S. beans. Thus the market seems to be good. Also, the administration has a big ace in the hole. It always can give more beans or soybean oil away through the Public Law 480 program.

But this is just what the soybean industry fears. The industry has grown on dollar sales. Industry representatives have gone all over the world selling the American crop.

EDUCATIONAL PROGRAM

They have determined what other nations wanted in soybeans, in variety and in quality. They have taught other nations how to use soybeans and have convinced them in many cases that soybean oil is as good or better than other vegetable oils. The result has been a huge increase in the export trade. Nearly all bean sales have been for dollars although considerable of the oil has moved under Public Law 480 deals. The Department of Agriculture has cooperated with the industry in these efforts.

The soybean industry as represented by the American Soybean Association and the Soybean Council of America has been extremely proud of the record of the crop in the market. When Secretary Freeman boosted the price support this year from $1.85 a bushel to $2.30, the soybean association along with the American Farm Bureau protested that this was too high, even though bean prices at the time were still higher. Soybean prices on the market last winter hit $3 a bushel—after most of the 1960 crop was out of farmers' hands.

RESPONSE TO PRICE

The high price last winter definitely indictated a bigger acreage this year, but a guaranteed price (Government) usually is more of a stimulus to greater production than prospects of a higher price on the market.

Farmers are using their own judgment when they increase production in response to prospective demand. They win or lose. The Government is guiding production when it sets a price support high enough to induce a larger acreage. If there is a surplus, it becomes the Government's responsibility. But surpluses hurt farm prices in Government hands or otherwise.

At the recent convention of the American Soybean Association in Indianapolis, Charles V. Simpson, president of the group, in his annual address said the major problem facing soybean farmers is to avoid expanding production faster than they can build markets for the crop.

"Let us not allow ourselves," he said, "to be priced out of world markets by those who mean well, but fail to realize that we wish only to use support prices as a means to bring the soybean crop to market in an orderly manner."

MUST FIND PLACE

George M. Strayer, the association's executive vice president, said, "I sincerely hope we can, through united efforts of industry and Government, find a place to utilize the 683- to 700-million-bushel soybean crop. It is going to take concerted effort on the part of all concerned."

Strayer also commented that in raising price supports this year to $2.30, the U.S. Government had announced to the remainder of the world that it was, in effect, holding a price umbrella over the production of peanuts and palm kernels, sunflower seed, rapeseed and mustard seed, cottonseed, copra and all others in the long list of oilseeds and oil-bearing materials.

The association commended the Department of Agriculture and the soybean industry for "untiring efforts in the sales and trade promotional programs for soybeans and soybean products" and urged continued efforts on these programs. It also thanked Secretary Freeman for implementing the use of fats and oils in the oversea church and charity relief feeding program.

Soybeans are called America's miracle crop because of the remarkable growth in production in recent years. In 30 years the crop has come from a $10 million one to the billion-dollar class.

In the mid-1920's 1½ million acres were planted in soybeans; this year the acreage is 26.4 million. The yield has jumped in the same period from 5 million bushels to the prospective 683 million.

Many reasons may be given for this big increase in production, but the main one has been the growing demand for soybean meal as a protein feed for livestock and for soybean oil.

The crop first came into prominence in this country for use as hay and green manure. There was quite a buildup during the 1930's when the AAA encouraged the use of soybeans as a soil-building crop—to be turned under as green manure. In fact, up to 1941, over half the soybean acreage was for hay, grazing or green manure.

SUPPLIES CUT OFF

Before World War II, the United States was a net importer of oilseeds, fats and oils for both food and nonfood uses as well as livestock feed. Hostilities cut off many of our Far Eastern supplies at the same time a huge demand was building for them. The mixed feed industry called for great amounts of protein for livestock rations. Vegetable oils were in demand for shortening and for margarine which was replacing butter to a large extent. This demand was the springboard for soybeans. The acreage increased from 10.1 million acres in 1941 to 14.2 million in 1943 and averaged 12.8 million through the war.

Significantly, the big increase came after the end of the war. The demands for protein feeds and oils continued and expanded. Millions of acres which had been taken out of wheat, corn, and cotton under Government production control programs were diverted to the soybeans. A huge acreage once in oats also went to the beans—the oats, once needed for horses, were less in demand. During the 1950s, when every other major crop was showing a reduction in acreage, the soybean acreage jumped 124 percent—always in answer to market demand.

During this period, soybean growers actually asked that price supports be kept low enough to permit the crop to move to market.

Soybean authorities are convinced that peak has not yet been reached in demand for the crop and its byproducts. Longrun prospects suggest that within the next 10 to 15 years a billion-bushel crop may be utilized. But they wonder if the market can take in 1 year the big increase that is coming with this harvest.

BOOST FOR FARMERS

The 26 million acres in soybeans is a wonderful thing for American farmers. In a time when we have tried to cut plantings of other crops, think how much greater our troubles would be if we did not have soybeans.

I wonder how this new crop could have developed in this country if we had had in the past production controls that specified how each acre was to be used. Where is the man, in Government or out, who could have said in 1935 that we would need 26 million acres in soybeans in 1961? Where is the man who can tell us today the acreage that should be allotted for some new crop in 1980?

The District of Columbia Government Seems To Rely Entirely on Public Urban Renewal Programs Supported by Taxes, and Has Discouraged Renovation and Restoration of Commercial and Residential Property by Private Owners by Immediately Raising Taxes on Such Improved Property, Says Kalorama Citizens Association President

---

EXTENSION OF REMARKS

OF

HON. CARROLL D. KEARNS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 1961

Mr. KEARNS. Mr. Speaker, the president of the Kalorama Citizens Association, G. M. Koockogey, has written to me in part, as follows:

Our District of Columbia government seems to rely entirely on public urban renewal programs, supported by tax money, and has discouraged renovation and restoration of commercial and residential property by private owners by immediately raising taxes on such improved realty. Your House Joint Resolution 532 would correct this inequity by a reasonable tax adjustment that would encourage private redevelopment without the use of public funds.

Georgetown is an outstanding example of private restoration that didn't cost the taxpayers 1 cent and greatly increased the taxable basis. Another private restoration showcase is our own Kalorama triangle area, where over half a million dollars has been spent on more than 50 houses and apartments in less than 2 years.

Other citizen groups and the Federation of Citizens Associations have joined us in endorsing your idea of reasonable tax abatement to encourage private restoration of commercial and residential property."

The Washington (D.C.) Post reported that the contest-winning design for residential development of an 8.4-acre urban renewal site in southwest Washington will provide rental apartments up to $325 a month.

Since the urban renewal program was designed by the Congress to rehouse slum-dwellers, it would be helpful at this time if the Board of Commissioners, District of Columbia, told us how slum-dwellers in the Nation's Capital are able to afford apartments renting up to $325 a month.

A letter published in the Washington (D.C.) Post on September 13 comments tellingly on these $325-a-month apart-

ments which the New Frontier is providing in Southwest Washington with the aid of $70 million in Federal tax funds:

Once upon a time I was naive enough to believe that the southwest redevelopment plans would include housing I could afford. However, I see by the Washington Post that still another high-rise luxury apartment project is now off the drawing boards.

I'm not rich enough for the apartments now available in Southwest, and I'm not poor enough to qualify for one of the housing projects.

A new approach to urban renewal in the District of Columbia is long overdue, and I am pleased that the able and distinguished gentlemen from New York [Mr. MULTER], Delaware [Mr. McDOWELL], and Iowa [Mr. KYL] have joined with me in trying to develop a new, far less costly, and more human approach to the renovation, restoration, and rebuilding of our cities.

I include here the text of the measure introduced by my colleague the gentleman from New York [Mr. MULTER].

I include, in addition, the letter from Mr. Koockogey, president of the Kalorama Citizens Association, to which I have referred, as well as a letter published today in the Washington (D.C.) Post:

SEPTEMBER 9, 1961.

Hon. CARROLL D. KEARNS,
House Office Building,
Washington, D.C.

DEAR SIR: On behalf of the Kalorama Citizens Association, of Washington, I wish to express our deep appreciation of your leadership in introducing the most constructive urban renewal legislation in the past decade; I refer to House Joint Resolution 532.

Our thanks are due also to Congressmen MULTER, Democrat, of New York, KYL, Republican, of Iowa, and MCDOWELL, Democrat, of Delaware, for introducing similar bills.

This new bipartisan approach to urban renewal puts private renewal efforts in the District of Columbia on an equal basis with public urban renewal projects, which is as it should be.

Our District of Columbia government seems to rely entirely on public urban renewal programs, supported by our tax money, and has discouraged renovation and restoration of commercial and residential property by private owners by immediately raising taxes on such improved realty. Your House Joint Resolution 532 would correct this inequity by a reasonable tax adjustment that would encourage private redevelopment without the use of public funds.

Georgetown is an outstanding example of private restoration that didn't cost the taxpayers 1 cent and greatly increased the taxable basis. Another private restoration showcase is our own Kalorama Triangle area, where over half a million dollars has been spent on more than 50 houses and apartments in less than 2 years.

Other citizen groups and the Federation of Citizens Associations have joined us in endorsing your idea of reasonable tax abatement to encourage private restoration of commercial and residential property.

The fact that other Members are joining you in this legislation shows that it is of national importance to put private redevelopment all over the Nation on an equal footing with public urban renewal. This could save the taxpayers many millions of dollars and do the job in much less time.

Respectfully,

G. M. KOOCKOGEY,
President, Kalorama Citizens Association.
WASHINGTON, D.C.

HOUSING COSTS

LETTERS TO THE EDITOR

Once upon a time I was naive enough to believe that the Southwest redevelopment plans would including housing I could afford. However, I see by the Washington Post that still another high-rise luxury apartment project is now off the drawing boards.

I'm not rich enough for the apartments now available in Southwest, and I'm not poor enough to qualify for one of the housing projects.

Is there to be no end of these overpriced new projects? Is there no hope for persons in my income bracket who would like to live close by in a place that is new and clean? Not everyone wants an air-conditioned efficiency, or a larger unit in which to double up with another salaried member of the middle class. Some of us have only one income in our family, and are old-fashioned enough to want a more conventional home that is not in the suburbs.

SUZANNE T. COOPER.

WASHINGTON.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 6 of the Act of August 14, 1894 (D.C. Code, sec. 47–705), is amended by inserting "(a)" after "SEC. 6.", and by adding at the end thereof the following new subsection:

"(b) Notwithstanding any other provision of law, any increase in the value of the tract or lot of real property on which the taxpayer's personal residence is located (or of the improvements thereon) which is the result of the repair, alteration, renovation, or restoration of such residence shall be disregarded in making the valuation of the property under subsection (a) for the fiscal year in which such repair, alteration, renovation, or restoration is completed and for the four succeeding fiscal years. As used in the preceding sentence, the term 'taxpayer's personal residence' means real property which is owned by the taxpayer or his spouse or both at the time of the repair, alteration, renovation, or restoration involved and is occupied by them or either of them as their person residence at such time or within six months thereafter."

(b) The amendments made by subsection (a) shall apply only with respect to repairs, alterations, renovation, and restoration completed in fiscal years ending after the date of the enactment of this Act.

SEC. 2. (a) Section 3(a) of title III of the District of Columbia Income and Franchise Tax Act of 1947 (D.C. Code, sec. 47–1557b(a)) is hereby amended by adding at the end thereof the following new paragraph:

"(16) EXPENSES OF HOME REPAIR, MAINTENANCE, ALTERATIONS, AND ADDITIONS.—In the case of an individual, the expenses paid during the taxable year for the repair and maintenance of, or alterations or additions to, the personal residence of the taxpayer. The deduction under this paragraph shall be allowable only to the extent of the aggregate of such expenses actually paid by the taxpayer, and in no case shall it exceed $2,000. Such deduction shall be applicable only to expenses which are not otherwise allowable as deductions in computing net income under section 1 of this title. As used in this paragraph, the term 'personal residence of the taxpayer' means real property which is owned by the taxpayer or his spouse or both at the time of the repair, maintenance, alterations, or additions involved and is occupied by them or either of them as their personal residence at such time or within six months thereafter."

(b) The amendment made by subsection (a) shall apply only with respect to expenses paid during taxable years beginning after the date of the enactment of this Act.

SEC. 3. Section 7 of the District of Columbia Redevelopment Act of 1945 (D.C. Code, sec. 5–706) is hereby amended by adding at the end thereof the following new subsection:

"(j) Notwithstanding any other provision of this Act—

"(1) housing (including both residential and commercial structures) which are not substandard in any project area shall be preserved and shall not be demolished or included in the acquisition and assembling by the Agency of the real property in such area; and

"(2) the owner of any substandard structure (residential or commercial) which can be rehabilitated or restored to good condition in a project area shall be encouraged and assisted by the Agency to undertake and carry out such rehabilitation or restoration, and such structure shall not be demolished or included in the acquisition and assembling by the Agency of the real property in such area unless such owner, after having had a reasonable time following notification by the Agency to complete such rehabilitation or restoration has failed to do so; and in the case of any such failure the Agency, after acquiring the structure, shall itself provide for such rehabilitation or restoration whenever it determines that such rehabilitation or restoration is desirable or appropriate and shall dispose of the structure so rehabilitated or restored at such time and on such terms and conditions as it may determine to be in the public interest."

SEC. 4. The Act entitled "An Act providing for the zoning of the District of Columbia and the regulation of the location, height, bulk, and uses of buildings and other structures and of the uses of land in the District of Columbia, and for other purposes", approved June 20, 1938, as amended (D.C. Code, sec. 5–413 et seq.), is amended by redesignating section 17 as section 18 and by inserting after section 16 the following new section:

"SEC. 17. The provisions of this Act shall apply to chanceries and other business-type buildings of foreign nations in the District of Columbia, so as to conform with the general practice among nations of requiring the observance (by countries with which they maintain diplomatic relations) of their laws and zoning regulations in the location of such buildings; and the Zoning Commission shall accordingly include in its regulations under the first section of this Act such provisions as may be necessary to insure that such buildings are hereafter located only in areas appropriately zoned for such purposes."

Nation's Small Businessmen Strongly Oppose Free Delivery of Communist Propaganda

---

EXTENSION OF REMARKS

OF

HON. GLENN CUNNINGHAM

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 1961

Mr. CUNNINGHAM. Mr. Speaker, the National Federation of Independent Business regularly polls its membership of over 170,000 on key issues before the country.

The NFIB Mandate No. 268 recently contained the question: "Should the Post Office carry Communist propaganda free?"

The results, forwarded to me by Mr. George P. Burger, vice president of the NFIB, show 90 percent opposed to this distribution of Communist propaganda. Only 7 percent favored the distribution and 3 percent indicated no opinion.

This is graphic evidence of the support in the Nation for legislation such as that I introduced, H.R. 9004, which would ban from our mails any material found by the Attorney General to be Communist propaganda.

I am pleased to report also that a number of our colleagues have joined me in introducing this legislation, including the gentleman from Wyoming [Mr. HARRISON], the gentleman from South Dakota [Mr. BERRY], the gentleman from Kansas [Mr. DOLE], the gentleman from California [Mr. UTT], the gentleman from Ohio [Mr. HARSHA], and the gentleman from Michigan [Mr. HARVEY].

Feeding the Communist Menace

EXTENSION OF REMARKS
OF
HON. CATHERINE MAY
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Wednesday, September 13, 1961

Mrs. MAY. Mr. Speaker, on September 5 my very able and respected colleague, the Honorable GLENARD P. LIPSCOMB, of California, performed a valuable service to all Members of this body in bringing to our attention a number of shocking facts regarding our export control program with particular reference to controls on trade with the Soviet Union. This was in connection with House consideration of House Resolution 403, creating a select committee to conduct an investigation and study of the administration, operation, and enforcement of the Export Control Act of 1949, and related acts.

The concern of the Congress in the continued U.S. export of goods to Communist-dominated countries is testified to in the division vote in passage of House Resolution 403 of 90 yeas to 1 nay.

In further regard to this situation, I believe the Members will be interested in some additional facts revealed recently during a hearing before the Interstate and Foreign Commerce Committee on a bill to prohibit any exchange of articles between the United States and Cuba, except those destined for U.S. military use at Guantanamo Naval Base. Although a partial economic embargo was imposed on Cuba by the United States in October 1960, trade with Cuba today is being carried on as though relations between the two nations were nearly normal.

Under the restrictions, no U.S. goods are supposed to be exported to Cuba unless they can be classified as foodstuffs or medical supplies. However, according to committee testimony, exports to Cuba from the United States for the period January through March 1961, exceeded $6.9 million, of which $3.6 million consisted of lard. Lard, Mr. Speaker, is vital to the manufacture of nitroglycerine. Other exports include $400,000 in machinery and vehicles. Just last month, as an example, U.S. shipments to Communist Cuba included 42 diesel engines adaptable for military tank use.

At the same time, incoming shipments are appearing almost regularly at U.S. ports in Eastern and Gulf States, even though public indignation is so high that trucks transporting these commodities are masking their insignia to avoid public identification.

Although our Government has officially branded Cuba a clear and present danger to the security of this hemisphere, and the Congress has adopted a resolution recognizing the Communist affiliation of the present Government of Cuba, the executive branch has failed to invoke various means available for curtailing Cuban trade. Hesitation and inaction by the State Department and other offices of the administration only further serve as evidence of the executive branch's inability to combat Cuban communism in the forceful manner preached by Candidate Kennedy.

The State Department witness opposed the bill, H.R. 8459, apparently because it would weaken the flexibility of the State Department. This witness also seemed of the opinion that current shipments to Cuba are not of great consequence and therefore would not be worth the repercussions of a total economic embargo.

Other testimony before the committee brought to light the rising tide of congressional vexation against the Cuban dictatorship and determination of Members of the House to take action unless the administration does something soon.

The sponsorship of H.R. 8465 by Members of the majority party, the action of the Florida State Legislature in endorsing the resolution, and the support of the bill by Members on both sides of the aisle in this body gives testimony to the fact that the Congress, as are all Americans, is growing impatient with the administration's wait-and-see attitude regarding Cuba.

Although for humanitarian reasons, Mr. Speaker, certain organizations such as the Red Cross should be allowed to provide medical supplies to Cuban hospitals, we must refuse to continue to bolster Cuba's Communist economy. We must take a strong and decisive step as a symbol of leadership to other nations of the free world. Under present circumstances, how can we ask our friends to do what we do not do ourselves? How can we be critical of Canadian trade with Red China when we trade with Communist Cuba?

In instances such as this, I believe that when the administration refuses to take positive action, the Congress has every obligation and right to take the initiative.
